In 1989, the Utah Supreme Court denied Campbell's appeal in the wrongful death and tort actions. Slusher v. Ospital, 777 P.2d 437. State Farm then paid the entire judgment, including the amounts in excess of the policy limits. The Campbells nonetheless filed a complaint against State Farm alleging bad faith, fraud, and intentional infliction of emotional distress. ***

[After a jury found that State Farm's decision not to settle was unreasonable, a second jury addressed] State Farm's liability for fraud and intentional infliction of emotional distress, as well as compensatory

620

and punitive damages. The Utah Supreme Court aptly characterized this phase of the trial:

"State Farm argued during phase II that its decision to take the case to trial was an 'honest mistake' that did not warrant punitive damages. In contrast, the Campbells introduced evidence that State Farm's decision to take the case to trial was a result of a national scheme to meet corporate fiscal goals by capping payouts on claims

company wide. This scheme was referred to as State Farm's 'Performance, Planning and Review,' or PP & R, policy. To prove the existence of this scheme, the trial court allowed the Campbells to introduce extensive expert testimony regarding fraudulent practices by State Farm in its nation-wide operations. Although State Farm moved prior to phase II of the trial for the exclusion of such evidence and continued to object to it at trial, the trial court ruled that such evidence was admissible to determine whether State Farm's conduct in the Campbell case was indeed intentional and sufficiently egregious to warrant punitive damages." [C]

Evidence pertaining to the PP & R policy concerned State Farm's business practices for over 20 years in numerous States. Most of these practices bore no relation to third-party automobile insurance claims, the type of claim underlying the Campbells' complaint against the company. The jury awarded the Campbells $2.6 million in compensatory damages and $145 million in punitive damages, which the trial court reduced [through remittitur] to $1 million and $25 million respectively. Both parties appealed.

The Utah Supreme Court sought to apply the three guideposts we identified in [BMW of North America, Inc. a.] Gore [c], and it reinstated the $145 million punitive damages award. Relying in large part on the extensive evidence concerning the PP & R policy, the court concluded State Farm's conduct was reprehensible. The court also relied upon State Farm's "massive wealth" and on testimony indicating that "State Farm's actions, because of their clandestine nature, will be punished at most in one out of every 50,000 cases as a matter of statistical probability," [c], and concluded that the ratio between punitive and compensatory damages was not unwarranted.

Finally, the court noted that the punitive damages award was not excessive when compared to various civil and criminal penalties State Farm could have faced, including $10,000 for each act of fraud, the suspension of its license to conduct business in Utah, the disgorgement of profits, and imprisonment. [C] We granted certiorari. [C]

II

We recognized in Cooper Industries, Inc. v. Leatherman Tool Group, Inc., 532 U.S. 424 (2001) that in our judicial system compensatory and punitive damages, although usually awarded at the same time by the same decisionmaker, serve different purposes. [C] Compensatory damages "are intended to redress the concrete loss that the plaintiff has suffered by reason of the defendant's wrongful conduct." [C] (citing

621

Restatement (Second) of Torts § 903, pp. 453-454 (1979)). By contrast, punitive damages serve a broader function; they are aimed at deterrence and retribution. [C]; see also Gore, supra, at 568 ("Punitive damages may properly be imposed to further a State's legitimate interests in punishing unlawful conduct and deterring its repetition"); Pacific Mut. Life Ins. Co. v. Haslip, 499 U.S. 1 (1991) ("Punitive damages are imposed for purposes of retribution and deterrence").

While States possess discretion over the imposition of punitive damages, it is well established that there are procedural and substantive constitutional limitations on these awards. [Cc] The Due Process Clause of the Fourteenth Amendment prohibits the

imposition of grossly excessive or arbitrary punishments on a tortfeasor [Cc]; see also [Gore] at 587 (BREYER, J., concurring) ("This constitutional concern, itself harkening back to the Magna Carta, arises out of the basic unfairness of depriving citizens of life, liberty, or property, through the application, not of law and legal processes, but of arbitrary coercion"). The reason is that "elementary notions of fairness enshrined in our constitutional jurisprudence dictate that a person receive fair notice not only of the conduct that will subject him to punishment, but also of the severity of the penalty that a State may impose." [Cc] To the extent an award is grossly excessive, it furthers no legitimate purpose and constitutes an arbitrary deprivation of property. ***

Our concerns are heightened when the decisionmaker is presented, as we shall discuss, with evidence that has little bearing as to the amount of punitive damages that should be awarded. Vague instructions, or those that merely inform the jury to avoid "passion or prejudice," [C] do little to aid the decisionmaker in its task of assigning appropriate weight to evidence that is relevant and evidence that is tangential or only inflammatory.

In light of these concerns, in Gore [c], we instructed courts reviewing punitive damages to consider three guideposts: (1) the degree of reprehensibility of the defendant's misconduct; (2) the disparity between the actual or potential harm suffered by the plaintiff and the punitive damages award; and (3) the difference between the punitive damages awarded by the jury and the civil penalties authorized or imposed in comparable cases. [C] We reiterated the importance of these three guideposts in Cooper Industries and mandated appellate courts to conduct de novo review of a trial court's application of them

to the jury's award. [C] Exacting appellate review ensures that an award of punitive damages is based upon an " 'application of law, rather than a decisionmaker's caprice.'" [C]

III

Under the principles outlined in BMW of North America, Inc. v. Gore, this case is neither close nor difficult. It was error to reinstate the jury's $145 million punitive damages award. We address each guidepost of Gore in some detail.

622

A

"The most important indicium of the reasonableness of a punitive damages award is the degree of reprehensibility of the defendant's conduct." [C] We have instructed courts to determine the reprehensibility of a defendant by considering whether: the harm caused was physical as opposed to economic; the tortious conduct evinced an indifference to or a reckless disregard of the health or safety of others; the target of the conduct had financial vulnerability; the conduct involved repeated actions or was an isolated incident; and the harm was the result of intentional malice, trickery, or deceit, or mere accident. [C] The existence of any one of these factors weighing in favor of a plaintiff may not be sufficient to sustain a punitive damages award; and the absence of all of them renders any award suspect. It should be presumed a plaintiff has been made whole for his injuries by compensatory damages, so punitive damages should only be awarded if the defendant's culpability, after having paid compensatory damages, is so reprehensible as to

warrant the imposition of further sanctions to achieve punishment or deterrence. [C].

Applying these factors in the instant case, we must acknowledge that State Farm's handling of the claims against the Campbells merits no praise. ***While we do not suggest there was error in awarding punitive damages based upon State Farm's conduct toward the Campbells, a more modest punishment for this reprehensible conduct could have satisfied the State's legitimate objectives, and the Utah courts should have gone no further.

This case, instead, was used as a platform to expose, and punish, the perceived deficiencies of State Farm's operations throughout the country. The Utah Supreme Court's opinion makes explicit that State Farm was being condemned for its nationwide policies rather than for the conduct directed toward the Campbells. ***("This is a very important case.... It transcends the Campbell file. It involves a nationwide practice. And you, here, are going to be evaluating and assessing, and hopefully requiring State Farm to stand accountable for what it's doing across the country, which is the purpose of punitive damages") [quoting argument to jury], ***

A State cannot punish a defendant for conduct that may have been lawful where it occurred. [Cc] Nor, as a general rule, does a State have a legitimate concern in imposing punitive damages to punish a defendant for unlawful acts committed outside of the State's jurisdiction. ***

For a more fundamental reason, however, the Utah courts erred in relying upon this and other evidence: The courts awarded punitive damages to punish and deter conduct that bore no relation to the

Campbells' harm. A defendant's dissimilar acts, independent from the acts upon which liability was premised, may not serve as the basis for punitive damages. A defendant should be punished for the conduct that harmed the plaintiff, not for being an unsavory individual or business. *k

623

B

Turning to the second Gore guidepost, we have been reluctant to identify concrete constitutional limits on the ratio between harm, or potential harm, to the plaintiff and the punitive damages award. [Cc] We decline again to impose a bright-line ratio which a punitive damages award cannot exceed. Our jurisprudence and the principles it has now established demonstrate, however, that, in practice, few awards exceeding a single-digit ratio between punitive and compensatory damages, to a significant degree, will satisfy due process. In Haslip, in upholding a punitive damages award, we concluded that an award of more than four times the amount of compensatory damages might be close to the line of constitutional impropriety. [C]. We cited that 4-to-l ratio again in Gore. [C] The Court further referenced a long legislative history, dating back over 700 years and going forward to today, providing for sanctions of double, treble, or quadruple damages to deter and punish. [C] While these ratios are not binding, they are instructive. They demonstrate what should be obvious: Single-digit multipliers are more likely to comport with due process, while still achieving the State's goals of deterrence and retribution, than awards with ratios in range of 500 to 1, [c], or, in this case, of 145 to 1.

Nonetheless, because there are no rigid benchmarks that a punitive damages award may not surpass, ratios greater than those we have previously upheld may comport with due process where "a particularly egregious act has resulted in only a small amount of economic damages." ***The converse is also true, however. When compensatory damages are substantial, then a lesser ratio, perhaps only equal to compensatory damages, can reach the outermost limit of the due process guarantee. The precise award in any case, of course, must be based upon the facts and circumstances of the defendant's conduct and the harm to the plaintiff.

In sum, courts must ensure that the measure of punishment is both reasonable and proportionate to the amount of harm to the plaintiff and to the general damages recovered. In the context of this case, we have no doubt that there is a presumption against an award that has a 145-to-l ratio. The compensatory award in this case was substantial; the Campbells were awarded $1 million for a year and a half of emotional distress. This was complete compensation. The harm arose from a transaction in the economic realm, not from some physical assault or trauma; there were no physical injuries; and State Farm paid the excess verdict before the complaint was filed, so the Campbells suffered only minor economic injuries for the 18-month period in which State Farm refused to resolve the claim against them. The compensatory damages for the injury suffered here, moreover, likely were based on a component which was duplicated in the punitive award. Much of the distress was caused by the outrage and humiliation the Campbells suffered at the actions of their insurer; and it is a major role of punitive damages to

condemn such conduct. Compensatory damages, however, already contain this punitive element. See Restatement (Second) of Torts § 908, comment c, p. 466 (1977) ("In many cases in which compensatory damages include an amount for emotional distress, such as humiliation or indignation aroused by the defendant's act, there is no clear line of demarcation between punishment and compensation and a verdict for a specified amount frequently includes elements of both"). ***

C

The third guidepost in Gore is the disparity between the punitive damages award and the "civil penalties authorized or imposed in comparable cases." [C] We note that, in the past, we have also looked to criminal penalties that could be imposed. [Cc] The existence of a criminal penalty does have bearing on the seriousness with which a State views the wrongful action. When used to determine the dollar amount of the award, however, the criminal penalty has less utility. Great care must be taken to avoid use of the civil process to assess criminal penalties that can be imposed only after the heightened protections of a criminal trial have been observed, including, of course, its higher standards of proof. Punitive damages are not a substitute for the criminal process, and the remote possibility of a criminal sanction does not automatically sustain a punitive damages award.

Here, we need not dwell long on this guidepost. The most relevant civil sanction under Utah state law for the wrong done to the Campbells appears to be a $10,000 fine for an act of fraud, [c], an amount dwarfed by the $145 million punitive damages award. The

Supreme Court of Utah speculated about the loss of State Farm's business license, the disgorgement of profits, and possible imprisonment, but here again its references were to the broad fraudulent scheme drawn from evidence of out-of-state and dissimilar conduct. This analysis was insufficient to justify the award.

IV

An application of the Gore guideposts to the facts of this case, especially in light of the substantial compensatory damages awarded (a portion of which contained a punitive element), likely would justify a punitive damages award at or near the amount of compensatory damages. The punitive award of $145 million, therefore, was neither reasonable nor proportionate to the wrong committed, and it was an irrational and arbitrary deprivation of the property of the defendant. The proper calculation of punitive damages under the principles we have discussed should be resolved, in the first instance, by the Utah courts.

The judgment of the Utah Supreme Court is reversed, and the case is remanded for proceedings not inconsistent with this opinion.

It is so ordered.

[The dissenting opinions of JUSTICES SCALIA, THOMAS, and GINSBURG are omitted]

625

NOTES AND QUESTIONS

1. The principal case is one in a series of Supreme Court decisions, beginning in 1991, setting Due Process limits on the authority of a state to impose punitive damages in a civil case. If you were seated

on the Utah Supreme Court, how would you rule on remand? What is the Constitutionally permitted amount of punitive damages for this case? "When considered in light of all of the Gore reprehensibility factors, we conclude that a 9-to-l ratio between compensatory and punitive damages, yielding a $9,018,780.75 punitive damages award, serves Utah's legitimate goals of deterrence and retribution within the limits of due process." Campbell v. State Farm Mutual Automobile Ins. Co., 2004 UT 34, 98 P.3d 409, 418, cert, denied, 543 U.S. 874, 125 S.Ct. 114 (2004).

2. Note that the opinion in the Campbell case, as part of the discussion of the Gore reprehensibility guideposts, holds that the jury may not punish the defendant for conduct that occurred outside of the state. In its next consideration of the Due Process limits on punitive damages, the Supreme Court ruled that the jury may not punish the defendant for injury that it inflicted on nonparties. Philip Morris USA v. Williams, 549 U.S. 346 (2007). As a trial court judge, how would you permit the plaintiff to introduce evidence that the conduct was reprehensible because it could have injured many people while protecting the defendant from being punished for injuries to others? Here is the Ninth Circuit's Model Jury Instruction on this issue. Does it accomplish those goals? "In considering the amount of any punitive damages, consider the degree of reprehensibility of the defendant's conduct, including whether the conduct that harmed the plaintiff was particularly reprehensible because it also caused actual harm or posed a substantial risk of harm to people who are not parties to this case. You may not, however, set the amount of any punitive damages in order to punish the defendant for harm to anyone other than the plaintiff in this

case." See also Ray v. Allergan, Inc., 863 F.Supp.2d 552 (E.D.Va. 2012) (plaintiff's lawyer during the closing argument is not permitted to ask the jury to consider all those, like his client, who had been exposed to BOTOX as a treatment for minor conditions) and Lens, "An Undetectable Constitutional Violation," 106 Ky. L.J. 179 (2018) (examining lower courts' attempts to comply with Philip Morris').

3. Is defendant subject to punitive damages if its product complied with government standards? Compare Wyeth v. Rowatt, 244 P.3d 765 (Nev. 2012) (manufacturer's alleged compliance with regulations promulgated by Food and Drug Administration governing labeling and drug testing, by itself, did not absolve it of punitive damages) and Ariz. Rev. Stat. § 12-689 (no punitive damages if "product, activity or service complied with all statutes of this state or the United States or standards, rules, regulations, orders or other actions of a government agency pursuant to statutory authority that are relevant and material to the event or risk allegedly causing the harm.").

4. Calculation of Amount. There is a strong tradition in many jurisdictions of requiring that the punitive damages award bear some reasonable relation to the compensatory award. This usually is expressed in

terms of a factor to be considered by the jury, although some jurisdictions have set firmer guidelines by statute. Fla. Stat. § 768.73 (greater of three times compensatory or $500,000 except under certain specified circumstances when it is greater of four times or $2,000,000); Colo. Rev. Stat. §§ 13-21-102(l)(a) and (3) (one times compensatory or three times compensatory under specified

circumstances); and N.J. Stat. § 2A: 15--5.14 (greater of five times compensatory or $350,000). Some jurisdictions have imposed a cap on the amount of punitive damages. Va. Code Ann. § 8.01--38.1 ($350,000).

The United States Supreme Court, sitting as a common law court in its admiralty jurisdiction, must determine whether punitive damages are allowed. The Dutra Group v. Batterton, 139 S.Ct. 2275 (U.S. 2019) (not in an unseaworthiness case). And then, if it is allowed, "the fair upper limit" for maritime cases. Exxon Shipping Co. v. Baker, 554 U.S. 471, 512 (2008) (permitted in an oil spill case). The Exxon Court arrived at a 1:1 ratio as appropriate. Because that is not a constitutional ruling, the opinion does not bind the states. Do you think it might nonetheless influence their decisions about their own punitive damages regimes?

5. Within the limits set by a cap or ratio, what factors should the jury consider in setting the amount of punitive damages? In California, the jury may consider "the character of defendant's act, the nature and extent of the harm to the plaintiff and the wealth of the defendant." See Coats v. Construction & Gen. Laborers Local No. 185, 15 Cal.App.3d 908, 93 Cal.Rptr. 639 (1971). Oregon advises the jury to consider the likelihood that serious harm would arise from the misconduct, the degree of defendant's awareness of the misconduct, the profitability of the misconduct, the duration of the misconduct and any concealment of it, the attitude and conduct of defendant upon discovery of the misconduct, the financial condition of the defendant, and the total deterrent effect of other punishment imposed for the same conduct. Ore. Rev. Stat. § 30.925. South Carolina directs the jury to consider the degree of culpability, the

duration of the conduct, the awareness or concealment of conduct, the existence of similar past conduct, the likelihood that the award will deter defendant or other, whether the award is reasonably related to the harm likely to result, the defendant's ability to pay, and any other factors deemed appropriate. Atlas Food Sys. and Svcs., Inc. v. Crane Nat. Vendors, Inc., 99 F.3d 587 (4th Cir. 1996). What evidence would a plaintiff use to prove that defendant's conduct met those standards? Sims v. Pappas, 73 N.E.3d 700 (Ind. 2017) (in case involving drunk driving, plaintiffs permitted to introduce evidence of prior DWI and reckless driving convictions).

6. Where defendant's wealth is relevant to the determination of the amount of punitive damages, who has the burden of producing that evidence? Compare Anderson v. Latham Trucking Co., 728 S.W.2d 752 (Tenn. 1987) (either plaintiff or the defendant may offer proof of the financial condition of defendant but it is not essential or mandatory that the record contain any such evidence to sustain an award of punitive damages) with Adams v. Murakami, 54 Cal.3d 105, 813 P.2d 1348, 284 Cal.Rptr. 318 (1991) (plaintiff has burden). Where defendant's wealth is not relevant, financial records are

neither admissible nor discoverable. Corbetta v. Albertson's, Inc., 975 P.2d 718 (Colo. 1999) (because punitive damages tied directly to amount of compensatory damages, no discovery of financial records permitted). How is the defendant's financial status to be measured? By net worth or annual sales or profits? By all its revenue or just the revenue related to the offending conduct? The fact that the defendant's wealth is considered may justify different awards

against two defendants who engaged in equally culpable conduct. See Joab, Inc. v. Thrall, 245 So.2d 291 (Fla.App. 1971) (evidence showed that Joab has a substantial net worth but that co-defendant had only a weekly salary, so jury could properly have found that an award of punitive damages would have caused bankruptcy to the co-defendant and awarded zero dollars, but could have also found that an award of $5,000 as punitive damages from the corporate defendant would properly and effectively punish it). Georgia has permitted the admission of evidence of the CEO's salary and benefits in a case where the CEO was alleged to have specifically interjected himself into a federal safety investigation to the detriment of the plaintiffs. Chrysler Group, LLC v. Walden, 303 Ga. 358, 812 S.E.2d 244 (2018) (in balancing probative value against prejudicial effect, noting that jury's evaluation of the bias and credibility of Chrysler's CEO was central to the allegations in the case).

7. Some courts permit the defendant to show that he has been criminally punished for the same wrong or punished in an earlier civil suit in an effort to lower the amount of punitive damages imposed. Compare Hanover Ins. Co. v. Hayward, 464 A.2d 156 (Me.1983) (fact-finder may consider whether criminal liability has been imposed as one factor in determining whether an award of damages would serve as a meaningful deterrent) with Owens-Illinois, Inc. v. Zenobia, 325 Md. 420, 601 A.2d 633 (1992) (after discussing proof problems associated with such a proffer, court declined to "impose this onerous burden on the trial court"). See also Ore. Rev. Stat. § 30.925(2)(g) and Owens-Corning Fiberglas Corp. v. Malone, 972 S.W.2d 35 (Tex. 1998) (evidence of paid punitive damages awards and past settlements that specified amounts for punitive damages

relevant when offered in mitigation of punitive damages). Are there tactical reasons why defense counsel may decline this opportunity?

8. Procedural Issues. Most jurisdictions permit the jury to consider evidence, like the wealth of the defendant, in awarding punitive damages that would be irrelevant and unduly prejudicial on the liability and compensatory damages aspects of the case. Therefore, many jurisdictions have developed various safeguards to protect against the misuse of that evidence. Some require that the plaintiff make a prima facie showing of entitlement to punitive damages before permitting discovery of financial information. Others require that the trial be bifurcated so that the jury does not hear evidence of defendant's financial status until after it has ruled on liability, compensatory damages, and liability for punitive damages. Campen v. Stone, 635 P.2d 1121 (Wyo.1981) (adopting bifurcation procedure through case law); Cal. Civ. Code Ann. § 3295(d) (requiring bifurcation on request of defendant in case seeking punitive damages); Kan. Stat. Ann. § 60-3701(a)--

(b) (trier of fact determines liability for punitive damages, then court determines amount).

9. The applicable burden of proof for establishing entitlement to punitive damages is clear and convincing evidence in most jurisdictions. This standard is between "preponderance of the evidence" and the criminal standard "beyond a reasonable doubt." See Rodriguez v. Suzuki Motor Corp., 936 S.W.2d 104 (Mo. 1996) (adopting the higher standard because punitive damages are extraordinary and harsh and listing twenty-four jurisdictions that

adopted the higher standard by statute and seven other jurisdictions that adopted it by judicial decision) and W.Va. Code § 55-7-29(a).

10. Like Indiana in the Cheatham case, some jurisdictions have directed that a portion of the punitive damages award be paid to a state fund. Ga. Code Ann. § 51--12-5.1(e)(2) (three-quarters of punitive damages award, less proportionate share of costs and attorneys' fees, must be paid to state treasury); Iowa Code § 668A. l(2)(b) (in certain circumstances, 75% of punitive damages, after payment of costs and counsel fees, goes to civil reparations trust fund); and Ore.Rev.Stat. § 31.735 (60% to compensation fund for crime victims). The Ohio Supreme Court has done so without benefit of legislature. Dardinger v. Anthem Blue Cross & Blue Shield, 98 Ohio St.3d 77, 781 N.E.2d 121 (2002) (ordering portion of $30 million punitive damages award to go to cancer research fund at state university). Do you see why no state provides that all of the award go to a state fund? What would be the incentive for the claimant and the claimant's attorney to pursue the punitive damages case? Should the jury be told that a portion of the punitive damages goes to the state? Honeywell v. Sterling Furniture Co., 310 Or. 206, 797 P.2d 1019 (1990) (no, because jury might be encouraged to award damages for improper reason--to enhance state account) and Ford v. Uniroyal Goodrich Tire Co., 267 Ga. 226, 476 S.E.2d 565 (1996) (no, because who will benefit from the award or how much plaintiff will ultimately receive is irrelevant to jury's consideration of the amount of the award that is focused on the defendant).

11. Vicarious Liability for Punitive Damages. Some courts take the position that a party can be liable for punitive damages only for the party's own conduct and not vicariously liable for the acts of others,

like agents or employees. Others take the position that when the agent or employee commits an act that makes the agent liable for punitive damages, the principal or employer should be liable as well. Goddard v. Grand Trunk Ry., 57 Me. 202, 2 Am.Rep. 39 (1869) (discussing policy implications). Most courts take the middle position of the Restatement (Second) of Torts § 909 (1977) and hold that the principal (whether an individual or corporation) is liable only if the principal authorized or ratified the act, was reckless in employing or retaining the agent, or the agent was employed in a managerial capacity and was acting in the scope of employment. See, e.g., Chuy v. Philadelphia Eagles Football Club, Inc., 595 F.2d 1265 (3d Cir.1979) (applying Pennsylvania law) and Purvis v. Prattco, Inc., 595 S.W.2d 103 (Tex.1980).

12. Defendants sometimes carry liability insurance that provides for reimbursement of "all sums" incurred in defending tort lawsuits against them. Harleysville Group Ins. v. Heritage Communities, Inc., 420 S.C. 321,

629

803 S.E.2d 288 (2017) ("those sums" insured becomes legally obligated to pay as damages arising from an occurrence include punitive damages). Should the insurance company be able to avoid paying the punitive damages portion of an award by arguing that it is against public policy to permit the insured to shift the burden of punishment to an insurance company? Jurisdictions have split on this issue. Compare Allen v. Simmons, 533 A.2d 541 (R.1.1987) (burden of satisfying punitive damage award should remain with wrongdoer and not be spread upon the blameless through higher

insurance premiums) with Whalen v. On-Deck, Inc., 514 A.2d 1072 (Del.1986) (wrongdoer who is insured would still be punished through higher insurance premiums or loss of insurance); Hensley v. Erie Ins. Co., 168 W.Va. 172, 283 S.E.2d 227 (1981) (increased cost of insurance has some deterrent effect and punishment is not the only use of punitive damages; additional compensation to plaintiff is part of reason for award); and Westchester Fire Ins. Co. v. Admiral Ins. Co., 152 S.W.3d 172 (Tex. App. 2004) (declining to hold insurability of punitive damages is against public policy in absence of clear indication from either legislature or supreme court).

[BLANK PAGE]

CHAPTER 11 WRONGFUL DEATH AND SURVIVAL

At common law, the cause of action for personal injury was extinguished by the death of either the plaintiff or the defendant: it was said the cause of action was "interred with the bones." Moreover, there was no separate cause of action that arose to compensate the family of the person who was injured for the losses suffered by the family. Thus, as Dean Prosser has said, "it was more profitable for the plaintiff to kill a man than to scratch him." By mid-19th Century this was beginning to change. First, in England with the passage of Lord Campbell's Act (1846), sometimes called the Compensation to Relatives Act, and later with the Survival of Actions Legislation (1934), Parliament abrogated the common law rules. In the United States, state by state, changes were made by statute to the common law rules. Now, in every state, there is some form of recovery for the death of another due to tortious conduct. In most states, there are two statutes that change the common law in this area: the survival statute and the wrongful death statute.

Although the statutes vary by jurisdiction, basically the survival statute reverses the common law rule by providing that a cause of action for personal injury survives the death of the plaintiff or the defendant or both. The cause of action decedent would have had survives the death of either party. If it is a defendant who has died, the claim may be brought against the defendant's estate. If it is a plaintiff who has died, usually the claim can be brought by the executor or administrator of the estate on behalf of the estate. Note

that the cause of the death of the plaintiff may be independent of the defendant's wrongdoing.

Under the wrongful death statute, on the other hand, a new cause of action is created by the death of an individual due to the tortious conduct of another. It is a new, independent cause of action created on behalf of certain beneficiaries designated by the statute. It is to be brought by one of the beneficiaries on behalf of all of them or by the personal representative of the decedent on behalf of the statutory beneficiaries. Sometimes the statute provides for categories or classes of beneficiaries, giving priority to one class of beneficiaries (spouse and minor children) over others (adult children). It is only if there is no one in a class (e.g., no spouse or minor children) that a claim arises for someone in the class with the next priority (e.g., adult children).

632

1. Wrongful Death

Moragne v. States Marine Lines, Inc.

Supreme Court of the United States, 1970.

398 U.S. 375. 90 S.Ct. 1772, 26 L.Ed.2d 339.

Mr. JUSTICE Harlan delivered the opinion of the Court. We brought this case here to consider whether The Harrisburg, 119 U.S. 199, in which this Court held in 1886 that maritime law does not afford a cause of action for wrongful death, should any longer be regarded as acceptable law.

The complaint sets forth that Edward Moragne, a longshoreman, was killed while working aboard the vessel Palmetto State in navigable waters within the State of Florida. Petitioner, as his widow and representative of his estate, brought this suit in a state court against respondent States Marine Lines, Inc., the owner of the vessel, to recover damages for wrongful death and for the pain and suffering experienced by the decedent prior to his death. The claims were predicated upon both negligence and the unseaworthiness of the vessel. ***

The Court's opinion in The Harrisburg acknowledged that the result reached had little justification except in primitive English legal history--a history far removed from the American law of remedies for maritime deaths. ***

One would expect, upon an inquiry into the sources of the common-law rule, to find a clear and compelling justification for what seems a striking departure from the result dictated by elementary principles in the law of remedies. Where existing law imposes a primary duty, violations of which are compensable if they cause injury, nothing in ordinary notions of justice suggests that a violation should be nonactionable simply because it was serious enough to cause death. On the contrary, that rule has been criticized ever since its inception, and described in such terms as "barbarous." [Cc] Because the primary duty already exists, the decision whether to allow recovery for violations causing death is entirely a remedial matter. It is true that the harms to be assuaged are not identical in the two cases: in the case of mere injury, the person physically harmed is made whole for his harm, while in the case of death, those closest to him--usually spouse and children--seek to recover for their total loss of one on

whom they depended. This difference, however, even when coupled with the practical difficulties of defining the class of beneficiaries who may recover for death, does not seem to account for the law's refusal to recognize a wrongful killing as an actionable tort. One expects, therefore, to find a persuasive, independent justification for this apparent legal anomaly.

Legal historians have concluded that the sole substantial basis for the rule at common law is a feature of the early English law that did not survive into this century--the felony-merger doctrine. [Cc] According to

633

this doctrine, the common law did not allow civil recovery for an act that constituted both a tort and a felony. The tort was treated as less important than the offense against the Crown, and was merged into, or pre-empted by, the felony. [Cc] The doctrine found practical justification in the fact that the punishment for the felony was the death of the felon and the forfeiture of his property to the Crown; thus, after the crime had been punished, nothing remained of the felon or his property on which to base a civil action. Since all intentional or negligent homicide was felonious, there could be no civil suit for wrongful death.

The first explicit statement of the common-law rule against recovery for wrongful death came in the opinion of Lord Ellenborough, sitting at nisi prius, in Baker v. Bolton, 1 Camp. 493, 170 Eng.Rep. 1033 (1808). That opinion did not cite authority, or give supporting reasoning, or refer to the felony-merger doctrine in announcing that " [i]n a Civil court, the death of a human being could not be

complained of as an injury." Ibid. Nor had the felony-merger doctrine seemingly been cited as the basis for the denial of recovery in any of the other reported wrongful-death cases since the earliest ones, in the 17th century. [Cc] However, it seems clear from those first cases that the rule of Baker v. Bolton did derive from the felony-merger doctrine, and that there was no other ground on which it might be supported even at the time of its inception. ***

The historical justification marshaled for the rule in England never existed in this country. In limited instances American law did adopt a vestige of the felony-merger doctrine, to the effect that a civil action was delayed until after the criminal trial. However, in this country the felony punishment did not include forfeiture of property; therefore, there was nothing, even in those limited instances, to bar a subsequent civil suit. [Cc]

Nevertheless, despite some early cases in which the rule was rejected as "incapable of vindication," [cc] American courts generally adopted the English rule as the common law of this country as well. ***

It was suggested by some courts and commentators that the prohibition of nonstatutory wrongful-death actions derived support from the ancient common-law rule that a personal cause of action in tort did not survive the death of its possessor [c], and the decision in Baker v. Bolton itself may have been influenced by this principle. [C] However, it is now universally recognized that because this principle pertains only to the victim's own personal claims, such as for pain and suffering, it has no bearing on the question whether a dependent

should be permitted to recover for the injury he suffers from the victim's death. [Cc]

We need not, however, pronounce a verdict on whether The Harrisburg, when decided, was a correct extrapolation of the principles of decisional law then in existence. A development of major significance has intervened, making clear that the rule against recovery for wrongful death is sharply out of keeping with the policies of modern American maritime law. ***

634

[Legislatures both here and in England began to evidence unanimous disapproval of the rule against recovery for wrongful death. The first statute partially abrogating the rule was Lord Campbell's Act, 9 & 10 Viet., c. 93 (1846), which granted recovery to the families of persons killed by tortious conduct, "although the Death shall have been caused under such Circumstances as amount in Law to Felony."

In the United States, every State today has enacted a wrongful-death statute. [C] The Congress has created actions for wrongful deaths of railroad employees, Federal Employers' Liability Act; of merchant seamen, Jones Act, [c]; and of persons on the high seas, Death on the High Seas Act, [c]. Congress has also, in the Federal Tort Claims Act,[c], made the United States subject to liability in certain circumstances for negligently caused wrongful death to the same extent as a private person. [C]

These numerous and broadly applicable statutes, taken as a whole, make it clear that there is no present public policy against allowing recovery for wrongful death. The statutes evidence a wide rejection

by the legislatures of whatever justifications may once have existed for a general refusal to allow such recovery. This legislative establishment of policy carries significance beyond the particular scope of each of the statutes involved. The policy thus established has become itself a part of our law, to be given its appropriate weight not only in matters of statutory construction but also in those of decisional law. ***

It has always been the duty of the common-law court to perceive the impact of major legislative innovations and to interweave the new legislative policies with the inherited body of common-law principles--many of them deriving from earlier legislative exertions.

[The court then concluded that it was sometimes the duty of the common law court to bend to the weight of legislative authority and noted that Congress by its failure to enact a specific remedy did not intend to forestall recovery for wrongful death in admiralty and that the doctrine of stare decisis does not preclude a change in law.]

Respondents argue that overruling The Harrisburg will necessitate a long course of decisions to spell out the elements of the new "cause of action." We believe these fears are exaggerated, because our decision does not require the fashioning of a whole new body of federal law, but merely removes a bar to access to the existing general maritime law. In most respects the law applied in personal-injury cases will answer all questions that arise in death cases. ***

The one aspect of a claim for wrongful death that has no precise counterpart in the established law governing nonfatal injuries is the determination of the beneficiaries who are entitled to recover. General maritime law, which denied any recovery for wrongful death,

found no need to specify which dependents should receive such recovery. On this question, petitioner and the United States argue that we may look for

635

guidance to the expressions of Congress, which has spoken on this subject in the Death on the High Seas Act, the Jones Act, and the Longshoremen's and Harbor Workers' Compensation Act. Though very similar, each of these provisions differs slightly in the naming of dependent relatives who may recover and in the priority given to their claims. ***

We do not determine this issue now, for we think its final resolution should await further sifting through the lower courts in future litigation. For present purposes we conclude only that its existence affords no sufficient reason for not coming to grips with The Harrisburg. If still other subsidiary issues should require resolution, such as particular questions of the measure of damages, the courts will not be without persuasive analogy for guidance. Both the Death on the High Seas Act and the numerous state wrongful-death acts have been implemented with success for decades. The experience thus built up counsels that a suit for wrongful death raises no problems unlike those that have long been grist for the judicial mill.

In sum, in contrast to the torrent of difficult litigation that has swirled about The Harrisburg ***and the problems of federal-state accommodation [it] occasioned, the recognition of a remedy for wrongful death under general maritime law can be expected to bring more placid waters. That prospect indeed makes for, and not against, the discarding of The Harrisburg.

We accordingly overrule The Harrisburg, and hold that an action does lie under general maritime law for death caused by violation of maritime duties. The judgment of the Court of Appeals is reversed, and the case is remanded to that court for further proceedings consistent with this opinion. It is so ordered.

Reversed and remanded.

NOTES AND QUESTIONS

1. American maritime law was the last island for the common law rule that "the death of a human being could not be complained of as an injury." Baker v. Bolton, 1 Camp. 493, 170 Eng.Rep. 1033 (N.P.1808). Lord Ellenborough did not supply reasons for his rule, but later sympathizers with his result have given at least two. First, allowing a claim would lead jurors to award runaway damages and, second, it is "immoral" to place a monetary value on a human life.

2. The principal case is unusual in making a major change away from the common law rule by the process of judicial decision, rather than by action of the legislature. In its subsequent decision of Sea-Land Services, Inc. v. Gaudet, 414 U.S. 573 (1974), the Supreme Court elaborated on its holding that there is a maritime common law cause of action for wrongful death. It held that the fact that the decedent had previously recovered damages for loss of wages, pain and suffering, and medical expenses did not interfere with the independent common law cause of action for wrongful death resulting

from the original injury, so that the later action was not precluded by res judicata. Recovery for wrongful death was held to cover damages for (1) "loss of support, ***[including] all the financial support that the decedent would have made to his dependents had he lived," (2) "the monetary value of services the decedent provided and would have continued to provide but for his wrongful death *** [including] the nurture, training, education, and guidance that a child would have received had not the parent been wrongfully killed *** [plus] services the decedent performed at home or for his spouse," (3) "compensation for loss of society ***, [including] a broad range of mutual benefits each family member receives from the others' continued existence, including love, affection, care, attention, companionship, comfort and protection," and (4) "damages for funeral expenses ***in circumstances where the decedent's dependents have either paid for the funeral or are liable for its payment." The potential for double liability coming from the awards to the decedent for loss of future wages and to the dependents for loss of support was held to be controlled by the law of collateral estoppel and is carefully monitored by the courts. See Alfone v. Sarno, 87 N.J. 99, 432 A.2d 857 (1981) for a discussion of the risk of duplication of damages in such cases and how the courts avoid that risk. Note also that most states permit a wrongful death action on behalf of beneficiaries only if the decedent had not previously recovered damages arising out of the accident before his death. See note 14, page 655.

3. All fifty states have some form of statutory action for the recovery of the wrongful death of another. Most of the statutes were modeled after Lord Campbell's Act, mentioned by Justice Harlan. These

statutes vary in many important respects and the material considered in this Chapter is necessarily only introductory in nature. Lawyers have the benefit of an excellent treatise on the subject that treats the statutes individually and provides a wealth of information on state-specific issues. See S. Speiser, Recovery for Wrongful Death and Injury (4th ed. 2005, with online updates). The topic of wrongful death differs from many others in the law of torts because it is statutory. Courts must engage in the process of statutory construction and fathoming legislative intent. This is not an easy process with regard to wrongful death statutes because there is rarely much legislative history and most statutes are over one hundred years old. It also means that the court has less flexibility in meeting new circumstances than it might have with common law causes of action. For example, a statute that names "spouse" as the beneficiary may not be interpreted by the courts to extend to a "domestic partner" or "civil union partner." Any such expansion must be made by the legislature.

4. Representative wrongful death statutes from two states provide as follows:

South Carolina

"Civil Action for Wrongful Act Causing Death. Whenever the death of a person shall be caused by the wrongful act, neglect or default of another and the act, neglect or default is such as would, if death had not ensued, have entitled the party injured to maintain an action and recover damages in respect thereof, the person who would have been liable, if death had not

ensued, shall be liable to an action for damages, notwithstanding the death of the person injured, although the death shall have been caused under such circumstances as make the killing in law a felony. In the event of the death of the wrongdoer, such cause of action shall survive against his personal representative." S.C.Code § 15-51-10.

"Beneficiaries of Action for Wrongful Death; By Whom Brought. Every such action shall be for the benefit of the wife or husband and child or children of the person whose death shall have been so caused, and, if there be no such wife, husband, child or children, then for the benefit of the parent or parents, and if there be none such, then for the benefit of the heirs of the person whose death shall have been so caused. Every such action shall be brought by or in the name of the executor or administrator of such person." Id. § 15-51-20.

Kentucky

"Action for Wrongful Death--Personal Representative to Prosecute--Distribution of Amount Recovered. (1) Whenever the death of a person results from an injury inflicted by the negligence or wrongful act of another, damages may be recovered for the death from the person who caused it, or whose agent or servant caused it. If the act was willful or the negligence gross, punitive damages may be recovered. The action shall be prosecuted by the personal representative of the deceased. (2) The amount recovered, less funeral expenses and the cost of administration and costs of recovery including the attorney fees, not included in the recovery from the defendant, shall be for the benefit of and go to the kindred of the deceased in the following order: (a) If the deceased leaves a

widow or husband, and no children or their descendants, then the whole to the widow or husband, (b) If the deceased leaves a widow and children or a husband and children, then one-half (1/2) to the widow or husband and the other one-half (1/2) to the children of the deceased, (c) If the deceased leaves a child or children, but no widow or husband, then the whole to the child or children, (d) If the deceased leaves no widow, husband or child, then the recovery shall pass to the mother and father of the deceased, one (1) moiety each, if both are living; if the mother is dead and the father is living, the whole thereof shall pass to the father; and if the father is dead and the mother living, the whole thereof shall go to the mother. In the event the deceased was an adopted person, 'mother' and 'father' shall mean the adoptive parents of the deceased, (e) If the deceased leaves no widow, husband or child, and if both father and mother are dead, then the whole of the recovery shall become a part of the personal estate of the deceased, and after the payment of his debts the remainder, if any, shall pass to his kindred more remote than those above named, according to the law of descent and distribution." Ky. Rev. Stat. § 411.130.

5. Proper Party. Note that both of these statutes provide that the action is to be brought by the personal representative of the deceased for the benefit of the named beneficiaries. Some statutes provide that the action should be brought by the beneficiaries themselves. In a jurisdiction that provides that the wrongful death action for a minor child must be brought by his "surviving mother or father," can his grandmother bring the action? The child had lived with the grandmother and she alleged that she was his

"psychological" or "de facto" mother and that the parents had agreed to her bringing the action. Goodleft v. Gullickson, 556 N.W.2d 303 (N.D.1996) (grandmother not entitled to bring claim even though she had been in loco parentis', trial court should permit parents to substitute themselves as parties). In a jurisdiction that provides the action can be brought by the parent only if there is no surviving spouse or child, what happens if an (adult) child was killed by his spouse? Can decedent's mother bring the action despite the fact that there is a surviving spouse in prison? Carringer v. Rodgers, 276 Ga. 359, 578 S.E.2d 841 (2003) (holding that the equity powers of the court can be used to permit mother to bring action even though literal reading of statute would not allow). What if the statutory beneficiary is also the tortfeasor? Bagley v. Bagley, 387 P.3d 1000 (Utah 2016) (Ms. Bagley could act in her capacity as representative of her husband's estate to file an action against herself in her individual capacity based on her negligent driving). [Note that the question of proper party is distinct from whether there would be any liability. See note 5 on page 646.]

Beneficiaries

6. The original Lord Campbell's Act specified that the action was for the benefit of the husband, wife, parent or child of the deceased, and many American acts have limited recovery to a similar group of beneficiaries. Interpretation problems often arise.

7. Spouse. All of the states provide that the lawful spouse is a designated beneficiary. Lewis v. Allis-Chalmers Corp., 615 F.2d 1129 (5th Cir. 1980) (applying Louisiana law) (but former wife may not recover). The cases have been consistent in refusing to extend the

definition of spouse to unmarried cohabitants. See, e.g., Nieto v. City of Los Angeles, 138 Cal.App.3d 464, 188 Cal.Rptr. 31 (1982) (fiancée may not recover); Raum v. Restaurant Assocs., Inc., 252 A.D.2d 369, 675 N.Y.S.2d 343 (1998) (unmarried couples living together, whether heterosexual or homosexual, are not "spouses" within the wrongful death statute and thus have no cause of action); Holguin v. Flores, 122 Cal.App.4th 428, 18 Cal.Rptr.3d 749 (2004) (unmarried cohabitants have no right to sue under wrongful death act).

8. In 2015, the Supreme Court's decision in Obergefell v. Hodges, 135 S.Ct. 2584 (U.S. 2015), held that the right to marry is a fundamental right inherent in the liberty of the person, and under the Due Process and Equal Protection Clauses of the Fourteenth Amendment couples of the same-sex may not be deprived of that right and that liberty and States must recognize lawful same-sex marriages performed in other States. Prior to that ruling, many states had authorized some non-marital legal relationships by statute and those statutes must be interpreted and applied.

Domestic Partner, Civil Union Party, Reciprocal Beneficiary. Several jurisdictions have made wrongful death benefits available to domestic partners (e.g., Cal. Code Civ. Proc. § 377.60); civil union parties (Colo. Rev. Stat. Ann. 14-15-101); or reciprocal beneficiaries (Haw. Rev. Stat. 663- 3(b)(3)). Note that each of these is a legal status requiring compliance with particular formalities to acquire the status. Wrongful death benefits would

not be available if the parties had not complied with the formalities before the death occurred, even if they were eligible to do so.

9. Child. Most jurisdictions provide that children of the decedent are beneficiaries, although some put them in a different category from spouses and allow them to recover only if there is no surviving spouse.

10. Stepchild. Did the legislature intend to cover stepchildren? Most cases have held no. See, e.g., in Steed v. Imperial Airlines, 12 Cal.3d 115, 524 P.2d 801, 115 Cal.Rptr. 329 (1974) (statute later amended to cover stepchildren if they had been financially dependent on decedent) and Balas v. Smithkline Beecham Corp., 2009 WL 1708831 (Tex. App. 2009) (unadopted stepchildren not beneficiaries under wrongful death statute).

11. Child Born out of Wedlock. Until the late 1960s a majority of American courts held that children born out of wedlock were not intended beneficiaries under the statute, unless the statute said so. The Supreme Court then held that the Louisiana Wrongful Death Statute constituted a denial of equal protection of the laws when it precluded a child born out of wedlock from bringing a wrongful death claim upon the death of her mother. Levy v. Louisiana, 391 U.S. 68 (1968). The court also struck down a Louisiana provision that barred the claim of a mother for the wrongful death of her child born out of wedlock. Glona v. American Guarantee & Liability Ins. Co., 391 U.S. 73 (1968). Although some jurisdictions require that a father have acknowledged paternity or that paternity have been adjudicated before the death in order for a wrongful death action to be brought by him, most permit the showing of paternity to be made after the death

of the child. Brookbank v. Gray, 74 Ohio St.3d 279, 658 N.E.2d 724 (1996) (status of beneficiary may not be created after death, but it may be proved) (citing cases from other jurisdictions). Washington's requirement that the father have contributed regularly to financial support of the child in order to recover for the child's wrongful death was found to violate Washington's Equal Rights Amendment since the same requirement was not imposed on the mother. Guard v. Jackson, 132 Wash.2d 660, 940 P.2d 642 (1997). (Of course, the nature and extent of the relationship prior to death would affect the amount of damages.)

12. Unborn Child. Should parents be able to obtain recovery for the death of an unborn child? Every jurisdiction has a cause of action for prenatal injuries to a viable unborn child who is then born alive and later dies.

Some, however, will not allow recovery if the child is viable but stillborn. See e.g., Kandel v. White, 339 Md. 432, 663 A.2d 1264 (1995) (no cause of action under either wrongful death or survival statute for fetus who was not born alive); Tanner v. Hartog, 696 So.2d 705 (Fla. 1997) (same, but parents have cause of action for their own pain and suffering and for medical expenses); Smith v. Borello, 370 Md. 227, 804 A.2d 1151 (2002) (same, mother can recover medical expenses and pain and suffering related to miscarriage, but not for solatium or loss of consortium damages). But see Aka v. Jefferson Hospital Assn., 344 Ark. 627, 42 S.W.3d 508 (2001) (reversing earlier ruling that a viable fetus who was stillborn is not a person

for the purposes of the wrongful death act and noting that eight jurisdictions still follow that interpretation of their statutes).

Others will not allow recovery if the child was not viable at the time of injury, even if born alive. Miller v. Kirk, 120 N.M. 654, 905 P.2d 194 (1995).

And some recognize a claim even if the baby was neither viable nor born alive. Connor v. Monkem Co., Inc., 898 S.W.2d 89 (Mo. 1995); Farley v. Sartin, 195 W.Va. 671, 466 S.E.2d 522 (1995); Stinnett v. Kenney, 232 So.3d 202 (Ala. 2016) (permitting wrongful death action for unborn child even when injured prior to viability). See also Chapter 8, page 520. Illinois is one of the states that permit a wrongful death action to be brought on behalf of an unborn child injured before viability. Plaintiffs filed a wrongful death claim against a fertility clinic, claiming that it had failed to cryopreserve their blastocyst for future implantation. Miller v. American Infertility Group of Ill., 386 III.App. 3d 141, 897 N.E.2d 837 (2008) (finding Wrongful Death Act applied only to the loss of an embryo that has been implanted in the mother and thus did not apply to loss of blastocyst). See also Saleh v. Damron, 836 S.E.2d 716 (W.Va. 2019) in which the Supreme Court of West Virginia answered a certified question from a federal court whether West Virginia recognized a cause of action for death of an ectopic embryo or ectopic fetus. Although the court had previously ruled that "person" under the Wrongful Death Act included non-viable fetuses, it answered the question about ectopic embryos and fetuses "no." In doing so, the court noted that all other jurisdictions that allowed actions for non-viable fetuses limited the action to those who were in the womb when injured.

13. Parent. In most jurisdictions, a parent is a beneficiary only if a child dies without a spouse or children. Some of those statutes require the parents of adult children to show financial dependence in order to qualify as a beneficiary. See, for example, Philippides v. Bernard, 151 Wash.2d 376, 88 P.3d 939 (2004) (no cause of action under wrongful death statute unless parents can show they were financially dependent on decedent). Other jurisdictions provide that the parent is a beneficiary even if there are minor children. Florida is such a jurisdiction while Louisiana is not. Decedent lived in Florida with his parents and worked on an oil rig off the Louisiana coast in international waters. He was killed in a helicopter crash in Louisiana on his way to the oil rig. When he died, he left behind three survivors, his parents and young son. His parents filed a wrongful death action in Florida on behalf of themselves and his son. His son's mother filed a wrongful death action in Louisiana on behalf of his son. Which wrongful death statute controls? See Yelton v. PHI, Inc., 669 F.3d 577 (5th Cir. 2012) (affirming trial court's dismissal of parents' action after determination that Louisiana law applied in action arising out of helicopter crash that occurred in Louisiana). For a discussion of the measure of damages when the decedent is a minor child, see the next principal case.

14. Next of Kin. Some statutes provide that the next of kin is a beneficiary, as long as that person can show financial loss. A Roman Catholic nun who belonged to the order the Sisters of St. Ursula was killed when the car she was driving was struck by a drunk driver who ran a stop sign. She had been a member of her religious community for almost forty years and

had taken a vow of poverty that meant that all her income went to the community for the common good. Her death caused her community to lose about $250,000 that she would have earned over the rest of her lifetime. Is the religious community her next of kin and therefore a beneficiary under the wrongful death statute? Buchert v. Newman, 90 Ohio App.3d 382, 629 N.E.2d 489 (1993) (phrase "next of kin" in statute has its ordinary meaning of nearest blood relation and could not be interpreted to include decedent's community even though community showed financial dependence on decedent).

The Vermont Supreme Court has rejected the argument of the owners of two cats who allegedly died as the result of a mistake in the dosage of their hypertension medication that it should extend the wrongful death act to cover them. Goodby v. Vetpharm, Inc., 974 A.2d 1269, 1272 (Vt. 2009). "We note that under the Wrongful Death Act people may recover only for the loss of their next of kin, which can exclude recovery in many cases for the loss of many close relatives, such as grandparents or grandchildren, nieces, nephews, aunts, and uncles, as well as for the loss of nonrelatives like stepchildren, fiancés, or other closely held companions. [C] Viewed from this perspective, plaintiffs request a judicial expansion of law to recover for loss of a pet what the law does not allow for loss of a broad variety of critically loved human beings. Whether the familial quality of companionship between humans and their pets is relatively new or ancient, plaintiffs seek a dramatic alteration to the law."

15. Under some statutes, if no designated beneficiaries are living at the time of the wrongful death, the action fails. See, for example, Tait v. Wahl, 97 Wash.App. 765, 987 P.2d 127 (1999) (no cause of action in wrongful death because decedent died without spouse or children

(Tier 1) and without parents or siblings who were financially dependent on her (Tier 2) even though her niece and niece's children were financially dependent on her). Other statutes have a catchall category, like "next of kin" or "heirs under will" if there are no other named statutory beneficiaries.

A problem of statutory interpretation occurs if the beneficiary dies after the person has been wrongfully killed, but before an action has begun or even after commencement of the action, but before judgment. How are courts to decide these things? Compare Murrell v. Springdale Memorial Hospital, 330 Ark. 121, 952 S.W.2d 153 (1997) (summary judgment for medical malpractice defendants is appropriate upon death of widower of patient) and Thomas v. Eads, 400 N.E.2d 778 (Ind.App.1980) (no award for wrongful death unless at the commencement of the action, and also at the time of awarding damages, there be living some person or persons in the class of beneficiaries set by statute) with Gray v. Goodson, 61 Wash.2d 319, 378 P.2d 413 (1963) (once a right of action for wrongful death has accrued, the subsequent death of a beneficiary does not abate the action, but the benefit of the action survives to the beneficiary's estate, with the measure of damages recoverable to the estate limited to the amount of loss sustained by the beneficiary prior to his death) and McDaniel v. Bullard, 34 Ill.2d 487, 216 N.E.2d 140 (1966) (cause of action for wrongful death accrues at time of death and survives death of sole beneficiary, whose estate may maintain the cause of action).

16. Allocation of Proceeds Among Beneficiaries. Most jurisdictions provide for some formal mechanism by which the court can allocate the proceeds among the beneficiaries. California, for example, provides that there is only one cause of action for wrongful death and that if one of the beneficiaries chooses not to join in the action as a plaintiff, he can be made a nominal defendant. The court has jurisdiction to adjudicate the claim even if not all beneficiaries are present. Patient died, allegedly as a result of medical malpractice, and his widow and minor children brought a wrongful death action, naming his adult daughter from a previous marriage as a nominal defendant. She was never served, however, and did not learn about the settlement with the malpractice defendants until the proceeds had been distributed to the widow and minor children. Does she have a cause of action against the malpractice defendants? Against the widow for a share of the proceeds? Ruttenberg v. Ruttenberg, 53 Cal.App.4th 801, 62 Cal.Rptr.2d 78 (1997) (no cause of action against medical malpractice defendants because court had power to adjudicate that action and thus to bind her; no cause of action for share of proceeds because that amount represented only the loss to the widow and minor children; cause of action against the widow for omitting daughter from wrongful death action, thereby causing her to lose her opportunity to prove damages in that action); Wilmot v. Wilmot, 203 Ariz. 565, 58 P.3d 507 (2002) (where statute provided that widow could bring wrongful death action on behalf of herself and surviving children, she could not settle claim without obtaining consent from adult children from previous marriage); Parr v. Parr, 16 S.W.3d 332 (Mo. 2000) (discussing allocation of proceeds among widow, adult children, and elderly parents of fifty-five year old

decedent); Corder v. Corder, 41 Cal.4th 644, 161 P.3d 172, 61 Cal.Rptr.3d 660 (2007) (discussing allocation of proceeds between widow and adult daughter from previous marriage where daughter presented evidence that decedent at time of his death was planning to leave wife because she had not kept the promise made at their wedding eight months before to stop working as a prostitute).

Selders v. Armentrout

Supreme Court of Nebraska, 1973.

190 Neb. 275, 207 N.W.2d 686.

McCown, Justice. ***Three minor children (aged 15, 13, and 9) were killed in an automobile accident due to the negligent conduct of defendants. Their parents brought these wrongful death actions. The sole issue on this appeal involves the proper elements and measure of damages in a tort action in Nebraska for the wrongful death of a minor child. The [trial] court essentially instructed the jury that except for medical and funeral expenses, the damages should be the monetary value of the contributions and services which the parents could reasonably have expected to receive from the children less the reasonable cost to the parents of supporting the children.

The defendants contend that the measure of damages is limited to pecuniary loss and that the instructions to the jury correctly reflect the

643

measure and elements of damage. The plaintiffs assert that the loss of the society, comfort, and companionship of the children are proper and compensable elements of damage, and that evidence of

amounts invested or expended for the nurture, education, and maintenance of the children before death is proper. ***

[A] broadening concept of the measure and elements of damages for the wrongful death of a minor child has been in the development stage for many years. [Cc] Following a discussion of the rigid common law rules limiting recovery for wrongful death to the loss of pecuniary benefits, Prosser states: "Recent years, however, have brought considerable modification of the rigid common law rules. It has been recognized that even pecuniary loss may extend beyond mere contributions of food, shelter, money or property; and there is now a decided tendency to find that the society, care and attention of the deceased are 'services' to the survivor with a financial value, which may be compensated. This has been true, for example, not only where a child has been deprived of a parent, ***but also where the parent has lost a child ***." Prosser, Law of Torts (4th Ed.), § 127, p. 908.

The original pecuniary loss concept and its restrictive application arose in a day when children during minority were generally regarded as an economic asset to parents. Children went to work on farms and in factories at age 10 and even earlier. This was before the day of child labor laws and long before the day of extended higher education for the general population. A child's earnings and services could be generally established and the financial or pecuniary loss which could be proved became the measure of damages for the wrongful death of a child. Virtually all other damages were disallowed as speculative or as sentimental.

The damages involved in a wrongful death case even today must of necessity deal primarily with a fictitious or speculative future life, as it might have been had the wrongful death not occurred. For that reason, virtually all evidence of future damage is necessarily speculative to a degree. The measure and elements of damage involved in a wrongful death case, however, have been excessively restrictive as applied to a minor child in contrast to an adult. Modern economic reality emphasizes the gulf between the old concepts of a child's economic value and the new facts of modern family life. To limit damages for the death of a child to the monetary value of the services which the next of kin could reasonably have expected to receive during his minority less the reasonable expense of maintaining and educating him stamps almost all modern children as worthless in the eyes of the law. In fact, if the rule was literally followed, the average child would have a negative worth. This court has already held that contributions reasonably to be expected from a minor, not only during his minority but afterwards, may be allowed on evidence justifying a reasonable expectation of pecuniary benefit. [Cc] Even with that modification, the wrongful death of a child results in no monetary

644

loss, except in the rare case, and the assumption that the traditional measure of damages is compensatory is a pure legal fiction.

Particularly in the last decade, a growing number of courts have extended the measure of damages to include the loss of society and companionship of the minor child, even under statutes limiting

recovery to pecuniary loss or pecuniary value of services less the cost of support and maintenance, or similar limitations. [Cc]

In this state, the statute has not limited damages for wrongful death to pecuniary loss but this court has imposed that restriction. For an injury to the marital relationship, the law allows recovery for the loss of the society, comfort, and companionship of a spouse. This court has allowed such a recovery for the wrongful death of a wife. [C] There is no logical reason for treating an injury to the family relationship resulting from the wrongful death of a child more restrictively. It is no more difficult for juries and courts to measure damages for the loss of the life of a child than many other abstract concepts with which they are required to deal. We hold that the measure of damages for the wrongful death of a minor child should be extended to include the loss of the society, comfort, and companionship of the child. To the extent this holding is in conflict with prior decisions of this court, they are overruled. ***

The judgment of the trial court as to liability is affirmed, the judgment as to damages is reversed and the cause remanded for trial on the issue of damages only, consistent with our holding in this opinion.

WHITE, Chief Justice (dissenting). ***I submit that the majority opinion, which arbitrarily and in one stroke, after 50 years of settled law and without public hearing or consideration of the different interests and policies involved, and in violation of the 1945 legislative policy clearly announced in the statute, and unrepealed, simply throws open a death claim for a minor child to a sympathy and sentiment contest in the award of money, and is a serious mistake for us to make.

NOTES AND QUESTIONS

1. The original Lord Campbell's Act, as interpreted by the Court of Queen's Bench, and wrongful death statutes in the United States patterned after that law were intended to limit damages to "pecuniary" losses caused by the death of a loved one. This was to meet concerns of common law judges, like Justice White in the principal case, that awards made for emotional losses arising from another's death would know no bounds. In most states, pecuniary loss is measured by having the trier of fact attempt to determine the monetary contribution that decedent would have made during his lifetime to the plaintiff beneficiary. This is frequently referred to as a loss- to-beneficiaries statute. As in the case of permanent injuries discussed in Chapter 10, the trier of fact is aided by mortality tables, income projections, and expert testimony. Pecuniary loss also may include the market value of any services that the decedent would have performed for the beneficiary.

Most states measure the economic loss by calculating the "joint life expectancy" of the decedent and each beneficiary, i.e., the period of loss is the life expectancy of the decedent or the life expectancy of the beneficiary, whichever is shorter. See, e.g., Runyon v. District of Columbia, 463 F.2d 1319 (D.C.Cir.1972) (interpreting District of Columbia's statute). Beginning with the 19th Century cases and continuing today, most jurisdictions recognize that the economic loss suffered by a child due to the death of a parent includes loss of training, education, guidance, and nurture as well as direct financial support. See, e.g., McKay v. New England Dredging Co., 92 Me.

454, 43 A. 29 (1899) (education and training that children receive from parent "are of actual and commercial value to them") and Campos v. Coleman, 319 Conn. 36, 123 A.3d 854, 863 (2015) (recognizing claim and collecting cases from other jurisdictions ruling on the issue).

The principal case extends that principle to cases where the decedent is the minor and the beneficiary is the parent. As the principal case reflects, the pecuniary-loss limitation is problematic when a minor child has been killed and his parents bring a wrongful death claim; however, even in those states that adhere to the pecuniary-loss standard, substantial damages have been upheld on the theory that the child eventually would have made a monetary contribution to the parents.

2. Although most states measure the damages based on the loss to the beneficiaries, some use the loss to the decedent's estate. This is frequently referred to as a loss-to-estate statute. In those jurisdictions, how should lost earnings be calculated? Should the jury award the probable worth of the decedent's gross earnings through his worklife expectancy? Or should an estimate of the decedent's own living expenses be deducted and the net amount awarded to the beneficiaries? See Wehner v. Weinstein, 191 W.Va. 149, 444 S.E.2d 27 (1994) (choosing to permit jury to award gross amount, but recognizing that most jurisdictions require the deduction of decedent's projected living expenses).

3. In Alabama, damages are based on the extent of the defendant's culpability. The plaintiffs pecuniary loss is immaterial. A separate action survives for the decedent's actual damages, but that is limited

to damages that occurred before death. King v. National Spa and Pool Institute, Inc., 607 So.2d 1241 (Ala. 1994).

4. A growing number of courts have taken the route of the principal case and allowed recovery for "loss of companionship" or consortium of a deceased family member. Some do so by finding that loss of society and companionship is an element of pecuniary damages. Hancock v. Chattanooga-Hamilton Cty. Hosp. Auth., 54 S.W.3d 234 (Tenn. 2001) (noting that thirty-two states allow recovery for filial consortium damages and joining those that do so by interpreting "pecuniary loss" to include consortium damages). Also, some states have amended their wrongful death statutes to provide specifically for recovery for loss of companionship in all cases, not just those involving the death of a minor child. See, e.g., Haw.Rev.Stat. § 663-(b) ("pecuniary injury and loss of love and affection").

646

Some jurisdictions have built in a protection against runaway damages by placing a ceiling on damages for nonpecuniary losses. See Kan.Stat.Ann. § 60-1903 ($250,000) and Me.Rev.Stat.Ann. tit. 18-C, § 2-807(2) ($750,000). In a case upholding its cap on noneconomic losses in wrongful death actions, Maryland noted that the cap applied per decedent, not per claimant or beneficiary. The jury allocates the damages among the beneficiaries. Dixon v. Ford Motor Co., 433 Md. 137, 70 A.3d 328 (2013). Florida had a cap of $1 million dollars for noneconomic damages for wrongful death actions based on medical malpractice, but its Supreme Court found that limitation violated the Equal Protection Clause of the Florida state

constitution. Estate of McCall v. U.S., 134 So.3d 894 (Fla. 2014) (answering certified question in FTC A case).

5. What elements of proof would be required in a jurisdiction permitting recovery for loss of companionship damages? Where it is the spouse who is seeking recovery, evidence of happiness or discord in the marriage is admissible on the issue of damages. Should the trier of fact be informed that a plaintiff has remarried since the death of decedent spouse? Most courts have held that this information should be withheld from the jury because the jury is not permitted to consider it when assessing the amount of the damages. Groesbeck v. Napier, 275 N.W.2d 388 (Iowa 1979) (noting that overwhelming majority of jurisdictions do not permit remarriage to reduce damages). What if decedent's child was later adopted by her stepfather? Should she still be allowed to recover under the wrongful death statute for the death of her natural father? Rich v. Taser Intern., Inc., 2012 WL 4490845 (D. Nev. 2012) (applying Nevada law) (predicting that Nevada would permit recovery).

Consider the court's summary of parents' proof on this issue after the death of their child in Anderson v. Laie, 88 S.D. Ill, 216 N.W.2d 152, 159 (1974): "The record in this case shows that the decedent was seven years of age and a bright, affectionate, kindly child who did well in school and church activities. She was an energetic, active, obedient, helpful child and an integral part of a close-knit family." The award of damages for the loss of consortium must be tied to the economic value of the services lost. In Fontenot v. Taser Intern., Inc., 736 F.3d 318 (4th Cir. 2013) (applying North Carolina law), the trial court judge granted a new trial on damages because plaintiff parents of decedent teenager, who died after being shocked with a Taser in a

confrontation with police, failed to present any evidence showing that his services, care, and companionship had a value approaching the $1000-$2000 per week, per parent, that their lawyer had argued in closing argument. Additionally, there was no testimony concerning whether, and for what duration, the parents reasonably expected their teenage son to continue providing services such as babysitting his younger siblings and assisting with household chores.

Suppose the mother of two very young children gave custody to her ex-husband and then left their hometown in Iowa for an unknown destination. Over the next few months, she made one telephone call to her ex-husband and one to her sister's house and then she was never heard from again. Fourteen years later, her family learned that she had been killed by a drunk

driver while walking along the side of the road in Casper, Wyoming, shortly after the telephone call made to her sister's house. Because she had no identification with her, it took the police that long to identify her. In a wrongful death action brought on behalf of her two children--now teenagers--what damages would be recoverable? Knowles v. Corkill, 51 P.3d 859 (Wyo. 2002) (jury awarded zero damages, apparently concluding that children had failed to prove they suffered a loss of probable future companionship, society, and comfort). Suppose the wrongful death beneficiary is the decedent's brother. How does brother prove the nature of the relationship between himself and decedent? Dubaniewicz v. Houman, 180 Vt. 367, 910 A.2d 897 (2006) (closeness of physical, emotional, and psychological relationship can be proved by living arrangements of

parties, harmony of family relations, and commonality of interests and activities).

6. Some states go beyond damages for "loss of companionship" and also provide for damages based on "grief." See, e.g., Ark. Stat. Ann. § 16-62- 102(f)(2) ("When mental anguish is claimed as a measure of damages under this section, mental anguish will include grief normally associated with the loss of a loved one.") and Kan.Stat.Ann. § 60--1904 ("mental anguish, suffering or bereavement"). But see N.J.S. 2A:31-5 (bill that would have added recovery for mental anguish and emotional pain and suffering passed legislature but was pocket-vetoed by Governor). See also Knowles v. Corkill, 51 P.3d 859, 863 (Wyo. 2002), distinguishing between damages for loss of companionship and damages for grief: "Put simply, loss of probable future companionship, society and comfort [of the decedent] entails the loss of positive benefits, while mental anguish represents an emotional reaction to the wrongful death [by the beneficiary]."

7. Almost half of the wrongful death statutes as originally enacted included a cap on recovery. The caps represented a response to the concern that the new cause of action would create unlimited liability and the possibility of runaway jury verdicts. The limitations ranged from $5,000 to $20,000. Over time the limitations were raised and then eliminated. No modern American jurisdiction caps recovery for economic losses, although some do limit recovery for non-economic losses. See note 4 above and Chapter 10, pages 596-597. Do the general tort reform statutory caps on noneconomic damages apply to wrongful death actions? United States v. Streidel, 329 Md. 533, 620 A.2d 905 (1993) (Maryland cap applicable to "personal injury

actions" does not apply to wrongful death action) and Rodriguez v. Cooper, 458 Md. 425, 182 A.3d 853 (2018) (Maryland legislature amended statute to extend cap to wrongful death actions).

8. Can a wrongful death recovery include compensation for lost estate tax benefits? Plaintiff, ninety-seven years of age, died in 2008 following a car accident and a wrongful death action was filed on behalf of his beneficiaries against the driver and owner of the other car. The suit alleged that because he had died in 2008, his federal estate tax bill was over a million dollars, significantly more that if he had lived until 2009 due to a change in the tax laws. Beim v. Hulfish, 216 N.J. 484, 83 A.3d 31 (2014) (loss of tax benefit does not give rise to a "pecuniary" loss within the meaning of the wrongful death statute).

648

9. Should punitive damages be awarded to the beneficiary in cases involving reckless or intentional conduct? About half of the states permit punitive damages to be awarded in a wrongful death action. Some of those jurisdictions have statutes that specifically authorize punitive damages; others have interpreted their statutes, although silent on the subject, to permit an award of punitive damages. See S. Speiser, Recovery for Wrongful Death and Injury § 8.7 (4th ed. 2005); Simeone v. Charron, 762 A.2d 442 (R.I. 2000) (declining to allow for award of punitive damages in absence of express language authorizing or broad language that could be interpreted to include such damages); and Durham v. U-Haul International, 745 N.E.2d 755 (Ind. 2001) (court rules that longstanding interpretation of wrongful death act is that its purpose is compensatory and does not

include punitive damages; if legislature does not agree, it can amend statute). Oklahoma has a separate statute that covers the wrongful death of a minor child. 12 Oki. St. § 1055. It does not list punitive damages as a permissible element of recovery even though the general wrongful death statute does. 12 Oki. St. § 1053. The mother of three minor children killed in a head on collision with a drunk driver on the wrong side of the road filed suit against the driver and the bars where he had been drinking. She sought both compensatory damages and punitive damages. Should punitive damages be permitted? Roach v. Jimmy D. Enters., 912 P.2d 852 (Okla. 1996) (yes because general wrongful death statute and statute for death of minor child should be read in conjunction with each other).

2. Survival

Murphy v. Martin Oil Co.

Supreme Court of Illinois, 1974.

56 Ill.2d 423. 308 N.E.2d 583.

[Suit for negligently causing the death of plaintiffs husband. The husband was injured in a fire on defendant's premises, survived for nine days, and then died from the injuries. The claim was in two counts; (1) under the Wrongful Death Statute and (2) under the Survival Statute. The trial court dismissed the second count. The intermediate appellate court allowed the claim in part. Both parties appealed to the State Supreme Court.]

WARD, Justice. Count I of the complaint claimed damages for wrongful death under the Illinois Wrongful Death Act. ***The

language of section 1 of the statute is:

"Whenever the death of a person shall be caused by wrongful act, neglect or default, and the act, neglect or default is such as would, if death had not ensued, have entitled the party injured to maintain an action and recover damages in respect thereof, then and in every such case the person who or company or corporation which would have been liable if death had not ensued, shall be liable to an action for damages, notwithstanding the death of the person injured, and although the death

649

shall have been caused under such circumstances as amount in law to felony." ***

The second count of the complaint asked for damages for the decedent's physical and mental suffering, for loss of wages for the nine- day period following his injury and for the loss of his clothing worn at the time of injury. These damages were claimed under the common law and under our survival statute, which provides that certain rights of action survive the death of the person with the right of action. (III.Rev.Stat.1971, ch. 3, par. 339.) The statute states:

"In addition to the actions which survive by the common law, the following also survive: actions of replevin, actions to recover damages for an injury to the person (except slander and libel), actions to recover damages for an injury to real or personal property or for the detention or conversion of personal property, actions against officers for misfeasance, malfeasance, or nonfeasance of themselves or their deputies, actions for fraud or deceit, and actions

provided in Section 14 of Article VI of' An Act relating to alcoholic liquors', approved January 31, 1934, as amended."

On this appeal we shall consider: (1) whether the plaintiff can recover for the loss of wages which her decedent would have earned during the interval between his injury and death; (2) whether the plaintiff can recover for the destruction of the decedent's personal property (clothing) at the time of the injury; (3) whether the plaintiff can recover damages for conscious pain and suffering of the decedent from the time of his injuries to the time of death.

This State in 1853 enacted the Wrongful Death Act and in 1872 enacted the so-called Survival Act (now section 339 of the Probate Act). This court first had occasion to consider the statutes in combination in 1882 in Holton v. Daly, 106 III. 131. The court ***held that the Wrongful Death Act provided the exclusive remedy available when death came as a result of given tortious conduct. In considering the Survival Act the court stated that it was intended to allow for the survival of a cause of action only when the injured party died from a cause other than that which caused the injuries which created the cause of action. Thus, the court said, an action for personal injury would not survive death if death resulted from the tortious conduct which caused the injury.

This construction of the two statutes persisted for over 70 years. [Cc] Damages, therefore, under the Wrongful Death Act were limited to pecuniary losses, as from loss of support, to the surviving spouse and next of kin as a result of the death. [C] Under the survival statute damages recoverable in a personal injury action, as for conscious pain and suffering, loss of earnings, medical expenses and physical

disability, could be had only if death resulted from a cause other than the one which gave rise to the personal injury action. ***

650

In Prosser, Handbook of the Law of Torts (4th ed. 1971), at page 901, it is said: "[T]he modern trend is definitely toward the view that tort causes of action and liabilities are as fairly a part of the estate of either plaintiff or defendant as contract debts, and that the question is rather one of why a fortuitous event such as death should extinguish a valid action. Accordingly, survival statutes gradually are being extended; and it may be expected that ultimately all tort actions will survive to the same extent as those founded on contract." And at page 906 Prosser observes that where there have been wrongful death and survival statutes the usual holding has been that actions may be concurrently maintained under those statutes. The usual method of dealing with the two causes of action, he notes, is to allocate conscious pain and suffering, expenses and loss of earnings of the decedent up to the date of death to the survival statute, and to allocate the loss of benefits of the survivors to the action for wrongful death.

As the cited comments of Prosser indicate, the majority of jurisdictions which have considered the question allow an action for personal injuries in addition to an action under the wrongful death statute, though death is attributable to the injuries. Recovery for conscious pain and suffering is permitted in most of these jurisdictions. [Citing cases from 21 different jurisdictions.]

We consider that those decisions which allow an action for fatal injuries as well as for wrongful death are to be preferred to this

court's holding in Holton v. Daly that the Wrongful Death Act was the only remedy available when injury resulted in death.

The holding in Holton was not compelled, we judge, by the language or the nature of the statutes examined. The statutes were conceptually separable and different. The one related to an action arising upon wrongful death; the other related to a right of action for personal injury arising during the life of the injured person.

The remedy available under Holton will often be grievously incomplete. There may be a substantial loss of earnings, medical expenses, prolonged pain and suffering, as well as property damage sustained, before an injured person may succumb to his injuries. To say that there can be recovery only for his wrongful death is to provide an obviously inadequate justice. Too, the result in such a case is that the wrongdoer will have to answer for only a portion of the damages he caused. Incongruously, if the injury caused is so severe that death results, the wrongdoer's liability for the damages before death will be extinguished. It is obvious that in order to have a full liability and a full recovery there must be an action allowed for damages up to the time of death, as well as thereafter. Considering "It is more important that the court should be right upon later and more elaborate consideration of the cases than consistent with previous declarations" [c], we declare Holton and the cases which have followed it overruled. ***

651

[T]he judgment of the appellate court is affirmed insofar as it held that an action may be maintained by the plaintiff for loss of property and loss of wages during the interval between injury and death, and

that judgment is reversed insofar as it held that the plaintiff cannot maintain an action for her decedent's pain and suffering.

NOTES AND QUESTIONS

1. Under English common law as it was received by American courts, personal injury tort actions died with the person of the plaintiff or the defendant. For the historical background of this rule see W. Prosser & W. Keeton, Torts 940 (5th ed. 1984) and materials cited.

2. In almost every jurisdiction today survival statutes have modified these rules. At the very least, these statutes provide that causes of action for injury to all tangible property survive the death of either party. The majority of statutes also allow personal injury actions to survive. Only a few states permit claims for intangible interests of personalty (such as intentional infliction of emotional harm or defamation) to survive. Federal common law controls whether federal statutory claims survive the claimant's death. Parchman v. SLM Corp., 896 F.3d 728 (6th Cir. 2018) (finding that consumer's claims against student loan servicers for violations of Telephone Consumer Protection Act survived the consumer's death).

3. Two survival statutes are presented below. What are the important differences between them?

South Carolina

"Survival of Right of Action. Causes of action for and in respect to any and all injuries and trespasses to and upon real estate and any and all injuries to the person or to personal property shall survive both to and against the personal or real representative, as the case may be, of a deceased person and the legal representative of an

insolvent person or a defunct or insolvent corporation, any law or rule to the contrary notwithstanding." S.C.Code § 15-5-90.

Kentucky

"What Action Shall Survive. No right of action for personal injury or for injury to real or personal property shall cease or die with the person injuring or injured, except actions for slander, libel, criminal conversation, and so much of the action for malicious prosecution as is intended to recover for the personal injury. For any other injury an action may be brought or revived by the personal representative, or against the personal representative, heir or devisee, in the same manner as causes of action founded on contract." Ky. Rev. Stat. 411.140.

4. Proper Party. Generally, survival actions are brought by the executor or administrator of the estate and a recovery becomes an asset of that estate, with the recovery subject to the claims of creditors of the estate and the net proceeds (after debts and taxes are paid) distributed with the rest of the estate to the heirs under the will or applicable intestacy statute. Damages are based on loss to the estate rather than on loss to the dependents

or other survivors. See S. Speiser, Recovery for Wrongful Death and Injury § 1.13 (4th ed. 2005).

5. The major argument against survival statutes is that they may result in a windfall to distant relatives who cared very little about the decedent and were not in any way dependent on the decedent. Do you find the argument persuasive? The survival action may be the

only recourse for someone who is not named as a beneficiary in the wrongful death statute. See, e.g., Warner v. McCaughan, 77 Wash.2d 178, 460 P.2d 272 (1969) (parents of college student who could not recover under wrongful death act because they were not financially dependent on decedent college student could bring survival action because they were heirs to her estate).

6. As the principal case notes, most states have both survival and wrongful death statutes. There are then two causes of action that may be maintained separately or concurrently to successful judgment. But see ACandS, Inc. v. Redd, 703 So.2d 492 (Fla.App.1997) (in Florida, personal injury cause of action abates with death of claimant and recovery is only through wrongful death action) (holding that spouse's loss of consortium claim also abates with death of primary claimant) and Capone v. Philip Morris USA, Inc., 116 So.3d 363 (Fla. 2013) (provision of Wrongful Death Act stating that personal injury action pending at time of decedent's death from the underlying injury shall "abate" causes case to be suspended until personal representative of decedent's estate is added as party to pending action and receives reasonable opportunity to amend complaint to state damages sought under a wrongful death claim). Where both actions are allowed, the courts must control the damages awarded in each action so as to avoid holding the defendant liable twice for the same elements of recovery. A good case struggling with the problem is Pezzulli v. D'Ambrosia, 344 Pa. 643, 26 A.2d 659 (1942).

7. Funeral and burial expenses, if paid by the beneficiaries, ordinarily are allocated to the wrongful death action. The pain and suffering of the decedent are allocated to the survival action, as are medical

expenses. Decedent's loss of potential earnings during normal life expectancy is also assigned to the survival action. But since it is out of these future earnings that decedent would have been expected to provide support for family, or to have made contributions to them, it is obvious that there would be a double recovery to the extent that they were allowed to recover for the loss when both actions are maintained. A frequent solution has been to allocate to the survival action the potential earnings of the decedent during life expectancy, reduced to their present value, and to deduct the probable cost of maintenance of family, which would then be allocated to the death action. See, for example, First Nat'l Bank in Greensburg v. M. & G. Convoy, Inc., 106 F.Supp. 261 (W.D.Pa.1952); and Wetzel v. McDonnell Douglas Corp., 491 F.Supp. 1288 (E.D.Pa.1980).

8. Recovery for decedent's pain and suffering is allowed only if the decedent was conscious prior to death. See, e.g., Dubaniewicz v. Houman, 180 Vt. 367, 910 A.2d 897 (2006) (no expert medical testimony that murder victim was conscious after being shot; state trooper's testimony suggesting that decedent moved from one room to another before dying was too

speculative to support an award for pain and suffering). Thus, courtroom battles between medical experts have developed over this factual issue when the decedent lived only a short time after injury. Compare Fialkow v. DeVoe Motors, Inc., 359 Mass. 569, 270 N.E.2d 798 (1971) (evidence of gasping, gurgling and heavy breathing insufficient to show consciousness) with Campbell v. Leach, 352

Mass. 367, 225 N.E.2d 594 (1967) (evidence that decedent cried out sufficient to support an award).

9. Should the claim include pain and suffering that occurred before the physical injury, sometimes called "pre-impact fright"? Several courts have permitted recovery in the context of airplane crashes. See, e.g., Shu- Tao Lin v. McDonnell Douglas Corp., 742 F.2d 45 (2d Cir.1984) (applying New York law). A few have applied it in other contexts. Beynon v. Montgomery Cablevision Ltd. Partnership, 351 Md. 460, 718 A.2d 1161 (1998) (jury verdict of $1,000,000 for pre-impact fright of 2 seconds based on evidence of 71' skidmarks left by plaintiffs vehicle before it rear ended tractor trailer, killing plaintiff instantly) (collecting cases from other jurisdictions).

10. Should a claim for punitive damages survive the death of the claimant? Most jurisdictions permit the estate to recover for all damages, including punitive damages, that the decedent would have had. But see Froud v. Celotex Corporation, 98 Ill.2d 324, 74 Ill.Dec. 629, 456 N.E.2d 131 (1983) (in Illinois, punitive damages ablate with the death of the claimant). Should a claim for punitive damages survive the death of the tortfeasor? Who would be punished? Tortfeasor distributed photocopies of sexually explicit photographs of his former girlfriend throughout the community, particularly where her mother, minor children, and employer would see them. She filed suit against him to stop the distribution and seeking compensatory and punitive damages. The tortfeasor committed suicide before the trial and his sister, the executrix of his estate, was substituted as a defendant. Should the estate be liable for punitive damages? G.J.D. v. Johnson, 552 Pa. 169, 713 A.2d 1127 (1998) (permitting award of punitive damages against estate, but noting that the majority of

jurisdictions do not) and Alain Ellis Living Trust v. Harvey D. Ellis Living Trust, 308 Kan. 1040, 427 P.3d 9 (2018) (claim for punitive damages survives death of defendant). See also Crabtree v. Estate of Crabtree, 837 N.E.2d 135 (Ind. 2005) (joining majority of jurisdictions that do not permit award of punitive damages against estate); In re Vajgrt, 801 N.W.2d 570 (Iowa 2011) (noting that Iowa is among the approximately thirty states that do not permit awards of punitive damages against estates for the conduct of the decedent); and Chapter 10, Section 3, Punitive Damages.

A Note on Defenses

The interrelationship of wrongful death and survival statutes and defenses, although presented at this point, will be better appreciated by the reader after completion of Chapter 12 on Defenses. The discussion is based on W. Prosser & W. Keeton, Torts 954-60 (5th ed. 1984).

11. Defenses Based on Conduct or Status of the Decedent. Since the survival statute merely continues the decedent's own cause of action beyond his death, any defenses that might have been set up against decedent if

decedent had lived are still available to the defendant. The contrary might perhaps have been expected of the wrongful death acts, which create a separate and independent cause of action, founded upon the death itself, for the benefit of the designated beneficiaries. The original Lord Campbell's Act, however, contained an express provision limiting the death action to those cases in which the deceased might have recovered damages if he had lived; and this

provision has been carried over into most of the American acts, or has been read into them by implication when it does not expressly appear. It obviously is intended at least to prevent recovery for death when the decedent could never at any time have maintained an action, as where the act that caused the death was not tortious or the defendant was protected by immunity.

On the same theoretical basis, but with less apparent justification, there has been general agreement denying recovery when the defendant's conduct has been tortious toward the decedent and has caused his death, thus causing loss to the innocent beneficiaries, but the defendant would have had a defense available against the decedent. This has been true of contributory and comparative negligence, assumption of risk or consent to the defendant's conduct, as well as privileges such as self-defense or defense of property. See also Restatement (Third) of Torts: Apportionment of Liability § 6 (2000). Many of the courts that have considered the question have given the same effect to the immunity of one member of a family for torts against another, although there is a strong minority view to the contrary, based upon the theory that death destroys the reason for the immunity. See Chapter 12, Section 3C.

12. Defenses Based on Conduct of the Beneficiaries Under the Statute or Heirs of the Estate. Defenses available against the beneficiaries or heirs based on their own conduct offer a still more troublesome problem, on which the courts have not agreed. When the action is brought under a survival act, it is in theory still on behalf of the decedent, and the negligence of even a sole heir has been held not to prevent recovery through contributory negligence doctrine since the heir is not the plaintiff. (Defendant, of course, may have a

claim for contribution against the heir.) Under the usual wrongful death act, the recovery is for the beneficiaries, and the contributory or comparative negligence or the consent or assumption of risk of a sole beneficiary or of all beneficiaries generally is held to preclude the action, on the same principle that would bar any other plaintiff in interest. A few statutes have been construed to the contrary.

When only one of several beneficiaries is contributorily negligent, the prevailing view is that the action is not barred for those who were not negligent, but that recovery is diminished to the extent of the share of damages of the negligent beneficiary, who is denied all share in the proceeds. Siruta v. Siruta, 301 Kan. 757 (2015) (where minor child was killed in accident allegedly caused by his mother driver, apportionment of damages between the beneficiaries (mother and father) is done by judge under Kansas wrongful death statute). Generally, the negligence of one parent is not imputed to the other in a claim arising out of the death of their child. See, for example, Teeter v. Missouri Hwy. and Transp. Com., 891 S.W.2d 817

655

(Mo. 1995) (mother's contributory fault in driving vehicle in which her passenger daughter was killed cannot be attributed to father where both parents are beneficiaries under the wrongful death statute).

13. Comparative Negligence. Under comparative negligence systems, there is the possibility of having the jury consider both the negligence of a beneficiary and the decedent since the negligence of either one--standing alone--may not automatically bar a claim. The process is not as complicated as it may appear: the jury simply allocates a percentage of negligence to the beneficiary and the

decedent and then reduces the award to the beneficiary by that total amount. In modified comparative negligence systems, recovery by that beneficiary is precluded if the threshold is reached. Where both parent beneficiaries may have been contributorily negligent, their negligence would be added in assessing the threshold for recovery in a modified comparative negligence jurisdiction. Curtis v. States Family Practice, LLC, 20 Neb. App. 234, 823 N.W.2d 224 (2012) (in medical malpractice action, jury found each parent 25% responsible, so parents' combined responsibility was not less than that of defendants and thus judgment was entered for defendants under Nebraska modified comparative negligence statute).

14. Effect of Personal Injury Action Brought Before Death. Most courts have held that a judgment for or against the decedent in an action for his injuries commenced during his lifetime, or the compromise and release of such an action, will operate as a bar to any subsequent suit founded upon his death. See Thompson v. R.J. Reynolds Tobacco Co., 760 F.3d 913, 917 (8th Cir. 2014) (applying Missouri law) ("As a result of the 2003 judgment in his personal injury suit, Michael Thompson no longer had a viable claim against the cigarette manufacturers at the time of his death, and his family is barred from bringing such a claim now."); Boeken v. Philip Morris USA Inc., 48 Cal.4th 788, 108 Cal.Rptr.3d 806, 230 P.3d 342 (Cal. 2010) (widow's prior loss of consortium claim precluded her wrongful death claim); and Union Bank of California v. Copeland Lumber Yards, Inc., 213 Or.App. 308, 160 P.3d 1032 (2007) (surveying other jurisdictions and noting that clear weight of authority finds wrongful death actions precluded if decedent had litigated to judgment or settled a personal injury action before his death). This has the effect

of placing in the decedent's hands the power to sell out the claim of the beneficiaries before it has come into existence because their action is regarded as "derivative," arising out of and dependent upon the wrong done to him. The courts undoubtedly have been influenced by a fear of a double recovery. This is possible because the decedent would be allowed to recover for the prospective earnings lost through his diminished work life expectancy, out of which any financial benefits receivable by the beneficiaries would be expected to come.

Opposed to this risk is the counter-danger of an improvident settlement by an optimistic individual, confident that he is not going to die, that takes no account of the interests of the beneficiaries. Because of this, there is a minority view that neither a judgment in his action nor his release of his claim will bar the action for wrongful death. See, for example, Spangler v. McQuitty, 449 Md. 33, 141 A.3d 156 (2016) (wrongful death statute provides a new and independent cause of action, which does not preclude a subsequent

action brought by a decedent's beneficiaries, although the decedent obtained a personal injury judgment based essentially on the same underlying facts during his or her lifetime) and Thompson v. Wing, 70 Ohio St.3d 176, 637 N.E.2d 917 (1994) (medical malpractice judgment during patient's lifetime did not bar subsequent wrongful death claim by her beneficiaries because it is an independent claim; court notes that this is minority view). See also Brown v. Drillers, Inc., 630 So.2d 741 (La.1994) (release signed by personal injury claimant and his wife releases subsequent claim by wife as wrongful death

beneficiary only if release unequivocally reflects that parties contemplated a release of future wrongful death claim).

The possibility of double compensation either has been ignored, on the ground that legally it could not arise, or has been addressed by a credit against the award to the death beneficiaries, in the amount paid to the decedent covering the permanent destruction of his earning capacity. Riggs v. Georgia-Pacific LLC, 345 P.3d 1219 (Utah 2015) (noting that double recovery is impermissible and therefore that it would be improper for the court in the wrongful death action to award lost wages since compensation for those already had been recovered in the previous personal injury action).

15. Statutes of Limitation. Where the statute of limitations on the personal injury action had run before the decedent's death, no survival action can be brought, but is the wrongful death action affected? Some jurisdictions have held that the statute runs against the death action only from the date of death, even though at that time the decedent's own action would have been barred while he was living. See, e.g., Evans v. Southern Ohio Medical Ctr., 103 Ohio App.3d 250, 659 N.E.2d 326 (1995) (wrongful death claim not barred even though underlying medical malpractice action was). Others hold that it runs from the time of the original injury and consequently that the death action may be lost before it ever has accrued. See, e.g., Russell v. Ingersoll-Rand Co., 841 S.W.2d 343 (Tex. 1992) (wrongful death action, because it is dependent on underlying personal injury action, may not be brought if statute of limitations expired on personal injury action before decedent's death); Okeke v. Craig, 782 So.2d 281 (Ala. 2000) (accord); Deggs v. Asbestos Corp. Ltd., 186 Wash.2d 716, 381 P.3d 32 (2016) (based on wording of

original Lord Campbell's Act); and Edwards v. Fogarty, 962 P.2d 879 (Wyo.1998) (accord, noting that this is the majority rule).

The wrongful death statutes of many states contain their own time period within which to bring the action for wrongful death. In those states, that time limit rather than the general statute of limitations controls the wrongful death action. Because the action is a creature of statute rather than of the common law, filing within the limitation period is an essential element of the cause of action. Limitations of the remedy are to be treated as limitations of the right. Deckert v. Burns, 75 S.D. 229, 62 N.W.2d 879 (1954) (recognizing rule as "the general holding"). In most jurisdictions, the deadline is not subject to the tolling provisions of the general statute of limitations. See, e.g., Moreno v. Sterling Drug, Inc., 787 S.W.2d 348 (Tex. 1990) (noting that "overwhelming majority of states" that require cause of action to be filed within two years of death have refused to apply the discovery rule or other equitable tolling measures); Ortiz v. Gavenda, 590

657

N.W.2d 119, 590 N.W.2d 119 (Minn. 1999) (civil procedure relation back rule could not be used to avoid effect of statute of limitations); Taylor v. Black & Decker Mfg. Co., 21 Ohio App.3d 186, 486 N.E.2d 1173 (1984) (not tolled by beneficiary's minority); and Trentadue v. Buckler Lawn Sprinkler, 479 Mich. 378, 738 N.W.2d 664 (2007) (discovery rule not applicable to wrongful death statute of limitations even though beneficiary did not discover the identity of the person who raped and murdered decedent until DNA evidence identified him more than 15 years later--negligence case against defendant who was murderer's employer and decedent's landlord dismissed as

untimely). But see LaFage v. Jani, 166 N.J. 412, 766 A.2d 1066 (2001) and Pioneer Comm. Hosp. v. Roberts, 214 So.3d 259 (Miss. 2017) (both recognizing tolling for beneficiaries who are minors); Moon v. Rhode, 67 N.E.3d 220 (Ill. 2016) (applying discovery rule to wrongful death action); and Brice v. Toyota Motor Co., 373 P.3d 977 (N.M. 2016) (although following the general rule not to allow tolling, court carves out common law exception for fraudulent concealment by defendant of grounds for cause of action).

Although statutes of limitations usually are considered procedural and thus governed by the law of the forum, where the time limitation is within the statute creating the right, that jurisdiction's law controls even if the foreign forum's law would have considered the action timely. Ramsay v. Boeing Co., 432 F.2d 592 (5th Cir. 1970) (because Belgian five year limit was a condition to bringing suit and thus a matter of substantive law where the airplane crash occurred, federal court sitting in diversity did not apply the longer six year statute of limitations of the forum state of Mississippi).

In states whose wrongful death statutes do not contain a separate time limit and in those that provide a wrongful death remedy through an expanded survival action, the statute of limitations for personal injury is applied. In those jurisdictions, the tolling provisions of the general statute of limitations (e.g., for minors, discovery rule) usually are applied.

The accrual of the cause of action (when does the statute begin to run?) is dependent on the wording of the wrongful death statute. Some specify that the cause of action accrues at death. Of those statutes that do not specify the accrual of the cause of action, some

have interpreted their statutes as providing that the cause of action accrues at death while others have held that the action accrues at the time of the injury that then causes death.

16. Two Separate Actions. Most jurisdictions provide for both wrongful death and survival actions and most of the time those two actions are joined in one lawsuit. That is not always the case, however, and it is important to keep in mind that they are two distinct causes of action, each with its own requirements. Some jurisdictions, for example, use the survival statute only for situations where the decedent died from an unrelated cause and use the wrongful death statute for claims arising from situations where the decedent died due to the actions of the defendant. See Capone v. Philip Morris USA, Inc., 116 So.3d 363 (Fla. 2013) and Sears v. Griffin, 771 N.E.2d 1136 (Ind. 2002). Some jurisdictions require that a lawsuit for the personal injury claim have been filed before decedent's death in order for the claim to survive. Motorist was injured in a collision with another vehicle. Doctors who treated him at the hospital failed to diagnose fractures in his vertebrae. He and his

wife filed suit against the driver of the other vehicle for his personal injuries. He died while that lawsuit was pending. His representative then filed a wrongful death action against both the driver and the doctors and tried to amend the personal injury complaint against the driver to include a survival claim against the doctors for their malpractice. The Alabama survival statute provides that unfiled tort claims do not survive the death of the claimant (Shelton v. Green, 261 So.2d 295 (Ala. 2017)), so the doctors sought to dismiss the

estate's claim against them. The estate's representative argued that the amended complaint should relate back to the filing of the original complaint, before patient's death. Should it? Malcolm v. King, 686 So.2d 231 (Ala.1996) (medical malpractice claim against doctors is distinct claim from negligence claim against driver and does not relate back; no survival cause of action against medical malpractice defendants; wrongful death action against both driver and doctors could proceed).

In wrongful death action against tobacco company, wrongful death beneficiaries sought to prove that cigarettes caused decedent's lung cancer and that the cancer caused his death. Tobacco company argued that his death was caused by a blood clot that lodged in his heart and was a complication of surgery that he had undergone to treat urinary tract problems unrelated to the lung cancer. Jury returned a verdict that found that the death was unrelated to lung cancer. Beneficiaries, who were also the heirs to his estate's survival action, argued that they should at least be able to recover for damages suffered by decedent during his lifetime caused by the cancer. Neither smoker during his lifetime nor his heirs after his death had filed a personal injury or survival action, however. Judgment for the tobacco company was affirmed. Wilks v. American Tobacco Co., 680 So.2d 839 (Miss.1996).

CHAPTER 12 DEFENSES

1. Plaintiff's Conduct

(A) Contributory Negligence

Butterfield v. Forrester

King's Bench, 1809.

11 East 59. 103 Eng.Rep. 926.

This was an action on the case for obstructing a highway, by means of which obstruction the plaintiff, who was riding along the road, was thrown down with his horse, and injured, & c. At the trial before Bayley J. at Derby, it appeared that the defendant, for the purpose of making some repairs to his house, which was close by the road side at one end of the town, had put up a pole across this part of the road, a free passage being left by another branch or street in the same direction. That the plaintiff left a public house not far distant from the place in question at 8 o'clock in the evening in August, when they were just beginning to light candles, but while there was light enough left to discern the obstruction at 100 yards distance: and the witness, who proved this, said that if the plaintiff had not been riding very hard he might have observed and avoided it: the plaintiff however, who was riding violently, did not observe it, but rode against it, and fell with his horse and was much hurt in consequence of the accident; and there was no evidence of his being intoxicated at the time. On this evidence Bayley J. directed the jury, that if a person riding with reasonable and ordinary care could have seen

and avoided the obstruction; and if they were satisfied that the plaintiff was riding along the street extremely hard, and without ordinary care, they should find a verdict for the defendant: which they accordingly did.

Vaughan Serjt. now objected to this direction, on moving for a new trial; and referred to Buller's Ni.Pri. 26(a), where the rule is laid down, that "if a man lay logs of wood across a highway; though a person may with care ride safely by, yet if by means thereof my horse stumble and fling me, I may bring an action."

BAYLEY, J. The plaintiff was proved to be riding as fast as his horse could go, and this was through the streets of Derby. If he had used ordinary care he must have seen the obstruction; so that the accident appeared to happen entirely from his own fault.

LORD ElLENBOROUGH, C.J. A party is not to cast himself upon an obstruction which has been made by the fault of another, and avail himself of it, if he do not himself use common and ordinary caution to be in the right. In cases of persons riding upon what is considered to be the

660

wrong side of the road, that would not authorize another purposely to ride up against them. One person being in fault will not dispense with another's using ordinary care for himself. Two things must concur to support this action, an obstruction in the road by the fault of the defendant, and no want of ordinary care to avoid it on the part of the plaintiff.

Per Curiam. Rule refused.

NOTES AND QUESTIONS

1. Consider the basic options available to the law in connection with how to treat the fact that plaintiffs negligence contributed to the happening of the accident. First, the law could completely bar plaintiffs claim. This approach, called contributory negligence, was taken by the court in Butterfield. What does it have to recommend it?

Second, the law could completely ignore plaintiffs culpable conduct. This is the approach taken under most Worker Compensation Acts and No-Fault Automobile Accident Reparation Systems. The advantage to the plaintiff is obvious. Do you also see its philosophical underpinnings?

Third, the law could adopt one of the first two options as a general rule and then set up other rules making exceptions for designated situations. This is what the common law later did--generally adopting option 1, but allowing exceptions to it. Note that this is still an all-or-nothing approach in the individual case; the fact that the cases may average out as a whole provides cold comfort to the parties to the particular case. Is it desirable to leave to the jury the question of whether to allow the plaintiff to recover all or nothing? This may have been the practice prior to the principal case. See Cruden v. Fentham, 2 Esp. 685, 170 Eng.Rep. 496 (N.P.1799); Clay v. Wood, 5 Esp. 44, 170 Eng.Rep. 732 (N.P.1803).

Fourth, the law could compare plaintiffs fault with that of defendant and reduce plaintiffs damages according to the measure of fault. This approach, usually called comparative negligence or comparative fault, has been expressly adopted in one form or another for some actions in 46 states, by statute or judicial decision.

(Comparative negligence is treated in more detail after the next principal case.) Contributory negligence continues to be a complete bar to recovery in only four states (Alabama, Maryland, Virginia, North Carolina) and the District of Columbia.

What are the advantages and disadvantages of each approach?

2. In 1854 a Pennsylvania judge reflected the feelings of many of his brethren when he called the defense of contributory negligence a "rule from time immemorial" and ventured to guess that it was "not likely to be changed for all time to come." Pennsylvania R. Co. v. Aspell, 23 Pa. 147, 149 (1854). While the judge was a poor historian (a form of comparative negligence was applied by English Admiralty Courts long before the Butterfield decision), he did rather well as a prognosticator of the law late into the 20th Century. The contributory negligence defense had great appeal and sticking power in the United States. It was even adopted in Louisiana--a state that could easily

have utilized its code and civil law tradition to adopt a comparative negligence approach.

3. The following theories all have been advanced from time to time in explanation or justification of the defense. Which of them are valid?

A. The defense has a penal basis, and plaintiff is denied recovery as punishment for misconduct. See Barker v. Kailash, 63 N.Y.2d 19, 468 N.E.2d 39, 479 N.Y.S.2d 201 (1984) (teenager, who was injured while building a pipe bomb, filed suit against nine-year-old who had sold him the firecrackers from which he extracted the gun powder for

the pipe bomb). See also Cole v. Taylor, 301 N.W.2d 766 (Iowa 1981) (convicted murderer cannot bring action against her therapist for negligently failing to prevent her from shooting her ex-husband) and Price v. Purdue Pharma Co., 920 S.2d 479 (Miss. 2006) (patient who illegally obtained prescription narcotic by simultaneously seeking treatment from several doctors and filling duplicative prescriptions at different pharmacies may not bring action against doctors, pharmacies, or drug manufacturer). This rationale sometimes is applied even in comparative negligence jurisdictions to prevent plaintiffs recovery.

B. Plaintiff is required to come into court with "clean hands," and the court will not aid one whose own fault has participated in causing his injury.

C. A rule of negligence is designed to encourage optimal care by both interacting parties. Usually, primary liability will suffice in promoting that level of care, but it may be inadequate where one party acts negligently and the other has an opportunity to avoid the accident. Without the defense of contributory negligence, the injured party may face a diluted incentive to take due care and the system may incur more administrative costs as well. See Landes & Posner, The Economic Structure of Tort Law 73--77 (1987).

D. Plaintiffs negligence is an intervening, superseding cause, which makes the defendant's negligence no longer "proximate." What if two negligently driven automobiles collide and injure both drivers and a pedestrian who was in no way negligent. The pedestrian could recover from either driver, but neither driver could recover from the other. Does the "proximate cause" analysis vary as applied to each

of the potential plaintiffs? The plaintiffs negligence can be viewed as an act that stops the defendant's responsibility for the wrongful conduct. Without the intervention of the plaintiffs action, corrective justice notions would demand that the defendant rectify the wrong toward the plaintiff. For an examination of corrective justice issues, see Symposium, Corrective Justice and Formalism: The Care One Owes One's Neighbors, 77 Iowa L. Rev. 403 (1992).

4. The defense of contributory negligence should be distinguished from the rule on avoidable consequences or mitigation of damages, discussed at pages 676 to 678. The doctrine of avoidable consequences is invoked after plaintiff has been injured. Also, remember that plaintiffs conduct may be such that it is the sole proximate cause of the injury, even if defendant too was negligent. Cf. Soto v. NYC Transit Authority, 6 N.Y.3d 487, 846 N.E.2d 1211, 813 N.Y.S.2d 701 (2006). Plaintiff was among four teenagers who had been drinking, got tired waiting for a subway train to take them home, and started walking between stations on a catwalk that ran parallel to the tracks.

662

When they heard a train coming from behind them, they began running to try to catch the train at the next station. Plaintiff, in the midst of the line of running teens, suffered serious injury when the train struck him as he moved out around a signal box that jutted out onto the catwalk. Defendant argued that the plaintiffs conduct was the sole cause of his injuries but plaintiff argued that the conduct of both plaintiff and defendant (in failing to stop the train before it struck him) contributed to the cause of his injuries and should be

compared. The judge denied the defendant's motion for a directed verdict and the jury returned a verdict against the defendant, attributing 75% of the responsibility to the plaintiff. The Court of Appeals upheld the denial of the directed verdict by a split vote of 4 to 3.

5. The common law rule of contributory negligence often produced results that a court or jury regarded as unjust. Whenever a rule of law regularly produces unjust results or lags behind social and economic developments, courts develop ameliorating practices and a group of exceptions for avoiding its application. This tenet of judicial behavior, which might be called the Erosion Principle, has occurred in a number of important areas in the law of torts. Can you think of some other illustrations? Over the years, the courts created a number of judicial devices to ameliorate the harsh effects of the rule of contributory negligence as a complete bar to recovery.

A. Burden of Proof. The burden of pleading and proving contributory negligence is on the defendant. See e.g., Brown v. Piggly-Wiggly Stores, 454 So.2d 1370 (Ala. 1984) (contributory negligence is an affirmative defense). This is also true of comparative negligence. See Restatement (Third) of Torts: Apportionment of Liability § 4 (2000).

B. Leaving the Question of Contributory Negligence to the Jury. Courts have been very reluctant to take the issue of contributory negligence away from the jury through summary judgment, directed verdict, or judgment as a matter of law. See e.g., Lazar v. Cleveland Electric Illuminating Co., 43 Ohio St.2d 131, 331 N.E.2d 424 (1975) (plaintiff grabbed an uninsulated high tension wire) and Urban v.

Wait's Supermarket, Inc., 294 N.W.2d 793 (S.D.1980) (plaintiff tripped over a watermelon in a store aisle). But courts will do so if no reasonable jury could find in favor of one of the parties. Burleson v. RSR Group Fla., Inc., 981 So.2d 1109 (Ala. 2007) (contributory negligence as a matter of law where gun accidentally discharged when it fell from holster to desk when plaintiff was placing holster on rack with live round in chamber in line with hammer and manual safety not engaged) and RGR LLC v. Settle, 764 S.E.2d 8 (Va. 2014) (no contributory negligence as a matter of law where alleged alternative conduct--stopping on railroad tracks to look and listen for train--would have placed plaintiff in greater peril).

C. Causation in Fact. Plaintiffs negligence will bar recovery only if it is a substantial factor in bringing about the result. See, for example, Bahm v. Pittsburgh & Lake Erie R. Co., 6 Ohio St.2d 192, 217 N.E.2d 217 (1966) (jury instruction that plaintiffs recovery was barred if his conduct directly and proximately contributed "in any degree" to bring about the accident was error; quoted phrase must be eliminated so it is clear that plaintiff's conduct must be a substantial factor in bringing about the accident); Hofstrom v. Share, 295 N.J.Super. 186, 684 A.2d 981 (1996) (negligence of plaintiff in

failing to follow emergency room physician instructions to return immediately if condition worsened not relevant because defendant's experts did not establish that her conduct was a substantial factor in her injuries).

D. Proximate Cause. Courts have subtly confined the defense by narrowly limiting the scope of proximate cause as applied to risks

that plaintiff exposed himself to by his act of negligence. Prime examples are Furukawa v. Uoshio Ogawa, 236 F.2d 272 (9th Cir.1956) (applying California law) (negligence as to danger of falling, but not of falling upon a hook) and Smithwick v. Hall & Upson Co., 59 Conn. 261, 21 A. 924 (1890) (negligence as to danger of slipping off an unguarded icy ledge, but not of wall collapsing on plaintiff).

What should happen to these holdings when a jurisdiction adopts comparative negligence?

6. Dual Standards of Care. You will have noticed that the negligence cases we have read have sometimes been about defendant's alleged negligence and sometimes about plaintiff s. Does "negligence" mean the same in both scenarios? Professor Fleming James argued that the different treatment of plaintiffs contributory negligence as compared with defendant's negligence should be recognized as a formal rule, but the courts steadfastly have refused to do so. See Restatement (Third) of Torts: Apportionment of Liability § 3, comment a (2000). See also James, Contributory Negligence, 62 Yale L.J. 691 (1953); James and Dickinson, Accident Proneness and Accident Law, 63 Harv. L. Rev. 769 (1950).

Applicability of Contributory Negligence in Particular Circumstances

7. Defendant Engaged in Intentional, Wanton or Willful or Reckless Conduct. It is standard hornbook law that contributory negligence is not a defense to an intentional tort. See W. Prosser & W. Keeton,

Torts 462 (5th ed. 1984). Thus, one cannot defend against a battery by arguing that the plaintiff was negligent in failing to duck. The same general rule has been extended in almost every jurisdiction to situations in which defendant engaged in "wanton and willful" or reckless conduct. It is said that this conduct differs from negligence not only in degree, but also in kind and, therefore, the defense of contributory negligence is inapplicable. See, e.g., Kasanovich v. George, 348 Pa. 199, 34 A.2d 523, 525 (1943) ("Negligence consists of inattention or inadvertence, whereas wantonness exists where the danger to the plaintiff, though realized, is so recklessly disregarded that, even though there be no actual intent, there is at least a willingness to inflict injury, a conscious indifference to the perpetration of the wrong.") and Adkisson v. City of Seattle, 42 Wash.2d 676, 258 P.2d 461, 467 (1953) ("Wanton misconduct is not negligence, since it involves intent rather than inadvertence, and is positive rather than negative.")

8. Strict Liability. See Chapter 14, pages 813--817 and Chapter 15, pages 873-881.

9. Defendant Violates a Statute. Generally, contributory negligence is a defense where defendant was negligent per se because of violation of a statute. See Brown v. Derry, 10 Wash.App. 459, 518 P.2d 251 (1974)

(motorist transported individual on outside of vehicle). Certain statutes, however, are deemed to abrogate the defense. See generally Prosser, Contributory Negligence as Defense to Violation of Statute, 32 Minn. L. Rev. 105 (1948).

A. Statutes Explicitly Abolishing the Defense in Limited Situations. Sometimes the legislature explicitly abolishes the contributory negligence defense in a limited situation. An example is under the Federal Employers Liability Act ("FELA") when defendant has violated a federal safety standard and that caused the injury. See 45 U.S.C. § 53.

B. Statutes Intended to Protect a Plaintiff Unable to Protect Himself. Statutes prohibiting child labor, the sale of firearms to minors, the sale of liquor to intoxicated persons, and those that require safety devices to protect factory workers, have been held to be in this category. The court must determine that the "statute [was] enacted to protect a class of persons from their inability to exercise self-protective care." Restatement (Second) of Torts § 483.

Davies v. Mann

Exchequer, 1842.

10 M. & W. 546, 152 Eng.Rep. 588.

At the trial, before Erskine, J., at the last Summer Assizes for the county of Worcester, it appeared that the plaintiff, having fettered the fore feet of an ass belonging to him, turned it into a public highway, and at the time in question the ass was grazing on the off side of the road about eight yards wide, when the defendant's waggon, with a team of three horses, coming down a slight descent, at what the witness termed a smartish pace, ran against the ass, knocked it down, and the wheels passing over it, it died soon after. The ass was fettered at the time, and it was proved that the driver of the waggon was some little distance behind the horses. The learned Judge told

the jury, that though the act of the plaintiff, in leaving the donkey on the highway so fettered as to prevent his getting out of the way of carriages travelling along it, might be illegal, still, if the proximate cause of the injury was attributable to the want of proper conduct on the part of the driver of the waggon, the action was maintainable against the defendant; and his Lordship directed them, if they thought that the accident might have been avoided by the exercise of ordinary care on the part of the driver, to find for the plaintiff. The jury found their verdict for the plaintiff, damages 40s.

Godson now moved for a new trial, on the ground of misdirection.

LORD Abinger, C.B. I am of opinion that there ought to be no rule in this case. The defendant has not denied that the ass was lawfully in the highway, and therefore we must assume it to have been lawfully there; but even were it otherwise, it would have made no difference, for as the defendant might, by proper care, have avoided injuring the animal, and did not, he is liable for the consequences of his negligence, though the animal may have been improperly there.

665

PARKE, B. ***[Although the ass may have been wrongfully there, still the defendant was bound to go along the road at such a pace as would be likely to prevent mischief. Were this not so, a man might justify the driving over goods left on a public highway, or even over a man lying asleep there, or the purposely running against a carriage going on the wrong side of the road.

NOTES AND QUESTIONS

1. "The groans, ineffably and mournfully sad, of Davies' dying donkey, have resounded around the earth. The last lingering gaze from the soft, mild eyes of this docile animal, like the last parting sunbeams of the softest day in spring, has appealed to and touched the hearts of men. There has girdled the globe a band of sympathy for Davies' immortal 'critter.' Its ghost, like Banquo's ghost, will not down at the behests of the people who are charged with inflicting injuries, nor can its groanings be silenced by the ranting and excoriations of carping critics. The law as enunciated in that case has come to stay." McLain, J., in Fuller v. Illinois Cent. R. Co., 100 Miss. 705, 717, 56 So. 783 (1911).

2. Later commentators rationalized the holding in the principal case into what has come to be known as the doctrine of last clear chance. As the title indicates, the notion is that if the defendant had the opportunity to avoid the accident after the opportunity was no longer available to the plaintiff, the defendant is the one who should bear the loss. Note that under this doctrine, which saves the plaintiff from the consequences of his own negligence, the whole loss is still placed on one party or the other. Does this accomplish justice between the parties?

3. The doctrine of last clear chance is one of fearful and wonderful complexity. Some jurisdictions restricted its use to cases where the plaintiff was helpless and unable to avoid the danger created by the defendant's negligence, while others permitted its use if the plaintiff was merely inattentive to the danger. Some required the defendant to have discovered that the plaintiff was helpless, while others allowed its use if the defendant should have discovered that the plaintiff was helpless. See Restatement (Second) of Torts §§ 479

and 480, grouping the patterns around the nature of the plaintiffs conduct.

The few jurisdictions that still follow the common law rule of contributory negligence apply the exception of last clear chance in at least one of its many forms. For several modern cases in which the courts struggle to untangle its many threads to find the one applicable to the facts of the cases, see Belton v. WMATA, 20 F.3d 1197 (D.C.Cir.1994) (Plaintiff, dressed in a Batman cape and roaming the streets of Georgetown taunting motorists, banged on a bus door as the driver turned the corner. He slid under the bus and was injured. Whether bus driver's negligence was antecedent to plaintiffs and also operating after plaintiffs negligence was question for jury.); Williams v. Harrison, 255 Va. 272, 497 S.E.2d 467 (1998) (Plaintiff and defendant and two of their friends were driving their four cars through a suburban neighborhood at a speed of 60 m.p.h. when the second and third

cars in the line collided with each other. Jury instruction on last clear chance not available because plaintiff did not show that he was unconscious of his peril.); WMATA v. Johnson, 726 A.2d 172 (D.C.App.1999) (on certified question, court rules that the last clear chance doctrine does not apply to intentional act of woman who committed suicide by jumping into path of oncoming subway train in suit by her estate seeking recovery from transit authority for subway train operator's negligent failure to stop in time); Penn Harris Madison School Corp. v. Howard, 861 N.E.2d 1190 (Ind. 2007) (Indiana retains contributory negligence in cases against

governmental entities) (last clear chance does not apply where student who had designed a rig for Peter Pan to fly in a school play was injured while testing it during rehearsal--no evidence that school could have done anything to avert or prevent the injuries after plaintiff put himself in position of danger by jumping from ladder).

4. The last clear chance doctrine has been called a "transitional doctrine," a way station on the road to comparative negligence. James, Last Clear Chance: A Transitional Doctrine, 47 Yale L.J. 704 (1938). Its effect, for many years, however, was to freeze the transition rather than to hasten it. The opinion in the next principal case recounts the transition from contributory negligence as a complete bar to recovery to comparative negligence in the various jurisdictions in the United States.

(B) COMPARATIVE NEGLIGENCE

McIntyre v. Balentine

Supreme Court of Tennessee, 1992.

833 S.W.2d 52.

Drowota, J.

In this personal injury action, we granted Plaintiffs application for permission to appeal in order to decide whether to adopt a system of comparative fault in Tennessee. ***

In the early morning darkness of November 2, 1986, Plaintiff-Harry Douglas McIntyre and Defendant-Clifford Balentine were involved in a motor vehicle accident resulting in severe injuries to Plaintiff. The accident occurred in the vicinity of Smith's Truck Stop in Savannah,

Tennessee. As Defendant-Balentine was traveling south on Highway 69, Plaintiff entered the highway (also traveling south) from the truck stop parking lot. Shortly after Plaintiff entered the highway, his pickup truck was struck by Defendant's Peterbilt tractor. At trial, the parties disputed the exact chronology of events immediately preceding the accident.

Both men had consumed alcohol the evening of the accident. After the accident, Plaintiffs blood alcohol level was measured at .17 percent by weight. Testimony suggested that Defendant was traveling in excess of the posted speed limit.

667

Plaintiff brought a negligence action against Defendant-Balentine and [the lessee of the truck]. Defendants answered that Plaintiff was contributorially negligent, in part due to operating his vehicle while intoxicated. After trial, the jury returned a verdict stating: "We, the jury, find the plaintiff and the defendant equally at fault in this accident; therefore, we rule in favor of the defendant."

***

[After judgment was entered for Defendants on the verdict, Plaintiff brought an appeal alleging the trial court erred (1) by refusing to instruct the jury regarding the doctrine of comparative negligence and (2) in admitting evidence of intoxication. The Court of Appeals affirmed, holding that comparative negligence is not the law in Tennessee and that the evidence of intoxication was properly admitted. This appeal followed.]

I.

The common law contributory negligence doctrine has traditionally been traced to Lord Ellenborough's opinion in Butterfield v. Forrester, 11 East 60, 103 Eng.Rep. 926 (1809) [page 659]. There, plaintiff, "riding as fast as his horse would go," was injured after running into an obstruction defendant had placed in the road. Stating as the rule that "one person being in fault will not dispense with another's using ordinary care," plaintiff was denied recovery on the basis that he did not use ordinary care to avoid the obstruction. [C]

The contributory negligence bar was soon brought to America as part of the common law, see Smith v. Smith, 19 Mass. 621, 624 (1825), and proceeded to spread throughout the states. See H.W. Woods, The Negligence Case: Comparative Fault § 1:4 (1978). This strict bar may have been a direct outgrowth of the common law system of issue pleading; issue pleading posed questions to be answered "yes" or "no," leaving common law courts, the theory goes, no choice but to award all or nothing. See J.W. Wade, W.K. Crawford, Jr., and J.L. Ryder, Comparative Fault In Tennessee Tort Actions: Past, Present and Future, 41 Tenn. L. Rev. 423, 424-25 (1974). A number of other rationalizations have been advanced in the attempt to justify the harshness of the "all-or-nothing" bar. Among these: the plaintiff should be penalized for his misconduct; the plaintiff should be deterred from injuring himself; and the plaintiffs negligence supersedes the defendant's so as to render defendant's negligence no longer proximate. [Cc]

In Tennessee, the rule as initially stated was that "if a party, by his own gross negligence, brings an injury upon himself, or contributes to such injury, he cannot recover;" for, in such cases, the party "must be regarded as the author of his own misfortune." [C] In subsequent

decisions, we have continued to follow the general rule that a plaintiffs contributory negligence completely bars recovery. [Cc]

Equally entrenched in Tennessee jurisprudence are exceptions to the general all-or-nothing rule: contributory negligence does not absolutely

668

bar recovery where defendant's conduct was intentional, [cc]; where defendant's conduct was "grossly" negligent, [cc]; where the defendant had the "last clear chance" with which, through the exercise of ordinary care, to avoid plaintiffs injury, [cc]; or where plaintiffs negligence may be classified as "remote." [Cc]

***

Between 1920 and 1969, a few states began utilizing the principles of comparative fault in all tort litigation. [C] Then, between 1969 and 1984, comparative fault replaced contributory negligence in 37 additional states. [C] In 1991, South Carolina became the 45th state to adopt comparative fault, see Nelson v. Concrete Supply Co., 303 S.C. 243, 399 S.E.2d 783 (1991), leaving Alabama, Maryland, North Carolina, Virginia, and Tennessee as the only remaining common law contributory negligence jurisdictions.

Eleven states have judicially adopted comparative fault. Thirty-four states have legislatively adopted comparative fault.

***

II.

Over 15 years ago, we stated, when asked to adopt a system of comparative fault:

We do not deem it appropriate to consider making such a change unless and until a case reaches us wherein the pleadings and proof present an issue of contributory negligence accompanied by advocacy that the ends of justice will be served by adopting the rule of comparative negligence.

Street v. Calvert, 541 S.W.2d [576] at 586 [Tenn. 1976]. Such a case is now before us. After exhaustive deliberation that was facilitated by extensive briefing and argument by the parties, amicus curiae, and Tennessee's scholastic community, we conclude that it is time to abandon the outmoded and unjust common law doctrine of contributory negligence and adopt in its place a system of comparative fault. Justice simply will not permit our continued adherence to a rule that, in the face of a judicial determination that others bear primary responsibility, nevertheless completely denies injured litigants recompense for their damages.

We recognize that this action could be taken by our General Assembly. However, legislative inaction has never prevented judicial abolition of obsolete common law doctrines, especially those, such as contributory negligence, conceived in the judicial womb. [C] Indeed, our abstinence would sanction "a mutual state of inaction in which the court awaits action by the legislature and the legislature awaits guidance from the court," Alvis v. Ribar, 85 Ill.2d 1, 421 N.E.2d 886, 896, 52 Ill.Dec. 23 (1981), thereby prejudicing the equitable resolution of legal conflicts.

Nor do we today abandon our commitment to stare decisis. While "confidence in our courts is to a great extent dependent on the uniformity

669

and consistency engendered by allegiance to stare decisis, ***mindless obedience to this precept can confound the truth and foster an attitude of contempt." Hanover [v. Ruch], 809 S.W.2d at 898 [(Tenn. 1991)].

III.

Two basic forms of comparative fault are utilized by 45 of our sister jurisdictions, these variants being commonly referred to as either "pure" or "modified." In the "pure" form [5] a plaintiffs damages are reduced in proportion to the percentage negligence attributed to him; for example, a plaintiff responsible for 90 percent of the negligence that caused his injuries nevertheless may recover 10 percent of his damages. In the "modified" form [6] plaintiffs recover as in pure jurisdictions, but only if the plaintiffs negligence either (1) does not exceed ("50 percent" jurisdictions) or (2) is less than ("49 percent" jurisdictions) the defendant's negligence. See generally V. Schwartz, supra, at §§ 3.2, 3.5.

* * *

[5] The 13 states utilizing pure comparative fault are Alaska, Arizona, California, Florida, Kentucky, Louisiana, Mississippi, Missouri, Michigan, New Mexico, New York, Rhode Island, and Washington. See V. Schwartz, supra, at § 2.1. [Michigan has since moved to the "50 percent" modified form. Ed.]

[6] The 21 states using the "50 percent" modified form: Connecticut, Delaware, Hawaii, Illinois, Indiana, Iowa, Massachusetts, Minnesota, Montana, Nevada, New Hampshire, New Jersey, Ohio, Oklahoma, Oregon, Pennsylvania, South Carolina, Texas, Vermont, Wisconsin, and Wyoming. The 9 states using the "49 percent" form: Arkansas, Colorado, Georgia, Idaho, Kansas. Maine, North Dakota, Utah, and West Virginia. Two states, Nebraska and South Dakota, use a slight-gross system of comparative fault. See V. Schwartz, supra, at § 2.1. [Nebraska and West Virginia have since moved to the "50 percent" modified form. Ed.]

Although we conclude that the all-or-nothing rule of contributory negligence must be replaced, we nevertheless decline to abandon totally our fault-based tort system. We do not agree that a party should necessarily be able to recover in tort even though he may be 80, 90, or 95 percent at fault. We therefore reject the pure form of comparative fault.

We recognize that modified comparative fault systems have been criticized as merely shifting the arbitrary contributory negligence bar to a new ground. See, e.g. Li v. Yellow Cab Co., 13 Cal.3d 804, 532 P.2d 1226, 119 Cal.Rptr. 858 (1975). However, we feel the "49 percent rule" ameliorates the harshness of the common law rule while remaining compatible with a fault-based tort system. [C] We therefore hold that so long as a plaintiffs negligence remains less than the defendant's negligence the plaintiff may recover; in such a case, plaintiffs damages are to be reduced in proportion to the percentage of the total negligence attributable to the plaintiff.

In all trials where the issue of comparative fault is before a jury, the trial court shall instruct the jury on the effect of the jury's finding as to the percentage of negligence as between the plaintiff or plaintiffs and the defendant or defendants. [C] The attorneys for each party shall be allowed to argue how this instruction affects a plaintiffs ability to recover.

670

IV.

Turning to the case at bar, the jury found that "the plaintiff and defendant [were] equally at fault." Because the jury, without the benefit of proper instructions by the trial court, made a gratuitous apportionment of fault, we find that their "equal" apportionment is not sufficiently trustworthy to form the basis of a final determination between these parties. Therefore, the case is remanded for a new trial in accordance with the dictates of this opinion.

V.

We recognize that today's decision affects numerous legal principles surrounding tort litigation. For the most part, harmonizing these principles with comparative fault must await another day. However, we feel compelled to provide some guidance to the trial courts charged with implementing this new system.

First, and most obviously, the new rule makes the doctrines of remote contributory negligence and last clear chance obsolete. The circumstances formerly taken into account by those two doctrines will henceforth be addressed when assessing relative degrees of fault.

Second, in cases of multiple tortfeasors, plaintiff will be entitled to recover so long as plaintiff's fault is less than the combined fault of all tortfeasors.

Third, today's holding renders the doctrine of joint and several liability obsolete. Our adoption of comparative fault is due largely to considerations of fairness: the contributory negligence doctrine unjustly allowed the entire loss to be borne by a negligent plaintiff, notwithstanding that the plaintiffs fault was minor in comparison to defendant's. Having thus adopted a rule more closely linking liability and fault, it would be inconsistent to simultaneously retain a rule, joint and several liability, which may fortuitously impose a degree of liability that is out of all proportion to fault. [7]

* * *

[7] Numerous other comparative fault jurisdictions have eliminated joint and several liability. See, e.g., Alaska Stat. § 09.17.080(d) (Supp.1991); Colo.Rev.Stat. § 13-21-111.5(1) (1987); Kan.Stat.Ann. § 60-258a(d) (Supp.1991); N.M.Stat.Ann. §41-3A-1 (1989); N.D.Cent.Code § 32-03.2-02 (Supp.1991); Utah Code Ann. § 78-27-38, -40 (1992); Wyo.Stat.Ann. § l-l-109(d) (1988).

Further, because a particular defendant will henceforth be liable only for the percentage of a plaintiffs damages occasioned by that defendant's negligence, situations where a defendant has paid more than his "share" of a judgment will no longer arise, and therefore the Uniform Contribution Among Tort-feasors Act, T.C.A. §§ 29-11-101 to 106 (1980), will no longer determine the apportionment of liability between codefendants.

Fourth, fairness and efficiency require that defendants called upon to answer allegations in negligence be permitted to allege, as an affirmative defense, that a non-party caused or contributed to the injury

671

or damage for which recovery is sought. In cases where such a defense is raised, the trial court shall instruct the jury to assign this nonparty the percentage of the total negligence for which he is responsible. However, in order for a plaintiff to recover a judgment against such additional person, the plaintiff must have made a timely amendment to his complaint and caused process to be served on such additional person. Thereafter, the additional party will be required to answer the amended complaint. The procedures shall be in accordance with the Tennessee Rules of Civil Procedure.

Fifth, until such time as the Tennessee Judicial Conference Committee on Civil Pattern Jury Instructions promulgates new standard jury instructions, we direct trial courts' attention to the suggested instructions and special verdict form set forth in the appendix to this opinion.

VI.

The principles set forth today apply to (1) all cases tried or retried after the date of this opinion, and (2) all cases on appeal in which the comparative fault issue has been raised at an appropriate stage in the litigation.

***

For the foregoing reasons, the judgment of the Court of Appeals is reversed in part and affirmed in part [on other issue on appeal relating to admissibility of evidence of intoxication], and the case is remanded to the trial court for a new trial in accordance with the dictates of this opinion. The costs of this appeal are taxed equally to the parties.

NOTES AND QUESTIONS

1. Note the court's discussion of the history of the gradual shift from contributory negligence to comparative negligence and of the policy issues underlying each of the doctrines.

2. Only four states (Alabama, Maryland, North Carolina, and Virginia) and the District of Columbia continue to apply the common law doctrine that contributory negligence is a complete bar to recovery. See Williams v. Delta International Mach. Corp., 619 So.2d 1330, 1333 (Ala. 1993) ("We have heard hours of oral argument; we have read numerous briefs; we have studied cases from other jurisdictions and law review articles; and in numerous conferences we have discussed in depth this issue and all of the ramifications surrounding such a change. After this exhaustive study and these lengthy deliberations, the majority of the Court, for various reasons, has decided that we should not abandon the doctrine of contributory negligence, which has been the law in Alabama for approximately 162 years.") and Coleman v. Soccer Ass'n of Columbia, 432 Md. 679, 69 A.3d 1149 (2013) (declining to abandon common law doctrine of contributory negligence because such a change involves fundamental and basic public policy considerations properly left to legislature).

3. As the principal case tells you, most of the 46 jurisdictions that have adopted comparative negligence have done so by legislation with only a dozen doing so by judicial decision. Even in some jurisdictions, like Tennessee in the principal case, that first adopted comparative negligence by decision, the legislature has since acted to establish a comprehensive statutory scheme. See, e.g., Goetzman v. Wichern, 327 N.W.2d 742 (Iowa 1982) and Iowa Code Ann. § 668.3; Alvis v. Ribar, 85 III.2d 1, 421 N.E.2d 886, 52 III.Dec. 23 (1981) and 735 III. Comp. Stat. 5/2--1116.

4. Do you think that behavior will differ according to whether contributory negligence or some form of comparative negligence is the rule? The law and economics literature has explored this issue. The comparative negligence rule also has been advocated by reference to game theory. Orr, The Superiority of Comparative Negligence, 20 J. Legal Stud. 119 (1991). What about litigation costs? Do you think that more litigation, more hotly contested, and less susceptible to settlement, would be generated under comparative fault? Is "fairness" enough to justify comparative negligence if it is less efficient? See also, Cane & Goudkamp, Atiyah's Accidents, Compensation and the Law 464-466 (8th ed. 2018).

5. Note that the Tennessee Supreme Court in adopting comparative negligence had to make a number of other decisions. Which type of comparative negligence? What about the continuing effect of ameliorating doctrines like last clear chance? In multiple defendant cases, does the jury compare the fault of the plaintiff to each

defendant or to all of the defendants combined? Should joint and several liability survive the adoption of comparative negligence? Should the fault of a non-party be considered by the jury in its apportionment of fault? What should the jury be told about the impact of its allocation of fault? When should the new rules take effect? The notes that follow discuss how these and other issues have been resolved in other jurisdictions adopting comparative negligence.

6. Types of Comparative Negligence. After deciding against the "all or nothing" approach of contributory negligence, the court or legislature must decide the effect of the plaintiffs contributory negligence on plaintiffs recovery.

A. Pure. About ten jurisdictions (e.g., Arizona, California, New York, and Washington) and several federal statutes (e.g., FELA, Jones Act) have adopted the pure comparative negligence approach. In those jurisdictions, the plaintiff's recovery is reduced by the percentage fault attributable to the plaintiff. See also Restatement (Third) of Torts: Apportionment of Liability § 7 (2000).

B. Modified (Plaintiff "Not as Great as"). About a dozen jurisdictions (e.g., Arkansas, Colorado, Nebraska, and Tennessee) have adopted a modified form of comparative negligence in which the plaintiff's recovery is reduced by the percentage of fault attributable to the plaintiff as long as the plaintiffs fault is "not as great as" the defendant's. If the plaintiffs fault is equal to or greater than the defendant's, the plaintiff is completely barred from recovery. Maine's statute authorizes the jury to reduce the damages to "such extent as the jury thinks just and equitable having regard to the

claimant's share in the responsibility for the damage," without actually requiring that it be proportional. Thus, the jury may reduce the amount of damages by more than the percentage of fault attributable to the plaintiff. Pelletier v. Fort Kent Golf Club., 662 A.2d 220 (Maine 1995) (interpreting 14 Maine Rev.Stat. § 156).

C. Modified (Plaintiff "Not Greater than"). About twenty jurisdictions (e.g., Connecticut, New Jersey, Texas, and Wisconsin) have adopted a modified form of comparative negligence in which the plaintiffs recovery is reduced by the percentage of fault attributable to the plaintiff as long as the plaintiffs fault is "not greater than" the fault of the defendant's. If the plaintiff's fault is greater than the defendant's, the plaintiff is completely barred from recovery.

The two modified forms of comparative negligence produce a different result only in the 50/50 case. Although this distinction may not seem very important in theory, it is important as a practical matter because a 50/50 apportionment is an appealing one to juries and therefore common. See also Best & Donahue, Jury Nullification in Modified Comparative Negligence Regimes, 79 U. Chi. L. Rev. 945 (2012) (finding that juries in modified comparative negligence jurisdictions are 67% less likely to assign fault in excess of 50% to the plaintiff than juries in pure comparative negligence jurisdictions).

D. Slight. South Dakota is the only remaining jurisdiction that apportions damages so long as plaintiffs negligence "was slight in comparison with the negligence of the defendant"; otherwise, plaintiff is barred from recovery. What constitutes "slight" contributory negligence is a "relative and variable term [that defies] precise

definition and prohibits an arbitrary mathematical ratio limitation." Crabb v. Wade, 84 S.D. 93, 167 N.W.2d 546 (1969). Lindholm v. BMW of No. A. LLC, 862 F.3d 648, 653 (8th Cir. 2017) (applying South Dakota law) ("Slight" in this context means "small of its kind or in amount; scanty; meager.") See also Wood v. City of Crooks, 559 N.W.2d 558 (S.D. 1997) (apparently setting a thirty percent ceiling as to what constitutes more than slight as a matter of law) and S.D. Codified Laws 20-9--2 (amending the statute to prohibit juries from revealing their determination of the relative negligence of each party, apparently to prevent the parties from knowing their relative fault).

7. What Is Being Compared? In comparative negligence jurisdictions, what is the jury being asked to compare? Should fault be apportioned according to the nature of the parties' conduct (whose conduct was worse) or the proximity of the causal relationship between the conduct and the injuries (whose conduct contributed more to the cause of the injury) or some combination of the two? Sanders v. Frank, 37 N.E.3d 1305 (Ohio App. 2015) (the relative degree to which each party's conduct proximately caused the plaintiffs injuries, rather than the comparative reasonableness of their conduct) and Eaton v. McLain, 891 S.W.2d 587 (Tenn. 1994) (cataloguing the approaches of various jurisdictions).

8. Mechanics of Apportionment. Some statutes use a special verdict or special interrogatory procedure by which the jurors inform the court as to

(1) what percentage of fault was attributable to each party and (2) how much damage each claimant suffered. The court then computes

the damages. Is this procedure better or is it better to let the jury return a general verdict? See, for example, In re Asbestos Litigation Pusey Trial Group, 669 A.2d 108 (Del. 1995) (establishing order of questions for jury to consider re effect of plaintiffs' smoking in lung cancer cases brought against asbestos defendants).

9. Burden of Proof. The burden of proof is on the defendant to show both that the plaintiff was negligent and that the plaintiffs negligent conduct was a proximate cause of the plaintiffs injuries. See Restatement (Third) of Torts: Apportionment of Liability § 4 (2000).

10. Should the Jury Be Instructed as to the Legal Consequences of Their Verdict? For example, in a modified comparative negligence jurisdiction, a percentage change of a single point can mean the plaintiff recovers almost half of her damages or none of them. See Kaeo v. Davis, 68 Haw. 447, 719 P.2d 387 (1986) (jury should be told). See also Reporters' Notes to Restatement (Third) of Torts: Apportionment of Liability § 7, Reporters' Note to comment n (2000).

11. Multiple Parties. In a modified comparative negligence system, if there are several defendants, should plaintiffs negligence be compared with that of each defendant individually or with all of them together? Compare Wis. Stat. 895.045(1) (against each) with N.J. Stat. § 2A:15--5.1 (against all) and Restatement (Third) of Torts: Apportionment of Liability § 7, Reporters' Note to comment n (2000) (noting that almost all jurisdictions use "against all"). What did Tennessee decide to do in the principal case?

12. Application to Persons Not Made Party to the Action. Should their proportion of the fault be assessed and taken into consideration?

13. Immunity. Should the fault of an immune actor be considered? That decision may depend on the type of immunity at issue: Snyder v. LTG Lufttechnische GmbH, 955 S.W.2d 252 (Tenn. 1997) (jury may consider actions of immune employer in deciding whether manufacturer of product used by worker is liable, but may not assess fault against the employer); Carroll v. Whitney, 29 S.W.3d 14 (Tenn. 2000) (jury may allocate fault to resident physicians who were immune because they were employees of state); Sears, Roebuck & Co. v. Huang, 652 A.2d 568 (Del. 1995) (parental negligence in supervising child who was injured by escalator may be considered by jury in deciding whether escalator manufacturer is liable, but jury may not assess fault against mother); Y.H. Investments, Inc. v. Godales, 690 So.2d 1273 (Fla.1997) (jury, in assessing fault against owner of apartment building responsible for guardrail that was in violation of statute, could consider fault of mother of injured two-year-old plaintiff); and Mack Trucks, Inc. v. Tackett, 841 So.2d 1107 (Miss. 2003) (permitting fault to be allocated to immune employer).

14. Relationship to Contribution. What should be done if a separate statute provides for pro rata per capita contribution?

15. Should Joint and Several Liability Be Abolished? As the principal case indicates, some states have eliminated joint and several liability after

adopting comparative negligence, while others have retained it. See Fernanders v. Marks Construction of S.C., Inc., 330 S.C. 470, 499 S.E.2d 509 (1998) (declining to abolish joint and several liability in wake of adoption of comparative negligence and collecting cases

and statutes from other jurisdictions). See also the cases and notes at pages 419-427.

16. Effect of Comparative Negligence on Certain Common Law Doctrines, (a) Last clear chance. Like Tennessee in the principal case, most courts have found that the doctrine is no longer necessary under comparative negligence, while others have retained it even after switching to comparative negligence. See Restatement (Third) of Torts: Apportionment of Liability § 3, Reporters' Note to comment b (2000). (b) Res ipsa loquitur. In those jurisdictions that had required it, should it still be necessary for the plaintiff to present evidence that no negligent conduct on his part contributed to the injury? (c) Imputed negligence. (Chapter 7, page 776.)

17. Types of Defendant's Conduct Subject to Application of Comparative Fault. Comparative fault is, of course, applicable to negligence. What about an intentional tort? If defendant swings at plaintiff, should the damages be reduced because of plaintiffs negligent failure to duck? The answer would be no in a contributory negligence jurisdiction and in most comparative negligence jurisdictions as well. Ezzell v. Miranne, 84 S.3d 641 (La. App. 2011). What about recklessness? Willful and wanton misconduct? Compare Berberich v. Jack, 392 S.C. 278, 709 S.E.2d 607 (2011) (homeowner's ordinary negligence could be compared with contractor's recklessness for comparative negligence purposes) with Burke v. 12 Rothschild's Liquor Mart, Inc., 148111.2d 429, 170 III.Dec. 633, 593 N.E.2d 522 (1992) (qualitative difference between negligence and willful/wanton conduct means that they cannot be compared and comparative negligence is thus not a defense to intentional or willful/wanton conduct). Violation of a "higher degree of

care" imposed on a common carrier? Strict liability for abnormally dangerous activities (Chapter 14), or for products liability based on strict liability or breach of warranty (Chapter 15)? Fuchsgruber v. Custom Accessories, Inc., 244 Wis.2d 758, 628 N.W.2d 833 (2001) (in strict product liability cases, jury asked to determine extent to which plaintiffs injuries were attributable to his own negligence as compared to the product's defectiveness). Defendant maintains a nuisance (Chapter 16); should all nuisances be treated alike? He makes a misrepresentation that plaintiff relies upon to his detriment (Chapter 21); should intentional and negligent misrepresentations be treated alike? What about fraud? Schoeff v. R.J. Reynolds Tobacco Co., 232 So.3d 294 (Fla. 2017) (comparative fault not a defense to intentional torts, including fraud).

18. Extent to Which Plaintiff's Condition or the Nature of His Conduct Affects the Application of Comparative Fault. Assume plaintiff is a minor or aged, or is mentally or physically impaired; or is an automobile guest in a state that has a different standard of care for them; he is a trespasser or licensee on defendant's land; or acted recklessly (all problems treated in earlier chapters). See, for example, Christensen v. Royal School District No. 160, 156 Wash.2d 62, 124 P.3d 283 (2005) (answering certified question from federal district court) (although contributory negligence of minor generally

is available to compare in negligence suits brought by minors, in suit against school district for negligence in hiring and supervising teacher accused of sexual abuse of middle school student, court rules that minor under the age of 16 has no duty to protect herself

from sexual abuse by teacher) and Gregoire v. City of Oak Harbor, 170 Wash.2d 628, 244 P.3d 924 (2010) (jailor's special duty to inmates includes protecting against suicide, to which assumption of the risk and contributory negligence cannot be defenses) (collecting cases from other jurisdictions).

19. See V. Schwartz, Comparative Negligence (6th ed. 2020) (supplemented annually) and H. Woods and B. Deere, Comparative Fault (3d ed. 1996) (supplemented annually).

Failure to Take Advance Precautions Before Injury- Mitigation of Damages After Injury

1. Before Injury. Plaintiff negligently fails to wear his seatbelt and is more seriously injured than he would have been if he had worn it. Should plaintiffs failure to wear a seatbelt be considered in his case against the other driver? Against the vehicle manufacturer? See Restatement (Third) of Torts: Apportionment of Liability § 3, comment b, illus. 3 (2000) (unless there is a statute precluding consideration, such conduct should be taken into account). Compare Estep v. Mike Ferrell Ford Lincoln-Mercury, 223 W.Va. 209, 672 S.E.2d 345 (2008) (West Virginia statute prohibits introduction of evidence that plaintiff was not wearing seatbelt even in crashworthiness cases against car manufacturer as long as plaintiff stipulates to a 5% reduction in damages) with Stokes v. Montana Thirteenth Judicial Dist. Court, 361 Mont. 279, 259 P.3d 754 (2011) (joining majority of jurisdictions that interpret their statutes to permit evidence of seatbelt use or nonuse in cases alleging

crashworthiness against the manufacturer, but not those alleging negligence against the driver of the other car). See also Restatement (Third) of Torts: Products Liability § 16, comment f (1998) (Reporters' Note lists jurisdictions that have statutes that do not permit plaintiffs damages to be reduced by failure to wear a seatbelt and those that do). Texas is one of the jurisdictions where admissibility of seatbelt nonuse is not governed by statute. It recently decided to permit that evidence to be admitted as part of the consideration of comparative negligence where the defendant was the driver of the other vehicle. Nabors Well Services, Ltd. v. Romero, 456 S.W.3d 553 (Tex. 2015) (noting that holding is not merely correct interpretation of the comparative negligence statute but also promotes sound public policy).

In a case where the jury found that the plaintiff was 90% at fault for her injuries due to her failure to use the shoulder harness of her seatbelt, should her damages award be reduced by 5% as provided by the seatbelt statute or 90% as provided by the comparative fault statute? Klinke v. Mitsubishi Motors Corp., 458 Mich. 582, 581 N.W.2d 272 (1998) (5% cap on reduction applicable against another driver, but not against manufacturer of car).

In an enhanced injury case in which plaintiff argued that a defective air bag enhanced driver's injuries, can jury consider that driver's action in being out of position (leaning over the passenger seat when car hit tree and airbag

deployed) under the comparative negligence statute? Wickersham v. Ford Motor Co., S.E.2d, 2019 WL 3311057 (S.C. 2019) (answering

certified

question) (plaintiff has burden of proving the defendant's tortious conduct--whether the theory of recovery is negligence, breach of warranty, or strict liability--proximately caused a specific share of the plaintiffs enhanced injuries). But the driver's negligence in causing the accident itself would not be relevant in an enhanced injury case because it is too remote. Donze v. General Motors, LLC, 420 S.C. 8, 800 S.E.2d 479 (2017).

2. Suppose plaintiff motorcyclist fails to wear a helmet in violation of state law. Defendant negligently crashes into him. Should the court allow defendant to show that plaintiffs injuries would have been less severe if he had worn the helmet? Rogers v. Frush, 257 Md. 233, 262 A.2d 549 (1970) (failure to wear helmet not admissible to show contributory negligence or failure to mitigate damages) and McKinley v. Casson, 80 A.3d 618 (Del. 2013) (because neither statutory nor common law duty to wear motorcycle helmet, nonuse not relevant to comparative negligence). What if a parent does not secure a child in a child safety seat in violation of state law? Cf. Thurel v. Varghese, 207 A.D.2d 220, 621 N.Y.S.2d 633 (N.Y. App. 1995) (court did not reach question because statute was applicable only to operator of vehicle and mother who was holding unrestrained baby in backseat was not operator).

3. In what other situations might there be a duty imposed on plaintiff to take self-precaution against the negligence of others? Should neighbors have to wear masks in an area polluted by a factory? Should they have to wear hard hats when walking near a negligently maintained construction site? Where should the line be drawn? The

conceptual problem underlying these cases is not new. Many tort law students of the 1930s and 1940s spent hours studying the case of Mahoney v. Beatman, 110 Conn. 184, 147 A. 762 (1929). Plaintiff drove an automobile at excessive speed and defendant negligently crossed over the median and collided with it. The proof was clear that plaintiffs speed did not contribute to the cause of the collision, but it did increase plaintiffs damages. How should the court have decided the case? (After extensive discussion of causation, court awarded plaintiff full amount of his damages.)

4. After Injury. The so-called duty to mitigate damages in tort law, sometimes called the doctrine of avoidable consequences, actually is merely a rule that does not allow recovery of those damages that plaintiff could have avoided by reasonable conduct on the part of the plaintiff after a legal wrong has been committed by defendant. It is distinguished from the defense of contributory or comparative negligence, which is unreasonable conduct on the part of plaintiff that contributes to the happening of the accident or injury in the first place. See, for example, Searles v. Fleetwood Homes of Pa., Inc., 878 A.2d 509 (Me. 2005) (distinguishing between comparative negligence and mitigation of damages).

5. The failure to submit to surgery that a reasonable person would undergo to mitigate injury can limit plaintiff's damages for both loss of wages and pain and suffering. See Young v. American Export Isbrandtsen Lines, Inc., 291 F.Supp. 447 (S.D.N.Y. 1968) (plaintiff refused surgery that doctor testified would have repaired cartilage and allowed him to return to work).

The mere fact that there is some risk involved, even with a chance of fatality, may not bar the application of the avoidable consequences rule. See Bowers v. Lumbermens Mut. Casualty Co., 131 So.2d 70 (La.App.1961). See also Hayes v. United States, 367 F.2d 340 (2d Cir.1966) (claim under FTCA for fall in post office). Cf. Ramkumar v. Grand Style Transp. Enters., Inc., 998 N.E.2d 801 (N.Y. 2013) (plaintiff making no-fault claim was asked why he was no longer going to physical therapy). Is this consistent with the principle inherent in the law of battery that individuals should have the right to decide whether another person can violate their physical being? Why impose an obligation to mitigate damages?

6. In some cases, the plaintiffs failure to undergo particular medical treatment is motivated by the plaintiffs religious beliefs. How should this affect the doctrine? Some courts would not admit evidence of the plaintiff's religious beliefs while others permit the jury to consider it as part of their determination of reasonableness. How might the First Amendment affect the application of the tort doctrine? See Munn v. Algee, 924 F.2d 568 (5th Cir. 1991) (finding neither the Establishment Clause nor the Free Exercise Clause violated); Williams v. Bright, 230 A.D.2d 548, 658 N.Y.S.2d 910 (1997) ("[W]e hold that the pattern jury instruction must be supplemented here with the following direction: 'In considering whether the plaintiff acted as a reasonably prudent person, you may consider the plaintiff's testimony that she is a believer in the Jehovah's Witness faith, and that as an adherent of that faith, she cannot accept any medical treatment which requires a blood transfusion. I charge you that such belief is a factor for you to consider, together with all the other evidence you have heard, in determining whether the plaintiff acted

reasonably in caring for her injuries, keeping in mind, however, that the overriding test is whether the plaintiff acted as a reasonably prudent person, under all the circumstances confronting her.'").

7. Should the reduction in damages be considered a "defense"? See J. Goudkamp, Tort Law Defences (Hart Publishing 2014) (arguing that doctrines affecting the amount of damages--remedy restricting rules--should not be categorized as defenses.)

(C) Assumption of Risk

(1) Express

Seigneur v. National Fitness Institute, Inc.

Court of Special Appeals of Maryland, 2000.

132 Md.App. 271, 752 A.2d 631.

SALMON, J. In this case, we are asked to examine the enforceability of an exculpatory clause found in a fitness club's contract. ***

[Gerilynne Seigneur was injured while undergoing an initial evaluation at a fitness club owned and operated by National Fitness Institute, Inc. ("NFI"), a Maryland corporation operating an exercise and fitness facility in Montgomery County, Maryland. Ms. Seigneur, after deciding to begin a weight loss and fitness program, joined NFI on a one-month

679

trial basis, having selected NFI over its competitors because her chiropractor had recommended it, it advertised as a fitness club that

employed certified fitness and health specialists, and promised to provide programs that are "appropriate for your health status and fitness level." When she signed her membership contract, Ms. Seigneur disclosed that she had a history of serious lower back problems, including a herniated disc, and that her general physical condition was poor. As part of the application process, Ms. Seigneur was required to complete and sign a Participation Agreement that, besides informing the customer of NFI's payment and fee collection policies, contained the following clause:

"Important Information: I, the undersigned applicant, agree and understand that I must report any and all injuries immediately to NFI, Inc. staff. It is further agreed that all exercises shall be undertaken by me at my sole risk and that NFI, Inc. shall not be liable to me for any claims, demands, injuries, damages, actions, or courses of action whatsoever, to my person or property arising out of or connecting with the use of the services and facilities of NFI, Inc., by me, or to the premises of NFI, Inc. Further, I do expressly hereby forever release and discharge NFI, Inc. from all claims, demands, injuries, damages, actions, or courses of action, and from all acts of active or passive negligence on the part of NFI, Inc., its servants, agents or employees."

During her initial evaluation on the weight machines, Ms. Seigneur felt a tearing or ripping sensation in her right shoulder. Since the incident, she has had pain and difficulty using her shoulder and has undergone shoulder surgery for a condition that her doctor attributed to the use of NFI's upper torso machine. She and her husband filed a negligence action against NFI, based on vicarious liability for the actions of the employee who conducted the evaluation and for its

own negligence in hiring and failing to properly train the employee. NFI filed a motion to dismiss, treated by the court as a motion for summary judgment, arguing that the exculpatory clause contained in the Participation Agreement was valid and enforceable and that NFI was entitled to judgment as a matter of law. The Seigneurs responded by arguing that the Participation Agreement was a contract of adhesion and that the exculpatory clause was void as against public policy and that even if the clause did not violate public policy, the agreement was unclear and ambiguous, thus precluding summary judgment.]

Analysis

A. Validity of the Exculpatory Clause

To decide this case, we must first determine whether the exculpatory clause quoted at the beginning of this opinion unambiguously excused NFI's negligence. In construing the Participation Agreement, we are required to give legal effect to all of its unambiguous provisions. ***

680

In Maryland, for an exculpatory clause to be valid, it need not contain or use the word "negligence" or any other "magic words." [Cc] An exculpatory clause "is sufficient to insulate the party from his or her own negligence as long as [its] language... clearly and specifically indicates the intent to release the defendant from liability for personal injury caused by the defendant's negligence...." (internal quotations omitted) [Cc]

In the instant case, there is no suggestion that the agreement between NFI and Ms. Seigneur was the product of fraud, mistake, undue influence, overreaching, or the like. The exculpatory clause unambiguously provides that Ms. Seigneur "expressly hereby forever releases and discharges NFI, Inc. from all claims, demands, injuries, damages, actions, or courses of action, and from all acts of active or passive negligence on the part of NFI, Inc., its servants, agents or employees." (emphasis added). Under these circumstances, we hold that this contract provision expresses a clear intention by the parties to release NFI from liability for all acts of negligence. ***

B. Public Policy Exception

More than one hundred years ago, it was noted that "the right of parties to contract as they please is restricted only by a few well defined and well settled rules, and it must be a very plain case to justify a court in holding a contract to be against public policy." [Cc] This legal principle continues to hold true today.

In Maryland, unambiguous exculpatory clauses are generally held to be valid in the absence of legislation to the contrary. ***The Court of Appeals, in Wolf v. Ford, 335 Md. 525, 644 A.2d 522 (1994), said: It is quite possible for the parties expressly to agree in advance that the defendant is under no obligation of care for the benefit of the plaintiff, and shall not be liable for the consequences of conduct which would otherwise be negligent. There is in the ordinary case no public policy which prevents the parties from contracting as they see fit. (quoting W. Page Keeton, et al., Prosser and Keeton on the Law of Torts, § 68 (5th ed. 1984)).

Three exceptions have been identified where the public interest will render an exculpatory clause unenforceable. They are: (1) when the party protected by the clause intentionally causes harm or engages in acts of reckless, wanton, or gross negligence; (2) when the bargaining power of one party to the contract is so grossly unequal so as to put that party at the mercy of the other's negligence; and (3) when the transaction involves the public interest. [Cc]

Ms. Seigneur has not alleged that NFI's agents intentionally caused her harm, or engaged in reckless, wanton, or gross acts of negligence. She does assert, however, that the second and third exceptions are applicable.

Appellants argue that NFI "possesses a decisive advantage in bargaining strength against members of the public who seek to use its services."

681

She also claims that she was presented with a contract of adhesion and that this is additional evidence of NFI's grossly disproportionate "bargaining power."

It is true that the contract presented to Ms. Seigneur was a contract of adhesion. [4] But that fact alone does not demonstrate that NFI had grossly disparate bargaining power. ***[T]here were numerous other competitors providing the same non-essential services as NFI. The exculpatory clause was prominently displayed in the Participation Agreement and Ms. Seigneur makes no claim that she was unaware of this provision prior to her injury.

* * *

[4] "A contract of adhesion has been defined as one 'that is drafted unilaterally by the dominant party and then presented on a "take-it-or-leave-it" basis to the weaker party who has no real opportunity to bargain about its terms.'" Meyer v. State Farm Fire and Cas. Co., 85 Md. App. 83, 89, 582 A.2d 275 (1990) (quoting Restatement (Second) of Conflict of Laws § 187, comment b).

To possess a decisive bargaining advantage over a customer, the service offered must usually be deemed essential in nature. ***[The court discussed two earlier Maryland cases that had found that parachute jumping and drag racing were not of an essential nature.] In Schlobohm [v. Spa Petite, Inc., 326 N.W.2d 920 (Minn. 1982)], the Court said:

In the determination of whether the enforcement of an exculpatory clause would be against public policy, the courts consider whether the party seeking exoneration offered services of great importance to the public, which were a practical necessity for some members of the public. As indicated above, courts have found generally that the furnishing of gymnasium or health spa services is not an activity of great public importance nor of a practical necessity. For example, in a negligence action brought against a health club and gym, the Court of Appeals of New York in Ciofalo v. Vic Tanney Gyms, Inc., 10 N.Y.2d 294, 297-98, 220 N.Y.S.2d 962, 964, 177 N.E.2d 925, 927 (1961), noted:

Here there is no special legal relationship and no overriding public interest which demand that this contract provision, voluntarily entered into by competent parties, should be rendered ineffectual. Defendant, a private corporation, was under no obligation or legal

duty to accept plaintiff as a "member" or patron. Having consented to do so, it has the right to insist upon such terms as it deemed appropriate. Plaintiff, on the other hand, was not required to assent to unacceptable terms, or to give up a valuable legal right, as a condition precedent to obtaining employment or being able to make use of the services rendered by a public carrier or utility. She voluntarily applied for membership in a private organization, and agreed to the terms upon which the membership was bestowed. She may not repudiate them now.

Similarly, in Shields v. Sta-Fit, Inc., 79 Wn. App. 584, 903 P.2d 525, 528 (Wash.App. 1995), the Court pointed out that:

682

Health clubs are a good idea and no doubt contribute to the health of the individual participants and the community at large. But ultimately, they are not essential to the state or its citizens. And any analogy to schools, hospitals, housing (public or private) and public utilities therefore fails. Health clubs do not provide essential services.

We agree with the views expressed in Schlobohm and Shields, supra. The services offered by the appellee simply cannot be accurately characterized as "essential." ***

The Washington metropolitan area, of which Montgomery County is a part, is home to many exercise and fitness clubs. Ms. Seigneur, like Ms. Wolf, was free to choose among scores of facilities providing essentially the same services. [C] She also had the option of purchasing her own fitness equipment and exercising at home or of exercising without any equipment by doing aerobic or isometric

exercises. Ms. Seigneur's bargaining position was not grossly disproportionate to that of NFI.

[In a previous case], when defining what transactions affect public interests, this Court relied in part on a test enunciated in Tunkl v. Regents of the Univ, of California, 60 Cal. 2d 92, 383 P.2d 441, 32 Cal. Rptr. 33 (Ca. 1963). Quoting Tunkl, the Court stated that public interests are affected when the transaction exhibits some or all of the following characteristics. It concerns a business of a type generally thought suitable for public regulation. The party seeking exculpation is engaged in performing a service of great importance to the public, which is often a matter of practical necessity for some members of the public. The party holds himself out as willing to perform this service for any member of the public who seeks it, or at least for any member coming within certain established standards. As a result of the essential nature of the service, in the economic setting of the transaction, the party invoking exculpation possesses a decisive advantage of bargaining strength against any member of the public who seeks his services. In exercising a superior bargaining power the party confronts the public with a standardized adhesion contract of exculpation, and makes no provision whereby a purchaser may pay additional reasonable fees and obtain protection against negligence. Finally, as a result of the transaction, the person or property of the purchaser is placed under the control of the seller, subject to the risk of carelessness by the seller or his agents.

***Because of the fluid nature of the "public interest," strict reliance on the presence or absence of six fixed factors may be arbitrary. The Tunkl Court itself recognized that the public interest does not--and cannot--lend itself easily to definition, because "the social forces that

have led to such characterization [of the public interest] are volatile and dynamic. No definition of the concept of public interest can be contained within the four corners of a formula." Tunkl, 60 Cal. 2d at 98, 383 P.2d at 444, 32 Cal. Rptr. at 36.

***The ultimate determination of what constitutes the public interest must be made considering the totality of the circumstances of

683

any given case against the backdrop of current societal expectations. ***[Transactions that affect the public interest [include not only] those involving the performance of a public service obligation, e.g., public utilities, common carriers, innkeepers, and public warehousemen [but] also includes those transactions, not readily susceptible to definition or broad categorization, that are so important to the public good that an exculpatory clause would be "patently offensive," such that "the common sense of the entire community would... pronounce it" invalid. [C]

NFI does not provide an essential public service such that an exculpatory clause would be "patently offensive" to the citizens of Maryland. The services offered by a health club are not of great importance or of practical necessity to the public as a whole. [C] Nor is a health club anywhere near as socially important as institutions or businesses such as innkeepers, public utilities, common carriers, or schools. ***

JUDGMENT AFFIRMED

NOTES AND QUESTIONS

1. There are two basic issues involved when defendant asserts that plaintiff expressly assumed a risk. The first concerns whether the risk that injured plaintiff fell within the unambiguous scope of the terms of the agreement. Suppose that plaintiff signed a release concerning inherent risks involved in horseback riding. Her own horse behaved well, but the guide's horse kicked her. Is that within the scope of the release? Wright v. Loon Mtn. Rec. Corp., 140 N.H. 166, 663 A.2d 1340 (1995) (question of fact for jury). Suppose that plaintiff signed a release concerning the inherent risks of motorcycle riding and was injured when she lost control of defendant's motorcycle during a test drive. She alleged that dealer was negligent in urging her to ride a motorcycle that was too big for her. Was dealer's negligence within the scope of the release? Thompson v. Hi Tech Motor Sports, Inc., 183 Vt. 218, 945 A.2d 368 (2008) (dealer's negligence not within scope of release relating to inherent dangers of motorcycle riding). After signing releases to enter the pit area of a county racetrack, several participants were injured when rockets from a fireworks display went astray and entered the pit area. They claimed injury by fireworks was not within the scope of the release. Grabill v. Adams County Fair and Racing Assn., 666 N.W.2d 592 (Iowa 2003) (fireworks are within the broad range of events that might transpire and cause injury on a racetrack).

Must the release actually mention the word "negligence"? Compare Hyson v. White Water Mntn. Resorts, 265 Conn. 636, 829 A.2d 827 (2003) (release of liability only applies to negligence if express language said so) with the principal case (need not use the word "negligence" or any other magic words) and Sanislo v. Give Kids the World, Inc., 157 So.3d 256 (Fla. 2015) ("hold harmless and release...

all claims" language is adequate). See also Restatement (Third) of Torts: Apportionment of Liability § 2, comment c (2000) (word "negligence" not necessary if language is otherwise clear and unequivocal).

684

2. The second issue is whether the contract itself violates public policy and therefore should not be enforced. The principal case sets forth considerations that underlie that determination. In light of those principles, how should a court rule on the enforceability of a document in which

A. An express assumption of risk clause is written into a contract of sale between two large corporations. See Delta Air Lines, Inc. v. McDonnell Douglas Corp., 503 F.2d 239 (5th Cir.1974) (applying California law) (enforceable because parties with equal bargaining power can allocate the risk of loss as they choose).

B. Ordinarily, a common carrier like a railroad may not require a pre-injury release of passengers. New York Cent. R. Co. v. Lockwood, 84 U.S. (17 Wall.) 357 (1873). What if passenger is given the opportunity to ride free on a common carrier, but he must relieve it of all liability to him for negligent acts committed in the course of transportation? See Gonzales v. Baltimore & Ohio R. Co., 318 F.2d 294 (4th Cir.1963) (applying West Virginia law) (enforceable).

C. A patient agreed to assume all risks that had been explained to her in connection with medical diagnosis and treatment in a hospital. Cudnik v. William Beaumont Hosp., 207 Mich.App. 378, 525 N.W.2d 891 (1994) (joining the "overwhelming majority" of jurisdictions that have found exculpatory agreements for providing of medical

treatment invalid and unenforceable) and Covenant Health Rehab of Picayune v. Brown, 949 So.2d 732 (Miss. 2007) (limitation of damages clause in form admitting plaintiff to nursing home is unenforceable because unconscionable). As is a mandatory arbitration clause. Covenant Health & Rehabilitation of Picayune, LP v. Estate of Moulds ex rel. Braddock, 14 So.3d 695 (Miss. 2009). But see STV One Nineteen Senior Living LLC v. Boyd, 258 So.3d 322 (Ala. 2018) (arbitration clause in a nursing home contract enforceable as against personal injury claim). Suppose the patient did not have to pay for medical services. Should that make a difference? Tunkl v. Regents of Univ, of California, 60 Cal.2d 92, 383 P.2d 441, 32 Cal.Rptr. 33 (1963) (no) (discussed in principal case).

D. A day care center required a release as a condition of admission to the program. Gavin W. v. YMCA of Metropolitan Los Angeles, 131 Cal.Rptr.2d 168, 106 Cal.App.4th 662 (2003) (exculpatory agreement that purported to relieve child care provider of liability for its own negligence is void as against public policy).

E. What if the release covers gross negligence as well as negligence? Feleccia v. Lackawanna College, 215 A.3d 3 (Pa. 2019) (not enforceable) and City of Santa Barbara v. Superior Court, 41 Cal.4th 747, 161 P.3d 1095, 62 Cal.Rptr.3d 527 (2007) (joining "vast majority" of jurisdictions that find agreements unenforceable as to gross negligence).

3. A parent signs an assumption of the risk form on behalf of a minor child so that the child may attend ski-racing lessons, play recreational soccer, or enter a skateboard facility. Is the agreement enforceable against the parent who signed the agreement? against

the other parent? against the child? Compare Scott v. Pacific West Mountain Resort, 119 Wash.2d 484, 834

685

P.2d 6 (1992) (parents can waive their own rights but not their minor child's) and Hojnowski v. Vans Skate Park, 187 N.J. 323, 901 A.2d 381 (2006) (accord) with Zivich v. Mentor Soccer Club, Inc., 82 Ohio St.3d 367, 696 N.E.2d 201 (1998) (mother waived her rights, and child's rights, and father's rights) and Sharon v. City of Newton, 437 Mass. 99, 769 N.E.2d 738 (2002) (father's waiver of rights effective as to injury incurred by teenage cheerleader).

Should it make a difference whether the defendant is a commercial entity or non-commercial entity like a school or community-sponsored program? Compare Miller v. House of Boom Kentucky, LLC, 575 S.W.3d 656 (Ky. 2019) (answering certified question) (pre-injury release signed by parent not enforceable against minor injured at for-profit trampoline park while noting that cases from other jurisdictions that enforced releases covering minors usually involved non-commercial entities like school or community- sponsored programs) with BJ's Wholesale Club, Inc. v. Rosen, 435 Md. 714, 80 A.3d 345 (2013) (upholding pre-injury release signed by father on behalf of child playing at store's children's play area, rejecting commercial v. noncommercial distinction). Florida has had it both ways. Kirton v. Fields, 997 So.2d 349 (Fla. 2008) (finding pre-injury release signed by parent on behalf of minor is unenforceable against the minor or minor's estate in tort action arising from participation in commercial activity). After Kirton, the Florida legislature acted to limit its holding to permit parents to release commercial activity providers

for injuries that occurred as a result of the inherent risk of the activity. Fla. Stat. § 744.301(3).

4. In the principal case, would Mr. Seigneur's loss of consortium claim be barred by his wife's express assumption of the risk? With the principal case (barred), compare Huber v. Hovey, 501 N.W.2d 53 (Iowa 1993) (not barred because independent right under Iowa law) and Hardy v. St. Claire, 739 A.2d 368 (Maine 1999) (recognizing split in jurisdictions).

5. Must the agreement be in writing in order to constitute express assumption of the risk? See Boyle v. Revici, 961 F.2d 1060 (2d Cir.1992) (applying New York law) (assumption of the risk of unconventional treatment for cancer need not be in writing). Of course, it will be harder to prove if not in writing.

6. In any case involving express assumption of risk, an attorney must research not only tort law but also appropriate regulatory laws that may affect the validity of the documents. See, e.g., N.Y.Gen.Oblig.Law § 5--321 (declaring void exculpatory clauses in rental of real property).

7. As indicated in the next section, comparative negligence statutes may affect implied assumption of risk, but they do not affect an express assumption of risk. See Gilson v. Drees Bros., 19 Wis.2d 252, 120 N.W.2d 63, 67 (1963).

(2) Implied

Rush v. Commercial Realty Co.

Supreme Court of New Jersey, 1929.

7 N.J.Mise. 337, 145 A. 476.

PER CURIAM. The case for the plaintiffs was that they were tenants of the defendant, which controlled the house wherein they lived and also the adjoining house, and provided a detached privy for the use of both houses; that Mrs. Rush having occasion to use this privy, went into it and fell through the floor, or through some sort of trap door therein, descended about nine feet into the accumulation at the bottom, and had to be extricated by use of a ladder. ***

Taking the facts as the jury were entitled to find them, most favorably for the plaintiffs, the situation was that of a building under the control of the landlord for the use of tenants generally, and maintained by the landlord; a consequent duty of care in maintenance; a defective condition in the floor which the jury might say was due to negligent maintenance by the defendant; and an accident resulting therefrom. In such a situation it would seem that the argument for a nonsuit or for a direction [directed verdict] must be restricted to the questions of contributory negligence and assumption of risk. In dealing with these, it should be observed that Mrs. Rush had no choice, when impelled by the calls of nature, but to use the facilities placed at her disposal by the landlord, to wit, a privy with a trap door in the floor, poorly maintained. We hardly think this was the assumption of a risk; she was not required to leave the premises and go elsewhere. Whether it was contributory negligence to step on a floor, which she testified was in bad order, was a question for the jury to solve according to its finding of the conditions and her knowledge of them,

or what she should have known of them; it does not seem to be a court question.

We conclude that there was no error in denying motions to take the case from the jury, and the judgment will accordingly be affirmed.

NOTES AND QUESTIONS

1. Is implied assumption of risk virtually the same as the consent defense to intentional torts? Assumption of risk, in the sense of consent, is sometimes called volenti, after the Latin maxim, Volenti non fit injuria [To the willing, there is no injury]. It requires actual knowledge of the particular risk, appreciation of its magnitude, and voluntary encountering of the risk. It is an affirmative defense for which the defendant bears the burden of pleading, production, and proof. See In re Tobacco Litigation, 2014 WL 5545853 (W.Va. 2014) (distinguishing between the affirmative defense of assumption of the risk and other defenses such as lack of proximate cause, federal preemption, compliance with government regulations, etc., all of

which are factors the jury could consider or limitations on what it could consider in determining whether plaintiffs had met their burden of proof).

2. In most states the defense of assumption of risk has been carried beyond the concept of consent and applied to any factual situation where the plaintiff consciously and voluntarily places himself in a position where he is subject to a known risk. The relationship of this type of assumption of risk to contributory negligence has given much trouble. Sometimes the distinction is drawn by saying that the

"essence of contributory negligence is carelessness; of assumption of risk, venturousness. Thus an injured person may not have acted carelessly, may have exercised the utmost care, yet may have assumed, voluntarily, a known hazard." Hunn v. Windsor Hotel Co., 119 W.Va. 215, 193 S.E. 57 (1937) (plaintiff deliberately walked down defective steps when others, not greatly more inconvenient, were also available). Assumption of the risk involves the encountering of a subjectively known risk; contributory negligence may involve a plaintiff exposing himself to a danger of which he was subjectively unaware but which would have been apparent had he used due care. See Schott v. South Dakota Wheat Growers Association, 906 N.W.2d 359 (S.D. 2017) (plaintiffs cannot assume risks of activities or conditions of which they are ignorant whether by reason of age, or lack of information, experience, intelligence, or judgment, although it may still be found that their conduct is contributory negligence if it does not conform to the community standard of the reasonable person) and Wallace v. Rosen, 765 N.E.2d 192 (Ind. App. 2002) (distinguishing assumption of the risk and contributory negligence). This approach gives the defendant two separate defenses for the same conduct, as New Jersey did in the principal case. See also Thomas v. Panco Mgt. of Md., LLC, 423 Md. 387, 31 A.3d 583 (2011) (in case involving slip on black ice on sidewalk, court noted that jury should consider both whether plaintiff had assumed the risk and whether she was contributorily negligent).

3. Distinguish the following. Which defense or defenses would be available to defendant in each?

A. Plaintiff voluntarily enters into a relation with defendant, which he knows to involve some risk. He teaches a beginner to drive an

automobile. Le Fleur v. Vergilia, 280 App.Div. 1035, 117 N.Y.S.2d 244 (1952) (assumed risk of driver's inexperience). She agrees to provide home health care to a patient with Alzheimer's. Gregory v. Cott, 59 Cal.4th 996, 331 P.3d 179, 176 Cal.Rptr.3d 1 (2014) (in-home care giver hired through agency injured while caring for Alzheimer's patient assumed the risk of injury because agitation and physical aggression are common symptoms).

B. Plaintiff knows that defendant's activity, or a condition created by him, involves some danger, but quite reasonably concludes that he can safely encounter it and proceeds. In an amusement park, he buys a ride on a moving belt that upsets the riders. See Judge Cardozo's terse opinion in Murphy v. Steeplechase Amusement Co., 250 N.Y. 479, 166 N.E. 173 (1929). At an outdoor "Haunted Trail," an attraction in Balboa Park in San Diego where actors jump out of dark spaces, holding prop knives, chainsaws, and body parts, plaintiff was injured when he became frightened and ran away from a chain-saw wielding actor. Griffin v. The Haunted Hotel, Inc., 242

688

Cal.App.4th 490, 194 Cal.Rptr.3d 830 (Cal. App. 2015) (risk that a patron will be frightened, run, and fall is inherent in the fundamental nature of a haunted house attraction like The Haunted Trail).

C. Plaintiff, fully aware of an unreasonable risk, voluntarily proceeds to encounter it. He consents to ride with a drunken driver on a dark night. Cf. Sutherland v. Davis, 286 Ky. 743, 151 S.W.2d 1021 (1941). She goes for a walk at night near a lagoon in a community in which she knows wild alligators are present. Landings Ass'n, Inc. v. Williams, 291 Ga. 397, 728 S.E.2d 577 (2012) (assumption of risk).

D. Plaintiff, having spent half an hour in an above ground swimming pool, knows that the water is only three feet deep, dives into it, and is injured when her head strikes the bottom. She testifies that she thought she could safely make a shallow dive and that the worst possible outcome was the risk that she would scrape the bottom of the pool on a poorly executed dive. Did she understand the magnitude of the risk? Sheehan v. The No. Am. Marketing Corp., 610 F.3d 144 (1st Cir. 2010) (applying Rhode Island law) (the risk of a poorly executed or botched dive is subsumed within the risk of diving generally and there are certain risks that are so self-evident that a person will be deemed to have understood them as a matter of law).

4. As the principal case indicates, it is essential to show that plaintiff had actual knowledge of the risk. The best way to show this, of course, is to secure a direct admission from plaintiff or someone who overheard him. See Vanderlei v. Heideman, 83 III.App. 3d 158, 403 N.E.2d 756, 38 III.Dec. 525 (1980) (horseshoer testified he knew of risk of being kicked because he had been kicked several times before). But circumstantial evidence may be adequate for the jury to draw a reasonable inference. Cf. Wyly v. Burlington Indus., 452 F.2d 807 (5th Cir. 1971) (applying Texas law) (plaintiff contestant in "National Lap Sitting Contest" promoting wrinkle-free slacks must have been aware of risk of chair collapsing when 14 college students sat on his lap). Thurmond v. Prince Wm. Prof. Baseball Club, Inc., 265 Va. 59, 574 S.E.2d 246 (2003) (adult spectator of ordinary intelligence familiar with the rules of baseball assumed the normal risks of watching game, including danger of being hit by a foul ball). C&M Builders, LLC v. Strub, 420 Md. 268, 22 A.3d 867, 883 (2011)

("In prior opinions, we have noted, with approval, the proposition formulated by Prosser and Keeton that 'there are certain risks which anyone of adult age must be taken to appreciate: the danger of slipping on ice, of falling through unguarded openings, of lifting heavy objects...[, of being burned by fire, of drowning in water, of falling from heights] and doubtless many others.'") (finding assumption of risk as matter of law where HVAC contractor fell through unguarded stairwell opening in rowhouse). Suppose plaintiff is rendered incompetent by the accident. How can it be determined if he assumed the risk? See Farley v. M.M. Cattle Co., 549 S.W.2d 453 (Tex.Civ.App.1977) (court noted that knowledge may be inferred from circumstances, but circumstances to justify inference not present in particular case).

5. The scope of the risk assumed must be addressed. Courts, unfavorably disposed to assumption of risk, place a narrow or specific gloss on "risk." See Hawthorne v. Gunn, 123 Cal.App. 452, 11 P.2d 411 (1932)

689

(woman sitting on man's lap in a moving car assumes certain risks, but a collision is not among them). Does a hockey fan assume the risk of being struck in the face by an errant puck? Even if she deliberately buys a ticket for a seat low in the stands behind the plexiglass shield? Cf. Moulas v. PBC Prods., Inc., 213 Wis.2d 406, 570 N.W.2d 739 (App.1997), aff'd 217 Wis.2d 449, 576 N.W.2d 929 (1998) (no recovery for plaintiff). Does a state trooper participating in a course involving explosive breaching training assume the risk that a classmate will trigger the explosion before trooper is clear of the

detonation area? Peterson v. Martyn, 2018 WL 3559941 (Ohio App. 2018) (finding that if, as was alleged, the instructor had not instructed the class on the shot sequence, instructor elevated the risk beyond the inherent risks of explosive breaching training). Does a football fan who holds season tickets for seats in the end zone assume the risk that a ball might soar over the net and hit him? That unruly fans might trample him while attempting to relieve him of a ball he caught? Cf. Telega v. Security Bureau, Inc., 719 A.2d 372 (Pa.Super.1998) (being trampled by unruly fans not a risk inherent in or an ordinary part of watching football). Does a golfer assume the risk of being hit by a golf cart? Bertin v. Mann, 502 Mich. 603, 918 N.W.2d 707 (2018) (depends on whether jury finds that such a risk is reasonably foreseeable). What about a jump kick in a karate class? Megenity v. Dunn, 68 N.E.3d 1080 (Ind. 2017) (Indiana courts do not referee disputes arising from ordinary sports activity; "ordinary" conduct in the sport turns on the sport generally, not the specific conduct engaged in at the time of the injury).

6. In addition to knowledge of the risk, plaintiff must proceed to encounter it "voluntarily." How much latitude does this concept give a court to define the scope of the defense? Defendant negligently maintains a highway, leaving a large mudhole in it. Plaintiff, knowing the condition of the highway, attempts to drive past the mudhole and, while keeping to the extreme edge of the road, slides off into the ditch and is injured. The assumption is not voluntary if plaintiff is away from home and has to get back, but is if there is a reasonably short and convenient detour at hand, in good condition. Pomeroy v. Westfield, 154 Mass. 462, 28 N.E. 899 (1891) (no defense because no alternative) and Campion v. Rochester, 202 Minn. 136, 277 N.W.

422 (1938) (defendant has burden of showing that safe alternative existed). On his own property, plaintiff was bitten by a vicious boar owned by a neighbor. The plaintiff had knowledge of the vicious propensities of the boar and yet left his house and exposed himself to the risk. See Marshall v. Ranne, 511 S.W.2d 255 (Tex.1974) (not voluntary because his only choices were to remain prisoner in his own house or to try to make it past the boar to his pickup truck). College failed to clear snow from dormitory parking lot so it was "crunchy with ice and snow." Plaintiff fell and broke her leg while crossing the parking lot to get to her car. If plaintiff is a student who lives in the dorm and has no other way out, it would not be voluntary. If plaintiff is student's mother who has come to visit her and bring her some money, it is voluntary. Morgan State University v. Walker, 397 Md. 509, 919 A.2d 21 (2007) (upholding trial court judge's granting of summary judgment to defendant based on plaintiff mother's assumption of the risk but noting that jury question would be created as to voluntariness if it had been student tenant who fell).

690

7. Plaintiff's Protests. The fact that plaintiff has protested against the defendant's conduct is of course important evidence that he does not consent to assume the risk. But having protested, he may thereafter, even though reluctantly, accept the situation, and as the courts have sometimes put it, "waive" the protest. Whether he does so is a question of fact, and usually a question for the jury. Often it will turn upon the existence of some reasonable alternative to the plaintiffs course. Compare Young v. Wheby, 126 W.Va. 741, 30 S.E.2d 6 (1944) (accepting ride with intoxicated driver is voluntary) with Ridgway v. Yenny, 223 Ind. 16, 57 N.E.2d 581 (1944) (accepting ride

with reckless driver not voluntary because weather was bad and plaintiff was in unfamiliar neighborhood).

8. Assumption of the risk is not available as a matter of law in cases involving sexual abuse of a child. Bjerke v. Johnson, 742 N.W.2d 660 (Minn. 2007) (teenage plaintiff sued defendant owner of horse farm for negligently failing to protect her from the criminal sexual conduct of defendant's live-in boyfriend).

9. Many jurisdictions have adopted statutes that provide protection from tort lawsuits to particular categories of activities or defendants. See, for example, University of Texas v. Garner, 595 S.W.3d 645 (Tex. 2019) (interpreting Texas's Recreational Use statute, which lowers the duty of care for landowners that open up their property to the public for recreational use, to cover a bicyclist injured on a university bike path); University of Texas v. Williams, 459 S.W.3d 48 (Tex. 2015) (finding that statute did not cover participants or spectators at competitive-sports events); Dilley v. Holiday Acres Prop., Inc., 905 F.3d 508 (7th Cir. 2018) (interpreting Equine Activity statute); Humfeld v. State Farm Fire and Casualty Co., 383 Wis.2d 786, 918 N.W.2d 644 (after incident in which one hunter, unaware of the presence of the other hunter, shot him, injured hunter filed suit against landowner whom court found not liable under the recreational immunity statute); and Mo. Stat. § 537,850 (limiting liability on agritourism locations).

10. Historically, many jurisdictions divided implied assumption of the risk into categories of primary and secondary assumption of the risk. The category of primary assumption of the risk collects cases that might more accurately be described as cases where the defendant

owed no duty to the plaintiff or where the defendant did not breach the limited duty owed to the plaintiff rather than that plaintiff assumed the risks inherent in the activity. For example, those who attend baseball games seated outside the area behind home plate that is screened assume the risk of balls being batted into the stands during the game. This might also be expressed by saying the owner of the stadium had no duty to screen all the seats from balls or by saying that the owner did not breach its duty to plaintiff as long as it provided some seats that were screened from balls.

See, for example, Cincinnati Baseball Club Co. v. Eno, 112 Ohio St. 175, 147 N.E. 86 (1925) (surveying cases in a number of jurisdictions and concluding that it is common knowledge that in baseball games hard balls are thrown and batted with great swiftness, that they are liable to be thrown or batted outside the lines of the diamond, and that spectators in positions that may be reached by such balls assume the risk thereof); South Shore

691

Baseball, LLC v. DeJesus, 11 N.E.3d 903 (Ind. 2014) (spectator admitted she knew of risk of foul balls entering seating area not protected by netting); Cole v. Boy Scouts of America, 397 S.C. 247, 725 S.E.2d 476 (2011) (primary assumption of the risk includes risk that base runner in pickup softball game including Boy Scouts and their fathers will collide with catcher at home plate); Nixon v. Clay, 449 P.3d 11 (Utah 2019) (no duty to avoid the type of contact inherent in the sport--reaching in and swiping at basketball are inherent in game); Nigro v. NY Racing Ass'n, Inc., 3 A.D.3d 647, 939 N.Y.S.2d 565 (2012) (primary assumption of the risk applicable

where experienced professional horse exercise rider appreciated risks posed by loose gravel on asphalt road intersecting dirt path she was on); Nalwa v. Cedar Fair, L.P., 55 Cal.4th 1148, 150 Cal.Rptr.3d 551, 290 P.3d 1158 (2012) (primary assumption of the risk applies to bumper car head-on collisions); and Werne v. Executive Women's Golf Ass., 158 N.H. 373, 969 A.2d 346 (2009) (plaintiff would only be able to recover if she could show that defendants created or allowed unreasonable risks beyond those risks inherent in the sport of glow golf--played at night with glow-in-the-dark balls). But see Coomer v. Kansas City Royals Baseball Corp., 437 S.W.3d 184 (Mo. 2014) (risk of injury from hotdog toss by mascot was not one of the risks inherent in being spectator at baseball game and thus was not covered by implied primary assumption of the risk).

11. The category of secondary assumption of the risk collects cases where the plaintiff acts voluntarily but unreasonably to encounter a known risk. Should those situations continue to bar the plaintiff from recovery after the adoption of comparative negligence? Many courts have ruled that implied secondary assumption of risk does not remain an affirmative defense separate and apart from contributory negligence. Blackburn v. Dorta, 348 So.2d 287 (Fla. 1977) (after adopting pure comparative negligence). What are the reasons for this? Some comparative negligence statutes have treated assumption of risk the same as contributory negligence, but the merger may occur even if the comparative negligence statute is completely silent about assumption of risk. See Kopischke v. First Continental Corp., 187 Mont. 471, 610 P.2d 668 (1980); Monk v. Virgin Islands Water & Power Authority, 53 F.3d 1381 (3d Cir.1995) (applying Virgin Islands law) (distinguishing primary assumption of

risk and collecting cases and statutes from other jurisdictions); Rountree v. Boise Baseball, LLC, 154 Idaho 167, 296 P.3d 373 (2013) (merging both primary and secondary implied assumption of the risk into comparative negligence); and Simmons v. Porter, 298 Kan. 299, 312 P.3d 345 (2013) (eliminating separate assumption of risk defense and remanding for consideration as comparative negligence). See also Restatement (Third) of Torts: Apportionment of Liability § 3, comment c (2000) (conduct of plaintiff who is actually aware of risk and voluntarily encounters it is evaluated under comparative negligence standard). But see Neb. Rev. Stat. § 25-21,185.12 (codifying assumption of the risk as a separate affirmative defense). Which approach would you adopt?

12. Open and Obvious Danger. While vacationing in Hawai'i, plaintiff and her family got caught in a rainstorm and returned to their hotel room to dry off. Plaintiff went on the lanai to get a chair, slipped, slid across the

balcony, and sustained injury to her foot when it got trapped under the lanai railing. Plaintiff knew the floor was wet. Did she assume the risk of injury when she stepped on to the lanai floor? Steigman v. Outrigger Ent., Inc., 126 Haw. 133, 267 P.3d 1238 (2011) (joining majority of states that have eliminated open and obvious danger as a bar to recovery and holding that the jury should consider any known or obvious characteristics of the danger as factors in the comparative negligence analysis). Broussard v. State Office of State Buildings, 113 So.3d 175 (La. 2013) (accord, UPS delivery man injured back pulling dolly into misaligned elevator). Grubb v. Smith, 523 S.W.3d

409 (Ky. 2017) (accord, trip and fall on an eroded patch of asphalt at gas station). But see Armstrong v. Best Buy Co., Inc., 99 Ohio St.3d 79, 788 N.E.2d 1088, 1089 (2003) (trip over shopping cart guardrail); O'Sullivan v. Shaw, 431 Mass. 201, 726 N.E.2d 951, 956-57 (2000) (dive headfirst in to shallow end of swimming pool); and Krug v. Celebrity Cruises, Inc., 745 Fed.Appx. 863 (11th Cir. 2018) (applying maritime law) (trip and fall on dance floor while rushing to microphone during musical trivia game of "Name that Tune") (all analyzing open and obvious danger situation as a question of whether defendant owes any duty to plaintiff at all rather than as comparing the conduct of defendant and plaintiff).

2. Statutes of Limitations and Repose

Teeters v. Currey

Supreme Court of Tennessee, 1974. 518 S.W.2d 512.

HENRY, Justice. This malpractice action essentially involves a determination of whether the statute of limitation begins to run from the date of the injury or from the date of the discovery of the injury.

The admitted facts are that on June 5, 1970, plaintiff gave birth to a normal child. Defendant was the attending physician. Following delivery, because of edema, anemia, and other medical complications, he recommended that plaintiff have a bilateral tubal ligation, the purpose of which was to avoid future pregnancies. Defendant performed this surgery on June 6, 1970, and her recovery was uneventful.

On December 6, 1972 she was hospitalized at Newell Clinic and was attended by Dr. Edgar Atkin. Dr. Atkin discovered that she was

pregnant. He so advised her and referred her to other physicians for obstetrical care.

On March 9, 1973 plaintiff was delivered of a premature child and there were severe complications. Pursuant to medical advice, another bilateral tubal ligation was performed on March 11, 1973.

Plaintiff instituted suit on November 15, 1973, three years, five months and nine days after the operation, but approximately eleven months after discovering her pregnancy.

693

Plaintiff alleges that during the course of this latter surgery it was discovered that the earlier surgery performed by the defendant was negligently and inadequately done and was not performed in accordance with proper standards of care and good medical practice. ***

The defendant's answer pleads the statute of limitations and denies that he was guilty of any act of negligence. ***

Section 28-304, T.C.A. applies to malpractice suits and provides that the action be "commenced within one (1) year after cause of action accrued."

When does the cause of action accrue?

In Bodne v. Austin, 156 Tenn. 366, 2 S.W.2d 104 (1928) the Court said: " *** we have been referred to no authority holding that mere ignorance and failure to discover the existence of the cause of action, or the consequential damages resulting from the breach of duty or wrongful act, can prevent the running of the statute of limitations."

But this was in 1927 almost half a century ago.

In Albert v. Sherman, 167 Tenn. 133, 67 S.W.2d 140 (1934), the Court followed Bodne.

This was forty years ago. ***

The time has come for us to re-examine the past holdings of our Appellate Courts in the light of contemporary standards of justice and of the holdings of the courts of last resort in other American jurisdictions. ***

We recognize that statutes of limitations are ***designed to promote stability in the affairs of men and to avoid the uncertainties and burdens inherent in defending stale claims.

In recognition of this, traditionally our courts have held that a right of action accrues immediately upon the infliction or occurrence of injury and that mere ignorance or failure of plaintiff to discover his cause of action or the subsequent resulting damage does not toll the statute. [C]

That this is a harsh and an oppressive rule there can be little doubt. To counter the casualties it has produced the courts have fashioned the so-called "discovery doctrine," under which the statute does not begin to run until the negligent injury is, or should have been[,] discovered.

This concept has been adopted by judicial interpretation in at least a majority of the American states. [C] Some of these jurisdictions limit the application of the doctrine to "foreign objects"; the majority apply it to all medical malpractice cases. ***

[The court traces the adoption of the doctrine in other states.]

This brings the total to twenty-eight (28) states.

Add Tennessee to the list.

694

We adopt as the rule of this jurisdiction the principle that in those classes of cases where medical malpractice is asserted to have occurred through the negligent performance of surgical procedures, the cause of action accrues and the statute of limitations commences to run when the patient discovers, or in the exercise of reasonable care and diligence for his own health and welfare, should have discovered the resulting injury. All cases contra are overruled.

In the instant case the cause of action accrued when plaintiff discovered that she was pregnant, or in the exercise of reasonable care and diligence, she should have so discovered.

We add, in meticulous fairness to the trial judge, that in ruling as he did, he properly relied upon our precedents.

We here merely recede from prior cases in order to establish a rule which we are convinced will be productive of results more nearly consonant with the demands of justice and the dictates of ethics and morality.

Reversed and remanded. Appellee will pay all costs incident to this appeal.

HARBISON, Justice, concurred in a separate opinion.

NOTES AND QUESTIONS

1. The statute of limitations is a complete bar to actions that do not meet its time limits. It is in no way dependent on the merits of the

case. All states have some statutes of limitation, although the time period within which the action must be brought varies in length. For actions sounding in tort, most states impose a two or three-year limitation. Even within each state, there is variation depending on the type of action that is brought. Statutes of limitations in tort law may vary in length depending upon the basis of liability, the general subject matter of the claim, and the type of interest invaded. In most jurisdictions, the statute of limitations is satisfied by the filing of the complaint, but in a few it is not satisfied until the complaint and summons are served on defendant. See, for example, Sommervold v. Wal-Mart Inc., 709 F.3d 1234 (8th Cir. 2013) (applying South Dakota law) (in South Dakota an action is commenced as to each defendant when the summons is served on him). One of the first points a lawyer ascertains on undertaking a claim is what is the appropriate statute of limitations. Failure to meet its requirements is likely to be malpractice.

2. Classification of Action for the Purpose of the Statutes of Limitations. A good deal of judicial prose has been spent in classifying actions for the purpose of the statute of limitations. Is the action based on "intent" or "negligence?" See Spivey v. Battaglia, 258 So.2d 815 (Fla. 1972). Does the two-year limitation of the product liability statute or the three-year limitation of the wrongful death statute apply to the action to recover damages for death caused by a defective airbag? Kambury v. DaimlerChrysler Corp., 334 Or. 367, 50 P.3d 1163 (2002) (applying more specific product liability statute rather than general wrongful death statute).

Is negligent conduct ordinary negligence or professional malpractice? J.B. v. Sacred Heart Hosp., 635 So.2d 945 (Fla. 1994) (plaintiff contracted AIDS because hospital failed to tell him his brother had AIDS and how to care for him while transporting him to another medical facility; court found failure was ordinary negligence rather than medical malpractice) and Trowell v. Providence Hosp, and Med. Ctr., 502 Mich. 509, 918 N.W.2d 645 (2018) (nurse's aid's dropping of patient a second time while trying to help her into wheelchair was ordinary negligence because no professional judgment was implicated by second failure). Cases that have defined the terms "contract," "tort," "intent" or "malpractice" in other legal contexts are not always helpful in solving classification problems involving the statute of limitations. Why not?

3. Accrual. Most statutes of limitation provide that the time within which to file begins to run when the cause of action "accrues," leaving to the courts to fix that point. Since damage is an essential element of a cause of action based on negligence, most courts have held that the statute begins to run when there has been an actual injury to plaintiffs person or property. In most cases, that is easy to determine and not a subject of dispute between the parties. Some categories of cases have arisen, however, where the date of injury is not easily ascertainable or where the strict application of the time-of-injury rule works an apparent injustice. For example, in the principal case, when did the cause of action accrue? That is, when did "injury" occur? At the time the sterilization surgery was performed negligently or at the time of conception of the baby? See Nunnally v. Artis, 254 Va. 247, 492 S.E.2d 126 (1997) (on facts similar to principal case, court finds injury occurs at conception of baby) and

Conner v. Hodges, 157 Idaho 19, 333 P.3d 130 (2014) (accord). Note that logically the court should reach this question first and then decide whether to recognize a discovery rule to toll the running of the statute of limitations.

4. Continuing Tort. In some professional malpractice cases, courts have found that the statute of limitations did not begin to run until the course of treatment was complete. See, e.g., Justice v. Natvig, 238 Va. 178, 381 S.E.2d 8 (1989) (surgeon). This is sometimes referred to as a continuing tort. Should this concept be extended to other areas of the law? Plaintiff lived with defendant in an abusive relationship for ten years. The statute of limitations for assault and battery is one year. Plaintiff argues that "battered women's syndrome" prevented her from leaving the relationship. How should that argument affect the statute of limitations? Cusseaux v. Pickett, 279 N.J.Super. 335, 652 A.2d 789 (1994) (treating it as a continuing tort for statute of limitations purposes) and Feltmeier v. Feltmeier, 207 Ill.2d 263, 278 Ill.Dec. 228, 798 N.E.2d 75 (2003) (alleged acts of domestic violence over eleven years were held to constitute a "continuous series of acts" for statute of limitations purposes).

5. Problems with the time-of-injury rule also have arisen with regard to negligent acts of other professionals. When should the statute of limitations begin to run with regard to an attorney who has committed an act of malpractice? Compare Draper v. Brennan, 142 N.H. 780, 713 A.2d 373 (1998) (where attorney commits malpractice in prosecution or defense of

claim that results in litigation, statute of limitations on malpractice action is not affected by appeal of adverse ruling) with Stokes-Craven v. Robinson, 416 S.C. 517, 787 S.E.2d 485 (2016) (statute of limitations on legal malpractice claim does not begin to run until resolution of appeal against client in underlying suit) and Moonlight Enters., LLC v. Mroz, 293 Va. 224, 797 S.E.2d 536 (2017) (statute of limitations on claim against trial attorney did not begin to run until trial attorney had performed his last act for client in dealing with Clerk's Office on entry of final orders even though client previously had informed trial attorney it had retained different counsel for the appeal). See generally Chapter 23 of Mallen and Smith, Legal Malpractice (2020 ed.).

6. Tolling. Statutes of limitation contain within them provisions that toll (stop) the running of the time within which to file for various reasons. The most common of these are provisions that toll the statute for minors, for those legally insane or incompetent, or who are out of state, and for those defendants who have concealed their identity through fraud or obstructed the filing of the action. Ordinarily, the tolling stops (clock begins running) when the minor reaches her majority or when defendant returns to the state or when the incompetent becomes competent again, for example, upon resuming consciousness after a coma. But what if the incompetence is permanent? In a few jurisdictions, the appointment of a guardian starts the clock of the statute of limitations and others have an outside time limit for filing actions on behalf of incompetent plaintiffs, whether or not they have been restored to competency or had a guardian appointed by that time. In others, the appointment of a guardian does not affect the tolling provision of the statute of

limitations because it does not remove the disability. Abels v. Genie Industries, Inc., 202 S.W.3d 99 (Tenn. 2006) (answering certified question from federal district court) (resolving issue for Tennessee and discussing other jurisdictions). When a potential medical malpractice defendant leaves Ohio, the statute of limitations is tolled during the time he is out of state. If he then retires there (Florida), the statute remains tolled. Garber v. Menendez, 888 F.3d 839 (6th Cir. 2018) (applying Ohio law and federal Constitutional law to find that Ohio's statute does not violate the dormant Commerce Clause as applied to medical malpractice defendant retired in Florida). Some jurisdictions' statutes provide that the statute is tolled (for example for 90 days) by giving a Notice of Intent to investigate to potential defendants. See Del. Code tit. 18, § 6856(4) and Verrastro v. Bayhospitalists, LLC, 208 A.3d 720 (Del. 2019) (Notice of Intent sent to vicariously liable hospital did not toll statute for claim against doctors).

What if, at the scene of an automobile accident, one of the drivers gave the police officer identification stolen from someone else and plaintiff did not discover driver's true identity until after the statute of limitations on claims arising out of the accident had run? Newman v. Walker, 270 Va. 291, 618 S.E.2d 336 (2005) (defendant's misrepresentation of his identity tolled the statute). Georgia's statute of limitations permits tolling for fraud only if the cause of action is itself based on fraud or the plaintiff has been prevented from discovering the defendant's identity by a separate independent actual fraud involving moral turpitude. In the cause of action brought by the estate

of a murder victim against man who hired someone to murder her, the court found that murderer's motive was to conceal his identity to avoid apprehension by police, not to commit a fraud on the murder victim. Rai v. Reid, 294 Ga. 270, 751 S.E.2d 821 (2013) (no tolling).

In addition to tolling specified in the statute itself, many jurisdictions recognize equitable (not provided in statute) tolling where, for example, the defendant fraudulently concealed the injury from the plaintiff or concealed his own identity. See, e.g., Lakeman v. La France, 102 N.H. 300, 156 A.2d 123 (1959) (doctor allegedly concealed surgical malpractice from patient) and Bernson v. Browning-Ferris Indus, of Cal., Inc., 30 Cal.Rptr.2d 440, 873 P.2d 613, 7 Cal.4th 926 (1994) (defendants allegedly concealed their identity by anonymously publishing defamatory "dossier" on member of City Council). Such equitable tolling is not available, however, if it is someone other than defendant that concealed the identity of the defendant. Renaud v. Sigma- Aldrich Corp., 662 A.2d 711 (R.1.1995) (worker injured on job by chemical spill claimed that both her employer and the supplier of the chemical misled her as to identity of manufacturer of chemical's container, causing her to miss the statute of limitations in claim against that manufacturer) (no tolling).

Could equitable tolling be used to extend the statute of limitations where the plaintiff's attorney had failed to discover the correct limitations period? "If the lawyer fails in this duty, the remedy is not to punish the defendant by depriving him of the protection of the statute of limitations; it is for the plaintiff to sue the lawyer who misadvised him for legal malpractice." Arteaga v. U.S., 711 F.3d 828 (7th Cir. 2013) (FTCA medical malpractice case).

7. Discovery Rule. As the principal case reflects, the time-of-damage rule can lead to difficulty in certain common factual scenarios. Some legislatures have specifically dealt with the problem and adopted a time-of- discovery rule. See Conn.Gen.Stat., § 52-584 and R.S.Mo., § 516.105. In other jurisdictions, the discovery rule is a creature of the courts as it was in the principal case. Chase v. Sabin, 445 Mich. 190, 516 N.W.2d 60 (1994) (discovery rule applied to plaintiff who discovered that the loss of his eye, which had occurred 26 years previously after cataract surgery, was caused by negligence of nurse anesthetist) (later modified by statute). Some have limited the application of the time-of-discovery rule to situations where surgeons have left sponges, clamps, scalpels, or other objects in the patient's body. (This is referred to in the opinion in principal case as limiting the doctrine to "foreign objects.") They apply the time-of-damage rule to cases of negligent diagnosis or ingestion of a drug or toxic substance. A few states, in adopting a discovery rule, have placed an outside limit on claims. See, e.g., Tenn. Code Ann. § 29-26-116 (one year from discovery or three years from occurrence). Virginia does not recognize the discovery rule. Lo v. Burke, 249 Va. 311, 455 S.E.2d 9 (1995).

8. The discovery rule, first developed in medical malpractice cases like the principal case, has been extended in many jurisdictions to apply to any action based on a latent injury. See, e.g., Perlov v. G.D. Searle & Co., 621 F.Supp. 1146 (D.Md. 1985) ("Although ordinarily that statute begins to run

at the time of injury, in this case the Maryland 'discovery rule' should be utilized to determine when the cause of action accrued which is when the statute begins to run. Under this rule, the delayed filing of an action is tolerated for causes of action that are inherently unknowable, so the cause of action accrues only when 'the claimant in fact knew or reasonably should have known of the alleged wrongs.'") The courts sometimes refer to "should have known" as "being placed on inquiry notice." That is, the statute of limitations begins to run when a person gains sufficient knowledge of facts that would put a reasonable person on notice of the existence of a problem or potential problem such that he would inquire further about it. Buechel v. Five Star Quality Care, 745 N.W.2d 732 (Iowa 2008) (family of nursing home resident who was asphyxiated when her head was trapped between mattress and bed frame was on notice that there was a problem with the bed even though they may not have known the nature of the defect).

9. The discovery rule itself can be narrow or broad depending on what the plaintiff has to discover to trigger the statute. Injury? Wetherill v. Eli Lilly & Co., 89 N.Y.2d 506, 655 N.Y.S.2d 862, 678 N.E.2d 474 (1997) (discovery of the physical condition and not the more complex concept of both the condition and the nonorganic etiology of that condition); Griffin v. Unocal Corp., 990 So.2d 291 (Ala. 2008) (abandoning "last exposure" rule and adopting rule that cause of action begins to run when injury is manifest). That the injury was caused by defendant's conduct or product? Brown v. E.I. DuPont de Nemours and Co., Inc., 820 A.2d 362 (Del. 2003) (statute of limitations for children born with birth defects did not begin to run at birth but when scientists first linked their birth defects to prenatal

exposure to defendant's chemical) and Arroyo v. U.S., 656 F.3d 663 (7th Cir. 2011) (claim under FTCA based on alleged medical malpractice of clinic employees) (parents told that infant was injured due to bacterial infection contracted during delivery but were not told that clinic employees negligently failed to discover and treat the infection). That the defendant's conduct was negligent or its product defective? What about a child abuse case where the plaintiff only became aware through psychotherapy after becoming an adult that the actions of the defendant were tortious and that those actions caused the plaintiffs emotional problems? Pritzlaff v. Archdiocese of Milwaukee, 194 Wis.2d 302, 533 N.W.2d 780 (1995) (noting that many states recognize a special discovery rule for cases involving incest and other forms of child sexual abuse).

Because fixing the time that plaintiff "should have discovered" something usually is dependent on fact finding by the jury, the discovery rule makes it unlikely that the defendant can obtain summary judgment based on the statute of limitations. Tucker v. Baxter Healthcare Corp., 158 F.3d 1046 (9th Cir. 1998) (applying California law) (summary judgment precluded because question of fact as to when plaintiff suspected or should have suspected that her breast implants were a likely cause of her autoimmune disease); Schmitz v. NCAA, 155 Ohio St.3d 389, 122 N.E.3d 80 (2018) (fixing the date that Notre Dame football player discovered his brain injury from playing football required discovery); and Clarke v. Abate, 194 Vt. 294, 80 A.3d 578 (2013) (in sex abuse case, jury should have been allowed to weigh

inferences from the factual record regarding whether teenage plaintiff understood that defendant surgeon's conduct under guise of medical treatment was wrongful). But if the date that plaintiff was put on inquiry notice is clearly established, the court will dismiss the complaint. Plumlee v. Pfizer, Inc., 664 Fed.Appx. 651 (9th Cir. 2016) (applying California law) (court took judicial notice of extensive public information that was available to plaintiff concerning drug).

10. Wrongful Death Actions. See note 15, page 656.

11. Complications of Injury or Second Disease. Sometimes, plaintiff will develop a second, more serious injury after initial, less serious symptoms were noted. A patient is told by her doctor that she has pelvic inflammatory disease ("PID") in 1977 and that it probably was caused by an intrauterine device ("IUD"). In 1980, after months of difficulty trying to become pregnant, she is diagnosed as infertile due to the PID. In her case against the manufacturer of the IUD, when did the statute of limitations begin to run? See, e.g., Gnazzo v. G.D. Searle & Co., 973 F.2d 136 (2d Cir. 1992) (applying Connecticut law) (statute begins to run when plaintiff discovers some form of actionable harm, not the fullest manifestation thereof); Klempka v. G.D. Searle & Co., 963 F.2d 168 (8th Cir.1992) (applying Minnesota law) (plaintiff who is aware of both her injury and the likely cause of her injury is not permitted to circumvent the statute of limitations by waiting for a more serious injury to develop from the same cause); Kemp v. G.D. Searle & Co., 103 F.3d 405 (5th Cir. 1997) (applying Mississippi law) (infertility is merely a sequela of PID and not a separate disease). See also Shadle v. Pearce, 287 Pa.Super. 436, 430 A.2d 683 (1981) (dental malpractice cause of action accrued when patient first injured, not two years later when patient developed

incapacitating complication); Golla v. General Motors Corp., 167 Ill.2d 353, 212 Ill.Dec. 549, 657 N.E.2d 894 (1995) (cause of action against car manufacturer based on alleged design defect of car seat accrued on day of accident, not a year later when plaintiff was diagnosed with reflex sympathetic dystrophy).

But what if the claimant, pressured by the statute of limitations, files suit, her case is adjudicated and then she develops a more serious disease? Traditional claim preclusion principles would bar a second action because a plaintiff is not permitted to split her claim. See, e.g., Gideon v. Johns- Manville Sales Corp., 761 F.2d 1129 (5th Cir.1985) (under Texas law, only one suit may be brought from all injuries caused by asbestos exposure) and Kiser v. A.W. Chesterton Co., 285 Va. 12, 736 S.E.2d 910 (2013) (answering certified question) (same). What if the plaintiff claims that the second injury is a new, separate injury rather than a complication of the first injury? In asbestos cases, a majority of jurisdictions that have considered it have permitted a second action for cancer where the first disease was a non- malignant disease like asbestosis. See, e.g., Daley v. A.W. Chesterton, Inc., 614 Pa. 335, 37 A.3d 1175 (2012) (plaintiff can recover a second time from same asbestos exposure as long as plaintiff can show that he was later diagnosed with a separate and distinct malignant disease) and Sopha v. Owens-Corning Fiberglas Corp., 230 Wis.2d 212, 601 N.W.2d 627 (1999) (joining majority, but emphasizing this is narrow exception).

700

Plaintiff, who smoked from 1953 until 1991, was diagnosed with chronic obstructive pulmonary disease in 1989 and with periodontal

disease in 1990. Plaintiff knew these conditions were caused by her smoking but did not bring suit for either of these ailments. In 2003, she was diagnosed with lung cancer and filed suit. Was her lawsuit barred by the one-year statute of limitations or is cancer a separate disease under California law? See Pooshs v. Phillip Morris USA, Inc., 51 Cal.4th 788, 123 Cal.Rptr.3d 578, 250 P.3d 181 (2011) (answering certified question) (if plaintiff can establish that lung cancer is separate and distinct disease from other two smoking-related diseases, action for lung cancer is not time barred).

12. Which States Law Applies? Suppose the injury happened in one state but the lawsuit was filed in another. Which state's statute of limitations applies? Choice of law rules in most states provide that the law of the forum (state where the lawsuit is filed) determines the statute of limitations. Some states have "borrowing" rules as part of their statutes of limitations that provide that the forum's law applies unless the other jurisdiction's statute is shorter, in which case that jurisdiction's limitation is borrowed. This prevents states with longer statutes of limitations from having to hear lawsuits for claims that arose in other jurisdictions if those claims are unrelated to the forum state. See McCarrell v. Hoffmann-La Roche, Inc., 227 N.J. 569, 153 A.3d 207 (2017) (adopting Restatement (Second) of Conflicts of Law § 142 (1988) principles to allow claim by Alabama plaintiff to go forward in New Jersey forum even though it would have been barred in Alabama) and Standard Fire Ins. Co. v. Ford Motor Co., 723 F.3d 690 (6th Cir. 2013) (applying Michigan choice of law rules) (Tennessee statute of repose applies to bar action filed in Michigan forum by plaintiff who lived in Tennessee based on vehicle fire that occurred in Tennessee against defendant headquartered in Michigan

because Tennessee had a substantial interest in having its law applied and Michigan had little or no interest in a Tennessee incident involving a Tennessee resident).

13. Statutes of Repose. A statute of limitation limits the time during which a cause of action can be brought. A statute of repose limits potential liability by limiting the time during which a cause of action can arise. Statutes of repose, which are substantive rather than procedural in nature, stem from the equitable concept that a time should arrive when a person is no longer responsible for a past act. Statutes of repose have been enacted primarily in the area of liability for architects and engineers and, more recently, for products liability. For example, Congress has provided an 18- year statute of repose for claims against manufacturers of small airplanes. See discussion of issues in Lyon v. Agusta, 252 F.3d 1078 (9th Cir. 2001) (court upheld summary judgment in cases arising out of 1993 crash of small airplane manufactured in Italy in 1970). Because the statute provides an outside time limit within which the action must commence (e.g., 15 years from date of product's sale to consumer), the time period may run even before a person is injured. A few states with statutes of repose have made special exceptions for particular products such as asbestos or the drug diethylstilbestrol (DES) that involve a long latency period between exposure and manifestation of injury.

Some state courts have declared statutes of repose for particular causes of action unconstitutional based on equal protection or "open courts" provisions in state constitutions. Yanakos v. UPMC, 218 A.3d

1214 (Pa. 2019) (medical malpractice) and Dickie v. Farmers Union Oil Co., 611 N.W.2d 168 (N.D. 2000) (products liability). Other courts have upheld the statutes. McIntosh v. Melroe Co., 729 N.E.2d 972 (Ind. 2000) (products liability); Groch v. General Motors Corp., 117 Ohio St.3d 192, 883 N.E.2d 377 (2008) (products liability); and Damiano v. McDaniel, 689 So.2d 1059 (Fla. 1997) (medical malpractice).

Generally, the tolling provisions of the statutes of limitation do not apply to statutes of repose. Albrecht v. General Motors Corp., 648 N.W.2d 87 (Iowa 2002) (Iowa's 15-year statute of repose for products liability actions not affected by fact that teenage motorist was a minor); Budler v. General Motors Corp., 268 Neb. 998, 689 N.W.2d 847 (2004) (Nebraska's 10-year statute of repose not affected by fact that claimant was a teenager when he was injured); Penley v. Honda Motor Co., 31 S.W.3d 181 (Tenn. 2000) (Tennessee's 10-year statute of repose for products liability actions not extended by plaintiffs mental incompetency due to pain killers taken during hospitalization after accident); and Simonsen v. Ford Motor Co., 196 Or.App. 460, 102 P.3d 710 (2004) (Oregon's 8-year statute of repose not tolled by plaintiffs disabling mental condition).

14. Notice-of-Claim Statutes. Statutes that provide a limited waiver of sovereign immunity to allow tort claims against governmental entities frequently provide, in addition to a statute of limitation, that a notice-of- claim must be filed with the appropriate government agency within a particular time frame. The time period for the filing of the notice-of-claim may be very short. N.M. Stat. Ann. § 41-4--16(A) (90 days); D.C. Code § 12- 309 (6 months); Va. Code Ann. § 8.01-195.6 (one year). See also Keller v. Tavarone, 262 Neb. 2, 628 N.W.2d 222

(2001) (dismissing medical malpractice claim against physician because he was employed by county hospital and notice-of-claim had not been filed within one year as required by the statute waiving sovereign immunity). Plaintiff must meet both deadlines--the one for providing notice to the agency and the one for filing with the court.

3. Immunities

An immunity differs from a privilege, or justification or excuse, although the difference is largely one of degree. A privilege avoids liability for tortious conduct only under particular circumstances, and because those circumstances make it just and reasonable that the liability should not be imposed. An immunity, on the other hand, avoids liability in tort under all circumstances, within the limits of the immunity itself. It is conferred not because of the particular facts, but because of the status or position or relationship of the favored defendant or activity. It does not deny the tort, but rather the resulting liability. The immunity does not mean that conduct that would amount to a tort on the part of other defendants is not still equally tortious in character,

but merely that for the protection of the particular defendant, or of interests that the defendant represents, absolution from liability is granted.

Some immunities originally arose at common law and Congress and some state legislatures have created new immunities, often as part of tort reform movements, that were not present at common law.

These vary by state and some are very specific, applying in only quite limited circumstances or in response to particular events.

For example, the federal Biomaterials Access Assurance Act created immunity for companies that provide biomaterials that are used to manufacture implantable medical devices. The manufacturer and seller of the device itself may be liable in negligence or strict liability, but the company that provided the raw materials is immune. 21 U.S.C. §§ 1601- 1606. See also Mattern v. Biomet, Inc., 2013 WL 1314695 (D.N.J. 2013) (dismissing casting manufacturer whose sole role in the manufacturing process was to shape a raw piece of metal that eventually was incorporated into a hip implant).

Congress, through the Protection of Lawful Commerce in Arms Act (PLCAA), has provided immunity to gun manufacturers and dealers in suits brought by those injured by gun-related criminal actions of others. 15 U.S.C. §§ 7901-7903. The application of that statute is being tested by claims that arose out of the Sandy Hook Elementary School shooting. Soto v. Bushmaster Firearms Int'l, LLC, 331 Conn. 53, 202 A.3d 262 (2019) (if plaintiffs prove that defendant gun manufacturers did indeed seek to expand the market for their assault weapons through advertising campaigns that encouraged consumers to use the weapons not for legal purposes such as self-defense, hunting, collecting, or target practice, but to launch offensive assaults against their perceived enemies, then nothing in the text or legislative history of PLCAA indicates that Congress intended to shield the defendants from liability for the tragedy that resulted). See also Delana v. CED Sales, Inc., 486 S.W.3d 316 (Mo. 2016) (PLCAA does not preclude negligent entrustment claim where plaintiff alleged that she begged defendant gun dealer not to sell her

mentally ill daughter a gun because she had tried to commit suicide with the gun he sold her the month before). Indiana has a similar statute. KS&E Sports v. Runnels, 72 N.E.3d 892 (Ind. 2017) (applying immunity under Ind. Code § 34-12-3-3(2) even though firearm used to shoot police officer had been sold unlawfully).

About half the states have statutes that allow a nonmanufacturer seller to be dismissed from a products liability lawsuit if the seller identifies the product manufacturer, the manufacturer is subject to the court's jurisdiction, and the manufacturer is able to satisfy any judgment. See, e.g., N.J.S.A. 2A:58C-9; Rev. Stat. Mo. § 537.762; Miss. Code Ann. § 11-1-63(h); and Tex. Civ. Prac. & Rem. Code § 82.002. What if the manufacturer in China just refuses to pay the judgment against it? Can the plaintiff get an intermediate seller, the distributor, back into the suit?

703

Cassidy v. China Vitamins, LLC, 120 N.E.3d 959 (Ill. 2018) (reinstatement of a previously-dismissed nonmanufacturer in a strict products liability action is not solely contingent on the manufacturer being bankrupt or nonexistent). Although sometimes characterized as creating an affirmative defense, these statutes are usually referred to as "innocent seller immunity" provisions. Hinton v. Sportsman's Guide, Inc., 285 So.3d 142 (Miss. 2019) (referring to it as a statutory immunity and finding that it is an affirmative defense). Delaware's sealed container defense accomplishes a similar result although the seller remains subject to discovery as if it were still a party. 18 Del. C. § 7001.

Pursuant to the Public Readiness and Emergency Preparedness Act ("PREP Act"), of March 17, 2020, the Secretary of Health and Human Services ("HHS") published the Declaration Under the Public Readiness and Emergency Preparedness Act for Medical Countermeasures Against COVID-19. The COVID-19 Declaration immunizes broadly certain entities from "suit and liability under federal and state law with respect to all claims of loss" related to the manufacture, testing, development, distribution, administration and use of certain countermeasures to COVID-19.

(A) Judicial Proceedings

The "absolute privilege" to publish defamation in the course of judicial, legislative, or executive proceedings (pages 1043-1047) is really an immunity of those engaged in the proceedings, conferred because of the public interest in protecting them from suit. In the judicial context, the immunity is sometimes referred to as a litigation immunity. See, for example, Rabinowitz v. Wahrenberger, 406 N.J.Super. 126, 966 A.2d 1091 (2009) (litigation immunity protects attorney from tort liability for questions asked during deposition that plaintiffs alleged constituted intentional infliction of emotional distress). It protects judges, attorneys, witnesses, court-appointed guardians ad litem, and court-appointed psychiatrists. See, for example, Muzingo v. St. Luke's Hospital, 518 N.W.2d 776 (Iowa 1994) (court-appointed psychiatrist immune from suit brought by woman injured by bomb planted in her car by her husband who had been examined by psychiatrist pursuant to involuntary commitment proceeding) and Simms v. Seaman, 308 Conn. 523, 69 A.3d 880 (2013) (attorney immune from claims of fraud and intentional

infliction of emotional distress brought by former husband of client based on representations made during divorce proceedings). It also protects those who maintain evidence for criminal proceedings. Hoyer v. Utah (Div. of Wildlife Resources), 2009 UT 38, 212 P.3d 547 (2009) (in suit by amateur herpetologist seeking to recover damages for the death of over fifty boa snakes that were seized from his home and died while being held for use as evidence in criminal trial against him, judicial proceedings immunity protected state from tort suit). It does not cover statements like press releases made outside of the litigation. Dickinson v. Cosby, 37

704

Cal.App.5th 1138, 250 Cal.Rptr.3d 350 (Cal. App. 2019) (alleged rape victim, who was well-known model and reality television personality, filed action against alleged rapist, who was well-known comedian and television actor, for defamation and related causes of action, arising from press release issued by alleged rapist's attorney). It applies only to attempts to hold the speaker liable for the content of litigation speech but does not preclude a party from offering speech made during litigation as evidence of misconduct such as, for example, discovery abuse or a Rule 11 violation.

(B) Employer Immunity

Worker Compensation statutes in effect in all jurisdictions provide that employees may recover from their employers for work-related injuries without having to show any fault on the part of the employer. This alternative compensation system is described in more detail in Chapter 24, Compensation Systems as Substitutes for Tort Law. It is a complex area. The one aspect that is critical at this juncture is that

because the statutes provide an alternative to the tort system, they confer immunity from tort liability on the employer and co-employees. Thus, under most circumstances, an employee who is injured on the job cannot file a tort claim against his employer or co-employees even if they were negligent and their negligence caused his injuries.

(C) Families

Freehe v. Freehe

Supreme Court of Washington, 1972.

81 Wash.2d 183, 500 P.2d 771.

Neill, Associate Justice. Plaintiff, Clifford Freehe, seeks compensation for personal injuries allegedly sustained due to defendant's negligent maintenance of a tractor and failure to warn plaintiff of the tractor's unsafe condition. The claim for relief would be just the normal action in tort for personal injury but for the fact that the defendant is the wife of the plaintiff, thus bringing into issue the doctrine of interspousal tort immunity.

The farm on which the accident took place is the separate property of defendant, doing business under the name of Hazel Knoblauch. The tractor involved in this accident, together with all other assets and income of the farm, were and remain the separate property of defendant. The business of the farm is carried on separately from any community business of the parties. Plaintiff has no interest in the farming operation. Neither was he employed by defendant.

The trial court granted defendant's motion for summary judgment solely on the basis of interspousal tort immunity. Plaintiff appeals. ***

The rule of interspousal immunity or disability is of common law origin, court made and court preserved. ***Our cases have referred to the historical arguments supporting the common law disability. One is the "supposed unity of husband and wife." [Cc]

The "supposed unity" of husband and wife ***is not a reference to the common nature or loving oneness achieved in a marriage of two free individuals. Rather, this traditional premise had reference to a situation, coming on from antiquity, in which a ***husband acquired the right to possession and use of his wife's real and personal property, and he was entitled to all of her choses in action, provided that he 'reduced them to possession' during marriage by some act by which he appropriated them to himself, such as collecting the money or obtaining judgment in a suit in his own name. In turn he became liable for the torts of his wife, committed either before or during the marriage." (footnotes omitted) W.L. Prosser, Torts ch. 23, § 122 (4th ed. 1971) at 859-60. At old common law, with the husband entitled to the chose in action for his own torts and liable to himself for his wife's torts against him, the rule of interspousal disability made sense.

Things have changed. ***Neither spouse is liable for the separate debts of the other. RCW 26.16.200. ***[E]ither spouse may sue the other for invasion of separate property rights. RCW 26.16.180. [Cc] Spouses are no longer individually liable for each other's torts unless they would be jointly liable if unmarried.

Modern realities do not comport with the traditional "supposed unity" of husband and wife. In our view, this concept of legal identity is no

longer a valid premise for a rule of this interspousal disability.

A second major reason given for the disability is the notion that to allow a married person to sue his or her spouse for tort damages would be to destroy the peace and tranquility of the home. On reflection, we are convinced that this is a conclusion without basis. If a state of peace and tranquility exists between the spouses, then the situation is such that either no action will be commenced or that the spouses--who are, after all, the best guardians of their own peace and tranquility--will allow the action to continue only so long as their personal harmony is not jeopardized. If peace and tranquility is nonexistent or tenuous to begin with, then the law's imposition of a technical disability seems more likely to be a bone of contention than a harmonizing factor. ***

A third reason advanced in support of maintaining the common law rule of disability is the suggestion that the injured spouse has an adequate remedy through the criminal and divorce laws. It has been observed that neither of these alternatives actually compensates for the damage done, or provides any remedy for nonintentional (negligent) torts. Prosser, supra, at pages 862-63. ***To these reflections we add the observation that limiting the injured party to a divorce or criminal action against his or her tort-feasor spouse is quite inconsistent with any

policy of preserving domestic tranquility. Thus, the argument based on suggested legal alternatives simply does not withstand analysis.

It has also been argued that to permit litigation between spouses over personal torts would flood the courts with a burdensome

amount of trivial matrimonial disputes. ***[T]his theoretical problem has not materialized elsewhere. Furthermore, should the courts find this possibility to be materializing, there is nothing to prevent application of established notions of "consent" or "assumption of risk" to minor annoyances associated with the ordinary frictions of wedlock. [C]

Respondent also suggests that another argument in favor of the disability rule is that to permit suits between spouses would encourage collusion and fraud where one or both of the spouses carries liability insurance. ***In ***Borst v. Borst, 41 Wash.2d at page 653, 251 P.2d at page 155, we stated:

"The courts may and should take cognizance of fraud and collusion when found to exist in a particular case. However, the fact that there may be greater opportunity for fraud or collusion in one class of cases than another does not warrant courts of law in closing the door to all cases of that class. Courts must depend upon the efficacy of the judicial processes to ferret out the meritorious from the fraudulent in particular cases. [C] If those processes prove inadequate, the problem becomes one for the legislature. [C] Courts will not immunize tort feasors from liability in a whole class of cases because of the possibility of fraud, but will depend upon the legislature to deal with the problem as a question of public policy."

We there cited, as an example of the ability of the legislature to cope with such a problem should it arise, the enactment of host-guest statutes (RCW 46.08.080, -.085, -.086) in automobile personal injury cases. We conclude that this possibility is not a valid premise for the common law disability rule.

Respondent also suggests that any change in the marital disability rule is a matter for the legislature ***This argument ignores the fact that the rule is not one made or sanctioned by the legislature, but rather is one that depends for its origins and continued viability upon the common law. ***

[The court then decided that the state's community property laws imposed no barrier to abandoning interspousal immunity.]

We are cognizant of the long standing nature of the common law rule of interspousal tort immunity. But we find more impelling the fundamental precept that, absent express statutory provision, or compelling public policy, the law should not immunize tort-feasors or deny remedy to their victims. With this in mind, we have reviewed the stated reasons for the common law rule, and have found all of them to be insufficient. Therefore, the rule of interspousal disability in personal injury cases is hereby abandoned. ***

707

Reversed and remanded.

NOTES AND QUESTIONS

1. General Abrogation. The movement toward complete abrogation of interspousal immunity began with a dissenting opinion of the first Justice Harlan in Thompson v. Thompson, 218 U.S. 611 (1910). It is now the majority rule. Bozman v. Bozman, 376 Md. 461, 830 A.2d 450 (2003) (abrogating doctrine and noting that only a handful of states retain it) and Ellis v. Ellis, 169 P.3d 441 (Utah 2007) (abolishing doctrine for negligence claims in case where newlywed husband's negligent driving on honeymoon seriously injured wife).

2. Some decisions that have taken this step have placed heavy reliance on the state's married women's property act. See, e.g., Gilman v. Gilman, 78 N.H. 4, 95 A. 657 (1915); Fitzmaurice v. Fitzmaurice, 62 N.D. 191, 242 N.W. 526 (1932). These statutes, enacted in the mid-1800s, eliminated the common law disabilities of wives to sue or be sued in their own name and to buy, own, or sell property. Other decisions have construed the statutes as having no intent to affect interspousal immunity. See, e.g., Oken v. Oken, 44 R.I. 291, 117 A. 357 (1922). These latter decisions may be correct in measuring legislative intent. As the principal case reflects, arguments made in support of interspousal tort immunity are not necessarily related to legal restrictions on the rights of women.

3. Partial Abrogation. The courts that still recognize the immunity have limited it. They refuse to apply it in one or more specific situations where they are certain that no good reason supports it: there is no longer a marriage to protect because it has ended through divorce or death of one of the spouses; the tort occurred prior to the marriage; or the tort is an intentional one.

4. The facts of the principal case are somewhat unusual as compared with most tort suits between spouses. The overwhelming majority of these cases have involved automobile accidents, and a number of courts have expressly limited their elimination of the immunity in negligence actions to those situations. See Digby v. Digby, 120 R.I. 299, 388 A.2d 1 (1978); Richard v. Richard, 131 Vt. 98, 300 A.2d 637 (1973).

5. Suppose a wife sues her husband in tort for the injury she suffered because he prepared her food in a careless and unsanitary manner.

Does she have a claim? Suppose the husband alleges that he suffered serious injury because his wife was negligent in leaving her shoes where he tripped on them? Would he then have a claim? In Beaudette v. Frana, 285 Minn. 366, 173 N.W.2d 416 (1969), the Supreme Court of Minnesota abolished interspousal immunity, but it also observed in dictum that: "There is an intimate sharing of contact within the marriage relationship, both intentional and unintentional, that is uniquely unlike the exposure among strangers. The risks of intentional contact in marriage are such that one spouse should not recover damages from the other without substantial evidence that the injurious contact was plainly excessive or a gross abuse of normal privilege. The risks of negligent conduct are likewise so usual that it

would be an unusual case in which the trial court would not instruct the jury as to the injured spouse's peculiar assumption of risk." What if wife placed at eye-level on a shelf above the toilet a motion-sensing air freshener device that sprayed a mist? Manufacturer's warnings, which wife did not read, warned against such placement. After being sprayed in the face, husband suffered from chemically-induced asthma. Immunity? Pearson v. Pearson, 552 S.W.3d 511 (Ky. App. 2018) (wife breached her duty to prevent foreseeable injury to husband and was not protected by immunity).

Zellmer v. Zellmer

Supreme Court of Washington, 2008.

164 Wash.2d 147, 188 P.3d 497.

MADSEN, J. ***[Three-year-old Ashley McLellan drowned in a backyard swimming pool while under the supervision of her stepfather, Joel Zellmer. Ashley and her mother had moved into Zellmer's house three months before when Zellmer and her mother married. Ordinarily, Ashley went to day care while her mother worked, but on the day of the accident Ashley stayed home sick and Zellmer agreed to take care of her. According to Zellmer, he started a video for Ashley in her bedroom and then went downstairs to build a fire. About an hour later, he realized she was no longer in her room and saw that the sliding glass door leading to the backyard was open. He found Ashley floating in the swimming pool, pulled her out, and called 911. The paramedics resuscitated Ashley, but she died in the hospital two days later. Ashley's mother and father sued Zellmer for wrongful death, alleging several causes of action, including negligent supervision.

Zellmer moved for summary judgment, claiming that the parental immunity doctrine shielded him from liability for negligence in connection with Ashley's death because he stood in loco parentis to Ashley, having provided her with financial and emotional support, including housing, meals, and day care. In opposition to the summary judgment motion, Ashley's mother disputed Zellmer's characterization of his relationship with Ashley, denied that Zellmer supported Ashley financially (he was unemployed throughout their marriage), and asserted that she did not allow him to discipline Ashley because she did not think he knew Ashley well enough to do so.

The trial court granted summary judgment, concluding Zellmer necessarily stood in loco parentis to Ashley by virtue of assuming the

status of stepparent: "when there is a marriage ceremony and there is a blended family and someone becomes a stepparent that the doctrine of parental immunity applies, and there does not have to be a finding of in loco parentis." Affirming the summary judgment, the Court of Appeals held that a stepparent is shielded by parental immunity from liability for negligent supervision of the child only if obligated to financially support a stepchild under the family support statute, an obligation that generally arises when a stepparent is married to the child's primary residential

709

parent and lives in the same household with the child. Ashley's parents appealed to the Supreme Court of Washington.]

***In its original form, the parental immunity doctrine operated as a nearly absolute bar to suit by a child for personal injuries caused by a parent, no matter how wrongful the parent's conduct. [Cc] The parental immunity doctrine originated in three decisions near the turn of the last century and was quickly adopted by most states. [C] From its inception, however, the doctrine has been subject to extensive critical commentary. Like other courts, this court has disavowed several of the original rationales underlying the doctrine, while sharply limiting its scope. Today, no jurisdiction recognizes the original formulation of the common law parental immunity doctrine, and we need not repeat our reasons for retreating from it. [Cc]

The evolution of the parental immunity doctrine in Washington is consistent with the national trend. Washington was one of the first states to recognize the parental immunity doctrine. [C] However, this court has exercised its continuing duty to determine whether the

doctrine remains supported by reason and common sense in view of changing social realities, and to modify it as necessary. [C] Like other jurisdictions, this court has substantially limited the scope of parental immunity in accordance with changing views of public policy on the family relation. A parent is not immune when acting outside his or her parental capacity. [Cc] For example, when operating a business or driving a car, a parent owes a child the same duty of reasonable care applicable to the world at large, and may be held liable notwithstanding the parent/child relationship. Even when acting in a parental capacity, a parent who abdicates his or her parental responsibilities by engaging in willful or wanton misconduct is not immune from suit. [2] [Cc]

* * *

[2] "Willful" requires a showing of actual intent to harm, while "wanton" infers such intent from reckless conduct. [Cc]

But this court has consistently held a parent is not liable for ordinary negligence in the performance of parental responsibilities. ***[The court here lists cases where parents allowed child to wander free in neighborhood and child was electrocuted at utility power station; where parent started backyard fire then left three-year-old son unattended, resulting in severe burns; where parents allowed sight-impaired child to ride motorbike, resulting in fatal crash; where divorced parent negligently injured children while transporting them home from a scheduled visitation; where parent instructed son to siphon gas, resulting in burn injuries; where parent failed to prevent child from wandering into neighbor's yard where she was burned by trash fire.]

There are two principal routes by which courts have concluded that children may not sue their parents for negligent supervision. Under the approach first articulated by the Wisconsin Supreme Court, courts recognize a limited form of parental immunity for personal injuries

710

resulting from the negligent exercise of parental authority and ordinary parental discretion. Goller v. White, 20 Wis.2d 402, 122 N.W.2d 193 (1963). The American Law Institute subsequently approved Goller, although the approach codified in the Restatement is grounded in a concept of parental privilege rather than immunity. See Restatement (Second) of Torts § 895g (1979). Under the Restatement, "the proper inquiry concerns the tortious or privileged nature of a parent's act that causes injury to the child, not a special parental immunity from a child's action for personal torts as distinct from other kinds of claims." [C] Parents are not immune from suit by virtue of the parent/child relationship. The Restatement recognizes that in the course of exercising parental discipline and parental discretion, parents may be privileged to act in a manner that would be deemed tortious if directed at a stranger. [C]

States that either abolished the parental immunity doctrine or declined to adopt it in the first instance nonetheless have followed the Restatement, disallowing negligent supervision claims based on the concept of a parental privilege. [Cc]

There now appears to be nearly universal consensus that children may sue their parents for personal injuries caused by intentionally wrongful conduct. [Cc] However, the overwhelming majority of

jurisdictions hold parents are not liable for negligent supervision of their child, whether stated in terms of a limited parental immunity (among jurisdictions that have partially abrogated the parental immunity doctrine), parental privilege (among those that either abolished the immunity doctrine outright or declined to adopt it in the first instance), or lack of an actionable parental duty to supervise. [Cc]

A minority of states have followed the lead of the California Supreme Court, allowing children to sue parents for negligent supervision under a "reasonable parent" standard. ***

In a trio of cases decided in 1986, we "reaffirmed the vitality of the doctrine of parental immunity with respect to assertions of negligent supervision." [Cc] We expressly rejected the "reasonable parent" standard and concluded the better approach was to continue to recognize a limited form of parental immunity in cases of ordinary negligence when a parent is acting in a parental capacity. In explaining our decision, we stated: "Parents should be free to determine how the physical, moral, emotional, and intellectual growth of their children can best be promoted." [C] Parents should not routinely have to defend their child- rearing practices where their behavior does not rise to the level of wanton misconduct. There is no correct formula for how much supervision a child should receive at a given age.

The petitioners offer no persuasive arguments for overruling [the 1986 cases] [Cc]. Instead, they direct much of their criticism at long-discarded rationales underlying the original form of the parental immunity doctrine.... [T]he primary objective of the modern parental

immunity doctrine is to avoid undue judicial interference with the exercise of parental discipline and parental discretion. This rationale remains as vital today as it was in 1986. Parents have a right to raise their children without undue state interference. [Cc]

The petitioners argue the parental immunity doctrine is inconsistent with our abolition of interspousal tort immunity. See Freehe v. Freehe, 81 Wash.2d 183, 500 P.2d 771 (1972), [c]. The concurrence/dissent similarly points to the erosion of judicial support for tort immunity as a basis for declining to extend the parental immunity doctrine to stepparents. [C] Unlike in the case of interspousal tort immunity, however, an important public policy interest continues to justify a limited form of parental immunity. ***Even those states [like California and Minnesota] that have adopted the "reasonable parent" standard recognize that holding parents liable for ordinary negligence in connection with the discharge of parental duties threatens to unduly interfere with the parent/child relationship. [Cc]

The reasonable parent standard does not adequately protect against undue judicial interference in the parent/child relationship. First, it should be noted that substituting "parent" for "person" is of little consequence, as a judge or jury always is required to consider the status of the actor in applying the reasonable person standard in a negligence case. Thus, the "reasonable parent" standard is, in fact, the ordinary negligence standard. Subjecting parents to liability for negligent supervision inevitably allows judges and juries to supplant their own views for the parent's individual child-rearing philosophy.

Thus, we continue to agree with those jurisdictions that have declined to permit an action for negligent parental supervision, as it accords too little respect for family autonomy and parental discretion. [Cc] We adhere to the parental immunity doctrine as it relates to claims of negligent parental supervision. We reaffirm our holding in [the 1986 case] that parents are immune from suit for negligent parental supervision, but not for willful or wanton misconduct in supervising a child. ***

[The court declined to make an exception for cases where the alleged negligence results in a child's death because, even though the relationship is no longer there to protect, the potential tort liability would have a chilling effect on a parent's exercise of parental discipline and parental discretion.]

Next, petitioners argue it would be inappropriate to extend the parental immunity doctrine to stepparents in view of the modern trend to limit or abolish it.

Notwithstanding the limitations courts have placed on the scope of conduct shielded by the parental immunity doctrine, a majority of states addressing the issue hold it applies to stepparents who stand in loco parentis to the same extent as to legal parents. [Cc]

712

Authority to the contrary exists only in jurisdictions where stepparents either have no legal obligation to support a child, [c] or where parental immunity otherwise bars suit in the case of motor vehicle torts [4] ***

* * *

[4] Most jurisdictions abrogated parental immunity in the case of motor vehicle torts, reasoning that mandatory automobile liability insurance renders it unnecessary to bar suit in order to preserve family finances or family harmony. See Warren [c. Warren], 336 Md. at 622 n. 1, 650 A.2d 252 [(1994)] (noting only eight states continue to apply the parental immunity doctrine in cases of motor vehicle torts).

No court has allowed a stepparent to claim parental immunity solely by virtue of his or her marriage to the injured child's biological parent. [CJ This is consistent with the common law rule that a stepparent gains no parental rights and assumes no obligations merely by reason of the relationship. [C] On the other hand, a stepparent standing in loco parentis has a common law duty to support and educate a child to the same extent as does a natural parent. [C]

***

[The court then found that taking into account the short duration of the relationship, and viewing the facts in the light most favorable to the nonmoving party, a genuine issue of material fact exists as to whether Zellmer stood in loco parentis to Ashley, making summary judgment improper.] Thus, we reverse the summary judgment order and remand for further proceedings consistent with this opinion.

[The dissenting and concurring opinion is omitted. The three justices who signed that opinion would have limited parental immunity to birth or adoptive parents and not extended it to stepparents.]

NOTES AND QUESTIONS

1. Unlike the interspousal immunity doctrine, which was part of the common law of England, the immunity between parent and child is a

homegrown product. In Hewllette v. George, 68 Miss. 703, 9 So. 885 (1891), the court applied the doctrine to bar a minor daughter's claim for false imprisonment against her mother, whom she alleged had wrongfully committed her to an insane asylum. Other states soon adopted the rule, applying it to actions for negligence as well as intentional torts. See, e.g., Mesite v. Kirchstein, 109 Conn. 77, 145 A. 753 (1929) (action against father for negligent driving); Roller v. Roller, 37 Wash. 242, 79 P. 788 (1905) (15- year-old girl attempting to bring a tort claim against her father for rape). Seven jurisdictions never recognized the immunity: District of Columbia, Hawai'i, Nevada, North Dakota, South Dakota, Utah, and Vermont. See Herzfeld v. Herzfeld, 781 So.2d 1070 (Fla. 2001) (collecting cases).

2. General Abrogation. Abolition of the parent-child immunity has lagged behind the abolition of interspousal immunity. Only about a dozen jurisdictions have abandoned it completely. See, for example, Gibson v. Gibson, 3 Cal.3d 914, 479 P.2d 648, 92 Cal.Rptr. 288 (1971); Anderson v. Stream, 295 N.W.2d 595 (Minn. 1980); and Broadbent v. Broadbent, 184 Ariz.

713

74, 907 P.2d 43 (1995) (discussed in the principal case) (all abolishing parental immunity and adopting reasonable and prudent parent standard).

3. Partial Abrogation. As in the case of interspousal immunity and as in the principal case, most states developed one or more exceptions to the general rule when they believed that the policies supporting it were inapplicable or were outweighed by the benefit of allowing a tort claim. Some of the more common exceptions include

A. When the action is for personal injury inflicted intentionally, or is "willful" or "wanton." The usual explanation has been that that conduct is so foreign to the relation as to take the case out of it. Henderson v. Woolley, 230 Conn. 472, 644 A.2d 1303 (1994) (answering certified question from federal court) (immunity doctrine does not bar action for sexual abuse, sexual assault, or sexual exploitation); Herzfeld v. Herzfeld, 781 So.2d 1070 (Fla. 2001) (accord); Eagan v. Calhoun, 347 Md. 72, 698 A.2d 1097 (1997) (parent-child immunity does not apply in case where children filed wrongful death action against father who had committed voluntary manslaughter of mother); and Newman v. Cole, 872 So.2d 138 (Ala. 2003) (wrongful death action permitted to proceed against father whose sixteen-year-old son died as a result of father's disciplining him for failure to perform household chores; intentional conduct must be proved by clear and convincing evidence).

B. When the relationship has been terminated before suit by the death of the parent or child or both. MFA Mut. Ins. Co. v. Howard Constr. Co., 608 S.W.2d 535 (Mo.App.1980). This includes action for the wrongful death of the child through the negligence of the parent. Mosier v. Carney, 376 Mich. 532, 138 N.W.2d 343 (1965). But see the principal case, declining to do so.

C. When the child has been legally emancipated. Fitzgerald v. Valdez, 77 N.M. 769, 427 P.2d 655 (1967) and Carricato v. Carricato, 384 S.W.2d 85 (Ky. 1964). There is a good discussion of what constitutes emancipation in Gillikin v. Burbage, 263 N.C. 317, 139 S.E.2d 753 (1965) and Small v. Rockfeld, 66 N.J. 231, 330 A.2d 335 (1974).

D. When the defendant is a stepparent who has not adopted the child. Compare Rayburn v. Moore, 241 So.2d 675 (Miss. 1970) and Warren v. Warren, 336 Md. 618, 650 A.2d 252 (Md. 1994) (both refusing to extend immunity to stepparent even though he had provided financial support and treated child in same manner as his own children) with Lyles v. Jackson, 216 Va. 797, 223 S.E.2d 873 (1976) (stepparent protected by immunity if he stands in loco parentis to children) and the principal case (same; determination of whether stepfather was in loco parentis was a question of fact to be determined by the jury).

E. Many jurisdictions have abolished the immunity in the context of automobile accident cases, where the relationship is coincidental to the conduct. See, e.g., Broadwell v. Holmes, 871 S.W.2d 471 (Tenn. 1994) (in context of automobile accident case, court limited parental immunity to conduct that constitutes the exercise of parental authority, the performance of parental supervision, and the provision of parental care and custody).

714

4. Liability Insurance. The existence or availability of liability insurance has served as an important justification for the abolishment of the parent-child immunity. Nevertheless, some courts have been steadfast in holding that the existence of insurance cannot "create liability or reduce the need for the immunity." See Maxey v. Sauls, 242 S.C. 247, 130 S.E.2d 570 (1963) and Squeglia v. Squeglia, 234 Conn. 259, 661 A.2d 1007 (1995) (plaintiffs reliance on the existence of liability insurance as a basis for discarding the doctrine is misplaced both as a matter of law and public policy). A

few courts have even turned the insurance argument against the plaintiff and have said that its existence is a reason to uphold the immunity because it creates an opportunity for fraud and collusion against the insurance company. The insurance company does receive some protection against this possibility from the "failure to cooperate" clause that appears in the standard liability insurance policy. At least one court has abolished the immunity in negligence cases to the extent that the parent is protected by liability insurance. See Williams v. Williams, 369 A.2d 669 (Del. 1976).

5. Beyond Immunity: What Standard? Once an immunity is abolished courts face novel questions regarding the extent of the duty owed by a brand new class of defendants. If the parent is alleged to have negligently injured the child while operating an automobile, the standard is what the reasonable driver would have done under the circumstances. But what if the allegation, like the ones in the principal case, is for negligent supervision of the child?

See, for example, Poole v. Poole, 299 Mont. 435, 1 P.3d 936 (2000) (failure to act as reasonable parent supervising 11-year-old by allowing him to go to friend's house without ascertaining whether adult was present at other home). What is the standard? The reasonable person? The reasonable parent? Is there a difference? See e.g., Hartman v. Hartman, 821 S.W.2d 852 (Mo. 1991) (parents not required to meet an idealized standard). For a good discussion of the issues and other factual examples, see Holodook v. Spencer, 36 N.Y.2d 35, 324 N.E.2d 338, 364 N.Y.S.2d 859 (1974) ("parents have always had the right to determine how much independence, supervision and control a child should have, and to best judge the character and extent of development of their child"); Shoemake v.

Fogel, Ltd., 826 S.W.2d 933 (Tex. 1992) ("The discharge of parental responsibilities, such as the provision of a home, food and schooling, entails countless matters of personal, private choice. In the absence of culpability beyond ordinary negligence, those choices are not subject to review in court."); Crotta v. Home Depot, Inc., 249 Conn. 634, 732 A.2d 767 (1999) ("Also, different cultural, educational and financial conditions affect the manner in which different parents supervise their children. Allowing a cause of action for negligent supervision would enable others, ignorant of a case's peculiar familial distinctions and bereft of any standards, to second-guess a parent's management of family affairs...."); and Squeglia v. Squeglia, 234 Conn. 259, 661 A.2d 1007 (1995) ("The decision to maintain a dog in the home is an example of parental discretion, and permitting a minor child to be exposed to the dog is within the parental supervisory function. This maintenance of the home environment typifies the day-to-day exercise of parental discretion that the state would rather not disrupt.").

715

What result if the child alleges that he suffered emotional harm because the parent failed to perform general parental duties? See Burnette v. Wahl, 284 Or. 705, 588 P.2d 1105 (1978) and at page 1290. Is this a matter that should be addressed by tort law?

6. Parent Sues Minor Child. What if it is the parent who sues the child? Should the parent child immunity protect the child? Most courts that have considered the issue have found that because the underlying policy reasons would apply equally to such a case, immunity, to the extent recognized and including whatever

exceptions have been carved out, should be reciprocal. See Ales v. Ales, 650 So.2d 482 (Miss. 1995) (collecting cases) and Bentley v. Bentley, 172 S.W.3d 375 (Ky. 2005) (noting that parent v. child cases are far rarer but finding that the policy considerations would impact them in the same way).

7. Brothers & Sisters. Generally, courts have not recognized immunity between siblings. Lickteig v. Kolar, 782 N.W.2d 810 (Minn. 2010) (answering certified question from federal court) (noting no other jurisdiction has done so, court declines to apply doctrine of intrafamilial immunity to siblings).

8. Contribution or Indemnity or Fault Allocation Against Parent. Remember that the immunity also would protect the parent from actions by other tortfeasors sued by the child. See note 1, page 445. Many of the opinions addressing challenges to parental immunity come from claims of joint tortfeasors seeking contribution from parents rather than from children seeking compensation from their parents. See, for example, Landis v. Hearthmark, LLC, 232 W.Va. 64, 750 S.E.2d 280 (W.Va. 2013) (answering certified questions). Seven-year-old plaintiff was seriously burned while trying to light a fire in fireplace using fire starter gel. He filed suit against the sellers of the product who in turn sought to have the conduct of his parents considered by the jury. Parents were upstairs and mother had given child permission to roast a marshmallow in the fireplace. The fire starter gel, which was for use in starting fires in wood pellet stoves, contained the directions to store it away from heat and flame and to "keep out of reach of children." The gel bottle was on a stand next to the fireplace and within plaintiffs reach. The Court held that the parental immunity doctrine precluded the product sellers from

seeking contribution from the parents, but allowed them to present evidence of parents' conduct to argue comparative negligence, product misuse, and intervening cause. See also Smelser v. Paul, 188 Wash.2d 648, 398 P.3d 1086 (2017) (because it is not a tort to be a bad parent, driver must pay full amount of damages even though driver argued that father's inadequate supervision contributed to toddler's injuries that occurred when driver struck toddler as she pulled out of father's driveway where toddler was playing unsupervised in father's yard).

716

(D) Charities

Abernathy v. Sisters of St. Mary's

Supreme Court of Missouri, 1969.

446 S.W.2d 599.

HENLEY, Chief Justice. This is an action by a patient against a hospital for $35,000 damages for personal injuries allegedly suffered as a result of negligence of defendant. Defendant moved for summary judgment, alleging that it is, and operates the hospital as, a benevolent, religious, nonprofit corporation and charitable institution and, therefore, is immune from liability for its torts. The motion was sustained, judgment was entered for defendant, and plaintiff appealed.

[Plaintiff alleged that defendant's employee negligently failed to assist him as he moved from his bed to the bathroom. Plaintiff fell and suffered multiple injuries.]

The doctrine of immunity of charitable institutions from liability for tort was adopted in this state in 1907 by a decision of the Kansas City Court of Appeals in Adams v. University Hospital, 122 Mo.App. 675, 99 S.W. 453. ***

[T]he court said, in effect, that it is better that the individual suffer injury without compensation from the negligent charitable institution than to risk the judicially assumed probability that the public and state would be deprived of the benefits of the charity; that the interest of the latter is so supreme that the former must be sacrificed to it. ***

There can be no doubt that at the time of its adoption the exception was a rule of expediency justifiable then, and for some time thereafter, to encourage and protect charity as vital to the growth and development of the state, but the reasons for the exception to the rule do not exist today. ***"Today charity is big business. It often is corporate both in the identity of the donor and in the identity of the donee who administers the charity. Tax deductions sometimes make it actually profitable for donors to give to charity. Organized corporate charity takes over large areas of social activity which otherwise would have to be handled by government, or even by private business. Charity today is a large-scale operation with salaries, costs and other expenses similar to business generally. It makes sense to say that this kind of charity should pay its own way, not only as to its office expenses but as to the expense of insurance to pay for torts as well." [C] Today public liability insurance is available to charitable institutions to indemnify them against losses by way of damages for their negligence, and it is common knowledge that most charitable

institutions carry such insurance and pay the premiums thereon as a part of their normal cost of operation. [12]

* * *

[12] We do not make the existence of liability insurance the criterion of liability, as some states have done: we merely emphasize its availability and widespread use as a fact and circumstance that did not exist when the doctrine was adopted. We have held that the existence of liability insurance is immaterial on the issue of liability and adhere to that decision. ***

717

In the states where immunity has not been accorded charity, experience has shown that the apprehension expressed here and elsewhere that the purses of donors would be closed and the funds of charity depleted if these institutions were not granted immunity was not well founded. In the quarter century since the doctrine began its decline, there has been no indication in the states which have abolished immunity that its withdrawal has discouraged donations or that the funds of these institutions have been depleted resulting in their demise. ***

The public is doubtless still interested in the maintenance of charitable institutions and we acknowledge society's debt to them and recognize their right to every benefit and assistance which the law can justly allow. But the day has arrived when these institutions must acknowledge the injustice of denying compensation to a person injured as a result of their negligence or the negligence of their agents or employees; when they must acknowledge that all persons, organizations and corporations stand equal before the law and must

be bound or excused alike. They must recognize that "***immunity fosters neglect and breeds irresponsibility, while liability promotes care and caution ***"

[The court then discussed two of the principal arguments utilized to support charitable immunity--the "implied waiver" and "trust fund" theories.]

The theory of "implied waiver," namely, that he who accepts the benefit of charity impliedly agrees he will not assert against the institution any right of recourse for wrong done him is a mere fiction. The fiction is based upon impossibility in many instances. It is impossible to say that a conscious or unconscious grievously injured accident victim carried to the emergency room of a charitable hospital, or an ill person received at such hospital unconscious, or a conscious ill person who enters such hospital by arrangement of others waives his rights by accepting its benefits. To say that an insane person, a minor or babe in arms waives his rights when he receives or there is administered to him the benefits of any charitable institution does violence to the facts; such persons have no legal capacity to will away their rights. The waiver theory obviously cannot be applied alike to all persons and this fact points up the fallacy in relying upon it to support immunity as a rule of public policy.

The "trust fund" theory as support for the doctrine of immunity rests on an illogical, and therefore weak, foundation. The essence of the theory is that the institutions' funds, given and held for charitable purposes, cannot be used to pay judgments resulting from tort claims. Thus, the rationale of the theory is identified solely with the

right to satisfaction of a judgment, rather than to the fundamental question of whether an

718

injured person has a right to maintain an action and secure a judgment. If it is reasonable to say, and it is, that the existence of liability insurance does not create liability where none exists, then it is also reasonable to say that the inability to have satisfaction of a judgment does not create or support exemption from liability where exemption does not otherwise exist. ***

Defendant and amici curiae recognize that the court has the authority to abolish or modify the doctrine of charitable immunity, but insist the doctrine as public policy is so deeply and firmly embedded in our law that if it is to be modified or abolished the change should be made by the legislature rather than the court.

It is neither realistic nor consistent with the common law tradition to wait upon the legislature to correct an outmoded rule of case law. Nor is legislative silence as instructive or persuasive. ***

For the reasons stated, we hold that a nongovernmental charitable institution is liable for its own negligence and for the negligence of its agents and employees acting within the scope of their employment.

Having abolished the doctrine of charitable immunity, it remains for us to determine the point of departure from precedent. We are cognizant of the fact that retrospective application of our decision could result in great hardship to those institutions which have relied on our prior decisions upholding the doctrine of charitable immunity. Therefore, feeling that justice will best be served by prospective

application of the decision announced today, we hold that the new rule shall apply to this case and to all future causes of action arising after November 10, 1969, the date of the filing of this opinion.

The judgment is reversed and the cause remanded for further proceedings.

DONNELLY, J., concurs in result in separate concurring opinion filed.

NOTES AND QUESTIONS

1. Charitable immunity originated in England in 1846 in Feoffees of Heriot's Hospital v. Ross, 12 C. & F. 507, 8 Eng.Rep. 1508 (1846). Although it was later repudiated in Mersey Docks Trustees v. Gibbs, 11 H.L.Cas. 686 (1866), it was taken up by Massachusetts in McDonald v. Massachusetts Gen. Hosp., 120 Mass. 432, 21 Am.Rep. 529 (1876), which was then followed in the United States. Prior to 1942, the immunity was accepted, sometimes with various minor limitations, by all but two or three of the American courts. In that year, Judge Rutledge, in what has become a landmark opinion, abolished the immunity for the District of Columbia. See President and Directors of Georgetown College v. Hughes, 130 F.2d 810 (D.C.Cir.1942). A substantial majority of the states now follow that decision, see Rabon v. Rowan Memorial Hosp. Inc., 269 N.C. 1, 152 S.E.2d 485 (1967) (collecting cases). Despite this trend, the immunity, at least on a qualified basis, is not without its defenders. See Moore v. Warren, 250 Va. 421, 463 S.E.2d 459

(1995) (public policy considerations underlie doctrine of charitable immunity that precludes action by beneficiary against charity so long

as charity exercised due care in hiring and retention of agents); Abramson v. Reiss, 334 Md. 193, 638 A.2d 743 (1994) (charitable immunity doctrine based on trust fund theory precludes action against Jewish Community Center); George v. Jefferson Hosp. Assn., Inc., 337 Ark. 206, 987 S.W.2d 710 (1999) (entity created and maintained exclusively for charity may not have its assets diminished in favor of one injured by its agents) (dissent notes that state is in distinct minority in continuing to recognize immunity).

2. Some jurisdictions have made one or more inroads on the immunity, but have not abolished it completely. The more common incursions include (1) abolishing the immunity for charitable hospitals but retaining it for religious institutions and other charities, (2) limiting the immunity to recipients of the benefits of the charity, and (3) abolishing the immunity to the extent that the defendant is covered by liability insurance or to the extent that the judgment can be satisfied out of other nontrust fund assets. Byrd Theatre Foundation v. Barnett, 287 Va. 291, 754 S.E.2d 299 (2014) (volunteer organ restorer who fell on loose plank while working on repairing organ not a beneficiary of not-for-profit theater). Picher v. Roman Catholic Bishop of Portland, 974 A.2d 286 (Maine 2009) (charitable immunity for negligence because insurance policy did not cover it, but no immunity for intentional torts).

3. Which organizations qualify for the immunity? Compare Ola v. YMCA of South Hampton Roads, 270 Va. 550, 621 S.E.2d 70 (2005) (YMCA qualifies as charity protected by immunity) with University of Va. Health Services Foundation v. Morris, 275 Va. 319, 657 S.E.2d 512 (2008) (foundation that employs physicians that staff U.Va. hospitals does not qualify as charity for immunity purposes).

4. New Jersey, by statute, provides immunity for negligent acts injuring any "beneficiary" of the works of the charity. N.J.S.A. 2A:53A-7. Does "beneficiary" include a paying patient at a hospital? A pedestrian walking past a church who is struck by a falling stone from a negligently maintained steeple while listening to its bells toll? An expectant mother who belonged to a nonprofit group that used a church basement for its meetings who was injured while attending a meeting of her group at the church but who was not a parishioner? Some states provide limited charitable immunity tied to liability insurance coverage. See, e.g., Md. Cts. & Jud. Proc. § 5--632 (liability of charitable hospital limited to $100,000 if hospital obtains liability insurance in that amount).

5. During the last few decades, the general expansion of tort liability combined with the tight insurance market of the 1980s raised concerns about the ability of some charitable organizations to continue to provide services. Thus, some state legislatures acted to extend partial immunity to some charitable organizations. See, e.g., N.H.Rev.Stat.Ann. § 508:17 (limiting liability of charitable organization to $250,000 in action based on alleged negligence of volunteer). What if an individual volunteer is sued rather than or in addition to the organization? N.H. Rev. Stat. Ann. § 508:17 (immunity for volunteer so long as certain conditions met); Moore v. Warren, 250 Va.

720

421, 463 S.E.2d 459 (1995) (volunteer driver who was providing transportation to plaintiff was protected by the immunity of the charitable organization, the American Red Cross).

6. See generally Tremper, Compensation for Harm from Charitable Activity, 76 Cornell L. Rev. 401 (1991); Restatement (Second) of Torts § 895E Charities, and Appendix (1979).

(E) State and Local Governments

Clarke v. Oregon Health Sciences University

Supreme Court of Oregon, 2007.

343 Or. 581, 175 P.3d 418.

De MUNIZ, C. J. ***[Jordaan Clarke, a three-month old infant, was admitted to Oregon Health Sciences University Hospital (OHSU) for surgical repair of a congenital heart defect. After surgery, due to the negligence of OHSU's employees, he suffered prolonged oxygen deprivation causing him permanent brain damage. He is totally disabled and his guardian seeks over $17,000,000 in economic and noneconomic damages from OHSU and its employees. The individual employees sought dismissal of the suit against them pursuant to the provision of the Oregon Tort Claims Statute that makes the remedy against the state exclusive. The plaintiff challenged the constitutionality of that statute in light of the $200,000 damages cap applicable to tort actions against the state. The trial court judge granted judgment on the pleadings to the individual defendants based on the exclusive remedy provision and to the plaintiff against the state for $200,000. The Court of Appeals affirmed the judgment against the state but reversed the judgment for the individual defendants, finding the exclusive remedy provision

in conjunction with the damages cap violated the Oregon Constitution. This appeal to the Supreme Court of Oregon followed.]

A. Overview of the OTCA

Before 1967, public bodies were immune from tort liability. [C] A person injured by the negligence of a public employee acting within the scope of his or her employment could pursue an action against the employee, but not against the public employer. [Cc] In 1967, the legislature enacted the [Oregon Tort Claims Act] OTCA, which partially waived immunity for public bodies. [C] The 1967 version of the OTCA included a monetary limitation on the state's liability, [c], but did not alter the liability of [individual] public officers, employees, or agents. [C] Those individuals, therefore, remained personally liable for torts committed within the course and scope of their employment. [C]

In 1975, the legislature amended the OTCA. The 1975 version required that public bodies indemnify officers, employees, and agents against tort claims "arising out of an alleged act or omission occurring in the performance of duty." [Cc] Additionally, the legislature extended the

limitation on damages to claims against officers, employees, and agents of all public bodies. [Cc]

In 1991, the legislature again revised the OTCA. [C] That revision added language [c] that eliminated entirely any claim against any officer, employee, or agent for their work-related torts. [C] Pursuant to the 1991 amendments, the sole cause of action available for torts

committed by public officers, employees, or agents is an action against the public body. [C] After that amendment, [the statute] now requires that, if an action is filed against a public officer, employee, or agent, the public body "shall be substituted as the only defendant." That substituted claim against the public body is subject to the OTCA's damages limitations. [Cc] The 1991 amendments were added at the request of the state, which asserted three reasons for the requested change. [C] First, because the law provided indemnification for state officers, naming the officers as parties "serve[d] no purpose." Second, some claimants had argued that the limitation on the liability of the state did not apply to the liability of individuals; therefore, the state sought to "plug that loophole." Finally, the state noted that "a lot of resources were spent" litigating which state officials are properly named in any given lawsuit. ***

B. Overview of Article 1, section 10

[The Court discussed the interpretation of Article 1, section 10, the so-called Remedy Clause of the Oregon Constitution, noting that it can be traced to Edward Coke's commentary on the second sentence of Magna Carta and that it made its way to the American colonies and then into many state Constitutions as those states joined the United States. Case law interpreting the Remedy Clauses found that their purpose is to "save from legislative abolishment those jural rights which had become well established prior to the enactment of our Constitution" and to "preserve the common-law right of action for injury to person or property." Thus, "while the legislature may change the remedy or the form of procedure, attach conditions precedent to its exercise, and perhaps abolish old and

substitute new remedies, it cannot deny a remedy entirely." Oregon follows this analysis for Remedy Clause claims: Did the common law of Oregon recognize a cause of action for the alleged injury in 1857 when the Oregon Constitution was drafted? If it did and the legislature then abolished that common-law cause of action, has a constitutionally adequate substitute remedy been provided?]

C. Plaintiff's claim against OHSU

[The first issue we must address] is whether the common law would have recognized plaintiffs negligence claim against OHSU. OHSU contends that plaintiff would not have had a claim against it, because OHSU would have been entitled to sovereign immunity under the common law of Oregon. ***We conclude that OHSU would have been entitled to sovereign immunity at common law because, among other reasons, OHSU is a state-created entity that performs functions traditionally performed by the state.

722

[The Court noted that the Oregon Constitution is framed on the premise that the state is immune from suit. Therefore, the court may not abolish the doctrine; only the legislature can waive or alter the immunity. The Court previously had ruled that, in addition to the state itself and its agencies, entities that are "instrumentalities" of the state, which are charged with carrying out one of the functions of government, are protected by the immunity. In earlier cases, the Court had determined that the Port of Portland, the State Board of Education, and the State Accident Insurance Fund were all instrumentalities of the State whose actions are covered by state immunity. Other public bodies, such as municipal corporations, also

may be protected, but only when they are engaged in "governmental" as opposed to "proprietary" functions. Thus, liability for the actions of public bodies like municipal corporations depends on the nature of the function being performed as well as the status of the defendant.

Based on the stated purposes specified by the legislature in creating OHSU (promoting the public welfare of the people of the State of Oregon through providing education and health care), the entrusting of powers and duties of the state to the OHSU board and university officials, and OHSU's governance structure (board of directors appointed by Governor and confirmed by Senate), the Court finds that OHSU is an instrumentality of the state performing state functions. Thus, it would have been entitled to immunity at common law for all of its activities and the legislature's choice to limit its liability for tort claims does not violate the Remedy Clause.]

D. Plaintiff's claim against the individual defendants

Having concluded that the common law in Oregon in 1857 would not have recognized a cause of action for negligence against OHSU, we now address whether the OTCA's elimination of a cause of action against the individual defendants, combined with its damages limitation, survives scrutiny under Article I, section 10. ***

On review, defendants offer several arguments supporting their assertion that the Court of Appeals erred in holding that the application of the OTCA in this case violated the Remedy Clause. First, defendants contend that Article I, section 10, guarantees only

that a remedy of some kind be available, not that the remedy be of any certain type or amount. Therefore, in defendants' view, because plaintiff here has a remedy available to him in the form of an action against OHSU, there is no Article I, section 10, infirmity. Second, defendants assert that the Court of Appeals erred in comparing the amount of damages available under the OTCA to the amount of damages claimed by plaintiff. Defendants argue that "substantial," as that term had been used in this court's Remedy Clause jurisprudence, does not call for such a comparison; instead, defendants contend that "substantial" refers to the remedial

723

process or, at the very most, that a substitute remedy need only be one that is not illusory or the practical equivalent of no remedy at all.

From the foregoing, the state contends that the court should review a legislatively substituted remedy on a categorical basis only. Put another way, the state suggests that the determination of whether a substitute remedy is adequate should not focus on the facts of an individual case, but instead should focus on the balance struck by the legislature in creating a substitute remedy. The state asserts that, unless a category of potential plaintiffs is left without a remedy, the legislative policy choice is conclusive.

On the other hand, plaintiff contends that the Remedy Clause protects both the procedure for seeking redress as well as the substance of that redress. Plaintiff argues further that, when the legislature abolishes a common-law remedy, it must provide a remedy that is "substantially equivalent" to the common-law remedy.

***

[T]his court consistently has held that Article I, section 10, is not merely an aspirational statement, but was intended by the framers of the Oregon Constitution to preserve for future generations, against legislative or other encroachment, the right to obtain a remedy for injury to interests in person, property, and reputation under circumstances in which Oregon law provided a remedy for those injuries when Oregon ratified its constitution. [C] However, as our review of the cases demonstrates, Article I, section 10, does not eliminate the power of the legislature to vary and modify both the form and the measure of recovery for an injury, as long as it does not leave the injured party with an "emasculated" version of the remedy that was available at common law.

***

We view plaintiffs economic damages of over $12 million as representative of the enormous cost of lifetime medical care currently associated with permanent and severe personal injuries caused by the medical negligence of a state officer, agent, or employee. Defendants do not argue that those damages do not constitute an "injury" within the meaning of the constitution. Nor does anything in the legislation suggest such a conclusion by the legislature. Yet, the legislature has completely eliminated an injured person's preexisting right to obtain a full recovery for those damages from the individual tortfeasors who negligently caused the injuries.

As we have explained, the legislature is authorized under Article I, section 10, to vary or modify the nature, the form, or the amount of recovery for a common-law remedy. However, that authority is not unlimited. To be clear, we respect the legislature's goal in amending

the OTCA in 1991--the legislature was entitled to conclude that the goal of encouraging public employment of qualified health care professionals by protecting them from the demands of litigation and the threat of personal

724

liability is an important one. However, there is simply nothing that we can discern from our state's history, or from the nature, the form, or the amount of recovery available for the preexisting common-law claim, that would permit this court to conclude that the limited remedy for permanent and severe injury caused by medical negligence that is now available under the OTCA meets the Article I, section 10, remedy requirement.

***

The decision of the Court of Appeals is affirmed. The judgment of the circuit court is reversed and the case is remanded to the circuit court for further proceedings.

[The concurring opinion is omitted. The concurring judges emphasized that the remedy limitation in OTCA cried out for a legislative solution. The Oregon State Legislature amended the damages limits effective July 1, 2009, with provisions for periodic increases. The new limits provide for damages of $2,247 million for causes of action arising between July 1, 2019 and July 1, 2020. O.R.S. § 30.271]

NOTES AND QUESTIONS

1. The origin of the idea of governmental immunity at English common law often is attributed to the phrase "the King can do no

wrong," but perhaps is more accurately described as necessarily a contradiction of the King's sovereignty to allow him to be sued as of right in his own courts. The doctrine evolved to mean that the government could not be sued without its consent and was firmly established in the common law when the United States was formed. Since the federal government and the state governments were all sovereigns, all were protected by the immunity. Although municipal corporations and other local entities are not sovereigns, the protection usually extended to them as well, although numerous judicial exceptions to their immunity were recognized. New York waived its sovereign immunity in 1929, the United States did so in 1946, and most states acted during the decades of the 1960s and 70s to limit sovereign immunity in various ways--including Oregon in 1967 as described in the principal case.

2. State Governments. Although the immunity of state governments from tort liability had its origins in English common law, it was given firmer underpinning in some state statutes and in some state constitutions that required legislative consent for the state to be liable in tort. Even when consent to suit was given, some state courts held that this was not "consent to liability" and they continued to apply the immunity.

3. State Agencies and Instrumentalities. In most states, sovereign immunity extends to state agencies and to instrumentalities of the state. The immunity has been held to extend to state agencies such as prisons, hospitals, educational institutions, state fairs, conservation districts, and commissions for public works. As in the principal case, the legislation creating the agency or instrumentality

is examined to determine whether the agency or instrumentality is included in the immunity. Entities created

after the state has adopted tort claim legislation may specify whether or not they are protected and under what circumstances they can subject the state to liability.

4. Municipal Corporations. Municipal corporations, such as cities, school districts, and the like have a rather curious dual character. On the one hand, they are subdivisions of the state, acting as local governments. On the other, they are corporate bodies, capable of much the same acts and having much the same special interests and relations as private corporations. The absence of any constitutional or statutory provisions requiring consent to suit made it much easier than in the case of state government entities to develop exceptions to the rule of immunity. The principal exception was for activities that were deemed "proprietary" or "private" as contrasted with "governmental" functions. Courts imposed liability when the city or town engaged in activity that normally was carried out by the private sector of the economy and reserved the immunity for traditional governmental functions like administering elections, providing a judicial system, exercising police powers, etc. The distinction has produced a morass of confusion and inconsistency--nevertheless, many jurisdictions still use it. See, e.g., Steelman v. New Bern, 279 N.C. 589, 184 S.E.2d 239 (1971) (public street lighting governmental rather than proprietary) and Matter of World Trade Ctr. Bombing Litigation, 17 N.Y.3d 428, 957 N.E.2d 733, 933 N.Y.S.2d 164 (2011) (Port Authority performed both proprietary and

governmental functions--allegations of failure to provide adequate security was governmental allocation of police resources, not commercial landlord's proprietary action).

5. As with charitable immunity, when the state has authorized a municipal corporation to purchase liability insurance, a number of courts have held that action to be an implied waiver of the immunity to the extent of the insurance. See, e.g., Ballew v. Chattanooga, 205 Tenn. 289, 326 S.W.2d 466 (1959); Bollinger v. Schneider, 64 Ill.App. 3d 758, 381 N.E.2d 849, 21 Ill.Dec. 522 (1978).

6. Abrogation by Case Law. Beginning in 1957 with Hargrove v. Cocoa Beach, 96 So.2d 130 (Fla. 1957), there have been a number of decisions abrogating the immunity of municipal corporations even for governmental functions. Merrill v. Manchester, 114 N.H. 722, 332 A.2d 378 (1974) and Oroz v. Board of County Comm'rs of Carbon County, 575 P.2d 1155 (Wyo.1978) (except for judicial and legislative functions). Judicial respect for governmental immunity has been greater in regard to state government than for municipal corporations. When there has been no state constitutional barrier, some courts have abrogated the immunity. See, e.g., Jones v. State Highway Comm'n, 557 S.W.2d 225 (Mo.1977) (except in legislative, judicial, and executive functions); Whitney v. Worcester, 373 Mass. 208, 210, 366 N.E.2d 1210 (1977) (finding that the underlying basis for common-law sovereign immunity for both the Commonwealth and municipalities was "logically indefensible" and stating intention to abrogate the immunity after the conclusion of the 1978 legislative session, thus providing the Legislature with an opportunity to set forth sovereign immunity policy for the Commonwealth and its political subdivisions through legislation); and

Bulman v. Hulstrand Construction Co., 521 N.W.2d 632 (N.D.1994) (abrogation of immunity is prospective only, to allow Legislature to implement and plan in advance by securing liability insurance or by creating funds for self-insurance).

7. Abrogation by Statute. More commonly, state and municipal immunities have been abrogated by legislation and legislation regulating the matter may be enacted after judicial abrogation. Some statutes are modeled on the Federal Torts Claims Act, discussed at page 734. Others broadly provide that the state shall be liable to the same extent as any private individual. Rather complex "codes" have been worked out in several states. See, e.g., Cal.Gov't Code §§ 810 et seq. and N.J.Stat.Ann. §§ 59:1-1 et seq. Today, every state provides for some tort claims against the government under some circumstances. Navigating the patchwork of waivers of immunity can be tricky. In some states, even the standard of conduct to which the governmental entity is held may vary, depending on how the claim is characterized. For example, in New Jersey, public entities can be held liable for dangerous conditions on public property only if the public entity acted in a "palpably unreasonable manner" in failing to protect against the condition but can be liable for injuries caused by the conduct of an employee under ordinary negligence principles. Which standard applies when someone is injured while climbing over a brick wall to escape a park in which she found herself trapped after taking a walk during her lunch hour? The gates were locked by a city employee hours before the scheduled closing time. Ogborne v. Mercer Cemetery Corp., 197 N.J. 448, 963 A.2d 828 (2009) (higher

standard of "palpably unreasonable" applies because court interprets immunity broadly and waiver creating liability narrowly).

8. Most state schemes preserve some special privileges to the state as well as placing various procedural limits on the enforcement of the claims. For example, the state may cap the total amount of damages for which it is liable (as Oregon did in the principal case), create special courts of claims, or impose additional "notice of claim" requirements (see note 14, page 700). See generally Civil Actions Against State and Local Government, Its Divisions, Agencies, and Officers (Thomson 2d ed. 2002 with semi-annual updates) and Restatement (Second) of Torts §§ 895B (states), 895C (local governments). Damages caps usually are upheld, even when they represent a small portion of the plaintiffs damages. See, for example, Zauflik v. Pennsbury School Dist., 104 A.3d 1096 (Pa. 2014) (upholding $500,000 limit in face of $14 million jury verdict for student who lost her leg when school bus ran over her) and Larimore Pub. Sch. Dist. No. 44 v. Aamodt, 908 N.W.2d 442 (N.D. 2018) (upholding $500,000 per incident limit in case that arose out of school bus and train collision in which one child died and twelve others sustained serious injuries). Why do states place per incident caps on their tort liability?

9. Generally, even those states that have waived or limited governmental immunity have retained immunity for the judicial and legislative functions of the government. This immunity also extends to the agents of the government. Thus, a legislator may not be sued for how he voted or a judge for how she ruled.

10. As in the states where other immunities, like parental immunity, were abolished or limited, a state that abolished or limited governmental immunity and permitted recovery for some torts then had to grapple with how to define the duty owed to its citizens. New York's legislature had provided by statute that tort claims could be made against the state. In the next two principal cases, the court is faced with determining the duty owed by the government in its provision of emergency and protective services. The first case is against the City of New York for activities of its police department. The second is against a county for actions of its agency providing emergency response services. Each struggles with defining whether a duty is owed to the individual plaintiff, separate from the duty owed to the public, and what the scope of that duty is.

Riss v. New York

New York Court of Appeals, 1968.

22 N.Y.2d 579, 240 N.E.2d 860, 293 N.Y.S.2d 897.

[The description of the facts in this case is taken from the dissenting opinion of Judge Keating:

"Linda Riss, an attractive young woman, was for more than six months terrorized by a rejected suitor well known to the courts of this State, one Burton Pugach. This miscreant, masquerading as a respectable attorney, repeatedly threatened to have Linda killed or maimed if she did not yield to him: 'If I can't have you, no one else will have you, and when I get through with you, no one else will want you.' In fear for her life, she went to those charged by law with the duty of preserving and safeguarding the lives of the citizens and

residents of this State. Linda's repeated and almost pathetic pleas for aid were received with little more than indifference. Whatever help she was given was not commensurate with the identifiable danger. On June 14, 1959 Linda became engaged to another man. At a party held to celebrate the event, she received a phone call warning her that it was her 'last chance.' Completely distraught, she called the police, begging for help, but was refused. The next day Pugach carried out his dire threats in the very manner he had foretold by having a hired thug throw lye in Linda's face. Linda was blinded in one eye, lost a good portion of her vision in the other, and her face was permanently scarred. After the assault the authorities concluded that there was some basis for Linda's fears, and for the next three and one-half years, she was given around-the-clock protection."] BREITEL, J. This appeal presents, in a very sympathetic framework, the issue of the liability of a municipality for failure to provide special protection to a member of the public who was repeatedly threatened with personal harm and eventually suffered dire personal injuries for lack of such protection. ***The issue arises upon the affirmance by a divided Appellate Division of a dismissal of the complaint, after both sides had rested but before submission to the jury. ***

728

[T]his case involves the provision of a governmental service to protect the public generally from external hazards and particularly to control the activities of criminal wrongdoers. [Cc] The amount of protection that may be provided is limited by the resources of the community and by a considered legislative-executive decision as to how those resources may be deployed. For the courts to proclaim a

new and general duty of protection in the law of tort, even to those who may be the particular seekers of protection based on specific hazards, could and would inevitably determine how the limited police resources of the community should be allocated and without predictable limits. This is quite different from the predictable allocation of resources and liabilities when public hospitals, rapid transit systems, or even highways are provided.

Before such extension of responsibilities should be dictated by the indirect imposition of tort liabilities, there should be a legislative determination that that should be the scope of public responsibility.
***

When one considers the greatly increased amount of crime committed throughout the cities, but especially in certain portions of them, with a repetitive and predictable pattern, it is easy to see the consequences of fixing municipal liability upon a showing of probable need for and request for protection. To be sure these are grave problems at the present time, exciting high priority activity on the part of the national, State and local governments, to which the answers are neither simple, known, or presently within reasonable controls. To foist a presumed cure for these problems by judicial innovation of a new kind of liability in tort would be foolhardy indeed and an assumption of judicial wisdom and power not possessed by the courts.

***

For all of these reasons, there is no warrant in judicial tradition or in the proper allocation of the powers of government for the courts, in the absence of legislation, to carve out an area of tort liability for

police protection to members of the public. Quite distinguishable, of course, is the situation where the police authorities undertake responsibilities to particular members of the public and expose them, without adequate protection, to the risks which then materialize into actual losses (Schuster v. City of New York, 5 N.Y.2d 75).

Accordingly, the order of the Appellate Division affirming the judgment of dismissal should be affirmed.

KEATING, Judge (dissenting). It is not a distortion to summarize the essence of the city's case here in the following language: "Because we owe a duty to everybody, we owe it to nobody." ***To say that there is no duty is, of course, to start with the conclusion. The question is whether or not there should be liability for the negligent failure to provide adequate police protection.

729

The foremost justification repeatedly urged for the existing rule is the claim that the State and the municipalities will be exposed to limitless liability. The city invokes the specter of a "crushing burden" ***

The fear of financial disaster is a myth. The same argument was made a generation ago in opposition to proposals that the State waive its defense of "sovereign immunity". The prophecy proved false then, and it would now. ***

Another variation of the "crushing burden" argument is the contention that, every time a crime is committed, the city will be sued and the claim will be made that it resulted from inadequate police protection. Here, again, is an attempt to arouse the "anxiety of the

courts about new theories of liability which may have a far-reaching effect" ***.

The instant case provides an excellent illustration of the limits which the courts can draw. No one would claim that, under the facts here, the police were negligent when they did not give Linda protection after her first calls or visits to the police station in February of 1959. The preliminary investigation was sufficient. If Linda had been attacked at this point, clearly there would be no liability here. When, however, as time went on and it was established that Linda was a reputable person, that other verifiable attempts to injure her or intimidate her had taken place, that other witnesses were available to support her claim that her life was being threatened, something more was required--either by way of further investigation or protection--than the statement that was made by one detective to Linda that she would have to be hurt before the police could do anything for her. ***

More significant, however, is the fundamental flaw in the reasoning behind the argument alleging judicial interference. It is a complete oversimplification of the problem of municipal tort liability. What it ignores is the fact that indirectly courts are reviewing administrative practices in almost every tort case against the State or a municipality, including even decisions of the Police Commissioner ***.

DeLong v. Erie County

New York Supreme Court, Appellate Division, 1982.

89 A.D.2d 376, 455 N.Y.S.2d 887.

HANCOCK, Justice: ***Before her death, Amalia DeLong, her husband, and their three young children resided at 319 Victoria Boulevard in the Village of Kenmore, a suburb of Buffalo located in Erie County. In October, 1976, the Village of Kenmore was one of the four communities outside of Buffalo fully served by the 911 emergency telephone system operated by the Central Police Services, an agency of Erie County[.] ***At 9:29:29 in the morning of October 25, 1976 Amalia DeLong dialed 911 on her telephone and was immediately connected to the 911 room. The transcript of her call is as follows:

730

[table]

9:29:29	--Caller:	"Police?"
	-- Complaint Writer:	"911."
	--Caller:	"Police, please come, 319 Victoria right away."
	-- Complaint Writer:	"What's wrong?"
	--Caller:	"There's a burglar."
9:29:34	-- Complaint Writer:	"In there now?"

	--Caller:	"I heard a burglar; I saw his face in the back; he was trying to break in the house; please come right away."
	--Complaint Writer:	"Okay, right away."
9:29:43	--Caller:	"Okay."

The complaint writer recorded the address on the complaint card as "219 Victoria"--not "319 Victoria". The call had lasted 14 seconds. [The evidence regarding police response time indicated that the decedent's life might have been saved if the police had not been misdirected to a nonexistent address.] As a result of the failure of proper police response, Amalia DeLong had received seven knife wounds: to the left side of the neck, the left side of the head, the second finger of the right hand, the nail of the third finger on the left hand, the thumb of the left hand, and a wound to the left shoulder. The laceration on the neck was fatal. It was deep and had severed the jugular vein and carotid artery on the left. The cuts on the fingers were described as being of a "defensive type".

***

The purpose of the 911 emergency or "hot line" system is to assist in the delivery of police services to the people in the communities served [.]***

On the morning of October 25, the complaint writer, in addition to mistakenly recording the address on the complaint card as 219

instead of 319 Victoria, failed to follow the instructions in four respects: (1) he did not ask the name of the caller; (2) he did not determine the exact location of the call; (3) he did not address the caller by name; (4) he did not repeat the address.

The operating procedures in effect on October 25, 1976 also called for follow-up action if, as with the DeLong call, the report came back to the dispatcher: "No such address." In such event, the dispatcher was required to notify the complaint writer or the 911 lieutenant (the Buffalo police lieutenant on duty in the 911 room) so that the tape recording of the call could be replayed, the Haines Directory and the street guides consulted, and other communities having street names identical or similar to the street name given by the caller immediately notified. On

731

Amalia DeLong's call, no follow-up of any kind took place. The call was treated as a fake.

Our discussion of the questions raised concerning liability must start with Riss v. City of New York, 22 N.Y.2d 579, 293 N.Y.S.2d 897, 240 N.E.2d 860, in which the court found no legal responsibility for the tragic consequences of the city's failure to furnish police protection despite proof of Linda Riss' repeated and agonized pleas for assistance. In an opinion by then Associate Judge Breitel, the court, with one dissent, concluded: "[T]here is no warrant in judicial tradition or in the proper allocation of the powers of government for the courts, in the absence of legislation, to carve out an area of tort liability for police protection to members of the public." Quite distinguishable, of course, is the situation where the police

authorities undertake responsibilities to particular members of the public and expose them, without adequate protection, to the risks which then materialize into actual losses [cc]. This fundamental rule remains the law [cc] when a relationship is created between the police and an individual which gives rise to a special duty, the municipality loses its governmental immunity and liability may result. Courts have found such a special duty to be owing to informers [c], undercover agents [c], persons under court orders of protection [c], and school children for whom the municipality has assumed the responsibility of providing crossing guards [cc], ***

It is not the establishment of the emergency call system to serve the Village of Kenmore, standing alone, which creates the duty. It is the holding out of the 911 number as one to be called by someone in need of assistance, Amalia DeLong's placing of the call in reliance on that holding out, and her further reliance on the response to her plea for immediate help: "Okay, right away." This is not a mere failure to furnish police protection owed to the public generally but a case where the municipality has assumed a duty to a particular person which it must perform "in a nonnegligent manner, [although without the] voluntary assumption of that duty, none would have otherwise existed" [c]. The complaint writer's acceptance of the call, his transmittal of the complaint card to the dispatcher and the dispatcher's radio calls to the police cars were affirmative actions setting the emergency machinery in motion. This voluntary assumption of a duty to act carried with it the obligation to act with reasonable care [c].

But, defendants remind us, failing to fulfill an undertaking to provide police protection does not result in municipal liability unless it be

shown that the police conduct in some way increased the risk [c]. ***In other words, defendants argue, although the hand may have been set to the task and withdrawn [c], it has resulted in no harm. We disagree.

While there could in this case be no direct evidence that Amalia DeLong relied to her ultimate detriment on the assurance of police assistance, the circumstantial evidence strongly suggests that she did so. Instead of summoning help from the Village police or from her neighbors

732

(one of whom was a captain in the Kenmore Police Department), she waited for the response to her 911 call. Instead of taking her baby and going out the front door where she would have been safe, she remained defenseless in the house. ***

[The court found that the jury's award of $200,000 for pain and suffering was "within reasonable bounds." The period of time of decedent's fatal encounter with her assailant was between 9:30 and 9:42 a.m.]

Accordingly, the judgment insofar as it awards damages for conscious pain and suffering, should be affirmed.

Judgment affirmed with costs.

[Concurring and dissenting opinions omitted.]

NOTES AND QUESTIONS

1. Do you agree with Judge Keating's dissent in the Riss case? Has New York decided that because the state government owes a duty to

protect everyone it owes no duty to a particular crime victim? At what point does Ms. Riss move from being a member of the general public to being a particular person, like Ms. DeLong, to whom the government has assumed a duty? Suppose plaintiffs decedent had reported to police that she had been raped and that the assailants had threatened to kill her if she reported them. Less than a week later, assailants made good on their threat. Brandon v. County of Richardson, 252 Neb. 839, 566 N.W.2d 776 (1997) (holding special relationship was created when the victim went to law enforcement officials and offered to testify and aid in the prosecution of the assailants and the fact that witness was the victim of the crime did not change this relationship). Suppose plaintiffs decedent placed a call to 911, recited an address and "heart attack," and then hung up before the dispatcher could obtain any additional information or respond. Is the caller a member of the general public (no duty) or someone with whom the county is in a special relationship (duty)? Cummins v. Lewis County, 156 Wash.2d 844, 133 P.3d 458 (2006) (no special relationship giving rise to duty because caller did not identify himself, did not receive any assurance of assistance from operator, and did not engage in dialogue with operator from which assurance could have been inferred). Suppose hospital staff called the police to report that a patient who had voluntarily committed himself for treatment for mental illness had left the hospital grounds without telling anyone and wandered into the countryside. The police kept a lookout for him during routine patrols but did not search for him. He died of exposure. Is the patient a member of the general public (no duty) or someone with whom the county has a special relationship? Eves v. Anaconda-Deer Lodge County, 327 Mont. 437,

114 P.3d 1037 (2005) (no special relationship created by call from hospital to police).

2. The same issues also can arise outside of police protection cases. Suppose the state never inspects a chicken processing plant during its eleven years of operation and thus fails to find numerous fire safety violations. A fire there killed 25 workers and injured 55 others whose escape from the

burning building was prevented or hindered by the fire safety violations. Does the state owe a duty to the workers? Stone v. North Carolina Dept, of Labor, 347 N.C. 473, 495 S.E.2d 711 (1998) (obligation to inspect runs to public at large, not individuals, and thus there is no liability). Suppose two children report that they are being sexually abused by their stepfather but state social workers, after promising to take action, do nothing to protect them. Sabia v. State of Vermont, 164 Vt. 293, 669 A.2d 1187 (1995) (obligation to protect children where report of abuse has been made runs to those children and state may be liable if it was negligent in not providing protection after promising to do so). Suppose the state through its county health department fails to issue a health advisory after a hospital reports a case of deadly hantavirus. Another county resident becomes infected. Ehrhart v. King County, 460 P.3d 612 (Wash. 2020) (mandated government duty was owed to the public in general, not to a particular class of individuals).

3. Many states have eliminated the immunity for ministerial acts but retained it for discretionary functions. Discretionary functions are those where the government is acting to establish policy. Ministerial

acts are those that implement or effectuate the policies. Do you see why the government is more appropriately held accountable for discretionary decisions through elections and the political process rather than through the tort system? Court review of discretionary decisions would interfere with democratic choices: how much money to spend on the police force, how many snow plows to buy, whether to build a new middle school or provide Internet access in public libraries. See, for example, Lane v. State of Vermont, 174 Vt. 219, 811 A.2d 190 (2002) (decisions of how to allocate snow plow operators, how many workers to call in for any given winter storm event, how many trucks to put on the road, and how much salt to use are discretionary functions) and Kohl v. City of Phoenix, 215 Ariz. 291, 160 P.3d 170 (2007) (decision which intersections have traffic signals and which do not is determination of "fundamental governmental policy" and therefore protected discretionary function).

Ministerial decisions, on the other hand, are not manifestations of public policy decisions and therefore can subject the government to liability if they are performed negligently. For example, the government may be liable if one of its agents negligently drives a car, negligently fails to maintain government premises, or negligently fails to maintain public roads. See, for example, Hensley v. Jackson County, 227 S.W.3d 491 (Mo. 2007) (negligent failure to maintain or repair stop sign) and Gregor v. Argenot Great Central Ins. Co., 851 So.2d 959 (La. 2003) (finding that enforcement of health code was mandatory, not discretionary, and therefore state could be jointly liable with restaurant for patron's death). Although some actions are easily categorized as discretionary or ministerial (city traffic engineer deciding where to put a traffic signal v. city traffic engineer running a

red light while on city business), many actions are not so easily characterized. The next principal case raises that issue in the context of the Federal Tort Claims Act, the federal government's principal statutory waiver of immunity. Note also that even if the decision is a ministerial one (and thus no immunity),

734

claimant still must show that there was some special relationship that gave rise to a duty, something more than the general duty owed to the public at large. Valdez v. City of New York, 18 N.Y.3d 69, 936 N.Y.S.2d 587, 960 N.E.2d 356 (2011) (must be an affirmative undertaking that creates justifiable reliance--not justifiable to rely on police officer's alleged statement that former boyfriend who had threatened plaintiff would be arrested immediately when plaintiff knew that police did not know location of former boyfriend).

4. For those who may be interested, here is a side note on the subsequent history of the personalities in the Riss case. Burton Pugach, the attorney who hired the "thug" who partially blinded Ms. Riss, served 14 years in prison for his crime. Six months after his release he again proposed to Ms. Riss. She accepted and they were married in 1974. N.Y. Times Nov. 28, 1974, at 1, col. 4. In 1990, they were still married and Pugach was working as a paralegal while attempting to have his disbarment lifted so that he could again practice law. Agus, City Legend: What They Did for Love, Newsday April 26, 1990, at 4. The disbarment was never lifted. In 1996, a nurse with whom Pugach had been having a five-year long extramarital affair reported to the police that he had threatened her when she attempted to end their affair. She claimed he said "It's

1959 all over again" and "I have tremendous contacts. All I have to do is tell them to do a job." Pugach admitted the affair, but denied that he had made any threats. He acted as his own lawyer at the criminal trial and his wife (the former Ms. Riss) testified as a character witness on his behalf. Donohue and Kennedy, "Lover Lawyer Grills His Ex," Daily News April 22, 1997, at 8. Pugach was acquitted of several charges, but convicted of one count of harassment. He and his wife then filed a lawsuit against the nurse, alleging malicious prosecution based on the criminal charges and breach of confidentiality based on the nurse's disclosure of medical data about Linda (Riss) Pugach. Pugach v. Borja, 175 Mise.2d 683, 670 N.Y.S.2d 718 (1998). Does all this sound familiar? The Pugachs are the subject of an award-winning documentary, CRAZY LOVE (2007), directed by Dan Klores and Fisher Stevens.

(F) The United States

Deuser v. Vecera

United States Court of Appeals, Eighth Circuit, 1998.

139 F.3d 1190.

Bowman, Circuit Judge. ***On July 3-6, 1986, the event known as the Veiled Prophet (or VP) Fair was held on the grounds of the Jefferson National Expansion Memorial in St. Louis, Missouri (the site of the Gateway Arch). Because the Expansion Memorial is a national park (a special use permit was issued to the city of St. Louis for the Fair), the Secretary of the Interior is responsible for maintaining the park and its facilities and for providing services to visitors, functions generally carried out by the National Park Service.

[C] The park is within the jurisdiction of the National Park Rangers. On the evening of July 4, 1986, many

735

thousands of people were in attendance at the Fair, including Larry Deuser. Rangers David Vecera and Edward Bridges observed Deuser grabbing women on the buttocks, to the obvious outrage of the victims and others. The rangers warned Deuser, and continued to keep an eye on him. When he urinated in public, the rangers arrested him. As the rangers made their way to their tent with Deuser, he was argumentative with them and continued making rude comments to female visitors.

After conferring with chief ranger Dennis Burnett, the rangers elected to turn Deuser over to St. Louis police. But the police department was overwhelmed with the additional workload created by the Fair, and officers were unable or unwilling to process Deuser's arrest. At this point, the rangers, together with St. Louis police officer Lawrence King, decided to release Deuser, but away from the park so that he would not return to the Fair that evening.

There is some dispute between the parties about where Deuser was released, and also some question of the timing of the events that occurred that night. It is sufficient for our purposes to know the undisputed facts: Deuser was freed in a parking lot [behind the police station] somewhere in St. Louis [about 10 blocks from the Fair], alone and with no money and no transportation. At some time after that, he wandered onto an interstate highway [about a mile and a half away] and was struck and killed by a motorist. Deuser's blood alcohol level was 0.214 at the time of his death, well above the legal

limit for intoxication. [Deuser's survivors brought several state and federal claims against both municipal and federal actors. This wrongful death action against the United States under the Federal Tort Claims Act ("FTCA") based on the allegedly negligent acts of the park rangers in deciding not to arrest him and to release him in the parking lot was dismissed by the trial court judge. The survivors appealed.] ***

By enacting the FTCA, Congress opted to waive the sovereign immunity to civil suit enjoyed by the United States, and to give consent to be sued "for money damages... for injury or loss of property, or personal injury or death caused by the negligent or wrongful act or omission of any employee" of the United States acting within the scope of his employment. 28 U.S.C.A. § 1346(b)(1) (Supp.1997). The federal courts have subject matter jurisdiction over such claims "under circumstances where the United States, if a private person, would be liable to the claimant in accordance with the law of the place where the act or omission occurred." Id. But, as is true in other cases where Congress on behalf of the United States has waived sovereign immunity, amenability to suit is not without exception.

The exception relevant here is commonly known as the discretionary function exception. It is statutory and shields the government from civil liability for claims "based upon the exercise or performance... [of] a discretionary function or duty on the part of a federal agency or an employee of the Government, whether or not the discretion involved be abused."

28 U.S.C. § 2680(a) (1994). The exception "marks the boundary between Congress' willingness to impose tort liability upon the United States and its desire to protect certain governmental activities from exposure to suit by private individuals." [C]

To determine whether the discretionary function exception applies here to protect the rangers and the United States from suit, we engage in a two-step inquiry.

A.

First, we must consider whether the actions taken by the rangers as regards Deuser were discretionary, that is, "a matter of choice." Berkovitz [v. United States], 486 U.S. [531] at 536, [1988], "[C]onduct cannot be discretionary unless it involves an element of judgment or choice." Id. It is axiomatic that a government employee has no such discretion "when a federal statute, regulation, or policy specifically prescribes a course of action for an employee to follow." Id. If the rangers had a policy they were to follow in releasing Deuser, as the appellants contend, "then there is no discretion in the conduct for the discretionary function exception to protect." Id. ***

[The court then described the written Standard Operating Procedure ("SOP") for an arrest and the VP Fair Operations Handbook.] The opening paragraph of the Handbook's General Enforcement Guidelines makes it clear that the guidelines are in fact quite general and are for use by the rangers "in enforcement contacts [,] but in no way should [they] be construed as a substitute for sound judgement and discretionary action on the part of the Ranger." The guidelines then cover the areas of concern for enforcement by rangers during the Fair: traffic control; liquor law violations; city ordinances in effect

for the duration of the Fair concerning alcoholic beverages, glass containers, and pets; access to the Arch; and a variety of crimes against persons from simple assault to murder. The Enforcement section of the Handbook then wraps up with a paragraph that makes it clear the rangers have wide latitude in making enforcement decisions:

This will be a busy weekend and our holdover facilities at the 4th District may or may not be available per our existing agreement. Transport of federal prisoners to either St. Clair in Illinois or Cape Giraudeau [sic] in Missouri will tie up rangers that we can ill afford and create an extreme workload on the 7th of July [the first business day after the Fair] when we can least afford it. That does not mean we will not take appropriate action, only that our actions will be tempered with reality and arrests will only be on a "last resort" basis.

***The Handbook was intended to provide guidance to the rangers on the extent to which certain laws should be enforced during the Fair. Read as a whole, the Handbook suggests that enforcement in many circumstances might be relaxed during the event, so that arrests would

be kept to a minimum. The rangers '"sound judgement and discretionary action" was to be exercised in the context of making decisions on whether to make an arrest at all; the Handbook never touches on the procedure to be followed in the event an arrest is made (except to note that holding facilities and rangers will be busy during the Fair). The Handbook did not override the standard operating procedures. [Footnote omitted.] Based on the record

before us, it appears the SOP for processing arrestees remained unchanged during the Fair. Still, that conclusion does not mean that the rangers were required to complete an arrest, that is, to charge and incarcerate a suspect, once he was in custody.

We know that Deuser was arrested by the rangers. The SOP to be followed when a person is arrested by a ranger at the Expansion Memorial is precise and, as to the salient points, mandatory. Appellants are correct that there was very little discretion to be exercised, at least for as long as Deuser was under arrest. And it seems that the rangers initially followed the prescribed procedure: they searched Deuser and handcuffed him before transporting him. After that, it is true that the SOP was not followed--but when Deuser was released in the parking lot, the arrest was terminated. He was free to go, and further arrest procedures--booking the prisoner and so forth--were irrelevant. Deuser was not charged with a crime, so there was no reason to follow the procedures for incarceration.

The question remains whether a ranger's decision to terminate an arrest made at the park during the Fair would require the same sort of judgment and choice as would the initial decision to make the arrest. We think that it would. There is nothing in either the SOP or the Handbook that sets forth a policy--whether discretionary or otherwise--for terminating an arrest. But we conclude that this is because the decision to terminate an arrest is closely akin to the decision to make the arrest in the first place. Law enforcement decisions of the kind involved in making or terminating an arrest must be within the discretion and judgment of enforcing officers. See, e.g., Redmond v. United States, 518 F.2d 811, 816-17 (7th Cir.1975) ("It cannot be denied that the Government has a duty to

maintain law and order, but how best to fulfill this duty is wholly within the discretion of its officers..."). It would be impossible to put into a manual every possible scenario a ranger might encounter, and then to decide in advance for the ranger whether an arrest should be made and, once made, under what circumstances an arrest could be terminated. Just as the rangers had discretion to decide (within constitutional limits, of course) when and whether to make an arrest, so they had--and here exercised--discretion to terminate an arrest without charging the suspect. Under the terms of the Handbook, that discretion became even broader during the Fair.

We hold that terminating Deuser's arrest, that is, releasing him without charging him with a crime, was a discretionary function reserved to the judgment of the rangers.

738

B.

We move now to the second part of our inquiry. Notwithstanding the judgment involved in terminating Deuser's arrest, we must ask "whether that judgment is of the kind that the discretionary function exception was designed to shield." Berkovitz, 486 U.S. at 536, 108 S.Ct. at 1959. To be protected, the rangers' conduct must be "grounded in the social, economic, or political goals" of the Handbook's discretionary enforcement guidelines. United States v. Gaubert, 499 U.S. 315, 323, 111 S.Ct. 1267, 1274, 113 L.Ed.2d 335 (1991). ***

We think the conduct of the rangers here is the classic example of a "permissible exercise of policy judgment." Berkovitz, 486 U.S. at

539, 108 S.Ct. at 1960. Social, economic, and political goals--all three--were the basis for the actions taken by the rangers.

An important function of the rangers during the Fair, according to the Handbook, was to serve and protect visitors to the park. Clearly, the decision to remove Deuser from the park served the social goals of protecting innumerable other fairgoers and ensuring that their enjoyment of the festivities was not diminished by the obnoxious and offensive behavior of a fellow attendee. Further, the decision to release Deuser, rather than to charge him for the offenses he committed, may have prevented a night of revelry that obviously was out of control from becoming a criminal conviction. And the rangers who otherwise would have spent considerable time booking Deuser were free to return to the Fair, possibly to prevent more serious or more dangerous crimes from being committed, or to apprehend the perpetrators of graver offenses, thereby continuing to further the goal of visitor protection.

The economic goals of the guidelines are clear, and are spelled out in some detail in the Handbook. Law enforcement manpower was expected to be stretched thin, both during the Fair and on the first business day following the Fair, when arrestees would have to be transported for court appearances. (In fact, the SOP tells rangers to expect the process to take all day, even under ordinary circumstances.) There were simply not enough officers to arrest and to charge all persons who might commit a crime at the park during the four-day Fair. The rangers' colleagues, St. Louis police department officers, were expected to be equally taxed with their own enforcement duties. Moreover, it was anticipated that the nearest holdover facility would be overcrowded with arrestees,

meaning more miles and more manpower to transport suspects to alternative holdover facilities and to see to their arraignments. Releasing Deuser without charging him preserved already scarce law enforcement resources.

The political goals to be served by the guidelines concern law enforcement "territories." The Fair was not a National Park Service event. The Handbook acknowledges that "[t]he St. Louis Police Department is the lead agency for law enforcement." VP Fair 1986 Operations Handbook--Overview and Hindsight para. 6. As the chief

739

ranger stated in the Handbook, the federal park rangers '"primary role is defined as resource protection followed by the things we do best, visitor services and visitor care." Id. When the police opted not to process Deuser's arrest, the rangers appropriately decided not to override the decision of "the lead agency for law enforcement." The Fair's success depended in part on all enforcement agencies involved working together toward a common goal, and the rangers acted properly to preserve that cooperation by releasing Deuser in this situation. Further, the Fair was designed to be an enjoyable event for the city, and it would have been unfortunate if overzealous federal law enforcement had dampened the festivities. ***

[We hold that the conduct of the officers here was grounded in the social, economic, and political policies of the Handbook and thus within the discretionary function exception to the FTCA's waiver of sovereign immunity.]

The judgment of the District Court is affirmed.

NOTES AND QUESTIONS

1. From Congress to the Courts. Governmental immunity barred tort suits against the United States for most of its history. The United States cannot be sued without its consent. Consent to be sued began to appear in the form of private bills by Congress authorizing particular plaintiffs to sue on particular claims. Apart from the obvious possibility of political influence, this of necessity involved considerable delay and inconvenience, as well as inflicting a considerable burden upon the time of Congress. In 1855 a Court of Claims was established to hear contract cases. This was initially merely an advisory court making recommendations to Congress, but in 1863 the Court of Claims was given the power to render effective judgments. There were also a number of minor statutes permitting suit upon particular types of claims, and in a few instances some of these even authorized some relief in tort. The great majority of the tort claims against the United States however, remained without any redress. The inconvenience caused by having to deal with private bills eventually pressured Congress to provide for a general tort remedy. Between 1919 and 1946, some 18 proposals were considered. Finally, on August 2, 1946, the Federal Tort Claims Act was enacted. It applies to all claims accruing on or after January 1, 1945. In effect, it represented the first judicial remedy of general application available to persons who suffered tortious injury to their person or property caused by employees of the United States Government.

2. Tort claims against the Federal Government are a major source of tort litigation today. As an author of a three-volume treatise on the subject has observed: "Thousands of suits and claims under the

Federal Tort Claims Act are pending against the United States at any one time, with tens of billions of dollars sought. Total payments from the Treasury Department's Judgment Fund, which includes payments on contract claims as well as tort claims, totaled more than $3 billion in 2014. Thousands of new suits are filed each year, and federal trial and appellate judges issue some 2,000 written

opinions a year addressing issues arising under the FTCA. Administrative claims, presented by claimants each year to federal agencies as a prerequisite to filing suit, number some 10 to 20 times that amount.

This large volume of tort claims involving but a single defendant is understandable when you consider that the United States employs more than four million people, military and civilian, for whose tortious conduct it is answerable in damages under the Tort Claims Act. It operates more than half a million autos, trucks, and other vehicles. It flies huge fleets of aircraft and sails great numbers of ships. It maintains hundreds of hospitals and employs more than 85,000 doctors, dentists, nurses, and other medical personnel. It operates tens of thousands of post offices and buildings and other places for the transaction of government business. It maintains immense parks, builds highways, constructs dams, and engages in a vast variety of activities." 1 Jayson & Longstreth, Handling Federal Tort Claims § 1.01 (2020).

3. The Federal Tort Claims Act is a subject for separate study. Only a few major issues under the Act will be noted here. It is of paramount importance to remember that a lawyer cannot assume that matters

will be handled in "the ordinary way" under the Act. Here are a few examples:

A. A person seeking recovery must present his claim to the "appropriate Federal agency" before instituting suit. 28 U.S.C. § 2675. See note 14, page 700 re notice-of-claim requirements. Failure to exhaust the administrative remedy before filing the lawsuit results in a dismissal of the suit due to lack of subject matter jurisdiction. McNeil v. United States, 508 U.S. 106 (1993) (such is the case even where the plaintiff is a prisoner proceeding pro se).

B. Two different time deadlines must be met by the claimant. The claim with the administrative agency must be filed within two years of when the cause of action accrues and the lawsuit must then be filed within six months of when the agency mails the notice of final denial of the claim. 28 U.S.C. 2401(b). The cause of action accrues when claimant learns of his injury and its cause, not when he learns that the conduct that injured him was tortious. United States v. Kubrick, 444 U.S. lll (1979) (medical malpractice). Federal law governs the interpretation of the statute of limitations and the Supreme Court has concluded that those deadlines are not jurisdictional and that the courts may apply equitable principles to toll both limitations periods. U.S. v. Wong, 575 U.S. 402 (2015). Minority alone is not the type of exceptional circumstance that is a sufficient basis for equitable tolling. Booth v. U.S., 914 F.3d 1199 (9th Cir. 2019) (must show extraordinary circumstances like minor was abandoned by parents or guardian and left unprotected; minor is ward of state without next friend or guardian; guardian's interests are adverse to minor's; or the claim is for some reason not reasonably knowable by the minor or parents).

C. The lawsuit cannot be filed in state court because the federal district courts have exclusive subject matter jurisdiction. 28 U.S.C. § 1346(b). It must be filed in the district where the plaintiff resides or wherein the act or omission complained of occurred. 28 U.S.C. § 1402(b).

741

D. The suit will be tried by a judge and not a jury. 28 U.S.C. § 2402.

E. The plaintiffs attorney's contingent fee is subject to express regulation and collection of a higher fee constitutes a federal crime. 28 U.S.C. § 2678 (the maximum amount permitted is 25% of any judgment or settlement made after commencement of the action and 20% of any settlement obtained through the administrative procedure before filing suit).

4. The two principal sections of the Act are the jurisdiction and general liability sections. They were quoted in the principal case and are set out below:

The federal district courts "shall have exclusive jurisdiction of civil actions on claims against the United States, for money damages, accruing on or after January 1, 1945, for injury or loss of property, or personal injury or death caused by the negligent or wrongful act or omission of any employee of the Government while acting within the scope of his office or employment, under circumstances where the United States, if a private person, would be liable to the claimant in accordance with the law of the place where the act or omission occurred." 28 U.S.C. § 1346(b).

"The United States shall be liable, respecting the provisions of this title relating to tort claims, in the same manner and to the same extent as a private individual under like circumstances, but shall not be liable for interest prior to judgment or for punitive damages." 28 U.S.C. § 2674.

A. Use of State Tort Law. What problems of statutory interpretation can you glean from each section? Why do you think Congress did not enact a complete code of federal tort law rather than rely on the law of the place where the tort occurred? Should the liability of the federal government vary from state to state? Suppose local law would make a state governmental entity liable for failing to perform a governmental function like a safety inspection of a mine. Does that make the United States liable under the FTCA standard? United States v. Olson, 546 U.S. 43 (2005) (no--FTCA waives federal government's sovereign immunity only where local law would make a private person liable in tort, not where local law would make a state or municipal entity liable).

B. Is the United States subject to strict liability under the Act? Suppose it engaged in an "abnormally dangerous" activity or manufactured a "defective" product? This matter would appear to have been finally put to rest in Laird v. Nelms, 406 U.S. 797 (1972) (no FTCA liability based on strict liability for ultrahazardous activity in case involving damage from military jets on training exercises breaking the sound barrier), where the Supreme Court held that the Act did not authorize suit against the government based on strict or absolute liability. Nevertheless, could you make an argument the other way based on language of the Act itself?

C. Recovery in many cases turns on the issue of whether a government officer or employee was "acting within his office or employment" for the purpose of the Act. Should this be decided as a matter of state or federal law? Williams v. United States, 350 U.S. 857 (1955) (state law of respondeat superior controls). Under a provision of the statute sometimes called the Westfall Act, a claim against the United States is the exclusive remedy for

the claimant and the individual employee is shielded from liability. 28 U.S.C. § 2679. Osborn v. Haley, 549 U.S. 225 (2007) (The Westfall Act's core purpose is to relieve covered employees from the cost and effort of defending the lawsuit and to place those burdens on the government.)

5. The Act contains 13 specific exceptions to the waiver of immunity in 28 U.S.C. § 2680. Most of them deal with specific activities of the government, such as the transmission of mail, the assessment or collection of customs duties, the imposition or establishment of quarantines, the fiscal operations of the Treasury, and the like, and in particular the combatant activities of military and naval forces in time of war. The Supreme Court of the United States has adhered to the proposition that it will not "extend the waiver of sovereign immunity more broadly than has been directed by Congress." United States v. Shaw, 309 U.S. 495, 502 (1940).

Suppose rancher's cattle are injured by the improper administration of a pesticide during a fever tick quarantine. Is the administration of the pesticide during the quarantine part of the "imposition or establishment" of quarantine? Cascabel Cattle Co., LLC v. U.S., 955

F.3d 445 (5th Cir. 2020) (within exception--claim dismissed). Suppose a resident trips over mail negligently left on her porch by the mail carrier. Does that fall within the exception for the "loss, miscarriage, or negligent transmission of letters or postal matter"? Dolan v. U.S. Postal Svs., 546 U.S. 481 (2006) (not within exception to waiver of immunity--claim could go forward). Suppose the mother of a soldier serving in Iraq had a letter she had sent to her son returned to her marked "DECEASED" even though her son was alive? Najbar v. United States, 649 F.3d 868 (8th Cir. 2011) (within exception to waiver--claim for emotional distress dismissed).

Three of the most important exceptions are for

A. "Any claim based upon an act or omission of an employee of the Government, exercising due care, in the execution of a statute or regulation, whether or not such statute or regulation be valid, or based upon the exercise or performance or the failure to exercise or perform a discretionary function or duty on the part of a federal agency or an employee of the Government, whether or not the discretion involved be abused." 28 U.S.C. § 2680(a). This was the issue in the principal case.

Problems regarding the interpretation of this section are not dissimilar from those that have arisen in suits against state and local governments after their abrogation of governmental immunity. In Berkovitz v. United States, 486 U.S. 531 (1988), cited in the principal case, plaintiff was a child who was left paralyzed and unable to breathe without a respirator when he contracted polio from a dose of oral polio vaccine. His parents filed suit against the manufacturer of the vaccine and against the United States alleging that the United

States (through the Office of Biologies of the Food and Drug Administration) had wrongfully licensed the manufacturer to produce the vaccine and had wrongfully approved the release of the particular lot that had injured the plaintiff. The United States moved to dismiss, invoking the discretionary function exception and arguing that it applied to all regulatory activities. Justice Marshall delivered the

743

unanimous opinion of the Court, holding that the discretionary function exception applied only to those activities that involve an element of judgment or choice and that are based on public policy considerations to further social, economic, or political goals. (This is the test being applied by the Eighth Circuit in the principal case.) Because plaintiff had alleged that the FDA had knowingly released that lot to the public without testing it for compliance with agency safety regulations, there was no discretion involved and the United States would be liable if plaintiff could prove his allegations. Justice Marshall noted that the FDA could have adopted a policy of testing only some batches and that such a decision would not be reviewable. Having made the decision to test all batches, however, the FDA had no discretion not to test each batch. See also Sanders v. U.S., 937 F.3d 316 (4th Cir. 2019) (claims arising out of Dylan Roofs shooting of nine members of a Bible Study class) (finding that the National Instant Criminal Background Check System examiner violated standard operating procedures' mandatory directives when conducting shooter's background check, and, thus, FTCA's discretionary function exception did not insulate government from

liability for failing to prevent shooter from purchasing semi-automatic pistol from federally-licensed firearms dealer).

In Young v. U.S., 769 F.3d 1047 (9th Cir. 2014), tourist was injured when she was walking on an unmarked snowfield near a visitor's center parking lot at Mount Rainier National Park. She fell through a melted spot in the snow twelve feet onto a concrete pad surrounding a generator whose heat had produced a large cavity with thin layers of snow on top. The Park Service argued that it was protected by the discretionary function exception because it had made a choice not to post warnings in the area. The court, however, found that the Park Service failed to satisfy the second part of the test--that public policy considerations to further social, economic, or political goals were involved in the making the decision because, although the government claimed it had balanced safety with access and preservation concerns, the transformer was not in an area of the park in which the agency sought to provide access, and the transformer itself actually detracted from the scenery. Compare this to Morales v. U.S., 895 F.3d 708 (9th Cir. 2018), which arose out of a crash of a helicopter that ran into an unmarked cable 100 feet over the Verde River. The claimants argued that the cable should have been marked for the safety of aircraft. The United States had based its decision on FAA regulations that required warnings at 200 feet. It also showed its decision was affected by competing safety concerns, such as the risk of confusing pilots "who expect to see obstruction markers only at higher levels," the risk to personnel tasked with installation or maintenance of the markers, the cost of installation and maintenance of the markers, particularly given the likelihood of vandalism, and the desire to minimize visual distractions to meet

"scenic integrity objectives" given the Verde River's designation as a "Wild and Scenic River" and bald eagle nesting area.

See also United States v. S.A. Empresa (Varig Airlines), 467 U.S. 797 (1984) (FAA decision to certify airplanes as airworthy without inspecting each one and only "spot-checking" them for compliance with safety standards is a discretionary function decision that cannot subject the United States to

liability); Holbrook v. U.S., 673 F.3d 341 (4th Cir. 2012) (immunity for decision to issue FAA airworthiness certificate even if discretion was abused); Irving v. United States, 162 F.3d 154 (1st Cir. 1998) (OSHA's failure to inspect machine that then injured plaintiff is within discretionary function exception to liability); In re Orthopedic Bone Screw Product Liability Litigation, 264 F.3d 344 (3d Cir. 2001) (FDA's decision to approve marketing of medical device is within discretionary function exception to sovereign immunity); Merando v. United States, 517 F.3d 160 (3d Cir. 2008) (National Park Service's determination of how to distribute its finite resources to locate and remove hazardous trees falls within discretionary function exception); Freeman v. United States, 556 F.3d 326 (5th Cir. 2009) (FEMA's decisions about when, where, and how to allocate limited resources during aftermath of Hurricane Katrina's landfall in the New Orleans area are the type of decisions that the discretionary function exception is designed to shelter from suit); In re Katrina Canal Breaches Consolidated Litigation (Robinson v. United States), 696 F.3d 436 (5th Cir. 2012) (Army Corps of Engineers' decisions concerning design and maintenance of the Mississippi River Gulf

Outlet channel are protected by discretionary function exception because those decisions were susceptible to policy considerations even though the actual reasons for the decisions were varied and sometimes unknown); and A.O. Smith Corp. v. U.S., 774 F.3d 359 (6th Cir. 2014) (Army Corps immune from suit brought by Grand Ole Opry and other property owners after thousand-year flood event because it used its discretion to balance Old Hickory dam's primary objectives: commercial navigation, hydropower, and replacement of natural valley water storage along with flood control).

B. "Any claim arising out of assault, battery, false imprisonment, false arrest, malicious prosecution, abuse of process, libel, slander, misrepresentation, deceit, or interference with contract rights: Provided, That, with regard to acts or omissions of investigative or law enforcement officers of the United States Government, the provisions of this chapter and section 1346(b) of this title shall apply to any claim arising, on or after the date of the enactment of this proviso, out of assault, battery, false imprisonment, false arrest, abuse of process, or malicious prosecution. For the purpose of this subsection, 'investigative or law enforcement officer' means any officer of the United States who is empowered by law to execute searches, to seize evidence, or to make arrests for violations of Federal law." 28 U.S.C. § 2680(h).

Do you see why the plaintiff in United States v. Lambertson, note 4, page 26, characterized his cause of action as one for negligence rather than battery when he was injured by a government meat inspector who leapt out at him, screamed "boo," pulled his wool stocking cap over his eyes, and jumped on his back?

What does "arising out of' mean? An off-duty U.S. Navy Corpsman fired rifle shots into a car passing by the hospital where he worked. Plaintiff alleged that other U.S. Naval employees knew he was intoxicated and brandishing a rifle and negligently failed to take steps to prevent the battery. Liability? See Sheridan v. United States, 487 U.S. 392 (1988) (negligence

745

claim relating to conduct of employees other than shooter did not "arise out of' battery and thus is not barred by statutory exception to waiver).

Who qualifies as an investigative or law enforcement officer? Based on the principal case, it is clear that National Park Service Rangers do. Do TSA officers? If not, a battery action against the United States based on a TSA officer's conduct would be precluded by the exception for intentional torts. If TSA officers are within that category, the battery action would be allowed. Pellegrino v. U.S., 937 F.3d 164 (3d Cir. 2019) (yes--TSA officers "are *officer[s] of the United States' by dint of their title, badge, and authority. They are 'empowered by law to execute searches' because, by statutory command and implementing regulation, they may physically examine passengers and the property they bring with them to airports").

What about health care personnel who operate on the wrong person or the wrong body part? Levin v. United States, 568 U.S. 503 (2013) (the FTCA's intentional tort exception does not apply to medical battery by military or veterans' benefits health care providers). Thus, claimant would be able to bring a medical battery claim against the United States based on a Navy doctor allegedly operating without

consent. The doctor herself would be immune under the exclusive remedy provision of the Westfall Act.

C. 28 U.S.C. § 2680(j) provides that the Federal Tort Claims Act does not apply to any "claim arising out of the combatant activities of the military or naval forces, or the Coast Guard, during time of war."

6. The Feres Doctrine, the Supreme Court has held that the FTCA does not permit recovery for claims arising out of or in the course of activity incident to any active duty service. Feres v. United States, 340 U.S. 135 (1950). The Feres Doctrine was implied by the Supreme Court based on its reading of the intent of Congress in enacting the FTCA and defining its liability by reference to the tort liability of a "private person." 28 U.S.C. § 1346(b)(1). Rationales for the doctrine include the need for uniformity of law, the health and welfare benefits provided to servicemen and their dependents, the absence of private liability in like circumstances, and the potential for disrupting military discipline. The definition of "incident to service" has been exhaustively litigated over the past fifty years. Although most of the cases involve soldiers struck by government vehicles while on varying degrees of leave, others raise interesting policy issues.

All of these have been found to be "incident to service": United States v. Stanley, 483 U.S. 669 (1987) (plaintiff injured by LSD experiment conducted by government without informing him of the risks was precluded from suit because experiments were "incident to service"); Kitowski v. United States, 931 F.2d 1526 (11th Cir. 1991) (during training exercise for Rescue Swimmer School, recruit died after being repeatedly held underwater until he became unconscious

and turned blue--no recovery because still incident to service even though egregious behavior); Minns v. United States, 155 F.3d 445 (4th Cir. 1998) (claims brought by wives and children of Gulf War veterans for birth defects allegedly caused by vaccine inoculations and exposure to various toxins dismissed because injuries had their genesis in injuries to soldiers incident to service); Ortiz v. U.S., 786 F.3d 817 (10th Cir. 2015)

746

(injury to infant claimant during birth had genesis in injury to mother, active duty service member, who was given the wrong medication during labor and delivery); Schnitzer v. Harvey, 389 F.3d 200 (D.C. Cir. 2004) (soldier injured when portion of ceiling collapsed on him while he was watching television in prison at Fort Leavenworth where he was serving a 29-year sentence for kidnapping, rape, and murder--injury suffered incident to service); and Witt v. U.S., 379 Fed.Appx. 559 (9th Cir. 2010) (medical malpractice during treatment of appendicitis in military hospital while service member on leave).

The Feres doctrine was extended to shield the government against contribution or indemnity claims brought by manufacturers of products sued by service personnel (Stencel Aero Eng'g Corp. v. United States, 431 U.S. 666 (1977), reh'g denied, 434 U.S. 882 (1977)) and to include injuries caused by non-military employees of the government (United States v. Johnson, 481 U.S. 681 (1987) (civilian employees of the FAA who guided a military helicopter into the side of a mountain)).

Shield Extended to Government Contractors? The Feres doctrine may extend its reach to shield from liability government contractors

through preemption only if, during wartime, the contractor is integrated into combatant activities over which the military retains command authority. See, for example, Harris v. Kellogg Brown & Root Services, Inc., 724 F.3d 458 (3d Cir. 2013) (claim by soldier electrocuted while showering due to faulty pump not preempted because military did not have command authority over how maintenance was performed in barracks) and In re KBR, Inc. Burn Pit Litigation, 744 F.3d 326 (4th Cir. 2014) (for MDL cases, adopting Third Circuit test enunciated in Harris and remanding to trial court to determine if contractor performing waste management and water treatment functions in combat zone was integrated into military command authority).

7. If a claimant is unsuccessful under the Federal Tort Claims Act, all is not necessarily lost. It is still possible to obtain relief by private bill. This is a difficult procedure requiring full cooperation of a Representative, plus tremendous persistence by an attorney.

(G) Tribal Sovereign Immunity

Native American Indian tribes are generally entitled to immunity just like any other sovereign. They too have waived their immunity under certain circumstances. The Supreme Court recently addressed the scope of that immunity in a case arising out of an automobile accident involving the Mohegan Tribe of Indians of Connecticut, one of its employees acting within the scope of his employment but sued in his individual capacity, and plaintiffs injured in the accident in Connecticut, not on tribal land. Driver was an employee of the tribe who was transporting patrons of the Mohegan Sun Casino to their homes when he caused an accident on Interstate 95 in Connecticut

by driving into the back of the car in which the plaintiffs were riding. Plaintiffs filed suit against only the individual driver. Driver argued that he was covered by the tribe's immunity

747

because the tribe was required, by statute, to indemnify him for any damages he was ordered to pay to plaintiffs because he was acting in the scope of his employment when his negligence occurred. Plaintiffs argued that the tribe's immunity did not protect him. (Unlike the federal and Oregon governments, the tribe had not made the action against it the exclusive remedy available to those injured.) The Supreme Court found that in a suit brought against a tribal employee in his individual capacity, the employee, not the tribe, is the real party in interest and the tribe's sovereign immunity is not implicated. Neither the fact that the employee was acting within the scope of his employment at the time the tort was committed nor the fact that the tribe was obligated to indemnify him was sufficient to bar a suit against that employee on the basis of tribal sovereign immunity. Lewis v. Clarke, 137 S.Ct. 1285 (U.S. 2017).

(H) Public Officers

Public officers may be subject to personal liability for tortious conduct committed in the course of their official duties. Claims against them may be predicated on the common law of torts, special statutes (a prime example being the Civil Rights Act of 1871, 42 U.S.C. § 1983), or a provision of the United States Constitution. See Bivens v. Six Unknown Named Agents, 403 U.S. 388 (1971), page 1306.

In each of these situations the public official may be shielded from liability if the official's conduct comes within common law official immunity--a doctrine that is separate and apart from governmental immunity. Thus, even after governmental immunity has been abolished or limited, official immunity still may protect an individual public official. Conversely, when the state has not consented to be sued on a matter, a public official may be personally liable if the conduct does not come within the immunity discussed in this section.

In addition to common law immunity, as part of legislation waiving sovereign immunity, Congress and many state legislatures have granted immunity to public employees through exclusive remedy provisions. The Federal Tort Claims Act, through the Westfall Act, provides that the remedy against the United States for negligent acts of its employees is exclusive of any remedy against the employee. 28 U.S.C. § 2679(b). See also Agnew v. Porter, 23 Ohio St.2d 18, 260 N.E.2d 830 (1970) (construing state statute that protected policemen from tort claims based on their operation of motor vehicles while responding to emergency calls) and the Oregon state statute discussed in the Clarke case in this section. Those statutes usually provide that the individual must be dismissed from the case if the Attorney General (under the FTCA) or the state equivalent certifies that the federal or state employee was operating within the scope of his employment when the injury-causing conduct occurred.

The common law immunity for public officers would appear to be based "not so much [on a] desire to protect an erring officer as *** [on] a recognition of the need of preserving independence of action, without

deterrence or intimidation by the fear of personal liability and vexatious suits." Restatement (Second) of Torts § 895D, comment b. See also the classic statement of Learned Hand, J., in Gregoire v. Biddle, 177 F.2d 579, 581 (2d Cir.1949) ("in the end [it is] better to leave unredressed the wrongs done by dishonest officers than to subject those who try to do their duty to the constant dread of retaliation.").

Legislators and judges have been granted absolute immunity for acts committed within the scope of their office even if they acted in bad faith. See, e.g., Tenney v. Brandhove, 341 U.S. 367 (1951) (legislators); Pierson v. Ray, 386 U.S. 547 (1967) (judges); Voelbel v. Town of Bridgewater, 144 N.H. 599, 747 A.2d 252 (1999) (town selectman's statements about termination of police chief made at town meeting were absolutely privileged because he was acting in legislative capacity). Some states have statutes that provide immunity to attorneys appointed to represent indigent criminal defendants. See Mooney v. Frazier, 225 W.Va. 358, 693 S.E.2d 333 (2010) (listing several). The Minnesota Supreme Court has created immunity for attorneys appointed to represent indigents, finding that the limited resources of the State to provide indigent defense should be husbanded and not spent on defending legal malpractice claims. Dziubak v. Mott, 503 N.W.2d 771 (Minn.1993).

The President of the United States is absolutely immune for acts done within the scope of his office. Nixon v. Fitzgerald, 457 U.S. 731 (1982). But presidential aides, like other federal government officials,

are entitled only to a qualified immunity. Harlow v. Fitzgerald, 457 U.S. 800 (1982).

State executive officers in some states also have the benefit of absolute immunity with regard to common law torts committed in the course of their official duties. In other states, the immunity is qualified; in some, it depends upon whether the harmful action was taken in good faith, and in others it depends on whether the official had a reasonable basis for taking the action.

When the immunity is qualified, it becomes similar in an operative sense to a "privilege," see page 701, and perhaps the major reason to preserve the label of "immunity" is to signify that it applies to negligent as well as intentional conduct.

The Civil Rights Act of 1871 (42 U.S.C. § 1983) created a civil remedy against anyone operating under color of state law to deprive someone of their federal constitutional rights. It is also sometimes known as the "Ku Klux Klan Act" because it was designed to provide a civil remedy against abuses committed by the Klan and others in the Southern states following the Civil War. At the time, state officials were not providing enforcement of federal civil rights and the courts interpreted the newly enacted statute to create tort liability. (See Chapter 19, Civil Rights.) State employees sued under § 1983 have a qualified immunity if they had acted in good faith, based on an objective test. See Harlow v. Fitzgerald, 457 U.S. 800 (1982) (adopting objective test to determine "good faith")

and Brosseau v. Haugen, 543 U.S. 194 (2004) ("Qualified immunity shields an officer from suit when she makes a decision that, even if

constitutionally deficient, reasonably misapprehends the law governing the circumstances she confronted.") A state official may be deemed to have violated § 1983 if he knew or reasonably should have known that his conduct would violate plaintiffs constitutional rights or if he took the action in bad faith. Kovacic v. Villarreal, 628 F.3d 209 (5th Cir. 2010) (official must have "fair warning" that his conduct is unconstitutional). The qualified immunity extends to private individuals temporarily retained by the government to carry out its work. Filarsky v. Delia, 566 U.S. 377 (2012) (lawyer hired to do internal investigation of firefighter's alleged fraud). Prosecutors have absolute immunity under § 1983. See Imbler v. Pachtman, 424 U.S. 409 (1976). Why should a prosecutor be distinguished from officials in the executive branch of the government?

Federal officials, unless they happen to be acting under color of state law, are not covered by § 1983 but may be sued for constitutional violations directly under the federal Constitution. (See discussion of Bivens v. Six Unknown Named Agents of Federal Bureau of Narcotics, 403 U.S. 388 (1971), at page 1306.) They too enjoy qualified immunity and also some federal employees enjoy special statutory immunity. Hui v. Castaneda, 559 U.S. 799 (U.S. 2010) (Public Health Service Act precludes Bivens actions against PHS personnel for constitutional violations arising out of their official duties.)

Official immunity is available only with respect to acts that are "discretionary" as opposed to "ministerial" in nature. This distinction, discussed in the area of governmental immunity, has not been an easy one to apply. Obviously, if the official was engaged in formulating policy at a high level in government, the conduct will be

deemed "discretionary." Comment f to Section 895D of Restatement (Second) of Torts sets forth most of the factors courts have looked to when they have attempted to classify an official's conduct as "discretionary" or "ministerial."

The doctrine of vicarious liability is not applicable in either § 1983 or Bivens actions to hold public officials liable for torts committed by lower echelon employees, at least when the official in no way personally participated in the wrongdoing. Ashcroft v. Iqbal, 556 U.S. 662, 676 (2009) ("Because vicarious liability is inapplicable to Bivens and § 1983 suits, a plaintiff must plead that each Government-official defendant, through the official's own individual actions, has violated the Constitution."). See also Carter v. Allan, 94 Idaho 190, 484 P.2d 739 (1971) (suit against mayor and city council for injuries caused by negligently constructed sidewalk dismissed--at the very least, personal participation in the alleged negligence would have to be shown).

Have you figured out that the Westfall Act does not apply to Bivens and § 1983 actions? 28 U.S.C. § 2679(b)(2). If it did, the official would not need qualified immunity.

750

See Restatement (Second) of Torts § 895D and Civil Actions Against State and Local Government, Its Divisions, Agencies, and Officers (Thomson 2d ed. 2002 with semi-annual updates).

751

CHAPTER 13 VICARIOUS LIABILITY

A is negligent; B is not; C is injured by A's negligence. By reason of some relationship between A and B, B is responsible for A's actions, although B has played no part in it, has done nothing to aid or encourage it, and in fact may have done all that he possibly could to prevent it. The result may be that B, in C's action against him, becomes liable as a defendant for C's injuries, to the same extent as if he had been negligent himself. This is sometimes called "imputed negligence." More often it is called vicarious liability or respondeat superior, which may be freely translated, "look to the person higher up." The topic is covered in depth in the course in Agency. Only highlights closely related to torts are presented in this Chapter. Finally, in some circumstances the negligence of another may be imputed to the plaintiff to deny or limit plaintiffs recovery through principles of contributory or comparative negligence.

1. Respondeat Superior

The various rules that have imputed the negligence of one person to another in order to impose vicarious liability upon him as a defendant all have one thing in common. Each has involved an effort, sometimes openly declared by the court, more often unexpressed or tacitly assumed, to find a financially responsible defendant. The plaintiff is injured; his life may be utterly ruined if he is left without compensation. The person who has injured him is, or is likely to be, unable to pay that compensation. There is another who stands in

such a relation to the wrongdoer that it is not unreasonable to make the responsibility his; and that other is more likely to be able to pay. So, without exonerating the actual wrongdoer, who remains liable to the plaintiff and will be required to indemnify the other to the extent that he is able to do so, the liability is imposed upon both.

See Tony Honoré, The Morality of Tort Law, in Philosophical Foundations of Tort Law 73, 85 (David G. Owen ed., 1995) ("The conventional reasons given for holding that the employer ought to bear the risk of loss within certain limits for the employee's harmful conduct in the course of his work are that the employer (i) has control over the business, including the work of employees, and (ii) stands to profit from the employee's services. A combination of these reasons, it is generally thought, justifies us in imposing vicarious liability on the employer. As in outcome-responsibility, the person who, in a situation of uncertainty, has a degree of control over how it will turn out, and who stands to gain if it goes in his favor, must bear the risk that it will turn out to harm another.")

In one sense this is strict liability, since the new person who is held liable is without any fault of his own and becomes liable only by reason

of his relation to the actual wrongdoer. In another it is not. The foundation of vicarious liability is still negligence or other fault on the part of someone. What the law does is to broaden the liability for that fault by imposing it upon an additional defendant who is himself without fault.

Bussard v. Minimed, Inc.

California Court of Appeal, 2003.

129 Cal.Rptr.2d 675, 105 Cal.App.4th 798.

Rubin, J. ***

[Minimed hired a pest control company to spray pesticide overnight to eliminate fleas at its facility. Around 7:00 a.m. the next day, Minimed clerical employee Irma Hernandez arrived for work and noticed a funny smell similar to "Raid." By 10 o'clock, she felt ill, with headache, nausea, and tightness in her chest. At noon, she told two supervisors she did not feel well enough to continue working and wanted to go home. One of them asked if she wanted to see the company doctor, but she declined. The other asked whether she felt well enough to drive home, and she said yes. Hernandez was one of nine workers who went home early that day feeling ill.

While on her way home, Hernandez rear-ended Barbara Bussard, who was stopped at a red light. Hernandez told the police officer who responded to the accident scene that she had felt dizzy and lightheaded before the accident. Plaintiff Bussard filed this action against Hernandez for negligent driving and against her employer, Minimed, in vicarious liability under the doctrine of respondeat superior, alleging that Hernandez was acting within the scope of her employment when she was driving home ill from pesticide exposure. Minimed moved for summary judgment. It argued the "going-and-coming" rule meant Hernandez was not within the course and scope of her employment during her commute home. Accordingly, it should not be held vicariously liable under respondeat superior doctrine.

The trial court agreed and entered summary judgment for Minimed. This appeal followed.]

Under the doctrine of respondeat superior, an employer is ordinarily liable for the injuries its employees cause others in the course of their work. Respondeat superior imposes liability whether or not the employer was itself negligent, and whether or not the employer had control of the employee. The doctrine's animating principle is that a business should absorb the costs its undertakings impose on others. ***

The doctrine's application requires that the employee be acting within the course of her employment, which case law defines expansively. ***Thus, acts necessary to the comfort, convenience, health, and welfare of the employee while at work, though strictly personal and not acts of service, do not take the employee outside the scope of employment. [C] Moreover, "where the employee is combining his own business with

753

that of his employer, or attending to both at substantially the same time, no nice inquiry will be made as to which business he was actually engaged in at the time of injury, unless it clearly appears that neither directly nor indirectly could he have been serving his employer." [Cc] It is also settled that an employer's vicarious liability may extend to willful and malicious torts of an employee as well as negligence [under certain circumstances]. [C] Finally, an employee's tortious act may be within the scope of employment even if it contravenes an express company rule and confers no benefit to the employer. [Cc]

Despite the doctrine's wide reach, courts have not defined it so broadly as to include an employee's daily commute. "Case law has established the general rule that an employee is outside the scope of his employment while engaged in his ordinary commute to and from his place of work. [C] This principle is known as the 'going-and-coming rule' and is based on several theories. One is that the employment relationship is suspended from the time the employee leaves his job until he returns. Another is that during the commute, the employee is not rendering services to his employer." [Cc]

The going-and-coming rule is not ironclad, however, and allows for several exceptions. One exception applies when an employee endangers others with a risk arising from or related to work. ***

This... has been applied to employees who got into car accidents on the way home after drinking alcohol at work. Courts have found a sufficient link between the drinking and the accidents to make the collisions neither startling nor unusual, and thus foreseeable under respondeat superior. ***

Hence, the trial court erred in finding the going-and-coming rule barred appellant's claim of respondeat superior. Indeed, the going-and- coming rule was an analytical distraction. The thrust of appellant's claim for vicarious liability was that Hernandez was an "instrumentality of danger" because of what had happened to her at work. [C] Although Hernandez's decision to drive home gave respondent an opening to raise the going-and-coming rule, the rule did not apply because her decision was a fortuity that must not obscure appellant's central claim that Hernandez's job had

contributed to the accident. Thus, summary judgment for respondent was improper.

Respondent ***points to the absence of evidence that it contributed in any negligent manner to the underlying pesticide exposure. It also cites the uncontested fact that its supervisors diligently inquired into Hernandez's ability to drive before she went home. Respondent contrasts its seeming blamelessness with decisions [in other cases] imposing vicarious liability for drunken employees, suggesting liability attached to the employer in those decisions in part because the employer bore some responsibility for the employee's intoxication. Whatever merit respondent's argument might have in defeating appellant's theory that

754

respondent was directly liable to her for ordinary negligence--a theory... [not here addressed]--it does not apply to vicarious liability. ***

The judgment is reversed and the court is directed to enter a new and different order denying respondent Minimed, Inc.'s motion for summary judgment. Appellant to recover her costs on appeal.

Cooper, P. J., and Boland, J., concurred.

O'Shea v. Welch

United States Court of Appeals, Tenth Circuit, 2003.

350 F.3d 1101.

McKay, Circuit Judge. ***

[Mr. Welch, an Osco store manager, was driving from his store to the Osco District Office to deliver Kansas City Chiefs football tickets that had been obtained from a vendor to pass out among Osco managers. During his drive, Mr. Welch made a spur of the moment decision to pull into a service station for an estimate on some work he needed done on his car, striking O'Shea's car as he turned left in front of it. O'Shea filed suit against Welch for negligence in failing to yield and against his employer Osco in vicarious liability. On cross-motions for summary judgment, the district court held that no reasonable jury could conclude that Mr. Welch was acting within the scope of his employment. The district court did not specifically decide whether the trip to the District Office to deliver the football tickets was within Mr. Welch's scope of employment because it found that even if the trip had been within the scope of Mr. Welch's employment, the stop at the service station was not.]

Pursuant to Kansas law, an employer is only liable for injuries caused by an employee acting within the scope of his employment. [C] The following Kansas jury instruction is an accurate illustration of Kansas scope of employment law: "An employee is acting within the scope of [his employment] when [he] is performing services for which [he] has been [employed], or when [he] is doing anything which is reasonably incidental to [his employment]. The test is not necessarily whether this specific conduct was expressly authorized or forbidden by the employer [ ], but whether such conduct should have been fairly foreseen from the nature of the [employment] and the duties relating to it." [C] Unfortunately, there are no Kansas cases directly on point to help define the parameters of Kansas law. Therefore, in its grant of summary judgment for Osco, the district court relied

substantially on two cases from other jurisdictions. ***[The court described those two cases and concluded that their facts were not close enough to provide much guidance.]

Due to the absence of binding authority, Appellant urges us to decide that Kansas would adopt the "slight deviation" rule which it already follows in worker's compensation cases. Approximately half of the states... have applied some form of the slight deviation analysis in third-party

755

liability cases. [C] Pursuant to this analysis, "it must be determined whether the employee was on a frolic or a detour; the latter is a deviation that is sufficiently related to the employment to fall within its scope, while the former is the pursuit of the employee's personal business as a substantial deviation from or an abandonment of the employment. If an employee wholly abandons, even temporarily, the employer's business for personal reasons, the act is not within the scope of employment, and the employer is not liable under respondeat superior for the employee's conduct during that lapse. A diversion from the strict performance of a task is not an abandonment of responsibility and service to an employer, unless the very character of the diversion severs the employment relationship. Acts that are necessary to the comfort, convenience, health, and welfare of the employee while at work are not outside the scope of employment, if the conduct is not a substantial deviation from the duties of employment." [C] Personal acts that are not far removed in time, distance, or purpose are deemed to be incidental to the employment. See, e.g., Restatement (Second) of Agency § 237

(1958). Our research has not revealed a single jurisdiction that has considered and rejected slight deviation analysis in third-party liability cases. Kansas has not had the occasion to consider the slight deviation analysis in such cases. However, it has adopted the analysis in worker's compensation cases. ***[The Court concludes that Kansas would use the slight deviation analysis in third-party liability cases like this one.]

Mindful of the volume of authority which indicates that scope of employment is generally a jury question, we turn to the parameters of slight deviation analysis. ***Dual purpose ventures may be considered within the scope of an employee's employment. [C]

Appellant argues that Mr. Welch was acting within the scope of his employment and made only a slight deviation from his business-related trip at the time the accident occurred. Several factors have been identified as helpful in determining whether an employee has embarked on a slight or substantial deviation. They include: (1) the employee's intent; (2) the nature, time, and place of the deviation; (3) the time consumed in the deviation; (4) the work for which the employee was hired; (5) the incidental acts reasonably expected by the employer; and (6) the freedom allowed the employee in performing his job responsibilities. [C]

Applying these factors to our case, and viewing the facts in a light most favorable to Appellant, Mr. Welch intended to get an estimate for non-emergency maintenance on a car used for business. In terms of purpose, it was maintenance to a vehicle used regularly in performing his job duties for Osco. While his stop was not for emergency maintenance for his car, his stop for routine maintenance

on a car used for business purposes could be considered enough of a mixed purpose by a jury to keep him within the scope of his employment with Osco.

756

In terms of time and place, the accident occurred minutes and feet from the direct route to Osco's District Office. Mr. Welch was simply attempting to turn from the most direct route into a service station right off the main road. At the time of the accident, he had not entered the service station. He was technically still on the road en route to the District Office. Because the accident occurred on this road, not at the service station, a jury could decide that Mr. Welch had not yet abandoned his employment for a personal errand at the time of the accident. It is unclear how long the estimate would have taken. However, we do know that if he had deviated at the time of the accident, the length of the deviation was only a few minutes or less. Mr. Welch was an Osco store manager. A jury could find that an employee in a managerial position was given some freedom to attend to certain personal needs throughout the day. It is possible that Osco reasonably expected certain incidental acts to take place, especially when a store manager was en route from one store to another or from a store to the District Office. ***

Assuming without deciding that Mr. Welch was acting within the scope of his employment in delivering the [football] tickets to the District Office, we hold that a reasonable jury could conclude that he was acting within the scope of his employment when he attempted to turn into the service station. ***

The district court did not specifically decide whether Mr. Welch was in the scope of his employment in making the trip from his store to the District Office. It stated: "[W]hile the court would conclude from the record that genuine issues of material fact exist with respect to whether defendant Welch's delivery of the Chiefs tickets was within the scope of his employment, the court need not address this issue because it concludes that, as a matter of law, defendant Welch's attempted stop at the service station for routine vehicle maintenance was outside the scope of his employment." [C] We agree with the district court that summary judgment is inappropriate on this issue. Therefore, this issue must be remanded for trial as well. ***

NOTES AND QUESTIONS

1. A prime example of vicarious liability is the doctrine of respondeat superior as discussed in the two principal cases. It is triggered by the employee acting "within the scope of his employment." There have been literally thousands of cases exploring this issue.

As the first principal case notes, an employee's commuting to and from work is generally not considered within the scope of his employment. See also O'Toole v. Carr, 175 N.J. 421, 815 A.2d 471 (2003) (law firm partner who was driving from office to part-time job as municipal judge did not subject law firm to liability) and cf. Bartolomucci v. Federal Ins. Co., 770 S.E.2d 451 (Va. 2015) (thinking about client matters with blackberry in reach does not turn lawyer's commute into work-related activity).

As the second principal case notes, the court often must determine whether the employee was on a frolic (abandonment of employer's

business while in pursuit of employee's own personal business) or a detour (slight deviation from employer's own business for employee's own reasons). The phrase was first uttered by Baron Parke in Joel v. Morrison, [1834] 6 C. & P. 501, 172 Eng.Rep. 1338 and provides a colorful label for the sorting between no liability and liability. This sorting is almost always done by the jury. Mauk v. Wright, 367 F.Supp. 961 (M.D.Pa.1973) (football player on his own "free time" during training camp could still be deemed within the scope of employment when he caused car accident); Edgewater Motels, Inc. v. Gatzke, 277 N.W.2d 11 (Minn. 1979) (employee's negligent handling of cigarette while filling out his expense report in his hotel room found by jury to be within scope); Valdiviez v. United States, 884 F.2d 196 (5th Cir.1989) (serviceman who donated blood that contained the AIDS virus while on duty was not acting in the scope of his employment and thus his employer, the United States, was not vicariously liable to the patient who contracted AIDS from a transfusion of the blood).

Note that both principal cases consider similar cases from the related field of worker compensation coverage, where the court is also tasked with deciding whether a worker was acting within the scope of his employment in order to determine whether the worker can obtain worker compensation benefits if it is the worker who was injured. Although those cases have similar fact patterns, they are not always helpful to the court because the doctrines have different goals. See, for example, Teurlings v. Larson, 320 P.3d 1224, 1233 (Idaho 2014) ("Our decision not to borrow this concept [the coming and going rule and its exceptions from worker compensation cases] is based upon the different goals of workers' compensation and the

doctrine of respondeat superior. A liberal interpretation of the scope of employment in workers' compensation cases is warranted in order to ensure certain recovery for injured workers, regardless of fault. [C] There is no such tradition of a liberal approach to course and scope questions when considering application of respondeat superior in order to impose tort liability onto an employer.").

2. Courts have long agreed that the employer cannot insulate himself from liability by imposing safety rules or by instructing his employees to proceed carefully--no matter how specific and detailed his orders may be. See Limpus v. London Gen. Omnibus Co., 1 H. & C. 526, 158 Eng.Rep. 993 (1862) (omnibus owner who had instructed driver to "drive his horses at a steady pace" and "not on any account to race with or obstruct another omnibus" was nonetheless liable when driver ignored those instructions, thereby injuring driver of another omnibus); Cosgrove v. Ogden, 49 N.Y. 255 (1872) (owner of lumber yard who had told employee not to pile lumber in street was nonetheless liable when employee did and pile fell on six-year-old boy, severely injuring him).

3. Vicarious Liability for Intentional Torts (Compensatory Damages). Respondeat superior is not limited to negligent torts. An employer may be held liable for the intentional torts of his employee when the intentional acts are reasonably connected with the employment and so within its "scope."

758

Thus the employer may be liable for assault and battery on the part of an employee trying to collect a debt, because the employee is acting in furtherance of the employer's business; and the same may

be true of false imprisonment, malicious prosecution, defamation, deceit or intentional infliction of emotional distress. See Chuy v. Philadelphia Eagles Football Club, 595 F.2d 1265 (3d Cir.1979) (applying Pennsylvania law). But when the employee acts from purely personal motives, as for example out of a desire to revenge the seduction of his wife, or in a quarrel in no way connected with the employer's interests, he is considered to have departed from his employment and the employer is not liable.

Generally, whether an intentional tort is within the scope of employment is a question for the jury. What should be the result:

When a professional baseball pitcher intentionally "beans" a heckling spectator? Manning v. Grimsley, 643 F.2d 20 (1st Cir.1981) (applying Massachusetts law) (whether Orioles could be vicariously liable depended on whether jury found that pitcher acted against hecklers out of personal offense or because hecklers were interfering with his ability to do his job).

When the head cook in the kitchen of a restaurant throws hot oil at the under cook, hitting both the under cook and a policeman who had been called to the scene to break up the fight? Yamaguchi v. Harnsmut, 130 Cal.Rptr.2d 706, 106 Cal.App.4th 472 (2003) (jury question).

When a gas station attendant shoots a customer who refused to pay cash? Jefferson v. Rose Oil Co. of Dixie, 232 So.2d 895 (La.App.1970) (jury question even though attendant had not been authorized to collect payment by force).

When a minister sexually assaults a parishioner? Compare Byrd v. Faber, 57 Ohio St.3d 56, 565 N.E.2d 584 (1991) (not in furtherance

as a matter of law) and Gibson v. Brewer, 952 S.W.2d 239 (Mo. 1997) ("intentional sexual misconduct and intentional infliction of emotional distress are not within the scope of employment of a priest") with Mullen v. Horton, 46 Conn.App. 759, 700 A.2d 1377 (1997) (reversing trial court's grant of summary judgment in favor of religious order in case involving consensual sexual relations between priest/psychologist and parishioner/patient: trier of fact could reasonably determine that sexual relationship with the plaintiff was an unauthorized, unethical, tortious method of pastoral counseling, but not an abandonment of church business).

When a health care provider sexually assaults a patient during treatment? Lisa M. v. Henry Mayo Newhall Mem. Hosp., 12 Cal.4th 291, 907 P.2d 358, 48 Cal.Rptr.2d 510 (1995) (hospital may have set the stage, but the script was entirely his own) and Porter v. Harshfield, 329 Ark. 130, 948 S.W.2d 83 (1997) (outside scope).

When a police officer sexually assaults an intoxicated woman in his custody? Cox v. Evansville Police Dept., 107 N.E.3d 453 (Ind. 2018) (because employer-conferred power and authority carry an inherent risk of abuse, question of fact for jury whether assault was within scope of activity city would be vicariously liable for).

759

When the college debate coach kills one of his students with multiple stab wounds? Copeland v. Samford University, 686 So.2d 190 (Ala. 1996) (even if debate coach was on university's business at beginning of confrontation over student's performance at practice, murder is a major deviation for which university is not responsible).

When a nurse, who learned through her employment at a doctor's office that an acquaintance of her teenage daughter's had genital herpes reveals this to her teenage daughter and the daughter tells all their friends? Jones v. Baisch, 40 F.3d 252 (8th Cir. 1994) (applying Nebraska law) (outside scope) and Doe v. Guthrie Clinic, Ltd., 22 N.Y.3d 480, 5 N.E.3d 578 (2014) (no vicarious liability for unauthorized disclosure of confidential patient records by nurse because she was acting for purely personal reasons--warning her sister-in-law that her boyfriend was being treated for an STD).

When a daycare worker strikes a baby's head against a cubby to stop her from crying? Baker v. St. Francis Hosp., 126 P.3d 602 (Okla. 2005) (jury question whether daycare worker was serving her own personal needs or trying to quiet baby as part of her job, even though in a wrongful manner).

Whether an employer is vicariously liable for the reckless driving of its employee depends on the circumstances. Gowens v. Barstow, 364 P.3d 644 (OK 2015) (paramedic's speeding in emergency vehicle was reckless and unreasonable but not so extreme as to take him outside the scope of his employment).

4. Vicarious Liability for Intentional Torts (Punitive Damages). Most courts follow the position of the Restatement (Second) of Torts § 909 (1979) that the principal (whether an individual or corporation) is liable for punitive damages only if the principal authorized or ratified the act, was reckless in employing or retaining the agent, or the agent was employed in a managerial capacity and was acting in the scope of employment. See also College Hospital, Inc. v. Superior Court, 8 Cal.4th 704, 882 P.2d 894, 34 Cal.Rptr.2d 898 (1994)

(punitive damages against employer only available if employer was guilty of malice) and Chapter 10, note 11, page 628.

5. Distinguish Negligence in Hiring or Retention or Training of Employee. To be distinguished from the vicarious liability cases are cases in which the employer is liable for its own negligence in hiring or retaining an employee without adequately checking the employee's background or failing to properly train the employee. Suppose a discotheque retains an employee who had previously shot a patron. Later the employee shoots another patron. Should the discotheque be liable? See Freeman v. Bell, 366 So.2d 197 (La.App.1978) (employer liable because he knew of employee's propensity for violence). Some jurisdictions do not permit a separate claim for the employer's own negligence if the employer has admitted it would be vicariously liable for the employee's negligence. Ferrer v. Okbamicael, 390 P.3d 836 (Colo. 2015) (adopting view, sometimes known as "McHaffie" rule based on the case of McHaffie v. Bunch, 891 S.W.2d 822 (Mo. 1995)); Sedam v. 2JR Pizza Enterprises, LLC, 84 N.E.3d 1174 (Ind. 2017) (employer's admission that an employee was acting within the course and scope of his employment precludes negligent hiring claims); and Bogdanski v. Budzik,

408 P.3d 1156 (Wyo. 2018) (adopting McHaffie rule). But see Fox v. Mize, 428 P.3d 314 (Okla. 2018) (employer's stipulation that an accident occurred during the course and scope of employment does not bar a negligent entrustment claim).

6. The search for the deep pocket can be crucial to plaintiff's recovery of compensation. Would it be legal malpractice not to join the employer and only file against the employee? Hand v. Howell, Sarto & Howell, 131 So.3d 599 (Ala. 2013) (failure to name alleged tortfeasor's corporate employer not legal malpractice where, as here, tortfeasor's insurance was adequate to cover settlement; rejecting plaintiffs argument that he might have obtained a higher settlement or a higher award from jury if the corporate employer had been named).

7. The vicariously liable master, principal, or employer can seek indemnity from the servant, agent, or employee. An indemnity award, of course, will only be collectable if the servant, agent, or employee has assets or liability insurance of his own. See pages 441--450.

2. Independent Contractors

Murrell v. Goertz

Court of Appeals of Oklahoma, 1979.

597 P.2d 1223.

REYNOLDS, Judge. Mrs. C.L. Murrell, plaintiff in the trial court, appeals the order sustaining the motion for summary judgment in favor of codefendant Oklahoma Publishing Company (appellee), in a suit for damages resulting from an alleged assault and battery by co-defendant Bruce Goertz.

On August 27, 1976, Bruce Goertz was making monthly collections for the delivery of appellant's morning newspaper, the Daily Oklahoman, which is published by appellee. Appellant questioned

Goertz concerning damage to appellant's screen door caused by the newspaper carrier throwing the newspaper into it. An argument ensued culminating in appellant slapping Goertz who in turn struck appellant. As a result thereof, appellant was allegedly injured, requiring medical treatment and subsequent hospitalization. Appellant filed suit in the District Court of Oklahoma County seeking a total of $52,500 for past and future medical expenses, pain and suffering, and exemplary damages.

Appellant's petition contends that Goertz was a servant of appellee either by agreement between the co-defendants, or by appellee creating the apparent belief in appellant that Goertz was a servant by allowing Goertz to deliver the paper, advertise that product, and to collect for accounts due. Both appellee and Goertz answered denying that Goertz was appellee's servant. ***[Those who enter into a contract to have work performed are not vicariously responsible for the tortious acts of their independent contractors.]

761

The line of demarcation between an independent contractor and a servant is not clearly drawn. An independent contractor is one who engaged to perform a certain service for another according to his own methods and manner, free from control and direction of his employer in all matters connected with the performance of the service except as to the result thereof. [C] The parties agree that the decisive test for determining whether a person is an employee or an independent contractor is the right to control the physical details of the work. [C] ***

Appellant contends that the distribution of papers and the collection of money therefor is an integral part of appellee's business. Appellant cites the following factors as indicative of the high degree of control appellee possesses over the physical details of the work: ultimate control over the territorial boundaries of Goertz's route; appellee set a standard policy that paper deliveries be completed by 6 a.m.; appellee set policy that all papers were to be held by rubber bands; customers who were missed by the carrier called appellee to report it; complaints concerning the service were lodged with appellee; and new subscribers called appellee to initiate newspaper service.

Appellee submits that the affidavit of Russell Westbrook and Goertz's deposition reveal that Goertz had no contact with appellee. Westbrook stated that he was an independent newspaper distributor for appellee and that he employed Bruce Goertz as an independent carrier salesman. Westbrook further stated that Goertz was responsible only to him for the delivery of the newspapers and was in no way under the supervision, dominion, and control of appellee. By the terms of Westbrook's contract, he was an independent contractor and likewise not subject to the supervision, dominion, and control of appellee as to the manner and method of performing his job. Appellee further cites the statements of Westbrook and Goertz that Goertz was collecting money for Westbrook at the time of the incident with appellant, and that appellee received money only from Westbrook.

From a review of the record we conclude that the evidence is reasonably susceptible of but one inference. Bruce Goertz was hired as an independent carrier salesman by his friend Russell Westbrook,

who was himself an independent contractor. Appellee had no input into the decision to hire Goertz and had no knowledge of his employment. Goertz had no direct contract with appellee in his business operations. While appellee established certain policies and standards to which all distributors and carriers were to adhere, such policies and standards do not rise to that level of supervision, dominion, and control over Goertz's day to day activities as to make him appellee's servant.

Affirmed.

762

NOTES AND QUESTIONS

1. According to a "general rule" that developed both in English and American law, one who arranges for work to be done by an independent contractor is not vicariously liable for the contractor's torts. The distinction between a servant or employee and an independent contractor has been said to lie in the fact that the latter does the work on his own time, in his own way, and under no one's directions but his own, so that the one who selected the contractor has no control or right of control over the manner in which it is done. It is therefore to be regarded as the contractor's own enterprise, and he, rather than the one who retained his services, is the proper party to be charged with the risk. Also, no doubt, there is in the picture, although not often expressed, the fact that, taken as a class, independent contractors are in the main financially responsible parties, at least to a far greater extent than employees, and thus there is less need to look for a deeper pocket. Is that true of the average Uber or Lyft driver? Do you see why plaintiffs injured by the

drivers are attempting to persuade the courts that the drivers should be treated as employees rather than independent contractors? How will the common law change in response to the gig economy?

2. Should the state be vicariously liable for the actions of foster parents when a foster child is injured due to the negligence of the foster parents? Mitzner v. State, 257 Kan. 258, 891 P.2d 435 (1995) (foster parents are independent contractors and state is not liable). Should the state be vicariously liable for the medical malpractice of those with whom it arranged to provide medical care to prisoners? Herbert v. District of Columbia, 716 A.2d 196 (D.C.App.1998) (state not liable for actions of independent contractors). Should a hospital be vicariously liable for the negligent acts of a radiologist, an independent contractor permitted to practice at the hospital? Estates of Milliron v. Francke, 243 Mont. 200, 793 P.2d 824 (1990) (no liability for independent contractor). Should a cruise ship be liable for the medical malpractice of the ship's doctor? Carnival Corp. v. Carlisle, 953 So.2d 461 (Fla. 2007) (applying maritime law) (no liability because no control over independent doctor's actions).

3. The "general rule" remains. But many exceptional situations have been recognized in which vicarious liability is imposed. The next principal case discusses one of those exceptions.

Maloney v. Rath

Supreme Court of California, 1968.

69 Cal.2d 442, 445 P.2d 513, 71 Cal.Rptr. 897.

[Defendant's automobile collided with a car driven by plaintiff because defendant's brakes failed. The trial court found that

defendant had no reason to know the brakes were defective. Three months prior to the accident, defendant had her brakes overhauled by a mechanic, Peter Evanchik. The trial court determined that Evanchik's negligent repair was the cause of the accident and rendered a judgment in favor of defendant. Plaintiff appealed.

763

The Supreme Court of California first stated that it would not hold a motorist strictly liable for damage caused by brake failure. Although the state vehicle code required that brakes be maintained "in good working order," a failure to comply could be excused by the owner's exercise of "ordinary prudence," and the court found that defendant had met that standard of care. It then discussed the question of whether defendant vehicle owner could delegate the responsibility of making a brake repair to an independent contractor.]

TRAYNOR, Justice. ***Unlike strict liability, a nondelegable duty operates, not as a substitute for liability based on negligence, but to assure that when a negligently caused harm occurs, the injured party will be compensated by the person whose activity caused the harm and who may therefore properly be held liable for the negligence of his agent, whether his agent was an employee or an independent contractor. To the extent that recognition of nondelegable duties tends to insure that there will be [a] financially responsible defendant available to compensate for the negligent harms caused by that defendant's activity, it ameliorates the need for strict liability to secure compensation. ***

[W]e have found nondelegable duties in a wide variety of situations and have recognized that the rules set forth in the Restatement of

Torts with respect to such duties are generally in accord with California law. Such duties include those imposed by a public authority as a condition of granting a franchise [cc], the duty of a condemning agent to protect a severed parcel from damage [c], the duty of a general contractor to construct a building safely [c], the duty to exercise due care when an " ***independent contractor is employed to do work which the employer should recognize as necessarily creating a condition involving an unreasonable risk of bodily harm to others unless special precautions are taken" [cc], the duty of landowners to maintain their property in a reasonably safe condition [cc], and to comply with applicable safety ordinances [cc], and the duty of employers and suppliers to comply with the safety provisions of the Labor Code [cc].

Restatement (Second) of Torts § 423 provides that "One who carries on an activity which threatens a grave risk of serious bodily harm or death unless the instrumentalities used are carefully ***maintained, and who employs an independent contractor to ***maintain such instrumentalities, is subject to the same liability for physical harm caused by the negligence of the contractor in ***maintaining such instrumentalities as though the employer had himself done the work of ***maintenance." Section 424 provides that "One who by statute or by administrative regulation is under a duty to provide specified safeguards or precautions for the safety of others is subject to liability to the others for whose protection the duty is imposed for harm caused by the failure of a contractor employed by him to provide such safeguards or precautions." Both of these sections point to a nondelegable duty in this case. The statutory provisions regulating the maintenance and

equipment of automobiles constitute express legislative recognition of the fact that improperly maintained motor vehicles threaten "a grave risk of serious bodily harm or death." The responsibility for minimizing that risk or compensating for the failure to do so properly rests with the person who owns and operates the vehicle. He is the party primarily to be benefitted by its use; he selects the contractor and is free to insist upon one who is financially responsible and to demand indemnity from him; the cost of his liability insurance that distributes the risk is properly attributable to his activities; and the discharge of the duty to exercise reasonable care in the maintenance of his vehicle is of the utmost importance to the public.

In the present case it is undisputed that the accident was caused by a failure of defendant's brakes that resulted from her independent contractor's negligence in overhauling or in thereafter inspecting the brakes. Since her duty to maintain her brakes in compliance with the provisions of the Vehicle Code is nondelegable, the fact that the brake failure was the result of her independent contractor's negligence is no defense.

The judgment and the order denying the [plaintiffs] motion for judgment notwithstanding the verdict on the issue of liability are reversed and the case is remanded to the trial court for a new trial on the issue of damages only.

NOTES AND QUESTIONS

1. How does the imposition of liability on the theory of a nondelegable duty differ from strict liability?

2. There are several common situations where retaining an independent contractor will not insulate the party from vicarious liability:

A. Nondelegable Duties. There are certain responsibilities that courts will not permit to be delegated to an independent contractor. Or rather, the duty can be delegated to another (the car mechanic) but the responsibility for a negligent failure remains with the owner. Maloney contains a broad, but not totally complete, list of examples. There is no obvious criterion by which it can be determined whether a duty is "delegable" or not. In the last analysis, the cases represent ad hoc decisions that, as a matter of public policy, one cannot avoid particular responsibilities by retaining someone else to discharge them, because of the importance of the duty.

Compare Rodriguez v. Kroger Co., 422 P.3d 815 (Utah 2018) (in slip and fall case, grocery store had nondelegable duty to keep its premises reasonably safe for customers and is therefore liable for the wet spot on floor left there by overnight independent contractor cleaning crew); Westby v. Itasca County, 290 N.W.2d 437 (Minn. 1980) (county vicariously liable for an independent contractor's failure to clear the road of mud from an exploded beaver dam); Miller v. Martin, 838 So.2d 761 (La. 2003) (state vicariously liable for abuse inflicted upon children by foster parents because Department of Social Services' custodial duty is nondelegable); Jackson v. Power, 743

765

P.2d 1376 (Alaska 1987) (general acute care hospital's duty to provide emergency room care nondelegable and therefore facility

liable for actions of independent physician in emergency room) with I.H. v. County of Lehigh, 610 F.3d 797 (3d. Cir. 2010) (applying Pennsylvania law) (foster care agency not vicariously liable for negligent driving of foster father because he was an independent contractor and the agency's duty did not fall into the nondelegable duty exception); Baptist Memorial Hospital System v. Sampson, 969 S.W.2d 945 (Tex.1998) (declining invitation of court of appeals to find a nondelegable duty for hospital emergency room) and Bain v. Colbert Cty. NW Alabama HCA, 233 So.3d 945 (Ala. 2017) (same); Broussard v. United States, 989 F.2d 171 (5th Cir. 1993) (in FTCA case, hospital not liable for actions of emergency room physicians who were independent contractors); Estates of Milliron v. Francke, 243 Mont. 200, 793 P.2d 824 (1990) (no nondelegable duty to provide radiology services); Fletcher v. South Peninsula Hosp., 71 P.3d 833 (Alaska 2003) (declining to extend nondelegable duty for emergency room to operating room); and Arizona v. Hicks, 219 Ariz. 328, 198 P.3d 1200 (2009) (state's duty to provide indigent criminal defendant with competent counsel was met when competent counsel was appointed; no vicarious liability under non-delegable duty doctrine for alleged malpractice of court-appointed attorney).

Can the independent contractor surgeon delegate the duty to keep track of the sponges used during surgery (to make sure none gets left in patient) to the surgical nurse employed by hospital? Thompson v. Baptist Mem. Hosp., 247 So.3d 229 (Miss. 2018) (surgeon's duty to account for all sponges is nondelegable).

B. Apparent Authority. One who expressly or impliedly represents that another party is his servant or agent may be held vicariously liable for the latter's negligent acts to the extent of that

representation. This result may occur even though the negligent party is an independent contractor or even when there is no employment or contractual relationship whatsoever between the negligent actor and the party making the representation.

This theory, variously called apparent authority, apparent agency, or agency by estoppel, allows an injured party who reasonably relies on the representation to hold the party who made the misrepresentation liable. The theory has sometimes been utilized to hold franchisors vicariously liable for the negligent conduct of their independent contractor franchisees. See Singleton v. International Dairy Queen, Inc., 332 A.2d 160 (Del. 1975); Wood v. Holiday Inns, Inc., 508 F.2d 167 (5th Cir. 1975); and Gizzi v. Texaco, Inc., 437 F.2d 308 (3d Cir.), cert, denied, 404 U.S. 829 (1971) (Texaco's advertising and other representations sufficient for a jury to determine that the company had vested "apparent authority" in a dealer who sold a van on his own behalf). But see O'Banner v. McDonald's Corp., 173 III.2d 208, 670 N.E.2d 632 (1996) (customer who was injured in slip and fall accident in restroom did not show the justifiable reliance necessary to hold franchisor liable through apparent agency) and Patterson v. Domino's Pizza, LLC, 60 Cal.4th 474, 177 Cal.Rptr.3d 539, 333 P.3d 723 (2014) (no showing franchisor controlled day-to-day decisions).

766

The theory also has been applied in cases holding hospitals vicariously liable for the medical malpractice of independent physicians practicing medicine on their premises. See, e.g., Seneris v. Haas, 45 Cal.2d 811, 291 P.2d 915 (1955) ("record reveals defendant did nothing to put [patient] on notice that the X-ray

laboratory was not an integral part of the institution, and it cannot seriously be contended that [patient] should have inquired whether the individual actors who examined him were [hospital's] employees"); Clark v. Southview Hosp. & Family Health Ctr., 68 Ohio St.3d 435, 444, 628 N.E.2d 46, 53 (1994) ("A hospital may be held liable under the doctrine of agency by estoppel for the negligence of independent medical practitioners practicing in the hospital if it holds itself out to the public as a provider of medical services and in the absence of notice or knowledge to the contrary, the patient looks to the hospital, as opposed to the individual practitioner, to provide competent medical care."); and York v. Rush- Presbyterian-St. Luke's Medical Ctr., 222 III.2d 147, 854 N.E.2d 635 (2006) (hospital liable for independent anesthesiologist's malpractice because consent form did not disclose he was not employee of hospital, hospital employee assigned him to operating room, he wore scrubs and lab coat with hospital insignia on them, and he did not inform patient that he was independent).

The reliance must be a reasonable one. Simmons v. Tuomey Regional Med. Ctr., 341 S.C. 32, 533 S.E.2d 312 (2000) (cannot use doctrine if patient is treated in emergency room by patient's own physician or where patient is admitted to hospital by private, independent physician with staff privileges at hospital); Baptist Memorial Hospital System v. Sampson, 969 S.W.2d 945 (Tex. 1998) (emergency room patient failed to establish the reasonable reliance required for apparent authority because written consent form signed by patient before treatment explained that ER physicians were independent contractors and not employees of hospital); Bain v. Colbert Cty. NW Alabama HCA, 233 So.3d 945 (Ala. 2017) (patient

has burden of showing that principal (hospital) held itself out as employing only its own doctors in emergency room); and Green v. Pennsylvania Hosp., 633 Pa. 18, 123 A.3d 310 (2015) (when a hospital patient experiences an acute medical emergency (blocked tracheotomy) and attending nurse issues an emergency page for additional help, it is more than reasonable for the patient, who is in the throes of medical distress, to believe that such emergency care is being rendered by the hospital or its agents).

It also has been applied to hold a cruise line liable for the medical malpractice of an onboard nurse and doctor. Franza v. Royal Caribbean Cruises, Ltd., 772 F.3d 1225 (11th Cir. 2014) (applying maritime law) (ship doctor and nurse wore same uniform as rest of crew, doctor was introduced as a ship Officer, marketing materials described infirmary as staffed by cruise line crew, and patient was billed by cruise line for services of infirmary personnel).

C. Inherently Dangerous Activities or Peculiar Risk of Harm. Originally this came from Bower v. Peate, [1876] 1 Q.B.D. 321, where the foundation of plaintiff's building was undermined by an excavation. It is not limited to activities (such as blasting) that involve an extraordinarily high

degree of danger and are thus classified as "abnormally dangerous" for the purposes of imposing strict liability on the actor. See Chapter 14. Rather, the exception is applicable when the activity involves a peculiar risk of harm that calls for more than ordinary precaution.

This exception has been applied, for example, where a contractor was engaged to transport giant logs, six feet in diameter, over the

highway, where an obvious special danger arises unless the logs are properly anchored and secured. Risley v. Lenwell, 129 Cal.App.2d 608, 277 P.2d 897 (1954). To fly a small private plane to a meeting in western Colorado. Huddleston v. Union Rural Electric Assn., 841 P.2d 282 (Colo. 1992). To spray a potent herbicide capable of killing oak, birch, poplar, and maple trees. Brandenburg v. Briarwood Forestry Servs., LLC, 354 Wis.2d 413, 847 N.W.2d 395 (2014). To provide security to a manufacturing plant with armed guards. Pusey v. Bator, 94 Ohio St.3d 275, 762 N.E.2d 968 (2002). To transport prisoners from Florida to Montana in a van. Paull v. Park County, 352 Mont. 465, 218 P.3d 1198 (2009). To the apprehension of fugitives by independent contractors retained by defendant bail bondsman. Stout v. Warren, 176 Wash.2d 263, 290 P.3d 972 (2012). To sell ice cream to small children from an ice cream vending truck on a busy street. Wilson v. Good Humor Corp., 757 F.2d 1293 (D.C.Cir.1985). Under those circumstances, those injured by the contractor's negligence would be able to recover through vicarious liability from the person who hired the contractor.

Suppose homeowner hired a roofing contractor to replace the roof on his home and a passerby was injured when the contractor's employee negligently dropped hot tar from the roof. The passerby would be able to sue the homeowner through this exception to the rule that homeowner is not liable for the actions of independent contractors. But what if the person injured is the roofer's own employee rather than a bystander? Privette v. Superior Court, 5 Cal.4th 689, 854 P.2d 721, 21 Cal.Rptr.2d 72 (1993) (exception not available for contractor's employee--no vicarious liability).

Negligence Collateral to Risk. The exception for inherently dangerous activities does not apply when the independent contractor's negligence is deemed "collateral" to the inherent risk of the activity: in other words, not recognizable in advance as particularly likely to occur or as calling for special precaution.

D. "Illegal Activities. " One who contracts for performance of an illegal act is vicariously liable for any damage even if the agent is an independent contractor. See King v. Loessin, 572 S.W.2d 87 (Tex.Civ.App. 1978) (company who hired private investigator to obtain copies of sales invoices from its competitors was liable for damage done during private investigator's break- in to competitor's offices) and Hester v. Bandy, 627 So.2d 833 (Miss. 1993) (dealer hired repossessor who trespassed to repossess van).

3. Distinguish Negligence in the Selection of the Contractor. If a company is negligent in selecting the contractor or in giving improper directions or equipment or in failing to stop any unreasonably dangerous practices that come to its attention, the company will be held liable for its own negligence, which has combined with that of the contractor to cause harm.

768

See Larson v. Wasemiller, 738 N.W.2d 300 (Minn. 2007) (noting that a majority of jurisdictions permit a claim of negligent credentialing against hospitals based on their negligence in granting of hospital privileges to independent physicians). But see Lake Cumberland Regional Hosp., LLC v. Adams, 536 S.W.3d 683 (Ky. 2017) (public policy in Kentucky did not warrant recognition of cause of action in

tort against hospital for negligent credentialing). This, of course, is not vicarious liability at all, but ordinary concurrent negligence.

3. Joint Enterprise

Popejoy v. Steinle

Supreme Court of Wyoming, 1991.

820 P.2d 545.

GOLDEN, Justice. ***On the morning of May 8, 1986, Connie Steinle, accompanied by her seven-year-old daughter and a niece, left the family ranch for Douglas, Wyoming. The purpose of the trip was to purchase a calf for the daughter to raise on the ranch. While en route to Douglas, the truck Connie was driving collided with a vehicle driven by Ronald Popejoy. Connie died as a result of the accident and Ronald sustained injuries initially diagnosed as a muscle strain. As a result of his injuries, Ronald received outpatient medical treatment at a local hospital. ***

Approximately fifteen months after the accident Ronald Popejoy began experiencing severe pain in his neck and back. Because other treatments failed to correct the problem, he underwent two separate neurosurgeries to fuse cervical vertebrae. Following the second surgical procedure, Ronald attempted unsuccessfully to reopen Connie Steinle's estate which had been probated and closed more than a year earlier. The Popejoys then filed a creditor's claim against the estate [of Connie's husband, William,] as he had died in the interim following Connie's death [from an illness unrelated to Connie's accident]. After the Popejoys' creditor's claim was rejected, they filed a complaint against the personal representatives of

William's estate. The complaint was premised on the theory that William and Connie Steinle were engaged in a joint venture when Connie embarked on her May 8, 1986 "business trip" to pick up the daughter's calf [and thus that William was liable for Connie's negligent driving].

***

[The trial court granted the Estate's motion for summary judgment, finding that a careful reading of the depositions and affidavits submitted to support the motion showed that William had no financial or other interest in the purpose of the trip to town, such that vicarious liability could be imposed upon him based on the alleged negligence of his wife. This appeal followed.]

769

The Popejoys seek to impute Connie Steinle's alleged negligence to her husband William's estate by claiming that the Steinles were engaged in a joint venture relationship at the time of the accident. "The burden of establishing the existence of a joint venture is upon the party asserting that the relationship exists." [Cc] Consequently, the Popejoys are required to demonstrate each of the elements of a joint venture relationship in order to prevail. They must also show that the joint venture relationship existed at the time of Connie's alleged negligent conduct. [C]

This court has never set forth a specific "test" of elements necessary to prove existence of a joint venture. The parties in this case and many courts from other jurisdictions frequently use the terms "joint venture" and "joint enterprise" interchangeably and the two terms are conceptually closely related. It has been stated that "[t]he term joint

enterprise is often used interchangeably with joint venture, and it has been stated that when the term joint enterprise is used to describe a business or commercial undertaking, no significant differences between the terms may be drawn."

***

Although the Restatement [(Second) of Torts § 491 comment c at 548 (1965)] does not define elements of a joint venture, it does define the four elements of a joint enterprise as:

(1) an agreement, express or implied, among the members of the group; (2) a common purpose to be carried out by the group; (3) community of pecuniary interest in that purpose, among the members; and (4) an equal right to a voice in the direction of the enterprise, which gives an equal right of control.

In Holliday [v. Bannister, 741 P.2d 89 (Wyo.1987)], we considered among several issues a claim that a father and son were engaged in a joint enterprise while together on a hunting trip. The plaintiff in Holliday, as personal representative for the estate of a hunter accidently shot and killed by the son, asserted that the father was vicariously liable for his son's negligence.

In Part II of the Holliday opinion and the cases and authorities cited therein, we emphasized the commercial and profit motive aspects of the "community of pecuniary interest" element of a joint enterprise or joint venture relationship. ***

The Popejoys' claim in this case is premised on a theory of joint venture and the contention that William and Connie Steinle were engaged in securing an appreciable business asset for their family

business at the time of the accident. In the type of business activity being alleged by the Popejoys, there are no significant differences between a joint venture and a joint enterprise. Thus, in determining the existence or nonexistence of a joint venture relationship in this case, we apply the same four-pronged joint enterprise test in Holliday, 741 P.2d at 93.

770

In support of its ***motion for summary judgment, the Estate submitted several affidavits, depositions and other materials. The Steinle daughter who was accompanying her mother at the time of the accident and who was the intended recipient of the calf they were on their way to buy submitted an affidavit stating that her father did not ordinarily have any ownership interest in the cattle that she, her sisters and mother raised and owned. She also stated that she, her mother and sisters were primarily responsible for caring for the "pets" and other domestic animals raised on the ranch.

Carl Steinle, William's brother and one of two personal representatives of the Estate, submitted an affidavit indicating that Connie and the Steinle daughters regularly kept numerous farm animals as their own and that William would not have had any interest in the calf that was to be purchased. Further, he stated that the purpose of the trip was to purchase a calf for the daughter to raise as her own. A second Steinle daughter also submitted an affidavit confirming the purpose of the trip.

Other materials submitted with the motion supplemented the affidavits described above and included the affidavit and deposition of Roger Wesnitzer, a certified public accountant. After reviewing

Steinle tax records, ranch journal books, bank records, livestock sales receipts and the other affidavits and depositions, Wesnitzer stated that other livestock raised by the Steinle daughters in the past had been given directly to the children by the parents. Further, he stated that while William Steinle bore the costs of raising such livestock on his ranch, sale proceeds went directly to the children. Similar "nonranch" cattle owned by the Steinle daughters in the past had been separately identified by brands owned by the daughters and sale proceeds had gone directly to the children. He stated that William and Connie did not share in any portion of livestock sale proceeds of their daughters' cattle. He concluded that it was his professional opinion that the trip in which Connie was killed and Ronald was injured did not involve a joint venture between William and Connie Steinle.

***

In attempting to demonstrate existence of a joint venture relationship, the Popejoys relied extensively on the affidavits provided by Ted Grooms, a certified public accountant. Grooms stated in his first affidavit that William and Connie Steinle did not separate their income and expenses with respect to their ranching activities and that Connie did much of the work around the ranch because of William's poor health. In his second affidavit, Grooms maintained that after reviewing all the depositions, affidavits, business and tax records submitted by the Steinles for the years 1982-1986 he was convinced that William and Connie were involved in a joint venture at the time of Connie's trip on May 8, 1986. Grooms stated that William's eventual purchase of the calf for his daughter a week after the accident, his efforts in raising and

selling the calf, and the fact that the calf bore the brand of the daughter's older sister led him to the conclusion that a joint venture relationship existed between Connie and William. Finally, and significantly, he stated that it was his understanding that only a pecuniary interest and not an interest in profit was needed to show existence of a joint venture.

Noticeably missing from Grooms' testimony is any evidence that proceeds from the sale of the calf that Connie and the daughter were on their way to purchase on May 8, 1986, would not have gone solely to the daughter. Along the same lines, he found no evidence that proceeds from the actual sale of the calf that was eventually purchased for the daughter following the accident went to anyone other than the daughter. Thus, it appears that only the daughter had an actual pecuniary or financial interest in the profits of the sale of the calf that was to be purchased at the time of the accident.

The record in this case shows that Connie's trip to Douglas to purchase a calf for the couple's seven-year-old daughter was [not a joint venture of the ranch but] a family undertaking. ***

In Holliday, this court adopted and applied a narrow definition of joint enterprise. See, e.g., W. Keeton, Prosser and Keaton on the Law of Torts § 72 (5th ed. 1984). By limiting the application of the doctrine to a venture having a distinct business or pecuniary purpose, we avoid the imposition of a basically commercial concept upon relationships not having this characteristic. [C] With our decision in this case, we reaffirm our holding in Holliday and continue to restrict application of the joint venture/joint enterprise doctrine in Wyoming.

After a careful review of the record, we hold that the Popejoys failed to demonstrate the existence of a genuine issue of material fact which would preclude summary judgment as a matter of law. William and Connie Steinle were not engaged in a joint venture when Connie attempted to drive to Douglas to purchase the calf for their daughter.

The decision of the trial court is affirmed.

NOTES AND QUESTIONS

1. The joint enterprise theory was developed by American courts to impose liability vicariously upon one person who is engaged in the same activity with another person committing the tortious act. The Restatement (Second) of Torts § 491, comment c, quoted in the principal case, sets out four elements required for liability to be imposed. Because of these elements, each member of the joint enterprise is held to be the agent of the other; each may therefore be held liable for the acts of the other.

2. Note the fact specific nature of the inquiry on joint enterprise in the principal case, including testimony from witnesses, documents reflecting the ranch's and the family's financial dealings, and expert testimony. The decision to allow the seven-year-old daughter to keep the profit from the calf she raised turned out to have significant consequences years later.

3. This theory as a means of imposing vicarious liability is most commonly applied in automobile accident cases. It has been applied occasionally in other contexts. See, e.g., Cullinan v. Tetrault, 123 Me. 302, 122 A. 770 (1923) (one party purchases liquor for a party) and

Shell Oil Co. v. Prestidge, 249 F.2d 413 (9th Cir.1957) (applying Idaho law) (parties prospecting for oil). It generally does not apply to parties who take pleasure trips or other nonbusiness journeys together. Fugate v. Galvin, 84 Ill.App. 3d 573, 406 N.E.2d 19, 22 (1980) (travel arrangements to meet a mutual friend not a joint venture) and Lovell v. Brock, 330 Ark. 206, 952 S.W.2d 161 (1997) (hunting party). As in the principal case, joint ownership without more usually is not enough to impose vicarious liability; there must be some business purpose involved.

4. Bailments

Malchose v. Kalfell

Supreme Court of North Dakota, 2003.

664 N.W.2d 508.

NEUMANN, Justice. The Kalfells appeal from the trial court's judgment finding them liable in a negligence action arising out of an automobile accident. We affirm.

[Eric Kalfell and Kelly Malchose were involved in a motor vehicle accident. At the time of the accident, Eric Kalfell was driving a 1992 Pontiac Bonneville titled in the names of his parents, Lance and Lisa Kalfell. Malchose sued all three Kalfells seeking to recover damages against Eric Kalfell for negligence, and against his parents as owners of the car under the family car doctrine and negligent entrustment. After a bench trial, the trial court found Eric Kalfell at fault for negligence and his parents liable under the family car doctrine. The Kalfells appeal.]

The Kalfells argue the trial court erred ***[on three grounds, one of which was] in determining Lance and Lisa Kalfell were liable under the family car doctrine because Eric Kalfell was an adult child living away from home, Eric was the [true] owner of the vehicle involved in the accident, and the car was not being used for family business. ***

The family car doctrine places liability on the owner of a vehicle for negligent operation by a person using the vehicle with the express or implied consent of the owner for purposes of the business or pleasure of the owner's family. [C] The owner is not liable for his own negligence; he is vicariously liable for the tortious acts of the driver. ***To be liable, the head of household need not own the vehicle, but must furnish it for the use, pleasure, and business of himself or a member of the family. Whether the family car doctrine applies is a question of fact. We will not set aside a trial court's findings of fact unless they are clearly erroneous. A trial court's findings of fact are clearly erroneous only if they are induced by an erroneous view of the law or, although there is some

773

evidence to support the findings of fact, on the record as a whole we are left with a definite and firm conviction a mistake has been made.

Here, Lance and Lisa Kalfell were named on the vehicle's certificate of title as owners at the time of the accident. While the Kalfells presented evidence Eric Kalfell had used the vehicle as collateral for a loan, we agree with the trial court that this does not prove a transfer of ownership. Even if title had transferred to Eric Kalfell, the record shows he could not financially maintain the vehicle and attend college without Lance and Lisa Kalfell's support. Record evidence

shows Lance and Lisa Kalfell purchased the vehicle and furnished it to Eric Kalfell. The Kalfells argue Eric Kalfell had moved away from the family ranch in Montana to attend college and he was, therefore, no longer a member of the family. Evidence presented at trial, however, showed Eric Kalfell was a member of the Kalfell family for the purposes of the family car doctrine. Eric Kalfell listed the family's ranch address on his driver's license, Lance and Lisa Kalfell claimed Eric Kalfell as a dependent on their tax return, and Lance and Lisa Kalfell financially supported Eric Kalfell while he was at college. Based on the record evidence, we conclude the trial court's findings of fact were not clearly erroneous and, in the totality of the circumstances, the trial court did not err in determining the family car doctrine applied. ***

The trial court's judgment is affirmed.

[The concurring opinion of Justice Kapsner is omitted.]

NOTES AND QUESTIONS

1. Under the common law in most states, a bailment does not make a bailor vicariously liable for the acts of the bailee in the use of the chattel. Recall, for example, Lubitz v. Wells, the first negligence case of Chapter 4. There was no suggestion the father was vicariously liable for his son's negligent use of the golf club simply because the father was the owner of the golf club. Instead, the plaintiff attempted to prove that the father had acted negligently in leaving the golf club in the yard where he knew a child might find it and play with it, usually referred to as negligent entrustment.

2. The common law rule on bailments has been altered in many states by decision, as in the principal case, or by statute, especially

with respect to automobiles.

A. The Family Purpose Doctrine. The "family purpose" or "family car" doctrine is a court-created legal fiction by which the owner of an automobile is held vicariously liable when the car is negligently driven by a member of the immediate household. The fiction is predicated on the assumption that the driver is implementing a "family purpose," even if the driver is only using the automobile for his own pleasure or convenience. The car must be driven with the permission of the owner, but this may be inferred from very general circumstances. Courts have consistently held the parents of teenager drivers liable even when the teenager was exceeding the scope of the permission. See, for example, Young v. Beck, 227 Ariz. 1, 251 P.3d 380 (2011) (teen not

allowed to give rides to others was given permission to drive to friend's home to spend the night and then to drive straight home the next morning injured plaintiff during the night while driving around with several friends as they threw eggs at houses and parked cars). In general, it is limited to automobiles, but the court in Stewart v. Stephens, 225 Ga. 185, 166 S.E.2d 890 (1969), extended it to a "family motorboat." Who should be primarily liable as between a father or mother? What if the mother has sole custody of the child? See Starr v. Hill, 353 S.W.3d 478 (Tenn. 2011) (question of fact for jury whether noncustodial father, who was owner of vehicle that had been purchased for teenager's use pursuant to terms of divorce decree, had sufficient day-to-day control over teenager's use of vehicle to subject him to liability under family purpose doctrine).

B. Presumption That Owner, if Passenger, Controls the Vehicle. Some older cases held that the mere presence of the owner in the car establishes his right of control over the driving, so that the owner becomes responsible for the acts of the driver as if the driver were the agent of the owner. See, for example, Boker v. Luebbe, 198 Neb. 282, 252 N.W.2d 297 (1977). A number of states have retreated from this position even when the parties are close relatives because it is unrealistic and may encourage dangerous back-seat driving, Bauer v. Johnson, 79 Ill.2d 324, 38 Ill.Dec. 149, 403 N.E.2d 237 (1980); Reed v. Hinderland, 135 Ariz. 213, 660 P.2d 464 (1983) (the mere presence of the owner in an automobile driven by another does not create any presumption of a master-servant relationship or joint enterprise; existence of such a relationship must be proved by the party asserting it in the same manner as any other issue in the case). This does not relieve the owner of a duty to object to or otherwise interfere with negligent driving as soon as becoming aware of it. The breach of that duty would trigger liability based on primary negligence on the part of the owner, not vicarious liability. See Sherman v. Korff, 353 Mich. 387, 91 N.W.2d 485 (1958). See also next principal case discussing imputing of the negligence of the driver to the passenger-owner as contributory negligence.

C. Automobile Consent Statutes. Many states have statutes that make the owner of an automobile vicariously liable for injury caused by the negligent operation of the vehicle as long as it is being used with the owner's consent. Problems of statutory construction arising under those statutes include what constitutes "consent"; what happens when the scope of the consent is exceeded; and whether "owner" includes co-owners or conditional sellers who have legal title

but no power to control the vehicle. What if a parent co-signed on a car loan but was not listed as a co-owner on the title?

3. The "omnibus clause" in standard automobile liability insurance policies may lessen the need for the use of consent statutes. This clause provides that liability insurance for the designated automobile applies to the named insured, any member of the insured's household, and to any person using the automobile with the insured's permission, provided the use was within the scope of permission. Under what circumstances might the plaintiff still need the benefit of the consent statutes even if the automobile liability insurance policy covered the actions of the driver?

775

4. What if the owner is a rental car company? Should it be vicariously liable through automobile consent statutes or other theories of vicarious liability for the negligent driving of those to whom it rents cars? Many jurisdictions had held the rental car company liable as the owner of the car. See, for example, Shuck v. Means, 302 Minn. 93, 226 N.W.2d 285 (1974) (Hertz held liable even though the driver of the vehicle was not the person who had rented it because driver had permission of person who had rented it from Hertz) and Murdza v. Zimmerman, 99 N.Y.2d 375, 786 N.E.2d 440, 756 N.Y.S.2d 505 (2003) (company that had leased van to an employer could be held vicariously liable for accident caused by employee's boyfriend because lease had no restrictions on use of vehicle).

In 2005, Congress passed the Graves Amendment as part of the Safe, Accountable, Flexible, Efficient Transportation Equity Act,

codified at 49 U.S.C. § 30106(a). It preempts state law and provides that there is no vicarious liability for injury or damage arising out of the use of a vehicle rented or leased by someone in the business of renting or leasing motor vehicles. It has been upheld as a constitutional exercise of federal preemption of state law. See, for example, Graham v. Dunkley, 50 A.D.3d 55, 852 N.Y.S.2d 169 (2008) (applying Graves Amendment to preempt New York tort law); Garcia v. Vanguard Car Rental USA, Inc., 540 F.3d 1242 (11th Cir. 2008) (applying Graves Amendment to preempt Florida tort law); Rodriguez v. Testa, 296 Conn. 1, 993 A.2d 955 (2010) (applying Graves Amendment to preempt Connecticut law and finding it a constitutionally valid exercise of Commerce Clause power); and Vargas v. Enterprise Leasing Co., 60 So.3d 1037 (Fla. 2011) (applying Graves Amendment to preempt Florida tort law and finding that it does not violate the Commerce Clause).

5. Do the policies that support an application of vicarious liability to owners of automobiles apply to any other bailors? Some attorneys have made enterprising, but unsuccessful, attempts to apply the same rule to private aircraft. See McCord v. Dixie Aviation Corp., 450 F.2d 1129 (10th Cir. 1971) and McDaniel v. Ritter, 556 So.2d 303 (Miss. 1989) (in granting summary judgment to owner, court notes nothing in Tennessee law that would change the common law rule of no vicarious liability for bailor).

6. Vicarious Liability by Statute--Other. There are other, occasional, instances of statutes creating vicarious liability. Some states have imposed the liability on owners of private aircraft, on municipalities for certain acts committed by a mob through so-called "anti-lynching"

statutes, or on parents for certain intentional torts committed by their teenage children.

7. Distinguish Negligent Entrustment. All of the vicarious liability circumstances should be carefully distinguished from cases in which the plaintiff is arguing that the employer/owner/bailor was itself negligent in some way. Just as the employer may be negligent in hiring an employee (see note 5, page 759) and the hirer may be negligent in selecting the independent contractor (see note 3, page 767), the owner/bailor may be liable in entrusting the chattel to the bailee. This is frequently referred to as "negligent entrustment." See Wery v. Seff, 136 Ohio St. 307, 16 Ohio Ops. 445, 25 N.E.2d 692 (1940) (unlicensed minor driver); Snowhite v. State, 243 Md. 291, 221 A.2d 342 (1966) (owner knew driver was frequently intoxicated);

Kahlenberg v. Goldstein, 290 Md. 477, 431 A.2d 76 (1981) (father funded purchase of automobile for son whom he knew to be an irresponsible driver); and Vince v. Wilson, 151 Vt. 425, 561 A.2d 103 (1989) (evidence that defendant who provided funding to grandnephew to purchase car knew he did not have driver's license, had failed driver's test several times, and abused alcohol and other drugs was sufficient to get negligent entrustment case to jury). This may occur not only with automobiles, but also with other chattels. See McBerry v. Ivie, 116 Ga.App. 808, 159 S.E.2d 108 (1967) (shotgun given to a young child); Miles v. Harrison, 223 Ga. 352, 155 S.E.2d 6 (1967) (power mower); and LaFaso v. LaFaso, 126 Vt. 90, 223 A.2d 814 (1966) (cigarette lighter). But not computers. Finkel v. Dauber, 29 Mise.3d 325, 906 N.Y.S.2d 697 (2010) (computer not a

dangerous instrument that could give rise to a negligent entrustment claim in a case against the parents of teenagers who had allegedly defamed plaintiff on their secret Facebook group).

The plaintiff in the principal (Malchose) case had included negligent entrustment as part of her case against the parents of the college student driver, but the court did not have to reach that issue because it found the parents vicariously liable.

Some states recognize so-called "first party" negligent entrustment actions that permit the driver entrustee who should not have been entrusted with the car to make a claim against the owner entruster. See, for example, Martell v. Driscoll, 302 P.3d 375 (Kan. 2013) (driver injured by his own negligence in driving car alleged that owner should not have let him use it because owner knew that driver's license had been suspended after multiple DUIs and owner entruster therefore should be liable to driver entrustee for driver's injuries).

5. Imputed Contributory Negligence

Seaborne-Worsley v. Mintiens

Court of Appeals of Maryland, 2018.

458 Md. 555. 183 A.3d 141.

MCDONALD, J. [This case grew out of an accident in a restaurant parking lot when defendant Mintiens backed his truck out of a parking space and struck a car in which Plaintiff Worsley was seated. Her husband had driven the couple to the restaurant and left the car with his wife in it stopped in a travel lane perpendicular to the truck

driver's parking space while he retrieved the couple's take-out order from the restaurant. Plaintiff was the owner of the car and sued the truck driver for damage to the passenger side of the car and for her own personal injuries. Defendant truck driver argued that plaintiffs husband was contributorily negligent for leaving the car in the travel lane of the parking lot and that driver's negligence should be imputed to his wife, the owner of the car and the injured passenger, under the doctrine of imputed contributory negligence. Because Maryland is a contributory

777

negligence jurisdiction, that application would result in a complete bar to plaintiff's recovery.]

Under the "controversial doctrine of imputed negligence," the negligence of one individual may be imputed to another who was otherwise without fault. In the realm of automobile torts, the doctrine has been applied to ascribe the negligence of a permissive driver of a car to the owner of the car if the driver operates the car negligently while the owner is a passenger. In that context, the doctrine of imputed negligence is based on the fiction that the owner is able to control the actions of the driver and therefore is responsible for any misstep of the driver.

In the past, [when] the doctrine [was applied to defendant drivers and owners, it] functioned to ensure that individuals injured in automobile accidents would be able to obtain compensation from the party most likely to be financially responsible--the car's owner. However, developments in the law and in insurance coverage make reliance on the fiction of owner control less compelling. Moreover, in

situations where an owner-passenger is injured and innocent of any negligence, application of the doctrine, in conjunction with a defense of contributory negligence, can have the perverse effect of foreclosing compensation to an injured party who was not personally at fault. As a result, courts in many states have abrogated or limited the doctrine of imputed negligence [as applied to plaintiffs]. This case presents an opportunity for us to do the same.

***

[The lower courts had entered judgment in favor of defendant truck driver after applying the doctrines of imputed negligence and contributory negligence. Maryland's highest court, the Court of Appeals, granted plaintiffs petition for a writ of certiorari.]

The doctrine of imputed negligence is not based on any negligence of the owner-passenger. Rather, it is a form of vicarious liability. It is thus distinct from the tort of negligent entrustment. An owner of a car may be found liable for the tort of negligent entrustment when the owner permits another to use the car when the owner knows, or reasonably should know, that the other person is likely to use the car in a manner likely to cause injury to others. [C] The tort of negligent entrustment is thus based on the negligent action of the car owner--i.e., entrusting the car to an unreliable driver--and does not depend on whether the owner is present at the time of the accident. It is a form of direct negligence and is not a theory of vicarious liability. [C] By contrast, the doctrine of imputed negligence is not premised on any negligence of the car owner, but only on the car owner's ownership and presence at the time of the accident.

Under what is sometimes called the "both ways" theory, the doctrine of imputed negligence has been applied not only to hold an owner-passenger liable to an injured third party, but also to foreclose a claim by an injured owner-passenger on the ground of contributory negligence. The logic in a case such as this one is simple. Where the car owner (Ms.

778

Worsley) is a passenger in that car while a permissive driver (her husband) is negligent in parking or operating the car, and where there is no showing that she was asleep or otherwise incapable of exercising control, her husband's negligence is attributed to her. If that negligence was a proximate cause of an accident that injured her, the doctrine of imputed negligence, under the "both ways" theory, deems her to be contributorily negligent and defeats a negligence claim by her against a third party such as Mr. Mintiens.

The reasoning of the "both ways" theory of imputed negligence appears logical in its symmetry. A logician might conclude the analysis with Q.E.D. [10] or the brutally logical and fictional Sherlock Holmes might say: "Elementary." However, as a real-life Holmes once famously said: "The life of the law has not been logic; it has been experience." Oliver Wendell Holmes, Jr., Book Notices, 14 Am. L. Rev. 233, 234 (1880). He elaborated:

* * *

[10] The initials stand for "Quod Erat Demonstrandum," a Latin phrase that means roughly "that which was to be proved" and that frequently is appended to the end of a mathematical or logical proof.

The seed of every new growth within [the law's] sphere has been a felt necessity. The form of contiguity has been kept up by reasonings purporting to reduce everything to a logical sequence; but that form is nothing but the evening dress which the new-comer puts on to make itself presentable according to conventional requirements. The important phenomenon is... the justice and reasonableness of a decision....

Holmes' insight is that it is the wisdom of the common law that a doctrine developed by the courts to decide cases may begin as an elegant theoretical construct, but is often modified and thereby rendered less elegant, or discarded entirely, to accommodate actual experience or changed conditions. [13]

* * *

[13] The context for Holmes' observations was an otherwise enthusiastic review of a contracts textbook, in which he tempered his praise for the textbook with the observation that the textbook author was promoting a vision of contract law that, while logically and internally consistent, and perhaps even elegant as a theoretical system, could become detached from human experience.

Something like what Holmes described has happened with the doctrine of imputed negligence in the context of automobile torts. Courts in Maryland and elsewhere have developed exceptions, clothed them in the logic of the original doctrine, and thereby circumscribed application of the doctrine to reach a just and reasonable result in a particular case.

***

[The Court then described the various ways in which the surrounding law (of insurance and vicarious liability) and circumstances had changed to make the original doctrine less necessary and the "both ways" extension of the doctrine even more absurd.]

779

Thus, in dealing with the doctrine of imputed negligence, Maryland appellate courts have recognized that its premise--owner control--is entirely fictional in the context of automobile torts, noted that certain applications of the doctrine lead to results at odds with its original purpose, and have circumscribed its reach by creating an exception (does not apply to a co-owner) and enlarging the breadth of that exception (need not be on the title to be a co-owner).

Courts in other states limited or abrogated the doctrine based upon similar criticisms.***

Similarly, the authors of the second and third Restatements of Torts have rejected the "both ways" theory and would not apply the doctrine of imputed negligence to establish a defense of contributory negligence in an automobile tort case. See Restatement 2d of Torts, § 485, comment a***; Restatement 3rd of Torts § 5, comment c***

Thus, with respect to the application of the doctrine to hold an innocent owner-passenger contributorily negligent and defeat a claim against a negligent third party, we agree with the Minnesota Supreme Court that "the time has come to discard this rule which is defensible only on grounds of its antiquity." [C] We will no longer indulge a presumption that an owner-passenger who was injured in an automobile accident had operational control over a permissive

driver of the vehicle and is therefore responsible for any negligence of the driver.

This does not mean that an owner-passenger cannot be contributorily negligent. Rather, we are simply dispensing with the presumption that an injured owner-passenger is contributorily negligent because the driver is negligent. There may be any number of ways in which an owner-passenger's own actions or omissions could be a proximate cause of an accident, not the least of which could be wresting control of the steering wheel from the driver.

***

Our decision is not a rebuke of the lower courts in this case. In carrying out our role of developing the common law of Maryland, we sometimes find ourselves, as here, in the position of reversing a lower court that has faithfully applied existing precedent or a logical extension of existing precedent. ***The District Court and the Circuit Court in this case faithfully applied our existing precedent. That precedent is obsolete. It is our responsibility to say so.

***[Judgment of the Circuit Court for Baltimore County vacated and case remanded to that court.]

NOTES AND QUESTIONS

1. "Imputed contributory negligence" has acquired a bad reputation in the law, because of a set of rules that developed in the latter part of the 19th Century, under which entirely innocent persons, seriously injured without any fault of their own, were barred from recovery against one person

who negligently injured them, because they were charged with the negligence of another who had contributed to the injury. The result was that, of the three persons involved, the entire loss fell upon the only one who was free from all negligence. Most of this is now thoroughly discredited and obsolete. In addition to the principal case, see Bibergal v. McCormick, 101 Mise.2d 794, 421 N.Y.S.2d 978 (1979) (declining to impute contributory negligence of driver of cab to owner of cab, his father).

Imputed contributory negligence has been largely rejected in the following areas:

A. Driver and Passenger. An early English decision, Thorogood v. Bryan, 8 C.B. 115, 137 Eng.Rep. 452 (1849), "imputed" negligence of the driver of an omnibus to a passenger who was injured in a collision, so as to prevent recovery by the passenger against the other driver. The decision has long since been overruled in England. Although some decisions in United States jurisdictions followed it for a time, those cases also have been overruled. The principal case was based not on the passenger-driver relationship (wife and husband) but on the owner-driver relationship (owner/passenger and permissive driver). See also Pittman v. Frazer, 129 F.3d 983 (8th Cir. 1997) (applying Arkansas law) (where driver and passenger-owner of car that collided with train at railroad crossing were engaged in adulterous affair, jury could conclude that they were engaged in a joint enterprise so that negligence of driver could be imputed to passengerowner thus preventing her estate from recovering against railroad). A passenger in an automobile can be charged with contributory negligence of his own if he, for example, grabbed the

wheel, distracted the driver by untying the strings of her bikini top, or gave directions to turn the wrong way down a one-way street.

B. Husband and Wife. At common law a married woman's separate legal identity was merged with that of her husband. One result of this legal fiction was that if her spouse contributed to the happening of an accident, his negligence was imputed to her and would bar any claim against a negligent third party. Today, the contributory negligence of one spouse is not imputed to bar a recovery by the other, on the basis of the marital relation alone.

C. Parent and Child. The common law had no similar rule of legal identity as between parent and child. The child always has been held to be entitled to the separate ownership of his own property, to the enforcement of his causes of action, and to be liable as an individual for his own torts. On occasion a parent's negligence will be so substantial in regard to the accident that a court will treat the parent's negligent conduct as a superseding cause and bar the child's claim against the third party. Some courts may be reluctant to accept this argument and will regard it as an end run attempt to restore the old rules imputing contributory negligence. See, e.g., Caroline v. Reicher, 269 Md. 125, 304 A.2d 831 (1973), noted in 34 Md. L. Rev. 155 (1975) (parent's failure to supervise child will not relieve landlord of liability for child's consumption of paint containing lead). But see Lash v. Cutts, 943 F.2d 147 (1st Cir. 1991) (applying Maine law), where a child was injured when he rode his tricycle down a neighbor's driveway into the path of a

speeding car. The combined negligence of the child and the mother (in failing to properly supervise the child), which was imputed to the child, was greater than the negligence of the defendant driver, so the child collected nothing under Maine's modified comparative negligence scheme.

2. A general rule developed in many jurisdictions that contributory negligence will not be imputed unless negligence could be imputed. Many courts then accepted the converse of this proposition: if negligence can be imputed, contributory negligence will be also. This is the so-called "both- ways" theory mentioned in the principal case. The both-ways theory has been under a slow but steady attack. Many automobile consent statutes have been construed only to impose vicarious liability and not vicarious contributory negligence. See page 774, note 2C. See also White v. Yup, 85 Nev. 527, 458 P.2d 617 (1969) (construing family purpose doctrine to impose only vicarious liability and not vicarious contributory negligence).

3. Employer and Employee. Although largely abandoned, imputed negligence remains viable in a few areas. See generally Restatement (Third) of Torts: Apportionment of Liability § 5 (2000). The contributory negligence of the employee will be imputed to the plaintiff employer. After an accident involving a delivery truck and a motorcycle, the company that owned the delivery truck and employed the truck driver filed suit against the motorcyclist to recover for the damage to the truck and the worker compensation benefits paid to its driver. The jury found both the truck driver and the motorcyclist negligent and assessed percentages of fault to each of them. The percentage of fault of the truck driver was imputed to his employer, the plaintiff. Thomas Oil, Inc. v. Onsgaard, 298 Minn. 465,

215 N.W.2d 793 (1974). Suppose the motorcyclist had filed a counterclaim for his personal injury and was permitted to recover a portion of his damages from the company that owned the delivery truck and it sought indemnity or contribution from its employee, the driver?

4. Derivative Claims. When a claim is held to be derivative in nature, e.g., loss of consortium or wrongful death, the contributory negligence of an injured party usually will be imputed to the plaintiff because plaintiffs claim derived from that of the injured party. Thus, if the spouse of the motorcyclist in the previous note brought a loss of consortium claim, motorcyclist's contributory negligence would be imputed to spouse and would either defeat the claim or reduce the damages, depending on the operation of the jurisdiction's comparative negligence regime. Similarly, the contributory negligence of a decedent not only affects his estate's ability to recover in a survival action, it is imputed to the beneficiaries in a wrongful death action and will affect their recovery as well. The imputation of contributory negligence in those circumstances is not based on principles of vicarious liability, but on the judgment of the court or legislature that plaintiffs claim is not independent in nature but is derived from and dependent on another party's claim.

5. How much does the so-called "deep-pocket" theory explain the doctrines discussed in this chapter? Put another way, is the doctrinal basis of imputed negligence actually based on courts trying to find a solvent defendant?

The next two chapters explore a more direct route for this result--strict and products liability.

783

CHAPTER 14 STRICT LIABILITY

When a court imposes "strict liability" on a defendant, the defendant must pay damages although the defendant neither acted intentionally nor failed to live up to the objective standard of reasonable care that traditionally has been at the root of negligence law. Some courts and commentators call this "absolute liability." This description overstates the case because there are numerous defenses to an action for strict liability and sometimes, especially in some of the types of so-called "strict products liability" (Chapter 15), the requirement of fault creeps back into the system. Some group the cases in this chapter under the rubric "liability without fault." This description suggests that negligence and intentional tort causes of action are always based on fault, but there are many examples of imposition of liability without fault under the negligence and intentional tort bases of liability. Can you recall some?

As Dean Prosser observed: "Once the legal concept of 'fault' is divorced, as it has been, from the personal standard of moral wrongdoing, there is a sense in which liability with or without 'fault' must beg its own conclusion. The term requires such extensive definition, that it seems better not to make use of it at all, and to refer instead to strict liability, apart from either wrongful intent or negligence." W. Prosser & W. Keeton, Torts 538 (5th ed. 1984).

Thus far we have seen that most activities are judged on the basis of intent or negligence. This chapter focuses on activities that have been selected over the past two centuries by judges or, occasionally, legislatures to bear the burden of strict liability. Observe the

rationales that underlie their judgments. Are they consistent? Are they sound? Should they be extended?

1. Animals

One of the first areas selected by courts for the imposition of strict liability focused on the care and maintenance of particular animals in certain situations. Keep in mind that the basis of liability, whether it is strict liability or negligence, is imposed on those who keep, possess, or harbor the animal, not just the owner. Compare Snow v. Birt, 968 P.2d 177 (Colo. App.1998) (owners of house where child was bitten responsible even though dog belonged to their adult son who resided with them); Pawlowski v. American Fam. Mutual Ins. Co., 777 N.W.2d 67 (Wis. 2009) (owner of house responsible even though dog belonged to acquaintance of owner's daughter who was staying in owner's home while he was unemployed in informal arrangement whereby he did some home repairs and housekeeping in exchange for lodging); and Terral v. Louisiana Farm Bureau Casualty Ins. Co., 892 So.2d 732 (La. App. 2005) (testimony that

dog spent most of its time on porch of defendant and ate food put out on porch for defendant's other dogs enough to sustain jury finding that defendant harbored dog even though he denied that it was his and testified that he did not allow it inside with his other dogs, had not taken it to vet, or bought it anything) with Auster v. Norwalk United Methodist Church (Auster II), 286 Conn. 152, 943 A.2d 391 (2008) (church not liable as "keeper" of dog that belonged to its employee who lived on church grounds with his family and dog); Augsburger v. Homestead Mut. Ins. Co., 359 Wis.2d 385, 856

N.W.2d 874 (2014) (mere ownership of the property on which a dog resides is not sufficient to establish that an individual is an owner of a dog); Blaha v. Stuard, 640 N.W.2d 85 (S.D. 2002) (seller of dog was no longer a possessor ten days after sale and transfer of dog to buyers); Miles v. Rich, 347 S.W.3d 477 (Mo. App. 2011) (Humane Society did not own, possess, harbor, or control the dog at the time it bit plaintiff--it had been adopted over a year before); and Hayes v. Adams, 987 N.E.2d 402 (Ill. App. 2013) (owner not liable where veterinarian's assistant had allowed dog to escape and it bit a child trying to assist in its recapture). See also Restatement (Second) of Torts § 514 (1977) and Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 23, comment f (2010). Note that some of these holdings turn on interpretation of particular statutes rather than on the common law.

Worldwide Primates is a breeder of monkeys and other primates operating in southern Florida. During Hurricane Andrew, the primate cages were damaged and many escaped. A macaque monkey was captured by Gomez who sold it to Martinez who sold it to Scorza (a photographer whose specialty was photographing people with exotic animals) whom the monkey bit. Photographer Scorza sued Worldwide Primates for negligence in letting the monkey escape and strict liability for possessing a wild animal. Should Worldwide Primates be strictly liable? Scorza v. Martinez, 683 So.2d 1115 (Fla. App. 1996) (strict liability not available against owner of escaped wild animal once someone else has taken possession of it).

Landowners are not responsible for harm done by wild animals on their property unless they reduce the wild animal to possession or control or introduce a non-indigenous animal into an area.

Belhumeur v. Zilm, 157 N.H. 233, 949 A.2d 162 (2008) (landowner not strictly liable to neighbor attacked by wild bees living in tree on landowner's property); Union Pac. R.R. Co. v. Nami, 498 S.W.3d 890 (Tex. 2016) (plaintiff contracted West Nile virus from mosquito bite on defendant's right of way) (doctrine of ferae naturae applied because Union Pacific did nothing to attract mosquitoes, indigenous to Brazoria County and all South Texas, to its small right-of-way, and it could do nothing to keep them out); and Hillis v. McCall, S.W.3d, 2020 WL 1233348 (Tex. 2020)

(poisonous brown recluse spider under sink). Cf. Landings Ass'n, Inc. v. Williams, 291 Ga. 397, 728 S.E.2d 577 (2012) (wild alligators in residential area).

785

Trespassing Animals. Somewhere around the middle of the 14th Century, the courts began to recognize a rule making the owner of cattle liable when his animals caused damage while trespassing upon the plaintiffs land. The origin of the rule is somewhat obscure. It has been attributed to a fiction that the trespass of the animals was to be attributed to the owner, because he was in some way identified with them, and responsible for what they did. According to Glanville Williams, Liability for Animals 127-134 (1939), there was no such fiction, and the early cases were those in which the owner intentionally put his cattle upon the land of the plaintiff. Liability for mere escape originated as a deliberate extension designed to remedy a gap in the law; and because it came before the full development of the action on the case, it was identified with trespass, although the invasion was an indirect one. Out of this there

developed the rule that the owner of animals of a kind likely to roam and do damage is strictly liable for their trespasses. The Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 21, comment b (2010), while acknowledging the prevalence of the phrase "trespass," notes that animals cannot trespass (because they are incapable of intent) and suggests instead "intrusion." It remains to be seen whether this terminology catches on with the courts.

The kinds of animals for whose trespasses or intrusions their owner would be liable were limited, and they had a definite barnyard pattern. They included cattle, horses, sheep, hogs, and goats, as well as such common errant fowl as turkeys, in McPherson v. James, 69 Ill.App. 337 (1896), and chickens, in Adams Bros. v. Clark, 189 Ky. 279, 224 S.W. 1046 (1920), or even pigeons, in Taylor v. Granger, 37 A. 13 (R.I.1896).

On the other hand, such household favorites as dogs and cats were not included. Olson v. Pederson, 206 Minn. 415, 288 N.W. 856 (1939); McDonald v. Castle, 116 Okl. 46, 243 P. 215 (1925); Buckle v. Holmes, [1926] 2 K.B. 125; Bischoff v. Cheney, 89 Conn. 1, 92 A. 660 (1914). The reason sometimes given was that dogs and cats were of no value, which is of course clearly wrong; and that their trespasses were likely to be trivial and do no serious harm, which is unlikely to impress the owners of flowerbeds and poultry. A better explanation may be that of Glanville Williams, Liability for Animals 145-146 (1939), that dogs and cats are very difficult to confine or restrain, and the general custom of the community has permitted them to roam at large. In other words, the keeping of these household pets is so far sanctioned by general usage that an

exception is made in their favor. McElroy v. Carter, 2006 WL 2805141 (Tenn. App. 2006) (noting that the strict liability that applies to trespassing livestock does not apply to trespassing cats). But see Baker v. Howard County Hunt, 171 Md. 159, 188 A. 223 (1936) (trespass rule applied to pack of dogs engaged in fox hunting).

An early and well established exception to the rule of strict liability for trespassing cattle and the like was the case of animals straying from a highway on which they were lawfully being driven. Tillett v. Ward, L.R. 10 Q.B.D. 17 (1882). This obviously arose out of the necessity of getting

the animals to market. It was explained as in the nature of a servitude to which owners of lands adjoining the highway were subject; and it did not apply to other lands. Thus when cattle strayed from the highway across the lands of A, and thence onto the land of B, B could invoke strict liability even though A could not. Wood v. Snider, 187 N.Y. 28, 79 N.E. 858 (1907).

In the United States, the rule as to strict liability for animal trespass has had something of a checkered history. In the early days, many of the courts, particularly in the western part of the country where cattle were customarily permitted to graze at large on open range, rejected the common law rule as not suitable to the conditions of the country and established local custom. See for example Delaney v. Errickson, 10 Neb. 492, 6 N.W. 600 (1880) and Beinhorn v. Griswold, 27 Mont. 79, 69 P. 557 (1902). These cases are among the leading authorities for the proposition that, under state reception statutes, the common

law of England is to be followed only when it is suitable and appropriate in the local context.

As the country became more settled, some states began to enact "fencing out" statutes, which provided that if the plaintiff fenced his land properly there was strict liability when animals broke through the fence. Otherwise, there was liability only if the owner of the animals was negligent. See for example Buford v. Houtz, 133 U.S. 320 (1890); Garcia v. Sumrail, 58 Ariz. 526, 121 P.2d 640 (1942); Hart v. Meredith, 196 Ill.App. 3d 367, 553 N.E.2d 782, 143 Ill.Dec. 75 (1990) (application of fencing out statute to impose strict liability on farmer whose bull broke through fence and bred two of plaintiff's purebred Angus cows, causing plaintiff to lose the services of the cows in plaintiff's embryo transplant breeding operation).

As the country became still more settled, the conflict between the grazing interests and developing agricultural interests--or, in other words, as the motion pictures would have it, between the range men and the "nesters" along the creek bed or the cowboys and the farmers--resulted in many states in "fencing in" statutes, which required the owner of the animals to fence them in or otherwise restrain them, and made the owner strictly liable if he did not do so. Plaintiff's pickup truck hit a black cow standing in a dark road at midnight. Florida's fencing in statute requires the plaintiff to show defendant's intent or negligence in order to recover if animals escape onto the highway--i.e., no strict liability as long as animal had been fenced in. The only evidence is that defendant's gate could only be opened by human hands, that defendant himself had secured the gate the day before, that defendant had had no visitors after that, and that he did not know how the gate had been opened.

Liability? Fisel v. Wynns, 667 So.2d 761 (Fla.1996) (summary judgment in favor of owner approved). Compare Larson-Murphy v. Steiner, 303 Mont. 96, 15 P.3d 1205 (2000) (motorist struck black bull on a dark night; no explanation for how bull escaped double enclosure; no evidence gate had been opened or tampered with; extended discussion of open range common law and statutes and the rules regarding

responsibility for damage done by trespassing animals that developed from them; summary judgment for owners reversed and case sent back for jury decision).

Finally, some states, particularly in the eastern part of the country, apply the common law rule (King v. Blue Mountain Forest Ass'n, 100 N.H. 212, 123 A.2d 151 (1956)) while others require proof of negligence. Hastings v. Sauve, 21 N.Y.3d 122, 967 N.Y.S.2d 658, 989 N.E.2d 940 (2014) (motorist injured when her vehicle collided with cow on public road could recover from owner if fence restraining animal had been negligently maintained) and Beneke v. Smith, 2015 WL 2137134 (Kan. App. 2016) (Kansas also requires showing of negligence against owner of cattle with which plaintiff motorist collided on highway).

Many states permit each county to choose the rule it wishes to apply. Thus in some states animals are permitted to run at large unless a county adopts a "fencing in" or a "fencing out" ordinance. There are states in which all four variants of the rule--common law strict liability, fencing out, fencing in, and no liability without fault--can be found in different counties.

Wild Animals. Under the common law of England, the owner or possessor of a nondomesticated animal (collectively referred to by courts as "wild animals" or animals "ferae naturae") brought to the owner's land was subject to strict liability if the animal injured anyone. See May v. Burdett, 9 Q.B. 101 (1846) (monkey bite); Filburn v. Peoples Palace and Aquarium Co., Ltd., 25 Q.B.Div. 258 (C.A.1890) (elephant attack); Johnson v. Swain, 787 S.W.2d 36 (Tex.1989) (bull elephant gore). On the other hand, the owner of a domestic animal such as a cat, dog, sheep, or horse was subject to strict liability only if the owner knew or had reason to know that the animal had dangerous propensities.

This led to interesting problems of classification. Obviously lions and tigers and bears ("oh my!") were deemed "wild animals." What about deer? Congress & Empire Spring Co. v. Edgar, 99 U.S. 645 (1878); Briley v. Mitchell, 238 La. 551, 115 So.2d 851 (1959) (wild). A hive of bees? Wilhelm v. Flores, 133 S.W.3d 726 (Tex. App. 2003) (hived bees usually considered domesticated and thus strict liability not applicable). A boar? Marshall v. Ranne, 511 S.W.2d 255 (Tex. 1974) (domesticated).

The customs of the community influence the determination. In Burma an elephant is regarded as a domesticated animal, for which there is no strict liability. Maung Kayn Dun v. Ma Kyian, 2 Upper Burma Rulings, Civ. 570 (1900). Suppose an elephant is brought from Burma to England to perform in a circus. Behrens v. Bertram Mills Circus Ltd., [1957] 2 Q.B. 1 (wild--strict liability). How about a camel, which is now domesticated virtually everywhere it is found? McQuaker v. Goddard, [1940] 1 K.B. 687 (domestic--no strict liability). A ferret? Gallick v. Barto, 828 F.Supp. 1168 (M.D.Pa.1993)

(finding that ferret is a wild animal even though evidence showed that approximately one million are kept as pets in United States).

788

The majority American position has followed the rule of strict liability in regard to wild animals not native to the area. See Isaacs v. Powell, 267 So.2d 864 (Fla.App.1972) (chimpanzee); Franken v. Sioux Center, 272 N.W.2d 422 (Iowa 1978) (tiger); Whitefield v. Stewart, 577 P.2d 1295 (Oki. 1978) (monkey).

Some courts have applied a negligence standard rather than strict liability with regard to the liability of persons who display wild animals to the public. See Hansen v. Brogan, 145 Mont. 224, 400 P.2d 265 (1965) (buffalo); Vaughan v. Miller Bros. "101" Ranch Wild West Show, 109 W.Va. 170, 153 S.E. 289 (1930) ("ape"). The trend is more pronounced with regard to public zoos, although some of those decisions are based on the fact that the legislature authorized the activity. See, e.g., City and County of Denver v. Kennedy, 29 Colo.App. 15, 476 P.2d 762 (1970). Contra: City of Mangum v. Brownlee, 181 Oki. 515, 75 P.2d 174 (1938). What about wild animals that roam freely in animal parks where visitors drive their cars?

Domestic Animals. As for domestic animals, South Carolina applies strict liability through case law. Hossenlopp v. Cannon, 329 S.E.2d 438 (S.C. 1985) (judicially eliminating requirement of scienter for dog bites). And about a dozen others have done so by statute. See, for example, Ky. Rev. Stat. Ann. § 258.235(4). All other jurisdictions follow the common law rule: if the owner knows or has reason to know (scienter) that a domestic animal has vicious propensities, this

is sufficient to classify that animal with wild ones and thus to impose strict liability. See Andrews v. Smith, 324 Pa. 455, 188 A. 146 (1936); Barger v. Jimerson, 130 Colo. 459, 276 P.2d 744 (1954); Harris v. Williams, 160 Oki. 103, 15 P.2d 580 (1932). This is often referred to as the "one bite rule." Note, however, that although the scienter requirement can be proved by a previous bite, it also can be proved by other means. Many of the cases show interesting and imaginative efforts to prove that the animal had a dangerous temperament and that the owner was aware of it. See, e.g., Walters v. Grand Teton Crest Outfitters, Inc., 804 F.Supp. 1442 (D.Wyo.1992) (whether plaintiff had proved mule had vicious propensities by showing it had thrown two previous riders and had rolled on its back before plaintiff had mounted it was question of fact for the jury); Zarek v. Fredericks, 138 F.2d 689 (3d Cir.1943) (applying Pennsylvania law) (dog snarled at guests and was almost always accompanied by his owners); Frederickson v. Kepner, 82 Cal.App.2d 905, 187 P.2d 800 (1947) (75- pound German police dog, served as watch dog at junkyard, and kept tied during day); Perkins v. Drury, 57 N.M. 269, 258 P.2d 379 (1953) (children warned to stay away from dog); Hill v. Moseley, 220 N.C. 485, 17 S.E.2d 676 (1941) (dog had bad reputation in the neighborhood); Coogan v. Nelson, 92 A.3d 213 (R.I. 2014) (UPS driver who was bitten showed that dog had previously inflicted a deep scratch on nose of a child); and Allen v. Cox, 285 Conn. 603, 942 A.2d 296 (2008) (where plaintiff was injured while trying to save her own cat from attack by neighbor's cat, owner's knowledge that its cat had a tendency to attack other animals did not

necessarily imply knowledge of propensity to harm persons, but is enough to create jury question).

Can plaintiff show that the owner knew the animal had a vicious nature merely by showing that it belonged to a particular breed? Compare Montiero v. Silver Lake, 813 A.2d 978 (R.L 2003) (pit bull--declining to create "species-specific" standard of care because that is better left to legislature); Carter v. Metro North Associates, 255 A.D.2d 251, 680 N.Y.S.2d 239 (1998) (reversing trial court judge's taking judicial notice of vicious nature of pit bulls); Bard v. Jahnke, 6 N.Y.3d 592, 848 N.E.2d 463, 815 N.Y.S.2d 16 (2006) (plaintiffs expert's statement that breeding bulls are generally dangerous and vicious animals not enough to establish particular animal's propensity); Morgan v. Marquis, 50 A.3d 1 (Maine 2012) (Maine does not recognize pit bulls are per se abnormally dangerous, requiring plaintiff to prove that specific dog was known by owners to have dangerous propensity in order to recover in strict liability); and Moore v. Gaut, 2015 WL 9584389 (Tenn. App. 2015) (rebuffing plaintiffs attempt to characterize Great Dane as dangerous based on the breed's size and strength; plaintiff must show this Great Dane was known to its owner to be dangerous) with Poznanski v. Horvath, 788 N.E.2d 1255 (Ind. 2003) (recognizing that plaintiff could use evidence that dog belonged to breed known to exhibit vicious or dangerous tendencies as proof that owner knew particular animal had such tendencies, but declining to apply in case involving mixed-breed sheepdog) and City of Toledo v. Tellings, 114 Ohio St.3d 278, 871 N.E.2d 1152 (2007) (upholding as constitutional breed-specific regulations imposed on owners of pit bulls by City of Toledo).

Maryland has been on both sides of this issue recently. The Court of Appeals issued an opinion holding that strict liability applied to pit bulls or mixed-breed pit bulls without a showing of dangerous propensity in the particular dog involved. It then reconsidered that decision and limited its application to pure bred pit bulls. Tracey v. Solesky, 427 Md. 627, 50 A.3d 1075 (2012) (as amended on reconsideration). Then the Legislature acted. Md. Code Ann., Cts. & Jud. Proc. § 3-1901 (effective April 8, 2014) (eliminating "breed or heritage of the dog" as factor affecting liability).

Can plaintiff show that the owner knew an animal had a vicious propensity merely by showing that it belonged to a group (gaggle) of animals that had shown themselves to be vicious? Plaintiff was visiting defendant whom she had met through a message board for gardening enthusiasts to view some of defendant's plants. As plaintiff attempted to leave, she was frightened by a domestic goose that squawked at her and reached out as if it meant to bite her chest. She retreated to defendant's porch where defendant gave her a bamboo pole to fend off the birds. During her second attempt to leave, she was again attacked and broke her arm fleeing the birds. Plaintiff put on evidence that a police officer previously had been attacked by one of the geese, but that one had been confined elsewhere when plaintiff was attacked. Does plaintiffs claim fail

because she cannot show that owner knew the particular goose that attacked that day had a dangerous propensity? Olier v. Bailey, 164 So.3d 982 (Miss. 2015) (holding that when a person keeps a large group of essentially indistinguishable animals, some of which have

exhibited dangerous propensities in the past, she can be strictly liable for injuries attributable to characteristics that the animals have exhibited collectively).

Note that although many of the cases use the term "vicious," the test is really whether the animal has a "dangerous propensity abnormal to its class." Restatement (Second) of Torts § 509, comment c (1977) (large dog that owner knows has a tendency to "fawn violently" would be strictly liable for harm done by dog's playfulness or demonstrative show of affection). See also Bard v. Jahnke, 6 N.Y.3d 592, 848 N.E.2d 463, 815 N.Y.S.2d 16 (2006) (vicious propensity includes animal's propensity to do any act that might endanger the safety of the person or property of others in a given situation); Bauman v. Auch, 539 N.W.2d 320 (S.D.1995) (testimony that horse was flighty, high-strung, and spirited, not mean or vicious, enough to create jury question on issue whether strict liability should apply); and the Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 23 (2010) ("dangerous tendencies abnormal for the animal's category").

If the plaintiff is unable to prove that the owner knew or should have known of a domestic animal's dangerous propensities, then strict liability does not apply and the plaintiff must prove negligence in order to recover. See, e.g., Duren v. Kunkel, 814 S.W.2d 935 (Mo.1991) (plaintiff not entitled to strict liability because failed to show that Limousin bull had any dangerous propensity different from any other bull of its breed or class, but was entitled to go to jury on question of owner's negligence in failing to protect plaintiff from animal) and Bushnell v. Mott, 254 S.W.3d 451 (Tex. 2008) (although plaintiffs failure to show dogs had known vicious propensity meant

that strict liability did not apply, plaintiff presented evidence that owner was negligent in failing to stop dogs after attack had begun). But New York provides that the sole claim against owners of domestic animals is in strict liability based on a showing of dangerous propensity and does not allow an alternative negligence claim. Bard v. Jahnke, 6 N.Y.3d 592, 848 N.E.2d 463 (2006) (no companion common-law cause of action for negligence available if plaintiff cannot show requirement of scienter for strict liability where animal injured plaintiff in its own barn).

In many states, the common law regarding liability for dog bites has been changed by statute. These statutes usually do away with the necessity of plaintiffs proving scienter in order to recover. See, for example, Minn. Stat. Ann. § 347.22. The statutes also may list defenses--e.g., plaintiff committing a trespass or presence of warning signs. See, for example, the New Hampshire statute quoted in Glidden v. Szybiak, page 86. Colorado's statute provides an exception for "working" dogs. Robinson v. Legro, 325 P.3d 1053 (Colo. 2014) (interpreting exemption in case

involving predator control dogs guarding sheep who attacked a bicyclist on federal land within a national forest where both had a permit to be). Almost all states also have a statute limiting common law liability for equine activities. See, for example, Ohio Rev. Code § 2305.321 and Loftin v. Lee, 341 S.W.3d 352 (Tex. 2011) (interpreting Tex. § 87.001-.005 and noting that all but five states have in some way limited the common law liability.)

Liability also is affected by statutory provisions requiring dogs to be muzzled or leashed. If a person is injured due to the failure of the owner to comply with such ordinance, negligence per se may apply. Wistafka v. Grotowski, 205 III.App. 529 (1917). As in all negligence per se cases, causation still must be proved. If the muzzling of the dog would not have prevented the injury, as where the dog does not bite the plaintiff but knocks him down, there is no causal connection between the injury and the violation of the statute, so plaintiff must prove negligence based on conduct other than the statutory violation. Kennet v. Sossnitz, 260 App.Div. 759, 23 N.Y.S.2d 961 (1940), aff'd, 286 N.Y. 623, 36 N.E.2d 459 (1941).

In Florida, a dog owner who displays an easily readable sign that says "BAD DOG" in a prominent place in his premises is not liable in strict liability to anyone who is at least 6 years old. Suppose an owner who displays such a sign says to an invitee, "Rex can be bad, but he can also be good." Rex is bad that day. See Noble v. Yorke, 490 So.2d 29 (Fla. 1986) (cannot take advantage of statute if told plaintiff to ignore sign and enter side yard).

Should a landlord have a duty to tell a potential tenant that a neighbor owns a pit bull dog? See Wylie v. Gresch, 191 Cal.App.3d 412, 236 Cal.Rptr. 552 (1987) (no duty--"a vicious dog is a danger one might expect to encounter anywhere in our society").

2. Abnormally Dangerous Activities

Rylands v. Fletcher

In the Exchequer, 3 H. & C. 774, 159 Eng.Rep. 737, 1865.

In the Exchequer Chamber, L.R. 1 Ex. 265, 1866.

In the House of Lords, L.R. 3 H.L. 330, 1868.

[Action brought in 1861 and tried at the Liverpool Summer Assizes (1862). The material facts in the special case stated by the arbitrator were as follows:

The defendants were the owners of a mill. In order to supply it with water they constructed upon the nearby land of Lord Wilton, with his permission, a reservoir. The plaintiff under lease from Lord Wilton was working certain coal mines under lands close to but not adjoining the premises on which the reservoir was constructed. They worked their mine in the direction of the reservoir until they came upon certain old

792

workings, part of which at least had been made and abandoned at a time beyond living memory. These workings consisted of horizontal passages and vertical shafts, the latter apparently filled with rubbish and marl similar to that of the solid earth surrounding them. The defendant employed a competent engineer and competent contractors to plan and construct the reservoir, and it was so planned and constructed solely by them upon a site, in the choice of which the defendants were guilty of no personal fault. In fact, the old mine workings lay beneath it and, continuing under the intermediate lands, communicated, at the point to which the plaintiff had pushed its workings in that direction, with the workings of the plaintiff. The contractors in excavating for the bed of the reservoir came upon five of the above mentioned vertical shafts; the sides or walls of these were of timber, but, because they were filled with soil of the same kind as that composing the surrounding ground, neither the

contractors nor the defendants suspected that they were abandoned mine shafts. The arbitrator found that the defendants were guilty of no personal negligence or fault, but that the engineer and contractors had not in fact exercised proper care, with reference to the shafts discovered, to provide for the sufficiency of the reservoir to bear the pressure that it was designed to bear when in use.

The reservoir was completed in December, 1860, and the defendants had it partly filled. Within a few days, one of the shafts that had been met while excavating gave way and burst downward, letting the water into the abandoned workings beneath, through which it flowed, through the communications that the plaintiffs in working their mine had made between the two, into the plaintiffs' workings, flooding their mine.

The question for the opinion of the Court was whether the plaintiff was entitled to recover damages from the defendant by reason of the matters thus stated by the arbitrator.

In the Exchequer, judgment was given for the defendants by a 2-to-1 vote. Martin, B., said there was no trespass, because the damage was not "immediate," but "mediate or consequential." There was no nuisance, because the defendants were doing a lawful and reasonable act. The same rule must be applied to real property as to personal property, that there must be negligence on the part of the defendant to make him responsible. The plaintiff brought error to the Exchequer Chamber.]

BlACKBURN, J. ***It appears from the statement in the case, that the plaintiff was damaged by his property being flooded by water which, without any fault on his part, broke out of a reservoir

constructed on the defendants' land by the defendants' orders, and maintained by the defendants. ***

The plaintiff, though free from all blame on his part, must bear the loss, unless he can establish that it was the consequence of some default for which the defendants are responsible. The question of law therefore arises, what is the obligation which the law casts on a person who, like the defendants, lawfully brings on his land something which though

793

harmless whilst it remains there, will naturally do mischief if it escape out of his land. It is agreed on all hands that he must take care to keep in that which he has brought on the land and keeps there, in order that it may not escape and damage his neighbors; but the question arises whether the duty which the law casts upon him, under such circumstances, is an absolute duty to keep it in at his peril, or is, as the majority of the Court of Exchequer have thought, merely a duty to take all reasonable and prudent precautions, in order to keep it in, but no more. If the first be the law, the person who has brought on his land and kept there something dangerous, and failed to keep it in, is responsible for all the natural consequences of its escape. If the second be the limit of his duty, he would not be answerable except on proof of negligence, and consequently would not be answerable for escape arising from any latent defect which ordinary prudence and skill could not detect. ***

We think that the true rule of law is that the person who for his own purposes brings on his lands and collects and keeps there any thing likely to do mischief if it escapes, must keep it in at his peril, and if he

does not do so, is prima facie answerable for all the damage which is the natural consequence of its escape. He can excuse himself by showing that the escape was owing to the plaintiffs default; or perhaps that the escape was the consequence of vis major, or the act of God; but as nothing of this sort exists here, it is unnecessary to inquire what excuse would be sufficient. The general rule, as above stated, seems on principle just. The person whose grass or corn is eaten down by the escaping cattle of his neighbor, or whose mine is flooded by the water from his neighbor's reservoir, or whose cellar is invaded by the filth of his neighbor's privy, or whose habitation is made unhealthy by the fumes and noisome vapors of his neighbor's alkali works, is damnified without any fault of his own; and it seems but reasonable and just that the neighbor, who has brought something on his own property which was not naturally there, harmless to others so long as it is confined to his own property, but which he knows to be mischievous if it gets on his neighbor's, should be obliged to make good the damage which ensues if he does not succeed in confining it to his own property. But for his act in bringing it there no mischief could have accrued, and it seems but just that he should at his peril keep it there, so that no mischief may accrue, or answer for the natural and anticipated consequences. And upon authority, this we think is established to be the law, whether the things so brought be beasts, or water, or filth, or stenches.

The case that has most commonly occurred and which is most frequently to be found in the books, is as to the obligation of the owner of cattle which he has brought on his land to prevent their escaping and doing mischief. The law as to them seems to be

perfectly settled from early times; the owner must keep them in at his peril, or he will be answerable for the natural consequences of their escape; that is, with regard to tame beasts, for the grass they eat and trample upon, though

794

not for an injury to the person of others, for our ancestors have settled that it is not the general nature of horses to kick, or bulls to gore; but if the owner knows that the beast has a vicious propensity to attack man, he will be answerable for that too. ***

Judgment for the plaintiff.

Rylands and Horrocks [mill owners and reservoir builders] brought error to the House of Lords against the judgment of the Exchequer Chamber, which had reversed the judgment of the Court of Exchequer.

[Caption: Lord Blackburn.]

[Caption: Lord Cairns.]

The Lord Chancellor (Lord Cairns). ***My Lords, the principles in which this case must be determined appear to me to be extremely simple. The defendants, treating them as the owner or occupiers of the close on which the reservoir was constructed, might lawfully have used that close for any purpose for which it might in the ordinary course of the enjoyment of land be used; and if, in what I may term the natural user of that land, there had been any accumulation of water, either on the surface or underground, and if, by the operation of the laws of nature, that accumulation of water had passed off into the close occupied by the plaintiff, the plaintiff

could not have complained that that result had taken place. If he had desired to guard himself against it, it would have been lain upon him to have done so, by leaving, or by interposing, some barrier between his close and the close of the defendants in order to have prevented that operation of the laws of nature.

***

795

On the other hand, if the defendants, not stopping at the natural use of their close, had desired to use it for any purpose which I may term a non-natural use, for the purpose of introducing into the close that which in its natural condition was not in or upon it, for the purpose of introducing water either above or below ground in quantities and in a manner not the result of any work or operation on or under the land; and if in consequence of their doing so, or in consequence of any imperfection in the mode of their doing so, the water came to escape and to pass off into the close of the plaintiff, then it appears to me that that which the defendants were doing they were doing at their own peril; and, if in the course of their doing it the evil arose to which I have referred, the evil, namely, of the escape of the water and its passing away to the close of the plaintiff and injuring the plaintiff, then for the consequence of that, in my opinion, the defendants would be liable. As the case of Smith v. Kendrick is an illustration of the first principle to which I have referred, so also the second principle to which I have referred is well illustrated by another case in the same Court, the case of Baird v. Williamson, 15 C.B.N.S. 317, which was also cited in the argument at the bar. ***

Judgment of the Court of Exchequer Chamber affirmed.

[The concurring opinion of LORD CRANWORTH is omitted.]

NOTES AND QUESTIONS

1. Why not liability simply for trespass to land? Or nuisance? The contractor who did the work was negligent in not discovering the abandoned mine shafts and blocking them up. Why was defendant not liable for the negligence of the person with whom he contracted to do the work? Would he be liable today?

2. Professor Simpson, in Legal Liability for Bursting Reservoirs: The Historical Context of Rylands v. Fletcher, 13 J.Leg.Stud. 209 (1984), states that bursting dams were a particular problem at the time and that events had prompted public inquiries and legislation concerning the liability of dam owners. The reservoir in this case was located in a part of Lancashire devoted to coal mining. Has this any significance?

3. How far does the opinion of Lord Cairns limit that of Blackburn in Rylands? What does he mean by a "natural use" of land? Something like trees, in a state of nature? Note that Lord Cairns relies on Smith v. Kendrick, 7 C.B. 515, 137 Eng.Rep. 205 (1849), where defendant's normal and usual mining operations resulted in the flow of percolating water from springs into plaintiffs adjoining mine, and defendant was held not liable. A parallel case is Zampos v. United States Smelting R. & M. Co., 206 F.2d 171 (10th Cir.1953) (applying Utah law) (summary judgment for defendant upheld because no showing that defendant did anything to affect natural flow of water). Lord Cairns also relies upon Baird v. Williamson, 15 C.B. (N.S.) 376, 143 Eng.Rep. 831 (1863), where defendant pumped the water from

his mine to a higher level, from which it flowed into plaintiffs mine, and was held liable.

796

4. Subsequent decisions in England followed the distinction between "natural" and "nonnatural" uses of land made by Lord Cairns. In determining what is a nonnatural use, the English courts have looked not only to the character of the thing or activity in question, but also to the place and manner in which it is maintained, and its relation to its surroundings. The distinction between natural and non-natural use has enabled the courts to infuse notions of social and economic needs prevailing at a given time and place. The scope of natural use is to be confined so as to give proper scope to the basic rationale of the rule to compensate even though the operations may have been for the community's benefit. Transco v. Stockport MBC [2004] 2 A.C. 1 (House of Lords). Frustration about the proper bounds of liability led the High Court of Australia to collapse it into the general rule of negligence liability: Burnie Port Authority v. General Jones, (1994) 179 Comm. L. Rep. 520.

5. In the United States, Rylands v. Fletcher started out with approval in Ball v. Nye, 99 Mass. 582, 97 Am.Dec. 56 (1868) (percolation of filthy water) and Cahill v. Eastman, 18 Minn. 324, 10 Am.Rep. 184 (1872) (water escaping from a tunnel). The case then was rejected in its entirety by three leading American courts in three years. Losee v. Buchanan, 51 N.Y. 476, 10 Am.Rep. 623 (1873); Marshall v. Welwood, 38 N.J.L. 339 (1876); Brown v. Collins, 53 N.H. 442, 16 Am.Rep. 372 (1873). The first two of these involved the explosion of ordinary steam boilers, and the third a runaway horse. They were

clearly cases of customary, natural uses, to which the English courts would not have applied the rule. In each case the attack was directed at Blackburn's broad statement in the intermediate court, and the decision in the House of Lords was given little or no attention. Rylands v. Fletcher was treated as holding that the defendant is absolutely liable whenever anything whatever escapes from his control and causes damage. In other words, the rule of the case was misstated, and as misstated was rejected, in cases in which it had no proper application in the first place.

6. These decisions gave Rylands v. Fletcher a bad name. For a time, a majority of the courts in the United States that considered the case by name rejected it. In recent years, the American trend has been very much in favor of approval of the case, and a majority now favor the case, including New Jersey, home of the Marshall v. Welwood opinion in the previous note. State, Dept, of Environmental Protection v. Ventron Corp., 94 N.J. 473, 468 A.2d 150, 157 (N.J. 1983) ("We believe it is time to recognize expressly that the law of liability has evolved so that a landowner is strictly liable to others for harm caused by toxic wastes that are stored on his property and flow onto the property of others. Therefore, we overrule Marshall v. Welwood and adopt the principle of liability originally declared in Rylands v. Fletcher. The net result is that those who use, or permit others to use, land for the conduct of abnormally dangerous activities are strictly liable for resultant damages."). Covey v. Brishka, 396 Mont. 362, 445 P.3d 785 (2019) (the discharge of water from an uphill artificial pond breach that damaged the downhill property owner's land is exactly the type of harm that makes owning a fish

pond on the side of a mountain an abnormally dangerous activity or condition to which strict liability should apply).

797

What factors may have influenced recent courts to accept the Rylands principle? Have there been changes in society that made courts more willing to impose strict liability for hazardous activities? See Cities Service Co. v. State, 312 So.2d 799, 801 (Fla.App. 1975) ("In early days it was important to encourage persons to use their land by whatever means were available for the purpose of commercial and industrial development. In a frontier society there was little likelihood that a dangerous use of land could cause damage to one's neighbor. Today our life has become more complex. Many areas are overcrowded, and even the non-negligent use of one's land can cause extensive damages to a neighbor's property. Though there are still many hazardous activities which are socially desirable, it now seems reasonable that they pay their own way. It is too much to ask an innocent neighbor to bear the burden thrust upon him as a consequence of an abnormal use of the land next door. The doctrine of Rylands v. Fletcher should be applied in Florida.")

Miller v. Civil Constructors, Inc.

Illinois Court of Appeal, 1995.

272 Ill.App. 3d 263, 209 Ill.Dec. 311, 651 N.E.2d 239.

Bowman, J. ***

[Plaintiff, Gary Miller, was injured when a stray bullet ricocheted during the course of firearm practice in a nearby gravel pit and

caused him to fall from a truck. Count I (against the owner of the gravel pit) and Count V (against the employer of the police officers engaged in firearm practice) alleged that those defendants were strictly liable for injuries to plaintiff arising from "ultrahazardous" activity for which defendants were legally responsible because of the owner's control of the premises or the police department's employees' discharge of firearms. The circuit court of Stephenson County dismissed the strict liability counts of the complaint and plaintiff appeals.]

The doctrine of strict liability, sometimes called absolute liability, has its genesis in the English rule of Rylands v. Fletcher (1868), L.R. 3 H.L. 330, wherein strict liability was imposed on the defendant owners of land for harm resulting from the abnormal or nonnatural use of the defendants' land which arose when water from defendants' reservoir flooded the adjoining mine of the plaintiff. Subsequent decisions interpreted the rule to be confined to things or activities which were "extraordinary," or "exceptional," or "abnormal" so that there was some special use bringing with it increased danger to others. (W. Keeton, D. Dobbs, R. Keeton, & D. Owen, Prosser & Keeton on the Law of Torts § 78, at 545-46 (5th ed. 1984).) From the decisions of the English courts the "rule" of Rylands which has emerged is that "the defendant will be liable when he damages another by a thing or activity unduly dangerous and inappropriate to the place where it is maintained, in the light of the character of that place and its surroundings." Prosser, § 78, at 547-48.

Most jurisdictions in this country have adopted the rule of Rylands to impose strict liability on owners and users of land for harm resulting from abnormally dangerous conditions and activities. [C] The best-known applications of the Rylands rule imposing strict liability on a defendant involve the storing and use of explosives and flammable materials. [Cc] * *

[After discussing the alternative to strict liability, negligence, the court noted that the standard of care in negligence is a] flexible one which varies according to the particular circumstances. Imposing a duty of ordinary care, even where it may become a high degree of care under the particular circumstances, is quite different from imposing strict or absolute liability by classifying the activity ultrahazardous. Our review of the authorities thus discloses that the discharge of firearms resulting in injury ordinarily presents a question of negligence and that the standard of care is ordinary care--one which may be equated to a high degree of care because of the particular circumstances presented.

We return to the threshold question whether the use of firearms ought to be classified as an ultrahazardous activity. This type of inquiry is a question of law that we believe will be subjected to more rigorous, disciplined, and consistent analysis if we adopt the use of the Restatement principles and factors discussed, or at least implicitly considered, in prior decisions. [Cc] We expressly adopt the use of the Restatement principles and factors as an aid in deciding this type of question.

Section 519 of the Restatement states the general principle that "one who carries on an abnormally dangerous activity is subject to liability

for harm to the person, land or chattels of another resulting from the activity, although he has exercised the utmost care to prevent the harm." [C] Section 520 of the Restatement sets forth several factors which we will consider in determining whether an activity is abnormally dangerous (ultrahazardous):

"(a) existence of a high degree of risk of some harm to the person, land or chattels of others;

(b) likelihood that the harm that results from it will be great;

(c) inability to eliminate the risk by the exercise of reasonable care;

(d) extent to which the activity is not a matter of common usage;

(e) inappropriateness of the activity to the place where it is carried on; and

(f) extent to which its value to the community is outweighed by its dangerous attributes."

799

While all of these factors are important and should be considered, ordinarily the presence of more than one factor, but not all of them, will be necessary to declare the activity ultrahazardous as a matter of law so as to hold the actor strictly liable. The essential question is whether the risk created is so unusual, either because of its magnitude or because of the circumstances surrounding it, as to justify the imposition of strict liability even though the activity is carried on with all reasonable care. (Restatement § 520, comment f, at 37-38.) Considerations of public policy also enter prominently into the decisions by our courts to impose strict liability (at least in product liability cases). [Cc] Particular consideration is also given to

the appropriateness of the activity to the place where it is maintained, in light of the character of the place and its surroundings under the Rylands rule. [C]

The use of guns or firearms, even though frequently classified as dangerous or even highly dangerous, is not the type of activity that must be deemed ultrahazardous when the above-stated criteria are taken into consideration. First, the risk of harm to persons or property, even though great, can be virtually eliminated by the exercise of reasonable or even "utmost" care under the circumstances [C]. The doctrine of strict or absolute liability is ordinarily reserved for abnormally dangerous activities for which no degree of care can truly provide safety. There is a clear distinction between requiring a defendant to exercise a high degree of care when involved in a potentially dangerous activity and requiring a defendant to insure absolutely the safety of others when engaging in ultrahazardous activity. [C]

Second, the use of firearms is a matter of common usage and the harm posed comes from their misuse rather than from their inherent nature alone [c]. Third, the activity in this case was carried on at a firing range in a quarry located somewhere near the City of Freeport. We assume that the location was appropriate for such activity in the absence of further factual allegations in the complaint particularly describing the area as inappropriate for the target practice. Finally, the target practice is of some social utility to the community; this weighs against declaring it ultrahazardous where the activity was alleged to have been performed by law enforcement officers apparently to improve their skills in the handling of weapons.

In light of the above considerations, we conclude that plaintiffs allegations are legally insufficient to show that the activity should be declared ultrahazardous so as to subject defendants to claims premised on a theory of strict liability. [C]

The judgment of the circuit court of Stephenson County is affirmed.

Affirmed.

RATHJE and HUTCHINSON, JJ., concur.

800

NOTES AND QUESTIONS

1. Note that the principal case uses the terms "ultrahazardous" and "abnormally dangerous" activity. The first Restatement of Torts had used the term "ultrahazardous" and applied it to an activity that "necessarily involves a risk of serious harm to the persons, land or chattels of others which cannot be eliminated by the exercise of the utmost care and ***is not a matter of common usage." § 520. The definition is categoric. If an activity is ultrahazardous, it would be so regarded no matter where it took place. This is the approach taken by Alaska regarding storage of explosives in Yukon Equipment, Inc. v. Fireman's Fund Ins. Co., 585 P.2d 1206 (Alaska 1978). That case carried the approach so far that it found liability on the part of the company storing the explosives, even though they were stolen by the other defendant and deliberately set off to produce the explosion. (This situation is the subject of a caveat in the Restatement.)

2. The Second Restatement, on the other hand, uses the term "abnormally dangerous" and makes the decision depend on the nature of the location where the activity takes place. Consider, for

example, whether a hardware store in a small town, keeping a small amount of dynamite for the benefit of farmers clearing fields of stumps, would be subject to strict liability. Cf. Barnes v. Zettlemoyer, 25 Tex.Civ.App. 468, 62 S.W. Ill (1901) (no strict liability). The Third Restatement retains the "abnormally dangerous" language and defines it as one that "creates a foreseeable and highly significant risk of physical harm even when reasonable care is exercised by all actors; and the activity is not one of common usage." Note that the "value to the community" factor is not included. Do you expect that the courts will follow the Restatement (Third)'s lead on this? Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 20 (2010).

3. Opinions frequently recite that blasting is the paradigm for an abnormally dangerous activity. Most jurisdictions impose strict liability for blasting if it is done in an urban or residential area. Dyer v. Maine Drilling & Blasting, Inc., 984 A.2d 210, 216 (Maine 2009) ("[a]t least forty-one states have adopted some form of strict liability for blasting"). Some opinions state that the nature of the location is important in determining whether the blasting activity is subject to strict liability, while others impose strict liability for use of explosives but not their storage. See Otero v. Burgess, 84 N.M. 575, 505 P.2d 1251 (1973); cf. Chavez v. Southern Pac. Transp. Co., 413 F.Supp. 1203 (E.D.Cal. 1976) (keeping 18 bomb-loaded box cars in railroad yard near town). Sometimes strict liability is accomplished by calling the blasting activity a nuisance, as in Gossett v. Southern R. Co., 115 Tenn. 376, 89 S.W. 737 (1905). (See Chapter 16.) A few courts, stressing the comparative safety with which blasting can be carried on by the exercise of due care, hold that strict liability is not

applicable and there is liability only for negligence. Wadleigh v. Manchester, 100 N.H. 277, 123 A.2d 831 (1956).

801

Indiana Harbor Belt R.R. Co. v. American Cyanamid Co.

United States Court of Appeals, Seventh Circuit, 1990.

916 F.2d 1174.

Posner, J.

American Cyanamid Company, the defendant in this diversity tort suit governed by Illinois law, is a major manufacturer of chemicals, including acrylonitrile, a chemical used in large quantities in making acrylic fibers, plastics, dyes, pharmaceutical chemicals, and other intermediate and final goods. On January 2, 1979, at its manufacturing plant in Louisiana, Cyanamid loaded 20,000 gallons of liquid acrylonitrile into a railroad tank car that it had leased from the North American Car Corporation. The next day, a train of the Missouri Pacific Railroad picked up the car at Cyanamid's siding. The car's ultimate destination was a Cyanamid plant in New Jersey served by Conrail rather than by Missouri Pacific. The Missouri Pacific train carried the car north to the Blue Island railroad yard of Indiana Harbor Belt Railroad, the plaintiff in this case, a small switching line that has a contract with Conrail to switch cars from other lines to Conrail, in this case for travel east. The Blue Island yard is in the Village of Riverdale, which is just south of Chicago and part of the Chicago metropolitan area.

The car arrived in the Blue Island yard on the morning of January 9, 1979. Several hours after it arrived, employees of the switching line noticed fluid gushing from the bottom outlet of the car. The lid on the outlet was broken. After two hours, the line's supervisor of equipment was able to stop the leak by closing a shut-off valve controlled from the top of the car. No one was sure at the time just how much of the contents of the car had leaked, but it was feared that all 20,000 gallons had, and since acrylonitrile is flammable at a temperature of 30 degrees Fahrenheit or above, highly toxic, and possibly carcinogenic [c], the local authorities ordered the homes near the yard evacuated. The evacuation lasted only a few hours, until the car was moved to a remote part of the yard and it was discovered that only about a quarter of the acrylonitrile had leaked. Concerned nevertheless that there had been some contamination of soil and water, the Illinois Department of Environmental Protection ordered the switching line to take decontamination measures that cost the line $981,022.75, which it sought to recover by this suit.

One count of the two-count complaint charges Cyanamid with having maintained the leased tank car negligently. The other count asserts that the transportation of acrylonitrile in bulk through the Chicago metropolitan area is an abnormally dangerous activity, for the consequences of which the shipper (Cyanamid) is strictly liable to the switching line, which bore the financial brunt of those consequences because of the decontamination measures that it was forced to take. ***

[The trial court judge found that strict liability applied and granted summary judgment in favor of the plaintiff on that count. Defendant appealed.]

The question whether the shipper of a hazardous chemical by rail should be strictly liable for the consequences of a spill or other accident to the shipment en route is a novel one in Illinois[.] ***

The parties agree that the question whether placing acrylonitrile in a rail shipment that will pass through a metropolitan area subjects the shipper to strict liability is, as recommended in Restatement (Second) of Torts § 520, comment l (1977), a question of law, so that we owe no particular deference to the conclusion of the district court. They also agree ***that the Supreme Court of Illinois would treat as authoritative the provisions of the Restatement governing abnormally dangerous activities. The key provision is section 520, which sets forth six factors to be considered in deciding whether an activity is abnormally dangerous and the actor therefore strictly liable.

The roots of section 520 are in nineteenth century cases. The most famous one is Rylands v. Fletcher, 1 Ex. 265, aff'd, L.R. 3 H.L. 300 (1868), but a more illuminating one in the present context is Guille v. Swan, 19 Johns. (N.Y.) 381 (1822). A man took off in a hot-air balloon and landed, without intending to, in a vegetable garden in New York City. A crowd that had been anxiously watching his involuntary descent trampled the vegetables in their endeavor to rescue him when he landed. The owner of the garden sued the balloonist for the resulting damage, and won. Yet the balloonist had not been careless. In the then state of ballooning it was impossible to make a pinpoint landing.

Guille is a paradigmatic case for strict liability, (a) The risk (probability) of harm was great, and (b) the harm that would ensue if the risk materialized could be, although luckily was not, great (the balloonist could have crashed into the crowd rather than into the vegetables). The confluence of these two factors established the urgency of seeking to prevent such accidents, (c) Yet such accidents could not be prevented by the exercise of due care; the technology of care in ballooning was insufficiently developed, (d) The activity was not a matter of common usage, so there was no presumption that it was a highly valuable activity despite its unavoidable riskiness, (e) The activity was inappropriate to the place in which it took place--densely populated New York City. The risk of serious harm to others (other than the balloonist himself, that is) could have been reduced by shifting the activity to the sparsely inhabited areas that surrounded the city in those days, (f) Reinforcing (d), the value to the community of the activity of recreational ballooning did not appear to be great enough to offset its unavoidable risks.

These are, of course, the six factors in section 520. They are related to each other in that each is a different facet of a common quest for a proper legal regime to govern accidents that negligence liability cannot adequately control. The interrelations might be more perspicuous if the

six factors were reordered. One might for example start with (c), inability to eliminate the risk of accident by the exercise of due care. [C] The baseline common law regime of tort liability is negligence. When it is a workable regime, because the hazards of an activity can

be avoided by being careful (which is to say, nonnegligent), there is no need to switch to strict liability. Sometimes, however, a particular type of accident cannot be prevented by taking care but can be avoided, or its consequences minimized, by shifting the activity in which the accident occurs to another locale, where the risk or harm of an accident will be less ((e)), or by reducing the scale of the activity in order to minimize the number of accidents caused by it ((f)). [Cc] By making the actor strictly liable--by denying him in other words an excuse based on his inability to avoid accidents by being more careful--we give him an incentive, missing in a negligence regime, to experiment with methods of preventing accidents that involve not greater exertions of care, assumed to be futile, but instead relocating, changing, or reducing (perhaps to the vanishing point) the activity giving rise to the accident. [C] The greater the risk of an accident ((a)) and the costs of an accident if one occurs ((b)), the more we want the actor to consider the possibility of making accident-reducing activity changes; the stronger, therefore, is the case for strict liability. Finally, if an activity is extremely common ((d)), like driving an automobile, it is unlikely either that its hazards are perceived as great or that there is no technology of care available to minimize them; so the case for strict liability is weakened.

The largest class of cases in which strict liability has been imposed under the standard codified in the Second Restatement of Torts involves the use of dynamite and other explosives for demolition in residential or urban areas. Restatement, supra, § 519, comment d; [c]. Explosives are dangerous even when handled carefully, and we therefore want blasters to choose the location of the activity with care and also to explore the feasibility of using safer substitutes

(such as a wrecking ball), as well as to be careful in the blasting itself. Blasting is not a commonplace activity like driving a car, or so superior to substitute methods of demolition that the imposition of liability is unlikely to have any effect except to raise the activity's costs.

Against this background we turn to the particulars of acrylonitrile. Acrylonitrile is one of a large number of chemicals that are hazardous in the sense of being flammable, toxic, or both; acrylonitrile is both, as are many others. A table in the record... contains a list of the 125 hazardous materials that are shipped in highest volume on the nation's railroads. Acrylonitrile is the fifty-third most hazardous on the list. Number 1 is phosphorus (white or yellow), and among the other materials that rank higher than acrylonitrile on the hazard scale are anhydrous ammonia, liquified petroleum gas, vinyl chloride, gasoline, crude petroleum, motor fuel antiknock compound, methyl and ethyl chloride, sulphuric acid, sodium metal, and chloroform. The plaintiff's lawyer acknowledged at

804

argument that the logic of the district court's opinion dictated strict liability for all 52 materials that rank higher than acrylonitrile on the list, and quite possibly for the 72 that rank lower as well, since all are hazardous if spilled in quantity while being shipped by rail. Every shipper of any of these materials would therefore be strictly liable for the consequences of a spill or other accident that occurred while the material was being shipped through a metropolitan area. The plaintiff's lawyer further acknowledged the irrelevance, on her view of the case, of the fact that Cyanamid had leased and filled the car that

spilled the acrylonitrile; all she thought important is that Cyanamid introduced the product into the stream of commerce that happened to pass through the Chicago metropolitan area. Her concession may have been incautious. One might want to distinguish between the shipper who merely places his goods on his loading dock to be picked up by the carrier and the shipper who, as in this case, participates actively in the transportation. But the concession is illustrative of the potential scope of the district court's decision.

***

Cases... that impose strict liability for the storage of a dangerous chemical provide a potentially helpful analogy to our case. But they can be distinguished on the ground that the Storer... has more control than the shipper.

So we can get little help from precedent, and might as well apply section 520 to the acrylonitrile problem from the ground up. To begin with, we have been given no reason ***for believing that a negligence regime is not perfectly adequate to remedy and deter, at reasonable cost, the accidental spillage of acrylonitrile from rail cars. ***[Although acrylonitrile is flammable even at relatively low temperatures, and toxic, it is not so corrosive or otherwise destructive that it will eat through or otherwise damage or weaken a tank car's valves although they are maintained with due (which essentially means, with average) care. No one suggests, therefore, that the leak in this case was caused by the inherent properties of acrylonitrile. It was caused by carelessness--whether that of the North American Car Corporation in failing to maintain or inspect the car properly, or that of Cyanamid in failing to maintain or inspect it, or

that of the Missouri Pacific when it had custody of the car, or that of the switching line itself in failing to notice the ruptured lid, or some combination of these possible failures of care. Accidents that are due to a lack of care can be prevented by taking care; and when a lack of care can ***be shown in court, such accidents are adequately deterred by the threat of liability for negligence.

***

The district judge and the plaintiff's lawyer make much of the fact that the spill occurred in a densely inhabited metropolitan area. Only 4,000 gallons spilled; what if all 20,000 had done so? Isn't the risk that this might happen even if everybody were careful sufficient to warrant

805

giving the shipper an incentive to explore alternative routes? Strict liability would supply that incentive. But this argument overlooks the fact that, like other transportation networks, the railroad network is a hub-and-spoke system. And the hubs are in metropolitan areas. Chicago is one of the nation's largest railroad hubs. In 1983, the latest date for which we have figures, Chicago's railroad yards handled the third highest volume of hazardous-material shipments in the nation. East St. Louis, which is also in Illinois, handled the second highest volume. Office of Technology Assessment, Transportation of Hazardous Materials 53 (1986). With most hazardous chemicals (by volume of shipments) being at least as hazardous as acrylonitrile, it is unlikely--and certainly not demonstrated by the plaintiff--that they can be rerouted around all the metropolitan areas in the country, except at prohibitive cost.

Even if it were feasible to reroute them one would hardly expect shippers, as distinct from carriers, to be the firms best situated to do the rerouting, w * *

The difference between shipper and carrier points to a deep flaw in the plaintiffs case. Unlike Guille ***and unlike the storage cases, beginning with Rylands itself, here it is not the actors--that is, the transporters of acrylonitrile and other chemicals--but the manufacturers, who are sought to be held strictly liable. [C] A shipper can in the bill of lading designate the route of his shipment if he likes, [c] but is it realistic to suppose that shippers will become students of railroading in order to lay out the safest route by which to ship their goods? Anyway, rerouting is no panacea. Often it will increase the length of the journey, or compel the use of poorer track, or both. When this happens, the probability of an accident is increased, even if the consequences of an accident if one occurs are reduced; so the expected accident cost, being the product of the probability of an accident and the harm if the accident occurs, may rise. [C] It is easy to see how the accident in this case might have been prevented at reasonable cost by greater care on the part of those who handled the tank car of acrylonitrile. It is difficult to see how it might have been prevented at reasonable cost by a change in the activity of transporting the chemical. This is therefore not an apt case for strict liability.

***

In emphasizing the flammability and toxicity of acrylonitrile rather than the hazards of transporting it, as in failing to distinguish between the active and the passive shipper, the plaintiff overlooks

the fact that ultrahazardousness or abnormal dangerousness is, in the contemplation of the law at least, a property not of substances, but of activities: not of acrylonitrile, but of the transportation of acrylonitrile by rail through populated areas. [C] Natural gas is both flammable and poisonous, but the operation of a natural gas well is not an ultrahazardous activity. [C] Whatever the situation under products liability law (section 402A of the Restatement), the manufacturer of a product is not considered to be

engaged in an abnormally dangerous activity merely because the product becomes dangerous when it is handled or used in some way after it leaves his premises, even if the danger is foreseeable. [Cc] The plaintiff does not suggest that Cyanamid should switch to making some less hazardous chemical that would substitute for acrylonitrile in the textiles and other goods in which acrylonitrile is used. Were this a feasible method of accident avoidance, there would be an argument for making manufacturers strictly liable for accidents that occur during the shipment of their products (how strong an argument we need not decide). Apparently it is not a feasible method.

The relevant activity is transportation, not manufacturing and shipping. This essential distinction the plaintiff ignores. But even if the defendant is treated as a transporter and not merely a shipper, the plaintiff has not shown that the transportation of acrylonitrile in bulk by rail through populated areas is so hazardous an activity, even when due care is exercised, that the law should seek to create--perhaps quixotically--incentives to relocate the activity to

nonpopulated areas, or to reduce the scale of the activity, or to switch to transporting acrylonitrile by road rather than by rail, perhaps to set the stage for a replay of Siegler v. Kuhlman[, 81 Wash. 2d 448, 502 P.2d 1181 (1972) (fire on highway caused by gasoline that leaked from overturned tanker truck)]. It is no more realistic to propose to reroute the shipment of all hazardous materials around Chicago than it is to propose the relocation of homes adjacent to the Blue Island switching yard to more distant suburbs. It may be less realistic. Brutal though it may seem to say it, the inappropriate use to which land is being put in the Blue Island yard and neighborhood may be, not the transportation of hazardous chemicals, but residential living. The analogy is to building your home between the runways at O'Hare.

The briefs hew closely to the Restatement, whose approach to the issue of strict liability is mainly allocative rather than distributive. By this we mean that the emphasis is on picking a liability regime (negligence or strict liability) that will control the particular class of accidents in question most effectively, rather than on finding the deepest pocket and placing liability there. At argument, however, the plaintiff's lawyer invoked distributive considerations by pointing out that Cyanamid is a huge firm and the Indiana Harbor Belt Railroad a fifty-mile-long switching line that almost went broke in the winter of 1979, when the accident occurred. Well, so what? A corporation is not a living person but a set of contracts the terms of which determine who will bear the brunt of liability. Tracing the incidence of a cost is a complex undertaking which the plaintiff sensibly has made no effort to assume, since its legal relevance would be dubious. We

add only that however small the plaintiff may be, it has mighty parents: it is a jointly owned subsidiary of Conrail and the Soo line.

***

807

The judgment is reversed (with no award of costs in this court) and the case remanded for further proceedings, consistent with this opinion, on the plaintiffs claim for negligence.

Reversed and remanded, with directions.

NOTES AND QUESTIONS

1. In the Siegler v. Kulman case to which the opinion refers, the Supreme Court of Washington found that strict liability applied to the transportation of gasoline as freight in a tanker truck. The case arose out of an accident in which a high school student on her way home from her afterschool job came upon a gasoline spill that had just occurred on the highway when the tank trailer separated from the truck and overturned. The gasoline spill burst into flames as she reached it. Compare Hurley v. Port Blakely Tree Farms L.P., 182 Wash.App. 753, 332 P.3d 469 (2014) (carefully going through the six Restatement factors and concluding that strict liability does not apply to logging activities in case brought by homeowners whose residences had been damaged by landslides after logging on adjacent land). Without strict liability, what recourse do homeowners have?

2. Activities (in addition to blasting) that have been held to be abnormally dangerous include transportation and storage of toxic chemicals and inflammable liquids, pile driving, crop dusting,

fumigation with toxic gases, testing of rockets, fireworks displays, operation of a plutonium production facility, operation of hazardous waste disposal sites, operation of oil wells, and storage of large quantities of water and other liquids. Note, however, that some of these activities also have been found not to be subject to strict liability. Compare Northglenn v. Chevron USA, Inc., 519 F.Supp. 515 (D. Colo. 1981) (strict liability applied to storage of large amounts of gasoline in underground tanks at service station near residential area) with Hudson v. Peavey Oil Co., 279 Or. 3, 566 P.2d 175 (1977) (no strict liability because filling stations are common in residential areas); Langan v. Valicopters, Inc., 88 Wash.2d 855, 567 P.2d 218 (1977) (strict liability for crop dusting) and Lawler v. Skelton, 241 Miss. 274, 130 So.2d 565 (1961) (negligence for crop dusting); Klein v. Pyrodyne Corp., 117 Wash.2d 1, 810 P.2d 917 (1991) (strict liability for fireworks display at 4th of July celebration) and Cadena v. Chicago Fireworks Mfg. Co., 297 Ill.App. 3d 945, 232 Ill.Dec. 60, 697 N.E.2d 802 (1998) (using same §§ 519-520 analysis, court reaches opposite result).

3. These activities all involve the use of property. Can the abnormally dangerous or ultrahazardous activity theory be used to establish strict liability for other activities not involving the use of land? See Merrill v. Navegar, Inc., 75 Cal.App.4th 500, 89 Cal.Rptr.2d 146, 190 (1999) ("overwhelming majority of American courts have taken the position that the distribution or sale" of firearms is not subject to strict liability), rev'd on other grounds, 26 Cal.4th 465, 28 P.3d 116, 110 Cal.Rptr.2d 370 (2001); Thompson v. Mindis Metals, Inc., 692 So.2d 805 (Ala.1997) (sale of batteries to recycling facility--theory not

applied). What about running the engine of an automobile in the closed garage of a duplex in order to commit suicide?

808

Laterra v. Treaster, 17 Kan.App.2d 714, 844 P.2d 724 (1992) (strict liability applied where plaintiff's decedent was asphyxiated by carbon monoxide that leaked from defendant's decedent's garage).

4. "Common Usage. "Automobile accidents kill and injure more people and damage more property than any of the other activities listed, yet driving is not subject to strict liability in part because it is not abnormal. Similarly, the transmission of electricity and natural gas are considered matters of common usage and thus not subject to strict liability. See, e.g., Voelker v. Delmarva Power & Light Co., 727 F.Supp. 991 (D.Md.1989). What about driving an automobile under the influence of alcohol? See Goodwin v. Reilley, 176 Cal.App.3d 86, 221 Cal.Rptr. 374 (1985) (rejecting the application of strict liability). What about engaging in sexual intercourse while infected with a sexually transmitted disease? See Doe v. Johnson, 817 F.Supp. 1382 (W.D.Mich. 1993) (in action seeking damages for transmission of HIV, the virus that causes AIDS, plaintiffs strict liability count was dismissed). What about the storage of firearms? Police officer's widow filed suit against homeowner who had allowed the man who lived with her to store a firearms collection in the basement of her home in a locked cabinet. His adult son whom she knew to have a history of mental illness and violence and to have been dishonorably discharged from the military had a key to the house and took a .357 magnum with which he shot police officer. Jupin v. Kask, 447 Mass. 141, 849 N.E.2d 829 (2006) (strict liability

claim dismissed because storage of firearms in the home is not an unusual or extraordinary use of property).

5. "Inappropriate for the Location." Many of the differences in the holdings of the cases cited in note 2 can be explained on the basis of the location of the activity. See also the Reporter's Note to § 520 of the Restatement, classifying the cases according to the location of the activity.

6. What is the appropriate location for the producing of plutonium for an atomic bomb? In cases brought by its neighbors against the operators of the Hanford Nuclear Weapons Reservation, the Ninth Circuit determined that Washington state law would find the activity was abnormally dangerous and therefore one to which strict liability would apply under the § 520 factors even though there is no other place appropriate to carry on such an activity. It also rejected defendants' argument that the "public duty" exception to strict liability (Restatement (Second) § 521) should apply since defendants were not public officers or employees carrying out their duties but private contractors doing their patriotic duty by producing plutonium for the war effort, charging the Government only $1 a year to run the facility. In re Hanford Nuclear Reservation Litigation, 534 F.3d 986 (9th Cir. 2008) (applying Washington law).

7. Aviation--Ground Damage. In early stages of commercial aviation, airlines were held strictly liable for ground damage resulting from a crash. This view is no longer justified in light of the safety record of air travel if the basis is an ultrahazardous or abnormally dangerous activity and most courts have retreated to a negligence standard. See Crosby v. Cox Aircraft Co., 109 Wash.2d 581, 746 P.2d 1198

(1987) (noting "modern trend" away from strict liability to negligence standard for ground damage from aviation accidents).

809

See also Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 20, comment k (2010) (Reporters' Note: "A special note on aviation ground damage.")

8. Policy Behind the Imposition of Strict Liability. Strict liability is "founded upon a policy of the law that imposes upon anyone who for his own purposes creates an abnormal risk of harm to his neighbors, the responsibility of relieving against that harm when it does in fact occur. The defendant's enterprise, in other words, is required to pay its way by compensating for the harm it causes because of its special, abnormal and dangerous character." Restatement (Second) of Torts § 519, comment d. The liability "is applicable to an activity that is carried on with all reasonable care, and that is of such utility that the risk involved in it cannot be regarded as so great or so unreasonable as to make it negligence merely to carry it on." § 520, comment b. Observe also, that the decision whether an activity is subject to strict liability is for the court, not the jury, to make.

In other words, this liability is analogous to negligence per se, but it is not called negligence because a court makes a judgment that value to the community is sufficiently great that the mere participation in the activity is not to be stigmatized as wrongdoing in the negligence sense. The activity is simply required to pay its own way, without that stigma, but it does pay with full tort damages, including pain and suffering damages when personal injury is involved. Does it make for sound social policy to make a "non-

negligent" defendant pay the same as a "negligent" one? Should courts, as contrasted with legislatures, make judgments as to which activities should be subject to "strict liability"? What practical difference do such judgments entail?

Of course, one who carries on an abnormally dangerous activity may also be negligent in the way in which he conducts it and therefore subject to liability on both bases.

3. Limitations on Strict Liability

Foster v. Preston Mill Co.

Supreme Court of Washington, 1954.

44 Wash.2d 440, 268 P.2d 645.

HAMLEY, JUSTICE. Blasting operations conducted by Preston Mill Company frightened mother mink owned by B.W. Foster, and caused the mink to kill their kittens. Foster brought this action against the company to recover damages. His second amended complaint, upon which the case was tried, sets forth a cause of action on the theory of absolute liability WWW

After a trial to the court without a jury, judgment was rendered for plaintiff in the sum of $1,953.68. The theory adopted by the court was that, after defendant received notice of the effect which its blasting operations were having upon the mink, it was absolutely liable for all damages of that nature thereafter sustained. ***

810

The primary question presented by appellant's assignments of error is whether, on these facts, the judgment against appellant is

sustainable on the theory of absolute liability.

[The court noted that in Washington there is strict liability in blasting cases whether the damage is caused by trespassory or non-trespassory invasions.]

However the authorities may be divided on the point just discussed, they appear to be agreed that strict liability should be confined to consequences which lie within the extraordinary risk whose existence calls for such responsibility. [Cc] This limitation on the doctrine is indicated in the italicized portions of the rule as set forth in Restatement of Torts, § 519:

"Except as stated in §§ 521-4, one who carries on an ultrahazardous activity is liable to another whose person, land or chattels the actor should recognize as likely to be harmed by the unpreventable miscarriage of the activity for harm resulting thereto from that which makes the activity ultrahazardous, although the utmost care is exercised to prevent the harm." (Italics supplied.)

This restriction which has been placed upon the application of the doctrine of absolute liability is based upon considerations of policy. ***" ***It is one thing to say that a dangerous enterprise must pay its way within reasonable limits, and quite another to say that it must bear responsibility for every extreme of harm that it may cause. The same practical necessity for the restriction of liability within some reasonable bounds, which arises in connection with problems of 'proximate cause' in negligence cases, demands here that some limit be set. ***This limitation has been expressed by saying that the defendant's duty to insure safety extends only to certain consequences. More commonly, it is said that the defendant's

conduct is not the 'proximate cause' of the damage. But ordinarily in such cases no question of causation is involved, and the limitation is one of the policy underlying liability." Prosser on Torts, 457, § 60.

Applying this principle to the case before us, the question comes down to this: Is the risk that any unusual vibration or noise may cause wild animals, which are being raised for commercial purposes, to kill their young, one of the things which make the activity of blasting ultrahazardous?

We have found nothing in the decisional law which would support an affirmative answer to this question. The decided cases, as well as common experience, indicate that the thing which makes blasting ultrahazardous is the risk that property or persons may be damaged or injured by coming into direct contact with flying debris, or by being directly affected by vibrations of the earth or concussions of the air.
***

811

The relatively moderate vibration and noise which appellant's blasting produced at a distance of two and a quarter miles was no more than a usual incident of the ordinary life of the community. See 3 Restatement of Torts 48, § 522, comment a. The trial court specifically found that the blasting did not unreasonably interfere with the enjoyment of their property by nearby landowners, except in the case of respondent's mink ranch.

It is the exceedingly nervous disposition of mink, rather than the normal risks inherent in blasting operations, which therefore must, as a matter of sound policy, bear the responsibility for the loss here sustained. We subscribe to the view expressed by Professor

Harper... that the policy of the law does not impose the rule of strict liability to protect against harms incident to the plaintiff's extraordinary and unusual use of land. This is perhaps but an application of the principle that the extent to which one man in the lawful conduct of his business is liable for injuries to another involves an adjustment of conflicting interests. ***

It is our conclusion that the risk of causing harm of the kind here experienced, as a result of the relatively minor vibration, concussion, and noise from distance blasting, is not the kind of risk which makes the activity of blasting ultrahazardous. The doctrine of absolute liability is therefore inapplicable under the facts of this case, and respondent is not entitled to recover damages.

The judgment is reversed.

NOTES AND QUESTIONS

1. In accord with the principal case, upon similar facts, are Madsen v. East Jordan Irrigation Co., 101 Utah 552, 125 P.2d 794 (1942) and Gronn v. Rogers Construction, Inc., 221 Or. 226, 350 P.2d 1086 (1960) (both declining to award damages in strict liability for loss of minks due to blasting activity).

2. Defendant set off fireworks to celebrate a church youth rally and the noise caused a stampede in a barn on neighbor's dairy farm, causing damage to the barn and the loss of four cows. Liability? Toms v. Calvary Assembly of God, Inc., 446 Md. 543, 132 A.3d 866 (2016) (noise emanating from fireworks display on adjacent property did not constitute an "abnormally dangerous activity" which would warrant the imposition of strict liability).

3. Suppose defendant had known that plaintiffs mink might be frightened and kill their kittens or that the dairy cattle might stampede. Should defendant be held liable? See Summit View, Inc. v. W.W. Clyde & Co., 17 Utah 2d 26, 403 P.2d 919 (1965) (liability in negligence--not strict liability--for unnecessarily parking heavy equipment near mink sheds during whelping season).

4. Without any negligence on the part of the defendant, his cow trespasses in plaintiffs garden. Plaintiff tries to drive the cow out, and the cow attacks and injures her. Proximate cause? Troth v. Wills, 8 Pa.Super. 1, 6 (1897) (yes, "the act of the animal was one to which a creature of that kind

is naturally disposed on being disturbed while feeding; and it was so directly associated with the primary trespass that, unless the plaintiffs right to prevent a continuance of this be denied, there can be no ground for questioning the liability of the owner"); Nixon v. Harris, 15 Ohio St.2d 105, 238 N.E.2d 785 (1968) (accord). See also Martinez v. Modenbach, 396 So.2d 471 (La.App.1981) (chasing dog back in to owner's yard, plaintiff slips on wet grass and falls). What if the cow wanders into plaintiffs barn and breaks through a rotten place in the floor; and plaintiff, entering the barn in the dark falls into the hole and is injured? Hollenbeck v. Johnson, 79 Hun 499, 29 N.Y.S. 945 (1894) (no proximate cause).

5. Defendant parades his circus elephants through the streets of a city. Plaintiffs skittish horse, seeing a large object pass at a distance of a city block, takes fright and runs away, and plaintiff is injured. Is there strict liability? Scribner v. Kelley, 38 Barb. 14 (N.Y. 1862) (no

liability because injury did not proceed from savage and ferocious nature of wild animal but from reaction of horse to large moving object); Bostock-Ferari Amusement Co. v. Brocksmith, 34 Ind.App. 566, 73 N.E. 281 (1905) (bear on leash on way to train station frightens horse; no liability because the injury did not result from any dangerous quality of the bear--he did nothing but walk docilely in the charge of his keeper).

6. Defendant keeps a vicious dog that he knows has attacked human beings. This dog, trotting peacefully down the street, accidentally runs into plaintiff and knocks him down. Strict liability? Cf. Koetting v. Conroy, 223 Wis. 550, 270 N.W. 625 (1936) (no strict liability because no evidence that act was either vicious or mischievous).

Golden v. Amory

Supreme Judicial Court of Massachusetts, 1952.

329 Mass. 484, 109 N.E.2d 131.

LUMMUS, Justice. The defendants owned a hydroelectric plant in Ludlow in the Red Bridge area. As a result of the hurricane of September 21, 1938, the Chicopee River overflowed and damaged the real estate of the several plaintiffs.

***

The plaintiffs rely upon the rule stated in Fletcher v. Rylands, L.R., 1 Ex. 265, 279, and affirmed in Rylands v. Fletcher, L.R., 3 H.L. 330, 339- 340, that "the person who for his own purposes brings on his lands and collects and keeps there anything likely to do mischief if it escapes, must keep it in at his peril, and, if he does not do so, is prima facie answerable for all the damage which is the natural

consequence of its escape." That rule is the law of this Commonwealth. [Cc] But that rule does not apply where the injury results from "vis major, the act of God ***, which the owner had no reason to anticipate." [Cc] In the present case the flood, as disclosed by the evidence, was plainly beyond the capacity of any one to anticipate, and was clearly an act of God. [C] For this reason the rule

813

under discussion does not apply, and the defendants cannot be held liable for injury caused by the flood waters.

Upon the whole case, we find no error, either in the rulings of the judge or in his exclusion of evidence offered by the plaintiffs.

Exceptions overruled.

NOTES AND QUESTIONS

1. In accord are Nichols v. Marsland, L.R. 2 Ex.Div. 1 (1876) (dam washed out by extraordinary rainfall); Bratton v. Rudnick, 283 Mass. 556, 186 N.E. 669 (1933) (same); and Murphy v. Gillum, 73 Mo.App. 487 (1898) (seepage from dam embankment caused by unprecedented frost).

2. What if defendant's reservoir overflows because the owner of another reservoir upstream suddenly releases a large quantity of water? Box v. Jubb, 4 Ex.Div. 76 (1879) (no liability). The act of a third party over whom the defendant has no control does not give rise to liability even where defendant's activity is subject to strict liability. See, for example, Rickards v. Lothian, [1913] A.C. 263 (malicious third person plugged up defendant's lavatory basin and turned the water on full causing flood in flat below).

Sandy v. Bushey

Supreme Judicial Court of Maine, 1925.

124 Me. 320, 128 A. 513.

STURGIS, J. In the summer of 1923, the plaintiff turned his mare and colt out in the pasture of a neighbor. Other horses occupied the pasture during the season, including the defendant's three-year old colt. On July 14, 1923, the plaintiff went to the pasture to grain his mare, and, while so doing, was kicked by the defendant's horse and seriously injured. This action on the case is brought to recover damages for such injuries and, after verdict for the plaintiff, is before this court on a general motion.

By the common law the owners or keepers of domestic animals are not answerable for an injury done by them in a place where they have a right to be, unless the animals in fact, and to the owners' knowledge, are vicious. If, however, a person keeps a vicious or dangerous animal which he knows is accustomed to attack and injure mankind, he assumes the obligation of an insurer against injury by such animal, and no measure of care in its keeping will excuse him. His liability is founded upon the keeping of such an animal when he has knowledge of its vicious propensities, and his care or negligence is immaterial. In an action for an injury caused by such an animal, the plaintiff has only to allege and prove the keeping, the vicious propensities, and the scienter. Negligence is not the ground of liability, and need not be alleged or proved. This rule of liability of keepers of domestic animals finds its origin in the ancient common law and, except as modified by statute in case of injuries by

dogs, is retained as the rule of law in this class of cases in this state. [Cc]

814

A careful consideration of the evidence discloses facts which fairly tend to establish that the defendant's horse had exhibited a vicious and ugly disposition at various times prior to the day on which the plaintiff was injured, and notice of the animal's vicious propensities had been brought home to the defendant. Upon these issues the jury's verdict in favor of the plaintiff was fully warranted.

The defendant, however, says that the plaintiff was guilty of contributory negligence and cannot, therefore, recover in this action. We are unable to sustain this contention under the rule of liability adopted by this court. In those jurisdictions which have departed from the ancient common-law rule and declared negligence to be the ground of liability in actions for injuries by animals, the defense of contributory negligence has been recognized, and the injured party's failure to exercise due care will defeat his action. [Cc] In this state, however, the negligence doctrine has not been accepted, and contributory negligence in the strict sense of that term cannot be held to constitute a defense to the action. Exclusion of negligence as the basis of liability forbids the inclusion of contributory negligence as a defense. Something more than slight negligence or want of due care on the part of the injured party must be shown in order to relieve the keeper of a vicious domestic animal known to be such from his liability as an insurer.

In Muller v. McKesson, 73 N.Y. 195, 29 Am.Rep. 123, which may be fairly accepted as the leading case in this country upon the question

of contributory negligence as a defense to an action of this character, Church, C.J., in stating the opinion of the court, says:

"If a person with full knowledge of the evil propensities of an animal wantonly excites him, or voluntarily and unnecessarily puts himself in the way of such an animal, he would be adjudged to have brought the injury upon himself, and ought not to be entitled to recover. In such a case it cannot be said, in a legal sense, that the keeping of the animal, which is the gravamen of the offense, produced the injury. ***But as the owner is held to a rigorous rule of liability on account of the danger to human life and limb, by harboring and keeping such animals, it follows that he ought not to be relieved from it by slight negligence or want of ordinary care. To enable an owner of such an animal to interpose this defense, acts should be proved with notice of the character of the animal, which would establish that the person injured voluntarily brought the calamity upon himself." ***

We are convinced that the principle announced by Chief Justice Church correctly defines the degree of responsibility which must be fixed upon the injured party in order to relieve the keeper of a known vicious animal from his liability as an insurer with which he is charged in this state. The fact must be established that the injury is attributable, not to the keeping of the animal, but to the injured party's unnecessarily and

voluntarily putting himself in a way to be hurt knowing the probable consequences of his act, so that he may fairly be deemed to have brought the injury upon himself.

Applying this rule to the facts in the case before us, we are of the opinion that the prima facie case against the defendant, established by the evidence, is not rebutted by the plaintiffs acts or omissions. The plaintiff led his mare away from the other horses in the pasture and started to grain her, when the defendant's horse approached in a threatening manner. The plaintiff drove him away and turned to continue feeding the mare. The colt's return was silent and swift and his attack unexpected. It cannot be said that the plaintiff voluntarily put himself in a way to be injured by the defendant's horse, knowing the probable consequences of his act. The defendant is liable, as found by the jury.

Motion overruled.

NOTES AND QUESTIONS

1. The Restatement (Second) of Torts would apply this rule to strict liability for both wild animals and abnormally dangerous activities. See §§ 515, 523, 524. Is this a logical rule? If ordinary contributory negligence is a defense when defendant is negligent, why is it not a defense when he is not even negligent?

2. Since this and other similar decisions, most states have adopted comparative negligence rules, reducing a plaintiffs damages by the plaintiffs percentage of negligence. If a plaintiffs negligence is no longer a complete bar to recovery, should it be a defense in strict liability cases as well as negligence cases? Can conduct constituting negligence and conduct forming the basis for strict liability rationally be compared? Plaintiff, who had been around cattle all his life, attempted to move a newborn calf away from the danger of a muddy river bank, with its mother unsecured and only a few feet away. She

attacked as he put the calf down and injured him. Andrade v. Shiers, 564 So.2d 787 (La.App.1990) (plaintiff's unreasonable conduct compared to owners' strict liability; 80% of fault allocated to plaintiff).

Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 25 (2010) would apply comparative negligence principles to compare the negligence of the plaintiff to the strict liability of the defendant in cases involving animals and abnormally dangerous activities. Would you expect a jurisdiction to adopt Restatement (Third)'s position if it still applied the traditional rule that contributory negligence was a complete bar to recovery? Assuming a jurisdiction had adopted comparative negligence, would you expect it to be more open to adopting Restatement (Third)'s position? Maupin v. Tankersley, 540 S.W.3d 357 (Ky. 2018) (adopting comparative negligence as appropriate for a dog bite case despite previous rejection of contributory negligence as defense to strict liability) and Boswell v. Steele, 164 Idaho 208, 428 P.3d 218 (2018) (holding that comparative negligence principles apply to dog bite case even though statute adopting comparative negligence by its

terms limited it to negligence and makes no mention of strict liability). See also Coble v. Taylor, 480 S.W.3d 467 (Mo. 2016) (interpreting Missouri's comparative negligence statute to apply to negligence and strict liability claims in a case arising out of damage done by defendant's escaped bull).

3. Assumption of the Risk. Defendant keeps a bear in a cage at a circus. Plaintiff crawls under the rope in front of the cage and goes within six inches of the bars. The bear slaps at him through the bars

hitting him in the face and putting out his eye. Is defendant liable? Cf. Ervin v. Woodruff, 119 App.Div. 603, 103 N.Y.S. 1051 (1907) (no; plaintiff brought the calamity upon himself) and Heidemann v. Wheaton, 72 S.D. 375, 34 N.W.2d 492 (1948) (no; plaintiff voluntarily approached obvious danger). A customer at a service station put his hand in an unlocked box of snakes kept for public display. He was bitten by a rattlesnake. Is his claim barred? See Keyser v. Phillips Petroleum Co., 287 So.2d 364 (Fla.App.1973) (demurrer reversed; plaintiff entitled to opportunity to prove that he did not know dangers). Defendant raises exotic animals on her farm, including Siberian tigers. A man who is visiting the tenant who lives above the garage goes into defendant's backyard to pet a tiger through the fence. The tiger grabs his arm and pulls it through the fence. Is the owner strictly liable? Can she argue assumption of the risk as a defense? Plaintiff had visited the tenant on the farm about thirty times before the incident. Irvine v. Rare Feline Breeding Ctr., 685 N.E.2d 120 (Ind.App. 1997) (strict liability applies to wild animals; question of fact for jury whether defendant proved defense of assumption of risk).

4. Defendant is conducting blasting operations in proximity to a highway. He stations a flagman to stop traffic when a blast is about to be set off. Plaintiff drives past the flagman, and is injured by the blast. Should it make any difference whether plaintiff does not see the flagman because he is not looking, or sees him and deliberately drives past? See Worth v. Dunn, 98 Conn. 51, 62, 118 A. 467, 471 (1922) (plaintiff part of crowd that had gathered to watch demolition of wall and had been warned to move back) and Wells v. Knight, 32 R.I. 432, 80 A. 16 (1911) (occupants of buggy drove past defendant's

employee who had tried to stop them from entering area where blasting charges had been set and were about to be set off).

5. Legal Sanction. Statutory sanction for defendant's conduct frequently has been held to preclude the application of strict liability, on the ground that the defendant cannot be held strictly liable for doing properly what the law has authorized him to do, although he will still of course be liable for any negligence. Thus the custodian of a public zoo is not subject to strict liability for harm done by the animals kept in it. Jackson v. Baker, 24 App.D.C. 100 (1904); Guzzi v. New York Zoological Society, 192 App.Div. 263, 182 N.Y.S. 257 (1920), aff'd, 233 N.Y. 511, 135 N.E. 897 (1922). This has been held to be true for gas or electric conduits laid in the street under legislative authority. Gould v. Winona Gas Co., 100 Minn. 258, 111 N.W. 254 (1907). Also for common carriers required by law to ship wild animals or explosives. Actiesselskabet Ingrid v. Central R. Co. of N.J., 216 Fed. 72 (2d Cir. 1914); Pope v. Edward M. Rude Carrier Corp., 138 W.Va. 218, 75 S.E.2d 584 (1953).

817

The protection from strict liability also has been extended to a contractor doing such work as blasting for the state. Pumphrey v. J.A. Jones Const. Co., 250 Iowa 559, 94 N.W.2d 737 (1959). But see Smith v. Lockheed Propulsion Co., 247 Cal.App.2d 774, 56 Cal.Rptr. 128, 139-142 (1967) (strict liability applied to company testing rockets under contract with federal government) and In re Hanford Nuclear Reservation Litigation, 534 F.3d 986 (9th Cir. 2008) (applying Washington law) (strict liability applied to companies managing nuclear weapons development for federal government).

6. The next chapter addresses the development of strict liability for "unreasonably dangerous" products. Is this analogous to the principle of strict liability for abnormally dangerous activities? See Arlington Forest Assoc, v. Exxon Corp., 774 F.Supp. 387 (E.D.Va.1991) (under § 519, strict liability attaches only to abnormally dangerous activities, not substances) and Indiana Harbor Belt R.R. Co. v. American Cyanamid Co., 916 F.2d 1174 (7th Cir. 1990) ("ultrahazardousness or abnormal dangerousness is, in the contemplation of the law at least, a property not of substances, but of activities").

[BLANK PAGE]

CHAPTER 15 PRODUCTS LIABILITY

"Products liability" is the umbrella term for the liability of a manufacturer, seller, or other supplier of chattels to one who suffers physical harm caused by the chattel. Products liability may rest upon the manufacturer or supplier's negligence, upon a warranty theory, or upon strict liability in tort. Strict liability theories burst onto the scene only during the past sixty years, but have become the paramount basis of liability for manufacturers of products. This "revolution" in the common law of torts through the widespread adoption of strict products liability, however, is not as radical as it initially may seem. Developments in negligence and warranty law foreshadowed the adoption of strict liability in many jurisdictions. Moreover, elements of the law of negligence, especially the "reasonableness" standard, have been openly incorporated by numerous courts into the strict liability analysis in cases alleging product design and warning defects.

The development of strict products liability law occurred initially through the courts, largely around the organizing principle of the American Law Institute's (ALI) Restatement (Second) of Torts § 402A (1965). This publication, in turn, had its intellectual roots in the views of some of the great scholars of tort law--Fleming James, William Prosser, Roger Traynor, and John Wade. The development of strict products liability represented a significant intellectual achievement whose influence runs far beyond the borders of the United States as Europe and other common law countries have

utilized it as a model for their own efforts. See, e.g., the Product Liability Directive for the European Economic Community (85/374/EEC). As the courts worked out the kinks in the application of the Restatement (Second) formulation of strict products liability, significant changes and legal doctrines developed, many of which were then recognized in Restatement (Third) of Torts: Products Liability (1998).

The development of strict products liability has been a controversial one. Manufacturers have claimed that the application of strict liability for design and warnings defect cases has kept good products off the market, inhibited product development, and created an unreasonable "tort tax" on products. Consumer groups and plaintiffs' lawyers deny these claims and argue that strict liability law has acted as an incentive to make products safer. The assessment is complicated by the fact that the critics and supporters do not always mean the same thing by "strict liability." As you will discern from this chapter, courts have had a great deal of difficulty in defining strict liability in the context of design and warning cases. See Henderson & Eisenberg, The Quiet Revolution in Products Liability: An Empirical Study of Legal

Change, 37 UCLA L. Rev. 479 (1990); G. Schwartz, The Beginning and the Possible End of the Rise of Modern American Tort Law, 26 Ga. L. Rev. 601 (1992); Cupp & Polage, The Rhetoric of Strict Products Liability Versus Negligence: An Empirical Analysis, 77 N.Y.U. L. Rev. 874 (2002); V. Schwartz & Tedesco, The Re-emergence of "Super Strict" Liability: Slaying the Dragon Again, 71

U. Cin. L. Rev. 917 (2003); Twerski, Chasing the Illusory Pot of Gold at the End of the Rainbow: Negligence and Strict Liability in Design Defect Litigation, 90 Marq. L. Rev. 7 (2006); Owen, The Evolution of Products Liability, 26 Rev. Litig. 955 (2007); and Stewart, Strict Liability for Defective Product Design: The Quest for a Well-Ordered Regime, 74 Brook. L. Rev. 1039 (2009). Legislatures at the state level also have become involved in shaping the law, sometimes intervening to alter common law doctrines. Congress has heard and "reheard" about the need for federal legislation, but has declined to act, leaving the development of products liability law to the states.

The ALI's Restatement (Third) of Torts: Products Liability (1998) is now a focal point for many judicial decisions. As will be explained in this chapter, the Restatement (Third) adopts a functional approach to products liability, with separate tests for defects in a product's manufacture, design, and accompanying warnings.

As you work your way through this chapter, think about the rationale for the system. Why is a liability rule necessary to assure product safety? Is the market a viable mechanism for weeding out unsafe products? If the market fails, should product safety be assured by government regulatory agencies such as the Consumer Product Safety Commission (CPSC), the Food and Drug Administration (FDA), and the National Highway Traffic Safety Administration (NHTSA) given the institutional advantage of government in broad information gathering, cost-benefit evaluation, predictability, and uniformity? Should the questions asked be confined to ones of efficiency or should justice also be considered? See Wright, The Principles of Products Liability Law, 26 Rev. Litig. 1067 (2007) and

Owen, The Moral Foundations of Products Liability Law: Toward First Principles, 68 Notre Dame L. Rev. 427 (1993).

The topic of products liability has sufficient material to support a separate law school course. Students and lawyers who practice in the area have the benefit of an excellent treatise: Owen, Products Liability Law (Thomson 3d ed. 2015) and a major multivolume work, regularly updated: Frumer and Friedman, Products Liability (2013 LexisNexis). What follows is a taste of some of the common issues and basic theories of this important area of the law.

821

1. Development of Theories of Recovery

(A) Negligence

MacPherson v. Buick Motor Co.

Court of Appeals of New York, 1916.

217 N.Y. 382. lll N.E. 1050.

[See page 460 in Chapter 8 for text of MacPherson v. Buick Motor Co. opinion.]

[Caption: Buick Model 10 Runabout (1909)

(The model Mr. MacPherson purchased).]

822

NOTES AND QUESTIONS

1. The early development of liability of a manufacturer or seller of chattels to third parties was strongly influenced by Winterbottom v. Wright, 10 M. & W. 109, 152 Eng. Rep. 402 (1842), page 458. The case was misinterpreted to state a general rule of nonliability of any contractor, including any supplier of a product, to third parties, whether in contract or in tort, and whether for nonfeasance or misfeasance. This misinterpretation was first pointed out by Professor Bohlen, the Reporter of the First Restatement, in a noted article in 1905. Bohlen, The Basis of Affirmative Obligations in the Law of Torts, 44 Am. L. Reg. (N.S.) 209, 280--85, 289--310 (1905). Nevertheless, most courts clung to the general rule while carving out a few exceptions for "inherently dangerous" products.

2. The principal case became a leading case, and a new point of departure. It is now accepted in all of the American jurisdictions.

3. For a time some of the courts continued to use the language "inherently dangerous," although it was clear from the opinions that this meant no more than that substantial harm is to be anticipated if the chattel is defective. What finally emerged is a general rule imposing negligence liability upon all sellers of chattels--whether damage is to person or property, whether the manufacturer produced the whole product or a component part, and whether or not the injured person was the immediate purchaser.

4. Even with the advent of alternative means of recovery such as breach of warranty and strict liability, negligence continues to be an important cause of action for plaintiffs injured by products. Almost every product liability lawsuit includes a negligence count. Most plaintiffs' lawyers still try to prove negligence. Why? An experienced

practitioner has observed: "More plaintiffs would prefer to present their respective cases to a jury on a negligence, rather than on a strict liability, basis. In McLuhanesque terms negligence is 'hot' and strict liability is 'cold.' It is easier to prevail by showing that the defendant did something wrong than that there is something technically defective about the product." Rheingold, The Expanding Liability of the Product Supplier: A Primer, 2 Hofstra L. Rev. 521, 531 (1974). Does the theoretical basis for a finding of liability affect a jury's willingness to award damages? Professors Cupp and Polage have concluded, based on their analysis of mock jurors' responses to negligence and strict liability jury instructions, that jurors may be more likely to find liability and to award higher damage amounts in negligence actions. Cupp & Polage, The Rhetoric of Strict Products Liability Versus Negligence: An Empirical Analysis, 77 N.Y.U. L. Rev. 874 (2002). Also, note that a finding by a jury that the defendant was negligent but there was no defect in the product may be an inconsistent verdict that requires a new trial. Kosmynka v. Polaris Indus., Inc., 462 F.3d 74 (2d Cir. 2006) (applying New York law) (granting new trial in ATV case due to an inconsistent jury verdict).

823

(B) Warranty

Originally, a breach of warranty action arose from the tort action of trespass on the case for breach of an assumed duty. The wrong was conceived to be a form of misrepresentation, in the nature of deceit, and not at all clearly distinguished from it. In the latter part of the 17th Century, decisions such as Cross v. Gardiner, 1 Show.K.B. 68, 89 Eng. Rep. 453 (1689), and Medina v. Stoughton, 1 Ld.Raym. 593,

91 Eng. Rep. 1297 (1700), established the fact that the tort action would lie for an affirmation of fact ("express warranty"), even one made without knowledge of its falsity and without negligence. As a result, warranty became a form of strict liability in tort.

In Stuart v. Wilkins, 1 Doug. 18, 99 Eng. Rep. 15 (1778), it was first held that assumpsit would lie for breach of an express warranty as a part of the contract of sale. After that decision, and over a period of more than a century, warranties gradually came to be regarded as express or implied terms of the contract of sale, and the action on the contract became the usual remedy for any breach.

Warranty has, however, never entirely lost its original tort character. Even when the action is in the form of breach of contract, its basic tort character has sometimes been recognized by the application of statutes applicable to torts, such as survival of tort actions. Gosling v. Nichols, 59 Cal.App.2d 442, 139 P.2d 86 (1943). Or the statute of limitations for torts. Rubino v. Utah Canning Co., 123 Cal.App.2d 18, 266 P.2d 163 (1954). Or the application of the comparative negligence statute. JCW Electronics, Inc. v. Garza, 257 S.W.3d 701 (Tex. 2008) (finding that breach of implied warranty of merchantability is a "cause of action based on tort" and thus included within the comparative responsibility scheme enacted by the legislature using that language). Several jurisdictions allow recovery for wrongful death arising out of breach of warranty, when the action would not lie for an ordinary breach of contract. See for example Greco v. S.S. Kresge Co., 277 N.Y. 26, 12 N.E.2d 557 (1938); Kelley v. Volkswagenwerk Aktiengesellschaft, 110 N.H. 369, 268 A.2d 837 (1970).

The question began to be asked: if warranty is a matter of tort as well as contract and it can arise without any intent to make it a matter of contract, why should it require a contract between the parties? Why should it not arise, in tort, between parties who have not dealt at all with one another--or in other words, without privity of contract?

824

(1) Express Warranties

Baxter v. Ford Motor Co.

Supreme Court of Washington, 1932.

168 Wash. 456, 12 P.2d 409.

HERMAN, J. During the month of May, 1930, plaintiff purchased a model A Ford town sedan from defendant St. John Motors, a Ford dealer, who had acquired the automobile in question by purchase from defendant Ford Motor Company. Plaintiff claims that representations were made to him by both defendants that the windshield of the automobile was made of nonshatterable glass which would not break, fly, or shatter. October 12, 1930, while plaintiff was driving the automobile through Snoqualmie pass, a pebble from a passing car struck the windshield of the car in question, causing small pieces of glass to fly into plaintiffs left eye, resulting in the loss thereof. Plaintiff brought this action for damages for the loss of his left eye and for injuries to the sight of his right eye. The case came on for trial, and, at the conclusion of plaintiff's testimony, the court took the case from the jury and entered

judgment for both defendants. From that judgment, plaintiff appeals.
***

The principal question in this case is whether the trial court erred in refusing to admit in evidence, as against respondent Ford Motor Company, the catalogues and printed matter furnished by that respondent to respondent St. John Motors to be distributed for sales assistance. Contained in such printed matter were statements which appellant maintains constituted representations or warranties with reference to the nature of the glass used in the windshield of the car purchased by appellant. A typical statement, as it appears in appellant's exhibit for identification No. 1, is here set forth:

"Triplex Shatter-Proof Glass Windshield. All of the new Ford cars have a Triplex shatter-proof glass windshield--so made that it will not fly or shatter under the hardest impact. This is an important safety factor because it eliminates the dangers of flying glass--the cause of most of the injuries in automobile accidents. In these days of crowded, heavy traffic, the use of this Triplex glass is an absolute necessity. Its extra margin of safety is something that every motorist should look for in the purchase of a car--especially where there are women and children."

Respondent Ford Motor Company contends that there can be no implied or express warranty without privity of contract, and warranties as to personal property do not attach themselves to, and run with, the article sold.

[The court here referred at length to Mazetti v. Armour & Co., 75 Wash. 622, 135 P. 633 (1913), in which a restaurant keeper was permitted to recover for damage to his business resulting when a

customer was served defective canned food manufactured by the defendant.]

In the case at bar the automobile was represented by the manufacturer as having a windshield of nonshatterable glass "so made that it will not fly or shatter under the hardest impact." An ordinary person would be unable to discover by the usual and customary examination of the automobile whether glass which would not fly or shatter was used in the windshield. In that respect the purchaser was in a position similar to that of the consumer of a wrongly labeled drug, who has bought the same from a retailer, and who has relied upon the manufacturer's representation that the label correctly set forth the contents of the container. For many years it has been held that, under such circumstances, the manufacturer is liable to the consumer, even though the consumer purchased from a third person the commodity causing the damage. Thomas v. Winchester, 6 N.Y. 397, 57 Am.Dec. 455. The rule in such cases does not rest upon contractual obligations, but rather on the principle that the original act of delivering an article is wrong, when, because of the lack of those qualities which the manufacturer represented it as having, the absence of which could not be readily detected by the consumer, the article is not safe for the purposes for which the consumer would ordinarily use it.

The vital principle present in the case of Mazetti v. Armour & Co., supra, confronts us in the case at bar. In the case cited the court recognized the right of a purchaser to a remedy against the manufacturer because of damages suffered by reason of a failure of

goods to comply with the manufacturer's representations as to the existence of qualities which they did not in fact possess, when the absence of such qualities was not readily discoverable, even though there was no privity of contract between the purchaser and the manufacturer.

Since the rule of caveat emptor was first formulated, vast changes have taken place in the economic structures of the English speaking peoples. Methods of doing business have undergone a great transition. Radio, billboards, and the products of the printing press have become the means of creating a large part of the demand that causes goods to depart from factories to the ultimate consumer. It would be unjust to recognize a rule that would permit manufacturers of goods to create a demand for their products by representing that they possess qualities which they, in fact, do not possess, and then, because there is no privity of contract existing between the consumer and the manufacturer, deny the consumer the right to recover if damages result from the absence of those qualities, when such absence is not readily noticeable.

"An exception to a rule will be declared by courts when the case is not an isolated instance, but general in its character, and the existing rule does not square with justice. Under such circumstances a court will, if free from the restraint of some statute, declare a rule that will meet the full intendment of the law." Mazetti v. Armour & Co., supra.

826

We hold that the catalogues and printed matter furnished by respondent ***Ford Motor Company for distribution and assistance in sales were improperly excluded from evidence, because they set

forth representations by the manufacturer that the windshield of the car which appellant bought contained Triplex nonshatterable glass which would not fly or shatter. The nature of nonshatterable glass is such that the falsity of the representations with reference to the glass would not be readily detected by a person of ordinary experience and reasonable prudence. Appellant, under the circumstances shown in this case, had the right to rely upon the representations made by respondent Ford Motor Company relative to qualities possessed by its products, even though there was no privity of contract between appellant and respondent Ford Motor Company. ***

The trial court erred in taking the case from the jury and entering judgment for respondent Ford Motor Company. It was for the jury to determine under proper instructions, whether the failure of respondent Ford Motor Company to equip the windshield with glass which did not fly or shatter was the proximate cause of appellant's injury. ***

Reversed, with directions to grant a new trial with reference to respondent Ford Motor Company; affirmed as to respondent St. John Motors [whose contract with buyer said "no warranty."]

[The second trial resulted in a verdict for plaintiff, and defendant Ford Motor Company appealed. In Baxter v. Ford Motor Co., 179 Wash. 123, 35 P.2d 1090 (1934), judgment entered on the verdict was affirmed. HOLCOMB, J., said in part:

"A new point arising out of the last trial, claimed as error, was in excluding testimony of an expert witness on behalf of appellant to the effect that there was no better windshield made than that used in

respondent's car and in sustaining the objection to appellant's offer of proof on that point.

"No authorities are cited by appellant to sustain this claim, and we know of none. Indeed, it would seem that whether there was any better make of shatter-proof glass manufactured by any one at that time would be wholly immaterial, under the law as decided by us on the former appeal. Since it was the duty of appellant to know that the representations made to purchasers were true. Otherwise it should not have made them. If a person states as true material facts, susceptible of knowledge, to one who relies and acts thereon to his injury, if the representations are false, it is immaterial that he did not know they were false, or that he believed them to be true. ***

"The court charged the jury that 'there is no proof of fraud in this case.' It has become almost axiomatic that false representations inducing a sale or contract constitute fraud in law. ***However, the instruction,

827

if it was error against respondent, was cured by the verdict of the jury favorable to respondent."]

NOTES AND QUESTIONS

1. Is this case an extension of a contract warranty to one who has made no contract with the defendant, or is it strict liability in tort for an innocent misrepresentation made to the plaintiff? Most of the cases have talked of "express warranty." In comparison, the Tennessee Supreme Court, in Ford Motor Co. v. Lonon, 217 Tenn. 400, 398 S.W.2d 240 (1966), reverted to the theory of

misrepresentation. It relied on the Restatement (Second) of Torts § 402B, which addresses strict liability without using the word "warranty." The section reads:

"One engaged in the business of selling chattels who, by advertising, labels, or otherwise, makes to the public a misrepresentation of a material fact concerning the character or quality of a chattel sold by him is subject to liability for physical harm to a consumer of the chattel caused by justifiable reliance upon the misrepresentation, even though (a) it is not made fraudulently or negligently, and (b) the consumer has not bought the chattel from or entered into any contract relation with the seller."

Tennessee later limited the Lonon innocent misrepresentation cause of action to cases involving personal injury or property damage, leaving plaintiffs who had suffered only economic losses to seek redress on breach of contract theories. See First Nat'l Bank of Louisville v. Brooks Farms, 821 S.W.2d 925 (Tenn. 1991). See also Restatement (Third) of Torts: Products Liability § 9 (1998), allowing potential claims for "innocent misrepresentation of material fact concerning the product." What policy reasons support making an innocent manufacturer liable?

2. The principal case generally has been followed for express statements as to quality and safety made in advertising, on labels, in brochures, or other literature accompanying the product. It applies to property damage as well as personal injury. Should warranty liability flow from any express statement? Consider a drug treatment for Lyme disease that was accompanied by a drug store brochure from defendant that advised "take with food or milk if upset stomach

occurs." If taking the drug with dairy products decreased its absorption, allegedly causing plaintiff's complications, should the language provided by the drug store constitute an express warranty? Rite Aid Pharmacy v. Levy-Gray, 391 Md. 608, 894 A.2d 563 (2006) (finding language was warranty that drug's efficacy would not be adversely impacted by milk). What about the "safe and effective" language on drug labels? In re Avandia Marketing Sales Practices & Products Liab. Litig., 588 Fed.Appx. 171 (3d Cir. 2014) (applying New Jersey law) (because contraindications, risk factors, and possible side effects also were included on same label, "safe and effective" could not be read as an unqualified guarantee for all consumers).

828

3. Should a plaintiff be required to demonstrate reliance upon the representation, either in making the purchase or in using the product? Most courts require reliance, but some have not. Plaintiff, a minor, was seriously injured while driving intoxicated. He filed a breach of warranty claim against defendant beer manufacturer arguing that its advertising campaign induced him to purchase and consume beer and to drive while intoxicated. Liability? Smith v. Anheuser-Busch, Inc., 599 A.2d 320 (R.I. 1991) (upholding trial court's dismissal of complaint on ground that plaintiff could not demonstrate reasonable reliance on alleged representation in media advertising that driving while intoxicated is safe or acceptable). What about a plaintiff who bought a mace gun that had been advertised to "instantly stop and subdue entire groups," but it failed to stop an intruder who shot plaintiff after plaintiff had sprayed him. Klages v. General Ordnance Equip. Co., 240 Pa. Super. 356, 367 A.2d 304

(1976) (rejecting manufacturer's argument that representations were mere puffery and that the plaintiff did not justifiably rely upon them). See also Restatement (Third) of Torts: Products Liability § 9 (1998) (liability for harm to person or property caused by misrepresentation of material fact).

4. Consumer Protection Acts have been enacted in a number of jurisdictions. Their violation usually is pled along with violations of express warranty claims. The statutes were first drafted to redress a grievance to the public at large and therefore eschewed some of the basic requirements of tort law, including reliance and proof of damage. The remedy for these statutory claims includes refund of the purchase price, punitive damages, and awards of attorney fees. If the plaintiff also seeks personal injury damages, is it enough for plaintiff to allege that the defendant made a misrepresentation pertaining to a fact about safety? See Aspinall v. Philip Morris Cos., Inc., 442 Mass. 381, 813 N.E.2d 476 (2004) (affirming certification of class of smokers with no requirement of showing health problems or reliance on manufacturer's representations) and Pelman v. McDonald's Corp., 396 F.3d 508 (2d Cir. 2005) (applying New York statute) (plaintiffs not required to show they relied on defendant's representations of nutritional value of food). But see Schwartz & Silverman, Common-Sense Construction of Consumer Protection Acts, 54 U. Kan. L. Rev. 1 (2006) (arguing that proof of reasonable reliance and actual damages should be required for recovery).

5. What result if a tire manufacturer advertises, "If it saves your life once, it's a bargain," and plaintiffs decedent is killed when the product "blows out"? Collins v. Uniroyal, Inc., 64 N.J. 260, 315 A.2d 16 (1974). Suppose the manufacturer of a grinding disc states that

the product is "stronger, sharper, and longer-lived than ever before available anywhere." The wheel breaks and injures plaintiff. Jakubowski v. Minnesota Mining & Mfg., 80 N.J.Super. 184, 193 A.2d 275 (1963), rev'd on other grounds, 42 N.J. 177, 199 A.2d 826 (1964). Courts have stated that the promise of safety must be a specific one in order to constitute a warranty. What about old cigarette advertising such as "not a cough in a carload" or "more doctors smoke our brand"? Do they constitute express warranties? Cf. Cipollone v. Liggett Group, Inc., 893 F.2d 541 (3d Cir.1990), affirmed in part and reversed in part, 505 U.S. 504 (1992) (applying New Jersey law) (alleging breach of

829

express warranty based on cigarette advertising). What if the plaintiff buys a cream to remove age spots on her skin that is labeled "safe," but that causes a severe irritation? Spiegel v. Saks 34th Street, 43 Misc.2d 1065, 252 N.Y.S.2d 852 (1964), aff'd mem., 26 A.D.2d 660, 272 N.Y.S.2d 972 (1966) (finding breach of express warranty). Do the words "minced pimento stuffed" on a jar of olives constitute an express warranty that the olives are entirely free of pits? Kolarik v. Cory Int'l Corp., 721 N.W.2d 159 (Iowa 2006) (finding that to impart such a meaning would be unrealistic).

(2) Implied Warranties

Henningsen v. Bloomfield Motors, Inc.

Supreme Court of New Jersey, 1960.

32 N.J. 358, 161 A.2d 69.

[Plaintiff Mrs. Henningsen was badly injured while driving a 1955 Plymouth automobile, when "something went wrong" with the steering gear, and the car turned sharply to the right into a wall. The automobile had been manufactured by defendant Chrysler Corporation, and sold by it to defendant Bloomfield Motors, a retail dealer. Mr. Henningsen purchased it from Bloomfield, and gave it to his wife for Christmas.

When he purchased the car, Mr. Henningsen signed a contract, without reading 8!4 inches of fine print on the back of it. Included in this fine print was a "warranty" clause, which provided that the manufacturer and the dealer gave no warranties, express or implied, except that they would make good at the factory any parts which became defective within 90 days after delivery of the car to the original purchaser, or before the car had been driven 4,000 miles, whichever event should first occur. In plaintiffs action against both defendants, negligence counts were dismissed by the trial court, and the cause was submitted to the jury solely on the issues of implied warranty of merchantability. Verdicts were returned for plaintiff against both defendants. Defendants appealed, and the appeal was certified directly to the Supreme Court.]

FRANCIS, J. ***In the ordinary case of sale of goods by description an implied warranty of merchantability is an integral part of the transaction. R.S. 46:30-20, N.J.S.A. If the buyer, expressly or by implication, makes known to the seller the particular purpose for which the article is required and it appears that he has relied on the seller's skill or judgment, an implied warranty arises of reasonable fitness for that purpose. R.S. 46:30-21(1), N.J.S.A. The former type of warranty simply means that the thing sold is reasonably fit for the

general purpose for which it is manufactured and sold. [Cc] As Judge Cardozo remarked in Ryan v. Progressive Grocery Stores (1931) 255 N.Y. 388, 175 N.E. 105, the distinction between a warranty of fitness for a particular purpose and of merchantability in many instances is practically meaningless. ***

830

The uniform [sales] act codified, extended and liberalized the common law of sales. The motivation in part was to ameliorate the harsh doctrine of caveat emptor, and in some measure to impose a reciprocal obligation on the seller to beware. The transcendent value of the legislation, particularly with respect to implied warranties, rests in the fact that obligations on the part of the seller were imposed by operation of law, and did not depend for their existence upon express agreement of the parties. And of tremendous significance in a rapidly expanding commercial society was the recognition of the right to recover damages on account of personal injuries arising from a breach of warranty. [Cc] The particular importance of this advance resides in the fact that under such circumstances strict liability is imposed upon the maker or seller of the product. Recovery of damages does not depend upon proof of negligence or knowledge of the defect. [Cc]

As the Sales Act and its liberal interpretation by the courts threw this protective cloak about the buyer, ***many manufacturers took steps to avoid these ever increasing warranty obligations. Realizing that the act governed the relationship of buyer and seller, they undertook to withdraw from actual and direct contractual contact with the buyer. They ceased selling products to the consuming public through their

own employees and making contracts of sale in their own names. Instead, a system of independent dealers was established; their products were sold to dealers who in turn dealt with the buying public, ostensibly solely in their own personal capacity as sellers. In the past in many instances, manufacturers were able to transfer to the dealers burdens imposed by the act and thus achieved a large measure of immunity for themselves. ***

There is no doubt that under early common-law concepts of contractual liability only those persons who were parties to the bargain could sue for a breach of it. In more recent times a noticeable disposition has appeared in a number of jurisdictions to break through the narrow barrier of privity when dealing with sales of goods in order to give realistic recognition to a universally accepted fact. The fact is that the dealer and the ordinary buyer do not, and are not expected to, buy goods, whether they be foodstuffs or automobiles, exclusively for their own consumption or use. Makers and manufacturers know this and advertise and market their products on that assumption; witness, the "family" car, the baby foods, etc. The limitations of privity in contracts for the sale of goods developed their place in the law when marketing conditions were simple, when maker and buyer frequently met face to face on an equal bargaining plane and when many of the products were relatively uncomplicated and conducive to inspection by a buyer competent to evaluate their quality. [C] With the advent of mass marketing, the manufacturer became remote from the purchaser, sales were accomplished through intermediaries, and the demand for the product was created by advertising media. In such an economy it became obvious

that the consumer was the person being cultivated. Manifestly, the connotation of "consumer" was broader than that of "buyer." He signified such a person who, in the reasonable contemplation of the parties to the sale, might be expected to use the product. Thus, where the commodities sold are such that if defectively manufactured they will be dangerous to life or limb, then society's interests can only be protected by eliminating the requirement of privity between the maker and his dealers and the reasonably expected ultimate consumer. In that way the burden of losses consequent upon use of defective articles is borne by those who are in a position to either control the danger or make an equitable distribution of the losses when they do occur. As Harper & James put it, "The interest in consumer protection calls for warranties by the maker that do run with the goods, to reach all who are likely to be hurt by the use of the unfit commodity for a purpose ordinarily to be expected." 2 Harper & James, Torts, 1571, 1572. ***

Accordingly, we hold that under modern marketing conditions, when a manufacturer puts a new automobile in the stream of trade and promotes its purchase by the public, an implied warranty that it is reasonably suitable for use as such accompanies it into the hands of the ultimate purchaser. ***

In the light of these matters, what effect should be given to the express warranty in question which seeks to limit the manufacturer's liability to replacement of defective parts, and which disclaims all other warranties, express or implied? In assessing its significance we must keep in mind the general principle that, in the absence of

fraud, one who does not choose to read a contract before signing it, cannot later relieve himself of its burdens. [C] And in applying that principle, the basic tenet of freedom of competent parties to contract is a factor of importance. But in the framework of modern commercial life and business practices, such rules cannot be applied on a strict, doctrinal basis. The conflicting interests of the buyer and seller must be evaluated realistically and justly, giving due weight to the social policy evinced by the Uniform Sales Act, the progressive decisions of the courts engaged in administering it, the mass production methods of manufacture and distribution to the public, and the bargaining position, occupied by the ordinary consumer in such an economy. ***

[Warranties originated in the law to safeguard the buyer and not to limit the liability of the seller or manufacturer. It seems obvious in this instance that the motive was to avoid the warranty obligations which are normally incidental to such sales. The language gave little and withdrew much. In return for the delusive remedy of replacement of defective parts at the factory, the buyer is said to have accepted the exclusion of the maker's liability for personal injuries, arising from the breach of the warranty, and to have agreed to the elimination of any other express or implied warranty. An instinctively felt sense of justice cries out against such a sharp bargain. But does the doctrine that a person is bound by his

signed agreement, in the absence of fraud, stand in the way of any relief? ***

The warranty before us is a standardized form designed for mass use. It is imposed upon the automobile consumer. He takes it or leaves it, and he must take it to buy an automobile. No bargaining is engaged in with respect to it. In fact, the dealer through whom it comes to the buyer is without authority to alter it; his function is ministerial--simply to deliver it. The form warranty is not only standard with Chrysler but [is also the uniform warranty of the Automobile Manufacturers Association]. ***

The gross inequality of bargaining position occupied by the consumer in the automobile industry is thus apparent. There is no competition among the car makers in the area of the express warranty. Where can the buyer go to negotiate for better protection? Such control and limitation of his remedies are inimical to the public welfare and, at the very least, call for great care by the courts to avoid injustice through application of strict common-law principles of freedom of contract. Because there is no competition among the motor vehicle manufacturers with respect to the scope of protection guaranteed to the buyer, there is no incentive on their part to stimulate good will in that field of public relations. Thus, there is lacking a factor existing in more competitive fields, one which tends to guarantee the safe construction of the article sold. Since all competitors operate in the same way, the urge to be careful is not so pressing. See "Warranties of Kind and Quality," 57 Yale L.J. 1389, 1400 (1948). ***

The task of the judiciary is to administer the spirit as well as the letter of the law. On issues such as the present one, part of that burden is to protect the ordinary man against the loss of important rights through what, in effect, is the unilateral act of the manufacturer. ***In

the framework of this case, illuminated as it is by the facts and the many decisions noted, we are of the opinion that Chrysler's attempted disclaimer of an implied warranty of merchantability and of the obligations arising therefrom is so inimical to the public good as to compel an adjudication of its invalidity. ***

[The court then held that the dealer, Bloomfield Motors, would not be permitted to disclaim an implied warranty of fitness with respect to personal injuries caused by the automobile in question. The problem of whether retailers should be subject to strict liability is discussed at note 4, page 886.]

NOTES AND QUESTIONS

1. The first case to extend an implied warranty of the seller beyond privity of contract was Mazetti v. Armour & Co., 75 Wash. 622, 135 P. 633 (1913), which was a bad food case. It came upon the heels of a prolonged nation-wide agitation about dangerous food and was promptly followed in Mississippi and Kansas, and then in other states. For a period of time, courts

struggled to evolve various ingenious theories, most of them with an obvious element of fiction--such as that the dealer was an agent of the consumer in purchasing from the manufacturer or third party beneficiary contracts and the like. Finally, in Coca-Cola Bottling Works v. Lyons, 145 Miss. 876, 111 So. 305 (1927), the Mississippi Supreme Court came up with the idea of an implied warranty running with the goods, by analogy to a covenant running with the land. By 1960 nearly half of the states had accepted the special rule as to food, and five more reached the same result under pure food

statutes. The development is traced in Prosser, The Assault Upon the Citadel, 69 Yale L.J. 1099 (1960).

2. A gradual extension beyond food began not long after 1950, first with other products for what might be called intimate bodily use, such as hair dye and clothing, and then to all products as in the principal case. The implied warranty theory is still used as a basis for product liability claims in Massachusetts. Haglund v. Philip Morris, Inc., 446 Mass. 741, 847 N.E.2d 315 (2006) (unreasonable use of the product may be a defense). Some states, however, require privity for product liability cases based on the implied warranty of merchantability. Compex Inter. Co., Ltd. v. Taylor, 209 S.W.3d 462 (Ky. 2006) (dismissing case against chair manufacturer because privity existed only between buyer and retailer).

3. The Uniform Sales Act, discussed in the principal case, was promulgated in 1906. Its warranty provisions were intended to apply only to buyer and seller. It was superseded by the Uniform Commercial Code (UCC). Article 2, which contains the warranty provisions, has been adopted in every state except Louisiana. While the UCC's implied-warranty provisions are similar to those in the Uniform Sales Act (UCC §§ 2-314 and 315), the Code extended warranties to certain third parties in Section 2-318.

4. Disclaimers and Limitations on Damages. The UCC, unlike the Uniform Sales Act, deals directly with the issue of disclaimers. The most important sections include 2-302 and 2-316, allowing sellers to disclaim warranties implied by the code in some circumstances. Some states have modified their version of the UCC to prohibit the exclusion or modification of implied warranties for consumer goods

and services. See, e.g., Me. Rev. Stat. Ann., Tit. 11, § 2--316(5) and Mass. Gen. Laws Ann., Ch. 106, § 2--316A. The UCC also allows the seller to limit the damages available in the event of a breach--but restricts the seller's ability to do that in ways that impact on personal injury breach of warranty claims. Section 2-719(3) "Consequential damages may be limited or excluded unless the limitation or exclusion is unconscionable. Limitation of consequential damages for injury to the person in the case of consumer goods is prima facie unconscionable but limitation of damages where the loss is commercial is not."

5. Notice. Could the principal case have been decided the same way within the framework of the UCC? How? Like its predecessor, the UCC has a number of stumbling blocks in the way of a strict liability recovery in tort law. One of them is UCC § 2--607, which requires that a buyer must "within a reasonable time after he discovers or should have discovered the breach [of warranty] notify the seller or be barred from any remedy." The analogue

Uniform Sales Act provision and the whole problem of the utility of warranty as a tort law remedy confronted Justice Traynor in the next principal case.

6. Federal Acts. Warranty and other safety issues are the subject of federal regulation in some areas. While none of these acts creates specific civil tort remedies, violation of a specific standard issued under them may subject a defendant to liability on a negligence per se or implied tort theory. See note 5, page 242; note 7, page 251; and pages 1290-1318.

7. Arbitration. What if, in the principal case instead of offering the trivial benefit of replacement parts in exchange for the purchaser's right to sue, the manufacturer offered prompt arbitration, payment of all reasonable attorney costs if it lost the dispute, and a fair process of choosing the arbitrators, should a court uphold such an agreement? Would it matter if the agreement was not industry wide but included in contracts of one or two of several manufacturers? See Chapter 12:2.

(C) Strict Liability in Tort

Greenman v. Yuba Power Products, Inc.

Supreme Court of California, 1963.

59 Cal.2d 57, 377 P.2d 897, 27 Cal.Rptr. 697.

TRAYNOR, Justice. Plaintiff brought this action for damages against the retailer and the manufacturer of a Shopsmith, a combination power tool that could be used as a saw, drill, and wood lathe. He saw a Shopsmith demonstrated by the retailer and studied a brochure prepared by the manufacturer. He decided he wanted a Shopsmith for his home workshop, and his wife bought and gave him one for Christmas in 1955. In 1957 he bought the necessary attachments to use the Shopsmith as a lathe for turning a large piece of wood he wished to make into a chalice. After he had worked on the piece of wood several times without difficulty, it suddenly flew out of the machine and struck him on the forehead, inflicting serious injuries. About ten and a half months later, he gave the retailer and the manufacturer written notice of claimed breaches of warranties

and filed a complaint against them alleging such breaches and negligence.

After a trial before a jury, the court ruled that there was no evidence that the retailer was negligent or had breached any express warranty and that the manufacturer was not liable for the breach of any implied warranty. Accordingly, it submitted to the jury only the cause of action alleging breach of implied warranties against the retailer and the causes of action alleging negligence and breach of express warranties against the manufacturer. The jury returned a verdict for the retailer against plaintiff and for plaintiff against the manufacturer in the amount of $65,000. The trial court denied the manufacturer's motion for a new trial and entered judgment on the verdict. ***

Plaintiff introduced substantial evidence that his injuries were caused by defective design and construction of the Shopsmith. His expert

835

witnesses testified that inadequate set screws were used to hold parts of the machine together so that normal vibration caused the tailstock of the lathe to move away from the piece of wood being turned permitting it to fly out of the lathe. They also testified that there were other more positive ways of fastening the parts of the machine together, the use of which would have prevented the accident. The jury could therefore reasonably have concluded that the manufacturer negligently constructed the Shopsmith. The jury could also reasonably have concluded that statements in the manufacturer's brochure were untrue, that they constituted express warranties, and that plaintiffs injuries were caused by their breach.

The manufacturer contends, however, that plaintiff did not give it notice of breach of warranty within a reasonable time and that therefore his cause of action for breach of warranty is barred by section 1769 of the Civil Code. Since it cannot be determined whether the verdict against it was based on the negligence or warranty cause of action or both, the manufacturer concludes that the error in presenting the warranty cause of action to the jury was prejudicial.

Section 1769 of the Civil Code provides: "In the absence of express or implied agreement of the parties, acceptance of the goods by the buyer shall not discharge the seller from liability in damages or other legal remedy for breach of any promise or warranty in the contract to sell or the sale. But, if after acceptance of the goods, the buyer fails to give notice to the seller of the breach of any promise or warranty within a reasonable time after the buyer knows, or ought to know of such breach, the seller shall not be liable therefor." ***

The notice requirement of section 1769, however, is not an appropriate one for the court to adopt in actions by injured consumers against manufacturers with whom they have not dealt. [Cc] "As between the immediate parties to the sale, [the notice requirement] is a sound commercial rule, designed to protect the seller against unduly delayed claims for damages. As applied to personal injuries, and notice to a remote seller, it becomes a booby-trap for the unwary. The injured consumer is seldom 'steeped in the business practice which justifies the rule,' [cc] and at least until he has had legal advice it will not occur to him to give notice to one with whom he has had no dealings." [Cc] It is true that in [four prior California cases cited] the court assumed that notice of breach of

warranty must be given in an action by a consumer against a manufacturer. Since in those cases, however, the court did not consider the question whether a distinction exists between a warranty based on a contract between the parties and one imposed on a manufacturer not in privity with the consumer, the decisions are not authority for rejecting the rule. [Cc] We conclude, therefore, that even if plaintiff did not give timely notice of breach of warranty to the manufacturer, his cause of action based on the representations contained in the brochure was not barred.

836

Moreover, to impose strict liability on the manufacturer under the circumstances of this case, it was not necessary for plaintiff to establish an express warranty as defined in section 1732 of the Civil Code. A manufacturer is strictly liable in tort when an article he places on the market, knowing that it is to be used without inspection for defects, proves to have a defect that causes injury to a human being. Recognized first in the case of unwholesome food products, such liability has now been extended to a variety of other products that create as great or greater hazards if defective. [Cc]

Although in these cases strict liability has usually been based on the theory of an express or implied warranty running from the manufacturer to the plaintiff, the abandonment of the requirement of a contract between them, the recognition that the liability is not assumed by agreement but imposed by law [cc], and the refusal to permit the manufacturer to define the scope of its own responsibility for defective products [cc], make clear that the liability is not one governed by the law of contract warranties but by the law of strict

liability in tort. Accordingly, rules defining and governing warranties that were developed to meet the needs of commercial transactions cannot properly be invoked to govern the manufacturer's liability to those injured by their defective products unless those rules also serve the purposes for which such liability is imposed.

We need not recanvass the reasons for imposing strict liability on the manufacturer. ***The purpose of such liability is to insure that the costs of injuries resulting from defective products are borne by the manufacturers that put such products on the market rather than by the injured persons who are powerless to protect themselves. Sales warranties serve this purpose fitfully at best. [C] In the present case, for example, plaintiff was able to plead and prove an express warranty only because he read and relied on the representations of the Shopsmith's ruggedness contained in the manufacturer's brochure. Implicit in the machine's presence on the market, however, was a representation that it would safely do the jobs for which it was built. Under these circumstances, it should not be controlling whether plaintiff selected the machine because of the statements in the brochure, or because of the machine's own appearance of excellence that belied the defect lurking beneath the surface, or because he merely assumed that it would safely do the jobs it was built to do. It should not be controlling whether the details of the sales from manufacturer to retailer and from retailer to plaintiff's wife were such that one or more of the implied warranties of the sales act arose. [C] "The remedies of injured consumers ought not to be made to depend upon the intricacies of the law of sales." [Cc] To establish the manufacturer's liability it was sufficient that plaintiff proved that

he was injured while using the Shopsmith in a way it was intended to be used as a result of a defect in design and manufacture of

837

which plaintiff was not aware that made the Shopsmith unsafe for its intended use. ***

The judgment is affirmed.

NOTES AND QUESTIONS

1. The Greenman decision, which might be characterized as the MacPherson of a later day, appeared two years before the final published draft of the Restatement (Second) of Torts § 402A:

§ 402A. Special Liability of Seller of Product for Physical Harm to User or Consumer

(1) One who sells any product in a defective condition unreasonably dangerous to the user or consumer or to his property is subject to liability for physical harm thereby caused to the ultimate user or consumer, or to his property, if

(a) the seller is engaged in the business of selling such a product, and

(b) it is expected to and does reach the user or consumer without substantial change in the condition in which it is sold.

(2) The rule stated in Subsection (1) applies although

(a) the seller has exercised all possible care in the preparation and sale of his product, and

(b) the user or consumer has not bought the product from or entered into any contractual relation with the seller.

It should be noted in passing that the law was moving so fast that this Section was actually drafted three times--first as applicable only to food and drink, next, as extended also to include products for "intimate bodily use," and finally, as applicable to all products.

2. Section 402A literally has swept the country. Only a few jurisdictions do not recognize a cause of action for strict liability for personal injury caused by a product and those jurisdictions use breach of implied warranty of merchantability in a comparable fashion. Sensenbrenner v. Rust, Orling & Neale, 236 Va. 419, 374 S.E.2d 55 (1988); Smith v. Fiber Controls Corp., 300 N.C. 669, 268 S.E.2d 504 (1980) and N.C. Gen. Stat. Ann. § 99B-1.1 (declaring that "[t]here shall be no strict liability in tort in product liability actions"); Cline v. Prowler, Inc., 418 A.2d 968 (Del. 1980); and Cigna Ins. Co. v. Oy Saunatec, Ltd., 241 F.3d 1, 15 (1st Cir. 2001) ("Actions under Massachusetts law for breach of the implied warranty of merchantability are the functional equivalent of strict liability in other jurisdictions").

3. Now that almost all jurisdictions have followed the lead of the principal case and the Restatement (Second) and recognized some form of strict liability, should breach of implied warranty still survive as a separate cause of action? Compare Denny v. Ford Motor Co., 87 N.Y.2d 248, 639 N.Y.S.2d 250, 662 N.E.2d 730, 736 (1995) (as long as the legislature, through enactment of UCC, is the source of authority for a breach of implied warranty claim, "we are not free to

merge the warranty cause of action with its tort-based sibling regardless of whether, as a matter of policy, the contract-based

838

warranty claim may fairly be regarded as a historical relic that no longer has any independent substantive value") with Restatement (Third) of Torts: Products Liability § 2 comment n (1998) (Restatement "contemplates that a well-coordinated body of law governing liability for harm to persons or property arising out of the sale of defective products requires a consistent definition of defect, and that the definition properly should come from tort law, whether the claim carries a tort label or one of implied warranty of merchantability").

4. Whether the liability rests upon negligence, warranty, or strict liability in tort, it applies to all types of products. Whatever limitations there may once have been as to food and drink, intimate bodily use, "inherent danger," or a high degree of danger, all have gone by the boards. The product is not even limited to those used by human beings; such things as animal feed and veterinary medication that may foreseeably cause harm only to property are within the liability.

5. Also gone by the boards is a rather foolish distinction that used to plague the food cases, between the product itself and the container in which it is sold. The two are now treated as one, so if a bottled beverage explodes, it no longer makes any difference whether it is due to a defect in the beverage or in the bottle. Would strict liability apply to the manufacturer of Tylenol for failure to make its packaging tamper proof? Cf. Elsroth v. Johnson & Johnson, 700 F.Supp. 151

(S.D.N.Y. 1988) (cyanide poisoning due to breach of packaging by unknown third party).

6. With warranty language out of the way, a number of problems (including the notice requirement confronting the court in Greenman) disappear. For example, courts have held that a tort and not a contract statute of limitations applies to plaintiffs claim. The court in Greeno v. Clark Equip. Co., 237 F.Supp. 427, 429 (N.D. Ind. 1965), stated that strict liability in tort is "hardly more than what exists under implied warranty when stripped of the contract doctrines of privity, disclaimer, requirements of notice of defect, and limitation through inconsistencies with express warranties."

7. A number of rationales have been advanced by legal writers in support of strict liability in tort. Which do you regard as sound?

A. The consumer finds it too difficult to prove negligence against the manufacturer of a product.

B. Strict liability provides an effective and necessary incentive to manufacturers to make their products as safe as possible.

C. Reputable manufacturers do in fact stand behind their products, replacing or repairing those that prove to be defective; and many of them issue express agreements to do so. Therefore, all manufacturers should be responsible when an injury results from a normal use of a product.

D. The manufacturer is in a better position to protect against harm, by insuring against liability for it, and, by adding the cost of the insurance to the price of the product, to pass the loss on to the general public.

E. Strict liability already can be accomplished by a series of actions, in which the consumer first recovers from the retailer on a warranty theory, and liability based on warranties is then carried back through the intermediate dealers to the manufacturer. This process is time-consuming, expensive, and wasteful, so there should be a short-cut.

F. By placing the product on the market, the seller represents to the public that it is fit; and the seller intends and expects that it will be purchased and consumed in reliance upon that representation. The distributors and retailers are no more than a conduit, a mechanical device through which the product reaches the consumer.

G. The costs of accidents should be placed on the party best able to determine whether there are means to prevent that accident. When those means are less expensive than the costs of such accidents, responsibility for implementing them should be placed on the party best able to do so.

8. What about the danger of deterring manufacturers from introducing new products, or improving old ones? And what about the danger of frivolous claims? "The rats of Hamlin were as nought in comparison with that horde of mice which has sought refreshment within Coca-Cola bottles and died of a happy surfeit." Spruill, Privity of Contract as a Requisite for Recovery on Warranty, 19 N.C. L. Rev. 551, 566 (1941). Assuming that there will be groundless claims, are there ways the manufacturer can be protected from those claims without eliminating strict liability?

9. Beyond Restatement (Second). When the American Law Institute's (ALI) Restatement (Second) § 402A was drafted, a

decision was made to use a singular definition of defect to cover all cases of product liability: "any product in a defective condition unreasonably dangerous to the user or consumer." Following this model, a single definition of defect was utilized when the European EC Product Liability Directive was drafted. As Restatement (Second) § 402A was applied by the courts, it became apparent that a single definition standard was being used to address very different types of defects.

The first type of defect, and the focus of the drafters of § 402A, is a manufacturing defect. Such a defect occurs when a product that injures a person does so because there is a flaw that is not in the general product line. It is a failure in quality control. As the cases suggest, strict product liability for this type of defect had been evolving for a substantial period of time. The second type, which is very different, is a defect attributable to failure of design. Here, an entire product line is challenged. The singular definition provided little or no guidelines to courts as to how liability should be imposed: Should fault be a basis? The third type is a defect due to failure to warn about risks associated with use of the product. Restatement (Second) did not separate this type of defect in its "Black Letter" rule, but did address it separately in comment j, suggesting a fault predicate for failure to warn.

In the three decades that followed the publication of § 402A, literally thousands of cases wrestled with the problem of a singular definition of defect. As each jurisdiction struggled with its standard for liability in the context of each of the types of defect, it became apparent that the monolithic

approach was such in name (strict liability) or number (§ 402A) only. In reality, the standards for each type of defect were somewhat different. In 1993, the American Law Institute began work on a new Restatement of Torts, with a specific focus on products liability. The process through which it was developed is told below and the critical section shifting the paradigm of Restatement (Second) § 402A is then reprinted.

2. Product Defects

In the 1990s, the ALI began a five year process to develop the Restatement (Third) of Torts: Products Liability with a draft prepared by its Reporters, Professors Aaron Twerski of Brooklyn Law School and James Henderson of Cornell Law School. They were assisted by a 20- person Advisory Committee composed of judges, law professors, and practicing attorneys. The decision to again "restate" the law of products liability was the result of case law interpretations of § 402A that had produced many new and challenging issues not anticipated in the early 1960s when § 402A was drafted.

After the Reporters produced an initial draft, it went through an intensive review process by the Advisory Committee, a Members Consultative Group, interest groups that were not members of the ALI, the ALI's Governing Council, and finally the ALI membership itself. A multiplicity of drafts went through the same process until May 1998 when the Final Draft was approved overwhelmingly by the ALI membership. The process is described in Schwartz, The Restatement (Third) of Torts: Products Liability: The American Law Institute's Process of Democracy and Deliberation, 26 Hofstra L.

Rev. 743 (1998). Both the process by which the new Restatement was developed and the final product that was approved have been subject to criticism. See Shapo, In Search of the Law of Products Liability: The ALI Restatement Project, 48 Vand. L. Rev. 631 (1995) and Popper, Tort Reform Policy More Than State Law Dominates Section 2 of the Third Restatement, 8 Kan. J.L. & Pub. Pol'y 38 (1998). The Restatement, mirroring the Uniform Product Liability Act (UPLA) (1979), abandoned the single definition approach to defect and replaced it with separate functional rules for manufacturing defects, design defects, and defects due to failure to warn. There were some members of the ALI who believed that Restatement (Second) had it right, that judges needed latitude to shape the law, and that any further definition of defect would hinder this development. Other ALI members supported the functional model, but differed as to whether the Reporters had arrived at the correct approach in defining each of the three separate categories. Only time will tell whether the new Restatement will receive the general acceptance that ultimately met the Restatement (Second) § 402A. In the two decades since its publication, Restatement (Third) has been a major influence on the development of products liability law. Some courts have embraced its approach, others have not, but almost all have considered it. See, e.g., Tincher v. Omega

Flex, Inc., 104 A.3d 328 (Pa. 2014) (declining to adopt Restatement (Third) but acknowledging appreciation of certain of its principles in the formation of Pennsylvania strict liability law). For a scholarly evaluation of its effect, see Symposium: The Products Liability Restatement: Was it a Success? 74 Brook. L. Rev. (2009).

Here is the basic text defining product defectiveness from Restatement (Third) of Torts: Products Liability (1998):

TOPIC 1. PRODUCT DEFECTIVENESS

§ 1. Liability of Commercial Seller or Distributor for Harm Caused by Defective Products

(a) One engaged in the business of selling or otherwise distributing products who sells or distributes a defective product is subject to liability for harm to persons or property caused by the defect.

§ 2. Categories of Product Defect

A product is defective when, at the time of sale or distribution, it contains a manufacturing defect, is defective in design, or is defective because of inadequate instructions or warnings. A product:

(a) contains a manufacturing defect when the product departs from its intended design even though all possible care was exercised in the preparation and marketing of the product;

(b) is defective in design when the foreseeable risks of harm posed by the product could have been reduced or avoided by the adoption of a reasonable alternative design by the seller or other distributor, or a predecessor in the commercial chain of distribution, and the omission of the alternative design renders the product not reasonably safe;

(c) is defective because of inadequate instructions or warnings when the foreseeable risks of harm posed by the product could have been reduced or avoided by the provision of reasonable instructions or warnings by the seller or other distributor, or a predecessor in the

commercial chain of distribution, and the omission of the instructions or warnings renders the product not reasonably safe.

As you review the cases in the rest of this chapter, consider whether the monolithic approach of Restatement (Second) § 402A (1965) or the functional approach of Restatement (Third) of Torts: Products Liability (1998) better serves the goals of tort law.

842

(A) Manufacturing Defect

Rix v. General Motors Corp.

Supreme Court of Montana, 1986.

222 Mont. 318, 723 P.2d 195.

Weber, J.

In 1978, Michael Rix was injured when the pickup he was driving was hit from behind by a 1978 General Motors Corporation (GMC) two ton chassis-cab, which had been equipped with a water tank after sale by the GMC dealer. Plaintiff sued GMC on a theory of strict liability in the Yellowstone County District Court. Following a jury verdict for GMC, plaintiff appeals. ***

Plaintiff contends he was injured by an unreasonably dangerous 1978 two ton chassis-cab, which had been placed in the stream of commerce by GMC. Premised on a theory of strict liability, he maintains the product was unreasonably dangerous because of both manufacturing and design defects.

The parties stipulated that the accident occurred because of brake failure. Expert testimony from both parties established that the fluids necessary to the braking system had escaped when a brake tube came out of a nut where it fastened to the top of the Hydrovac, a booster unit. Witnesses also testified that the brake tube came out of the nut either because the tube broke or was improperly flared.

Plaintiff contends that the tube broke because there was a manufacturing defect in the tube, basically a bad flare, when the truck came off the assembly line. Plaintiff also contends that the brake system on the truck, a single system, was defectively designed, and argues that GMC's knowledge of available technology coupled with the foreseeable use of the vehicle should have mandated a dual braking system, which provides extra braking power. Plaintiff maintains the accident would have been less severe or would not have happened had the truck been equipped with a dual system.

GMC agreed that the brake tube was defective, but contended that the tube had been altered after it left the GMC assembly line, so that the defective tube was not GMC's responsibility. GMC also contended that the single system was neither a design defect nor unreasonably dangerous, and that the accident would have occurred even if the truck had been equipped with a dual brake system.

Did the trial court properly instruct the jury on strict liability?

***

INSTRUCTION NO. 10

I will now define the doctrine of strict liability to you. Keep in mind that this is only a general definition, and must be considered along with

843

the specific instructions on the same topic which follow. The general principle of strict liability as it applies in the State of Montana is:

(1) One who sells any product in a defective condition unreasonably dangerous to the user or consumer or to his property is subject to liability for physical harm thereby caused to the ultimate user or consumer, or to his property, if:

(a) the seller is engaged in the business of selling such a product, and

(b) it is expected and does reach the user or consumer without substantial change in the condition in which it is sold.

(2) The rule stated in Subsection (1) applies although

(a) the seller has exercised all possible care in the preparation and sale of his product, and

(b) the user or consumer has not bought the product from or entered into any contractual relation with the seller.

INSTRUCTION NO. 11

The plaintiff must establish three essential elements in order to recover under his theory of strict liability. They are as follows:

First, that the defendant General Motors Corporation manufactured and sold a product which at the time General Motors sold it was in a

defective condition unreasonably dangerous to the consumer or user;

Second, that the product was expected to and did reach the ultimate consumer without substantial change in the condition it was in at the time it was sold; and

Third, that the defective condition in the product proximately caused injury to the plaintiff.

Jury instruction #10 is the same as Section 402A Restatement (Second) of Torts (1965). Plaintiff did not make an objection at the time the instruction was offered. Plaintiff objected to jury instruction #11 "on the grounds that the second standard improperly states Montana law regarding tracing requirement back to the manufacturer."

***

We will now discuss strict liability under a manufacturing defect theory. Under a manufacturing defect theory, the essential question is whether the product was flawed or defective because it was not constructed correctly by the manufacturer:

"[Manufacturing defects, by definition, are 'imperfections that inevitably occur in a typically small percentage of products of a given design as a result of the fallibility of the manufacturing process. A [defectively manufactured] product does not conform in some significant aspect to the intended design, nor does it conform to the great majority of products manufactured in accordance with that design.' (Henderson,

Judicial Review of Manufacturers' Conscious Design Choices: The Limits of Adjudication, 73 Col.L.Rev. 1531, 1543). Stated differently, a defectively manufactured product is flawed because it is misconstructed without regard to whether the intended design of the manufacturer was safe or not. Such defects result from some mishap in the manufacturing process itself, improper workmanship, or because defective materials were used in construction." [C]

Restatement (Second) of Torts, Section 402A (1965) has been adopted by this Court as the applicable law with regard to strict liability under a manufacturing defect theory. The Restatement view is continued in Instruction #10, previously quoted in this opinion. In the context of strict liability under a manufacturing defect theory, we conclude that instructions #10 and #11, as given by the District Court, are adequate. ***

We reverse [on other grounds] and remand for a new trial in conformity with this opinion.

NOTES AND QUESTIONS

1. The distinction between defect in design and defect in manufacture (or construction) was not well developed in early strict liability cases. See, e.g., Greenman v. Yuba Power Prods., Inc., page 834, nor did the Restatement (Second) of Torts § 402A resolve the ambiguity. Today, the distinction is clearer and may be quite important in terms of strict liability theory. If a product has a material defect in construction that causes a personal injury to the user, strict liability usually will be imposed. The plaintiffs main problems will be in the area of factual proof--a topic developed at page 866. On the other hand, when plaintiff contends that the product is defectively

designed or was accompanied by inadequate warnings, the test for defect varies by jurisdiction. See, e.g., Ford Motor Co. v. Ledesma, 242 S.W.3d 32 (Tex. 2007) (jury instruction for manufacturing defect that omitted requirement of "deviation from specifications or planned output" required new trial and noting that design defect claim requires showing of safer alternative design).

2. Note that the plaintiff has to prove that the product deviated from the seller's design or from the seller's other products of the same design, not what specific conduct of the manufacturer led to that defect. In the context of the principal case, the plaintiff only needs to show that the brakes failed because of a manufacturing defect in the tube (strict liability), not what assembly line actions led to that defect (negligent conduct of the manufacturer). What if the manufacturer could show that it had the best quality control procedures in the entire industry, that only one out of every one million tubes came off the assembly line with a defect, and that there was no way to detect those defects? That would constitute reasonable care and thus no liability under a negligence standard. Under a strict liability standard, however, the manufacturer would be liable. See Restatement (Third) of Torts: Products Liability § 2(a) (1998) (liability for manufacturing defect even though all possible care was exercised). If you represented a

manufacturer whose product contained a manufacturing defect that caused injury to someone, would you advise your client to settle or litigate?

3. The manufacturer in this case was claiming that the defect was not present when it left the assembly line, but was introduced by someone else who later altered the product. If that is so, the manufacturer would not be liable because the product did not "reach the user or consumer without substantial change." No doubt anticipating this possibility, the plaintiff also has alleged a design defect--that the manufacturer should have provided for a dual (backup) braking system, which would have prevented the accident. Very few cases contain only a manufacturing defect claim. Based on the principal case, do you see why it would be to the plaintiffs advantage to bring a design defect claim in addition to the manufacturing defect claim? Do you see why there is almost always a design defect claim lurking within a manufacturing defect case?

(B) Design Defect

Prentis v. Yale Mfg. Co.

Supreme Court of Michigan, 1984.

421 Mich. 670, 365 N.W.2d 176.

BOYLE, Justice. This products liability action arose out of injuries sustained in an accident involving the operation of a hand-operated forklift manufactured by defendant. ***

The facts of this case are not seriously in dispute. In April of 1970, plaintiff John Prentis, who was employed as foreman of the parts department at an automobile dealership, sustained a hip injury in an accident involving the use of a forklift manufactured by defendant Yale Manufacturing Company and sold to plaintiffs employer in 1952. The forklift was a stand-up or walking type, termed by defendant a

"walkie hi-lo" model, rather than a riding or sit down variety. It was operated by lifting its handle up, much like the handle of a wagon. The forklift was estimated by plaintiff to weigh about two thousand pounds and was powered by a large battery, which had to be recharged every night. The machine was equipped with a hand controlled "dead-man" switch which normally prevented it from moving if the operator let go of the handle or controls. ***

The accident in which Mr. Prentis was injured occurred late in the day, and he testified that he was aware at the time that the battery charge on the forklift was running low. After using the machine to assist him in placing an engine inside the cargo area of a delivery van, while the forklift was in tow behind him on a slightly inclined ramp leading from the delivery bay, Mr. Prentis attempted to start the machine by working the handle up and down. When the machine experienced a power surge, he lost his footing and fell to the ground. It appears that plaintiffs injuries were a result of the fall only, as the machine did not hit or run over him, but continued past him and stopped when it ran into a parked car.

846

Mr. Prentis received extensive treatment for multiple fractures of his left hip. ***

The focus of plaintiffs' proofs at both trials was an alleged defect in the design of the forklift, and the substance of the expert witness's testimony was that the design of the forklift failed to properly incorporate the operator as a "human factor" into the machine's function, specifically because it did not provide a seat or platform for the operator. ***

The development of the law of tort liability for physical injury caused by products is perhaps the most striking and dramatic of all the numerous stories in the portfolio of modern tort scenarios. When the societal goal of holding manufacturers accountable for the safety of their products has been threatened by the interposition of technical rules of law, it has been the rules that have gradually given way.

However, this has never meant that courts have been willing to impose absolute liability in this context and from their earliest application, theories of products liability have been viewed as tort doctrines which should not be confused with the imposition of absolute liability. ***

Thus while courts have accepted the social policy rationale that those injured by defective products should be compensated for their injuries without being subject to the contractual intricacies of the law of sales, and have agreed that manufacturers can most effectively distribute the costs of injuries, they have never gone so far as to make sellers insurers of their products and thus absolutely liable for any and all injuries sustained from the use of those products.

Like the courts in every other state, whether a suit is based upon negligence or implied warranty, we require the plaintiff to prove that the product itself is actionable--that something is wrong with it that makes it dangerous. This idea of "something wrong" is usually expressed by the adjective "defective" and the plaintiff must, in every case, in every jurisdiction, show that the product was defective. [C]

As a term of art, "defective" gives little difficulty when something goes wrong in the manufacturing process and the product is not in its intended condition. In the case of a "manufacturing defect," the

product may be evaluated against the manufacturer's own production standards, as manifested by that manufacturer's other like products.

However, injuries caused by the condition of a product may also be actionable if the product's design, which is the result of intentional design decisions of the manufacturer, is not sufficiently safe. Conscious design defect cases provide no such simple test. The very question whether a defect in fact exists is central to a court's inquiry. It is only in design defect cases that a court is called upon to supply the standard for defectiveness. Thus, the term "defect" in design cases is "an epithet--an expression for the legal conclusion rather than a test for reaching that conclusion."

847

See Wade, On product "design defects" and their actionability, 33 Van. L.R. 551, 552 (1980).

At present, questions related to "design defects" and the determination of when a product is defective, because of the nature of its design, appear to be the most agitated and controversial issues before the courts in the field of products liability. A number of appellate courts, aware that they are engaged in the conscious task of molding the law of products liability, have become concerned that they are not differentiating with sufficient clarity between various theories of recovery in design defect cases. In response, they have sought to devise significant and well-articulated distinctions. At the same time, other courts have become concerned that the differentiation is too great, and have attempted to devise means of keeping the broad scope of liability in check. The result has been

several cases in which the standard for liability in the design area has been very carefully examined by courts and often vigorously debated by the judges themselves. A survey of the important recent cases in neighboring jurisdictions suggests something of the creative ferment underlying what has been described as the "rich tapestry" of the developing common law of products liability.

The approaches for determination of the meaning of "defect" in design cases fall into four general categories. The first, usually associated with Dean Wade, employs a negligence risk-utility analysis, but focuses upon whether the manufacturer would be judged negligent if it had known of the product's dangerous condition at the time it was marketed. The second, associated with Dean Keeton, compares the risk and utility of the product at the time of trial. The third focuses on consumer expectations about the product. The fourth combines the risk-utility and consumer-expectation tests. While courts have included many other individual variations in their formulations, the overwhelming consensus among courts deciding defective design cases is in the use of some form of risk-utility analysis, either as an exclusive or alternative ground of liability. Risk-utility analysis in this context always involves assessment of the decisions made by manufacturers with respect to the design of their products. ***

The risk-utility balancing test is merely a detailed version of Judge Learned Hand's negligence calculus. See United States v. Carroll Towing Co., 159 F.2d 169, 173 (2d Cir.1947). As Dean Prosser has pointed out, the liability of the manufacturer rests "upon a departure from proper standards of care, so that the tort is essentially a matter of negligence."

Although many courts have insisted that the risk-utility tests they are applying are not negligence tests because their focus is on the product rather than the manufacturer's conduct, [c] the distinction on closer examination appears to be nothing more than semantic. As a commonsense matter, the jury weighs competing factors presented in evidence and reaches a conclusion about the judgment or decision (i.e., conduct) of

848

the manufacturer. The underlying negligence calculus is inescapable. As noted by Professor Birnbaum:

"When a jury decides that the risk of harm outweighs the utility of a particular design (that the product is not as safe as it should be) it is saying that in choosing the particular design and cost tradeoffs, the manufacturer exposed the consumer to greater risk of danger than he should have. Conceptually and analytically, this approach bespeaks negligence." Birnbaum, Unmasking the test for design defect: From negligence [to warranty] to strict liability to negligence, 33 Van.L.R. 593, 610 (1980) ***

The competing factors to be weighed under a risk-utility balancing test invite the trier of fact to consider the alternatives and risks faced by the manufacturer and to determine whether in light of these the manufacturer exercised reasonable care in making the design choices it made. Instructing a jury that weighing factors concerning conduct and judgment must yield a conclusion that does not describe conduct is confusing at best.

The Model Uniform Product Liability Act (UPLA) was published in 1979 by the Department of Commerce for voluntary use by the

states. The act adopts a negligence or fault system with respect to design defects. It is important to examine the rationale underlying the UPLA's adoption of negligence as the criteria for liability in design defect cases. The drafters rejected, as a reason for application of strict liability to design defect cases, the theory of risk distribution wherein the product seller distributes the costs of all product-related risks through liability insurance. They believe that a "firmer liability foundation" than strict liability is needed in a design defect case because the whole product line is at risk. Furthermore, the drafters believed that a fault system would provide greater incentives for loss prevention.

The approach of the UPLA has been approved by several commentators, whose analysis is also instructive. First, unlike manufacturing defects, design defects result from deliberate and documentable decisions on the part of manufacturers, and plaintiffs should be able to learn the facts surrounding these decisions through liberalized modern discovery rules. Access to expert witnesses and technical data are available to aid plaintiffs in proving the manufacturer's design decision was ill considered.

Second, to the extent that a primary purpose of products liability law is to encourage the design of safer products and thereby reduce the incidence of injuries, a negligence standard that would reward the careful manufacturer and penalize the careless is more likely to achieve that purpose. A greater incentive to design safer products will result from a fault system where resources devoted to careful and safe design will pay dividends in the form of fewer claims and lower insurance premiums for the manufacturer with a good design safety record. The incentive will

result from the knowledge that a distinction is made between those who are careful and those who are not.

Third, a verdict for the plaintiff in a design defect case is the equivalent of a determination that an entire product line is defective. It usually will involve a significant portion of the manufacturer's assets and the public may be deprived of a product. Thus, the plaintiff should be required to pass the higher threshold of a fault test in order to threaten an entire product line. The traditional tort law of negligence better serves this purpose.

Fourth, a fault system incorporates greater intrinsic fairness in that the careful safety-oriented manufacturer will not bear the burden of paying for losses caused by the negligent product seller. It will also follow that the customers of the careful manufacturer will not through its prices pay for the negligence of the careless. As a final bonus, the careful manufacturer with fewer claims and lower insurance premiums may, through lower prices as well as safer products, attract the customers of less careful competitors.

We find the formula adopted by the UPLA on the question of defective design to have the merit of being clear and understandable. We recognize that in products liability cases against manufacturers based upon alleged defects in the design of a product, the courts of this state have attempted to avoid both the notion of fault implicit in negligence and the harshness of no-fault implicit in absolute liability. Thus, on the basis of the heritage of contract and sales law underlying concepts of implied warranty, we have in the past approved instructions that attempted to focus a

jury's attention on the condition of a product rather than on the reasonableness of the manufacturer's conduct or decision. We are persuaded that in so doing in the context of cases against the manufacturers of products based upon allegations of defective design, we have engaged in a process that may have served to confuse, rather than enlighten, jurors, who must ultimately apply understandable guidelines if they are to justly adjudicate the rights and duties of all parties. Imposing a negligence standard for design defect litigation is only to define in a coherent fashion what our litigants in this case are in fact arguing and what our jurors are in essence analyzing. Thus we adopt, forthrightly, a pure negligence, risk-utility test in products liability actions against manufacturers of products, where liability is predicated upon defective design.

We hold that in this products liability action against a manufacturer for an alleged defect in the design of its product, where the jury was properly instructed on the theory of negligent design, the trial judge's refusal to instruct on breach of warranty was not reversible error. Such instructions could have created juror confusion and prejudicial error. Indeed, such an instruction would have been repetitive and unnecessary and could have misled the jury into believing that plaintiff could recover

850

on the warranty count even if it found there was no "defect" in the design of the product.

***

This holding is based upon the recognition that under the common law of products liability, in an action against the manufacturer of a

product based upon an alleged defect in its design, "breach of implied warranty and negligence involve identical evidence and require proof of exactly the same elements." ***

Applying these principles to the facts of this case, although plaintiffs alleged that their injuries were proximately caused by defendant's negligence and breach of an implied warranty, their evidence and proofs at trial focused on the single claim that the defendant defectively designed the "walkie hi-lo" forklift, because it failed to provide a seat or platform for the operator. Thus, recovery under either theory required the jury to determine that the forklift was defectively designed by defendant. [C] The factual inquiry was: whether the design of defendant's forklift was "unreasonably dangerous" because it did not contain a seat or platform for the operator. [C]

The trial court properly recognized that the standards of liability under the theories of implied warranty and negligence were indistinguishable and that instructions on both would only confuse the jury. Accordingly, the trial judge's instructions regarding the standard of care and theories of liability properly informed the jury of defendant's legal duties as the manufacturer of the forklift. The court set forth the necessary elements for determining whether defendant defectively designed the forklift when it stated:

"A manufacturer of a product made under a plan or design which makes it dangerous for uses for which it is manufactured is, [however,] subject to liability to others whom he should expect to use the product or to be endangered by its probable use from physical

harm caused by his failure to exercise reasonable care in the adoption of a safe plan or design.

"A manufacturer has a duty to use reasonable care in designing his product and guard it against a foreseeable and unreasonable risk of injury and this may even include misuse which might reasonably be anticipated."

In essence, the jury was instructed to consider whether the manufacturer took reasonable care in light of any reasonably foreseeable use of the product which might cause harm or injury. [C]

Therefore we hold that in a products liability action against a manufacturer, based upon defective design, the jury need only be instructed on a single unified theory of negligent design.

The judgment of the Court of Appeals is reversed, and the judgment of the trial court is reinstated.

851

Williams, C.J., and Brickley and Ryan, JJ., concur.

CAVANAGH, J., concurring in result.

Levin, Justice (dissenting) [with opinion].

NOTES AND QUESTIONS

1. When is a product to be regarded as "defective" in design for the purposes of imposing strict liability? Many courts and commentators have struggled with this broad issue and the principal case presents a thorough judicial discussion of the topic. See also Caterpillar Tractor Co. v. Beck, 593 P.2d 871, 880 (Alaska 1979) ("Design defects present the most perplexing problems in the field of strict

products liability because there is no readily ascertainable external measure of defectiveness. While manufacturing flaws can be evaluated against the intended design of the product, no such objective standard exists in the design defect context.")

2. As indicated in the notes following Greenman v. Yuba Power Prods., Inc., page 834, the great majority of the states adopted the rule of § 402A of the Restatement (Second) of Torts. Most utilized the language of § 402A and spoke of the requirement that the product be unreasonably dangerous, but some espoused strict liability while refusing to accept the Restatement terminology. As the states developed their tests for design defect, many of them appeared to be requiring negligence or at least some showing of fault, despite their explicit adoption of strict liability. See Restatement (Third) of Torts: Products Liability § 2 comment a (1998) (recognizing this phenomenon).

3. "Crashworthiness." A difference existed at one time on the issue whether an automobile was "defective" if it had not been designed to minimize injury to occupants during a collision. In Evans v. General Motors Corp., 359 F.2d 822 (7th Cir. 1966) (applying Indiana law), a new X-frame design for a car body turned out to be less safe than a conventional rectangular frame when the car was hit from the side. The court held, however, that the manufacturer was under no duty to design an accident-proof or crash-proof car, since the intended purpose of automobiles did not include their participation in a collision. Two years later another federal court in Larsen v. General Motors Corp., 391 F.2d 495 (8th Cir. 1968) (applying Michigan law), disagreed, holding that because the risk of collision was foreseeable, the design must reflect that. The Larsen view swept the field. See

Blankenship v. General Motors Corp., 185 W.Va. 350, 406 S.E.2d 781 (1991) (noting unanimous support for Larsen rule) and Restatement (Third) of Torts: Products Liability § 16 comment a (1998).

How far does the manufacturer's duty to protect the occupant in an accident extend? Consider a four-door hardtop convertible that leaves the road, rolls over, and lands on its top. A corner of the roof collapses on the driver and paralyzes him. Plaintiffs expert testifies that a roll bar or roll cage would have prevented the disabling injury, that roll cages were technically feasible at the time the car was manufactured, and in use on race cars. But no mass-produced automobile had ever been built this way. Liability? Holiday Motor Corp. v. Walters, 292 Va. 461, 790 S.E.2d 447 (2016)

(no duty to design convertible soft top on Miata to provide occupant rollover protection). Although most of the crashworthiness or enhanced injuries cases involve automobiles, some of them have involved snowmobiles, motorcycles, riding lawnmowers, and corn pickers. Does the manufacturer owe a duty to the occupants of the other vehicle? See Rennert v. Great Dane Ltd., 543 F.3d 914 (7th Cir. 2008) (applying Illinois law) (manufacturer does not owe duty to protect those who collide with its vehicle; court notes some conflicting authority in other jurisdictions).

The crashworthiness claim against the manufacturer requires proof that the defect enhanced plaintiffs injuries, but what if it is difficult to apportion the injuries between the original tortfeasor who caused the crash and the manufacturer? See Green v. Ford Motor Co., 942

N.E.2d 791 (Ind. 2011) (answering certified question) (jury may allocate fault between plaintiff for causing crash and manufacturer for enhanced injury if jury finds that plaintiffs conduct was a proximate cause of the harm for which he is seeking damages) and Egbert v. Nissan Motor Co., 228 P.3d 737 (Utah 2010) (discussing cases from other jurisdictions deciding whether to place burden of apportioning injury on plaintiff or manufacturer).

4. Category Liability and Products Such as Whiskey, Tobacco, and Butter. The Restatement (Second) of Torts § 402A (1965) cautioned that products whose inherent characteristics made them dangerous were not to be considered "unreasonably dangerous." In language frequently quoted by the courts that adopted § 402A strict liability, comment i provides that "Good whiskey is not unreasonably dangerous merely because it will make some people drunk, and is especially dangerous to alcoholics.... Good tobacco is not unreasonably dangerous merely because the effects of smoking may be harmful;.... Good butter is not unreasonably dangerous merely because, if such be the case, it deposits cholesterol in the arteries and leads to heart attacks;...." See also Buckingham v. R.J. Reynolds Tobacco Co., 142 N.H. 822, 713 A.2d 381 (1998) (in context of secondhand smoke case, dismissing strict liability claim against cigarette manufacturers, citing comment i) and Godoy v. E.I. Du Pont de Nemours and Co., 319 Wis.2d 91, 768 N.W.2d 674 (2009) (white lead carbonate pigment cannot be defective in design based on presence of lead, a characteristic ingredient of the product). These principles can be found in the Restatement (Third) of Torts, but only with respect to design liability. In Restatement (Third) of Torts: Products Liability § 2, comment d, tobacco was not

specifically mentioned but alcoholic beverages, firearms, and above-ground swimming pools were used as examples. The principle stated was that "widely distributed products" could only be subject to liability for defective design if a plaintiff proved that a "reasonable alternative design" was available. Is there one for a cigarette? Adamo v. Brown & Williamson Tobacco Corp., 11 N.Y.3d 545, 872 N.Y.S.2d 415, 900 N.E.2d 966 (2008) (claimant did not show that proposed alternative design--cigarette with lower levels of tar and nicotine--has the same function or utility).

5. Unlike Michigan in the principal case, many jurisdictions instruct the jury on all available causes of action, negligence, breach of warranty, and strict liability. See, e.g., Castro v. QVC Network, Inc., 139 F.3d 114 (2d Cir.

1998) (under New York law, jury should be instructed separately on strict liability and breach of warranty in case involving roasting pan). See also Restatement (Third) of Torts: Products Liability § 2 comment n (1998) (rules are stated functionally rather than in terms of traditional doctrinal categories so that as long as the requirements are met all theories of liability may be used to bring claim).

6. Risk Utility Balancing Test for Design Defect. Many jurisdictions use some form of risk utility analysis for design defect cases. See, e.g., Branham v. Ford Motor Co., 390 S.C. 203, 701 S.E.2d 5 (2010) (adopting risk utility balancing as the exclusive test for design defects) and Walker v. Ford Motor Co., 406 P.3d 845 (Colo. 2017) (recognizing risk utility balancing as the exclusive test and finding that judge's inclusion of consumer expectation test in jury instruction

was reversible error). See also Restatement (Third) of Torts: Products Liability § 2 comment a (1998). Should the test be the utility to the individual who was injured or to society as a whole? See, e.g., In re Fosamax Prod. Liab. Litig., 509 Fed.Appx. 69 (2d Cir. 2013) (applying Florida law) (as part of risk utility balancing test, jury should be instructed to consider the risks and benefits to the public as a whole, as opposed to directing the jury to consider the drug from the perspective of either a particular user or a sub-category of users).

7. Consumer Expectations Test for Design Defect. Some jurisdictions use only the consumer expectations test for design defect cases. See Godoy v. E.I. Du Pont de Nemours and Co., 319 Wis.2d 91, 768 N.W.2d 674 (2009) (Prosser, J., concurring); Aubin v. Union Carbide Corp., 177 So.3d 489 (Fla. 2015) (specifically rejecting the Third Restatement's risk utility test in favor of the consumer expectations test); and Ford Motor Co. v. Trejo, 133 Nev. 520, 402 P.3d 649 (2017) (same). But see Bifolck v. Philip Morris, Inc., 324 Conn. 402, 152 A.3d 1183, 1198 (2016): "It is not a fruitful exercise to attempt to obtain a precise count of how many jurisdictions have adopted or rejected the Restatement (Third) standard. Like every other aspect of this area of the law, parties on each side of this debate disagree about what legal standard has been adopted in the various jurisdictions and whether that determination should be made on the basis of how the court has articulated its standard or how the cases have been litigated."

The Third Restatement treats "consumer expectations" as a factor to consider. But whose expectations are to be considered? Those of the ordinary consumer? Those of a bystander injured by the product? See Horst v. Deere & Co., 319 Wis.2d 147, 769 N.W.2d

536 (2009) (whether product is defective depends on expectations of ordinary consumer, not expectations of injured bystander). See Restatement (Third) of Torts: Products Liability § 2 comments / and g (1998) (consumer expectations one factor, among many, in risk-utility balancing).

8. Some jurisdictions permit both the consumer expectations test and the risk utility balancing test to be used to prove that a product was defectively designed. See, e.g., Tincher v. Omega Flex, Inc., 104 A.3d 328 (Pa. 2014) (plaintiff is master of the claim and may allege facts to make a prima facie case upon either theory or both) and Tatham v. Bridgestone Am. Holding, 473 S.W.3d 734, 751 (Tenn. 2015) (in a tire failure case, consumer

expectations test could be used to show defect because "the general driving populace understands the basic function and purpose of a tire"). How should the trial court choose which jury instruction to give in each case? Could both be given? Illinois has noted that the two tests are not theories of liability but methods of proof by which a plaintiff may show that the element of unreasonable dangerousness is met. Mikolajczyk v. Ford Motor Co., 231 III.2d 516, 901 N.E.2d 329 (2008) (finding that both tests may be utilized in a strict liability design defect case to prove that the product is "unreasonably dangerous"; that which jury instruction would be appropriate depends on the issues raised by the pleadings and evidence; and that if both are appropriate, consumer expectations should be treated as one factor in the risk utility analysis).

9. Reasonable Alternative Design. Most jurisdictions require that the plaintiff prove the existence of a reasonable alternative design in order to prove design defect. See, e.g., Beech v. Outboard Marine Corp., 584 So.2d 447 (Ala. 1991) (defect must be shown by safer, practical, alternative design) and Tex. Civ. Prac. & Rem. Code Ann. § 82.005 ("In a products liability action in which a claimant alleges a design defect, the burden is on the claimant to prove... there was a safer alternative design"). See also Restatement (Third) of Torts: Products Liability § 2(b) (1998) (product "is defective in design when the foreseeable risks of harm posed by the product could have been reduced or avoided by the adoption of a reasonable alternative design") and Reporters' Note to § 2 comment d (survey of cases dealing with requirement of reasonable alternative design). One of the greatest battles among members of the ALI developing the Third Restatement was whether the plaintiff should be required to prove a reasonable alternate design in design defect cases. Is this simply a battle over theory? What is the requirement's practical effect? See Twerski and Henderson, Manufacturers' Liability for Defective Product Designs: The Triumph of Risk-Utility, 74 Brooklyn L. Rev. 1061 (2009).

10. Are there products that are so dangerous and of such low social utility that liability should be imposed even if there is no reasonable alternative design? What about ammunition that is designed in a way that dramatically increases the wounding power of the bullet? Victims of a shooting spree on the Long Island Railroad brought claims against the manufacturer of the "Black Talon" bullets that were used. McCarthy v. Olin Corp., 119 F.3d 148, 155 (2d Cir. 1997) (applying New York law) ("the risk of injury to be balanced with the

utility is a risk not intended as the primary function of the product. There is no reason to search for an alternative safer design where the product's sole utility is to kill and maim"). New Jersey also has a statute imposing such liability. N.J. Stat. Ann. § 2A:58C-3(b) (practical and technically feasible alternative design not necessary if product is egregiously unsafe or ultra-hazardous and product has little or no usefulness). Acknowledging that there is only scant authority for such a position, Restatement (Third) of Torts: Products Liability § 2 comment e (1998) recognizes the possibility of such liability through a comment. Judge Calabresi, dissenting in McCarthy, suggested that the Black Talon bullets

would qualify as "manifestly unreasonable" products under the Restatement formulation.

11. Industry Custom and Practices. Just as on the question of negligence, evidence of industry customs, standards, and practices may be introduced on the question of defect--by plaintiff to show that defendant has lagged behind or by defendant to show that a particular proposed safety feature is not standard in the industry. Kim v. Toyota Motor Corp., 237 Cal.Rptr.3d 305, 424 P.3d 290 (2018). It is not determinative in a strict liability design defect case, but merely evidence for the jury to consider.

12. State of the Art. A key issue in design liability cases is whether a defendant can avoid liability by showing compliance with the "state of the art" at the time the product was made. The concept of "state of the art" for products has become muddled because different courts ascribe different meanings to the term. Sometimes the term is

confused with evidence of compliance with "industry customs," which is introduced to show the defendant's reasonableness or to rebut allegations of product defect. The better use of the term is as a label for the requirement for the best scientific and medical technology that is practically and economically feasible at the time the product was made or marketed. The product thus is evaluated in light of knowledge and technology available at the time of manufacture rather than at the time of trial. See Restatement (Third) of Torts: Products Liability § 2 comment d (1998).

13. Open and Obvious Danger. A few courts have held that an "open and obvious" or "patent" danger is an absolute defense to a design defect case. Most jurisdictions, however, have rejected the obviousness of the danger as a bar to recovery and instead consider it as one factor in the risk utility balancing test or as part of the consumer expectations test. See e.g., Perkins v. Wilkinson Sword, Inc., 83 Ohio St.3d 507, 700 N.E.2d 1247 (1998) (in case where children were killed in fire they started while playing with cigarette lighter, court ruled that obvious danger of cigarette lighter was factor to be considered in risk-utility analysis, but was not determinative); Calles v. Scripto-Tokai Corp., 224 Ill.2d 247, 864 N.E.2d 249 (2007) (utility lighter; accord); Timpte Indus., Inc. v. Gish, 286 S.W.3d 306 (Tex. 2009) (top rail on side of trailer; obviousness of danger is not itself a bar to liability but is an important consideration and may even be decisive in a particular case); and Izzarelli v. R.J. Reynolds Co., 321 Conn. 172, 136 A.3d 1232 (2016) (making the modified consumer expectation test the default test for design defect claims, and reserving the ordinary consumer expectation test for those

products that fail to meet legitimate, commonly accepted minimum safety expectations).

14. Applicability to Prescription Drugs and Medical Devices. Most jurisdictions have declined to apply true strict liability to the design of prescription drugs, following comment k to Restatement (Second) of Torts § 402A, which provided for no strict liability in the case of unavoidably unsafe products. Comment k used prescription drugs as an example of such products, noting that "The seller of such products, again with the qualification that they are properly prepared and marketed, and proper warning is given,... is not to be held to strict liability for unfortunate

consequences attending their use, merely because he has undertaken to supply the public with an apparently useful and desirable product, attended with a known but apparently reasonable risk."

Should all products requiring a prescription fall into the "unavoidably unsafe" category or should that determination be made on a case by case basis? Most states have adopted the case-by-case analysis, with the applicability depending upon the drug or medical device in question. This is especially true for devices, which can be of different designs with varying degrees of efficacy and safety. Compare Brown v. Superior Court, 44 Cal.3d 1049, 751 P.2d 470 (1988) (DES; applies to all) with Toner v. Lederle Labs., 112 Idaho 328, 732 P.2d 297 (1987) (vaccine; case-by-case determination whether unavoidably unsafe). Restatement (Third) of Torts: Products Liability has a separate section governing liability for sellers and distributors

of prescription drugs and medical devices. It would impose liability for harm caused by defective design, whether grounded in negligence or strict liability, only if "the foreseeable risks of harm posed by the drug or medical device are sufficiently great in relation to its therapeutic benefits that reasonable health-care providers, knowing of such foreseeable risks and therapeutic benefits, would not prescribe the drug or medical device for any class of patients." Restatement (Third) of Torts: Products Liability § 6(c) (1998). See also Lance v. Wyeth, 85 A.3d 434 (Pa. 2014) (recognizing claim for negligent drug design).

Note that strict liability would be available if the drug or medical device was alleged to have a manufacturing defect or to have been accompanied by inadequate warnings. Taylor v. Intuitive Surgical, Inc., 187 Wash.2d 743, 289 P.3d 517 (2017) (comment k does not apply and adequacy of a manufacturer's warnings are to be measured under strict liability test). Accord, Restatement (Third) of Torts § 6 comment c (1998). Some states treat the unavoidably unsafe characterization as an affirmative defense that must be raised by the manufacturer and determined by the factfinder on a case- by-case basis. Burningham v. Wright Medical Tech., Inc., 448 P.3d 1283 (Utah 2019) (artificial hip).

15. Applicability to Food. Courts have struggled with whether to impose strict liability on vendors of food when suit is based on an injury-producing substance in food. One group of cases has applied a "foreign- natural" test. Under this theory, strict liability is only applicable if the injury-causing substance is a piece of glass, wire, or other substance "foreign" to the food. If the substance is natural, like bone fragments in meat, pits in cherries, or shells in nuts, strict

liability is not available and the plaintiff must prove negligence in the preparation of the food in order to recover. See, e.g., Mexicali Rose v. Superior Court, 1 Cal.4th 617, 822 P.2d 1292 (1992) (no strict liability for throat injury from chicken bone in chicken enchilada). Another line of cases provides that regardless whether the injury-producing substance is natural or foreign, strict liability will lie if the consumer of the product would not reasonably have expected to find the substance in the product. See, e.g., Jackson v. Nestle-Beich, Inc., 147 III.2d 408, 589 N.E.2d 547 (1992) (broken tooth from biting pecan shell from can of chocolate- covered pecan-caramel candy); Schafer v. JLC Food Systems, Inc., 695

857

N.W.2d 570 (Minn. 2005) (plaintiff could not identify object in pumpkin muffin that caused her throat injury); and Pinkham v. Cargill, Inc., 55 A.3d 1 (Me. 2012) (adopting "reasonable expectations" test in case of alleged bone fragments in turkey). See also Restatement (Third) of Torts: Products Liability § 2 comment h and § 7 (1998) (endorsing the latter position).

16. Allergic Reaction. An allergic reaction to a drug or product may occur because of an individual's unusual susceptibility to an ingredient. Since the product is reasonably fit for the ordinary user, it might be said that there is no defect and thus no recovery for any allergic reaction. Most jurisdictions have handled this as a failure to warn issue and imposed a duty on the manufacturer to warn of possible adverse reactions only if it knew or should have known of the risk.

(C) Warnings Defect

Anderson v. Owens-Corning Fiberglas Corp.

Supreme Court of California, 1991.

53 Cal.3d 987, 810 P.2d 549, 281 Cal.Rptr. 528.

PANELLI, J.

In this case we consider the issue "whether a defendant in a products liability action based upon an alleged failure to warn of a risk of harm may present evidence of the state of the art, i.e., evidence that the particular risk was neither known nor knowable by the application of scientific knowledge available at the time of manufacture and/or distribution." (Order on grant of review, May 3, 1990.) As will appear, resolution of this evidentiary issue requires an examination of the failure-to-warn theory as an alternate and independent basis for imposing strict liability and a determination of whether knowledge, actual or constructive, is a component of strict liability on the failure-to- warn theory. It is manifest that, if knowledge or knowability is a component, state-of-the-art evidence is relevant and, subject to the normal rules of evidence, admissible.

We conclude that ***the California courts, either expressly or by implication, have to date required knowledge, actual or constructive, of potential risk or danger before imposing strict liability for a failure to warn. The state of the art may be relevant to the question of knowability and, for that reason, should be admissible in that context. Exclusion of state-of-the-art evidence, when the basis of liability is a failure to warn, would make a manufacturer the virtual insurer of its

product's safe use, a result that is not consonant with established principles underlying strict liability.

Defendants are or were manufacturers of products containing asbestos. Plaintiff Carl Anderson filed suit in 1984, alleging that he contracted asbestosis and other lung ailments through exposure to asbestos and asbestos products (i.e., preformed blocks, cloth and cloth

858

tape, cement, and floor tiles) while working as an electrician at the Long Beach Naval Shipyard from 1941 to 1976. Plaintiff allegedly encountered asbestos while working in the vicinity of others who were removing and installing insulation products aboard ships. *** [After a verdict for defendants, the trial court granted a new trial and the parties argued on appeal the admissibility of state of the art evidence in a failure to warn case.]

Defendants contend that, if knowledge or knowability is irrelevant in a failure-to-warn case, then a manufacturer's potential liability is absolute, rendering it the virtual insurer of the product's safe use. Plaintiff, on the other hand, argues that to impose the requirement of knowledge or knowability improperly infuses a negligence standard into strict liability in contravention of the principles set out in our decisions from Greenman v. Yuba Power Products, Inc. (1963) 59 Cal.2d 57 [27 Cal.Rptr. 697, 377 P.2d 897, 13 A.L.R.3d 1049] to Brown v. Superior Court (1988) 44 Cal.3d 1049 [245 Cal.Rptr. 412, 751 P.2d 470], Plaintiff also urges that, although some courts have assumed that knowledge or knowability is a condition of strict liability

for failure to warn, the issue has not been definitively resolved in this court.

Greenman v. Yuba Power Products, Inc., supra, 59 Cal.2d 57, established the doctrine of strict liability in California: "[a] manufacturer is strictly liable in tort when an article he places on the market, knowing that it is to be used without inspection for defects, proves to have a defect that causes injury to a human being." [C] "The purpose of such liability is to insure that the costs of injuries resulting from defective products are borne by the manufacturers that put such products on the market rather than by the injured persons who are powerless to protect themselves." [Cc] The strict liability doctrine achieves its goals by "relieving] an injured plaintiff of many of the onerous evidentiary burdens inherent in a negligence cause of action." [Cc]

Strict liability, however, was never intended to make the manufacturer or distributor of a product its insurer. "From its inception, ***strict liability has never been, and is not now, absolute liability. ***[U]nder strict liability the manufacturer does not thereby become the insurer of the safety of the product's user." ***

Whatever the ambiguity of Brown, we hereby adopt the requirement, as propounded by the Restatement Second of Torts and acknowledged by the lower courts of this state and the majority of jurisdictions, that knowledge or knowability is a component of strict liability for failure to warn.

One of the guiding principles of the strict liability doctrine was to relieve a plaintiff of the evidentiary burdens inherent in a negligence cause of action. [C] Indeed, it was the limitations of negligence

theories that prompted the development and expansion of the doctrine. The proponents of the minority rule, including the Court of Appeal in this case, argue that the knowability requirement, and admission of state-of-the-art

859

evidence, improperly infuse negligence concepts into strict liability cases by directing the trier of fact's attention to the conduct of the manufacturer or distributor rather than to the condition of the product. Similar claims have been made as to other aspects of strict liability, sometimes resulting in limitations on the doctrine and sometimes not. ***

However, the claim that a particular component "rings of' or "sounds in" negligence has not precluded its acceptance in the context of strict liability. ***[T]he doctrine of strict liability was a judicial creation and, in reaching our conclusion, we blended or accommodated the "theoretical and semantic distinctions between the twin principles of strict products liability and traditional negligence." [C] ***

[T]he strict liability doctrine has incorporated some well-settled rules from the law of negligence and has survived judicial challenges asserting that such incorporation violates the fundamental principles of the doctrine. It may also be true that the "warning defect" theory is "rooted in negligence" to a greater extent than are the manufacturing--or design-defect theories. The "warning defect" relates to a failure extraneous to the product itself. Thus, while a manufacturing or design defect can be evaluated without reference to the conduct of the manufacturer [c], the giving of a warning cannot. The latter necessarily requires the communicating of

something to someone. How can one warn of something that is unknowable? If every product that has no warning were defective per se and for that reason subject to strict liability, the mere fact of injury by an unlabelled product would automatically permit recovery. That is not, and has never been, the purpose and goal of the failure-to-warn theory of strict liability. Further, if a warning automatically precluded liability in every case, a manufacturer or distributor could easily escape liability with overly broad, and thus practically useless, warnings. [C]

We ***reject the contention that every reference to a feature shared with theories of negligence can serve to defeat limitations on the doctrine of strict liability. Furthermore, despite its roots in negligence, failure to warn in strict liability differs markedly from failure to warn in the negligence context. Negligence law in a failure-to-warn case requires a plaintiff to prove that a manufacturer or distributor did not warn of a particular risk for reasons which fell below the acceptable standard of care, i.e., what a reasonably prudent manufacturer would have known and warned about. Strict liability is not concerned with the standard of due care or the reasonableness of a manufacturer's conduct. The rules of strict liability require a plaintiff to prove only that the defendant did not adequately warn of a particular risk that was known or knowable in light of the generally recognized and prevailing best scientific and medical knowledge available at the time of manufacture and distribution. Thus, in strict liability, as opposed to negligence, the reasonableness of the defendant's failure to warn is immaterial.

Stated another way, a reasonably prudent manufacturer might reasonably decide that the risk of harm was such as not to require a warning as, for example, if the manufacturer's own testing showed a result contrary to that of others in the scientific community. Such a manufacturer might escape liability under negligence principles. In contrast, under strict liability principles the manufacturer has no such leeway; the manufacturer is liable if it failed to give warning of dangers that were known to the scientific community at the time it manufactured or distributed the product. Whatever may be reasonable from the point of view of the manufacturer, the user of the product must be given the option either to refrain from using the product at all or to use it in such a way as to minimize the degree of danger. [C] "When, in a particular case, the risk qualitatively (e.g., of death or major disability) as well as quantitatively, on balance with the end sought to be achieved, is such as to call for a true choice judgment, medical or personal, the warning must be given. [Fn. omitted.]" [C] Thus, the fact that a manufacturer acted as a reasonably prudent manufacturer in deciding not to warn, while perhaps absolving the manufacturer of liability under the negligence theory, will not preclude liability under strict liability principles if the trier of fact concludes that, based on the information scientifically available to the manufacturer, the manufacturer's failure to warn rendered the product unsafe to its users.

The foregoing examination of the failure-to-warn theory of strict liability in California compels the conclusion that knowability is relevant to imposition of liability under that theory. Our conclusion not only accords with precedent but also with the considerations of policy that underlie the doctrine of strict liability.

We recognize that an important goal of strict liability is to spread the risks and costs of injury to those most able to bear them. [14] However, it was never the intention of the drafters of the doctrine to make the manufacturer or distributor the insurer of the safety of their products. It was never their intention to impose absolute liability.

* * *

[14] The suggestion that losses arising from unknowable risks and hazards should be spread among all users to the product, as are losses from predictable injuries or negligent conduct, is generally regarded as not feasible. Not the least of the problems is insurability. (See Henderson, Coping with Time Dimension in Products Liability (1981) 69 Cal.L.Rev. 919, 948-949; Wade, On the Effect in Product Liability of Knowledge Unavailable Prior to Marketing (1983) 58 N.Y.U.L.Rev. 734.) Dean Wade stated the dilemma, but provided no solution: "How does one spread the potential loss of an unknowable hazard? How can insurance premiums be figured for this purpose? Indeed, will insurance be available at all? Spreading the loss is essentially a compensation device rather than a tort concept. Providing compensation should not be the sole basis for imposing tort liability, and this seems more emphatically so in the situation where the defendant is no more able to insure against unknown risks than is the plaintiff." (58 N.Y.U.L.Rev. at p. 755.)

Conclusion

Therefore, in answer to the question raised in our order granting review, a defendant in a strict products liability action based upon an alleged failure to warn of a risk of harm may present evidence of the state

of the art, i.e., evidence that the particular risk was neither known nor knowable by the application of scientific knowledge available at the time of manufacture and/or distribution. The judgment of the Court of Appeal is affirmed with directions that the matter be remanded to the trial court for proceedings in accord with our decision herein.

[The concurring and dissenting opinions are omitted.]

NOTES AND QUESTIONS

1. Justice Mosk in a concurring and dissenting opinion to the principal case noted the convergence of strict liability and negligence theories of liability in failure-to-warn cases and urged the court to consider "the possibility of holding that failure-to-warn actions lie solely on a negligence theory." See also In re New York City Asbestos Litigation, 27 N.Y.3d 765, 59 N.E.3d 458 (2016) (failure-to-warn claims grounded in strict liability and negligence are functionally equivalent, as both forms of a failure-to-warn claim depend on the principles of reasonableness and public policy at the heart of any traditional negligence action). Is the distinction between the two worth preserving? Note that the approach of Restatement (Third) of Torts: Products Liability § 2 (1998) eliminates this potential confusion by organizing liability by type of alleged defect (manufacturing, design, warning) rather than by theory of recovery (negligence, breach of warranty, strict liability).

2. In warnings cases, most courts still apply a fault-based standard by requiring the plaintiff to show that the manufacturer knew or should have known of risks that injured plaintiff. See, e.g., Vassallo v. Baxter Healthcare Corp., 428 Mass. 1, 696 N.E.2d 909, 923 (1998)

("In recognition of the clear judicial trend regarding the duty to warn in products liability cases, and the principles stated in Restatement (Third) of Torts: Products Liability § 2(c) and comment in, we hereby revise our law to state that a defendant will not be held liable under an implied warranty of merchantability for failure to warn or provide instructions about risks that were not reasonably foreseeable at the time of sale or could not have been discovered by way of reasonable testing prior to marketing the product.").

3. Often a case involves claims based on both defective design and inadequate warnings. Should the fact that a product contains a good warning overcome the effect of a design problem--i.e., should a warning about a design hazard preclude liability, or should the manufacturer be required to eliminate the defective design condition? See, e.g., Uniroyal Goodrich Tire Co. v. Martinez, 977 S.W.2d 328 (Tex. 1998) (warning on tire did not relieve manufacturer of liability for defective design); Rogers v. Ingersoll-Rand Co., 144 F.3d 841 (D.C. Cir. 1998) (applying District of Columbia law) (warning is one factor to consider in risk-utility analysis, but warnings alone will not save a product from being unreasonably dangerous, citing Restatement (Third)); and Chow v. Reckitt & Colman, Inc., 17 N.Y.3d 29, 950 N.E.2d 113 (2011) (even with adequate warning on container that was ignored by plaintiff, jury still may find utility of lye did not outweigh the risk inherent in marketing it as a drain cleaner). See Restatement (Third) of Torts:

Products Liability § 2 comment l (1998) (warnings are not a substitute for a reasonably safe design).

4. Obvious Dangers and Generally Known Risks. Most jurisdictions have found no duty to warn of obvious dangers or of risks that are generally known. See e.g., Glittenberg v. Doughboy Recreational Indus., 441 Mich. 379, 491 N.W.2d 208 (1992) (diving into shallow water of above ground swimming pool) (collecting cases); American Tobacco Co. v. Grinnell, 951 S.W.2d 420 (Tex. 1997) (defendant established that health risks of smoking cigarettes were commonly known when plaintiff began smoking, but did not establish that addictive quality of cigarettes was commonly known); Joseph E. Seagram & Sons, Inc. v. McGuire, 814 S.W.2d 385 (Tex.1991) (danger of developing alcoholism from prolonged and excessive consumption of alcoholic beverages is within ordinary knowledge common to the community); Mills v. Giant, 508 F.3d 11 (D.C. Cir. 2007) (applying District of Columbia law) (risk that milk will cause lactose intolerant consumers to experience temporary gas and related stomach discomfort is widely known). See also Restatement (Third) of Torts: Products Liability § 2(c) and comment j (1998) (no duty because warning will not reduce risk and may diminish significance of warnings about non-obvious risks).

5. In which of these situations is there a duty to warn or does the failure to warn make the product defective? Should a manufacturer of a perfume have to warn that perfume is highly inflammable and should not be poured on a lit candle? See Moran v. Faberge, Inc., 273 Md. 538, 332 A.2d 11 (1975). Should a manufacturer of pointed darts have to warn that they might injure someone's eye? See Atkins v. Arlans Dept. Store of Norman, Inc., 522 P.2d 1020 (Okla. 1974). Should the manufacturer of a Jeep have to warn the driver not to ride with his bare foot outside of the vehicle while travelling on a

highway? See Smith v. American Motors Sales Corp., 215 Ill.App. 3d 951, 576 N.E.2d 146 (1991). Should the manufacturer of a pickup truck have to warn of the dangers involved in riding unrestrained in the cargo bed of the pickup truck? See Josue v. Isuzu Motors, 87 Haw. 413, 958 P.2d 535 (1998). Should the manufacturer of a machine that dispenses coffee and hot chocolate have to warn that the hot chocolate can cause second degree burns if spilled on skin? See McCroy v. Coastal Mart, Inc., 207 F.Supp.2d 1265 (D. Kan. 2002). Who decides? See Restatement (Third) of Torts: Products Liability § 2 comment j (1998) (stating that jury should decide if reasonable minds may differ as to whether risk is obvious or generally known).

6. Allergic Reactions and Hypersensitivity. If a product is dangerous only to hypersensitive persons, do manufacturers have a duty to provide warnings if they know or should know of such dangers? Most jurisdictions impose a duty to warn if the ingredient is one to which a substantial number of persons are allergic. Proving that a substantial number are affected is the plaintiffs burden. As with other determinations of duty, courts will consider the severity of the potential harm as a factor. See Restatement (Third) of Torts: Products Liability § 2 comment k (1998).

7. Why not always require a warning? They cost the manufacturer very little to provide in most circumstances. Might the proliferation of warnings in obvious danger situations dilute the impact of necessary warnings?

See Restatement (Third) of Torts: Products Liability § 2 comment j (1998) (recognizing that requiring warnings of obvious or generally known risks could reduce efficacy of warnings generally). If the manufacturer chooses to supply a warning that the law would not have required, has the manufacturer exposed itself to additional liability by assuming a duty?

8. Adequacy of Warning. The determination whether the warning was adequate is usually left to the jury who in turn rely on expert testimony. Consider a manufacturer's warning that its adhesive was highly flammable, that it should be used only in a well-ventilated area, and that all open flames should be extinguished before use. Plaintiff was injured when the pilot light of a gas stove ignited fumes from the adhesive. Was the warning defective if it did not specifically mention "pilot lights" as examples of open flames? Cf. Burch v. Amsterdam Corp., 366 A.2d 1079 (D.C. 1976).

9. Sophisticated Users. Should the extent of expertise of the known user be taken into account? Compare Garrett v. Nissen Corp., 84 N.M. 16, 498 P.2d 1359 (1972) (experienced trampoline user landed on his head and suffered a paralyzing spinal injury); Lawley v. Chevron Chem. Co., 720 So.2d 922 (Ala. 1998) (plastic pipe manufacturer did not have duty to warn gas company or its employees because it was common knowledge among workers that failure to take certain precautions would greatly increase danger from static electricity build up); and Johnson v. American Standard, Inc., 43 Cal.4th 56, 74 Cal.Rptr.3d 108, 179 P.3d 905 (2008) (manufacturer of HVAC system that contained refrigerant had no duty to warn trained and certified HVAC technician of risks associated with using heat on pipes to repair system because

technician was sophisticated user) with Lawing v. Univar, USA, Inc., 415 S.C. 209, 781 S.E.2d 548 (2015) (sophisticated user instruction not warranted because employer's knowledge of dangers of chemical was useless to worker who came into contact with shrink-wrapped pallets of the chemical that had no visible hazard label).

10. Learned Intermediary Rule. In cases involving pharmaceuticals, almost all states have found that warnings and instructions should be provided to the physician, who is a "learned intermediary" between the drug company and the patient and the best person to understand the patient's needs and assess the risks and benefits of a particular course of treatment. Centocor, Inc. v. Hamilton, 372 S.W.3d 140 (Tex. 2012) (noting at least thirty-five states have adopted some form of the learned intermediary doctrine). The physician will then decide which warnings to pass on to the patient in light of the patient's particular condition and needs and using the physician's professional judgment. See Restatement (Third) of Torts: Products Liability § 6(d) (1) and comment b (1998). Most state law in this area is based on the common law, but a few states have recognized it by statute. W.Va. Stat. § 55--7-30. The doctrine has been extended from prescription drugs to prescription medical devices. See, e.g., Rohde v. Smiths Medical, 165 P.3d 433 (Wyo. 2007) (implantable venous access device for administration of chemotherapy).

Many jurisdictions do not apply the learned intermediary rule in situations where the manufacturer is aware that there will be no medical provider to provide learned advice or where the patient is expected to take

an active role in the selection of the product. Cf. Mazur v. Merck & Co., 964 F.2d 1348 (3d Cir. 1992) (applying Pennsylvania law) (in case involving MMR vaccination at public school, court noted "mass immunization exception" to learned intermediary rule where prescription drugs are dispensed without an individualized medical balancing of the risks and benefits to the user) and MacDonald v. Ortho Pharmaceutical Corp., 394 Mass. 131, 475 N.E.2d 65 (1985) (manufacturer of oral contraceptive must warn consumers directly because they often are actively involved in the decision to use the birth control pill and the physician usually has a relatively passive role). In those situations, the duty to warn is satisfied by a warning to the consumer rather than to the learned intermediary. See also Restatement (Third) of Torts: Products Liability § 6(d)(2) and comments b and e (1998) (warning must be given directly to patient in situation where health-care provider's role is diminished by circumstances).

If it is notorious that warnings are ignored, the manufacturer will have a duty to take reasonable measures to ensure that the moment of the danger is brought to bear. This is precisely why marketing of medical products is not simply an advertising game but a real way of imparting critical information. In considering whether the duty has been met, the courts consider not only formal documentation accompanying the product but also drug and medical company representatives' actions in providing other information like testimonials and information sessions. As Professor Ausness states, in a leading article, Learned Intermediaries and Sophisticated Users, 46 Syracuse L. Rev. 1185, 1194 (1996): "Ordinarily, the manufacturer of a prescription drug does not have to inform a patient about drug-

related dangers as long as it provides an adequate warning to the patient's prescribing physician. Warnings to physicians may be conveyed by means of a package insert, by advertisement in the Physician's Desk Reference, an advertisement in medical journals, direct letters to physicians, or by personal visits to the physicians' offices by company representatives known as 'detail men.' The legal sufficiency of a particular method of communication will depend on the circumstances."

11. What if the manufacturer of a prescription drug that provides contraception or treats acne, baldness, allergies, or erectile dysfunction, markets the product directly to the general public rather than to physicians? Should that affect the use of the learned intermediary doctrine? Compare Perez v. Wyeth Labs. Inc., 161 N.J. 1, 734 A.2d 1245 (1999) (holding that learned intermediary doctrine does not apply when product is marketed directly to consumers because direct marketing belies the premises upon which the doctrine is based) with Watts v. Medicis Pharmaceutical Corp., 239 Ariz. 19, 365 P.3d 944 (2016) (refusing to adopt consumer-direct advertising exception and noting New Jersey is the only jurisdiction that has). See also Restatement (Third) of Torts: Products Liability § 6 comment e (1998) (leaving to developing law whether warnings must be given directly to patients in circumstances where governmental regulation mandates direct information or where manufacturer is advertising to public).

12. Should the "learned intermediary" doctrine be available for products used in the workplace? In other words, can the manufacturer

satisfy its duty to warn by warning the employer who would then be responsible for warning and instructing its employees about use of the product because of the employer's control of the worksite, its knowledge of the hazards associated with products it has purchased, and its ability to instruct its employees on how to protect against those hazards? See, e.g., Adams v. Union Carbide Corp., 737 F.2d 1453 (6th Cir. 1984), cert, denied, 469 U.S. 1062 (1984) (applying Ohio law) (chemical manufacturer satisfied duty by warning its buyer, plaintiffs employer). What if the manufacturer relies upon a purchaser to warn its employees or others of the risks associated with the use of its product and the purchaser fails to so warn? Mississippi Valley Silica Co., Inc. v. Eastman, 92 So.2d 666 (Miss. 2012) (manufacturer's reliance must be a reasonable one). See also Restatement (Third) of Torts: Products Liability § 2 comment i (1998) (no general rule whether manufacturer must warn users directly or can rely on intermediary to relay warning; standard is one of reasonableness under the circumstances).

13. Presumption That Warning Will Be Read and Heeded. In most jurisdictions plaintiff is entitled to a presumption that the user would have read and heeded an adequate warning if one had been provided. This presumption, based on language in comment j to Restatement (Second) of Torts § 402A (1965), assists the plaintiff in proving causation after the plaintiff has proved an inadequate warning. How might that presumption be rebutted? If the user had not read the instructions manual, that would rebut the presumption. Kirkbride v. Terex USA, LLC, 798 F.3d 1343 (10th Cir. 2015) (applying Utah law) (not only had plaintiff not read the warning that

was in the manual, but he expressed a negative view of manuals at his deposition--"Why would you read a manual?"). Suppose defendant introduces evidence in an asbestos case that plaintiff smoked despite warning labels on cigarettes? That plaintiff never wore a seatbelt? That plaintiff was indifferent to matters of personal health? Is this evidence of general attitude enough to rebut the presumption? Sharpe v. Bestop, Inc., 158 N.J. 329, 730 A.2d 285 (1999) (plaintiff, who had argued that he would have worn a seatbelt if the manufacturer of the soft top installed on his Jeep CJ had warned him to do so, admitted that he had not followed the warning by the Jeep manufacturer on the sun visor to wear seatbelts at all times). Defendant's evidence may be so strong that the court finds as a matter of law that an adequate warning would not have been heeded. Bachtel v. TASER Intern., Inc., 747 F.3d 965 (8th Cir. 2014) (applying Missouri law) (officer ignored warnings and training he was given in use of TASER).

14. Post-Sale Duty to Warn. In addition to the duty to provide warnings at the time a product is marketed, some courts impose a duty on the manufacturer to provide post-sale warnings about risks that are discovered or that develop after the sale. Linert v. Foutz, 149 Ohio St.3d, 75 N.E.3d 1218 (2016) (in considering a postmarket duty to warn, the fact-finder's focus must be on any evidence of a risk associated with the product of which the manufacturer acquires knowledge after the sale of the product). See Restatement (Third) of Torts: Products Liability § 10 and comments a-i (1998) (post-sale duty to warn determined by balancing factors, including

obviousness of danger, its seriousness, the burden on the manufacturer to locate those who should be warned, and the likelihood of harm). Compare Jones v. Bowie Indus., Inc., 282 P.2d 316 (Alaska 2013) (adopting Restatement standard) and Brown v. Crown Equip. Corp., 960 A.2d 1188 (Me. 2008) (answering certified question) (declining to adopt Restatement (Third) formulation but finding a post-sale duty to warn in negligence law where, several years after sale of forklift, manufacturer became aware of new types of shelving that posed a risk of injury to forklift operators but did not warn plaintiffs employer of those risks) with Jablonski v. Ford Motor Co., 353 Ill.Dec. 327, 955 N.E.2d 1138 (2011) (finding no post-sale duty to warn if product was not defective and its accompanying warnings were adequate at time of sale).

15. Post-Sale Duty to Recall. Very few courts have extended a manufacturer's post-sale obligations beyond a duty to take reasonable steps to provide warnings. Traditionally, product recall has been a function of federal administrative agencies rather than of the tort system. See Consumer Product Safety Act, 15 U.S.C. § 2064; National Traffic and Motor Vehicle Safety Act, 15 U.S.C. § 1414. Most courts that have considered the issue have declined to impose such a duty. See Ford Motor Co. v. Reese, 300 Ga.App. 82, 684 S.E.2d 279 (2009) (collecting cases). See also Adams v. Genie Indus., Inc., 14 N.Y.3d 535, 903 N.Y.S.2d 318, 929 N.E.2d 380 (2010) (" We have never imposed a post-sale duty to recall or retrofit a product.") and Restatement (Third) of Torts: Products Liability § 11 (1998) (liability for failure to act as reasonable person would necessitate recalling product only if governmental directive requires or manufacturer voluntarily undertakes recall).

3. Proof

Friedman v. General Motors Corp.

Supreme Court of Ohio, 1975.

43 Ohio St.2d 209, 72 Ohio Ops.2d 119, 331 N.E.2d 702.

[While waiting in line to purchase gas, Plaintiff Morton Friedman switched his engine off. When it was his turn, he turned the ignition key on his 17-month-old 1966 Oldsmobile and the car "leaped forward, and so startled [him] that he could not regain control before the automobile ran wild * * Morton and three members of his family were injured in the crash.

Morton brought a claim against General Motors, the manufacturer of the vehicle, alleging that it was defective because its neutral start switch did not prevent the car from starting even though the gear shift indicator was in the Drive position. Although Morton had thought that the gear shift was in Neutral, examination after the accident revealed that it was jammed in Drive. General Motors argued that the start switch was not defective, that the car was in Neutral when the ignition was switched, that Morton shifted to Drive, and that Morton must have hit

867

the accelerator rather than the brake. At the close of Morton's case, the trial court granted General Motor's motion for a directed verdict on the ground that plaintiff had not proved that the vehicle was defective when it left the factory. The intermediate appellate court

reversed the trial judge's decision and General Motors appealed to the Supreme Court of Ohio.]

PAUL W. Brown, Justice. The single issue presented by this appeal is whether the evidence introduced by the plaintiffs was of sufficient quality to overcome the defendant's motion for a directed verdict. The Court of Appeals, having thoroughly examined the entire record, concluded that reasonable minds could differ upon the evidence presented and reversed the judgment directing a verdict for the defendant. We affirm.

To sustain their allegation against General Motors, the plaintiffs were required to prove that the Oldsmobile Toronado, manufactured and sold by the defendant, was defective; that the defect existed at the time the product left the factory; and that the defect was the direct and proximate cause of the accident and injuries. [Cc]

A defect may be proven by circumstantial evidence, where a preponderance of that evidence establishes that the accident was caused by a defect and not other possibilities, although not all other possibilities need be eliminated. [Cc]

In our judgment, the evidence presented by the plaintiffs established a prima facie case of defect for which defendant General Motors would be liable.

From the testimony of [the retailer-dealer] and Morton Friedman, the jury could have found that the linkages and adjustments existing at the time of the accident were the original, factory set, adjustments, and that the defective condition, if the evidence established defect, was a defect created by the manufacturer and not by some third person after delivery.

Based upon the testimony of Morton Friedman, his wife, and his son, the jury might have concluded that the Toronado had always been started in Park, thus affording no opportunity for discovery of the alleged defect. Further, because the gear shift indicator and transmission had always operated properly, the jury might have inferred that when the gear shift indicator registered in Drive after the accident, it accurately reflected the position of the transmission.

From the testimony of eye witnesses to, and participants in, the accident, the jury might have concluded that, when Friedman started the Toronado at the Sohio station, it accelerated immediately upon ignition; that the automobile's transmission was therefore in a forward position; and that the transmission jammed, upon impact, in that same forward position.

From the testimony of [expert witnesses produced by plaintiff,] the jury could have found that, subsequent to the accident, the Toronado

868

started with the gear shift indicator in Drive position. Based upon English's testimony, the jury might have concluded further that, upon ignition, the front wheels accelerated to a speed of 30 miles per hour in five seconds.

***

Because the trial court granted the defendant's motion for a directed verdict, we must construe the evidence most strongly in favor of the plaintiffs, so as to determine if reasonable minds could differ. From the evidence heretofore summarized, we believe the jury might reasonably have concluded that the defendant was guilty of

manufacturing a defective automobile, which directly and proximately caused the accident. For that reason, the judgment of the Court of Appeals is affirmed.

Judgment affirmed.

STERN, Justice (dissenting). ***In products liability cases, proof that a defect existed is often difficult and complex. Frequently the product in dispute will have been destroyed, beyond any possibility of analysis, or be so complex that a plaintiff would have a greater difficulty in determining the presence of a defect than would the manufacturer. In most cases, proof of the defect must necessarily be by circumstantial evidence and inference. No general rule can adequately apply to the wide range of such cases, each involving a different mixture of fact and inference, but fundamental to any such case is that some defect must be proved. As Prosser states, in Strict Liability to the Consumer in California, 18 Hastings L.J. 9, 52-54:

"The mere fact of an accident, as where an automobile goes into the ditch, does not make out a case that the product was defective; nor does the fact that it is found in a defective condition after the event, when it appears equally likely that it was caused by the accident itself. The addition of other facts, tending to show that the defect existed before the accident, may make out a case, and so may expert testimony. So likewise may proof that other similar products made by the defendant met with similar misfortunes, or the elimination of other causes by satisfactory evidence. In addition, there are some accidents, as where a beverage bottle explodes or even breaks while it is being handled normally, as to which there is human experience that they do not ordinarily occur without a defect.

As in cases of res ipsa loquitur, the experience will give rise to the inference, and it may be sufficient to sustain the plaintiff's burden of proof."

Although plaintiffs evidence may be sufficient to permit an inference that something was wrong with the car, that alone is not sufficient to establish a defect, except perhaps in cases, analogous to res ipsa loquitur, in which ordinary human experience tells us that the event could not happen without a defect. The instant case is not such a case, for driver

869

error, failure of some part, accidental or unwitting damage to the car, and other possibilities do provide other explanations. ***

The particular defect that plaintiff alleges is that the indicator and the transmission gear linkages were both malaligned in a similar fashion, relative to the neutral starter switch, so that the car as manufactured could start in Drive rather than, as intended, only in Park and Neutral. There are various ways in which that particular fact could be proved, by means of several types of evidence. Keeton, Manufacturer's Liability: The Meaning of Defect in the Manufacture and Design of Products, 20 Syracuse L.Rev. 559, for example, suggests five ways by which the particular fact could be proved. [C]

(1) Plaintiff might introduce evidence by an expert based upon an examination of the product in question following the happening of the damaging event. Expert evidence would be direct evidence of an identifiable defect. In the instant case, two expert witnesses testified, and neither was able to point out an identifiable defect. Both testified that the car could be started in an indicated Drive position, but

neither identified a cause for that based upon their examination. The only explanation, offered by one of the experts, was that the pointer was probably damaged.

(2) There may simply be evidence of a damaging event occurring in the course of or following use of a product, whether by the testimony of the user or otherwise. This may be sufficient in the case where, as a matter of common knowledge, a defect is the probable cause. As already indicated, the instant case is not one involving such common knowledge.

(3) A plaintiff may produce both evidence of a damaging event occurring in the course of or following the use of a product and expert evidence that the most likely probable cause was attributable to a defect in the product being used at the time. In the instant case, the only expert who was qualified to state such an opinion, the company expert called as a witness by the plaintiff, was not asked to state whether a defect was the probable cause, and in fact made clear in his testimony that he believed it probable that there was no defect and that the apparent starting of the car in Drive was probably caused by damage from the accident to the indicator. He stated only that it was possible for various components to be malaligned as plaintiffs' theory required.

(4) In addition to evidence of an accident and the probable cause of such accident, evidence could be introduced to negate the existence of 'probable causes' not attributable to the maker. This type of evidence was not introduced in the instant case, except with respect to the issue of maintenance on the car in the 17 months after delivery.

(5) In some cases, the physical evidence of the actual condition of the product after the accident would be such that a layman could infer that it was defective. No such physical evidence was introduced in the instant case.

870

The sum of the evidence [in this case] is ***only that something unusual happened in the car, and that a possible explanation of that happening is a defect. ***

The same difficulty arises with regard to the issue of whether the claimed defect existed at the time the car left the hands of the defendant. ***Here, the car was 17 months old, there was no expert testimony that the claimed defect was one which would probably have existed at the time the car was manufactured, and common experience does not permit any such inference. ***

I agree with the trial judge that plaintiffs failed to submit sufficient evidence from which it could be inferred that a defect existed in the Friedman car at the time it left the hands of the defendant.

NOTES AND QUESTIONS

1. As the principal case reflects, problems relating to proof may be equally as important as legal theory in products liability actions. Plaintiff must be prepared to show:

A. That the product that injured plaintiff was, in fact, manufactured by defendant. Suppose an alleged manufacturer's name or trademark appeared on the product. Should that be sufficient? See Restatement (Third) of Torts: Products Liability § 14 (1998) (one who sells or distributes a product as its own that was manufactured by

another is subject to same liability as if it were the product's manufacturer). Suppose plaintiff is injured by a common product that has no trademark. How does he prove it was manufactured by defendant? Suppose an entire industry produces allegedly defective products, but plaintiff cannot identify who made the one that injured him? See Sindell v. Abbott Laboratories, page 327 (DES). In those cases, the plaintiff was able to prove that a product caused his or her injury, but was unable to prove which manufacturer made the particular product involved. In other words, the plaintiff was unable to prove that any particular manufacturer was the cause in fact of the injury. Some courts have developed a variety of theories to get the plaintiff past the requirement of proving actual causation. Other courts have refused to take this step and have applied the traditional rule that the plaintiff must prove the particular manufacturer's product caused his or her injury. See note 1, page 331.

B. That the product was defective and plaintiff was injured as a result. The principal case and the cases in the prior section are illustrative of this problem. After a plane crash, should plaintiff have to eliminate the possibility of negligent flying? See Restatement (Third) of Torts: Products Liability § 3 (1998) (permitting inference of defect based on circumstantial evidence if incident of kind that ordinarily occurs as a result of product defect and other possible causes are negated).

C. That the defect was present in the product at the time of sale, not introduced by a distributor or installer or repairer. This was an issue in the Rix v. General Motors Corp, case at page 842.

2. Effect of Government Safety Statute or Regulation. Paralleling the doctrine of negligence per se, most jurisdictions provide that a violation of a product safety statute or regulation makes the product defective as a matter of law. Restatement (Third) of Torts: Products Liability § 4(a) (1998) (taking the position that such a violation will deem the product defective with respect to the risks sought to be reduced by the statute or regulation).

The mirror image of that situation is where the product complied with government safety standards. Most jurisdictions permit the defendant to introduce evidence of compliance with government standards on the question whether the manufacturer was negligent, or, in a strict liability case, whether the product was defective. Should the jury be permitted to "second guess" the governmental agency that set the standard? Most jurisdictions allow the jury to do just that. The manufacturer's compliance with government standards is evidence that the jury may consider, but is not bound by. A regulatory standard issued by the federal government may preempt (completely preclude the bringing of) state claims only in the limited circumstance that the court determines that Congress intended such preemption. See also Restatement (Third) of Torts: Products Liability § 4(b) (1998) (providing that compliance with an applicable product safety statute or administrative regulation can be considered in determining defect, but is not determinative). A few jurisdictions provide that compliance with government standards precludes imposition of punitive damages and some jurisdictions create a rebuttable presumption that the product was not defective. See, for example, N.J. 2A-58C-4 (rebuttable presumption for FDA approved warnings). Michigan provides that the manufacturer or seller of a

drug approved by FDA has an absolute defense to products liability actions if the drug and its labeling were in compliance with FDA's approval, unless plaintiff alleges fraud or bribery in obtaining the approval. Taylor v. Smithkline Beecham Corp., 468 Mich. 1, 658 N.W.2d 127 (2003).

3. Strictly speaking, since negligence is not in question, res ipsa loquitur has no application to a strict liability case, but the inferences that are the core of the doctrine also are applicable to strict liability. In other words, the fact that the product failed in a way that caused injury may, in a proper case, give rise to a permissible inference that it was defective and that the defect existed when it left the hands of the defendant. See Myrlak v. Port Authority of New York and New Jersey, 157 N.J. 84, 723 A.2d 45 (1999) (discussing the doctrines of res ipsa loquitur for proof of negligence and indeterminate defect for strict liability in case involving the sudden collapse of chair in which worker was seated that had been placed in service only five weeks before); Allstate Ins. Co. v. Hamilton Beach/Proctor Silex, Inc., 473 F.3d 450 (2d Cir. 2007) (applying Vermont law) (plaintiffs expert traced origin of house fire to coffee maker that had just been removed from box and used for the first time on the day of the fire); and Hickerson v. Pride Mobility Prods. Corp., 470 F.3d 1252 (8th Cir. 2006) (applying Missouri law) (house fire and motorized wheelchair with rechargeable battery; product liability claim can be proved by inference from circumstantial evidence without proof of specific defect). But see O'Brien v. Cessna Aircraft Co., 298 Neb. 109, 903

N.W.2d 432 (2017) (malfunction theory was not available to pilot whose complaint also had alleged specific defects).

As with res ipsa loquitur in negligence cases, plaintiff must provide sufficient evidence to exclude other causes of accident not attributable to product malfunction. Ramos v. Howard Industries, Inc., 10 N.Y.3d 218, 885 N.E.2d 176, 855 N.Y.S.2d 412 (2008) (although plaintiff not required to identify a specific defect in transformer that exploded, he did have to provide evidence that excluded other possible causes like improper installation). Piltch v. Ford Motor Co., 778 F.3d 628 (7th Cir. 2015) (applying Indiana law) (abrogated on other grounds) (not enough to show that airbags did not deploy in single vehicle accident--need expert testimony to show that they should have). Generally, under those circumstances, plaintiff is not required to prove a specific defect. This is referred to in some jurisdictions as the "general defect" theory and in others as malfunction theory. White v. Mazda Motor of Am., Inc., 313 Conn. 610, 99 A.3d 1079 (2014) (malfunction theory must be pled in complaint to give manufacturer fair notice). See Restatement (Third) of Torts: Products Liability § 3 comment c (1998).

4. The most convincing evidence is a direct showing of what went wrong. Good advice to a client is to "save the pieces," but often the client disposes of them before consulting an attorney. If the product is destroyed in the accident or lost, plaintiff will be left in the uncertain sphere of circumstantial proof. What if one of the parties actually destroys the evidence? Vodusek v. Bayliner Marine Corp., 71 F.3d 148 (4th Cir. 1995) (expert retained by plaintiff destroyed boat while conducting his accident investigation; trial court judge acted within his discretion to instruct jury that it could draw negative

inference from loss of evidence for which party--through its agent--was responsible). See also note 2, page 1167, Spoliation of Evidence.

5. Rule on Excluding Evidence of Product Improvements to Prove Defect. Should plaintiff be able to show that defendant redesigned or repaired its product after the accident occurred? What are the policy considerations? Most states do not permit the evidence of subsequent improvements to prove negligence or other culpable conduct. Should that exclusion also apply to actions based on strict liability? While a few courts will admit this evidence if the underlying theory of liability is strict liability rather than negligence, most preclude its introduction. See, e.g., Federal Rule of Evidence 407 (evidence of subsequent remedial measures not admissible to prove negligence, defect, or need for warning but may be admitted to prove ownership, control or feasibility of precautionary measures) and Scott v. Dutton-Lainson Co., 774 N.W.2d 501 (Iowa 2009) (evidence excluded in design defect case because negligence principles are used to determine design defect liability).

6. When a defect arises long after purchase, plaintiff is confronted with another facet of the problem of establishing that the product was defective or unreasonably unsafe. It has often been said that the seller does not warrant that a product will not eventually wear out. McNally v. Chrysler Motors Corp., 55 Mise.2d 128, 284 N.Y.S.2d 761 (Sup. Ct. 1967) (proof that

hydraulic brakes leaked in 1963 was no proof brakes were defective when sold in 1961).

4. Defenses

(A) Plaintiff's Conduct

Daly v. General Motors Corp.

Supreme Court of California, 1978.

20 Cal.3d 725, 575 P.2d 1162, 144 Cal.Rptr. 380.

[Suit for death of the driver of an Opel automobile, thrown from his car in an accident, because of an alleged defect of the door latch. There was evidence that the driver did not use the shoulder harness system or lock the door, and that he was intoxicated. The case was submitted to the jury, which found for the defendant.]

RICHARDSON, Justice. The most important of several problems which we consider is whether the principles of comparative negligence expressed by us in Li v. Yellow Cab Co. (1975) 13 Cal.3d 804, 119 Cal.Rptr. 858, 532 P.2d 1226, apply to actions founded on strict products liability. We will conclude that they do. ***

From its inception ***strict liability has never been, and is not now, absolute liability. As has been repeatedly expressed, under strict liability the manufacturer does not thereby become the insurer of the safety of the product's user. [Cc] On the contrary, the plaintiffs injury must have been caused by a "defect" in the product. Thus the manufacturer is not deemed responsible when injury results from an unforeseeable use of its product. [Cc] Furthermore, we have recognized that though most forms of contributory negligence do not constitute a defense to a strict products liability action, plaintiffs negligence is a complete defense when it comprises assumption of

risk. [Cc] As will thus be seen, the concept of strict products liability was created and shaped judicially. In its evolution, the doctrinal encumbrances of contract and warranty, and the traditional elements of negligence, were stripped from the remedy, and a new tort emerged which extended liability for defective product design and manufacture beyond negligence but short of absolute liability.

In Li v. Yellow Cab Co., supra, 13 Cal.3d 804, 119 Cal.Rptr. 858, 532 P.2d 1226, we introduced the other doctrine with which we are concerned, comparative negligence. We examined the history of contributory negligence, the massive criticism directed at it because its presence in the slightest degree completely barred plaintiffs recovery, and the increasing defection from the doctrine. ***

We stand now at the point of confluence of these two conceptual streams, having been greatly assisted by the thoughtful analysis of the parties and the valuable assistance of numerous amici curiae. We are by

874

no means the first to consider the interaction of these two developing principles. As with the litigants before us, responsible and respected authorities have reached opposing conclusions stressing in various degrees the different considerations which we now examine.

Those counseling against the recognition of comparative fault principles in strict products liability cases vigorously stress, perhaps equally, not only the conceptual, but also the semantic difficulties incident to such a course. The task of merging the two concepts is said to be impossible, that "apples and oranges" cannot be compared, that "oil and water" do not mix, and that strict liability,

which is not founded on negligence or fault, is inhospitable to comparative principles. The syllogism runs, contributory negligence was only a defense to negligence, comparative negligence only affects contributory negligence, therefore comparative negligence cannot be a defense to strict liability. [Cc] While fully recognizing the theoretical and semantic distinctions between the twin principles of strict products liability and traditional negligence, we think they can be blended or accommodated.

The inherent difficulty in the "apples and oranges" argument is its insistence on fixed and precise definitional treatment of legal concepts. In the evolving areas of both products liability and tort defenses, however, there has developed much conceptual overlapping and interweaving in order to attain substantial justice. The concept of strict liability itself, as we have noted, arose from dissatisfaction with the wooden formalisms of traditional tort and contract principles in order to protect the consumer of manufactured goods. Similarly, increasing social awareness of its harsh "all or nothing" consequences led us in Li to moderate the impact of traditional contributory negligence in order to accomplish a fairer and more balanced result. We acknowledged an intermixing of defenses of contributory negligence and assumption of risk and formally effected a type of merger. "As for assumption of risk, we have recognized in this state that this defense overlaps that of contributory negligence to some extent ***." (Li, supra). ***

We think, accordingly, the conclusion may fairly be drawn that the terms "comparative negligence," "contributory negligence" and "assumption of risk" do not, standing alone, lend themselves to the exact measurements of a micrometer-caliper, or to such precise

definition as to divert us from otherwise strong and consistent countervailing policy considerations. Fixed semantic consistency at this point is less important than the attainment of a just and equitable result. The interweaving of concept and terminology in this area suggests a judicial posture that is flexible rather than doctrinaire. ***

Given all of the foregoing, we are, in the wake of Li, disinclined to resolve the important issue before us by the simple expedient of matching linguistic labels which have evolved either for convenience or by custom. Rather, we consider it more useful to examine the foundational reasons underlying the creation of strict products liability in California to

875

ascertain whether the purposes of the doctrine would be defeated or diluted by adoption of comparative principles. We imposed strict liability against the manufacturer and in favor of the user or consumer in order to relieve injured consumers "from problems of proof inherent in pursuing negligence ***and warranty ***remedies **** * As we have

noted, we sought to place the burden of loss on manufacturers rather than "injured persons who are powerless to protect themselves." [quoting Greenman v. Yuba Power Products, Inc., supra, page 834.] ***

The foregoing goals, we think, will not be frustrated by the adoption of comparative principles. Plaintiffs will continue to be relieved of proving that the manufacturer or distributor was negligent in the production, design, or dissemination of the article in question. Defendant's liability for injuries caused by a defective product

remains strict. The principle of protecting the defenseless is likewise preserved, for plaintiffs recovery will be reduced only to the extent that his own lack of reasonable care contributed to his injury. The cost of compensating the victim of a defective product, albeit proportionately reduced, remains on defendant manufacturer, and will, through him, be "spread among society." However, we do not permit plaintiff's own conduct relative to the product to escape unexamined, and as to that share of plaintiffs damages which flows from his own fault we discern no reason of policy why it should, following Li, be borne by others. Such a result would directly contravene the principle announced in Li, that loss should be assessed equitably in proportion to fault. ***

A second objection to the application of comparative principles in strict products liability cases is that a manufacturer's incentive to produce safe products will thereby be reduced or removed. While we fully recognize this concern we think, for several reasons, that the problem is more shadow than substance. First, of course, the manufacturer cannot avoid its continuing liability for a defective product even when the plaintiffs own conduct has contributed to his injury. The manufacturer's liability, and therefore its incentive to avoid and correct product defects remains; its exposure will be lessened only to the extent that the trier finds that the victim's conduct contributed to his injury. Second, as a practical matter a manufacturer, in a particular case, cannot assume that the user of a defective product upon whom an injury is visited will be blameworthy. ***

In passing, we note one important and felicitous result if we apply comparative principles to strict products liability. This arises from the

fact that under present law when plaintiff sues in negligence his own contributory negligence, however denominated, may diminish but cannot wholly defeat his recovery. When he sues in strict products liability, however, his "assumption of risk" completely bars his recovery. Under Li, as we have noted, "assumption of risk" is merged into comparative principles. [Cc] The consequence is that after Li in a negligence action, plaintiffs conduct which amounts to "negligent" assumption of risk no

longer defeats plaintiffs recovery. Identical conduct, however, in a strict liability case acts as a complete bar under rules heretofore applicable. Thus, strict products liability, which was developed to free injured consumers from the constraints imposed by traditional negligence and warranty theories, places a consumer plaintiff in a worse position than would be the case were his claim founded on simple negligence. This, in turn, rewards adroit pleading and selection of theories. The application of comparative principles to strict liability obviates this bizarre anomaly by treating alike the defenses to both negligence and strict products liability actions. In each instance the defense, if established, will reduce but not bar plaintiffs claim.

A third objection to the merger of strict liability and comparative fault focuses on the claim that, as a practical matter, triers of fact, particularly jurors, cannot assess, measure, or compare plaintiffs negligence with defendant's strict liability. We are unpersuaded by the argument and are convinced that jurors are able to undertake a fair apportionment of liability. ***

We note that the majority of our sister states which have addressed the problem, either by statute or judicial decree, have extended comparative principles to strict products liability. ***

Of the three decisions which have declined to apply comparative negligence to strict liability, two have noted their reliance on state comparative negligence statutes which are expressly confined to "negligence" actions. [Cc] At least three jurisdictions have applied comparative negligence statutes to strict liability actions, despite language arguably limiting the statute application to negligence. [Cc] Finally, one court has judicially extended a "pure" form of comparative fault to the traditional strict liability defense of "product misuse," despite the existence of a statutory scheme of "modified" comparative negligence. (General Motors Corp. v. Hopkins (Tex.1977) 548 S.W.2d 344, 351-352.)

Moreover, we are further encouraged in our decision herein by noting that the apparent majority of scholarly commentators has urged adoption of the rule which we announce herein. ***

We find additional significance in the provisions of the proposed Uniform Comparative Fault Act (Act). ***Our attention has been called to the action of the Conference [of Commissioners on Uniform State Laws] in August 1977, wherein it approved adoption of the Act by a vote of 40 states to 8 (California voting favorably). The Act is the distillation of approximately five years of discussion, analysis, and contribution by a special committee and a review committee of the Conference. We quote portions of [it] ***.

Having examined the principal objections and finding them not insurmountable, and persuaded by logic, justice, and fundamental

fairness, we conclude that a system of comparative fault should be and it is hereby extended to actions founded on strict products liability. In such

877

cases the separate defense of "assumption of risk," to the extent that it is a form of contributory negligence, is abolished. While, as we have suggested, on the particular facts before us, the term "equitable apportionment of loss" is more accurately descriptive of the process, nonetheless, the term "comparative fault" has gained such wide acceptance by courts and in the literature that we adopt its use herein. ***

It is readily apparent that the foregoing broad expressions of principle do not establish the duties of the jury with that fixed precision which appeals to minds trained in law and logic. Nonetheless, rather than attempt to anticipate every variant and nuance of circumstance and party that may invoke comparative principles in a strict products liability context, we deem it wiser to await a case-by-case evolution in the application of the broad principles herein expressed.

By extending and tailoring the comparative principles announced in Li, supra, to the doctrine of strict products liability, we believe that we move closer to the goal of the equitable allocation of legal responsibility for personal injuries. We do so by relying on what Professor Schwartz aptly terms a "predicate of fairness." In making liability more commensurate with fault we undermine neither the theories nor the policies of the strict liability rule. In Li we took "a first

step in what we deem to be a proper and just direction, * * [C] We are convinced that

the principles herein announced constitute the next appropriate and logical step in the same direction.

The judgment is reversed.

[Tobriner, Clark and Manuel, JJ., concurred; Clark, J. filed a concurring opinion; JEFFERSON, J. (assigned), concurred in part and dissented in part and filed an opinion in which BIRD, C.J., concurred; MOSK, J., filed a dissenting opinion.]

NOTES AND QUESTIONS

1. Most jurisdictions have followed the lead of the principal case and extended comparative negligence principles to strict liability products liability actions. A few jurisdictions, however, either have refused to recognize the doctrine of comparative fault in product liability cases or have limited it to situations in which plaintiff has assumed the risk. Shipler v. General Motors Corp., 271 Neb. 194, 710 N.W.2d 807 (2006) (interpreting comparative negligence statute to preclude use of comparative negligence defense in product liability actions based on strict liability).

2. A number of decisions are in accord with the Restatement (Second) of Torts, holding that a product user's negligence in failing to discover a defect in the product, or to guard against a possible defect, is not a defense. What is the reason for this rule? Is fault irrelevant under strict liability? Or is the rule based on the theory that a purchaser may assume the product is safe? The Restatement

(Second) appeared simply to carry over the rule from the approach taken in the area of Abnormally Dangerous Activities. See

878

pages 813-815. Restatement (Third) of Torts: Products Liability § 17 comment d (1998), on the other hand, does not limit the forms or categories of plaintiffs conduct that may be taken into account to apportion damages under comparative negligence principles.

3. Assumption of Risk. When plaintiff voluntarily confronts a known hazard, the Restatement (Second) and some courts would bar the claim. Ferraro v. Ford Motor Co., 423 Pa. 324, 223 A.2d 746 (1966) (driving truck with knowledge that wheels would lock on left turns and accelerator pedal tended to dislodge). See also Reott v. Asia Trend, Inc., 618 Pa. 228, 55 A.3d 1088 (2012) (explaining that for voluntary assumption of the risk, manufacturer must show that user knew of a defect and yet voluntarily and unreasonably proceeded to use the product whereas misuse of the product is use that was "unforeseeable or outrageous" but does not require user's knowledge of the defect). Other courts would subject the plaintiff to the same fault apportionment as in comparative negligence. See Restatement (Third) of Torts: Products Liability § 17 comment d (1998).

Ford Motor Co. v. Matthews

Supreme Court of Mississippi. 1974.

291 So.2d 169.

Rodgers, Presiding Justice. Earnest Matthews was killed as a result of being run over by his tractor and dragged underneath a disc

attachment. It was alleged that Matthews was standing beside his tractor when he started it, and the tractor was in gear at the time. The Ford tractor in question was equipped with a starter safety switch which was designed to prevent the tractor from being started in gear. It is the position of the plaintiff-administratrix that the plunger connected with the safety switch was defective and allowed the tractor to be started in gear.

[The trial court, sitting without a jury, found for the plaintiff-administratrix and entered a judgment against Ford in the amount of $74,272.65. Ford appealed.]

The appellant Ford contends that Matthews' act of standing on the ground and starting the tractor while in gear was a misuse of the product. It is argued that such misuse is an absolute limitation on Ford's liability. The basic authority for this position is Comment (h), Restatement (Second) of Torts § 402A, which reads in part: "A product is not in a defective condition when it is safe for normal handling and consumption. If the injury results from abnormal handling ***the seller is not liable." [Restatement (Second) of Torts § 402A, at 351.] Several cases are cited by appellant to illustrate this proposition. However, in the cases cited, the court either found that there was no defect and the accident was caused by a misuse, or even if there were a defect, it played no part in the causation of the accident. Here the situation is clearly distinguishable. It is apparent that the failure of the safety switch to prevent the tractor from cranking in gear was a cause of the accident. The failure of the

decedent to make sure the tractor was in neutral before starting [, if that were true] may be characterized as the omission of a customary precaution, although there is no evidence that he was warned of this danger, or that he knew of the danger. Nevertheless, this was not such a misuse of the tractor as to relieve Ford from its strict liability for the defective condition of the tractor.

Although misuse of a product that causes an injury is normally a bar to strict liability, it is said that: " ***[T]he manufacturer is not liable for injuries resulting from abnormal or unintended use of his product, if such use was not reasonably foreseeable. The issue is one of foreseeability and misuse may be foreseeable." (Emphasis added). 1 Frumer and Friedman, Products Liability § 15.01, at 351 (1973).***

It is admitted that the tractor in question was designed to prevent its starting in gear. It is apparent that it could be foreseen by Ford that one day a tractor operator might carelessly crank the engine without first making certain that it was not in gear (as recommended in the owner's manual), especially if he were aware of the purpose of the safety switch system. In short, even if Matthews were guilty of negligence, such negligence was reasonably foreseeable by Ford and is not a bar to an action based on strict liability resulting from a defective tractor. ***

Affirmed.

NOTES AND QUESTIONS

1. When plaintiff uses a product in a manner unintended by the manufacturer, courts often treat this conduct as a defense. On the other hand, could the matter be viewed more logically as an issue of duty or defect? What is the obligation of a manufacturer to produce a

product that will withstand misuse? Evidence concerning a misuse or alteration of the product could be used to argue that there was no defect in the product (failure of prima facie case), that any defect in the product did not cause the plaintiffs injury (no causation), or that the plaintiffs unreasonable conduct in contributing to the cause of the accident should reduce the plaintiffs recovery (affirmative defense of comparative fault). See also Restatement (Third) of Torts: Products Liability § 2 comment p and § 15 comment b (1998) (product misuse, alteration, and modification, whether by third party or plaintiff, are relevant to issues of defect, causation, and comparative responsibility).

2. Whether regarded as a matter of defect or causation, the manufacturer is not subject to liability for an unforeseeable abnormal use of its product. Thus, a manufacturer was not liable in a case involving an aboveground swimming pool that was installed in the ground with a deck built around it, disguising the fact that the pool was shallow from the plaintiff who was injured while diving. Amatulli v. Delhi Construction Corp., 77 N.Y.2d 525, 571 N.E.2d 645 (1991). See also Mine Safety Appliance Co. v. Holmes, 171 So.2d 442 (Miss. 2015) (operator of jackhammer testified that he only used one filter for his respirator for the years that he used it and expert

witnesses agreed that the filter would have become ineffective in a matter of weeks and that no respirator on the market at the time would have provided adequate protection without the recommended replacement of the filter) and Campbell v. Johnson, 109 N.E.3d 953 (Ind. 2018) (defendant could not have reasonably expected that

consumer would fail to follow safety instructions in three different ways, and thus defense of misuse of product completely barred consumer from recovering).

3. Before the advent of strict liability, there were many negligence cases holding that the seller is not liable when the injury is brought about by an abnormal use of the chattel. See, e.g., McCready v. United Iron & Steel Co., 272 F.2d 700 (10th Cir. 1959) (applying Oklahoma law) (casements for window frames used by worker as ladder) and Dubbs v. Zak Bros. Co., 38 Ohio App. 299, 175 N.E. 626 (1931) (shoes far too small for plaintiffs feet caused blisters). Even in cases based on negligence, there are some unusual uses of a product that the seller had to anticipate, and against which the seller was required to guard, at least to the extent of a warning. Phillips v. Ogle Aluminum Furniture, Inc., 106 Cal.App.2d 650, 235 P.2d 857 (1951) (standing on a chair).

4. As the principal case reflects, courts have shown a willingness to let juries determine whether an alleged product misuse was foreseeable. Are the following misuses foreseeable and thus ones for which the product manufacturer could be liable? An 11-year-old boy rides a vacuum cleaner as if it were a toy car and his penis slips through an opening in the casing and is seriously injured by the fan blades. Larue v. National Union Elec. Corp., 571 F.2d 51 (1st Cir. 1978) (applying Maine law) (in upholding jury verdict for the plaintiff, court noted that jury could have found that the intrusion of the boy's penis into the fan was within the class of dangers foreseeable to the manufacturer even though the precise circumstances of the accident might not have been). A two-year-old was being given a ride by her great-grandmother on a riding mower in a small wooden box

attached to the mower's fender that the owner had made for her dog to ride in. When the mower hit a tree stump, the child was thrown off, the operator jumped off to pick up the child, and the riderless mower ran over the child's leg. See Erkson v. Sears, Roebuck & Co., 841 S.W.2d 207 (Mo. App. 1992) (finding use of mower was not intended or foreseeable). A child is injured while playing with a disposable cigarette lighter. Compare Griggs v. BIC Corp., 981 F.2d 1429 (3d Cir. 1992) (applying Pennsylvania law) (finding use by children of cigarette lighter was not intended or reasonably foreseeable) with Bean v. BIC Corp., 597 So.2d 1350 (Ala. 1992) (finding jury question whether foreseeability of product misuse required manufacturer to design a childproof cigarette lighter). While inhaling fumes from butane fuel cans to "get high," a man suffered cardiac arrest. Cf. Pavlik v. Lane Ltd., 135 F.3d 876 (3d Cir. 1998) (applying Pennsylvania law) (discussing adequacy of warning and proximate cause in decision reversing summary judgment in favor of fuel distributor). A teenager is injured while attempting to ride the moving pendulum of an oil well pump. Payne v. Gardner, 56 So.3d 229 (La. 2011) (upholding summary judgment based on finding that riding the pumping unit was not a reasonably anticipated use). See also Restatement (Third) of

Torts: Products Liability § 2 comment p (1998) (noting that foreseeable product misuse must be considered in determining whether an alternative design should have been adopted).

5. Does it make any difference whether the "misuse" or "abnormal use" is that of the plaintiff or of a third party? In Jacobsen v. Ford

Motor Co., 365 N.C. 468, 723 S.E.2d 753 (2012), the court found that manufacturer could raise an affirmative defense of modification based on evidence that a father had placed a shoulder restraint behind his daughter's chest when he placed her in car. Can the conduct, whether plaintiffs or a third party's, be used by defendant to argue no defect, no causation, or an affirmative defense such as comparative negligence?

(B) Preemption and Other Government Actions

In the past several decades, the question whether a state product liability claim is preempted by a federal law has been litigated in the context of several different federal statutes. U.S. Supreme Court guidance on the issue has developed gradually. For example, in Medtronic, Inc. v. Lohr, 518 U.S. 470 (1996), Justice Breyer posed this hypothetical to illustrate why state common law claims, as well as state regulatory agency rules, might be preempted by Congress: "Imagine that, in respect to a particular hearing aid component, a federal MDA [Medical Device Amendment to the Food, Drug and Cosmetic Act] regulation requires a 2-inch wire, but a state agency regulation requires a 1-inch wire. If the federal law, embodied in the '2-inch' MDA regulation, preempts the state '1-inch' agency regulation, why would it not similarly preempt a state-law tort action that premises liability upon the defendant manufacturer's failure to use a 1-inch wire (say, an award by a jury persuaded by expert testimony that use of a more than 1-inch wire is negligent)? The effects of the state agency regulation and the state tort suit are identical. To distinguish between them for pre-emption purposes

would grant greater power (to set state standards 'different from, or in addition to,' federal standards) to a single state jury than to state officials acting through state administrative or legislative lawmaking processes. [In statutes w]here Congress likely did not focus specifically upon the matter,..., I would not take it to have intended this anomalous result." Justice Breyer's concurring opinion, 518 U.S. 470, 504.

Express Preemption. In statutory schemes where Congress has made its intent to preempt state law clear, the courts have no choice in the matter. The state law is preempted by the federal law and, as a practical matter, the manufacturer need comply only with the federal statute and the regulations issued under it. Riegel v. Medtronic, Inc., 552 U.S. 312 (2008) (finding express preemption for medical devices under the MDA). Even in cases of express preemption, the Court must decide which claims are preempted. See, e.g., Cipollone v. Liggett Group, Inc., 505 U.S. 504 (1992) (in tobacco case, state tort law claims for failure to warn preempted, but not claims for breach of express warranty). What if the

plaintiff can prove that the manufacturer misrepresented or withheld critical information from the agency charged with issuing the standard? Buckman Co. v. Plaintiffs' Legal Committee, 531 U.S. 341 (2001) (in products liability litigation involving medical device, state-law fraud-on- the-FDA claims are preempted because they inevitably would conflict with the FDA's responsibility to police fraud consistently with the FDA's other objectives).

Implied Preemption. The Federal Aviation Act (FAA) does not include an express preemption clause. However, federal law can preempt state law if it pervasively occupies a particular field of law. Are state law claims for defective design of airplane engine parts preempted by the FAA? Becker v. AVCO Corp., 187 Wash.2d 615, 387 P.3d 1066 (2017) (Congress intended the act to allow for the creation of minimum standards. Its regulations are not so pervasive or comprehensive enough to preempt state remedies that exceed that minimum). In accord, Sikkelee v. Precision Airmotive Corp., 822 F.3d 680 (3d Cir. 2016).

Where Congress has not made its intent clear, the courts must determine whether preemption is warranted and which claims are to be preempted. This requires a case by case analysis of whether a claim is preempted, both because the statutes themselves vary and because some claims under a given statute may be preempted while others are not under what are sometimes called "frustration of purpose preemption" and "impossibility preemption." The National Highway Traffic Safety Administration (NHTSA) promulgated standards that permitted automobile manufacturers to include either an airbag or an alternative form of passive restraints. Should a plaintiff be able to bring a crashworthiness claim based on the manufacturer's failure to include an airbag? Geier v. American Honda Motor Co., 529 U.S. 861 (2000) (finding claim preempted because otherwise NHTSA's purpose in encouraging development of various forms of passive restraints to ascertain which was more effective would be frustrated). NHTSA's vehicle safety standard for windows permits a manufacturer to use either tempered glass or laminated glass in side windows. Plaintiff's expert testified that

laminated glass is more likely to keep a passenger's body from being ejected during an accident. Should plaintiff be able to bring a crashworthiness claim based on the manufacturer's use of tempered glass on the side windows? Compare Priester v. Cromer, 401 S.C. 38, 736 S.E.2d 249 (2012) (finding claim preempted because otherwise NHTSA's purpose in allowing both, motivated in part by safety concerns relating to increase in neck injuries with laminated glass, would be frustrated) with Lake v. Memphis Landsmen, LLC, 405 S.W.3d 47 (Tenn. 2013) (concluding that NHTSA merely narrowed the range of manufacturer's acceptable choices for glazing materials but did not intend to preclude states from imposing liability for the choice of tempered glass). Implied preemption also can occur when a tort claim would create a situation where it would be impossible for a defendant to comply both with what

the plaintiff in the tort claim is arguing should have been done and with what the federal law requires.

See also the discussion of preemption in the area of prescription drugs and medical devices at note 2, page 896.

Government Contractor Defense. Suppose the government acts not to set standards or specifications but as a purchaser mandating a particular design? Should a manufacturer be liable for a design defect in a product manufactured to government specifications pursuant to a contract with the government? If the United States makes a conscious, intentional determination that seatbelts are incompatible with the intended use of the jeeps it purchased, the manufacturer would not be liable to an injured rider for failing to

install a seatbelt. Sanner v. Ford Motor Co., 154 N.J. Super. 407, 381 A.2d 805 (1977). In Boyle v. United Technologies Corp., 487 U.S. 500 (1988), the family of a Navy pilot killed in a helicopter crash during a training exercise sued the helicopter manufacturer alleging a defect in the design of the escape hatch. The manufacturer urged the court to recognize a defense based on the fact that the government itself had made the design decision. The Supreme Court ruled that a contractor could be immune from liability for an allegedly defective product if the manufacturer could show that (1) the United States approved reasonably precise specifications, (2) the equipment conformed to those specifications, and (3) the contractor warned the United States about the dangers in the use of the equipment that were known to the contractor but not to the United States. The contractor has the burden of proving each of the elements of the defense. The defense is available even if the product was based on a design originally developed for another buyer as long as the United States approved the aspect of the design that the plaintiff claims is defective. Getz v. Boeing Co., 654 F.3d 852 (9th Cir. 2011) (finding preemption of state products liability claim brought by survivors of helicopter crash in Afghanistan involving Chinook helicopter initially developed for the Royal Air Force).

Should it be available for failure to warn claims as well as for design defect claims? Ripley v. Foster Wheeler LLC, 841 F.3d 207 (4th Cir. 2016) (joining the Second, Fifth, Sixth, Seventh, Ninth, and Eleventh Circuits in applying the defense to failure to warn cases).

5. Defendants Other than Manufacturers--Harm Other than Personal Injury

(A) Other Suppliers of Chattels

Peterson v. Lou Bachrodt Chevrolet Co.

Supreme Court of Illinois, 1975.

61 I11.2d 17, 329 N.E.2d 785.

SCHAEFER, Justice. On September 3, 1971, Maradean Peterson, age 11, and her brother, Mark Peterson, age 8, were struck by an automobile while they were walking home from school. Maradean Peterson died on the day of the accident, and Mark Peterson suffered severe injuries, including the amputation of one of his legs. The automobile involved in the accident was a used 1965 Chevrolet. James A. Peterson, administrator of the estate of Maradean Peterson, and Mark Peterson, by James A. Peterson, his father and next friend, brought this action against the driver of the used car, its owners, and the defendant involved in the appeal, Lou Bachrodt Chevrolet Company.

[The trial court dismissed two counts of the complaint against the car dealer and this ruling is before the supreme court on appeal.]

One of the challenged counts sought recovery for the wrongful death of the daughter, the other for the injuries to the son. Each count alleged that the defendant, Lou Bachrodt Chevrolet Company, had

sold the 1965 Chevrolet on June 11, 1971, in the ordinary course of business, and that at the time the automobile left the defendant's control it was defective and not reasonably safe for driving and operation in that:

"(a) A spring or springs in the left front wheel braking system was missing at the time of its sale;

"(b) One of the left rear brake shoes was completely worn out at the time of the sale;

"(c) A part of the cylinder braking system in the left rear wheel was missing at the time of the sale."

It was alleged that the injuries and death were a direct and proximate result of the defective conditions.

***

In Suvada v. White Motor Co. (1965), 32 Ill.2d 612, 210 N.E.2d 182, we held that a manufacturer is liable under a theory of strict liability if the plaintiffs "prove that their injury or damage resulted from a condition of the product, that the condition was an unreasonably dangerous one and that the condition existed at the time it left the manufacturer's control." [C] In Dunham v. Vaughan & Bushnell Mfg. Co. (1969), 42 Ill.2d 339, 247 N.E.2d 401, strict liability was imposed upon a wholesaler through whose warehouse the packaged product passed unopened.

885

In that case we pointed out: "The strict liability of a retailer arises from his integral role in the overall producing and marketing enterprise and affords an additional incentive to safety." [C] The

plaintiffs now ask that the same liability be imposed upon a defendant who is outside of the original producing and marketing chain. We decline to do so.

One of the basic grounds supporting the imposition of strict liability upon manufacturers is that losses should be borne by those "who have created the risk and reaped the profit by placing the product in the stream of commerce." [C] Imposition of liability upon wholesalers and retailers is justified on the ground that their position in the marketing process enables them to exert pressure on the manufacturer to enhance the safety of the product. [Cc] A wholesaler or retailer who neither creates nor assumes the risk is entitled to indemnity [from the manufacturer]. [Cc] Therefore, although liability is imposed upon anyone who is engaged in the business of selling the product (Restatement (Second) of Torts § 402A (1965)), the loss will ordinarily be ultimately borne by the party that created the risk.

There is no allegation that the defects existed when the product left the control of the manufacturer. Nor is there any allegation that the defects were created by the used car dealer. [C] If strict liability is imposed upon the facts alleged here, the used car dealer would in effect become an insurer against defects which had come into existence after the chain of distribution was completed, and while the product was under the control of one or more consumers. See Restatement (Second) of Torts § 402A, comment f. ***

Appellate court reversed; circuit court affirmed.

GOLDENHERSH, JUSTICE (dissenting). I dissent. The rationale underlying the application of strict liability to a manufacturer is that losses should be borne by those "who have created the risk and

reaped the profit by placing the product in the stream of commerce." (Suvada v. White Motor Co., [c].) In Dunham v. Vaughan & Bushnell Mfg. Co., [c], strict liability was made applicable to a wholesaler and retailer for the reason that "these considerations apply with equal compulsion to all elements in the distribution system." ***

In Galluccio v. Hertz Corp., 1 Ill.App. 3d 272, 274 N.E.2d 178, appeal denied, 49 Ill.2d 575, the appellate court held strict liability applicable to the lessor of a motor vehicle. No reason presents itself for not applying the principle to a used car dealer who places in the stream of commerce a vehicle rendered unreasonably dangerous by reason of a defect discoverable upon reasonable inspection.

I am aware of the argument made by defendant and amici curiae that many vehicles are sold "as is" and that the cost of repairs in some instances might exceed the value of the vehicle. These pleadings present no such issues, and assuming, arguendo, that in some future case they will arise, there is precedent for weighing the cost of remedying the

886

dangerous condition against the nature and extent of the risk which it creates. [C]

I would affirm the judgment of the appellate court.

NOTES AND QUESTIONS

1. The Restatement (Second) of Torts § 402A and most courts in their initial decision implementing strict products liability on tort or warranty theories limited its reach to defendants "in the business of selling products." Part of the development of strict liability law in the

next two decades focused on (1) which defendants fit within this definition and (2) whether other defendants also should be included.

2. Used Products. As the principal case reflects, most courts decline to impose strict liability on sellers of used products, but not all do. Compare Peterson v. Idaho First Nat'l Bank, 117 Idaho 724, 791 P.2d 1303 (1990) (declining to apply strict liability to sale of mobile home by bank that sold it after repossessing it) with Gaumer v. Rossville Truck and Tractor Co., Inc., 292 Kan. 749, 257 P.3d 292 (2011) (applying strict liability to sale of used farm equipment by dealer) (collecting cases). See also Restatement (Third) of Torts: Products Liability § 8 (1998) (focusing on consumer expectations to limit liability in cases involving used goods). If strict liability is applied, can a seller of a used product avoid it by selling the product "as is" or "with all faults"? The jurisdictions are split on this issue. See Restatement (Third) of Torts: Products Liability § 8 comment k and Reporters' Notes thereto (1998) (collecting cases).

3. Lessors and Bailors of Chattels. See Restatement (Third) of Torts: Products Liability § 20 comment c (1998) (including lessors in defining an entity that "sells or otherwise distributes" a product).

4. Retailers, Wholesalers, Distributors, and Other Sellers. Most jurisdictions have extended strict liability to all sellers in what is often called the "vertical" chain of distribution. As Justice Traynor indicated in Vandermark v. Ford Motor Co., 61 Cal.2d 256, 391 P.2d 168 (1964): "In some cases the retailer may be the only member of the enterprise reasonably available to the injured plaintiff. In other cases, the retailer himself may play a substantial part in insuring that the product is safe or may be in a position to exert pressure on the

manufacturer to that end." The Restatement (Third) of Torts: Products Liability § 20 (1998) includes all sellers in the chain of distribution, including retailers and wholesalers, in the same category as product manufacturers. The Uniform Product Liability Act (UPLA) would hold retailers and wholesalers liable only for their own acts of negligence unless the manufacturer was out of business or unreachable through judicial process. More than half of state legislatures have enacted similar provisions limiting the liability of non-manufacturer product sellers. See, e.g., Ga. Code Ann. § 51-1--11.1; Minn. Stat. § 544.41; and Wash. Rev. Code § 7.72.040. See Chapter 12, page 702.

5. Occasional Sellers. A seller who does not hold himself out as having any knowledge or skill in the commercial sense will not be subject to strict liability. See Restatement (Third) of Torts: Products Liability § 1 comment c

(1998) (strict liability applies only to those engaged in the business of selling or otherwise distributing the type of product that injured the plaintiff); New Texas Auto Auction Service v. Gomez de Hernandez, 249 S.W.3d 400 (Tex. 2008) (auctioneer not subject to strict liability); and Jaramillo v. Weyerhaeuser Co., 12 N.Y.3d 181, 906 N.E.2d 387 (2009) (company that periodically disposed of equipment it no longer needed by sale to other companies was not strictly liable as a product seller to employee of buyer who was injured by equipment).

Erie Ins. Co. v. Amazon.com

United States Court of Appeals, Fourth Circuit, 2019.

925 F.3d 135.

NIEMEYER, Circuit Judge. The main issue before us is whether Amazon.com, Inc., is subject to liability for a defective product that a customer purchased on its website from a third-party seller with Amazon "fulfilling" the transaction by storing the product and shipping it to the customer.

Trung Cao of Montgomery County, Maryland, purchased a headlamp on Amazon's website and then gave it to friends as a gift. The headlamp's batteries apparently malfunctioned, igniting the friends' house and causing over $ 300,000 in damages. Erie Insurance Company, which insured the house, paid the loss and now, as subrogee, is pursuing this action to obtain reimbursement from Amazon for negligence, breach of warranty, and strict liability in tort, arguing that Amazon has liability under Maryland law because it was the "seller" of the headlamp.

***

[Under the terms of its agreement with Amazon, the seller of the headlamp could ship its inventory to an Amazon warehouse for storage and, once an order was received online for a product, Amazon would retrieve the product from inventory, box it, and ship it to the purchaser. In this case, manufacturer Dream Light shipped its headlamps to Amazon's warehouse in Virginia, and, when Cao's order for one came in, Amazon packaged and shipped it to Cao using the third-party shipper, UPS Ground. As part of its fulfillment services, Amazon also collected payment and, after withdrawing its service fee, remitted the balance to Dream Light. Dream Light set the price for the headlamp and created the content of the product's

description used on the Amazon site, including whether or not to include a warranty.

Amazon argued that it was not a "seller" under Maryland law because it had never held title to the product and that its role was analogous to that of newspaper classified ads and shippers like UPS. Plaintiff insurance company argued that Amazon, like a brick-and- mortar store such as Home Depot, is a seller of products and therefore is liable under Maryland law for the defective products that it sells. While plaintiff acknowledged that both the website and the receipt clearly

888

indicated that Dream Light was the seller, it argues that Amazon, through its fulfillment services program, took so much control over the transaction that it effectively became the seller and therefore became responsible under theories of negligence, breach of warranty, and strict liability in tort.

Amazon sought summary judgment and the trial court granted it, concluding that Amazon is not a seller under Maryland law. This appeal followed.]

As both parties observe, products liability under Maryland law [applicable in this diversity case], whether asserted under theories of negligence, breach of warranty, or strict liability in tort, is imposed on sellers and manufacturers (a manufacturer also being a seller). As Maryland courts have explained, "Irrespective of whether the theory of recovery is breach of warranty, negligence or strict liability, a plaintiff must show three product litigation basics--defect, attribution of defect to seller, and a causal relationship between the defect and

the injury."..... The defect must be shown to exist at the time the product left the seller (whether manufacturer, distributor, or retailer) or at the time the sale was made. But in each case Maryland law imposes liability on the seller. [C] Restatement (Second) of Torts § 402A (1965) (adopted in Maryland by Phipps v. Gen. Motors Corp., 278 Md. 337, 363 A.2d 955, 963 (1976)) (imposing strict liability on " [o]ne who sells any product in a defective condition unreasonably dangerous to the user or consumer or to his property" (emphasis added)). Moreover, Maryland courts have repeatedly noted that products liability claims sounding in negligence, breach of warranty, and strict liability in tort overlap, all focusing on the liability of a seller for a defective product. ***

We... find no indication that the term "seller," as used in Maryland's products liability law, should be understood in any manner other than its ordinary meaning. And the ordinary meaning of "seller" is "one that offers [property] for sale," with "sale" defined as "the transfer of ownership of and the title to property from one person to another for a price." Merriam-Webster's Collegiate Dictionary 1129, 1097 (11th ed. 2007). Indeed, the Maryland Uniform Commercial Code adopts this definition precisely. [Cc]

We thus conclude that insofar as liability in Maryland for defective products falls on "sellers" and manufacturers (who are also sellers), it is imposed on owners of personal property who transfer title to purchasers of that property for a price. In this sense, a manufacturer, distributor, dealer, and retailer who own--i.e., have title to--the products during the chain of distribution are sellers, whereas shippers, warehousemen, brokers, marketers, auctioneers, and other bailees or consignees, who do not take title to property during

the course of a distribution but rather render services to facilitate that distribution or sale, are not sellers. ***

While Amazon does in fact sell products that it owns on its website and thus would be considered a seller of those products, in this case it

889

facilitated the sale for Dream Light under its fulfillment program. We thus conclude that Dream Light was the seller, as Cao was so informed on the site, and there is no evidence to indicate that title passed other than from Dream Light to Cao. Although Amazon's services were extensive in facilitating the sale, they are no more meaningful to the analysis than are the services provided by UPS Ground, which delivered the headlamp to Cao. Neither Amazon nor UPS Ground was a seller incurring liability for the defective product.

***

At bottom, we conclude that Amazon was not, in this particular transaction, a seller--one who transfers ownership of property for a price--and therefore does not have the liability under Maryland law that sellers of goods have. To be sure, when Amazon sells its own goods on its website, it has the responsibility of a "seller," just as any other retailer, such as Home Depot, would have. But when it provides a website for use by other sellers of products and facilitates those sales under its fulfillment program, it is not a seller, and it does not have the liability of a seller.

***

Diana Gribbon Motz, Circuit Judge, concurring:

I concur fully in the court's opinion rejecting Erie's claims that Amazon is a "seller" under Maryland law. I write separately to emphasize why this may not always be so.

Although at the moment, Maryland law supports the result we reach, much of the State's product liability law was adopted at a time when the American economy operated much differently than it does now. [C] In a traditional supply chain, manufacturers transfer new goods to consumers through multiple links, with each link in the chain--from manufacturer to distributor to retailer--taking title to, and possession of, the product. Because seller liability extends to manufacturers, distributors, and retailers alike, the consumer at the end of this supply chain almost always has some legal recourse in the event of an injury, for some entity in this linear supply chain is clearly a "seller" and available for service of process within the United States.

But Amazon disrupts the traditional supply chain. By design, Amazon's business model cuts out the middlemen between manufacturers and consumers, reducing the friction that might keep foreign (or otherwise judgment-proof) manufacturers from putting dangerous products on the market. Today, Amazon makes up at least 46 percent of the online retail marketplace, selling more than its next twelve online competitors combined. [C] Yet Amazon's business model shields it from traditional products liability whenever state law [like Maryland's] strictly requires the exchange of title for seller liability to attach, in many cases forcing consumers to bear the cost of injuries caused by defective

products (particularly where the formal "seller" of a product fails even to provide a domestic address for service of process).

Indeed, Amazon played an outsized role in the transaction at issue in this case. ***Nearly the only thing Amazon did not do was hold title.

I agree that, under Maryland law as it stands today, that final fact--which is surely no accident--resolves this case in Amazon's favor. But that may not always be so. Indeed, Maryland's highest court has repeatedly emphasized that considerations of public policy may justify a change in the common law when, "in light of changed conditions or increased knowledge, the former rule has become unsound in the circumstances of modern life." ***

A federal court sitting in diversity, however, must proceed with caution. Our charge is to take state law as we find it "or, if necessary, predict how the state's highest court would rule on an unsettled issue." [C] Given the policy-intensive nature of this inquiry, the lack of on-point Maryland precedent, and Amazon's novel business model, I cannot confidently predict that Maryland courts would treat Amazon as a seller under state law. Nor do I believe it appropriate, in the absence of a request from either party, to certify this question to the Court of Appeals of Maryland on this court's own initiative.

Even so, nothing in today's holding prevents Maryland's own courts or legislators from taking up and resolving these difficult, fast-changing, and cutting-edge issues differently. To be sure, Amazon's strategy of removing nearly every products liability case to federal court has complicated this endeavor and arguably stunted the development of state law.* But legislative reforms, non-removable lawsuits, and (in appropriate cases) certification remain available to

consumers and state leaders who seek to confront these uniquely modern challenges.

* * *

* ***At oral argument, counsel for Amazon represented to us that Amazon had not removed such a case only once, and that was because a lack of complete diversity precluded Amazon from doing so. See Stiner v. Amazon.com, Inc., 120 N.E.3d 885 (Ohio Ct. App. 2019). [The Ohio Supreme Court is considering this case on appeal. Ed.]

NOTES AND QUESTIONS

1. Amazon has litigated this issue in several jurisdictions. Because whether Amazon is a seller for strict products liability purposes is a question of state law, the arguments have been similar but the opinions slightly different. The court in the principal case is representative of those that focus on transfer of title as central to the question of whether Amazon is a seller under applicable state law. Amazon wins, because title does not pass--probably "no accident" as the Judge Motz notes.

Other courts have considered title transfer, but also examined whether Amazon had sufficient control to influence the condition of the chattel. See, e.g., Fox v. Amazon.com, Inc., 930 F.3d 415 (6th Cir. 2019) (applying Tennessee law in case arising out of a hoverboard fire). Plaintiff might be able to show that level of control in some cases, but the Fox court found that

Amazon did not have sufficient control in that case because it did not choose to offer the hoverboard for sale, did not set the price of the hoverboard, and did not make any representations about the safety or specifications of the hoverboard on its marketplace.

A panel of the Third Circuit applying Pennsylvania law found that Amazon is a seller even though there was neither passage of title nor control (the product was shipped directly from the seller) based on public policy considerations that had been articulated in an earlier Pennsylvania case against an auction house. Oberdorf v. Amazon.com, Inc., 930 F.3d 136 (3d Cir. 2019), applying the factors from Musser v. Vilsmeier Auction Col., Inc., 522 Pa. 367, 562 A.2d 279 (1989) (whether actor is only available defendant in the marketing chain; whether imposition of strict liability would serve as an incentive to safety; whether the actor is in a better position than the consumer to prevent the circulation of defective products; and whether the actor can distribute the cost of compensating injuries resulting from defects by charging for it in the actor's business). The Third Circuit has granted an en banc hearing in the case and vacated the opinion, so it remains to be seen whether this decision will be overturned, continue as an outlier, or serve as the first example of the changes to which Judge Motz alluded.

2. Judge Motz's concurring opinion suggests that Amazon is using removal as a strategy to slow the changes to the law that she sees may come with the changes in marketing and distribution of products brought about by Amazon. Do you see what she means?

3. In these product liability cases alleging that Amazon is a seller, Amazon also has argued that it is immune under the

Communications Decency Act (CDA). In a section of the opinion not included in the above excerpt of the principal case, the Fourth Circuit found that the CDA provides immunity for claims like misrepresentation or defamation based on the content of speech published by Amazon but not for products liability claims based on the argument that Amazon is a seller in the chain of distribution of the product). Erie Ins. Co. v. Amazon.com, 925 F.3d 135, 140 (4th Cir. 2019). For more on the Communications Decency Act's effect on tort liability, see Chapter 17:3, pages 977-983.

4. Owners. The owner of a product may be subject to liability for negligence, but not for strict liability since the owner receives products from the stream of commerce; the owner does not place the product in the stream of commerce merely by offering it to a guest. Burnett v. Covell, 191 P.3d 985 (Ala. 2008) (plaintiff was visitor to law office who was injured when the chair that he was offered by attorney who owned it collapsed).

5. Manufacturer of Component Parts or Raw Materials. The maker of a component part not subject to further processing or substantial change in the manufacturing process is likely to be subject to strict liability if there is a defect in that part or material. The component maker or raw material supplier also may be liable if he substantially participates in integrating the component or raw material into a defective product. See Buonanno v. Colmar Belting Co., Inc., 733 A.2d 712 (R.I. 1999) (issue for jury whether component part manufacturer's participation in the design of a conveyor belt system was

substantial enough) and Restatement (Third) of Torts: Products Liability § 5(b)(1) (1998) (component is itself defective or its manufacturer substantially participates in the integration of the component into the design of the product).

6. Corporate Acquisitions/Successor Liability. When one company acquires another, how should this affect liability for defective products? Should the acquiring corporation be subject to claims based on products manufactured and sold before the takeover? Generally, the successor corporation is liable only if it agreed to assume liability, the transfer was a fraudulent one, the two corporations merged, or the successor is essentially a continuation of the original company. See Restatement (Third) of Torts: Products Liability § 12 (1998). Some courts have gone further, holding a corporation that acquired substantially all of the assets of another corporation liable if it continues the product line. See, e.g., Mettinger v. Glove Slicing Mach. Co., Inc., 153 N.J. 371, 709 A.2d 779 (1998).

T.H. v. Novartis Pharmaceuticals Corp.

Supreme Court of California, 2017.

4 Cal.5th 145, 407 P.3d 18, 226 Cal.Rptr.3d 336.

CUÉLLAR, J. Under California law, a brand-name drug manufacturer has a duty to warn of known or reasonably knowable adverse effects arising from an individual's use of its drug. [C] In this case, we examine whether--and if so, under what circumstances--a brand-name drug manufacturer may be sued under a theory of "warning label" liability when the warning label for its drug was alleged to be

deficient, but the plaintiffs were injured by exposure to a generic bioequivalent drug bearing the brand-name drug's warning label. ***

Federal law explicitly conveys to the brand-name manufacturer--and only that manufacturer--the responsibility to provide an adequate warning label for both generic terbutaline and its brand-name equivalent, Brethine. As explained in more detail below, only the brand-name drug manufacturer has unilateral authority to modify the drug's label by adding to or strengthening a warning. Generic drug manufacturers are required to follow the brand-name manufacturer's label to the letter. Accordingly, the manufacturer of Brethine controlled both the form and content of the terbutaline warning label. ***

What removes this case from the realm of the ordinary is that plaintiffs' mother was never prescribed Brethine. Rather, she--like many pregnant women experiencing premature labor--was prescribed terbutaline sulfate (terbutaline), the generic bioequivalent drug. Moreover, Novartis stopped manufacturing Brethine and sold all rights to the drug in 2001, six years before plaintiffs' injury. During the period it was the brand-name manufacturer, however, Novartis had the legal duty to disclose Brethine's known and reasonably knowable risks in the drug's warning label. All generic manufacturers, in turn, had a specific

893

legal responsibility regarding the label: to ensure the terbutaline label was identical to the Brethine label. ***

In this case, plaintiffs allege that the terbutaline label failed to warn about the risks to fetal brain development and falsely represented

that the drug was safe for use by pregnant women. They further claim that Novartis's control over the Brethine label rendered it responsible for any deficiencies in the terbutaline label, given that generic drug manufacturers are legally obligated to use the label crafted by the brand-name drug manufacturer. Novartis contends that it owed no duty to plaintiffs to update or maintain an accurate label because (1) it did not manufacture the terbutaline that caused plaintiffs' injuries; and (2) it had divested ownership of Brethine, the brand-name drug, several years before plaintiffs' mother was prescribed terbutaline.

To determine whether to create an exception to a brand-name drug manufacturer's duty to warn, we balance the constellation of factors set out in [a previous California case],...Three of those factors--foreseeability, the certainty of the injury, and the closeness of the connection between the plaintiff and the defendant--address the foreseeability of the relevant injury. [C] The remaining four--moral blame, the policy of preventing future harm, the burden on the defendant and the general public, and the availability of insurance--focus on the public policy justifications for or against carving out an exception to the general duty in this category of cases. Our task is to determine whether a brand-name manufacturer owes a duty of ordinary care to those who may be injured by deficiencies in its warning label, not whether Novartis acted reasonably under the particular circumstances here. ***

In determining whether to create an exception to the general statutory duty of care, the "major" [c], and ultimately "most important," [c] consideration under California law is the foreseeability of physical harm. Novartis could reasonably have foreseen that

deficiencies in its Brethine label could mislead physicians about the safety of terbutaline, Brethine's generic bioequivalent, which was legally required to bear an identical label. ***

Against the public interest in preventing harm, we must balance the defendant's burden and the consequences to the community of imposing a duty of care. The burden that matters, though, is not the cost of compensating individuals for injuries that the defendant has actually and foreseeably caused. As we recently explained in Kesner, [a 2016 California case considering whether employers owed a duty to employees' household members to warn of the risk of asbestos fibers on employees' clothes], "shielding tortfeasors from the full magnitude of their liability for past wrongs is not a proper consideration in determining the existence of a duty. Rather, our duty analysis is forward-looking, and the most relevant burden is the cost to the defendants of upholding, not violating, the duty of ordinary care." [C] Strictly speaking, then, the burden on brand-name drug manufacturers of satisfying a common law duty of care

894

to those who are prescribed the generic version of the drug is zero. Brand-name manufacturers already have a continuing duty to warn of potential risks "as soon as there is reasonable evidence of an association of a serious hazard with a drug; a causal relationship need not have been proved." (21 C.F.R. § 201.80(e).) A brand-name manufacturer's burden to maintain an adequate warning label persists without regard to the happenstance that a given prescription for a brand-name drug may--because of insurance company cost-savings rules [c], or a pharmacist's discretion [c]--be filled with a

generic bioequivalent. And where the brand-name manufacturer provides an adequate label, then it necessarily has also fulfilled its duty with respect to the generic bioequivalent.

Novartis complains that unless the ordinary duty of care is narrowed, the brand-name drug manufacturer would end up an insurer for the entire market. This would occur, Novartis contends, even though the brand-name manufacturer may hold only a small fraction of the combined sales of the brand-name drug and its generic bioequivalent. We disagree.... If instead tort law simply carved out those who were given the generic bioequivalent from obtaining otherwise available compensation for injuries attributable to the brand-name drug manufacturer's defective warning label, then consumers would insist on the brand-name drug over the cheaper bioequivalent, inflating health costs with no corresponding increase in safety and in contradiction to the stated federal policy of making low-cost generic drugs more available....

Novartis nonetheless predicts that unless we carve out an exception for those taking generic drugs, warning label liability will lead to overwarning--i.e., inclusion of a slew of speculative risks in the warning label--which would dilute the effectiveness of any individual warning. But why this would occur is far from clear. To recognize that the duty of care includes all those who would foreseeably be affected by a deficient brand-name drug label merely preserves the brand-name manufacturer's duty as it existed when its patent excluded all competitors from the market. Nor has Novartis identified any surge in overwarning since 2008, when Conte [a California intermediate level appellate case that had] recognized warning label liability. "[T]here is no evidence that any such [overwarning] problem has emerged or

that patients have suffered any detriment, despite the fact that strict liability has long been the rule in California"]. Plaintiffs further suggest that the consequences of overwarning on physicians' prescription decisions is uncertain [c] and, in any event, can be solved through the FDA's power to reject a labeling change it deems unnecessary or counterproductive. ***

We are equally unpersuaded by Novartis's contention that warning label liability would stifle innovation by substantially raising drug costs and chilling the development and marketing of new drugs. The logic buttressing this argument is far from self-evident. Warnings about a product's efficacy or danger may indeed risk diminishing its value to the manufacturer.

895

Less obvious is the manufacturer's response to this predicament. One might just as easily assert that a drug company, after adding a new warning, will be incentivized to develop new and safer alternatives to the drug so that it can recapture the market for treatment of that disease. ***

Novartis (and its amici curiae) rely in substantial part on what they call the "overwhelming" majority of courts [in other jurisdictions] that have declined to recognize warning label liability owed to those who were prescribed a generic version of the drug in reliance on the brand-name drug label. Although the decisions of our sister states and the lower federal courts may be instructive to the extent we find their analysis persuasive, they are neither binding nor controlling on matters of state law. ***

We do not doubt the wisdom of crowds in some settings. But the value of an idea conveyed by or through a crowd depends not on how loudly it is proclaimed or how often it is repeated, but on its underlying merit relative to the specific issue at hand. Despite the impressive case authority Novartis has collected on its behalf, none of it purports to interpret California law. Yet it is California law that we must construe and apply in this case.

In doing so, we find that brand-name drug manufacturers have a duty to use ordinary care in warning about the safety risks of their drugs, regardless of whether the injured party (in reliance on the brand-name manufacturer's warning) was dispensed the brand-name or generic version of the drug. We also conclude that a brand-name manufacturer's sale of the rights to a drug does not, as a matter of law, terminate its liability for injuries foreseeably and proximately caused by deficiencies present in the warning label prior to the sale. We therefore affirm the Court of Appeal.

[The concurring and dissenting opinion is omitted.]

NOTES AND QUESTIONS

1. As the opinion notes, the principal case, which permitted liability against one product manufacturer for harms allegedly caused by another manufacturer's product, is a minority approach. See Wyeth, Inc. v. Weeks, 159 So.3d 649 (Ala. 2014) (becoming first state high court to adopt this liability theory). Less than a year after the Weeks decision, the Alabama Legislature passed a law to overrule Weeks, Ala. Code 1975 § 6-5-530. Forrest Labs. v. Feheley, So.3d, 2019 WL 5485548 (Ala. 2019)

(recognizing that the Legislature reversed the holding of Weeks). Other courts examining this issue in the pharmaceutical context have rejected as unsound so-called "innovator liability." Huck v. Wyeth, Inc., 850 N.W.2d 353 (Iowa 2014) and McNair v. Johnson & Johnson, 241 W.Va. 268, 18 S.E.2d 852 (2018). See also Schwartz et al., Warning: Shifting Liability to Manufacturers of Brand-Name Medicines When the Harm was Allegedly

Caused by Generic Drugs Has Severe Side Effects, 80 Fordham L. Rev. 1835 (2013). Will California start a trend or remain an outlier?

2. Pharmaceutical cases present an interesting dynamic in product liability due to the effect of rulings by the Supreme Court on preemption. (See pages 881 to 883.) Because the Food and Drug Administration (FDA) comprehensively regulates both the approval for sale and accompanying warnings for prescription drugs and medical devices, the issue has arisen whether a plaintiff may assert an inadequate warning state law claim related to an FDA-approved drug. In other words, can a state, through its products liability law, require a different warning from the one approved by the FDA? In 2009, the U.S. Supreme Court answered this question in Wyeth v. Levine, 555 U.S. 555 (2009), finding that Congress's delegation to the FDA of drug labeling oversight did not preempt state product liability claims for failure to warn about a drug's risks because the FDA approved-warning was a floor, not a ceiling.

Then, in 2011, the Court reached the opposite conclusion with respect to FDA-approved generic drugs such as the one plaintiff took in the principal case based on impossibility preemption--generic drug

manufacturers must use the same warning label that was approved by the FDA for the branded drug. PLIVA, Inc. v. Mensing, 564 U.S. 604 (2011). The Supreme Court later made clear that the preemption defense for generic drugs extended to claims based on defective design as well. Mutual Pharm. Co. v. Bartlett, 570 U.S. 472 (2013). (Recall that a 2008 ruling by the Court had found that failure to warn claims related to FDA-approved medical devices were all (branded or generic) expressly preempted because of the language of the Medical Device Amendments Act. See page 881 re Express Preemption.) Thus, the current law governing pharmaceutical product liability is that failure to warn claims against a brand-name drug manufacturer are generally allowed, but claims against a generic drug manufacturer or the manufacturer of an FDA- approved medical device generally are barred. Do you see why plaintiff in the principal case sued Novartis instead of the manufacturer of the generic drug taken? Do you believe this to be a sensible approach or do the distinctions in Congress's liability regime, as interpreted by the Supreme Court, appear somewhat arbitrary?

3. Of course, if the generic drug manufacturer does not promptly update a warning to match the branded manufacturer's amended warning, the cause of action arising from state products liability law is not preempted because it imposes a parallel duty to that imposed by the FDA rather than one in excess of it. In re Reglan Litigation, 226 N.J. 315, 142 A.3d 725 (2016).

4. In 2019, the Supreme Court opened the door more widely for brand-name drug manufacturers to invoke preemption. If the manufacturer can show clear evidence that the FDA would not have adopted the plaintiffs proposed change in the drug's label, then

plaintiffs claim is preempted under impossibility preemption. The determination is one of law, to be made by the trial court judge, not the jury. Merck Sharp & Dohme Corp. v. Albrecht, 139 S.Ct. 1668 (U.S. 2019).

897

(B) Services

Hector v. Cedars-Sinai Medical Ctr.

Court of Appeals of California, 1986.

180 Cal.App.3d 493, 225 Cal.Rptr. 595.

Spencer, J.

Plaintiff Frances J. Hector appeals from an order dismissing her second and third causes of action against defendant following the granting of defendant's motion for partial summary judgment.

Plaintiff filed a complaint against Cedars-Sinai Medical Center (Cedars-Sinai) and American Technology, Inc., alleging personal injury resulting from the implantation of a defective pacemaker. The pacemaker was manufactured by American Technology, Inc., and implanted at Cedars-Sinai by plaintiffs physician, Dr. Eugene Kompaniez.

The complaint contained three causes of action: negligence, strict liability and breach of warranty. Cedars-Sinai moved for partial summary judgment on plaintiffs second and third causes of action, strict liability and breach of warranty, alleging as a matter of law there were no triable issues of fact. The trial court granted the motion. Plaintiff subsequently requested and received dismissal of

the first cause of action, negligence, against Cedars-Sinai. The trial court then issued its order dismissing the second and third causes of action.

Plaintiff contends the trial court erred in finding Cedars-Sinai was exempt from the application of the strict products liability doctrine. For the reasons set forth below, we disagree. ***

On appeal, the court first recalls the origin of the application of strict liability in California: Greenman v. Yuba Power Products, Inc. (1963) 59 Cal.2d 57 [27 Cal.Rptr. 697, 377 P.2d 897] held that " '[a] manufacturer is strictly liable in tort when an article he places on the market, knowing that it is to be used without inspection for defects, proves to have a defect that causes injury to a human being.'" [C] The court then notes the expansion of the doctrine to impose strict liability on others in the chain of distribution, not merely manufacturers. [C] For example, Vandermark v. Ford Motor Co. (1964) 61 Cal.2d 256 [37 Cal.Rptr. 896, 391 P.2d 168] extends strict liability to retailers since they are "engaged in the business of distributing goods to the public" and "are an integral part of the overall producing and marketing enterprise that should bear the cost of injuries resulting from defective products." ***

After surveying the cases which expand the scope of strict liability, the Silverhart [v. Mount Zion Hosp., 20 Cal.App.3d 1022, 98 Cal.Rptr. 187 (1971)] court observes: "A significant common element running through the cases is that each of the defendants against whom the standard of strict liability has been applied played an integral and vital

part in the overall production or marketing enterprise. At the very least the defendant in each case was a link in the chain of getting goods from the manufacturer to the ultimate user or consumer. *** [para.] Plaintiff seeks to extend the doctrine of strict liability to a hospital that furnishes, in connection with the care and treatment of a patient, a product that proves to have a defect that causes injury to the patient. The theory upon which she seeks to predicate such liability is that the hospital is a 'supplier' of such product and, therefore, should be subject to the same standard of liability as any other supplier of articles or products." [C]

The court then examines two key cases in which strict liability has not been applied to the medical profession: "In Magrine v. Krasnica [(1967)] 94 N.J.Super. 228 [227 A.2d 539], affirmed 100 N.J.Super. 223 [241 A.2d 637], and 53 N.J. 259 [250 A.2d 129], the court declined to apply the doctrine of strict liability to a dentist whose drill, with a latent defect, broke while he was working on his patient, causing injury to the patient. The court stated, 'Of ***meaningful significance is a recognition that the essence of the transaction between the retail seller and the consumer relates to the article sold. The seller is in the business of supplying the product to the consumer. It is that, and that alone, for which he is paid. A dentist or a physician offers, and is paid for, his professional services and skill. That is the essence of the relationship between him and his patient.' [C]

The foregoing statement in Magrine was cited with approval in Carmichael v. Reitz [(1971)] 17 Cal.App.3d 958, 979. ***In Carmichael it was held that the doctrine of strict liability did not apply to a doctor who prescribed a drug which produced untoward results

in a patient. In that case we find the following rationale: '[There] is a difference in status or classification between those upon whom the courts have heretofore imposed the doctrine of strict liability and a physician who prescribes an ethical drug to achieve a cure of the disorders for which the patient has sought his professional services. The former act basically as mere conduits to the distribution of the product to the consumer; the latter sells or furnishes his services as a healer of illnesses. The physician's services depend upon his skill and judgment derived from his specialized training, knowledge, experience, and skill. The physician prescribes the medicine in the course of chemotherapy only as a chemical aid or instrument to achieve a cure. A doctor diagnosing and treating a patient normally is not selling either a product or insurance. One of the requisites which the Restatement prescribes for the imposition of strict liability is that 'the seller is engaged in the business of selling such product.'" [Cc]

The Silverhart court was "persuaded that the rationale of Magrine and Carmichael applies with equal force to a hospital in the exercise of its primary function which is to provide medical services. A hospital is not ordinarily engaged in the business of selling any of the products or equipment it uses in providing such services. The essence of the

relationship between a hospital and its patients does not relate essentially to any product or piece of equipment it uses but to the professional services it provides." [C] The court notes, however, that "this principle does not apply where the hospital is engaged in

activities not integrally related to its primary function of providing medical services, such as the situation where the hospital operates a gift shop which sells a defective product." [C] The court concludes the rule of strict liability cannot be applied to defendant hospital. ***

Cases dealing with blood transfusions and products reflect the same considerations when declining to apply strict liability to hospitals, although there is additional statutory justification for treating these items as services rather than sales. Shepard v. Alexian Brothers Hosp. (1973) 33 Cal.App.3d 606 [109 Cal.Rptr. 132] states: "It needs no extended discussion to perceive that a hospital is primarily devoted to the care and healing of the sick. The supplying of blood by the hospital is entirely subordinate to its paramount function of furnishing trained personnel and specialized facilities in an endeavor to restore the patient's health. Providing medicine or supplying blood is simply a chemical aid or instrument utilized to accomplish the objective of cure or treatment. The patient who enters a hospital goes there not to buy medicine or pills, not to purchase bandages, iodine, serum or blood, but to obtain a course of treatment. [Cc] It is also obvious that in the normal commercial transaction contemplated in the strict liability cases the essence of the transaction relates solely to the article sold, the seller is in the business of supplying the product to the consumer, and it is that, and that alone, for which he is paid. [C] The foregoing marked distinctions compel the conclusion that a hospital is not engaged in the business of distributing blood to the public and does not put the blood as a product on the market in order to profit therefrom." [C]

Turning to the facts in the instant case, Howard Allen, M.D., Director of the Cedars-Sinai Cardiac Noninvasive Laboratory states in his

declaration that the specific model and type of pacemaker to be implanted in a patient is specified by the surgeon. The surgeon ordinarily contacts the manufacturer's representative to provide for delivery of the pacemaker to the operating room when it is to be implanted. The pacemaker may be sterilized and ready for implantation when it is delivered to the hospital; the manufacturer's representative or the surgeon may pretest the pacemaker, but the hospital employees do not.

Dr. Allen indicated Cedars-Sinai does not routinely stock pacemakers, nor is it in the business of recommending, selling, distributing or testing pacemakers. The treatment provided by Cedars- Sinai in relation to implantation of pacemakers includes pre- and postoperative care, nursing care, a surgical operating room and technicians. * 'k

The essence of the relationship between hospital and patient is the provision of professional medical services necessary to effect the

900

implantation of the pacemaker--the patient does not enter the hospital merely to purchase a pacemaker but to obtain a course of treatment which includes implantation of a pacemaker. [Cc] As a provider of services rather than a seller of a product, the hospital is not subject to strict liability for a defective product provided to the patient during the course of his or her treatment. ***

Unlike the products sold in a hospital gift shop, for which the hospital is strictly liable ***, the pacemaker provided to the patient is necessary to the patient's medical treatment. While the hospital itself does not use its own medical skill or knowledge in providing its

services in connection with the provision of the pacemaker for the patient, the hospital still is engaged in the process of providing everything necessary to furnish the patient with a course of treatment. In this regard, the hospital's actions concerning the provision of the pacemaker are "integrally related to its primary function of providing medical services." ***

Of equal importance, the policy considerations behind the imposition of strict product liability would not be served by its application here. Strict liability is imposed "to insure that the cost of injuries resulting from defective products are borne by the manufacturers who put such products on the market rather than by the injured persons who are powerless to protect themselves." [Cc] Further, since the defendant profits from the sale of the products, it is in a good strategic position to protect itself by inquiring about or testing the products, promoting safety through pressure on the manufacturer, selling another product which is not defective, or insuring itself and distributing the risk of injury among the public as a cost of doing business. [Cc]

Plaintiff asserts the imposition of strict liability will result in lower costs for health care, since the hospital no longer will be able to charge high fees for processing the paperwork for pacemakers ordered by physicians for their patients. But because the overall charges to the patients must equal the overall expenditures by the hospital, any decrease in the charge on pacemakers necessarily would mean an increase in another charge, and there would be no overall decrease in the cost to the consumer of health care. Moreover, if a hospital is to be considered a seller who places a product on the market and who must bear the cost of injuries

resulting from defective products, it will have to insure itself and distribute the risk of injury among the public as a cost of doing business. This necessarily will result in higher costs for health care.

In the instant case, the hospital does not select the pacemaker for the patient, but the selection is made by the treating physician. Thus, the hospital is in a poor position to protect itself by inquiring about or testing the devices, pressuring the manufacturer to promote product safety or selling a different pacemaker which is not defective. The imposition of strict liability would force the hospital to become involved in the selection process.

901

This might provide added protection to the patient; it might also increase the cost of hospital services. But once the hospital began using its medical knowledge to aid in the selection of a pacemaker, it would be in the position of providing professional medical services, for which it could not be held strictly liable. Thus, there would be no ultimate advantage to putting the hospital in the position of having to take part in the selection process.

For the foregoing reasons, we conclude Cedars-Sinai is not "engaged in the business of selling" pacemakers, but is a provider of medical services which included the provision of the pacemaker implanted in plaintiff. Inasmuch as the hospital is not a seller, it cannot be held strictly liable for injuries to plaintiff caused by defects in the pacemaker. Accordingly, the trial court did not err in granting the motion for partial summary judgment.

The order is affirmed.

NOTES AND QUESTIONS

1. The sales-service distinction grew out of the fact that breach of implied warranty was a basis for early strict liability cases. The distinction is perpetuated by the language of the Uniform Commercial Code, of Restatement (Second) § 402A, and of Restatement (Third) of Torts: Products Liability § 19(b) (1998). Judicial reluctance to extend strict liability to services has two underlying policy rationales. In a service transaction, there is no mass production and distribution, and hence no real ability to spread the risk of loss to consumers. Moreover, service transactions do not involve a group of consumers needing protection from a remote and unknown manufacturer. See La Rossa v. Scientific Design Co., 402 F.2d 937 (3d Cir. 1968) (applying New Jersey law) (refusing to apply strict liability to engineering company involved in construction of chemical plant).

2. Attempts to extend strict liability to services generally have failed. See, e.g., Madison v. American Home Products Corp., 358 S.C. 449, 595 S.E.2d 493 (2004) (pharmacist is not a seller of drug but rather the provider of a service and thus no strict liability). There have been attempts to impose strict liability on health care providers whose patients were injured during the course of their treatment by various products, including a breast implant, hip prosthesis, electro-surgical grounding pad, hypodermic needle, spinal rod, and temporomandibular joint implant. Almost all of these have been unsuccessful. See In re Breast Implant Product Liability Litigation, 331 S.C. 540, 503 S.E.2d 445 (1998) (surgeons not subject to strict liability) (collecting cases).

3. In many situations, as in the principal case, the transaction will have characteristics of both a sale and a service. In those cases, the courts will not apply strict liability if the transaction is predominately a service, with only an incidental transfer of goods. Compare Stafford v. International Harvester Co., 668 F.2d 142 (2d Cir. 1981) (applying New York and Pennsylvania law) (no strict liability because repair of truck steering mechanism was predominately a service transaction) and Hennigan v.

White, 199 Cal.App.4th 395, 130 Cal.Rptr.3d 856 (2011) (same for cosmetologist's application of permanent makeup pigment) with O'Laughlin v. Minnesota Natural Gas Co., 253 N.W.2d 826 (Minn. 1977) (strict liability applied because installation of furnace was service incidental to sale of furnace).

4. Who makes the determination whether something is a product for strict liability purposes? In some jurisdictions, the statute imposing strict liability provides the definition. In others, it is left to the common law. In either case, it is the judge, rather than the jury, who decides whether the situation fits within the statutory definition or is one to which strict liability should apply.

5. Blood, Blood Products, and Human Tissue. Most jurisdictions exempt the providers of blood and blood products and, in most cases, human tissue from strict liability, usually by statute. This protection extends not only to the physician or other healthcare provider, but also to a commercial supplier. See, e.g., Palermo v. LifeLink Foundation, Inc., 152 So.3d 1099 (Miss. 2014) (human tissue supplier provides a service and is not a manufacturer or seller

subject to strict products liability law). Such suppliers are liable only if the plaintiff can prove negligence. The Restatement (Third) of Torts: Products Liability § 19(c) and comment c (1998) exempts human blood and human tissue from its coverage. Is a sperm bank providing a service or selling a product? Of. Donovan v. Idant Labs., 625 F.Supp.2d 256 (E.D. Pa. 2009) (applying New York law) (plaintiffs action fails because if the sperm was defective or did not live up to its warranty, to place plaintiff in the position which she would have occupied had the product not been distributed would be to alter plaintiffs genetic identity so that she would be someone else), aff'd, D.D. v. Idant Labs., 374 Fed.Appx. 319, 323 (3d Cir. 2010) ("she, like any other child, does not have a protected right to be born free of genetic defects").

6. Consider whether the following should be held to be products, thus subjecting the manufacturers, sellers, and other suppliers to strict liability.

Animals. A store that does not usually carry parrots orders one as a favor to one of its employees. The employee's spouse contracts a disease from the parrot. Strict liability? Compare Latham v. Wal-Mart Stores, Inc., 818 S.W.2d 673 (Mo. App. 1991) (animal not a product) with Beyer v. Aquarium Supply Co., 94 Mise.2d 336, 404 N.Y.S.2d 778 (1977) (hamster is a product). See also Blaha v. Stuard, 2002 S.D. 19, 640 N.W.2d 85, 89 (2002) (yellow Labrador dog) (collecting cases) ("living creatures... are by their nature in a constant process of internal development and growth and they are also participants in a constant interaction with the environment around them as part of their development. Thus, living creatures have no fixed nature and cannot be products as a matter of law") and Restatement (Third) of

Torts: Products Liability § 19 comment b (1998) (a living animal sold commercially in a diseased condition is a product).

Charts and Maps. An airplane crashes into the side of Johnson Hill (elevation 2257 feet) on a snowy night, allegedly because the pilot was using an aeronautical chart sold by defendant that did not show Johnson Hill, but

did show a nearby hill with an elevation of only 1991 feet. Strict liability? See Fluor Corp. v. Jeppesen & Co., 170 Cal.App.3d 468, 216 Cal.Rptr. 68 (1985) and Brocklesby v. United States, 767 F.2d 1288 (9th Cir. 1985) (applying Colorado law) (holding that mass production and marketing of aeronautical charts requires defendant to bear the costs of accidents caused by defects in them).

Books and Games. Plaintiff is injured while body surfing in Hawai'i on his honeymoon. Does he have a strict liability action against the publisher of a guide book for failing to warn him that wave and water conditions on a particular beach were dangerous to swimmers? See Birmingham v. Fodor's Travel Publications, Inc., 73 Haw. 359, 833 P.2d 70 (1992) (declining to extend strict liability to the ideas and expressions in a book). Accord, Winter v. G.P. Putnam's Sons, 938 F.2d 1033 (9th Cir. 1991) (applying California law) (plaintiff was poisoned by wild mushrooms collected by referring to the Encyclopedia of Mushrooms); Smith v. Linn, 386 Pa.Super. 392, 563 A.2d 123 (1989) (plaintiff died after following Last Chance Diet book); Watters v. TSR, Inc., 904 F.2d 378 (6th Cir. 1990) (applying Kentucky law) (in case where boy allegedly committed suicide because of influence of game Dungeons and Dragons, court

declined to apply strict liability, noting that the doctrine of strict liability has never been extended to words or pictures). See page 406 for a discussion of proximate cause and First Amendment issues arising out of Watters and similar cases and page 1186 for a discussion of possible misrepresentation claims. See also Restatement (Third) of Torts: Products Liability § 19 comment d (1998) ("Although a tangible medium such as a book, itself clearly a product, delivers the information, the plaintiffs grievance in such cases is with the information, not with the tangible medium.") What if the plaintiff developed a rash while reading the book because the ink used was contaminated with a toxic substance? Cf. James v. Meow Media, Inc., 300 F.3d 683, 701 (6th Cir. 2002) (applying Kentucky law) ("Certainly if a video cassette exploded and injured its user, we would hold it a 'product' and its producer strictly liable for the user's physical damages.") (dicta).

Computer App. Ex-boyfriend created a fake Grindr profile to impersonate plaintiff and communicate with other users, directing over a dozen people to plaintiffs home and workplace for assignations with plaintiff. Plaintiff claimed that the app is defectively designed and manufactured because it lacks safety features to prevent impersonating profiles and other dangerous conduct. Is the app a product? Cf. Herrick v. Grindr LLC, 765 Fed.Appx. 586 (2d Cir. 2019) (question not answered because court found the federal Communications Decency Act provided immunity to Grindr).

Artificial Intelligence. Plaintiffs son was murdered, allegedly by someone who had been granted pretrial release from jail just days earlier after the state court used the Public Safety Assessment algorithm to estimate the criminal defendant's risk of fleeing or

endangering the community. Plaintiff sued the Foundation that had developed the assessment tool. Applying New Jersey product liability law, the Third Circuit upheld the trial court's ruling that the algorithm was not a product

904

because it was not distributed commercially and was not "tangible personal property nor remotely analogous to it." Rodgers v. Christie, 795 F.3d 878, 880 (3d Cir. 2020).

Electricity. Plaintiff is injured by electricity supplied by defendant. Strict liability? See Schriner v. Pennsylvania Power & Light Co., 348 Pa.Super. 177, 501 A.2d 1128 (1985) (electricity is a service while passing through transmission lines but becomes a product after it passes through the meter to the user's abode) and Stein v. Southern California Edison, 7 Cal.App.4th 565, 8 Cal.Rptr.2d 907 (1992) (strict liability applied to defendant whose employees' actions while repairing a transformer caused a high-voltage arc to enter plaintiffs home, exploding their meter, and setting their house on fire). See also Restatement (Third) of Torts: Products Liability § 19 comment d (1998).

Naval Warship. Heirs of a sailor who died of complications related to mesothelioma after being exposed to asbestos pipe insulation aboard a naval ship brought a products liability action against the shipbuilder. Is a custom- built naval warship a "product" for purposes of a products-liability claim based on alleged defects in materials originally installed on the ship? The Ninth Circuit, applying maritime law, looked to Restatement (Third) of Torts: Products Liability § 19(a) (1998) for guidance: "tangible personal property distributed

commercially for use or consumption" and decided it was not. McIndoe v. Huntington Ingalls Inc., 817 F.3d 1170 (9th Cir. 2016) (emphasis added).

7. Endorsers, Licensors, and Franchisors. Courts may extend strict liability to a trademark licensor or franchiser, particularly if the licensor retains the right to control the quality of the product on which the trademark is used. The few courts that have considered the liability of endorsers of products have not imposed strict liability. See, e.g., Hanberry v. Hearst Corp., 276 Cal.App.2d 680, 81 Cal.Rptr. 519 (1969) (consumer's reliance on Good Housekeeping's "seal of approval" may give rise to liability for negligence or negligent misrepresentation, but not strict liability).

8. Organizations That Set Standards. What about an organization that sets voluntary standards that have significant influence on its members' practices? Should the organization be liable if the standards are set too low? Should strict liability apply to the organization? Cf. Snyder v. American Ass'n. of Blood Banks, 144 N.J. 269, 676 A.2d 1036 (1996) (holding association of blood banks and blood-banking professionals liable for negligence but not strict liability in the formulation of standards for screening blood donations for HIV).

9. Even if strict liability does not apply, one who renders a service to another is under a duty to exercise reasonable care in doing so and is liable for any negligence to anyone who may foreseeably be expected to be injured. If cases alleging design defects and failure to warn are based on a risk-utility analysis, how important is the classification of something as a product for the purpose of imposing

strict liability? See Restatement (Third) of Torts: Products Liability § 19 comment a (1998) (suggesting that the distinction is less important in design and warnings cases).

905

10. Recall that some services may be considered "abnormally dangerous activities." See Chapter 14, pages 791-809. In this area, the two roads of strict liability come together.

(C) Harm Other than Personal Injury

1. Economic Loss Resulting from Personal Injury. Lost wages and medical expenses are common forms of economic loss that result from personal injury to plaintiff and are recoverable, along with plaintiffs other losses, in a strict liability action. Most jurisdictions also permit loss of consortium claims based on personal injury in products liability cases. See Restatement (Third) of Torts: Products Liability § 21 comments b and c (1998).

2. Economic Loss Without Personal Injury or Property Damage. Because product liability law was developed largely to provide compensation to plaintiffs who suffered personal injury or property damage, its applicability to other types of harm is limited. An action in strict liability does not lie when the product itself simply did not perform as expected. See, e.g., Seely v. White Motor Co., 63 Cal.2d 9, 403 P.2d 145 (1965) (Traynor, C.J.) (truck "galloped" and did not perform properly). Chief Justice Traynor explained, however, that if there was an express warranty (including a relevant misrepresentation regarding the quality of the product), a tort action might be maintained on that basis. The Seely case has been

followed by a majority of courts, including New Jersey, which originally had rejected it. Alloway v. General Marine Industries, 149 N.J. 620, 695 A.2d 264 (1997). The courts of many jurisdictions have been strongly influenced by the U.S. Supreme Court opinion in an admiralty case, East River S.S. Corp. v. Transamerica Delaval, Inc., 476 U.S. 858 (1986). See Chapter 8, Section 3, Pure Economic Loss.

The issue of what constitutes a personal injury also may be implicated by a case alleging a defective product. Consider a product liability claim by a condom user against the condom manufacturer seeking recovery of the costs of an unwanted pregnancy. Did the product simply fail to perform as expected or was there physical harm for which the manufacturer should be strictly liable? Cf. Miceli v. Ansell, Inc., 23 F.Supp.2d 929 (N.D. Ind. 1998) (finding that Indiana would consider pregnancy to be a "harm" for the purposes of its product liability statute).

3. A few courts have recognized an exception to the rule that excludes recovery for pure economic loss when the alleged defect creates an "unreasonable risk" of injury to persons, even though no one actually was injured. Under those circumstances, economic losses resulting from damage to the product itself may be compensable. See, e.g., Vulcan Materials Co. v. Driltech, Inc., 251 Ga. 383, 306 S.E.2d 253 (1983) (permitting compensation for defective product itself if it fails in a sudden and calamitous manner). But see Lincoln General Ins. Co. v. Detroit Diesel Corp., 293 S.W.3d 487 (Tenn. 2009) (fire in engine of bus caused damage to bus only; joining majority of jurisdictions in declining to

recognize exception for product failure that is part of sudden, calamitous event) and Dobrovolny v. Ford Motor Co., 281 Neb. 86, 793 N.W.2d 445 (2011) (whether the damage to vehicle occurs gradually over time or through an abrupt, accident-like event, purchaser is confined to recovery in contract if the loss is purely economic). Do you think this distinction should make a difference in whether a tort claim is available?

4. Damage to Property. Restatement (Second) of Torts § 402A covers damage to property as well as persons and most courts have agreed with this extension of strict liability beyond personal injury. See, e.g., Morrow v. Caloric Appliance Corp., 372 S.W.2d 41 (Mo. 1963) (defective stove set fire to a house). When the product itself is destroyed by a defect in it most courts treat this as an economic loss not recoverable in tort. Sapp v. Ford Motor Co., 386 S.C. 143, 687 S.E.2d 47 (2009) (alleged defect in cruise control switch caused fire that damaged only truck itself; no tort liability under economic loss rule).

5. When the defective product is used in the process of manufacturing another product and that other product is ruined as a result, this may be treated as damage to property and recovery allowed under strict liability. Suppose the owner of a building seeks to recover from asbestos sellers for the costs of abating asbestos insulation from its building. Is this merely the failure of the product to provide safe heat-retention or has other property (the building) been damaged by the asbestos product? See Restatement (Third) of Torts: Products Liability § 21 comment e (1998) (property damage).

See also Dean v. Barrett Homes, Inc., 204 N.J. 286, 8 A.3d 766 (2010) (holding that home owners did not have products liability action for cost of replacing defective synthetic stucco because of the economic loss rule, but could recover for damage caused to their homes by the allegedly defective stucco because that was damage to property) and CHMM, LLC v. Freeman Marine Equipment, Inc., 791 F.3d 1059 (9th Cir. 2015) (admiralty law) (items added to interior of yacht by owner prior to delivery of yacht from yacht manufacturer's shipyard were "other property" under the economic loss doctrine, and thus the doctrine did not bar owner's action based on water damage to property allegedly caused by defective (leaking) door installed by yacht manufacturer).

6. When a retailer suffers economic loss through a tort suit brought against him by a party injured by the product, it usually can shift that loss to the manufacturer by way of an indemnity action. What if the driver of an allegedly defective car seeks reimbursement from the manufacturer for the damages he paid to an injured passenger? Should strict liability apply to that indemnity claim? Cf. Dixon v. Chicago and North Western Transportation Co., 151 III.2d 108, 601 N.E.2d 704 (1992) (indemnity not allowed under Illinois law because plaintiff driver was not free of fault in accident). When the manufacturer has sold a retailer bad food and this in turn has driven his customers away, there is a well-aged

precedent that would allow recovery for damage to reputation and lost profits. See Mazetti v. Armour & Co., 75 Wash. 622, 135 P. 633 (1913).

6. Legislation and Products Liability

1. Uniform Commercial Code. Article 2 of the Uniform Commercial Code, which governs breach of warranty for the sale of goods, has been enacted in all states except Louisiana. Common law and statutory breach of warranty have had an important influence on the development of the law of product liability.

2. Restatement (Second) of Torts § 402A. Beginning in the 1960s, statutes directly applicable to product liability law were enacted in some jurisdictions. For example, some states enacted Restatement (Second) of Torts § 402A through legislation while it was being adopted judicially in most jurisdictions.

3. Tort Reform: The Legislature Enters the Tort Law Arena. Beginning in the 1970s, a number of states enacted comprehensive statutory schemes to decrease the size and number of recoveries against manufacturers and sellers. Many did so as a result of dramatic increases in product liability insurance rates brought about by jurisdictions embracing the doctrine of strict liability. The statutory changes were principally in the areas of statutes of limitation and repose, the significance of state of the art evidence, the effect of alteration or misuse of the product, and the limitation of strict liability against nonmanufacturing sellers. Do these changes to the common law seem fair to you?

4. Uniform Product Liability Act. The same pressures that led state legislators to change product liability law at the state level also affected the Federal government. In 1976, the Ford Administration established a Federal Interagency Task Force on product liability to study the problem. Chaired by Professor Victor Schwartz, the Task

Force continued into the Carter Administration and issued a Final Report in 1977. One of the conclusions of that Final Report was that product liability law would be more stable if, as under the Uniform Commercial Code, there was less variation in the laws of the states. Thus, the Uniform Product Liability Act (UPLA) was offered as a model for state enactment. Some legislatures have enacted portions of UPLA, modifying its contents. Thus, even in these few states, product liability law has retained its variety. Some courts have used UPLA as a basis for changes in common law. See Prentis v. Yale Mfg. Co., page 845. UPLA also was a predicate for the basic structure of Restatement (Third) of Torts: Products Liability (1998) in taking a functional, as compared to theoretical, approach to the subject.

5. Tort Reform in the State Legislatures and Congress. The next two decades saw a shift in approach away from product liability-specific statutes to more broadly applicable tort reform legislation.

908

Those changes were principally in the areas of caps on damages, modification or elimination of joint and several liability, changes in the standards for awarding punitive damages, changes in the collateral source rule, and regulation of attorney contingency fees. In some states, the reform legislation was limited to particular categories of tort liability such as product liability or medical malpractice.

Because many businesses and insurers concluded that the product liability problem could not be solved on a state by state basis, federal legislation was introduced that would preempt state tort law in a number of areas. A predicate for federal action is that product liability

insurance rates are set on a nationwide, not a state-by-state, basis. On average, the vast majority of goods manufactured in a particular state are shipped beyond its borders. Therefore, legislative product liability action in one state can only provide predictability for a limited number of cases for businesses in that state. Proponents of federal legislation argued that product manufacturers need uniform rules to do business in interstate commerce so that rights and obligations with respect to the same product would not vary simply because a person was injured in one state or another. While many in Congress agreed that there was a clear basis for federal product liability law, there was considerable controversy about the substance of the proposed legislation. Moreover, with each session of Congress, the focus of the legislation, like the reform movement in the states, drifted away from the core of product liability law--establishing the standard for design defects, manufacturing defects, and defects based on failure to warn--into areas of general tort law such as whether there should be limits or caps on punitive damages and whether the doctrine of joint and several liability should be limited.

When the Republicans took over Congress in 1994, an effort was made to expand draft legislation dealing with punitive damages and joint and several liability beyond product liability to all tort claims that arose in interstate commerce. Democratic Members found it ironic that Republicans and business groups, usually proponents of states' rights, were calling for broad-based federal tort reform, and the effort was doomed. Those who supported product liability reform returned to the concept of a bill that would address only product liability claims. After vetoing a version of a product liability bill, the Clinton Administration indicated that it could support federal product liability

legislation that did not contain limits on punitive damages or joint and several liability. At that point, proponents of the legislation differed as to whether this limited legislation was "worth the effort." With the proponents divided, and the opponents united, the movement for general federal product liability reform met its end. No general federal product liability legislation has been considered since 1998 and it is unlikely to arise as an issue in the foreseeable future.

Limited liability reforms have had more success. For example, the General Aviation Revitalization Act, which applies an 18-year statute of

repose for general aviation products, was enacted into law in 1994. See Schwartz and Lorber, The General Aviation Revitalization Act: How Rational Civil Justice Reform Revitalized an Industry, 67 J. Air L. & Com. 1269 (2002). In 1998, Congress enacted the Biomaterials Assurance Access Act, which limits the liability of suppliers of biomaterials used in medical implants. While state and local legislative efforts have brought some harmony to product liability law among states, a wide variance still exists. This is particularly the case with respect to rules related to design liability.

6. Tort Reform in the 21st Century. State legislatures have remained active in considering and enacting tort reform during the 21st Century. This effort has included very specific product liability reforms as well as more broadly applicable laws that apply to any tort action. Some legislative efforts to limit liability have been struck down by state supreme courts pursuant to provisions of their state constitutions. Such rulings implicate a broader debate about who will

make America's tort law, courts or legislatures. Those arguing for more legislative intervention contend that legislators can take a more comprehensive view of a subject--holding hearings to obtain more information and broader prospective views--than a court that is focused on the limited factual situation and the arguments of two adversarial parties in a particular case. Those who contend that courts should develop product liability law point to decisions such as those set forth in this case book. They argue that judges are best suited to handle nuances of law that legislators may miss and that incremental change can reduce unintended consequences. This debate about who should make product liability law and general tort law--courts or legislatures--will continue throughout your practice. See Chapter 23, Torts in the Age of Statutes.

In the 21st Century, you will be the consumers and manufacturers of products, the attorneys who represent them in litigation and counsel them in risk prevention, and the judges, regulators, and legislators who make the law relating to product liability. How will you change the law?

[BLANK PAGE]

CHAPTER 16 NUISANCE

The term "nuisance" is surrounded by a great deal of legal confusion. The word itself, which is taken over from the French, means nothing more than harm, annoyance or inconvenience. Courts customarily speak of "a" nuisance as if it were a type of conduct on the part of the defendant or a condition created by him. Actually, it is neither. The word refers to a kind of interest invaded, a type of damage or harm. Nuisance is a field of liability rather than a particular tort.

Nuisance covers two fields of liability--public nuisance and private nuisance. The two fields represent distinct kinds of damage or harm. The two have little in common and are unrelated except as each involves the basic idea of causing harm or inconvenience to someone, which is common to all torts. It is only by the accident of historical development that the same word is used to cover the two; but the use of the common term has led to the application of much the same rules to both.

Public Nuisance. The earliest cases involved purprestures, encroachments upon the royal domain or the public highway. See Restatement (Second) of Torts § 821B comment a. An obstruction of the public highway is still a typical public nuisance. The remedy was gradually extended to cover other miscellaneous invasions of the public right. The remedy was exclusively criminal until the 16th Century, when it was first recognized that a private individual who had suffered special injury could maintain a tort action.

In the United States, public nuisances are now very largely covered by statute. There are many types of specific criminal provisions covering such things as black currant plants, buildings where narcotics are sold, or waters where mosquitoes breed. In addition, many states have broad criminal statutes covering "public nuisances" without attempting to define them, which are construed to include anything that would have been a public nuisance at common law.

The Restatement (Second) of Torts § 82IB defines a public nuisance as "an unreasonable interference with a right common to the general public," and then provides that "circumstances that may sustain a holding that an interference with a public right is unreasonable include the following: (a) whether the conduct involves a substantial interference with the public health, the public safety, the public peace, the public comfort or the public convenience, or (b) whether the conduct is proscribed by a statute, ordinance or administrative regulation, or (c) whether the conduct is of a continuing nature or has produced a permanent or long-lasting effect and, to the actor's knowledge, has a substantial detrimental effect upon the public right."

912

Private Nuisance. This form of the tort action developed as an unreasonable interference with the use or enjoyment of a property interest in land. It is essentially a tort to an owner or possessor of land. It is distinguished from trespass, in that it did not require a physical entry upon the plaintiffs premises, although it might accompany a trespass. The Minnesota Supreme Court recently

provided a detailed discussion relating the differences between the torts of nuisance and trespass. See Johnson v. Paynesville Farmers Union Coop. Oil Co., 817 N.W.2d 693 (Minn. 2012) (holding farmer's claim that pesticide drift caused interference with the use and enjoyment of land for organic production stated a claim for private nuisance, but did not interfere with his right of exclusive possession to support an action in trespass).

The interference might be with the physical condition of the premises, as by blasting or vibration that damages a house; with the health of the occupant, as by unsanitary conditions on adjoining property; with his comfort or convenience, as by smoke, odors, noise or heat; or merely with his peace of mind, as in the case of a nearby bawdy house or funeral parlor.

Particular conduct may result in both a public and a private nuisance. The plaintiff may then proceed on either ground, or both, to the extent that she can make out her cause of action.

1. What Constitutes an Action in Nuisance?

Philadelphia Electric Company v. Hercules, Inc.

United States Court of Appeals, Third Circuit, 1985.

762 F.2d 303.

A. Leon Higginbotham, Jr., Circuit Judge. This is an appeal from a final judgment of the district court in favor of Philadelphia Electric Company ("PECO") and against Hercules, Inc. ("Hercules") in the

amount of $394,910.14, and further ordering Hercules to take all appropriate action to eliminate pollution on a property owned by PECO in Chester, Pennsylvania. The case was tried to a jury on theories of public and private nuisance. For the reasons set forth in the opinion that follows, we will reverse the judgment against Hercules on PECO's claims, and vacate the injunction. ***

[Prior to October 1971, the property in question, "the Chester site," had been owned by the Pennsylvania Industrial Chemical Corporation ("PICCO"), where it operated a hydrocarbon resin manufacturing plant. PICCO sold the facility to "Gould" in 1971. Gould sold the site to PECO in 1974. PECO had owned an adjoining site and had full opportunity to inspect and investigate the condition of the property. Subsequently Hercules, Inc. became the successor to PICCO, expressly assuming all debts, obligations and liabilities. This action is therefore held properly brought against Hercules. The court treats the relationship between

913

defendant Hercules and plaintiff PECO as "that of a vendor and remote vendee of land." It holds that the sale of the site was subject to the rule of caveat emptor, being between two commercial corporations with no misrepresentation or concealment and full opportunity to inspect.

In 1980 the Pennsylvania Department of Environmental Resources ("DER") discovered that resinous materials similar to those once produced by PICCO were seeping into the Delaware River and directed PECO to develop and act on a plan to eliminate the situation. In all PECO spent or lost almost $400,000.

PECO brought suit against Hercules for the damages and an injunction requiring defendant to abate any further pollution. The district court granted both. The suit is based on private nuisance, public nuisance and indemnity.]

Restatement (Second) of Torts § 821D defines a "private nuisance" as "a nontrespassory invasion of another's interest in the private use and enjoyment of land." The briefs and arguments, as well as the district court's opinion, 587 F. Supp. at 152-54, give much attention to the questions of whether the condition created by Hercules on the Chester site amounted to a nuisance, and whether Hercules remains liable for the nuisance even after vacating the land. For the purposes of our decision, we may assume that Hercules created a nuisance, and that it remains liable for this condition. See Restatement (Second) of Torts § 840A. The crucial and difficult question for us is to whom Hercules may be liable.

The parties have cited no case from Pennsylvania or any other jurisdiction, and we have found none, that permits a purchaser of real property to recover from the seller on a private nuisance theory for conditions existing on the very land transferred, and thereby to circumvent limitations on vendor liability inherent in the rule of caveat emptor. In a somewhat analogous circumstance, courts have not permitted tenants to circumvent traditional limitations on the liability of lessors by the expedient of casting their cause of action for defective conditions existing on premises (over which they have assumed control) as one for private nuisance. [Cc] In Harris v. Lewistown Trust Co., 326 Pa. 145, 191 A. 34 (1937), [c] the Supreme Court of Pennsylvania held that the doctrine that a landlord not in possession may be liable for injuries resulting from a

"condition amounting to a nuisance" is confined to "the owners or occupants of near-by property, persons temporarily on such property, or persons on a neighboring highway or other places." [6] [C] Recovery on this theory was not available to tenants or their invitees: "A breach of duty owed to one class of persons cannot create a cause of action in favor of a person not within the class. A plaintiff must show that as to him there was a breach of duty." [C] 326 Pa. at 152, 191 A. at 38.

* * *

[6] Cf. Restatement (Second) of Torts § 840A and comment c thereto ("If the vendor or lessor has himself created on the land a condition that results in a nuisance, ***his responsibility toward those outside of his land is such that he is not free to terminate his liability to them ***by passing the land itself on to a third person.") (emphasis added).

914

Similarly, under the doctrine of caveat emptor Hercules owed only a limited duty to Gould and, in turn, to PECO. PECO concedes that this duty was not violated. PECO cannot recover in private nuisance for the violation of a duty Hercules may have owed to others--namely, its neighbors.

We believe that this result is consonant with the historical role of private nuisance law as a means of efficiently resolving conflicts between neighboring, contemporaneous land uses. ***Neighbors, unlike the purchasers of the land upon which a nuisance exists, have no opportunity to protect themselves through inspection and negotiation. The record shows that PECO acted as a sophisticated

and responsible purchaser--inquiring into the past use of the Chester site, and inspecting it carefully. We find it inconceivable that the price it offered Gould did not reflect the possibility of environmental risks, even if the exact condition giving rise to this suit was not discovered. ***

Where, as here, the rule of caveat emptor applies, allowing a vendee a cause of action for private nuisance for conditions existing on the land transferred--where there has been no fraudulent concealment--would in effect negate the market's allocations of resources and risks, and subject vendors who may have originally sold their land at appropriately discounted prices to unbargained-for liability to remote vendees. ***Such an extension of common law doctrine is particularly hazardous in an area, such as environmental pollution, where Congress and the state legislatures are actively seeking to achieve a socially acceptable definition of rights and liabilities. We conclude that PECO did not have a cause of action against Hercules sounding in private nuisance.

The doctrine of public nuisance protects interests quite different from those implicated in actions for private nuisance, and PECO's claim for public nuisance requires separate consideration. Whereas private nuisance requires an invasion of another's interest in the private use and enjoyment of land, a public nuisance is "an unreasonable interference with a right common to the general public." Restatement (Second) of Torts § 821B(1). An action for public nuisance may lie even though neither the plaintiff nor the defendant acts in the exercise of private property rights. [11] As William Prosser once wrote: "There are, then, two and only two kinds of nuisance, which are quite unrelated except in the vague general way that each of them causes

inconvenience to someone, and in the common name, which naturally has led the courts to apply to the two some of the same substantive rules of law. A private nuisance is narrowly restricted to the invasion of interests in the use and enjoyment of land. It is only a tort, and the remedy for it lies exclusively with the individual whose rights have been disturbed.

* * *

[11] Thus, commercial fishermen and clam diggers operating in public waters can recover on a public nuisance theory for harm to the waters and marine life caused by oil discharged from a tanker in transit. See Burgess v. M/V Tamano, 370 F. Supp. 247 (D.Me. 1973).

915

A public nuisance is a species of catch-all low-grade criminal offense, consisting of an interference with the rights of the community at large, which may include anything from the blocking of a highway to a gaming-house or indecent exposure. Although as in the case of other crimes, the normal remedy is in the hands of the state, a public nuisance may also be a private one, when it interferes with private land. The seeds of confusion were sown when courts began to hold that a tort action would lie even for a purely public nuisance if the plaintiff had suffered 'particular damage.'" Prosser, Private Action for Public Nuisance, 52 Va. L. Rev. 997, 999 (1966).

[In] analyzing the public nuisance claim, we are not concerned with the happenstance that PECO now occupies the very land PICCO occupied when it allegedly created the condition that has polluted the Delaware River waters, or that the continuing source of that pollution is located on that land. The question before us is whether PECO has

standing to bring an individual action for damages or injunctive relief for interference with a public right.

Restatement (Second) of Torts § 821C(1) provides: "In order to recover damages in an individual action for a public nuisance, one must have suffered harm of a kind different from that suffered by other members of the public exercising the right common to the general public that was the subject of interference."

The same requirements apply to individual plaintiffs seeking injunctive relief. Restatement (Second) of Torts § 821C(2); Prosser, supra, 52 Va. L. Rev. at 1006. PECO argues that the expense it incurred in cleaning up the offending condition constituted the harm requisite for standing to sue for public nuisance. We disagree. Though pecuniary harm certainly may be harm of a different kind from that suffered by the general public, see Restatement (Second) of Torts § 821C comment h, [14] we find in this case no allegation or evidence that PECO suffered this harm "exercising the right common to the general public that was the subject of interference." The public right that was interfered with was the right to "pure water". [C] PECO does not allege that it used the waters of the Delaware River itself, or that it was directly harmed in any way by the pollution of those waters. Thus, this is not a case "where an established business made commercial use of the public right with which the defendant interfered." [C] If PECO--as a riparian landowner--had suffered damage to its land or its operations as a result of the pollution of the Delaware, it would possibly have a claim for public nuisance. But the condition of the Chester site was not the result of the pollution, it was the cause of it.

* * *

[14] It may be that under Pennsylvania law harm of a magnitude greater than that suffered by the general public is sufficient to confer standing. See Pennsylvania Society for the Prevention of Cruelty to Animals v. Bravo Enterprises, 428 Pa. 350, 360, 237 A.2d 342, 348 (1968). This distinction is not, however, important in the instant case. As the discussion that follows points out, even if PECO has suffered a harm both different in kind and greater in degree than that suffered by the general public, it has not suffered that harm in the exercise of a right common to the general public. Cf. Burgess v. MA [7] Tamano, 370 F. Supp. 247 (D.Me.1973) (businesses operating on beach did not have standing to sue for pollution of swimming waters, even though they lost customers as a result).

916

DER required PECO, as owner of the Chester site, to remove the sources of the pollution. PECO has been specially harmed only in the exercise of its private property rights over the Chester site. PECO has suffered no "particular damage" in the exercise of a right common to the general public, and it lacks standing to sue for public nuisance.

***

We emphasize that our decision today should not be interpreted as standing for the general proposition that a party that contaminates land, or the successors to its assets, can escape liability by the expedient of selling the land. To the contrary, it would seem that there are many avenues by which such a party may be held accountable. [20] We hold only that in this case the purchaser of that

land, PECO--though we recognize that it acted as a responsible corporate citizen--had no cause of action against the vendor's successor, Hercules, for private nuisance, public nuisance, or common law indemnity.

* * *

[20] For example, Hercules could be liable to neighboring landowners in private nuisance, or to users of Delaware River waters in public nuisance. DER or the federal Environmental Protection Agency may be able to proceed directly against Hercules on statutory or public nuisance theories.

For the foregoing reasons, the injunction requiring Hercules to clean up the Chester site will be vacated, and the judgment of the district court on PECO's claims against Hercules will be reversed.

NOTES AND QUESTIONS

1. To sustain an action for public nuisance, a plaintiff must suffer an injury that is different in kind from that suffered by the general public. See Restatement (Third) of Torts: Liability for Economic Harm § 8 (2020) ("An actor whose wrongful conduct harms or obstructs a public resource or public property is subject to liability for resulting economic loss if the claimant's losses are distinct in kind from those suffered by members of the affected community in general"). Courts have struggled to distinguish between differences in kind and differences in degree. Consider, however, the following:

A. Defendant obstructs a public highway, forcing travelers to detour. Plaintiff, on his way to work, has to travel over the highway twice a day. Cf. Borton v. Mangus, 93 Kan. 719, 145 P. 835 (1915).

B. The same facts, except that plaintiff drives into the unguarded and unlighted obstruction and sustains personal injury. Cf. Leahan v. Cochran, 178 Mass. 566, 60 N.E. 382 (1901).

C. The same facts, except that the obstructed highway cuts off ingress and egress to plaintiffs land. Pilgrim Plywood Co. v. Melendy, 110 Vt. 12, 1 A.2d 700 (1938). Is it enough that there is serious interference? Gates v. Bloomfield, 243 Iowa 671, 53 N.W.2d 279 (1952).

917

D. Noise and smoke from defendant's factory amounting to a public nuisance also interfere seriously with plaintiffs use and enjoyment of his land. Soap Corp, of America v. Reynolds, 178 F.2d 503 (5th Cir. 1949); Morris v. Haledon, 24 N.J.Super. 171, 93 A.2d 781 (1952).

2. Why should it be necessary to have an injury different in kind from that of the general public? Is it because the harm suffered by the public is so trivial? Or because there would be such a flood of suits? Why not allow a class action? Or permit one member of the public to sue for an injunction that would eliminate the nuisance? In most states the district attorney or other official may sue for abatement. See, e.g., State ex rel. Swann v. Pack, 527 S.W.2d 99 (Tenn. 1975), cert, denied, 424 U.S. 954 (1976) (snake-handling); Boyles v. City of Topeka, 271 Kan. 69, 21 P.3d 974 (2001) (unsightly trash heap).

3. The Expanding Realm of Public Nuisance. Recent actions have expanded into areas well beyond those contemplated as within the bailiwick of public nuisance. For example, actions have been brought in all of the following areas:

A. Street Gang Violence. In People ex rel. Gallo v. Acuna, 14 Cal. 4th 1090, 60 Cal.Rptr. 2d 277, 929 P.2d 596 (1997), the city of San Jose sued to enjoin street gang members from conducting violent and intimidating gang-like activities. The California Supreme Court found that citizens had suffered particular damage through activities that constituted a public nuisance.

B. Handgun Liability. Cities have brought public nuisance actions against the handgun industry seeking reimbursement for police, emergency, and medical costs stemming from accidental shootings and homicides. Victims who suffered either physical trauma resulting from an assault with a gun or emotional distress upon experiencing or witnessing the events have brought public nuisance claims against gun manufacturers for the manufacture, marketing, and distribution of firearms. Ileto v. Glock, Inc., 349 F.3d 1191 (9th Cir. 2003) (reversing the district court's dismissal of the victims' negligence and public nuisance claims), aff'd in Ileto v. Glock, Inc., 565 F.3d 1126 (9th Cir. 2009); but see City of Philadelphia v. Berretta U.S.A. Corp., 277 F.3d 415 (3d Cir. 2002) (holding that even though illegal use of firearms may constitute a public nuisance, the defendant was not liable because the handguns were no longer under its control). Suits such as Glock motivated Congress to pass the Protection of Lawful Commerce in Arms Act (PLCAA), 15 U.S.C. §§ 7901 et seq., which required the dismissal of any pending or future claims against federally licensed gun manufacturers and distributors based upon a general tort theory of liability. See City of New York v. Beretta U.S.A. Corp., 524 F.3d 384, 388--89 (2d Cir. 2008) (dismissing nuisance claims brought under New York's criminal nuisance statute). But see Soto v. Bushmaster Firearms Int'l,

LLC, 331 Conn. 53, 202 A.3d 262 (2019), cert, denied sub nom. Remington Arms Co. v. Soto, U.S.

(2019) (interpreting plaintiffs' allegations that defendant gun sellers sought to expand the market for their assault weapons through advertising campaigns that encouraged consumers to use the weapons to launch

offensive assaults against their perceived enemies as outside PLCAA's shield).

C. Methamphetamine Production. In Ashley County, Ark. v. Pfizer, 552 F.3d 659 (8th Cir. 2009), the court rejected the county's public nuisance claim against pharmaceutical manufacturers premised on the use of their products in methamphetamine production.

D. Prostitution. The District of Columbia has enacted the Drug or Prostitution-Related Nuisance Abatement Act, D.C. Code § 42-3101, which allows action to be brought where property is used to facilitate prostitution and where such activity adversely impacts the community. This Act supported plaintiffs' action in Thanos v. District of Columbia, 109 A.3d 1084, 1088 (D.C. 2014), where investigators and law enforcement uncovered a plethora of evidence proving the existence of prostitution-related activity. For example, the court considered the fact that undercover law enforcement officers had arrested numerous individuals associated with property for "criminal conduct relating to prostitution." Id. at 1090. Similarly, the Red Light Abatement Act, Cal Pen Code § 11225, has been used in California to shut down buildings used for prostitution and human trafficking. See Board of Supervisors v. Simpson, 36 Cal. 2d 671, at 674

(allowing a district attorney to prosecute a civil case of nuisance because the abatement of prostitution is in furtherance of criminal law enforcement). An application of this Act was People v. Bhakta, 135 Cal. App. 4th 631, 637 (2006), where the court affirmed superior court's grant of a preliminary injunction to enjoin defendant from facilitating prostitution.

E. Promoting Opioid Usage. In a recent case, the State of Oklahoma brought suit against various companies engaged in marketing, promoting, and selling opioids since the mid-1990s. State of Oklahoma v. Purdue Pharma L.P., Case No. CJ-2017-816 (Dist. Ct. Cleveland Cty.), filed August 26, 2019, at 4. These companies included Purdue Pharma L.P., Teva Pharmaceuticals USA, Inc., and Johnson & Johnson, to name a few of the many defendants. The county judge concluded that companies had "engaged in false and misleading marketing of both their drugs and opioids generally" and found that "this conduct constitute[d] a public nuisance under... Oklahoma law." Id. at 26. Unlike most state public nuisance statutes, Oklahoma's does not require any interference with property, a key part of why this law was applicable to the opioid epidemic. But the county judge said even if the law required some interference with property, sufficient evidence was presented to show that the defendants "used real and personal property... as well as public roads, buildings and land of the State of Oklahoma, to create this nuisance." Id. at 24.

4. Environmental Protection and Public Health. Public nuisance has had a close connection with environmental concerns, although the "difference in kind" rule has limited its use by private citizens in seeking to control environmental hazards. Given the hurdle in the

ability of private citizens to enforce environmental laws through nuisance actions, many federal environmental laws contain citizen suit provisions that enable citizens who do not suffer particularized harm to proceed with claims for an injunction and damages paid to the federal treasury. See, e.g., the Federal Water

Pollution Control Act, 33 U.S.C. § 1365, and the Clean Air Act, 42 U.S.C. § 7604. Due to environmental and health concerns, public nuisance claims have been brought in the following areas, though not always successfully.

A. Fracking. A recently popular area of nuisance litigation relating to environmental harm is hydraulic fracturing or "fracking" for the production of oil and natural gas. Parr v. Aruba Petroleum, Inc., No. CC-11-01650-E (Dallas County Ct., Tex., Mar. 8, 2011) is considered the first anti-fracking verdict in the United States. In Parr, a jury awarded Wise County Texas residents $2.95 million in damages on the basis of private nuisance. This case was later reversed, and the court rendered a take-nothing judgment in favor of the petroleum company. Aruba Petroleum, Inc., No. 05-14-01285-CV, 2017 WL 462340 at *3 (Tex. App. Feb. 1, 2017). Few fracking cases have been brought under strict liability theory. See Ely v. Cabot Oil & Gas Corp., 38 F. Supp. 3d 518, 520 (M.D. Pa. 2014) (applying traditional negligence principles to hydraulic fracturing issue because fracking is not abnormally dangerous).

B. Lead. The court in In re Lead Paint Litigation, 191 N.J. 405, 924 A.2d 484 (2007) rejected the public nuisance claim of 26 municipalities against lead paint manufacturers); State v. Lead

Industries Assoc., 951 A.2d 428 (R.I. 2008); St. Louis v. Benjamin Moore & Co., 226 S.W.3d 110 (Mo. 2007). Contrast this case with People v. ConAgra Grocery Products Company, which distinguished itself from both aforementioned cases. 17 Cal. App. 5th 51, 74, 227 Cal. Rptr. 3d 499, 521 (Ct. App. 2017) ("[T]he overwhelming evidence presented at trial proved the elements of a representative public nuisance action").

C. Ground Water. In Adkins v. Thomas Solvent Co., 440 Mich. 293, 297, 487 N.W.2d 715 (1992) court dismissed plaintiffs' nuisance claims from environmental contamination of ground water causing depreciation in their property. Compare this case with Rowe v. E.I. Dupont De Nemours & Co., 262 F.R.D. 451, 568 (D.N.J. 2009), where the court found a public nuisance when defendant manufacturer contaminated drinking water by its release of certain chemicals. See also City of Portland v. Boeing Co., 179 F. Supp. 2d 1190 (D. Or. 2001) (finding liability for chemical contamination of groundwater under public nuisance, state Superfund law, and federal environmental law under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA)); and Restatement (Second) of Torts, § 82 ID (1979) ("The pollution of waters is one form of conduct that may result in a" public nuisance "when there is an interference with a right common to all members of the public"); and Restatement (Second) of Torts, § 821C (1979) ("A pollutes public waters, killing all of the fish. B, who has been operating a commercial fishery in these waters, suffers pecuniary loss as a result. B can recover for the public nuisance").

D. Flint, Michigan has been a recent intersection of both lead and ground water contamination, a perfect storm. Some plaintiffs have

brought nuisance actions for this contamination. See Guertin v. Mich., 2017 U.S. Dist. LEXIS 85544, at *86 (E.D. Mich. June 5, 2017) (dismissing nuisance claim against defendant, City and City officials of Flint, Michigan) (aff'd in part, rev'd in part in 912 F.3d 907 (6th Cir. 2019)).

920

5. Preemption. Remedies sought under public nuisance may also be preempted by federal environmental law. See Am. Elec. Power Co. v. Connecticut, 564 U.S. 410 (2011) (holding that the Clean Air Act required the Environmental Protection Agency to set the limitations on emissions requested in the remedy, thus preempting the common law public nuisance claim for the contribution of factory emissions to global warming). See also Mattoon v. Pittsfield, 980 F.2d 1 (1st Cir. 1992) (The Safe Drinking Water Act (SDWA), preempted an otherwise viable public nuisance claims).

6. Public or Private Nuisance? It is commonplace for plaintiffs to file an action in both public and private nuisance, though instances where the elements of both causes of action are satisfied are somewhat rare. This issue was raised recently in a controversy regarding the contamination of non- genetically modified rice with genetically modified rice in Missouri and Arkansas. See In re Genetically Modified Rice Litig., 666 F. Supp. 2d 1004, 1018 (E.D. Mo. 2009). On motion for summary judgment, the court dismissed the action for public nuisance, finding that the plaintiff had presented no evidence for public harm from the contamination. The court sustained the action for private nuisance on grounds that controversy remained over issues of fact regarding whether the

contamination and resulting damage to the market for non-GM producers had interfered with the use of their land. Recalling the discussion of Chapter 8, can you hypothesize why these claims were not barred under the pure economic loss doctrine?

2. Liability for Private Nuisance

Private nuisance actions typically arise either through the intentional or negligent conduct of the defendant. Intentional nuisances occur when the defendant knows that his conduct interferes with the plaintiffs use and enjoyment of her property or is substantially certain to do so. Negligence is the basis of liability when the defendant has not intentionally interfered with the protected property interest but has failed to exercise reasonable care to avoid the interference. Strict liability may be imposed when the defendant's activity poses extreme danger to the plaintiffs enjoyment and use of his property. See Heeg v. Licht, 80 N.Y. 579 (1880) (holding the defendant liable for the explosion of a powder magazine that had existed for some time).

The following cases represent instances of intentional private nuisance. Do you see why? The cases have different determinations regarding liability. How would you reconcile them?

Morgan v. High Penn Oil Co.

Supreme Court of North Carolina, 1953.

238 N.C. 185, 77 S.E.2d 682.

ERVIN, J. This is a civil action to recover temporary damages for a private nuisance, and to abate such nuisance by injunction.

[Plaintiffs owned a tract of nine acres of land, on which he had his dwelling, a restaurant, and accommodations for thirty-two trailers.

921

Defendant owned an adjoining tract on which it operated an oil refinery, at a distance of 1,000 feet from plaintiffs' dwelling. Plaintiffs' evidence was that for some hours on two or three different days each week the refinery emitted nauseating gases and odors in great quantities, which invaded plaintiffs' land and other tracts of land within a distance of two miles, in such density as to render persons of ordinary sensitiveness uncomfortable and sick. This substantially impaired the use and enjoyment of plaintiffs' land. Defendant failed to put an end to this atmospheric pollution after notice and demand from plaintiffs to abate it.

Defendant's evidence was that the oil refinery was a modern plant of the type approved, known and in general use for renovating used lubricating oils; that it was not so constructed or operated as to give out noxious gases or odors in annoying quantities, and that it had not annoyed the plaintiffs or other persons save on a single occasion when it suffered a brief mechanical breakdown.

The trial judge submitted to the jury the question whether the refinery was so maintained and operated as to create a nuisance. The jury returned a special verdict saying that there was a nuisance, and assessed plaintiffs' damages at $2,500. The trial court entered judgment on this verdict, and enjoined defendant from continuing the nuisance. Defendant appealed.]

ERVIN, Justice. ***[The] defendant assigns as error the disallowance of its motion for a compulsory nonsuit. ***

The High Penn Oil Company contends that the evidence is not sufficient to establish either an actionable or an abatable private nuisance. This contention rests on a twofold argument somewhat alternative in character. The High Penn Oil Company asserts primarily that private nuisances are classified as nuisances per se or at law, and nuisances per accidens or in fact; that when one carries on an oil refinery upon premises in his rightful occupation, he conducts a lawful enterprise, and for that reason does not maintain a nuisance per se or at law; that in such case the oil refinery can constitute a nuisance per accidens or in fact to the owner of neighboring land if, but only if, it is constructed or operated in a negligent manner; that there was no testimony at the trial tending to show that the oil refinery was constructed or operated in a negligent manner; and that consequently the evidence does not suffice to establish the existence of either an actionable or an abatable private nuisance. ***

A nuisance per se or at law is an act, occupation or structure which is a nuisance at all times and under any circumstances, regardless of location or surroundings. [Cc] Nuisances per accidens or in fact are those which become nuisances by reason of their location, or by reason of the manner in which they are constructed, maintained, or operated. [Cc] The High Penn Oil Company also asserts with complete correctness that an oil refinery is a lawful enterprise and for that reason cannot be a nuisance per se or at law. [Cc] The High Penn Oil Company falls into error,

however, when it takes the position that an oil refinery cannot become a nuisance per accidens or in fact unless it is constructed or operated in a negligent manner.

Negligence and nuisance are distinct fields of liability. [Cc] While the same act or omission may constitute negligence and also give rise to a private nuisance per accidens or in fact, and thus the two torts may coexist and be practically inseparable, a private nuisance per accidens or in fact may be created or maintained without negligence. [Cc] Most private nuisances per accidens or in fact are intentionally created or maintained, and are redressed by the courts without allegation or proof of negligence. [Cc] ***

Much confusion exists in respect to the legal basis of liability in the law of private nuisance because of the deplorable tendency of the courts to call everything a nuisance, and let it go at that. [Cc] The confusion on this score vanishes in large part, however, when proper heed is paid to the sound proposition that private nuisance is a field of tort liability rather than a single type of tortious conduct; that the feature which gives unity to this field of tort liability is the interest invaded, namely, the interest in the use and enjoyment of land; that any substantial nontrespassory invasion of another's interest in the private use and enjoyment of land by any type of liability forming conduct is a private nuisance; that the invasion which subjects a person to liability for private nuisance may be either intentional or unintentional; that a person is subject to liability for an intentional invasion when his conduct is unreasonable under the circumstances of the particular case; and that a person is subject to liability for an unintentional invasion when his conduct is negligent, reckless or ultrahazardous. [Cc],

An invasion of another's interest in the use and enjoyment of land is intentional in the law of private nuisance when the person whose conduct is a question as a basis for liability acts for the purpose of causing it, or knows that it is resulting from his conduct, or knows that it is substantially certain to result from his conduct. Restatement (Second) of the Law of Torts, § 825; [Cc], A person who intentionally creates or maintains a private nuisance is liable for the resulting injury to others regardless of the degree of care or skill exercised by him to avoid such injury. [Cc] One of America's greatest jurists, the late Benjamin N. Cardozo, made this illuminating observation on this aspect of the law:

"Nuisance as a concept of the law has more meanings than one. The primary meaning does not involve the element of negligence as one of its essential factors. One acts sometimes at one's peril. In such circumstances, the duty to desist is absolute whenever conduct, if persisted in, brings damage to another. Illustrations are abundant. One who emits noxious fumes or gases day by day in the running of his factory may be liable to his neighbor though he has taken all available precautions. He is not to do such things at all, whether he is negligent or careful." McFarlane v. City of Niagara Falls, 247 N.Y. 340, 160 N.E. 391.

923

When the evidence is interpreted in the light most favorable to the plaintiffs, it suffices to support a finding that in operating the oil refinery the High Penn Oil Company intentionally and unreasonably caused noxious gases and odors to escape onto the nine acres of the plaintiffs to such a degree as to impair in a substantial manner

the plaintiffs' use and enjoyment of his land. This being so, the evidence is ample to establish the existence of an actionable private nuisance, entitling the plaintiffs to recover temporary damages from the High Penn Oil Company. [Cc] When the evidence is taken in the light most favorable to the plaintiffs, it also suffices to warrant the additional inference that the High Penn Oil Company intends to operate the oil refinery in the future in the same manner as in the past; ***and that the issuance of an appropriate injunction is necessary to protect the plaintiffs against the threatened irreparable injury. ***

For the reasons given, the evidence is sufficient to withstand the motion of the High Penn Oil Company for a compulsory nonsuit.

[A new trial was ordered, however, because of an error in instructions to the jury.]

Carpenter v. The Double R Cattle Company, Inc.

Supreme Court of Idaho, 1985.

108 Idaho 602, 701 P.2d 222.

BAKES, Justice. ***Plaintiff appellants are homeowners who live near a cattle feedlot owned and operated by respondents. Appellants filed a complaint in March, 1978, alleging that the feedlot had been expanded in 1977 to accommodate the feeding of approximately 9,000 cattle. Appellants further alleged that "the spread and accumulation of manure, pollution of river and ground water, odor, insect infestation, increased concentration of birds,... dust and noise" allegedly caused by the feedlot constituted a nuisance. After a trial

on the merits a jury found that the feedlot did not constitute a nuisance. The trial court then also made findings and conclusions that the feedlot did not constitute a nuisance. * * "k

The case was assigned to the Court of Appeals which reversed and remanded for a new trial. The basis for this reversal was that the trial court did not give a jury instruction based upon subsection (b) of Section 826 of the Restatement (Second) of Torts. That subsection allows for a finding of a nuisance even though the gravity of harm is outweighed by the utility of the conduct if the harm is "serious" and the payment of damages is "feasible" without forcing the business to discontinue.

This Court granted defendant's petition for review. We hold that the instructions which the trial court gave were not erroneous, being consistent with our prior case law and other persuasive authority. We further hold that the trial court did not err in not giving an instruction

924

based on subsection (b) of Section 826 of the Second Restatement, which does not represent the law in the State of Idaho. ***

The Court of Appeals ***adopted the new subsection (b) of Section 826 of the Second Restatement partially because of language in Koseris [v. J.R. Simplot Co., 82 Idaho 263, 352 P.2d 235 (1960)], which reads: "We are constrained to hold that the trial court erred in sustaining objections to those offers of proof [evidence of utility of conduct], since they were relevant as bearing upon the issue whether respondents, in seeking injunctive relief, were pursuing the proper remedy; nevertheless, on the theory of damages which

respondents had waived, the ruling was correct." 82 Idaho at 270, 352 P.2d at 239.

The last phrase of the quote, relied on by the Court of Appeals, is clearly dictum, since the question of utility of conduct in a nuisance action for damages was not at issue in Koseris. It is very doubtful that this Court's dictum in Koseris was intended to make such a substantial change in the nuisance law. ***The case of McNichols v. J.R. Simplot Co., 74 Idaho 321, 262 P.2d 1012 (1953) should be viewed as the law in Idaho that in a nuisance action seeking damages the interests of the community, which would include the utility of the conduct, should be considered in the determination of the existence of a nuisance. The trial court's instructions in the present case were entirely consistent with McNichols. A plethora of other modern cases are in accord. ***

The State of Idaho is sparsely populated and its economy depends largely upon the benefits of agriculture, lumber, mining and industrial development. To eliminate the utility of conduct and other factors listed by the trial court from the criteria to be considered in determining whether a nuisance exists, as the appellant has argued throughout this appeal, would place an unreasonable burden upon these industries. We see no policy reasons which should compel this Court to accept appellant's argument and depart from our present law. Accordingly, the judgment of the district court is affirmed and the Court of Appeals decision is set aside. ***

BISTLINE, JUSTICE, dissenting. ***I applaud the efforts of the Court of Appeals to modernize the law of nuisance in this state. I am not in

the least persuaded to join the majority with its narrow view of nuisance law as expressed in the majority opinion.

The majority today continues to adhere to ideas on the law of nuisance that should have gone out with the use of buffalo chips as fuel. We have before us today homeowners complaining of a nearby feedlot--not a small operation, but rather a feedlot which accommodates 9,000 cattle. The homeowners advanced the theory that after the expansion of the feedlot in 1977, the odor, manure, dust, insect infestation and increased concentration of birds which accompanied all of the foregoing, constituted a nuisance. If the odoriferous quagmire created by 9,000 head of cattle is not a nuisance, it is difficult for me to imagine what is. ***

925

I agree wholeheartedly that the interests of the community should be considered in determining the existence of a nuisance. However, where this primitive rule of law fails is in recognizing that in our society, while it may be desirable to have a serious nuisance continue because the utility of the operation causing the nuisance is great, at the same time, those directly impacted by the serious nuisance deserve some compensation for the invasion they suffer as a result of the continuation of the nuisance. This is exactly what the more progressive provisions of § 826(b) of the Restatement (Second) of Torts addresses. Clearly, § 826(b) recognizes that the continuation of the serious harm must remain feasible. See especially comment on clause (b), subpart f of § 826 of the Restatement. What § 826(b) adds is a method of compensating those who must suffer the invasion without putting out of business

the source or cause of the invasion. This does not strike me as a particularly adventuresome or far-reaching rule of law. In fact, the fairness of it is overwhelming. ***

We should not be adopting a rule of preference which suggests that if the community interest is preferred any other interest must be disregarded. Instead, § 826(b) accommodates adverse interests by contemplating continuation of the facility which creates the nuisance while compensating those who suffer the direct impact of the nuisance--in the instant case the homeowners who live in the vicinity of the feedlot.

The majority's rule today suggests that part of the cost of industry, agriculture or development must be borne by those unfortunate few who have the fortuitous luck to live in the immediate vicinity of a nuisance producing facility. Frankly, I think this naive economic view is ridiculous in both its simplicity and its outdated view of modern economic society. The "cost" of a product includes not only the amount it takes to produce such a product but also includes the external costs: the damage done to the environment through pollution of air or water is an example of an external cost. In the instant case, the nuisance suffered by the homeowners should be considered an external cost of operating a feedlot and producing beef for public consumption. I do not believe that a few should be required to pay this extra cost of doing business by going uncompensated for a nuisance of this sort. ***

The majority today blithely suggests that because the State of Idaho is sparsely populated and because our economy is largely dependent on agriculture, lumber, mining and industrial

development, we should forego compensating those who suffer a serious invasion. If humans are such a rare item in this state, maybe there is all the more reason to protect them from the discharge of industry. At a minimum, we should compensate those who suffer a nuisance at the hands of industry and agriculture. What the majority overlooks is that the cost of development should not be absorbed by few, but rather should be spread out and paid by all. I am not convinced that agriculture or industry will be put out of business by requiring compensation for the nuisance they generate. ***

926

[The decision was 3 to 2.]

NOTES AND QUESTIONS

1. Judicial balancing of factors in the determination of liability is redolent of the central test in negligence articulated by Learned Hand. See Pendergrast v. Aiken, 293 N.C. 201, 236 S.E.2d 787 (1977) ("Reasonableness is a question of fact to be determined in each case by weighing the gravity of the harm to the plaintiff against the utility of the conduct of the defendant. Determination of the gravity of the harm involves consideration of the extent and character of the harm to the plaintiff, the social value which the law attaches to the type of use which is invaded, the suitability of the locality for that use, the burden on plaintiff to minimize the harm, and other relevant considerations arising upon the evidence. Determination of the utility of the conduct of the defendant involves consideration of the purpose of the defendant's conduct, the social value which the law attaches to that purpose, the suitability of the locality for the use defendant makes of the property, and other

relevant considerations arising upon the evidence."); and Freeman v. Blue Ridge Paper Prods., 229 S.W.3d 694, 705 (Tenn. Ct. App. 2007) ("Whether a defendant's interference was unreasonable is a question not only of fact, but also of values to be decided by the jury in light of all the circumstances of the case."). But in Jost v. Dairyland Power Cooperative, 45 Wis.2d 164, 172 N.W.2d 647 (1969), the court was hostile to a balancing test when the nuisance was intentional and the damage "substantial."

2. Liability rules in nuisance govern the use of property. The framework of the rules reveal this underlying objective. Michelman, Property, Utility and Fairness, 80 Harv. L. Rev. 1165 (1967); Epstein, Nuisance Law: Corrective Justice and Its Utilitarian Constraints, 8 J. Legal Stud. 49 (1979). Note that it was the application of liability rules to competing uses of property that led Ronald Coase to his Nobel prize scholarship in The Problem of Social Cost, 3 J.L. & Econ. 1 (1960). Legal rules, however, may be of limited influence in guiding the behavior of neighbors whose use of land conflicts. See Ellickson, Order Without Law: How Neighbors Settle Disputes (1991) (informal social norms are chosen outside the shadow of the law whose content maximizes the objective welfare of group members).

3. Recurring circumstances establish doctrines in nuisance law:

A. Hypersensitivity. It is generally held that the harm must be of a kind that would be suffered by an ordinary person in the community. Rogers v. Elliott, 146 Mass. 349, 15 N.E. 768 (1888) (plaintiff, in highly nervous condition from sunstroke, affected by ringing of church bell); Beckman v. Marshall, 85 So.2d 552 (Fla. 1956) (noise of children playing in nursery); Venuto v. Owens-Corning Fiberglas

Corp., 22 Cal.App.3d 116, 99 Cal.Rptr. 350 (1971) (allergic reactions); Jenkins v. CSX Transportation, Inc., 906 S.W.2d 460 (Tenn.Ct.App. 1995) (allergic reaction to creosote fumes).

Suppose that most people in the vicinity are hardened to the discomfort of noise, smoke, dust, vibration or odors from the defendant's factory, and do

not object. Does this prevent the plaintiff from maintaining an action for a nuisance, if a normal person would be affected?

B. Sensitive Uses of Land. What if the defendant engages in an activity that is normally harmless to his neighbors, but the plaintiff is making an abnormally sensitive use of his land, which is adversely affected? Defendant operates a racetrack at night, and his flood lights, directed downward, are reflected with a light approximately equal to that of the full moon. This would be inoffensive to the ordinary landowner in the vicinity; but the plaintiff has an outdoor motion picture screen, on which his pictures are made less visible, and he loses customers. Is defendant liable on the basis of nuisance? Amphitheaters, Inc. v. Portland Meadows, 184 Or. 336, 198 P.2d 847 (1948).

Plaintiff has installed an effective solar heating system on the roof of his house. Defendant proposes to construct a house on adjoining land that will shade the heating system and impair its operation and refuses to change the location of the house sufficiently to avoid the shading. Plaintiff sues for an injunction. What problems are raised? See Prah v. Maretti, 108 Wis.2d 223, 321 N.W.2d 182 (1982) (nuisance liability), but cf. Tenn v. 889 Associates, Ltd., 127 N.H.

321, 500 A.2d 366 (1985) (nuisance liability applicable but not established).

C. Locality. In Euclid v. Ambler Realty Co., 272 U.S. 365, 388 (1926), the case in which the Supreme Court first upheld the constitutionality of zoning legislation, Justice Sutherland said: "A nuisance may be merely a right thing in the wrong place, like a pig in the parlor instead of the barnyard." It also is important where the barnyard is located. In William Aldred's Case, 9 Co.Rep. 576, 77 Eng.Rep. 816 (1610), one of the very first reported cases on private nuisance, the action was brought for maintaining a hogsty next to the plaintiffs house. Defendant "moved in arrest of judgment, that the building of the house for hogs was necessary for the sustenance of man; and one ought not to have so delicate a nose, that he cannot bear the smell of hogs ***but it was resolved that the action for it is ***well maintainable."

D. Defendant's Control over Nuisance. In private nuisance cases, many courts consider whether the defendant has control over the nuisance. For example, in Poletti v. Syngenta the court agreed with an earlier case holding a product is "not liable for a private nuisance caused by the use of that product after it has left the seller's control." Poletti v. Syngenta AG (In re Syngenta Mass Tort Actions), 272 F. Supp. 3d 1074, 1091 (S.D. Ill. 2017) (citing City of Bloomington, Ind. v. Westinghouse Elec. Corp., 892 F.2d 611, 615 (7th Cir. 1989)) (finding the plaintiff had not provided sufficient evidence to prove the defendant had significant control over their product post-sale).

4. Right to Farm Statutes. Right to Farm Statutes have been enacted in all fifty states. They follow a pattern of preventing new residents

from restricting established agricultural practices. See Leaf River Forest Prod., Inc. v. Ferguson, 662 So.2d 648, 661 (Miss. 1995). See also Lindsey v. DeGroot, 898 N.E.2d 1251, 1257 (Ind. Ct. App. 2009). The intent of the legislature is to prevent the encroaching urban population from destroying

928

farmland by placing the blame on plaintiffs who "come to the nuisance," and therefore, should not be given a remedy at law. If the statute bestows an immunity for nuisance suit on those carrying on certain "agricultural" activities, the issue of unconstitutional taking arises. The statutory immunity may be construed as the creation of an easement over the complainant's land in favor of the party enjoying the immunity. See Gacke v. Pork Xtra, 684 N.W.2d 168 (Iowa 2004); Bormann v. Bd. of Supervisors, 584 N.W.2d 309 (Iowa 1998); cf. Craig v. County of Chatham, 356 N.C. 40, 565 S.E.2d 172 (2002) (holding that state hog farm laws form a "complete and integrated regulatory scheme" preempting local regulation); cf. also Moon v. North Idaho Farmers Ass'n, 96 P.3d 637, 645 (2004) (stating "Idaho has not recognized the right to maintain a nuisance as an easement"). The rise of agritourism has pushed the limit of right-to-farm laws in preempting actions for private nuisance. Several courts have addressed the question of whether noise from concerts or farm attractions may properly be considered agriculture to preempt a cause of action. For a well-developed discussion of the issue, see Shore v. Maple Lane Farms, LLC, 411 S.W.3d 405 (Tenn. 2013) (holding that plaintiff successfully presented a prima facie claim for private nuisance regarding noise from concerts associated with a neighboring farm's harvest festivals).

5. The judicial function of zoning via liability rules calls for an examination of its relationship with public zoning regulations and environmental agency controls. On these questions, see Ellickson, Alternatives to Zoning, Covenants, Nuisance Rules, and Fines as Land Use Controls, 40 U.Chi. L. Rev. 681 (1973). A current federal disinclination to regulate for environmental protections may revivify the law of nuisance in filling gaps.

3. Defenses

Relationship with Contributory Negligence

1. While contributory negligence is a defense in certain intentional torts, it does not apply in cases of intentional private nuisance. Higginbotham v. Kearse, 111 W.Va. 264, 161 S.E. 37 (1931); Phillips Ranch, Inc. v. Banta, 273 Or. 784, 543 P.2d 1035 (1975).

2. When the nuisance arises out of negligence, most courts recognize that contributory negligence eliminates or reduces recovery. See Timmons v. Reed, 569 P.2d 112 (Wyo. 1977); McFarlane v. Niagara Falls, 247 N.Y. 340,160 N.E. 391 (1928) (leading case); Denny v. Garavaglia, 333 Mich. 317, 52 N.W. 521 (1952); Restatement (Second) of Torts § 840B.

3. When the nuisance is based on strict liability, contributory negligence of the plaintiff failing to discover the danger is not a defense; but if he discovers the danger and deliberately proceeds to encounter it, his contributory negligence or assumption of risk may affect his recovery. For example, if a defendant is blasting in dangerous proximity to a highway and plaintiff negligently fails to

observe a warning sign, drives past it, and is hurt by the blast, he may recover. However, if the plaintiff

929

sees the sign or flagman who warns him not to proceed and insists on doing so, he cannot recover. See Worth v. Dunn, 98 Conn. 51, 118 A. 467 (1922). For a case that addresses the issue of comparative negligence, see Tint v. Sanborn, 211 Cal. App. 3d 1225, 259 Cal. Rptr. 902 (Cal. Ct. App. 1989) (view of San Francisco obstructed by trees on adjoining property).

Self-Help to Abate a Nuisance

1. The privilege of self-help to abate a nuisance is analogous to the privilege of using reasonable force to protect the possession of land against trespass. Self-help is only available to those to whom the condition is a nuisance. There are several additional guiding principles toward the application of self-help.

A. A public nuisance may only be abated by a private individual in the instance that the nuisance causes or threatens special damage to the individual, apart from the general public. Corthell v. Holmes, 87 Me. 24, 32 A. 715 (1894); Nation v. District of Columbia, 34 App. D.C. 453 (1910).

B. The privilege of abating conditions outside the actor's premises is predicated upon the existence of an actual nuisance, and an honest mistaken belief will not justify the action. Humphrey's Oil Co. v. Liles, 262 S.W. 1058 (Tex. Civ. App. 1924), aff'd, 277 S.W. 100 (Com. App. 1925).

C. The application of reasonable force according to the necessities of the situation may extend to the destruction of valuable property. Amoskeag Mfg. Co. v. Goodale, 46 N.H. 53 (dam); Maryland Tel. and Tel. Co. v. Ruth, 106 Md. 644, 68 A. 358 (1907) (telephone pole).

D. Abating a nuisance will not excuse unnecessary or unreasonable damage. For example, a neighbor may not burn down an adjoining house because it is used for prostitution. See Moody v. Bd. of Supervisors of Niagara Cty., 46 Barb. 659 (N.Y. 1886).

E. Abating a nuisance does not justify inflicting personal injury or a breach of the peace. Walker v. Davis, 139 Tenn. 475, 202 S.W. 78 (1918).

F. The individual exercising self-help must notify the wrongdoer of the existence of the condition and demand the condition's removal prior to exercising the privilege. An exception to this principle is if the wrongdoer is already aware of the problem and making the demand would be futile. Hickey v. Michigan Central R. Co., 96 Mich. 498, 55 N.W. 989 (1893).

2. Tree and Plant Related Actions. A common scenario in which self-help arises is in the situation of tree or plant related nuisances. In some instances, such as overhanging branches, an action for nuisance will not lie unless and until a landowner has attempted self-help, where self-help would cure the nuisance. For an instructive discussion of four common approaches to self-help requirements in such cases, see Iny v. Collom, 13 Mise. 3d 75, 827 N.Y.S.2d. 416 (2006). See also Restatement (Second) of Torts §§ 839-40. The courts have considered factors such as increased population density and diminishing agricultural activity in determining

whether trees and plants constitute a nuisance. For example, the Virginia Supreme Court overruled its precedent that a plant or tree must be considered noxious to assess liability, finding that a tree or plant could constitute a nuisance where self-help was ineffective and the trees or branches posed imminent danger or actual harm. Fancher v. Fagella, 274 Va. 549, 650 S.E.2d 519 (2007), following Lane v. W.J. Curry & Sons, 92 S.W.3d 355 (Tenn. 2002) (this is known as the Hawai'i rule); cf. Shiel v. Rowell, 101 N.E.3d 290, 292 (2018) (applying not the Hawai'i rule but the Massachusetts rule, which prevents a landowner from holding a neighbor liable for damage caused by his or her healthy trees). How does this rule compare with Restatement (Second) of Torts §§ 839-40? What do you think is the better approach?

4. Nuisance Remedies

Compare and contrast the remedies adopted by the courts in addressing nuisance problems in the following cases. What are the consequences of the different approaches taken by the courts?

Boomer v. Atlantic Cement Co., Inc.

Court of Appeals of New York, 1970.

26 N.Y.2d 219, 257 N.E.2d 870, 309 N.Y.S.2d 312.

BERGAN, J. Defendant operates a large cement plant near Albany. These are actions for injunction and damages by neighboring land owners alleging injury to property from dirt, smoke and vibration emanating from the plant. A nuisance has been found after trial,

temporary damages have been allowed; but an injunction has been denied.

The public concern with air pollution arising from many sources in industry and in transportation is currently accorded ever wider recognition accompanied by a growing sense of responsibility in State and Federal Governments to control it. Cement plants are obvious sources of air pollution in the neighborhoods where they operate.

But there is now before the court private litigation in which individual property owners have sought specific relief from a single plant operation. The threshold question raised by the division of view on this appeal is whether the court should resolve the litigation between the parties now before it as equitably as seems possible; or whether, seeking promotion of the general public welfare, it should channel private litigation into broad public objectives.

A court performs its essential function when it decides the rights of parties before it. Its decision of private controversies may sometimes greatly affect public issues. Large questions of law are often resolved by the manner in which private litigation is decided. But this is normally an incident to the court's main function to settle controversy. It is a rare exercise of judicial power to use a decision in private litigation as a

purposeful mechanism to achieve direct public objectives greatly beyond the rights and interests before the court.

Effective control of air pollution is a problem presently far from solution even with the full public and financial powers of government. In large measure adequate technical procedures are yet to be developed and some that appear possible may be economically impracticable.

It seems apparent that the amelioration of air pollution will depend on technical research in great depth; on a carefully balanced consideration of the economic impact of close regulation; and of the actual effect on public health. It is likely to require massive public expenditure and to demand more than any local community can accomplish and to depend on regional and interstate controls.

A court should not try to do this on its own as a by-product of private litigation and it seems manifest that the judicial establishment is neither equipped in the limited nature of any judgment it can pronounce nor prepared to lay down and implement an effective policy for the elimination of air pollution. This is an area beyond the circumference of one private lawsuit. It is a direct responsibility for government and should not thus be undertaken as an incident to solving a dispute between property owners and a single cement plant--one of many--in the Hudson River valley.

The cement making operations of defendant have been found by the court at Special Term to have damaged the nearby properties of plaintiffs in these two actions. The total damage to plaintiffs' properties is, however, relatively small in comparison with the value of defendant's operation and with the consequences of the injunction which plaintiffs seek.

The ground for the denial of injunction, notwithstanding the finding both that there is a nuisance and that plaintiffs have been damaged substantially, is the large disparity in economic consequences of the nuisance and of the injunction. This theory cannot, however, be sustained without overruling a doctrine which has been consistently reaffirmed in several leading cases in this court and which has never been disavowed here, namely that where a nuisance has been found and where there has been any substantial damage shown by the party complaining an injunction will be granted.

The rule in New York has been that such a nuisance will be enjoined although marked disparity be shown in economic consequence between the effect of the injunction and the effect of the nuisance.

The problem of disparity in economic consequence was sharply in focus in Whalen v. Union Bag & Paper Co., 208 N.Y. 1, 101 N.E. 805. A pulp mill entailing an investment of more than a million dollars polluted a stream in which plaintiff, who owned a farm, was "a lower riparian owner." The economic loss to plaintiff from this pollution was small. This court, reversing the Appellate Division reinstated the injunction granted

932

by the Special Term against the argument of the mill owner that in view of "the slight advantage to plaintiff and the great loss that will be inflicted on defendant" an injunction should not be granted [c]. "Such a balancing of injuries cannot be justified by the circumstances of this case," Judge Werner noted [c]. He continued: "Although the damage to the plaintiff may be slight as compared with the

defendant's expense of abating the condition, that is not a good reason for refusing an injunction" [c].

Thus the unconditional injunction granted at Special Term was reinstated. The rule laid down in that case, then, is that whenever the damage resulting from a nuisance is found not "unsubstantial," viz., $100 a year, injunction would follow. This states a rule that had been followed in this court with marked consistency. ***

Although the court at Special Term and the Appellate Division held that injunction should be denied, it was found that plaintiffs had been damaged in various specific amounts up to the time of the trial and damages to the respective plaintiffs were awarded for those amounts. The effect of this was, injunction having been denied, plaintiffs could maintain successive actions at law for damages thereafter as further damage was incurred.

The court at Special Term also found the amount of permanent damage attributable to each plaintiff, for the guidance of the parties in the event both sides stipulated to the payment and acceptance of such permanent damage as a settlement of all the controversies among the parties. The total of permanent damages to all plaintiffs thus found was $185,000. This basis of adjustment has not resulted in any stipulation by the parties.

This result at Special Term and at the Appellate Division is a departure from a rule that has become settled; but to follow the rule literally in these cases would be to close down the plant at once. This court is fully agreed to avoid that immediately drastic remedy; the difference in view is how best to avoid it. [Footnote by Court:

Respondent's investment in the plant is in excess of $45,000,000. There are over 300 people employed there.]

One alternative is to grant the injunction but postpone its effect to a specified future date to give opportunity for technical advances to permit defendant to eliminate the nuisance; another is to grant the injunction conditioned on the payment of permanent damages to plaintiffs which would compensate them for the total economic loss to their property present and future caused by defendant's operations. ***[T]he court chooses the latter alternative.

If the injunction were to be granted unless within a short period--e.g., 18 months--the nuisance be abated by improved methods, there would be no assurance that any significant technical improvement would occur.

933

The parties could settle this private litigation at any time if defendant paid enough money and the imminent threat of closing the plant would build up the pressure on defendant. If there were no improved techniques found, there would inevitably be applications to the court at Special Term for extensions of time to perform on showing of good faith efforts to find such techniques.

Moreover, techniques to eliminate dust and other annoying by-products of cement making are unlikely to be developed by any research the defendant can undertake within any short period, but will depend on the total resources of the cement industry nationwide and throughout the world. The problem is universal wherever cement is made.

For obvious reasons the rate of the research is beyond control of defendant. If at the end of 18 months the whole industry has not found a technical solution a court would be hard put to close down this one cement plant if due regard be given to equitable principles.

On the other hand, to grant the injunction unless defendant pays plaintiffs such permanent damages as may be fixed by the court seems to do justice between the contending parties. All of the attributions of economic loss to the properties on which plaintiffs' complaints are based will have been redressed.

The nuisance complained of by these plaintiffs may have other public or private consequences, but these particular parties are the only ones who have sought remedies and the judgment proposed will fully redress them. The limitation of relief granted is a limitation only within the four corners of these actions and does not foreclose public health or other public agencies from seeking proper relief in a proper court.

It seems reasonable to think that the risk of being required to pay permanent damages to injured property owners by cement plant owners would itself be a reasonable effective spur to research for improved techniques to minimize nuisance.

The power of the court to condition on equitable grounds the continuance of an injunction on the payment of permanent damages seems undoubted. [Cc]

The damage base here suggested is consistent with the general rule in those nuisance cases where damages are allowed. "Where a nuisance is of such a permanent and unabatable character that a

single recovery can be had, including the whole damage past and future resulting therefrom, there can be but one recovery" [c].

Thus it seems fair to both sides to grant permanent damages to plaintiffs which will terminate this private litigation. The theory of damage is the "servitude on land" of plaintiffs imposed by defendant's nuisance. ***

934

The judgment, by allowance of permanent damages imposing a servitude on land, which is the basis of the actions, would preclude future recovery by plaintiffs or their grantees [c].

This should be placed beyond debate by a provision of the judgment that the payment by defendant and the acceptance by plaintiffs of permanent damages found by the court shall be in compensation for a servitude on the land.

Although the Trial Term has found permanent damages as a possible basis of settlement of the litigation, on remission the court should be entirely free to re-examine this subject. It may again find the permanent damage already found; or make new findings.

The orders should be reversed, without costs, and the cases remitted to Supreme Court, Albany County to grant an injunction which shall be vacated upon payment by defendant of such amounts of permanent damage to the respective plaintiffs as shall for this purpose be determined by the court.

JASEN, J. dissenting. I agree with the majority that a reversal is required here, but I do not subscribe to the newly enunciated doctrine of assessment of permanent damages, in lieu of an

injunction, where substantial property rights have been impaired by the creation of a nuisance. ***

I see grave dangers in overruling our long-established rule of granting an injunction where a nuisance results in substantial continuing damage. In permitting the injunction to become inoperative upon the payment of permanent damages, the majority is, in effect, licensing a continuing wrong. It is the same as saying to the cement company, you may continue to do harm to your neighbors so long as you pay a fee for it. Furthermore, once such permanent damages are assessed and paid, the incentive to alleviate the wrong would be eliminated, thereby continuing air pollution of an area without abatement.

It is true that some courts have sanctioned the remedy here proposed by the majority in a number of cases, but none of the authorities relied upon by the majority are analogous to the situation before us. In those cases, the courts, in denying an injunction and awarding money damages, grounded their decision on a showing that the use to which the property was intended to be put was primarily for the public benefit. Here, on the other hand, it is clearly established that the cement company is creating a continuing air pollution nuisance primarily for its own private interest with no public benefit.

This kind of inverse condemnation [c] may not be invoked by a private person or corporation for private gain or advantage. Inverse condemnation should only be permitted when the public is primarily served in the taking or impairment of property. [Cc] The promotion of

the interests of the polluting cement company has, in my opinion, no public use or benefit.

935

Nor is it constitutionally permissible to impose servitude on land, without consent of the owner, by payment of permanent damages where the continuing impairment of the land is for a private use. [Cc] This is made clear by the State Constitution (art. I, § 7, subd. [a]) which provides that "[p]rivate property shall not be taken for public use without just compensation" (emphasis added). It is, of course, significant that the section makes no mention of taking for a private use.

In sum, then, by constitutional mandate as well as by judicial pronouncement, the permanent impairment of private property for private purposes is not authorized in the absence of clearly demonstrated public benefit and use.

I would enjoin the defendant cement company from continuing the discharge of dust particles upon its neighbors' properties unless, within 18 months, the cement company abated this nuisance. ***

NOTES AND QUESTIONS

1. The principal case is highly controversial, but addresses some of the challenges faced by the courts in deliberating whether to award an injunction. Why should the court eschew the award of an injunction? How would parties negotiate once an injunction was granted? If injunctions were routinely awarded, predict how operators, like Atlantic, would respond prior to establishing the plant causing pollution.

2. Consider an alternative argument. The right of eminent domain is given to public authorities exercising powers to take private property with the award of just compensation for the public benefit. By setting damages in the principal case, is the court providing a means for the (private) defendant to buy the plaintiff's property rights? If the court is setting the price for the defendant to purchase such rights, how should the quantum be assessed? Should it be confined to the diminution in value of the property? Extended to the personal annoyance suffered by the property holder? Farber, Reassessing Boomer: Justice, Efficiency, and Nuisance Law, Property Law and Legal Education: Essays in Honor of John E. Cribbett 7, 17 (P. Hay & M. Hoeflich eds., 1988) suggests that the formula should not be confined to the diminution in value but rather by the market value to purchase buffer rights. What if the bargaining costs were too great? See Kaplow and Shavell, Property Rules versus Liability Rules: An Economic Analysis, 109 Harv. L. Rev. 713 (1996).

3. Most courts do not adopt a categorical position regarding whether an injunction should be granted. Instead, once it has been determined that there is a nuisance the court engages in a process called "balancing of the equities" to see whether the issuance of an injunction is the most appropriate remedy. Some scholars have criticized the Boomer majority's failure to consider the negative and lasting impact of factory pollution on public health. See Daniel A. Farber, The Story of Boomer: Pollution and the Common Law, in Environmental Law Stories, 7, 8 (Oliver A. Houck & Richard J. Lazarus eds., 2005). See also Douglas Laycock, The Neglected Defense of Undue Hardship (and the Doctrinal Train Wreck in Boomer v. Atlantic Cement), 4 J

Tort Law. [ii], 35 (2012) (criticizing the economic analysis for its failure to weigh adequately the factor of undue hardship that would leave the plaintiff to a damages remedy if the costs of compliance with the injunction disproportionately outweighed the benefits; and arguing that Boomer was not an innovation but that the defense of undue hardship had been well- established in New York as elsewhere).

Courts today consider a number of factors in this equitable determination, including the character or extent of the harm suffered by or threatened to the plaintiff, the good faith or intentional misconduct of the defendant or his efforts to avoid injury to defendant, the financial investments of the parties and the relative economic harm each will suffer from the grant or denial of an injunction, and the interest of the general public in the continuance of the defendant's enterprise. See Estancias Dallas Corp. v. Schultz, 500 S.W.2d 217 (Tex. Civ. App. Beaumont 1973) (affirming the issuance of an injunction because little to no evidence was presented in favor of the public benefit of the operation of the apartment complex); Southwestern Constr. Co. v. Liberto, 385 So. 2d 633 (Ala. 1980) (highlighting that the determination of the balancing of the equities is to be made after the determination of a nuisance and holding that the trial court's issuance of an injunction was adequately supported by the evidence presented in the case).

4. In Little Joseph Realty, Inc. v. Babylon, 41 N.Y.2d 738, 363 N.E.2d 1163, 395 N.Y.S.2d 428 (1977), the court refused to apply the Boomer principle when an asphalt plant was located in violation of a

zoning ordinance and the lower court conditioned an injunction on payment of permanent damages and abatement of the most offensive aspects. The court held that "when a continuing use flies in the face of a valid zoning restriction it must, subject to the existence of any appropriate equitable defenses, be enjoined unconditionally." Part of the rationale against accommodations of zoning ordinance violations stems from courts' concern that they may usurp the legislative function.

5. The principal case influenced the 1970 amendments to the Clean Air Act. In testimony before the Senate Committee, the Boomer majority opinion was criticized for not inducing the industry to improve the state of technology. Judge Jasen's proposal of a conditional injunction was praised; S. 3229, S. 3466, and S. 3546, Subcomm, on Air and Water of the Senate Comm, on Public Works, 91st Cong., 2d Sess., part 2, at 849 (1970). After Boomer, the Clean Air Act Amendment added strict deadlines called "technology-forcing" for industry compliance.

6. As noted, a nuisance may be abated by a property owner. In some situations, a court may grant an abatement order. See San Diego Gas & Elec. Co. v. San Diego Reg'l Water Quality Control Bd., 2019 Ca. App. LEXIS 554, at *20 (Ct. App. June 18, 2019) (stating that persons may be subject to an abatement order if they have caused or permitted a discharge of waste). This is an equitable remedy that provides an award to eliminate the hazard of prospective harm to the plaintiff. Generally, continuing nuisances are subject to abatement while permanent nuisances are subject to actions for damages. See People v. ConAgra Grocery Prods. Co., 17 Cal. App. 5th 51,

132-33, 227 Cal. Rptr. 3d 499, 569 (2017) (including an elaborate comparison of abatement to damages). States differ on methods to determine whether a nuisance is continuing or permanent. See Benton v. Savannah Airport Comm'n, 525 S.E.2d 383 (1999) (a permanent nuisance is relatively constant, whereas a continuing nuisance may be more intermittent or worsen over time); Cf. Weir v. E. Ohio Gas Co., 2003-Ohio-1229 30 (Ct. App.) (a

continuing nuisance arises when tortious conduct perpetually generates new violations and a permanent nuisance occurs when tortious conduct has ended, but continues to injure the plaintiff).

Spur Industries, Inc. v. Del E. Webb Development Co.

Supreme Court of Arizona, 1972.

108 Ariz. 178, 494 P.2d 700.

CAMERON, Vice Chief Justice. From a judgment permanently enjoining the defendant, Spur Industries, Inc., from operating a cattle feedlot near the plaintiff Del E. Webb Development Company's Sun City, Spur appeals. Webb cross-appeals. Although numerous issues are raised, we feel that it is necessary to answer only two questions. They are:

1. Where the operation of a business, such as a cattle feedlot is lawful in the first instance, but becomes a nuisance by reason of a nearby residential area, may the feedlot operation be enjoined in an action brought by the developer of the residential area?

2. Assuming that the nuisance may be enjoined, may the developer of a completely new town or urban area in a previously agricultural area be required to indemnify the operator of the feedlot who must move or cease operation because of the presence of the residential area created by the developer?

[Farming had existed in the general area involved (about 14 to 15 miles west of urban Phoenix) prior to 1950. The property owned by Spur was well suited for cattle feeding, and Spur's predecessors began this activity. In 1959 Del Webb began to develop Sun City, some distance from Spur. The development progressed rapidly and expanded, coming into closer proximity to Spur.]

By December 1967, Del Webb's property had extended south to Olive Avenue and Spur was within 500 feet of Olive Avenue to the north. ***Del Webb filed its original complaint alleging that in excess of 1,300 lots in the southwest portion were unfit for development for sale as residential lots because of the operation of the Spur feedlot.

Del Webb's suit complained that the Spur feeding operation was a public nuisance because of the flies and the odor which were drifting or being blown by the prevailing south to north wind over the southern portion of Sun City. At the time of the suit, Spur was feeding between 20,000 and 30,000 head of cattle, and the facts amply support the finding of the trial court that the feed pens had become a nuisance to the people

938

who resided in the southern part of Del Webb's development. The testimony indicated that cattle in a commercial feedlot will produce 35 to 40 pounds of wet manure per day, per head, or over a million

pounds of wet manure per day for 30,000 head of cattle, and that despite the admittedly good feedlot management and good housekeeping practices by Spur, the resulting odor and flies produced an annoying if not unhealthy situation as far as the senior citizens of southern Sun City were concerned. There is no doubt that some of the citizens of Sun City were unable to enjoy the outdoor living which Del Webb had advertised and that Del Webb was faced with sales resistance from prospective purchasers as well as strong and persistent complaints from the people who had purchased homes in that area. ***

Where the injury is slight, the remedy for minor inconveniences lies in an action for damages rather than in one for an injunction, [c]. Moreover, some courts have held, in the "balancing of conveniences" cases, that damages may be the sole remedy. ***

We have no difficulty, however, in agreeing with the conclusion of the trial court that Spur's operation was an enjoinable public nuisance as far as the people in the southern portion of Del Webb's Sun City were concerned. ***

It is clear that as to the citizens of Sun City, the operation of Spur's feedlot was both a public and a private nuisance. They could have successfully maintained an action to abate the nuisance. Del Webb, having shown a special injury in the loss of sales, had a standing to bring suit to enjoin the nuisance. [Cc] The judgment of the trial court permanently enjoining the operation of the feedlot is affirmed. ***

In the so-called "coming to the nuisance" cases, the courts have held that the residential landowner may not have relief if he knowingly

came into a neighborhood reserved for industrial or agricultural endeavors and has been damaged thereby:

"Plaintiffs chose to live in an area uncontrolled by zoning laws or restrictive covenants and remote from urban development. In such an area plaintiffs cannot complain that legitimate agricultural pursuits are being carried on in the vicinity, nor can plaintiffs, having chosen to build in an agricultural area, complain that the agricultural pursuits carried on in the area depreciate the value of their homes. The area being primarily agricultural, any opinion reflecting the value of such property must take this factor into account. The standards affecting the value of residence property in an urban setting, subject to zoning controls and controlled planning techniques, cannot be the standards by which agricultural properties are judged.

"People employed in a city who build their homes in suburban areas of the county beyond the limits of a city and zoning regulations do so for a reason. Some do so to avoid the high taxation rate imposed by cities, or to avoid special assessments for street, sewer and water projects. They

939

usually build on improved or hard surface highways, which have been built either at state or county expense and thereby avoid special assessments for these improvements. It may be that they desire to get away from the congestion of traffic, smoke, noise, foul air and the many other annoyances of city life. But with all these advantages in going beyond the area which is zoned and restricted to protect them in their homes, they must be prepared to take the

disadvantages." Dill v. Excel Packing Company, 183 Kan. 513, 525, 526, 331 P.2d 539, 548, 549 (1958). ***

Were Webb the only party injured, we would feel justified in holding that the doctrine of "coming to the nuisance" would have been a bar to the relief asked by Webb, and, on the other hand, had Spur located the feedlot near the outskirts of a city and had the city grown toward the feedlot, Spur would have to suffer the cost of abating the nuisance as to those people locating within the growth pattern of the expanding city. * * w

There was no indication in the instant case at the time Spur and its predecessors located in western Maricopa County that a new city would spring up, full-blown, alongside the feeding operation and that the developer of that city would ask the court to order Spur to move because of the new city. Spur is required to move not because of any wrongdoing on the part of Spur, but because of a proper and legitimate regard of the courts for the rights and interests of the public.

Del Webb, on the other hand, is entitled to the relief prayed for (a permanent injunction), not because Webb is blameless, but because of the damage to the people who have been encouraged to purchase homes in Sun City. It does not equitably or legally follow, however, that Webb, being entitled to the injunction, is then free of any liability to Spur if Webb has in fact been the cause of the damage Spur has sustained. It does not seem harsh to require a developer, who has taken advantage of the lesser land values in a rural area as well as the availability of large tracts of land on which to

build and develop a new town or city in the area, to indemnify those who are forced to leave as a result.

Having brought people to the nuisance to the foreseeable detriment of Spur, Webb must indemnify Spur for a reasonable amount of the cost of moving or shutting down. It should be noted that this relief to Spur is limited to a case wherein a developer has, with foreseeability, brought into a previously agricultural or industrial area the population which makes necessary the granting of an injunction against a lawful business and for which the business has no adequate relief.

It is therefore the decision of this court that the matter be remanded to the trial court for a hearing upon the damages sustained by the defendant Spur as a reasonable and direct result of the granting of the permanent injunction. Since the result of the appeal may appear novel and both sides have obtained a measure of relief, it is ordered that each side will bear its own costs.

940

Affirmed in part, reversed in part, and remanded for further proceedings consistent with this opinion.

NOTES AND QUESTIONS

1. The majority rule is that the plaintiff is not barred from recovery for either a public or a private nuisance by the sole fact that he "comes to the nuisance" by buying property adjoining the nuisance. See Restatement (Second) of Torts § 840D; see also Chase v. Eldred Borough, 902 A.2d 992 (Pa. Cmwlth. Ct. 2006) (nuisance constituted by a hail of baseballs from outfield 20 feet away; injunction to prevent play until the town built a protective fence; plaintiff had

bought house with knowledge of the baseball field in operation for 50 years).

2. The rule is not, however, an absolute one; and particularly in cases where other factors are more or less balanced, the fact that the plaintiff has come to the nuisance may be important and even decisive. An interesting case is East St. Johns Shingle Co. v. Portland, 195 Or. 505, 246 P.2d 554 (1952), where the plaintiffs shingle mill relied for its supply of logs upon rafting through a slough from the Columbia River. Defendant city discharged sewage into the river, which polluted the slough and fouled the logs, thus interfering seriously with plaintiffs business. When the plaintiff had bought its property twenty years before, the city was already polluting the slough; but with the growth of the community, the condition gradually became worse. The health of the city of Portland depended in large measure upon the sewage disposal, and there was no other way to dispose of it. It was held that plaintiff was not entitled either to an injunction or to damages.

3. Defendant does not acquire a prescriptive right to continue a nuisance through adverse use, unless he or she proves that the complaining party could have maintained a cause of action, but had failed to do so, during that period. Holsman v. Boiling Spring Bleaching Co., 14 N.J.Eq. 335 (1862); Ireland v. Bowman & Cockrell, 130 Ky. 153, 113 S.W. 56 (1908) (sustaining demurrer for defendant's claim to a prescriptive right to continue a nuisance where plaintiff had not been injured by the nuisance during the prior period of adverse use and thus had no cause of action during that time). By the majority rule, one cannot acquire a prescriptive right to maintain a public nuisance, no matter how long it has continued,

even though plaintiff brings suit for damages personal to himself. Gundy v. Merrill, 250 Mich. 416, 230 N.W. 163 (1930); Smejkal v. Empire Lite-Rock, Inc., 274 Or. 571, 547 P.2d 1363 (1976); and Foster Auto Parts, Inc. v. City of Portland, 171 Ore. App. 278, 15 P.3d 573 (2000).

4. The adjustment of the equities in the principal case by requiring indemnity is a new approach and the reverse of Boomer. It adds to the court's repertoire of remedies. How can these remedies be adjusted or combined to produce the fairest and most effective result? Suppose that newly arrived neighbors had obtained the injunction. How would the moving costs be apportioned? This topic has been the subject of some stimulating studies of the law of nuisance. See Calabresi & Melamed, Property Rules and Inalienability: One View of the Cathedral, 85 Harv. L. Rev. 1089 (1986);

Kaplow and Shavell, Property Rules Versus Liability Rules: An Economic Analysis, 109 Harv. L. Rev. 713 (1996) (asserting that many variables, besides externalities, need to be taken into account in choosing between a liability and property rule). One critique of Calabresi & Melamed's framework by Professor Rendleman refines and simplifies the Calabresi four-category world into a more balanced approach, suggesting courts determine separately issues of liability, remedy, and the measurement of recovery. Rendleman, Rehabilitating the Nuisance Injunction to Protect the Environment, 75 Wash. & Lee L. Rev. 1943 (2018). See also Symposium: Property

Rules, Liability Rules, and Inalienability: A Twenty-Five Year Retrospective, 106 Yale L.J. 2083 (1997).

Other Torts Involving Invasion of Interests in Real Property

Besides Trespass and Nuisance, there are two additional commonly recognized torts arising on behalf of a landowner or possessor of real property because of damage to his interests in the land. They are as follows:

1. Interference with the Support of Land. This applies to both lateral support and subjacent support. If the withdrawal of the support is sufficient to cause a subsidence of the land in its natural condition--i.e., "naturally necessary support" is withdrawn--the liability is strict and no showing of fault on the part of the defendant is required. Damage to artificial additions to the land is also included. If the withdrawal of support would not have caused a subsidence of the land in its natural condition but does cause subsidence because of artificial additions to the land, then liability may still exist, but it depends upon a finding that the actor's conduct was negligent. See Bonomi v. Backhouse, El.Bl. & El. 622, 120 Eng.Rep. 643 (1859), aff'd, 9 H.L. 503, 11 Eng.Rep. 825 (1861); Blake Constr. Co. v. United States, 218 Ct.Cl. 163, 585 F.2d 998 (1978); St. Louis-S.F.R.R. v. Wade, 607 F.2d 126 (5th Cir.1979); St. Joseph Light & Power Co. v. Kaw Valley Tunneling, 589 S.W.2d 260 (Mo. 1979). On subsidence caused by withdrawal of ground water, see Friendswood Dev. Co. v. Smith-Southwest Industries, Inc., 576 S.W.2d 21 (Tex. 1978), Sipriano v. Great Spring Waters of Am., Inc., 1 S.W.3d 75

(Tex. 1999), and Maddocks v. Giles, 728 A.2d 150 (Me. 1999). See also Restatement (Second) of Torts §§ 817-821 (1979).

2. Interference with the Use of Water. This tort covers three types of water: water in a watercourse or lake in or adjoining the land ("riparian rights"), ground water (sometime called subterranean water or underground water) and surface waters (from precipitation). On the subject of riparian rights, there are three distinct legal theories for determination of the rights involved. The first, adopted in England and used by a few American states, is the natural-flow theory--the right to have the water flow as it was wont to flow in nature, qualified only by the right of each riparian owner to make a limited use of it. The second, adopted in a majority of American states, is the reasonable-use theory--the right to be free from unreasonable uses that cause harm to the proprietor's own reasonable use. The third, adopted largely in the states of the west, is the prior-appropriation rule, that beneficial use of the water is the basis of the right to it and that priority of use is the basis of the division of it between appropriators when there is not

enough for all. The reasonable-use theory is the most flexible and adaptable one, and it has succeeded in adapting to both of the other two in terms of the factors affecting the determination of when a use is reasonable. It is now distinctly the majority rule. In a number of states, there are statutory provisions modifying the common law rules.

On the use of "ground water" (subsurface water), there are also several theories: (1) the English rule of absolute ownership, (2) the

American rule of reasonable use (a rule of correlative rights) and (3) the rule that an "underground stream" is treated like a surface stream. Here too, the adaptable reasonable-use rule is growing in number of adherents, and there are statutory modifications in some states. As for surface waters, there is general agreement that a landowner can use as much of them as he needs.

The subject is canvassed in Chapter 41 of the Restatement (Second) of Torts §§ 841-864.

CHAPTER 17 DEFAMATION

The term "tort" deriving from the Latin tortus, meaning twisted, is apt for the tort of defamation in two senses. The conduct involved is twisted, or crooked; and the law governing it is twisted, or wrenched sadly out of shape by its historical development. As one commentator put it, the law of defamation was "[m]arred in the making." 1 Thomas Atkins Street, The Foundations of Legal Liability: A Presentation of the Theory and Development of the Common Law 273 (1906). Rules and distinctions originating from ancient controversies over jurisdiction, long since obsolete, nevertheless became frozen and crystallized.

Originally the common law courts took no jurisdiction over any defamation, leaving it to be dealt with by the local seigniorial courts. When these fell into decay, the ecclesiastical courts began to take jurisdiction over slander, regarding it as a sin and punishing it with penance. Since the cases all involved oral defamation, slander became identified with word of mouth. When the ecclesiastical courts in turn began to lose their power, there was in the sixteenth century a slow infiltration of tort actions for slander into the common law courts. The excuse for this invasion of church jurisdiction was that some "temporal" damage had been done, distinct from the mere "spiritual" offense, and that it was properly a matter for the king's courts to redress. A long conflict of jurisdiction, part of the broader contest between church and state, finally fixed this as a requirement for any slander action at common law. See Ogden v. Turner, (1703) 87 Eng. Rep. 862 (K.B.); 6 Mod. Rep. 104 (Eng.); Davies v. Gardiner, (1593) 79 Eng. Rep. 1155 (K.B.); Popham 37 (Eng.);

Matthew v. Crass, (1614) 79 Eng. Rep. 276 (K.B.); Cro. Jac. 323 (Eng.). The result was that slander became actionable only in those cases where special damage of a "temporal" or pecuniary character was proved or could reasonably be assumed.

About the beginning of the seventeenth century, the Court of Star Chamber began independently to punish the crime of libel, in order to suppress the seditious publications that had multiplied with the invention of the printing press and the consequent explosion in the volume of the written word. In the earliest cases the libels were political, and the crime was a form of sedition. It was gradually extended to nonpolitical libels, and still later tort damages were awarded to the person defamed, probably in order to provide a legal substitute for the duel when it was forbidden. When the Star Chamber was abolished, jurisdiction over libel in turn passed to the common law courts. Through this process, libel became identified with printed or written defamation, while slander remained oral. Instead of merging the two torts, the courts maintained

their separate identity, as well as the distinct rules that had grown up around slander.

In the sixteenth and seventeenth centuries the judges were annoyed by the flood of frivolous actions let loose upon them once their jurisdiction over slander was established, and were reluctant to extend the possibilities of recovery. In addition, further development of the law of defamation was arrested when it encountered the rising tide of sentiment in favor of freedom of speech and the press. The courts also perceived an odium attaching to libel actions stemming

from the Star Chamber's association with secretive political prosecutions.

Few commentators have had a kind word to say about the general condition of the common law of defamation as it finally developed. Many calls have been made for its complete overhaul and reform. Some studies have been undertaken with this end in view. But they have failed to accomplish any worthwhile results. The outstanding historical treatment is Richard H. Helmholz, Introduction to Select Cases on Defamation to 1600, in 101 The Publications of the Seldon Society (Richard H. Helmholz ed„ 1985).

In 1964, a new and disruptive reformer entered the field. The United States Supreme Court decided the case of N.Y. Times Co. v. Sullivan, 376 U.S. 254 (1964), see infra page 987, holding that the free-speech and free- press provisions of the First Amendment, as applied through the Fourteenth Amendment, should radically restrict the common law of defamation.

Since that time, the decisions under the First Amendment have produced numerous changes in the law of defamation, some of them very far ranging in effect. The Supreme Court itself is still feeling its way on the course to take. The Court has wavered and changed its position on several matters, so that a good deal of uncertainty remains as to the extent of present law and future change in it. For this reason, the first part of this chapter will be primarily concerned with the common law of defamation, with only incidental references to constitutional holdings. Beginning with N.Y. Times Co. v. Sullivan, see infra page 987, the emphasis will be placed on the constitutional developments.

The law of torts involves a careful balancing of conflicting individual and social interests, with the establishment of principles, rules and standards for the purpose of enabling the court to reach the appropriate result in the particular case. The rules were geared to maximizing social interaction. In this chapter, you will observe that the same kind of balancing of interests is followed. Social concepts about the function of reputation have shifted from protection of honor to protection of property. This individual interest has had to be reconciled with the public interest in freedom of expression, not only as developed by the common law, but more recently by dint of the First Amendment. See Robert C. Post, The Social Foundations of Defamation Law: Reputation and the Constitution, 74 Cal. L. Rev. 691 (1986) and Rabban, The Emergence of Modern First

Amendment Doctrine, 50 U.Chic. L. Rev. 1207 (1983). This maelstrom of interests sometimes creates serious difficulties in maintaining orderly organization in the tort law of defamation. It is a stimulating and sometimes frustrating process to contemplate and study. In 2020 the American Law Institute will commence its Restatement (Third) of Torts: Defamation and Privacy. The process will take some years but will eventuate in a clearer body of law. Future editions of this book will benefit in drawing upon the process of drafting and the final version of the Third Restatement.

1. Nature of a Defamatory Communication

Belli v. Orlando Daily Newspapers, Inc.

United States Court of Appeals, Fifth Circuit, 1967.

389 F.2d 579, cert, denied 393 U.S. 825, 89 S.Ct. 88, 21 L.Ed.2d 96 (1968).

WISDOM, Circuit Judge. This action for damages for libel and slander is based on a false statement relating to Mr. Melvin Belli. Belli, an attorney of national prominence, is well known in the legal profession for his pioneering in the development of demonstrative evidence as a trial tactic and his success in obtaining large judgments for plaintiffs in personal injury suits. He is well known to the general public because of his representation of Jack Ruby and others in the public eye.

In March 1964 Mr. Leon Handley, an attorney in Orlando, Florida, in a conversation with Miss Jean Yothers, a columnist for the Orlando Evening Star, repeated a story he had heard concerning Belli. Handley told Yothers that the Florida Bar Association had invited Belli to serve as a member of one of the panels on the program of the Association at its 1955 Convention in Miami Beach. Belli agreed, with the understanding that "since there were no funds provided in the budget for payment per se for his contribution as a lawyer to the program the Florida Bar instead would pick up the hotel tab for himself and his wife during their stay." According to Handley, after Mr. and Mrs. Belli left Florida, the Association discovered that the Bellis "ran up a bunch of [clothing] bills" which they charged to their hotel room. The derogatory portion of the story was admittedly false:

The Bellis had not charged any purchases to their hotel account. Unfortunately for all, Jean Yothers reported, with embellishments, this nine-year old story in her gossip column in the Orlando Evening Star for March 19, 1964. [2] ***

* * *

[2] The article appeared in the Orlando Evening Star under the title "On the Town" by Jean Yothers and headed "Florida Bar Got the Bill". The full text is as follows:

Jack Ruby's flamboyant attorney Melvin Belli of San Francisco makes an indelible impression whither he goeth.

Consider the time he and Mrs. Belli were in Miami six or so years ago and Belli was a member of a panel at a program-meeting of the Florida Bar.

Here's what happened:

In making arrangements for Belli's participation it had been pointed out to him that since there were no funds provided in the budget for payment per se for his contribution as a lawyer to the program, the Florida Bar instead would pick up the hotel tab for himself and his wife during their stay.

Belli agreed.

Oops!

A local attorney remembers, with embarrassed chagrin, how the plan backfired on the Florida Bar.

After the well-dressed Mr. Belli and his well-dressed wife left town, the hotel where they had been staying received clothing bills

amounting to hundreds of $s. The Bellis had shopped in Miami stores and charged clothing bills to their hotel rooms.

The Florida Bar had been taken.

It was hard to stomach hut the Board of Governors of the Florida Bar picked up the Bellis' bill.

After all, that was the plan!

946

The district court dismissed Belli's complaint for failure to state a claim upon which relief could be granted. The court relied on the erroneous assumption that the determination whether a statement is a libel (or slander) per se is solely for the court. We consider it a close question whether the publication is so clearly defamatory that as a matter of law the case should not be submitted to the jury. We hold, however, that the publication itself, without reference to extrinsic facts, is capable of carrying a defamatory meaning. It is for a jury to determine whether it was so understood by the "common mind". We reverse and remand. ***

In Florida and in many states ***a libel per se is "any publication which exposes a person to distrust, hatred, contempt, ridicule, obloquy". For example, in Briggs v. Brown, 55 Fla. 417, 46 So. 325, 330 (1908) the court states the formula for libels per se as follows:

"A civil action for libel will lie when there has been a false and unprivileged publication by letter or otherwise which exposes a person to distrust, hatred, contempt, ridicule, or obloquy ***or which has a tendency to injure such person in his office, occupation, business, or employment. If the publication is false and not

privileged, and is such that its natural and proximate consequence necessarily causes injury to a person in his personal, social, official, or business relations or life, wrong and injury are presumed and implied, and such publication is actionable per se." ***

We find that the general law and Florida law are in agreement with Dean Prosser's conclusion: "It is for the court in the first instance to determine whether the words are reasonably capable of a particular interpretation, or whether they are necessarily so; it is then for the jury to say whether they were in fact understood as defamatory. If the language used is open to two meanings ***it is for the jury to determine whether the defamatory sense was the one conveyed." (Emphasis added.) Prosser, Law of Torts § 106, at 765 (1963). ***

947

Both judge and jury play a part in determining whether language constitutes libel. The Supreme Court has delineated these roles in Washington Post Co. v. Chaloner, 1919, 250 U.S. 290:

"A publication claimed to be defamatory must be read and construed in the sense in which the readers to whom it is addressed would ordinarily understand it. ***When thus read, if its meaning is so unambiguous as to reasonably bear but one interpretation, it is for the judge to say whether that signification is defamatory or not. If, upon the other hand, it is capable of two meanings, one of which would be libelous and actionable and the other not, it is for the jury to say, under all the circumstances surrounding its publication, including extraneous facts admissible in evidence, which of the two meanings would be attributed to it by those to whom it is addressed or by whom it may be read." ***

The district court in this case completely excised the jury's role, a position it could take only on the assumption that the publication unambiguously carried no defamatory meaning. Since the court did not spell out its reasons, the defendants in their briefs have attempted to articulate the rationale for the holding below.

The defendants argue that the article did not "hurt" Belli as an attorney, did not imply that he was "losing his touch with demonstrative evidence", did not affect his ability to "obtain those 'more adequate awards' for seamen and railroad workers for which he is so justly famous". In effect, so the argument runs, the article was nothing more than caustic comment on the acuteness of the Florida Bar Association. Belli simply "showed the Florida lawyers that their agreement was somewhat more favorable to him tha[n] they--in their naiveté--contemplated". In its harshest sense, they say, "the article implies no more than that Mr. Belli 'put one over' on the Florida Bar", which is "not quite the same as conning a destitute widow out of her homestead". In short, Mr. Belli just got "a little more out of the agreement than the Bar Association contemplated".

The defendants make a case--just barely--for the view that the article is capable of being reasonably interpreted as non-defamatory. But since the article on its face is also capable of carrying a defamatory meaning, it is for the jury to decide whether the words were in fact so understood.

The plaintiff contends, in his brief, "No person reading the headline and the article sub judice ***could conclude other than that Melvin Belli, both as a lawyer and as a private citizen is grasping, conniving, contemptible, dishonest; a cheat, swindler, trickster, deceiver,

defrauder; a person to be avoided, shunned and distrusted." Without benefit of the defendants' cavalier reading of the article or the plaintiffs retort hyperbolic, we consider that the bare bones of the article are capable of carrying the meaning that Belli tricked and deceived the Florida Bar Association out of hundreds of dollars worth of clothes. ***

948

The author's comment seems intended to insure the common reader's understanding of what purportedly happened. The common reader is likely to understand "take", just as Miss Yothers must have understood it. A recent dictionary defines it: "To cheat, deceive"; other dictionaries agree with this definition. The man in the street is likely to understand that hotel expenses do not include "hundreds of dollars worth of clothing". ***We hold that a jury might reasonably conclude that the conduct imputed to Belli was incompatible with the standards of an ethical lawyer and as such violated one of the four traditional categories of libel per se. A jury might also conclude that such conduct subjected Belli to contempt, and ridicule, humiliating him socially and injuring him professionally.

The Court has some doubt whether the publication in question carries a non-defamatory meaning. The Court has very little doubt that it carries a defamatory meaning. The Court has concluded however that the final determination of the issue of defamation should be made by a jury.

The story is nine years old. It was not made within the context of a discussion of an important public issue. Nevertheless, the delimiting effect of the law of libel on First Amendment rights and a free press

impels the Court not to excise the role of the jury. "Since one's reputation is the view which others take of him ***[w]hether an idea injures a person's reputation depends upon the opinions of those to whom it is published." [c] Thus, because it is impractical, even unreliable, to depend upon in-court testimony of recipients of the particular publication for determining whether that publication is defamatory, a logical function of the jury is to decide whether the plaintiff has been lowered in the esteem of those to whom the idea was published. ***

We reverse the dismissal of the district court and remand the case for further proceedings consistent with this opinion.

NOTES AND QUESTIONS

1. The older definition of defamation was that of a communication to a third person, "which is calculated to injure the reputation of another, by exposing him to hatred, contempt, or ridicule, is a libel." This appears to have originated with Baron Parke, in Parmiter v. Coupland, (1840) 151 Eng. Rep. 340 (Exch.) 342; 6 M. & W. 104, 109 (Eng.): It is still often repeated by the courts. For a modern articulation of the definition, see Gorman v. Wolpoff & Abramson, LLP, 584 F.3d 1147 (9th Cir. 2009) (citing definition of libel under California law as set forth in Cal. Civ. Code § 45); McLeod v. State, 206 P.3d 956 (Mont. 2009) (citing definition of libel under Montana law as set forth in Mont. Code Ann. § 27--1--802).

2. When the question has arisen, the later cases have recognized that this definition is too narrow. Defamation is rather a communication that tends to damage the plaintiffs "reputation," more

or less in the popular sense--that is, to diminish the respect, good will, confidence or esteem in

949

which he is held, or to excite adverse or unpleasant feelings about him. And this is the case even though decent citizens would regard him only with pity.

3. Which of the following are in themselves defamatory?

"He is under treatment for mental illness." Cowper v. Vannier, 156 N.E.2d 761 (Ill. App. Ct. 1959). "He refuses to pay his just debts." Thompson v. Adelberg & Berman, 205 S.W. 558 (Ky. 1918). "His parents were never married." Cf. Harris v. Nashville Trust Co., 162 S.W. 584 (Tenn. 1914). "He is a liar." Murphy v. Harty, 393 P.2d 206 (Or. 1964). A motion picture portrays an identifiable woman as having been raped by Rasputin. Youssoupoff v. Metro-Goldwyn-Mayer Pictures, Ltd., (1934) 50 T.L.R. 581 (A.C) (Eng.). His face "resembles a hard-boiled egg," "roly-poly, like a rubber beach toy," "relentlessly small town in fashion and horizon." Raymer v. Doubleday & Co., 615 F.2d 241 (5th Cir. 1980). "Sinatra's Mouthpiece." Rudin v. Dow Jones & Co., 510 F. Supp. 210 (S.D.N.Y. 1981). "He is a son of a bitch." Cf. White v. Valenta, Cal. Rptr. 241 (Cal. Dist. Ct. App. 1965); Bryson v. News Am. Publ'ns, Inc., 672 N.E.2d 1207 (Ill. 1996) ("I remembered what a slut she was and forgot about the sorriness I'd been holding onto for her.").

Grant v. Reader's Digest Ass'n

United States Circuit Court of Appeals, Second Circuit, 1945.

151 F.2d 733.

L. HAND, CIRCUIT Judge. This is an appeal from a judgment dismissing a complaint in libel for insufficiency in law upon its face. The complaint alleged that the plaintiff was a Massachusetts lawyer, living in that state; that the defendant, a New York corporation, published a periodical of general circulation, read by lawyers, judges and the general public; and that one issue of the periodical contained an article entitled "I Object To My Union in Politics," in which the following passage appeared;

"And another thing. In my state the Political Action Committee has hired as its legislative agent one, Sidney S. Grant, who but recently was a legislative representative for the Massachusetts Communist Party."

The innuendo then alleged that this passage charged the plaintiff with having represented the Communist Party in Massachusetts as its legislative agent, which was untrue and malicious. Two questions arise: (1) What meaning the jury might attribute to the words; (2) whether the meaning so attributed was libellous. ***The case therefore turns upon whether it is libellous in New York to write of a lawyer that he has acted as agent of the Communist Party, and is a believer in its aims and methods.

The interest at stake in all defamation is concededly the reputation of the person assailed; and any moral obliquity of the opinions of those in whose minds the words might lessen that reputation, would normally be relevant only in mitigation of damages. A man may value his reputation even among those who do not embrace the prevailing moral standards;

and it would seem that the jury should be allowed to appraise how far he should be indemnified for the disesteem of such persons. That is the usual rule. [Cc] The New York decisions define libel, in accordance with the usual rubric, as consisting of utterances which arouse "hatred, contempt, scorn, obloquy or shame," and the like. [Cc] However, the opinions at times seem to make it a condition that to be actionable the words must be such as would so affect "right-thinking" people. ***The same limitation has apparently been recognized in England [c]; and it is fairly plain that there must come a point where that is true. As was said in Mawe v. Piggott, Irish Rep. 4 Comm.Law, 54, 62, among those "who were themselves criminal or sympathized with crime," it would expose one "to great odium to represent him as an informer or prosecutor or otherwise aiding in the detection of crime"; yet certainly the words would not be actionable. Be that as it may, in New York, if the exception covers more than such a case, it does not go far enough to excuse the utterance at bar. Katapodis v. Brooklyn Spectator, Inc., 287 N.Y. 17, 38 N.E.2d 112 ***held that the imputation of extreme poverty might be actionable; although certainly "right-thinking people" ought not to shun, or despise, or otherwise condemn one because he is poor. Indeed, the only declaration of the Court of Appeals [c] leaves it still open whether it is not libellous to say that a man is insane. [Cc]

We do not believe, therefore, that we need say whether "right-thinking" people would harbor similar feelings toward a lawyer, because he had been an agent for the Communist Party, or was a sympathizer with its aims and means. It is enough if there be some, as there certainly are, who would feel so, even though they would be "wrong-thinking" people if they did. ***

Judgment reversed; cause remanded.

NOTES AND QUESTIONS

1. The leading case is Peck v. Tribune Co., 214 U.S. 185 (1909), where defendant, by mistake, published plaintiffs picture accompanying a testimonial signed by another woman, who was a nurse, in praise of the merits of Duffy's Pure Malt Whiskey. Holmes, J.: "If the advertisement obviously would hurt the plaintiff in the estimation of an important and respectable part of the community, liability is not a question of a majority vote." 214 U.S. at 190. Massachusetts courts have kept the Holmesian faith: King v. Globe Newspaper Co., 512 N.E.2d 241 (Mass. 1987) (finding that because statement about plaintiff governor had both a libelous and a non-libelous meaning, trial judge could not enter summary judgment for defendant).

2. What about the statement that plaintiff is obtaining a divorce? Gersten v. Newark Morning Ledger Co., 145 A.2d 56 (N.J. Super. Ct. Law Div. 1958). Or that a businessman is a "price cutter"? Meyerson v. Hurlbut, 98 F.2d 232 (D.C. Cir. 1938). Or that a kosher meat dealer sells bacon? Braun v. Armour & Co., 173 N.E. 845 (N.Y. 1930). The issue is embedded in time,

place, and culture. Jones v. R.L. Polk & Co., 67 So. 577 (Ala. 1915) (to be described as "colored" defamatory); Natchez Times Publ'g Co. v. Dunigan, 72 So.2d 681 (Miss. 1954) (to be listed as a "negro" in the telephone book is defamatory in Mississippi); but not so in England, Forbes v. King, (1833) 1 Dowl. 672 (K.B.) 673 (Eng.) (writing that plaintiff is a "Man Friday" is not defamatory). An

imputation of homosexuality? Nowark v. Maguire, 22 A.D.2d 901 (N.Y. App. Div. 1964); Buck v. Savage, 323 S.W.2d 363 (Tex. Civ. App. 1959); Hayes v. Smith, 832 P.2d. 1022 (Colo. App. 1991); Starks v. McCabe, 49 Va. Cir. 554 (Va. Cir. Ct. 1998).

3. There must, however, be an element of discredit or disgrace, even in the eyes of the particular segment of the community. Thus if a Democrat is called a Republican, it is quite probable that unpleasant feelings would be aroused against him in the minds of some other Democrats; but it can scarcely be regarded as defamatory. Cf. Steinman v. Roberts, 23 A.D.2d 693 (N.Y. App. Div. 1965) ("liberal"); Haas v. Evening Democrat Co., 107 N.W.2d 444 (Iowa 1961) ("conservative"). Polarization of modern politics may test these cases. What of a publication saying a woman is a "feminist"?

4. A statement that plaintiff has informed the police about crime has been held not to be defamatory. Why? Mawe v. Piggott, (1869) 4 Ir. R.-C.L. 54; Rose v. Borenstein, 119 N.Y.S.2d 288 (1953); Byrne v. Deane, (1937) 1 K.B. 818 (Eng.). In the last case the allegation was that the plaintiff had "ratted" to the police about fellow club members' illegal gambling on club premises. Yet the goodwill of fellow club members may be vital to a person's functioning in society. Why have a test that fails to undergird the individual's interest in being free of imputations that tend to estrange her from those with whom social intercourse is most important?

Pleading Defamation

5. When the meaning that defames the plaintiff is clear upon the face of the words uttered, the cause of action is made out by pleading, and proving, the words themselves and their communication to a

third person. However, defamers can be highly creative, imaginative, and devious in conveying a defamatory imputation in words or conduct. As the Restatement of the Law (Second) of Torts § 563 comment c (1977) states, defamatory matter may be communicated "by innuendo, by figure of speech, by expressions of belief, by allusion or by irony or satire... or by words spoken in jest if not so understood."

Where the meaning is not clear, the plaintiff must plead the context that renders the words or conduct defamatory. The defamatory imputation may arise from the juxtaposition of material, as where an actress participates in a commercial ad with sexually explicit pornography. She was libeled because of the implication that she willingly participated in pornography. Geary v. Goldstein, 831 F. Supp. 269, 277--78 (S.D.N.Y. 1993). The matter may be defamatory by making material omissions. For example, omitting to report the presence of two other persons at a domestic shooting gave rise to the implication that plaintiff was having an affair with suspect's husband. Memphis Publ'g Co. v. Nichols, 569 S.W.2d 412 (Tenn. 1978).

952

The law of pleading the defamation is arcane and technical. For example, take the words: "He burned down his own barn." This the plaintiff would have a perfect right to do if he chose, and on its face the statement does not defame him. Here the courts very early set up quite technical rules as to the way in which the action must be pleaded; and although these have been relaxed slightly here and

there, they are in the main still rather rigidly followed. In such a case the plaintiff must plead:

A. The defamatory words, "He burned down his own barn."

B. The publication: communication of the words to a third person. "Defendant spoke these words to X."

C. Extrinsic facts, because of which the words were reasonably understood to convey a meaning defaming the plaintiff. This is called the "inducement." For example, X knew that plaintiff had insurance on the barn.

D. A formal allegation that the words were spoken of and concerning plaintiff. This is called the "colloquium." "He (meaning the plaintiff) burned down his own barn."

E. An allegation of the particular defamatory meaning conveyed by the words. This is called the "innuendo." In this case, that the words were understood by X to mean that plaintiff had burned the barn in order to defraud the insurance company, which would be the crime of arson.

F. Special damages, when they are necessary to the cause of action.

6. Both the colloquium and the innuendo must be reasonable in the light of the words spoken and the facts pleaded in the inducement. If the words, together with such facts, do not fairly support the defamatory meaning pleaded, no cause of action is made out. See also Davis v. R.K.O. Radio Pictures, Inc., 191 F.2d 901 (8th Cir. 1951) (colloquium) (applying Missouri law); Grice v. Holk, 108 So. 2d 359 (Ala. 1949) (innuendo).

Kilian v. Doubleday & Co., Inc.

Supreme Court of Pennsylvania, 1951.

367 Pa. 117, 79A.2d 657.

HORACE Stern, Justice. In this action for libel the jury rendered a verdict in favor of defendant. Plaintiff appeals from the refusal of the court below to grant him a new trial.

This is the way in which the allegedly libelous article came to be written:--At the American University in Washington a course in English was conducted by Don M. Wolfe, the students being disabled veterans of World War II. The course consisted, in part, of the writing by the students of essays or stories about their personal experiences in the war; their compositions would be submitted to Dr. Wolfe, who suggested corrections and revisions. Dr. Wolfe conceived the idea of having these stories published in book form, and, after an original publication by another concern, he entered into a contract with defendant, Doubleday & Company, for that purpose. Each student in the class, 53 in all, contributed at least one article. The book was published under the title

953

"The Purple Testament", and it was advertised in the jacket as consisting of "the native eloquence of absolute honesty," and as constituting "the fragments of their [the authors'] own intimate experiences." Some 9000 copies were sold and distributed throughout the United States. Among the articles was one by Joseph M. O'Connell which gave rise to the present suit.

O'Connell was a soldier who had been seriously injured during the course of the Normandy invasion and was hospitalized from August to October, 1944, at a station hospital about 12 miles from Lichfield, England, where there was a large replacement depot. In the original draft of the article which he wrote he narrated incidents said to have occurred at the Lichfield camp and which, he testified at the trial, were described to him by individuals who had allegedly witnessed them. Dr. Wolfe, to whom he submitted the draft several times, stated that he "thought it was interesting, and that it was the first time he had heard about it", but twice returned it with the suggestion that O'Connell should use "more descriptive detail", that he should "make it more vivid", that it "did not have in it the sights, sounds and bits of conversation necessary to make the story readable". The result was that whereas O'Connell had originally written the article in the third person he now wrote it, in order to "make it more vivid", in the first person, purporting that the incidents he narrated occurred under his own personal observation and in his own experience.

The story, as it finally appeared in "The Purple Testament", may be condensed as follows:--I [O'Connell] and my buddy, while being transferred in an ambulance from one hospital to another in England, reached a big army camp near Lichfield. The camp was dreary and ugly; it reminded me of the rotten, filthy German prison camps I had seen in France. As we lay in the ambulance we heard a loud voice outside shouting: "Just let me catch one of you sons o'bitches loaf on this detail and you'll get twenty lashes when you get back tonight." A group of four men came to carry us into the hospital; they were all dressed in blue pants and shirts with a large letter "P" sewed on their clothes. The same loud voice I had heard a few minutes before said:

"You're not supposed to talk to these _ prisoners." A big heavy-set sergeant stepped closer to me and said, "All they are is a bunch of cowards. They are too yellow to go back to combat. They'll be glad to go back when they finish with this prison." The sergeant ordered them to carry us into the hospital; as they were placing me there in my bed I noticed that one of them had all the fingers of his right hand missing and three fingers of his left. Could such things be allowed in our army? If so, it was being covered up by the brass, and the brass were making suckers of the American people. A ward attendant limping around outside the room came in and said: "I was blown out of a tank; all the muscle of my right leg was blown away. ***I came through this way on my way [back] to combat. One day the old man (Colonel _) ordered us out on a ten-mile hike. After about two

miles I fell flat on my face. They ordered me on, but I couldn't go. So the next day they took me before the old dictator. He ordered me before a quick court martial. I got six months of hard labor. The doctor said I was unfit for hard labor, so they assigned me to this hospital. I'm still a prisoner. The other night a guard caught me stealing a piece of bread from the kitchen, and I got fifty lashes for it." ***In the morning the old colonel himself came along to inspect the hospital. He wasn't a big guy, but he was stockily built. Behind his glasses his eyes were mean. He looked like a man who enjoys seeing another man suffer. He was surrounded by a lot of other officers. None of them looked good to me. After one scowling glance at Red [my buddy] and me, he left. As we were being carried down the hall of the ward the big sergeant was clubbing a G.I. in a corner, while some officers looked on. I only hoped that some day I would

meet up with that big sergeant and the rest of the people that ran that prison. The death chair would be too good for them. But as always, Colonel _ and the rest of the responsible officers will be protected by the big brass. Mark my word, Colonel _ and his bullies will get off light. That is Lichfield justice.

It is not questioned that by "Colonel _", the "old dictator", and "the old colonel", was meant Colonel Kilian, the present plaintiff, who was the commanding officer of the Lichfield camp. At the end of the article as published there was appended a footnote which Dr. Wolfe himself had added and which stated:--"On August 29, 1946, the Associated Press reported that Colonel James A. Kilian was convicted 'of permitting cruel and unusual punishment of American soldiers.' He was reprimanded by the military court and fined $500.--Editor." This insertion was obviously intended to give the impression that what was said or implied in the article in regard to Colonel Kilian was corroborated by his conviction, and further that, as the author of the article had predicted, he "got off light".

The fact in regard to plaintiffs trial before a military court in 1946 is this:--He was charged with authorizing, aiding and abetting the imposition of cruel, unusual and unauthorized punishments upon prisoners in confinement at the depot of which he was the Commanding Officer. The punishments referred to were itemized in the charge. A second specification was that he knowingly permitted the imposition of such punishments. As to the first specification--authorizing, aiding and abetting--he was acquitted; as to the second specification--knowingly permitting--he was acquitted of knowingly permitting and found guilty merely of permitting; in other words, he was convicted of neglect, but not of actual wrongdoing or of

acquiescing in what occurred. Moreover, many of the alleged punishments specified in the charge as having been "permitted" were deleted by the court because they were not supported by the evidence. ***

As affirmative defense to the action defendant pleaded justification on the ground that the publication was "a true and accurate account of

955

events which were observed by the author of the article in question." How is that defense supported by the testimony presented at the trial? As far as O'Connell being an eye-witness of any of the alleged happenings at the camp is concerned, he admitted on the witness stand that he never was at Lichfield; therefore, his article, in that respect, was wholly false. Defendant produced as witnesses three soldiers who were at Lichfield, who testified to punishments inflicted on them or observed by them as imposed on others, but none of the incidents they described tended to prove that a single one of the events narrated in the O'Connell article actually occurred; therefore such testimony was not properly admissible to prove the truth of the publication. While, in order to support a defense of truth, it is necessary merely to prove that it was substantially true, and while, therefore, if the testimony of those witnesses had shown a variance merely in the details of the events described in the article it would nevertheless have been admissible as giving support to the plea of truth, it furnished no such support by proving that other and wholly different incidents occurred although these also may have been equally blameworthy. ***"Specific charges cannot be justified by

showing the plaintiffs general bad character; and if the accusation is one of particular misconduct, such as stealing a watch from A, it is not enough to show a different offense, even though it be a more serious one, such as stealing a clock from A, or six watches from B." Prosser on Torts, p. 855, § 95. ***None of defendant's testimony showed any instances at the camp, as alleged in O'Connell's article, of lashing, of cursing prisoners, of having a soldier whose fingers were missing act as a stretcher bearer, of ordering a badly wounded veteran on a ten-mile hike. ***It is obvious that there was not a shred of testimony presented at the trial to prove either that the author of the article saw any of the events he narrated, or that those events or even substantially similar ones occurred, or that plaintiff was aware of any such happenings, or that he sanctioned them, or that he was a "dictator", or that in his very appearance he looked like a man who would enjoy seeing another man suffer. The court, therefore, was in error in submitting to the jury, as it did, the question whether the publication was substantially true. ***

Judgment reversed and new trial awarded.

NOTES AND QUESTIONS

1. Under the common law the defense that the defamatory statement was true was not open to the defendant in a prosecution for criminal libel. That crime was originated to suppress sedition, and later extended to prevent breaches of the peace, and neither was likely to be minimized if the defamation were true. Hence the criminal courts took no account of any freedom to publish the truth. The Case de Libellis Famosis, (1605) 77 Eng. Rep. 250 (K.B.); 5 Co. Rep. 125 a (Eng.); The King v. Franklin, (1731) 25 Eng. Rep. 499 (Ch.); W. Kei.

76 (Eng.). This explains the statement, usually attributed to Lord Mansfield, that "the greater the truth the greater the libel." In the Unites States, the Supreme Court has held that a criminal libel

statute is unconstitutional if it imposes a penalty for making a true statement about a public official. Garrison v. Louisiana, 379 U.S. 64 (1964). However, a criminal libel prosecution of public persons (and private persons) is sustainable if "calculated falsehood" is proved.

2. The criminal law rule never was applied to civil actions. Johns v. Gittings, (1589) 78 Eng. Rep. 495 (Q.B.); Gro. Eliz. 239 (Eng.); Hilsden v. Mercer, (1623) 79 Eng. Rep. 586 (K.B.); Cro. Jac. 677 (Eng.). At common law there has been general agreement that an action of defamation will lie only if the statement is both defamatory and false.

Even where true and thus not actionable as defamation, a statement may support a cause of action for invasion of privacy. See Hall v. Post, 372 S.E.2d 711 (N.C. 1988), see infra Chapter 18 page 1093.

3. Burden of Proof. It has long been customary for the plaintiff to allege in his complaint that the statement is false. The common law raised a presumption of the falsity of all statements that were defamatory. As a result truth has been consistently treated as an affirmative defense, which the defendant must raise and on which he has the burden of proof. Supreme Court decisions engendered doubt about the soundness of this common law position. In the 1986 decision of Phila. Newspapers, Inc. v. Hepps, 475 U.S. 767 (1986), see infra page 1026, the Supreme Court in a 5-to-4 decision held

that in an action against a "media defendant for speech of public concern," the plaintiff had the burden of proving falsity.

4. As the principal case indicates, the determination is whether the statement is substantially true. See, e.g., Sun Printing & Publ'g Ass'n v. Schenck, 98 F. 925 (2d Cir. 1900) (finding that specific charge of crime not justified by proof of another and more serious crime); Crellin v. Thomas, 247 P.2d 264 (Utah 1952) (charge that plaintiff was a "whore" not shown by evidence that she worked for a short time as a "dance hall girl" or "percentage girl"); see Restatement (Second) of Torts §§ 581A, 613 (1977); St. Surin v. V.I. Daily News, 21 F.3d 1309 (3d Cir. 1994) (finding that a statement indicating that plaintiff was under criminal investigation, implied by references to a "prosecutor" in the headline and the U.S. Attorney's office in the article's body, was not coextensive with the truth that he was being investigated by the Environmental Protection Agency). In St. Surin, the sting of the article was found to be factually untrue. Whereas in Smith v. Maldonado, 85 Cal. Rptr.2d 397 (Cal. Ct. App. 1999), a factually true newspaper report could not be rendered defamatory by the defendant highlighting a passage in the report and distributing it to third parties.

In the principal case, O'Connell, the writer of the story, states that some of the "events" were told to him by other persons. Suppose that the story had been told to him. but it was untrue. Liability on his part?

957

Neiman-Marcus v. Lait

United States District Court, Southern District of New York, 1952.

13 F.R.D. 311.

Irving R. Kaufman, District Judge. ***The defendants are authors of a book entitled "U.S.A. Confidential". The plaintiffs are the Neiman-Marcus Company, a Texas corporation operating a department store at Dallas, Texas, and three groups of its employees. They allege that the following matter libelled and defamed them: ***

"He [Stanley Marcus, president of plaintiff Neiman-Marcus Company] may not know that some Neiman models are call girls--the top babes in town. The guy who escorts one feels in the same league with the playboys who took out Ziegfeld's glorified. Price, a hundred bucks a night.

"The salesgirls are good, too--pretty, and often much cheaper--twenty bucks on the average. They're more fun, too, not as snooty as the models. We got this confidential, from a Dallas wolf.

"Neiman-Marcus also contributes to the improvement of the local breed when it imports New York models to make a flash at style shows. These girls are the cream of the crop. Oil millionaires toss around thousand-dollar bills for a chance to take them out.

"Neiman's was a women's specialty shop until the old biddies who patronized it decided their husbands should get class, too. So Neiman's put in a men's store. Well, you should see what happened. You wonder how all the faggots got to the wild and woolly. You thought those with talent ended up in New York and Hollywood and the plodders got government jobs in Washington. Then you learn the nucleus of the Dallas fairy colony is composed of many Neiman

dress and millinery designers, imported from New York and Paris, who sent for their boy friends when the men's store expanded. Now most of the sales staff are fairies, too." ***

[Plaintiffs sued in the following groups:]

(1) Nine individual models who constitute the entire group of models at the time of the publication ***;

(2) Fifteen salesmen of a total of twenty-five suing on their own behalf and on behalf of the others ***;

(3) Thirty saleswomen of a total of 382 suing on their own behalf and on behalf of the others. ***

[T]he following propositions are rather widely accepted:

(1) Where the group or class libelled is large, none can sue even though the language used is inclusive. [Cc]

(2) Where the group or class libelled is small, and each and every member of the group or class is referred to, then any individual member can sue. [Cc]

958

Conflict arises when the publication complained of libels some or less than all of a designated small group. Some courts say no cause of action exists in any individual of the group. [Cc] Other courts in other states would apparently allow such an action. [Cc] ***

[I]t is the opinion of this Court that the plaintiff salesmen, of whom it is alleged that "most ***are fairies" have a cause of action in New York and most likely other states ***Defendants' motion to dismiss as

to the salesmen for failure to state a claim upon which relief can be granted is denied.

The plaintiff saleswomen are in a different category. The alleged defamatory statement in defendants' book speaks of the saleswomen generally. While it does not use the word "all" or similar terminology, yet it stands unqualified. However, the group of saleswomen is extremely large, consisting of 382 members at the time of publication. No specific individual is named in the alleged libelous statement. I am not cited to a single case which would support a cause of action by an individual member of any group of such magnitude. ***

Giving the plaintiff saleswomen the benefit of all legitimate favorable inferences, the defendants' alleged libel cannot reasonably be said to concern more than the saleswomen as a class. There is no language referring to some ascertained or ascertainable person. Nor is the class so small that it follows that defamation of the class infects the individual of the class. This Court so holds as a matter of law since it is of the opinion that no reasonable man would take the writer seriously and conclude from the publication a reference to any individual saleswoman. [Cc]

While it is generally recognized that even where the group is large, a member of the group may have a cause of action if some particular circumstances point to the plaintiff as the person defamed, no such circumstances are alleged in the amended complaint. ***

Accordingly, it is the opinion of this Court that as a matter of law the individual saleswomen do not state a claim for libel upon which relief

can be granted and the motion to dismiss their cause of action is granted.***

The amended complaint is dismissed with leave to file separate complaints as to the two groups of individuals and the corporation, all in conformity with this opinion.

NOTES AND QUESTIONS

1. For which of the following statements may an individual member of the group or class maintain an action for defamation?

Watson v. Detroit Journal Co., 107 N.W. 81 (Mich. 1906). "That jury was bribed." Byers v. Martin, 2 Colo. 605 (Colo. 1875). "The election board is crooked." Story v. Jones, 52 III. App. 112 (Ill. App. Ct. 1893). "All men are liars." Psalms 116:11.

959

2. Restatement (Second) of Torts § 564A (1977) states: "One who publishes defamatory matter concerning a group or class of persons is subject to liability to an individual member of it if, but only if, (a) the group or class is so small that the matter can reasonably be understood to refer to the member, or (b) the circumstances of publication reasonably give rise to the conclusion that there is particular reference to the member." For an article defending the Restatement rule, see Nat Stern, The Certainty Principle as Justification for the Group Defamation Rule, 40 Ariz. St. L.J. 951 (2008). No recovery was allowed when defendant, addressing three men, said: "One of you is a crook." Cohn v. Brecher, 192 N.Y.S.2d 877 (N.Y. Spec. Term 1959). Other cases include: Friends of Gong v. Pac. Culture, 109 Fed. App'x 442 (2d Cir. 2004) (concerning

defamatory statements about non-plaintiff practitioners of Falun Gong, the practice of Falun Gong itself, or entire group of New York-based Falun Gong Devotees); Alvord-Polk, Inc. v. F. Schumacher & Co., 37 F.3d 996, 1015 (3d Cir. 1994) (concerning defamatory statement by defendants referring to over 800 dealers as pirates); Mich. United Conservation Clubs v. CBS News, 485 F. Supp. 893 (W.D. Mich. 1980) (involving case where plaintiffs were several of more than a million hunters allegedly defamed by television networks' portrayal of hunters). However, recovery was allowed in Ball v. White, 143 N.W.2d 188 (Mich. Ct. App. 1966) (one out of five); Forbes v. Johnson, 50 Ky. (11 B. Mon.) 48 (1850) (statement that a note had been altered by A or by B); Hardy v. Williamson, 12 S.E. 874 (Ga. 1891) (eleven engineers employed by one company, "or some of them").

3. The "numerical" approach to group libel has found approval in a number of jurisdictions. See Restatement (Second) of Torts § 564A, comment b (noting that the groups that are generally successful in pursuing group libel actions number 25 or less). See also Church of Scientology Int'l v. Time Warner, Inc., 806 F. Supp. 1157 (S.D.N.Y. 1992) (Church of Scientology International claimed it was defamed by a Time article; nearly two hundred entities constituted the Church; thus general references were not "of and concerning" the plaintiff; four specific references could be so construed); Tex. Beef Group v. Winfrey, 11 F. Supp. 2d 858 (N.D. Tex. 1998) (finding that the segment of program describing the dangers of Mad Cow Disease in the United States did not identify the Texas Panhandle ranchers who brought the action for the decline in their business following the program).

A minority of jurisdictions have questioned this "numerical" approach. In McCullough v. Cities Serv. Co., 676 P.2d 833 (Okla. 1984), the plaintiff sought to bring an action as an osteopath based upon a publication that attacked generally that branch of the medical profession. The court held that the plaintiffs action was not maintainable noting that there were 19,686 doctors of osteopathy in the United States. Although size alone was not determinative, it was an important factor in determining whether the "intensity of suspicion" cast upon the plaintiff was sufficient to give him a right to maintain a personal action. In Brady v. Ottaway Newspapers, Inc., 84 A.D.2d 226 (N.Y. App. Div. 1981), and individual police officer sued newspaper over an article claiming that unidentified members of the police department of the City of Newburgh, numbering fifty-three people, had in essence aided and abetted police corruption. Here, the court rejected the

"numerical" rule and instead adopted "intensity of suspicion" test, holding that the specificity of the charge, the high degree of organization in the police department, and the prominence of the department in the community outweighed the problems associated with a group defamation of this size. What of allegation that Nat'l Football League players take steroids? See Fawcett Publ'ns, Inc. v. Morris, 377 P.2d 42 (Okla. 1962), cert, denied, 376 U.S. 513 (1964) (holding that statement concerning unidentifiable members of University of Oklahoma football team used illegal amphetamines was actionable).

4. N.Y. Times Co. v. Sullivan, see infra page 987, touches the issue of identification where the plaintiff is a public official. The Supreme Court pointed to the implications for free speech should public officials assert that a criticism of governmental action identify them as individuals. "Public authorities must not be permitted to stifle commentary concerning their conduct by simply substituting individuals as plaintiffs in a defamation action." Edgartown Police Patrolmen's Ass'n v. Johnson, 522 F. Supp. 1149 (D. Mass. 1981) the matter was clarified by the court in Rosenblatt v. Baer, 383 U.S. 75 (1966), requiring that if the individual were to be identified to ground an action in defamation, he or she must establish that the defamatory matter specifically identify him or her. The reasonable reader must associate the plaintiff with the defamatory imputation for a reason beyond his public capacity and responsibility. Plaintiff, a member of a group, will base a good cause of action by pleading and proving that the publication implicates his or her individual shortcomings.

In the small Virginia town of Elkton (population about 2,000), M. Lee Dearing, the mayor of Elkton, published a series of articles accusing the Elkton police of a litany of wrongdoing. The force had five to eight officers. That fact that the publications were "of and concerning" the officers, including the plaintiff, was plain. However, the Virginia Supreme Court in Dean v. Dearing, 561 S.E.2d 686 (Va. 2002), held that the First Amendment was a bar to plaintiff grounding a defamation action. It found no extrinsic facts were pleaded that pointed to individual officers. For a recommendation for a simplification of the law, see Joseph H. King, Jr., Reference to the

Plaintiff Requirement in Defamatory Statements Directed at Groups, 35 Wake Forest L. Rev. 343 (2000).

5. Immediately after the Second World War, social concern, resulting in some legislation, focused on group defamation directed at, among others, Jews, Catholics, and African-Americans. An Illinois Act, conferring protection on racial minorities from defamation, survived a constitutional challenge in Beauharnais v. Illinois, 343 U.S. 250 (1952). First Amendment jurisprudence has since undermined the validity of such legislation, see N.Y. Times Co. v. Sullivan, infra page 987 & Hustler Magazine v. Falwell, infra page 1112. Racial hate speech has continued as a social issue. At the same time, pornography and sexual harassment have been perceived as social evils. See Catharine MacKinnon, Pornography, Civil Rights, and Speech, 20 Harv. C.R.-C.L. L. Rev. 1 (1985). For a powerful argument that hate speech should be regulated as part of our commitment to human dignity and to inclusion and respect for members of vulnerable minorities, see Jeremy

Waldron, The Harm in Hate Speech (2012). Again, the debate has turned to appropriate legal response within the confines of the First Amendment. In R.A.V. v. City of St. Paul, 505 U.S. 377 (1992), the U.S. Supreme Court reviewed the constitutionality of St. Paul's Bias-Motivated Crime Ordinance, which proscribed actions arousing "anger, alarm, or resentment in others on the basis of race, color, creed, religion or gender." The petitioner and others were charged with the criminal offense. They had burned a cross in the backyard of an African-American family. The legislation was found

unconstitutional because it regulated only some violence-inducing speech and because it controlled content and threatened censorship of ideas. First Amendment Jurisprudence, and the law of defamation, is imbued with the idea of individual rights. Is it legitimate to shift to a recognition of group rights? Why should the "victims" of this speech bear the burden of the benefit of the public's free-speech interest? See Frederick Schauer, Uncoupling Free Speech, 92 Colum. L. Rev. 1321 (1992) (suggesting a public scheme for compensating victims).

6. Who Can Be Defamed? Any living person can be defamed. Even a child ten minutes old may have a cause of action if called a bastard. On the other hand, it is generally agreed that there can be no actionable defamation of the dead, since there is no living person whose reputation is affected. Bello v. Random House, Inc., 422 S.W.2d 339 (Mo. 1967); Flynn v. Higham, 197 Cal. Rptr. 145 (Cal. Ct. App. 1983) (dismissed action by the late actor Errol Flynn's children alleging that defendants defamed their father by saying he was a homosexual Nazi spy). The defamation of the dead may, however, also defame the living, as where it is said that the plaintiff's deceased mother was not married to his father. Marrill v. Post Publ'g Co., 83 N.E. 419 (Mass. 1908); see also Meeropol v. Nizer, 381 F. Supp. 29 (S.D.N.Y. 1974).

7. A corporation can have no reputation in the personal sense, and cannot be defamed, for example, by being accused of unchastity. Neither can a partnership, as such. "The venereal disease was not a partnership malady. That was individual property." Gilbert v. Crystal Fountain Lodge, 4 S.E. 905, 906 (Ga. 1887) (Bleckley, C.J.). However, a corporation may maintain an action for defamation that casts an aspersion upon its honesty, credit, efficiency, or other

business or moral character. Brown & Williamson Tobacco Corp. v. Jacobson, 827 F.2d 1119, 1122 (7th Cir. 1987) (finding that company was defamed by report alleging practice of inducing youth to smoke by presenting cigarettes as an "illicit pleasure" and associating tobacco with "pot, wine, beer, and sex"). A charitable or benevolent corporation not operated for profit, may establish a good cause of action since defamation affecting its character or operations may deprive it of gifts or other sources of revenue. Bos. Nutrition Soc'y v. Stare, 173 N.E.2d 812 (Mass. 1961); R.H. Bouligny, Inc. v. United Steelworkers of America, 154 S.E.2d 344 (N.C. 1967). The same is true of a partnership, or an unincorporated association, such as a labor union, to the extent that the latter is recognized as a legal entity capable of bringing suit. Stone v. Textile Examiners & Shrinkers Emp'rs' Ass'n, 137 A.D. 655 (N.Y. App. Div. 1910). Should a governmental entity be entitled to maintain an action in libel for words that reflect on it in its government and administrative functions? See Derbyshire CC v. Times

962

Newspapers Ltd., [1993] A.C. 534 (H.L.) 547 (distinguishing governmental entities as bodies that should be open to "uninhibited public criticism" and thus holding that, in contrast to corporations, they should not enjoy a right to sue in libel). See also City of Chicago v. Tribune Co., 139 N.E. 86 (Ill. 1923).

Bindrim v. Mitchell

Court of Appeal of California, Second District, 1979.

92 Cal.App.3d 61, 155 Cal.Rptr. 29, hearing denied by California Supreme Court,

1979, cert, denied 444 U.S. 984, 100 S.Ct. 490, 62 L.Ed.2d 412 (1979),

reh. denied 444 U.S. 1040, 100 S.Ct. 713, 62 L.Ed.2d 675 (1980).

[Plaintiff, Paul Bindrim, a Ph.D. and licensed psychologist, used what he designated as a "nude marathon in group therapy as a means of helping people to shed their psychological inhibitions with the removal of their clothes." Defendant Gwen Davis Mitchell, a successful novelist, registered in Bindrim's nude-therapy program, telling him that she was participating for therapeutic reasons only, and signing a contract "not to take photographs, write articles or in any manner disclose who has attended the workshop or what has transpired." Shortly thereafter, she contracted with defendant Doubleday for a novel based on the nude-therapy technique. The novel was written and published under the title of Touching, with a principal character, Dr. Simon Herford, using the technique.

Claiming that he was defamed by the depiction, plaintiff brought an action of libel against the two defendants. There was a jury verdict for the plaintiff in the trial court for substantial damages, and the court granted a motion for new trial conditioned on plaintiffs accepting a remittitur. Both plaintiff and the two defendants appealed.]

Kingsley, Associate Justice. ***[Defendants] claim that, even if there are untrue statements, there is no showing that plaintiff was identified as the character Simon Herford, in the novel "Touching."

[They] allege that plaintiff failed to show he was identifiable as Simon Herford, relying on the fact that the character in "Touching" was described in the book as a "fat Santa Claus type with long white hair, white sideburns, a cherubic rosy face and rosy forearms" and that Bindrim was clean shaven and had short hair. Defendants rely in part on Wheeler v. Dell Publishing Co., 300 F.2d 372 (7th Cir. 1962), which involved an alleged libel caused by a fictional account of an actual murder trial. The Wheeler court said (at p. 376):

"In our opinion, any reasonable person who read the book and was in a position to identify Hazel Wheeler with Janice Quill would more likely conclude that the author created the latter in an ugly way so that none would identify her with Hazel Wheeler. It is important to note that while the trial and locale might suggest Hazel Wheeler to those who knew the Chenoweth family, suggestion is not identification. In [Levey v. Warner Bros. Pictures, 57 F.Supp. 40 (S.D.N.Y. 1944),] the court said

963

those who had seen her act may have been reminded of her by songs and scenes, but would not reasonably identify her."

However, in Wheeler the court found that no one who knew the real widow could possibly identify her with the character in the novel. In the case at bar, the only differences between plaintiff and the Herford character in "Touching" were physical appearance and that Herford was a psychiatrist rather than psychologist. Otherwise, the character Simon Herford was very similar to the actual plaintiff. We cannot say, as did the court in Wheeler, that no one who knew plaintiff Bindrim could reasonably identify him with the fictional character. Plaintiff

was identified as Herford by several witnesses and plaintiffs own tape recordings of the marathon sessions show that the novel was based substantially on plaintiff's conduct in the nude marathon.

Defendant also relies on Middlebrooks v. Curtis Publishing Co., 413 F.2d 141 (4th Cir. 1969), where the marked dissimilarities between the fictional character and the plaintiff supported the court's finding against the reasonableness of identification. In Middlebrooks, there was a difference in age, an absence from the locale at the time of the episode, and a difference in employment of the fictional character and plaintiff; nor did the story parallel the plaintiffs life in any significant manner. In the case at bar, apart from some of those episodes allegedly constituting the libelous matter itself, and apart from the physical difference and the fact that plaintiff had a Ph.D., and not an M.D., the similarities between Herford and Bindrim are clear, and the transcripts of the actual encounter weekend show a close parallel between the narrative of plaintiffs novel and the actual real life events. Here, there were many similarities between the character, Herford, and the plaintiff Bindrim and those few differences do not bring the case under the rule of Middlebrooks. [C] There is overwhelming evidence that plaintiff and "Herford" were one. ***

Defendants contend that the fact that the book was labeled as being a "novel" bars any claim that the writer or publisher could be found to have implied that the characters in the book were factual representations not of the fictional characters but of an actual nonfictional person. That contention, thus broadly stated, is unsupported by the cases. The test is whether a reasonable person, reading the book, would understand that the fictional character

therein pictured was, in actual fact, the plaintiff acting as described. [C] Each case must stand on its own facts. In some cases, such as Greenbelt Pub. Assn. v. Bresler, 398 U.S. 6 (1970), an appellate court can, on examination of the entire work, find that no reasonable person would have regarded the episodes in the book as being other than the fictional imaginings of the author about how the character he had created would have acted. ***Whether a reader, identifying plaintiff with the "Dr. Herford" of the book, would regard the passages herein complained of as mere fictional embroidering or as reporting

964

actual language and conduct, was for the jury. Its verdict adverse to the defendants cannot be overturned by this court. ***

Defendants raise the question of whether there is "publication" for libel where the communication is to only one person or a small group of persons rather than to the public at large. Publication for purposes of defamation is sufficient when the publication is to only one person other than the person defamed. [C] Therefore [it is] irrelevant whether all readers realized plaintiff and Herford were identical.

[The opinion also discusses whether the depiction was defamatory, the application of the "actual malice" test of New York Times v. Sullivan, infra page 987, the fact-opinion dichotomy, and damage issues.]

The judgment, as modified on the motion for a new trial, is further modified as [to damages.] ***

Otherwise the judgment is affirmed. Neither party shall recover costs on appeal.

Jefferson, Associate Justice, concurring. ***The dissent finds error in the instruction given the jury on the issue of identification. The use of the word "reasonably" in the instruction dissipates the dissent's view that only one person was required to understand the defamatory meaning. If one person "reasonably" understood the defamatory character of the language used, it describes what readers generally would "reasonably" understand. I see no basis for the dissent's view that the instruction had the result of mulcting defendants for the exercise of their first amendment right to comment on the nude marathon. The first amendment right to comment does not include the right to commit libel. * * *k

"Of course the fictional setting does not insure immunity when a reasonable man would understand that the fictional character was a portrayal of the plaintiff. 'Reputations may not be traduced with impunity, whether under the literary forms of a work of fiction or in jest.'" [C]

FILES, Presiding Justice (dissenting). ***Defendants' novel describes a fictitious therapist who is conspicuously different from plaintiff in name, physical appearance, age, personality and profession.

Indeed the fictitious Dr. Herford has none of the characteristics of plaintiff except that Dr. Herford practices nude encounter therapy. Only three witnesses, other than plaintiff himself, testified that they "recognized" plaintiff as the fictitious Dr. Herford. All three of those witnesses had participated in or observed one of plaintiffs nude

marathons. The only characteristic mentioned by any of the three witnesses as identifying plaintiff was the therapy practiced. ***

Plaintiffs brief discusses the therapeutic practices of the fictitious Dr. Herford in two categories: Those practices which are similar to plaintiffs technique are classified as identifying. Those which are unlike

965

plaintiffs are called libelous because they are false. Plaintiff has thus resurrected the spurious logic which Professor Kalven found in the position of the plaintiff in New York Times v. Sullivan, infra page 987. Kalven wrote: "There is revealed here a new technique by which defamation might be endlessly manufactured. First, it is argued that, contrary to all appearances, a statement referred to the plaintiff; then, that it falsely ascribed to the plaintiff something that he did not do, which should be rather easy to prove about a statement that did not refer to plaintiff in the first place. ***" Kalven, The New York Times Case: A Note on "The Central Meaning of the First Amendment," 1964 The Supreme Court Review 191, 199.

Even if we accept the plaintiffs thesis that criticism of nude encounter therapy may be interpreted as libel of one practitioner, the evidence does not support a finding in favor of plaintiff.

Whether or not a publication to the general public is defamatory is "whether in the mind of the average reader the publication, considered as a whole, could reasonably be considered as defamatory." [C]

The majority opinion contains this juxtaposition of ideas: "Secondly, defendants' [proposed] instructions that the jury must find that a substantial segment of the public did, in fact, believe that Dr. Simon Herford was, in fact, Paul Bindrim ***was properly refused. For the tort of defamation, publication to one other person is sufficient."

The first sentence refers to the question whether the publication was defamatory of plaintiff. The second refers to whether the defamatory matter was published. The former is an issue in this case. The latter is not. Of course, a publication to one person may constitute actionable libel. But this has no bearing on the principle that the allegedly libelous effect of a publication to the public generally is to be tested by the impression made on the average reader. ***

From an analytical standpoint, the chief vice of the majority opinion is that it brands a novel as libelous because it is "false," i.e., fiction; and infers "actual malice" from the fact that the author and publisher knew it was not a true representation of plaintiff. From a constitutional standpoint the vice is the chilling effect upon the publisher of any novel critical of any occupational practice, inviting litigation on the theory "when you criticize my occupation, you libel me."

I would reverse the judgment.

NOTES AND QUESTIONS

1. The colloquium, or reference to the plaintiff, need not be to him by name if it is reasonably understood as referring to him. Peagler v. Phoenix Newspapers, Inc., 560 P.2d 1216 (Ariz. 1977); cf. Youssoupoff v. Metro- Goldwyn Mayer Pictures, (1934) 50 T.L.R. 581 (A.C) (Eng.) (motion picture purportedly based on historical events;

plaintiff identifiable as person raped by Rasputin). But if the words are not reasonably understood to refer to the

966

plaintiff, there is no defamatory imputation identifying plaintiff. Boyce & Isley v. Cooper, 568 S.E.2d 893 (N.C. Ct. App. 2002); Chapman v. Byrd, 475 S.E.2d 734 (N.C. Ct. App. 1996). When the plaintiff is not expressly identified, the issue is whether a reader with knowledge of the surrounding circumstances could have reasonably understood that the words referred to the plaintiff. The standard against which the material is read or understood changes with the medium. A daily newspaper is read loosely so that factual variations in the story may not prevent the plaintiff from being reasonably identified by the story. See Morgan v. Odhams Press Ltd., (1971) 1 W.L.R. 1239 (H.L.) 1248 (Lord Morris of Borth-y-Gest) (appeal taken from Court of Appeal), for a discussion of these issues. The fewer the number of persons who are possessed with knowledge of the surrounding circumstances that identify the plaintiff, the less the damages that may be awarded.

2. Look at the latter part of the opinion in N.Y. Times Co. v. Sullivan, see infra page 987, referring to the purported reference to Police Commissioner in the advertisement. Has it any relevance here?

3. If the novel Touching had contained a statement after the title page that this was a work of fiction and any similarity to existing persons was unintended, would that have made a difference? Stanton v. Metro Corp., 438 F.3d 119 (1st Cir. 2006) (holding that article about teen sexuality accompanied by photograph of various young people, including plaintiff, was susceptible of defamatory

meaning despite statement that "the individuals pictured are unrelated to the people or events described in this story").

4. For other cases offering variations to the problem of defamation in fiction, see Pring v. Penthouse Int'l, Ltd., 695 F.2d 438 (10th Cir. 1982), cert, denied, 462 U.S. 1132 (1983) (2-1 decision) (reversing decision by the trial court for the real Miss Wyoming concerning a salacious story about a Miss Wyoming who performed on television at a Miss America Pageant sexual feats too fantastic to be believed); Geisler v. Petrocelli, 616 F.2d 636 (2d Cir. 1980) (holding that plaintiff known to defendant, with identical name to that of the major character in a novel about a transsexual tennis player, allowed to recover); Springer v. Viking Press, 90 A.D.2d 315 (N.Y. App. Div. 1982), aff'd, 458 N.E.2d 1256 (1983) (holding that plaintiff, former girl friend of author of a novel, given the same name as minor character in the book and similar physical characteristics, not allowed to recover because of insufficient basis for identifying the two); Haynes v. Alfred A. Knopf, Inc., 8 F.3d 1222 (7th Cir. 1993) (plaintiffs featured in book on social history of black migration from the South to the North; no recovery in defamation or breach of privacy); Flip Side, Inc. v. Chicago Tribune Co., 564 N.E.2d 1244 (1990) (plaintiff, an Illinois business, claimed defamation for use of name "Flipside" for character in "Dick Tracy" comic strip; held similarity is not sufficient where depiction was so clearly fictional.).

Persons making libelous statements can be held liable for damages resulting from repetition or republication of the libelous statement. See Restatement (Second) of Torts § 576 (1977). In Brown v. First Nat'l Bank, 193 N.W.2d 547 (Iowa 1972), the court held defendant bank liable for libel for republication of information given to

newspaper reporter about an investigation at the bank into missing funds. Here, the plaintiff had been

967

terminated after failing a polygraph test, and the bank manager had relayed information to the newspaper for two articles concerning the situation, although neither article mentioned the plaintiff herself; plaintiff claimed that the articles accused her of embezzlement. The court ruled that the bank was liable for any and all republications of the information through gossip and rumor, since it was a natural and probable result of giving the information to the newspaper. Similarly, in Moore v. Allied Chem. Corp., 480 F. Supp. 364 (E.D. Va. 1979), defendant was held liable for rebroadcast of a "60 Minutes" story on the plight of employees at defendant's corporation from a supposedly toxic chemical produced by the plaintiff. The court ruled that the libel concerning the toxic chemical could be expected to be repeated any time "60 Minutes" discussed the situation concerning defendant's employees. Do you see problems with the modern genre of television docudramas?

2. Libel and Slander

The erratic and anomalous development of the law of defamation has led to the survival until the present day of two forms of action for defamatory publication. One is libel, which originally concerned written or printed words; the other is slander, which was originally oral.

The prime significance of the distinction lies in the requirement of proof of damages. It has long been the rule as to slander that it is

necessary to prove "special damages" (i.e. pecuniary loss), Terwilliger v. Wands, see infra page 968, unless the words spoken come within one of the four classes of what is called slander per se. Libel, on the other hand, did not require special damages to be actionable, though there was some disagreement on whether this applied to libel which was not defamatory on its face. The distinction has been an important one. Defamatory communications often do not produce pecuniary loss, and it is often impossible to prove when it does exist. The result is that for many types of slander no relief may be available. A natural question is, why should there be a difference? Is it solely a matter of history? Since the remarks of Sir James Mansfield, in Thorley v. Lord Kerry, (1812) 128 Eng. Rep. 367 (C.P.) 371; 4 Taunt. 355 (Mansfield, C.J.) (Eng.), there has been no real effort to defend the distinction: "But the distinction has been made between written and spoken slander as far back as Charles the Second's time, and the difference has been recognized by the Courts for at least a century back."

So long as the difference as to the requirement of special damages continues to be applied, however, it becomes necessary to draw the distinction between what is slander and what is libel, a question not at all free from difficulty. As it took form in the seventeenth century, the distinction was one between words that were written or printed and those that were oral. But not long afterward, libel was extended to include defamatory pictures, signs, statues, motion pictures and the like, and even conduct carrying a defamatory implication, such as hanging the plaintiff in effigy, or erecting a gallows before his door. From this it was

concluded that libel is communicated by the sense of sight, while slander is conveyed by the sense of hearing. On the other hand, slander was soon extended to include transitory gestures, such as the signals of a deaf- mute or, as in Bennett v. Norban, 151 A.2d 476 (Pa. 1959), the act of a storekeeper in publicly stopping a woman and searching her shopping bag. Furthermore, it was held to be a publication of a libel to: read a defamatory writing aloud, as in Bander v. Metro. Life Ins. Co., 47 N.E.2d 595 (Mass. 1943); read words aloud (by person other than the one defamed), expected to be and in fact written down, as in the case of dictation to a stenographer in Ostrowe v. Lee, 175 N.E. 505 (N.Y. 1931); or make a statement to a newspaper reporter in Valentine v. Gonzalez, 190 A.D. 490 (N.Y. App. Div. 1920). This has led some authorities to conclude that the distinction turns on embodiment of the defamation in some more or less permanent physical form. Communications via computer are doubtless libel. Too Much Media v. Hale, 993 A.2d 845 (N.J. Super. Ct App. Div. 2010).

The advent of new methods of communication such as radio and television left the courts floundering to formulate the distinction, and led the Restatement (Second) of Torts § 568 (1977), to state that

(1) Libel consists of the publication of defamatory matter by written or printed words, by its embodiment in physical form or by any other form of communication that has the potentially harmful qualities characteristic of written or printed words.

(2) Slander consists of the publication of defamatory matter by spoken words, transitory gestures or by any form of communication other than those stated in Subsection (1).

(3) The area of dissemination, the deliberate and premeditated character of its publication and the persistence of the defamation are factors to be considered in determining whether a publication is a libel rather than a slander.

Do you consider this sufficient for the present age? Lessig, The Path of Cyberlaw, 104 Yale L.J. 1743, 1745 (1995) (arguing that district communities exist online requiring different legal responses). The broad rule coalesced around regarding anything written when published as libel. Radio and television broadcasts are libels as taking a permanent form. But impulsive tweets may be better viewed as the kind of reaction that has attracted slander as the appropriate category. Tilley, Reviving Slander, 2011 Utah L. Rev. 1025 (2011). For a comprehensive state by state analysis see Tilley, id. at 1081.

Terwilliger v. Wands

Court of Appeals of New York, 1858.

17 N.Y. 54, 72 Am.Dec. 420.

Action for slander. The plaintiff proved by La Fayette Wands that the defendant asked him, Wands, what the plaintiff was running to Mrs.

969

Fuller's so much for; he knew he went there for no good purpose; Mrs. Fuller was a bad woman, and plaintiff had a regular beaten path across his land to Fuller's; defendant said plaintiff went there to have intercourse with Mrs. Fuller, and that plaintiff would do all he could to keep Mrs. Fuller's husband in the penitentiary so that he could have free access there. ***

The only damages proved were that the plaintiff was prostrated in health and unable to attend to business after hearing of the reports circulated by the defendant. A motion for a nonsuit was sustained ***. STRONG, J. The words spoken by the defendant not being actionable of themselves, it was necessary, in order to maintain the action, to prove that they occasioned special damages to the plaintiff. The special damages must have been the natural, immediate and legal consequence of the words. ***

The special damages relied upon are not of such a nature as will support the action. ***It is injuries affecting the reputation only which are the subject of the action. In the case of slanderous words actionable per se, the law, from their natural and immediate tendency to produce injury, adjudges them to be injurious, though no special loss or damage can be proved. "But with regard to words that do not apparently and upon the face of them import such defamation as will of course be injurious, it is necessary that the plaintiff should aver some particular damage to have happened." (3 Bl.Com. 124.) As to what constitutes special damages, Starkie mentions the loss of a marriage, loss of hospitable gratuitous entertainment, preventing a servant or bailiff from getting a place, the loss of customers by a tradesman; and says that in general whenever a person is prevented by the slander from receiving that which would otherwise be conferred upon him, though gratuitously, it is sufficient. * * w

It necessarily follows from the rule that the words must be disparaging to character, that the special damage to give an action must flow from disparaging it. ***In the present case the words were defamatory, and the illness and physical prostration of the plaintiff may be assumed, so far as this part of the case is concerned, to

have been actually produced by the slander, but this consequence was not, in a legal view, a natural, ordinary one, as it does not prove that the plaintiffs character was injured. The slander may not have been credited by or had the slightest influence upon any one unfavorable to the plaintiff; and it does not appear that anybody believed it or treated the plaintiff any different from what they would otherwise have done on account of it. The cause was not adapted to produce the result which is claimed to be special damages. Such an effect may and sometimes does follow from such a cause but not ordinarily; and the rule of law was framed in reference to common and usual effects and not those which are accidental and occasional. ***

970

Where there is no proof that the character has suffered from the words, if sickness results it must be attributed to the apprehension of loss of character, and such fear of harm to character, with resulting sickness and bodily prostration, cannot be such special damage as the law requires for the action. The loss of character must be a substantive loss, one which has actually taken place. ***

Judgment affirmed.

NOTES AND QUESTIONS

1. When special damages must be pleaded and proved to make out a cause of action for slander, the common law rule developed that the damages must be of a pecuniary character. This was a carry-over from the old jurisdictional conflict with the ecclesiastical courts, and the rule that the King's court could take jurisdiction only where there was "temporal," as distinguished from "spiritual," harm. Hence,

if no pecuniary loss is shown, it is not enough that the plaintiff has suffered acute mental distress and serious physical illness as a result of the defamation. Allsop v. Allsop, (1860) 157 Eng. Rep. 1292 (Exch.); 5 H. & N. 534 (Eng.); Scott v. Harrison, 2 S.E.2d 1 (N.C. 1939); Baugh v. Baugh, 512 So.2d 1283, 1286 (Miss. 1987) (dismissing case in which plaintiff failed to "suggest any damages of a pecuniary character said to have been caused him by what [defendant] said"); Galarneau v. Merrill Lynch, Pierce, Fenner & Smith Inc., 504 F.3d 189, 204 (1st Cir. 2007); Beverly Enters, v. Trump, 182 F.3d 183, 188 (3d Cir. 1999) ("[P]laintiff must go beyond a claim of injury to reputation and allege... 'actual and concrete damages capable of being estimated in money....'" (quoting Altoona Clay Prods., Inc. v. Dun & Bradstreet, Inc., 246 F. Supp. 419, 422 (W.D. Penn. 1965)).

2. When the cause of action is once made out, either as libel or slander per se, or by proof of special damages of a pecuniary character, plaintiff may recover additional damages for his mental distress, wounded feelings and humiliation. Pion v. Caron, 129 N.E. 369 (Mass. 1921); Baker v. Winslow, 113 S.E. 570 (N.C. 1922).

3. The original rule was that the defendant was liable only for damages due to his own publication, and was not responsible for repetition by others. Vicars v. Wilcocks, (1806) 103 Eng. Rep. 244 (K.B.); 8 East 1 (Eng.); Hastings v. Stetson, 126 Mass. 329 (1879). Later decisions tend to hold that the original publisher is liable for damages due to a repetition that might reasonably have been anticipated. Elms v. Crane, 107 A. 852 (Me. 1919); Sawyer v. Gilmers, Inc., 126 S.E. 183 (N.C. 1925); Weaver v. Beneficial Finance Co., 98 S.E.2d 687 (Va. 1957) (illustrating a significant

disagreement between the majority and dissenting justices on this issue); see Restatement (Second) of Torts § 576 (1977). See infra, pages 1064-1067.

4. The party repeating the defamation is himself liable for its publication, even though he states the source. Haines v. Campbell, 21 A. 702 (Md. 1891); Times Pub. Co. v. Carlisle, 94 Fed. 762 (8th Cir. 1899). He is held liable even though he states that he does not believe the imputation. Morse

971

v. Times-Republican Printing Co., 100 N.W. 867 (Iowa 1904); Cobbs v. Chicago Defender, 31 N.E.2d 323 (Ill. App. Ct. 1941).

Slander Per Se

Four special kinds of slander are exceptions to the general common law rule, and actionable without proof of special damages. These are the following:

1. Imputations of Major Crime. The original basis for this exception seems to have been that the plaintiff was thus exposed to criminal prosecution. Later the emphasis shifted to the social ostracism involved and the probability that the plaintiff must have suffered some pecuniary loss, even though he could not prove it. Thus, the action lay without any proof of damage, even though the words made it clear that the plaintiff had been punished or pardoned, or that prosecution was barred by the statute of limitations. It is insufficient to accuse a person of being capable of a crime or to have criminal intent unless a criminal act is charged. Biondi v. Nassimos,

692 A.2d 103, 108 (N.J. Super. Ct. App. Div. 1997) (quoting Restatement (Second) of Torts § 571 comment c (1977)).

The courts struggled to define a distinction between major and minor crimes. The formula that most courts now follow is that the crime must be one involving "moral turpitude," defined as "an inherent baseness or vileness of principle in the human heart." It is not the categorization of the crime, but rather the character of the act charged, that is controlling. Not every trivial assault or battery involves "moral turpitude." However, an accusation that the plaintiff beat his mother was held in Sipp v. Coleman, 179 Fed. 997 (D.N.J. 1910), necessarily to do so.

2. Loathsome Disease. The basis of the exception for the imputation of certain diseases appears originally to have been simply the exclusion from society that would result. It began with venereal disease and leprosy, at a time when both were regarded as permanent, lingering and incurable. It was not applied to more contagious and equally repugnant disorders such as smallpox, from which one either recovered or died in a short time. James v. Rutlech, (1599) 76 Eng. Rep. 900 (K.B.); 4 Co. Rep. 17 a. (Eng.)

The advance of medical science and a better understanding of disease tended to freeze the exception within its original limits, and today accusations of insanity, tuberculosis or other communicable diseases are not included. Furthermore, since there would not be the same social avoidance of one who had recovered, it is well settled that the imputation that the plaintiff has had even a venereal disease in the past is not sufficient to be actionable without proof of special damage. Bruce v. Soule, 69 Me. 562 (1879). The importance of this

exception has been slight, and there have been almost no cases applying it in this century.

3. Business, Trade, Profession or Office. If the spoken words are likely to affect the plaintiff in his business, trade, profession or office, the probability of some "temporal" damage is sufficiently obvious. Any legitimate calling is included, "be it ever so base." Terry v. Hooper, (1763) 83 Eng. Rep. 325 (K.B.); 1 Lev. 115 (Eng.); cf. Fitzgerald v. Redfield, 51 Barb. 484 (N.Y. Gen. Term 1868) (lime-burner); Burtch v. Nickerson, 17 Johns. 217 (N.Y.

1819) (blacksmith). Even uncompensated offices of confidence or trust have been included. In Dietrich v. Hauser, 257 N.Y.S.2d 716 (N.Y. Spec. Term 1965), it was held slander per se to say of a club president that he was a cheat and a fraud.

The exception was limited to defamation of a kind incompatible with the proper conduct of the business, trade, profession or office itself. Thus, it is actionable without proof of special damage to say of an attorney that he is a shyster. Nolan v. Standard Publ'g Co., 216 P. 571 (Mont. 1923). Or of a school teacher that he has been guilty of improper conduct with his pupils. Thompson v. Bridges, 273 S.W. 529 (Ky. 1925). Or a chauffeur that he is habitually drinking. Louisville Taxicab & Transfer Co. v. Ingle, 17 S.W.2d 709 (Ky. 1929). Or of a bank, that it is insolvent, or of a merchant that his credit is bad. Ridgeway State Bank v. Bird, 202 N.W. 170 (Wis. 1925). Or of the governor of a state that he is indifferent to lynching and has approved the work of a mob. Caldwell v. Crowell-Collier Publ'ng Co., 161 F.2d 333 (5th Cir. 1947) (applying Florida law). The person must

be employed in the profession at the time that the statement is made. See Restatement (Second) of Torts § 573, comment c (1977); Bassim v. Howlett, 594 N.Y.S.2d 381 (N.Y. App. Div. 1993) (holding that a doctor who had his license removed just after the defamatory statement could not maintain a cause of action because he was no longer a member of the medical profession).

4. Serious Sexual Misconduct. The principal application of this to date has been a charge imputing unchastity to a woman. In England this was not actionable per se, until the common law rule was changed by the Slander of Women Act, 1891, 54 & 55 Viet., c.51 (Eng.). Some of the American courts got around the rule, as in Kelly v. Flaherty, 14 A. 876 (R.I. 1888), by finding that the imputation was equivalent to a charge of the crimes of adultery or fornication, which involved moral turpitude. Gradually this gave way to a recognition of the essentially damaging nature of the charge, and a fourth exception is now generally recognized. Hollman v. Brady, 233 F.2d 877 (9th Cir. 1956) (applying Alaska law); Gnapinsky v. Goldyn, 128 A.2d 697 (N.J. 1957).

The assumption has always been that the imputation of unchastity is not so damaging to a man, and it is still held that this is not slander per se, unless it falls into one of the other slander exceptions. Hickerson v. Masters, 226 S.W. 1072 (Ky. 1921); Marion v. Davis, 114 So. 357 (Ala. 1927).

Is this consistent with constitutional law requirements and ideals of equality? See Restatement (Second) of Torts § 574 (1977); King v. Tanner, 539 N.Y.S.2d 617, 620 (N.Y. Sup. Ct. 1989) (suggesting that Terwilliger v. Wands, see supra page 968, would not survive equal

protection scrutiny); Wardlaw v. Peck, 318 S.E.2d 270 (S.C. Ct. App. 1984) (refusing, on an interpretation of the old case law, to distinguish between men and women).

What about the imputation of homosexual conduct or characteristics? In Buck v. Savage, 323 S.W.2d 363 (Tex. Civ. App. 1959), the statement that plaintiff was "queer on" another man was held to amount to a charge of the crime of sodomy and so to be actionable per se. Plumley v. Landmark

973

Chevrolet, 122 F.3d 308 (5th Cir. 1997) (applying Texas law, imputation of homosexuality was slander per se).

However, changing social attitudes have prompted many jurisdictions to reconsider the law on this issue. Until 2012, appellate courts in New York had uniformly held that statements imputing homosexuality fell under the four categories of statements that rise to the level of defamation per se. In Yonaty v. Mincolla, 945 N.Y.S.2d 774 (App. Div. 2012), the New York Appellate Division held that the imputation of homosexuality is no longer defamation per se: "statements falsely describing a person as lesbian, gay or bisexual... are not defamatory per se." Id. at 776. Yonaty reflects the trend in courts "across the country that have repudiated similar precedents of their own." Note, Tort Law--Defamation--New York Appellate Division Holds That the Imputation of Homosexuality Is No Longer Defamation Per Se.--Yonaty v. Mincolla, 945 N.Y.S.2d 774 (App. Div. 2012), 126 Harv. L. Rev. 852 (2013). See Albright v. Morton, 321 F. Supp. 2d 130, 136 (D. Mass. 2004), aff'd on other grounds, 410 F.3d 69 (1st Cir. 2005) (applying Massachusetts law), Hayes v. Smith, 832

P.2d 1022, 1025-26 (Colo. App. 1991) ("false statements concerning homosexuality are not slander per se even though they arise in an employment context and are directed at plaintiffs business reputation"), Boehm v. Am. Bankers Ins. Grp., Inc., 557 So. 2d 91, 94 (Fla. Dist. Ct. App. 1990), Donovan v. Fiumara, 442 S.E.2d 572, 576-77 (N.C. Ct. App. 1994) (requiring allegation and proof of special damages as a condition of recovery). But see Nazeri v. Missouri Valley College, 860 S.W.2d 303, 312 (Mo. 1993) ("Despite the efforts of many homosexual groups to foster greater tolerance and acceptance, homosexuality is still viewed with disfavor, if not outright contempt, by a sizeable proportion of our population.... We hold that a false allegation of homosexuality is defamatory in Missouri.").

Libel Per Se and Libel Per Quod

The established rule at common law was to the effect that it is not necessary to prove special damages in order to maintain an action for libel. Some American decisions deviated from this rule, apparently through an initial mistake as to the meaning of the expression "libel per se." As applied to the requirement of proof of special damages, all libel was libel per se. But if the statement was not defamatory on its face and it was necessary to be aware of certain extrinsic (or unstated) facts in order to appreciate its defamatory implications, it was sometimes called libel per quod, meaning that the plaintiff must allege and prove those extrinsic facts in order to have a cause of action. Some American decisions, breaking away from the established rule, apparently assumed that if the communication was not defamatory on its face and was called libel per quod, it was not libel per se and required proof of special

damages. But other cases deliberately adopted the rule. Restatement (Second) of Torts § 569 (1977) provides that special damages are not required in any libel action. See Hinsdale v. Orange Cnty. Publ'ns, Inc., 217 N.E.2d 650 (N.Y. 1966); Muzikowski v. Paramount Pictures Corp., 477 F.3d 899 (7th Cm. 2007) (applying Illinois law).

974

3. Publication

Economopoulos v. A.G. Pollard Co.

Supreme Judicial Court of Massachusetts, 1914.

218 Mass. 294, 105 N.E. 896.

Action by George Economopoulos against A.G. Pollard Company. There was a verdict for defendant, and plaintiff brings exceptions.

This was an action of tort in three counts ***; the third count charging defendant with falsely and maliciously charging plaintiff with larceny by words spoken of plaintiff, as follows: "You have stolen a handkerchief from us and have it in your pocket." There was evidence that a clerk of defendant stated in English to plaintiff, a Greek, that he had stolen a handkerchief, and that a Greek clerk stated to plaintiff in Greek that plaintiff had stolen a handkerchief. There was nothing to show that third persons heard the charge, excepting the floor walker.

LORING, J. ***There was no evidence that anybody but the plaintiff was present when Carrier spoke to the plaintiff in English. There was no publication of this statement made in English, because on the

evidence the words could not have been heard by any one but the plaintiff. [C]

Nor was there any evidence of publication of the Greek words spoken by Miralos, for although there was evidence that they were spoken in the presence of others, there was no evidence that any one understood them but the plaintiff. ***

Exceptions overruled.

NOTES AND QUESTIONS

1. "Publication" is a word of art in defamation cases. It does not mean printing, writing or even publicity, but merely communication of the defamatory words to someone other than the person defamed. It is not enough that the words are spoken to the plaintiff himself, even in the presence of others, if no one else overhears them. Sheffill v. Van Deusen, 79 Mass. (13 Gray) 304 (1859) (concerning words spoken in a bakery). See also Food Lion v. Melton, 458 S.E.2d 580 (Va. 1995) (holding that circumstantial evidence alone was sufficient to support a reasonable inference of overhearing when defendant used a "very loud tone of voice" and witnesses were "close by").

2. Defendant, in the presence of others who overhear him, calls plaintiff a "cocotte," which, according to the court, is a French word meaning either a prostitute or a poached egg. What else must plaintiff plead and prove in order to establish her cause of action? Rovira v. Boget, 148 N.E. 534 (N.Y. 1925). What if those hearing or reading the reference are too young to know the meaning of a word? Sullivan v. Sullivan, 48 Ill. App. 435 (Ill. App. Ct. 1892).

3. Sometimes the court presumes that some one has read and understood the defamatory words. The presumption has been employed regarding a publication in German, in a German-language newspaper that was circulated among German-speaking subscribers. Kimm v. Steketee, 12 N.W. 177 (Mich. 1882). This presumption has also been applied to a defamatory postcard sent through the mail. Ostro v. Safir, 1 N.Y.S.2d 377 (N.Y. Spec. Term 1937); Abofreka v. Alston Tobacco Co., 341 S.E.2d 622 (S.C. 1986) (regarding a statement on a bulletin board).

4. Authority is conflicted on the issue of publications where the communications is from one officer, agent, or office of an organization to another. See Jerolamon v. Fairleigh Dickinson Univ., 488 A.2d 1064 (N.J. Super. Ct. App. Div. 1985) (holding that a report by university security guards to Director of Campus Safety and Provost was a publication). But cf. Perez v. Boatmen's Nat'l Bank, 788 S.W.2d 296 (Mo. App. Ct. 1990) ("[C]ommunications between officers of the same corporation in the due and regular course of the corporate business, or between different offices of the same corporation, are not publications to third persons." (quoting Hellesen v. Knaus Truck Lines, 370 S.W.2d 341, 344 (Mo. 1963)); Starr v. Pearle Vision, Inc., 54 F.3d 1548 (10th Cir. 1995) (applying Oklahoma law). Under common law, employers generally enjoy a "qualified privilege," when discussing matters related to employment with individuals having a corresponding interest or duty. Restatement (Second) of Torts § 595 (1977). However, this privilege can be pierced if the employer acted recklessly or with malice. See, e.g., Lyons v. Nat'l Car Rental Sys., Inc., 30 F.3d 240, 244 (1st Cir. 1994) (applying Massachusetts law). The law on internal communications

and applicable defenses of qualified privilege is discussed in an illuminating way in Hagebak v. Stone, 133 N.M. 75, 61 P.3d 201 (2002) (holding that intra-corporate communications are only subject to a qualified privilege that can be rebutted by the plaintiff).

5. For a communication to a third party to be a publication, it must have been done intentionally or negligently. See Restatement (Second) of Torts § 577 (1977). Thus, there is no publication when words are spoken by defendant directly to plaintiff, with no reason to suppose that any one can overhear, but they are in fact overheard by a concealed listener. Hill v. Balkind (1918) NZLR 740 (SC). However, when the words are spoken so loudly that defendant can expect that that someone may overhear, the defendant has published the defamatory imputation. McNichol v. Grandy, [1931] S.C.R. 696 (Can.). Where defendant mistakenly believed he had deleted a file from his hard drive, which was later accessed by third parties, held no publication. Morrow v. Il Morrow, Inc., 911 P.2d 964 (Or. Ct. App. 1996); see also Smith v. Jones, 335 So.2d 896 (Miss. 1976) (holding that there was no publication where defendant was unaware that plaintiffs children were listening to conversation on another telephone line). In Tuman v. Genesis Assoc., 894 F. Supp. 183 (E.D. Pa. 1995), the court denied defendant's motion to dismiss a defamation claim for falsely implanting memories into plaintiffs' daughter during therapy sessions--including allegations of incest, rape, murder, and satanic ritualistic behavior--holding that where the defendants, although they did not personally make the

statements, implanted the statements in plaintiffs' daughter's head and induced and encouraged her to make the defamatory claims and could be liable for such.

6. If the defamatory matter is sent by defendant to plaintiff himself in a sealed letter, which is unexpectedly opened and read by a third person, there is no publication. Barnes v. Clayton House Motel, 435 S.W.2d 616 (Tex. Civ. App. 1968). But there is liability if defendant knows, or should know, that plaintiffs spouse or secretary is in the habit of reading plaintiffs mail, or in the circumstances would likely read it, and the words are in fact read by such person. Rumney v. Worthley, 71 N.E. 316 (Mass. 1904); Roberts v. English Mfg. Co., 46 So. 752 (Ala. 1908). In the English case, Theaker v. Richardson, [1962] 1 W.L.R. 151 (Eng.), the defendant wrote a letter to the plaintiff (both members of their local district council and candidates in an imminent council election), accusing her of a list of misdeeds, and ended the letter saying: "[Y]ou are nothing but a lying low down brothel-keeping whore and thief...." The letter was typed by the defendant and the envelope was addressed to the plaintiff. The plaintiff's husband entered the house, saw the letter on the mat and opened it, thinking it was an election address.

7. There is a publication when a telegraph company transmits a message or a third party orally repeats a message. The postal service does not make a publication when it delivers a letter. Nor is there a publication by the telephone company when its system is used for communication purposes. See Anderson v. New York Tel. Co., 320 N.E.2d 647 (N.Y. 1974). The same rule applied to an internet service provider (ISP) for emails sent through its servers.

Lunney v. Prodigy Serv. Co., 723 N.E.2d 539 (N.Y. 1999), cert, denied, 529 U.S. 1098 (2000).

8. Publication by Plaintiff. Ordinarily the defendant is not liable for any publication made by the plaintiff alone, since it is considered that it is plaintiffs responsibility and not the defendant's. Lyle v. Waddle, 188 S.W.2d 770 (Tex. 1945). But suppose it is reasonable for the plaintiff to consult someone else about a defamatory communication made only to plaintiff and the defendant might expect this. The obvious case is that of the plaintiff who is blind or illiterate. Lane v. Schilling, 279 P. 267 (Or. 1929); cf. Hedgpeth v. Coleman, 111 S.E. 517 (N.C. 1922) (involving a child plaintiff).

9. A discharged employee of the defendant, seeking other employment, is asked by all prospective employers why he left his last job. In response, he repeats, and denies, the defamatory charge. Is defendant liable? The courts have come to inconsistent conclusions.

10. Failure to Remove Defamation. In several cases defendant has been held liable for failure to remove defamation posted on his premises. See Tidmore v. Mills, 32 So.2d 769 (Ala. Ct. App. 1947) (affirming judgment where defendant refused to remove sign comparing plaintiff to Hitler); Hellar v. Bianco, 244 P.2d 757 (Cal. Dist. Ct. App. 1952) (concerning statements about plaintiffs chastity written on bar toilet stall).The courts have not agreed upon a theory, and have struggled with "republication," "ratification," and negligent breach of a duty to remove. See Scott v. Hull, 22 Ohio App.2d 141, 259 N.E.2d 160 (Ohio Ct. App.1970) (holding that nonfeasance in the

removal of defamatory graffiti from the exterior of defendant's building after notification was not actionable defamation).

Carafano v. Metrosplash.com, Inc.

United States Court of Appeals, Ninth Circuit, 2003.

339 F.3d 1119.

THOMAS, Circuit Judge. This is a case involving a cruel and sadistic identity theft. In this appeal, we consider to what extent a computer match making service may be legally responsible for false content in a dating profile provided by someone posing as another person. Under the circumstances presented by this case, we conclude that the service is statutorily immune pursuant to 47 U.S.C. 230(c)(1).

I

Matchmaker.com is a commercial Internet dating service. For a fee, members of Matchmaker post anonymous profiles and may then view profiles of other members in their area, contacting them via electronic mail sent through the Matchmaker server. A typical profile contains one or more pictures of the subject, descriptive information such as age, appearance and interests, and answers to a variety of questions designed to evoke the subject's personality and reason for joining the service.

Members are required to complete a detailed questionnaire containing both multiple-choice and essay questions. In the initial portion of the questionnaire, members select answers to more than fifty questions from menus providing between four and nineteen

options. Some of the potential multiple choice answers are innocuous; some are sexually suggestive. In the subsequent essay section, participants answer up to eighteen additional questions, including "anything that the questionnaire didn't cover." Matchmaker policies prohibit members from posting last names, addresses, phone numbers or e-mail addresses within a profile. Matchmaker reviews photos for impropriety before posting them but does not review the profiles themselves, relying instead upon participants to adhere to the service guidelines.

On October 23, 1999, an unknown person using a computer in Berlin posted a "trial" personal profile of Christianne Carafano in the Los Angeles section of Matchmaker. (New members were permitted to post "trial" profiles for a few weeks without paying.) The posting was without the knowledge, consent or permission of Carafano. The profile was listed under the identifier "Chase529."

Carafano is a popular actress. Under the stage name of Chase Masterson, Carafano has appeared in numerous films and television shows, such as "Star Trek: Deep Space Nine," and "General Hospital." Pictures of the actress are widely available on the Internet, and the false Matchmaker profile "Chase529" contained several of these pictures. Along with fairly innocuous responses to questions about interests and appearance, the person posting the profile selected "Playboy/Playgirl" for

"main source of current events" and "looking for a one-night stand" for "why did you call." In addition, the open-ended essay responses indicated that "Chase529" was looking for a "hard and dominant"

man with "a strong sexual appetite" and that she "liked sort of be [ ]ing controlled by a man, in and out of bed." The profile text did not include a last name for "Chase" or indicate Carafano's real name, but it listed two of her movies (and, as mentioned, included pictures of the actress).

In response to a question about the "part of the LA area" in which she lived, the profile provided Carafano's home address. The profile included a contact e-mail address, cmla2000@yahoo.com, which, when contacted, produced an automatic e-mail reply stating, "You think you are the right one? Proof it!!" [sic], and providing Carafano's home address and telephone number.

Unaware of the improper posting, Carafano soon began to receive messages responding to the profile. Although she was traveling at the time, she checked her voicemail on October 31 and heard two sexually explicit messages. When she returned to her home on November 4, she found a highly threatening and sexually explicit fax that also threatened her son. Alarmed, she contacted the police the following day. As a result of the profile, she also received numerous phone calls, voicemail messages, written correspondence, and e-mail from fans through her professional e-mail account. Several men expressed concern that she had given out her address and phone number (but simultaneously expressed an interest in meeting her). Carafano felt unsafe in her home, and she and her son stayed in hotels or away from Los Angeles for several months.

Sometime around Saturday, November 6, Siouxzan Perry, who handled Carafano's professional website and much of her e-mail correspondence, first learned of the false profile through a message

from "Jeff." Perry exchanged e-mails with Jeff, visited the Matchmaker site, and relayed information about the profile to Carafano. Acting on Carafano's instructions, Perry contacted Matchmaker and demanded that the profile be removed immediately. The Matchmaker employee indicated that she could not remove the profile immediately because Perry herself had not posted it, but the company blocked the profile from public view on Monday morning, November 8. At 4:00 AM the following morning, Matchmaker deleted the profile.

Carafano filed a complaint in California state court against Matchmaker and its corporate successors, alleging invasion of privacy, misappropriation of the right of publicity, defamation, and negligence. The defendants removed the case to federal district court. The district court granted the defendants' motion for summary judgment in a published opinion. Carafano v. Metrosplash.com, Inc., 207 F. Supp. 2d 1055 (C.D. Cal.2002). The court rejected Matchmaker's argument for immunity under 47 U.S.C. § 230(c)(1) after finding that the company provided part of the profile content, [c] However, the court rejected

979

Carafano's invasion of privacy claim on the grounds that her home address was "newsworthy" and that, in any case, Matchmaker had not disclosed her address with reckless disregard for her privacy, [c] Similarly, the court rejected Carafano's claims for defamation, negligence, and misappropriation because she failed to show that Matchmaker had acted with actual malice. [C]

II

The dispositive question in this appeal is whether Carafano's claims are barred by 47 U.S.C. § 230(c)(1), which states that "[n]o provider or user of an interactive computer service shall be treated as the publisher or speaker of any information provided by another information content provider." Through this provision, Congress granted most Internet services immunity from liability for publishing false or defamatory material so long as the information was provided by another party. As a result, Internet publishers are treated differently from corresponding publishers in print, television and radio. See Batzel v. Smith, 333 F.3d 1018, 1026-27 (9th Cir. 2003).

Congress enacted this provision as part of the Communications Decency Act of 1996 for two basic policy reasons: to promote the free exchange of information and ideas over the Internet and to encourage voluntary monitoring for offensive or obscene material. [C] Congress incorporated these ideas into the text of § 230 itself, expressly noting that "interactive computer services have flourished, to the benefit of all Americans, with a minimum of government regulation," and that "[i]ncreasingly Americans are relying on interactive media for a variety of political, educational, cultural, and entertainment services." 47 U.S.C. § 230(a)(4), (5). Congress declared it the "policy of the United States" to "promote the continued development of the Internet and other interactive computer services," "to preserve the vibrant and competitive free market that presently exists for the Internet and other interactive computer services," and to "remove disincentives for the development and utilization of blocking and filtering technologies." 47 U.S.C. § 230(b)(1), (2), (4).

In light of these concerns, reviewing courts have treated § 230(c) immunity as quite robust, adopting a relatively expansive definition of "interactive computer service" [footnote omitted] and a relatively restrictive definition of "information content provider." [footnote omitted] Under the statutory scheme, an "interactive computer service" qualifies for immunity so long as it does not also function as an "information content provider" for the portion of the statement or publication at issue.

We recently considered whether § 230(c) provided immunity to the operator of an electronic newsletter who selected and published an allegedly defamatory e-mail over the Internet. Batzel, 333 F.3d at 1030- 32. We held that the online newsletter qualified as an "interactive computer service" under the statutory definition and that the selection for publication and editing of an e-mail did not constitute partial

980

"creation or development" of that information within the definition of "information content provider." Although the case was ultimately remanded for determination of whether the original author intended to "provide" his e-mail for publication, [C] the Batzel decision joined the consensus developing across other courts of appeals that § 230(c) provides broad immunity for publishing content provided primarily by third parties. [Cc]

The fact that some of the content was formulated in response to Matchmaker's questionnaire does not alter this conclusion. Doubtless, the questionnaire facilitated the expression of information by individual users. However, the selection of the content was left

exclusively to the user. The actual profile "information" consisted of the particular options chosen and the additional essay answers provided. Matchmaker was not responsible, even in part, for associating certain multiple choice responses with a set of physical characteristics, a group of essay answers, and a photograph. Matchmaker cannot be considered an "information content provider" under the statute because no profile has any content until a user actively creates it.

As such, Matchmaker's role is similar to that of the customer rating system at issue in Gentry v. eBay, Inc., 99 Cal. App. 4th 816, 121 Cal. Rptr. 2d 703 (2002). In that case, the plaintiffs alleged that eBay "was an information content provider in that it was responsible for the creation of information, or development of information, for the online auction it provided through the Internet." [C] Specifically, the plaintiffs noted that eBay created a highly structured Feedback Forum, which categorized each response as a "Positive Feedback," a "Negative Feedback," or a "Neutral Feedback." [C] In addition, eBay provided a color coded star symbol next to the user name of a seller who had achieved certain levels of "Positive Feedback" and offered a separate "Power Sellers" endorsement based on sales volume and Positive Feedback ratings. [C] The court concluded that § 230 barred the claims:

Appellants' negligence claim is based on the assertion that the information is false or misleading because it has been manipulated by the individual defendants or other co-conspiring parties. Based on these allegations, enforcing appellants' negligence claim would place liability on eBay for simply compiling false and/or misleading content created by the individual defendants and other coconspirators. We

do not see such activities transforming eBay into an information content provider with respect to the representations targeted by appellants as it did not create or develop the underlying misinformation. [C]

Similarly, the fact that Matchmaker classifies user characteristics into discrete categories and collects responses to specific essay questions does not transform Matchmaker into a "developer" of the "underlying misinformation."

981

We also note that, as with eBay, Matchmaker's decision to structure the information provided by users allows the company to offer additional features, such as "matching" profiles with similar characteristics or highly structured searches based on combinations of multiple choice questions. Without standardized, easily encoded answers, Matchmaker might not be able to offer these services and certainly not to the same degree. Arguably, this promotes the expressed Congressional policy "to promote the continued development of the Internet and other interactive computer services." 47 U.S.C. § 230(b)(1).

Carafano responds that Matchmaker contributes much more structure and content than eBay by asking 62 detailed questions and providing a menu of "pre-prepared responses." However, this is a distinction of degree rather than of kind, and Matchmaker still lacks responsibility for the "underlying misinformation."

Further, even assuming Matchmaker could be considered an information content provider, the statute precludes treatment as a publisher or speaker for "any information provided by another

information content provider." 47 U.S.C. § 230(c)(1) (emphasis added). The statute would still bar Carafano's claims unless Matchmaker created or developed the particular information at issue. As the Gentry court noted,

[T]he fact appellants allege eBay is an information content provider is irrelevant if eBay did not itself create or develop the content for which appellants seek to hold it liable. It is not inconsistent for eBay to be an interactive service provider and also an information content provider; the categories are not mutually exclusive. The critical issue is whether eBay acted as an information content provider with respect to the information that appellants claim is false or misleading. [C]

In this case, critical information about Carafano's home address, movie credits, and the e-mail address that revealed her phone number were transmitted unaltered to profile viewers. Similarly, the profile directly reproduced the most sexually suggestive comments in the essay section, none of which bore more than a tenuous relationship to the actual questions asked. Thus Matchmaker did not play a significant role in creating, developing or "transforming" the relevant information.

Thus, despite the serious and utterly deplorable consequences that occurred in this case, we conclude that Congress intended that service providers such as Matchmaker be afforded immunity from suit. Thus, we affirm the judgment of the district court, albeit on other grounds.

Affirmed.

NOTES AND QUESTIONS

1. Responding to demands to encourage ISPs to take measures to monitor material coming before children, Congress enacted the

Communications Decency Act of 1996. The CDA grants broad immunity to ISPs. The protection extends to ISPs that fall within the definition of secondary publishers and, even more, to those that come within the terms of primary publishers. Blumenthal v. Drudge, 992 F. Supp. 44 (D.D.C. 1998). Does this immunity go too far? What incentives do ISPs have to self-regulate in light of such broad protections? An ISP can be liable if it is regarded as a developer actively creating material for the site. Fair Housing Council v. Roommates.com, LLC, 521 F.3d 1157 (9th Cir. 2008). The same considerations apply in liability of platforms like Amazon for defective products causing personal injuries. Chapter 15:5, Erie Ins. Co. v. Amazon.com, 925 F.3d 135 (4th Cir. 2019) (the CDA provides immunity for claims like misrepresentation or defamation based on the content of speech published by Amazon but not for products liability based on claims that Amazon is a seller in the chain of distribution of the product).

2. The industry has a strong lobby to maintain and extend the immunity to other theaters. See the inclusion of the immunity in the United States-Mexico-Canada Trade Agreement Art. 19.17(2), Dec. 10, 2019, prohibiting parties from treating internet platforms "as the publisher or speaker of any information provided" by their users.

3. Courts have interpreted immunity under § 230(c) broadly. See Zeran v. Am. Online, Inc., 129 F.3d 327 (4th Cir. 1997) (immunity for refusal to post a retraction for defamatory content that resulted in

death threats to plaintiff); Universal Comm. Sys. v. Lycos, Inc., 478 F.3d 413 (1st Cir. 2007) (immunity for message board posts about plaintiff company's management and finances); Doe v. MySpace, Inc., 528 F.3d 413 (5th Cir. 2008) (immunity when minor used site to connect with older male who sexually assaulted her).

However, several courts have questioned the limits of the Act's coverage of "providers." In Doe v. GTE Corp., 347 F.3d 655 (7th Cir. 2003), Judge Easterbrook, writing for a unanimous panel, stated that § 230(c)(1) may be a definitional clause in which an entity "would become a 'publisher or speaker' and lose the benefit of 230(c)(2) if it created the objectionable information." In Jones v. Dirty World Ent. Recordings LLC, 755 F.3d 398 (6th Cir. 2014), the plaintiff, a high school teacher and professional cheerleader, sued defendant for featuring a user submission consisting of photos of the plaintiff with male companions captioned with statements that the plaintiff had tested positive for several sexually transmitted diseases. The Court of Appeals for the Sixth Circuit held that the website operator could be liable if it made a "material contribution to the alleged illegality" of the defamatory content, but that defendant's actions of selecting the photos to be featured on the website and adding a brief comment to the post did not constitute a material contribution. Consider also Fair Housing Council of San Fernando Valley v. Roommates.com, LLC, 521 F.3d 1157 (9th Cir. 2008) (holding that the website operator may "contribute to the content's illegality" if the "design" requires "users to input illegal information"). For an empirical analysis of cases interpreting § 230(c)(1), see David Ardia, Free Speech Savior or Shield for Scoundrels: An Empirical Study of Intermediary Immunity under Section 230 of the Communications Decency Act, 43 Loy. L.A.

L. Rev. 373 (2010). See also Marjorie Heins, The Brave New World of

983

Social Media Censorship: How "Terms of Service" Abridge Free Speech, 127 Harv. L. Rev. F. 325 (2014).

4. Courts have occasionally found creative ways of limiting immunity. In Barnes v. Yahoo!, Inc., 570 F.3d 1096 (9th Cir. 2009), the facts fitted the usual pattern, in that a third party posted nude pictures of plaintiff and offensive remarks on defendant's website. The case is notable because it shows how a plaintiff can avoid the immunity provisions by alleging a claim sounding in contract law; the court held that § 230(c)(1) did not bar plaintiff's promissory estoppel cause of action. To prevail in a promissory estoppel claim, the plaintiff must show that the defendant undertook to remove harmful content and failed to do so. A divided panel in Batzel v. Smith, 333 F.3d 1018 (9th Cir. 2003), discussed in the principal case, announced that immunity is maintained provided the ISP reasonably understood that the original source intended the content to be published online. The court held that the website operator could reasonably have concluded that an email containing statements that plaintiff possessed looted artwork was intended for dissemination, even when the author of the email did not so intend.

Ogden v. Association of the United States Army

United States District Court, District of Columbia, 1959.

177 F.Supp. 498.

HOLTZOFF, DISTRICT Judge. The question presented for decision in this case is whether from the standpoint of the statute of limitations in an action for libel every sale or delivery of a copy of a book, periodical, or newspaper containing an alleged defamatory statement, creates a separate cause of action; or whether only one cause of action arises which accrues at the time of the first publication of one or more copies of the offending material. To formulate this question in another form, should the so-called modern "single publication rule" be the law of the District of Columbia? [The book containing the alleged libel was published in November, 1955. This suit was filed on June 25, 1959. The District of Columbia has a 1-year statute of limitations for defamation.]

The common law was originally to the effect that every sale or delivery of libelous matter was a new publication and that, therefore, a new cause of action accrued on each occasion. ***

A leading English case on the subject is The Duke of Brunswick v. Harmer, 14 Q.B. 185, 117 Eng.Rep. 75, decided in 1849. It involved an issue of a newspaper published in 1830. A single copy was sold by the defendant seventeen years later and a suit for libel was predicated on this sale as a publication. The plea of the statute of limitations was overruled on the theory that each sale or delivery of a copy of the offending material gave rise to a new and separate cause of action. ***

Under modern conditions the original common-law rule would give rise to an unnecessary multiplicity of suits and would practically destroy the statute of limitations as a statute of repose in actions for

libel. There is no doubt, to be sure, that the number of copies of the offending

984

publication that have been supplied to the public is a factor to be considered in determining the amount of damages to be awarded. In order to protect the plaintiff in this respect, however, it is not necessary to hold that every sale and delivery of an additional copy is a new publication and gives rise to a new cause of action.

[The court reviews decisions from many states adopting the single-publication rule and quotes the Uniform Single Publications Act, promulgated in 1952 and adopted in a number of other states.]

There are indeed a few States that expressly adhere to the original English rule in cases that were decided a great many years ago, [cc]. They are a small minority. ***

***[T]he conclusion is inescapable that the modern American law of libel has adopted the so-called "single publication" rule; and, therefore, this principle must be deemed a part of the common law of the District of Columbia. In other words, it is the prevailing American doctrine that the publication of a book, periodical, or newspaper containing defamatory matter gives rise to but one cause of action for libel, which accrues at the time of the original publication, and that the statute of limitations runs from that date. It is no longer the law that every sale or delivery of a copy of the publication creates a new cause of action. ***

The defendant's motion for summary judgment is granted.

NOTES AND QUESTIONS

1. American jurisdictions now generally agree with the principal case. Each edition of a newspaper, magazine, or book is held to be one separate publication. Christoff v. Nestle USA, Inc., 213 P.3d 132 (Cal. 2009) (thoroughly discussing the history of the single publication rule, including the common law rule and reasons for its rejection). This is true of each broadcast or rebroadcast over radio or television, and each exhibition of a motion picture. When a hundred different newspapers each publish in their own editions a news report supplied by the Associated Press, a hundred publications are constituted and each is separately actionable. See Restatement (Second) of Torts § 577A (1977). In a thorough review of the law of defamation, the UK Parliament has adopted the single publication rule. Defamation Act 2013, c. 26, § 8 (Eng.).

2. In Firth v. State, 775 N.E.2d 463 (N.Y. 2002), the New York Court of Appeals wrestled with the question of how to deal with the Internet in the context of the single publication rule. Plaintiff claimed that defendant had modified its website, after being made aware of a defamatory statement on it, without removing that statement. Plaintiff argued that, for the purposes of the statute of limitations, the modification and reposting should be a second publication of the information on the Internet. The court disagreed, noting that the Internet is a unique media format that allows constant access to information by all persons. This also gives an individual the opportunity to modify a website without restriction at any time. Unlike a book or magazine that has specific publication runs, this constant modification, if

counted as a publication, could create a morass of litigation and defeat the statute of limitations for Internet defamation. The court also held the mere addition of information to a website cannot serve as republication of any supposedly defamatory material already on the website. The court in Nationwide Bi-Weekly Admin., Inc. v. Belo Corp., 512 F.3d 137 (5th Cir. 2007), held that, under Texas law, the single publication rule applied to a website or Internet publication.

3. The Internet has had, and will continue to have, an impact on how the law crafts defamation rules. The deep and ancient roots of the law are being challenged, as they were when the printing press was invented. In reading the cases to follow in Section 4, tracing the Supreme Court's inroads into defamation law, ask yourselves what values under the First Amendment are being promoted. Do the assumptions of free speech found in New York Times apply in the era of the Internet with the potential of citizens' unprecedented access to information and debate? Yoo, Free Speech and the Myth of the Internet as an Unintermediated Experience, 78 Geo. Wash. L. Rev. 697 (2010) (discussing the inevitable and arguably beneficial role of internet intermediaries, including last-minute network providers, search engines, social networking sites and smartphones, in promoting free speech). Retweeted tweets are new publications if they are directed to a new audience. The original tweeter is not liable for the retweet unless she reasonably foresees that the tweet will be republished. The general rule is whether the republication was reasonably foreseeable. Hickey v. St. Martin's Press, Inc., 978 F.Supp. 230 (D.Md. 1997).

4. Basis of Liability

The early law imposed strict liability for defamation, as in the case of most other torts. See Holdsworth, Defamation in the Sixteenth and Seventeenth Centuries, 41 L.Q. Rev. 13 (1925).

During the 17th Century, the courts were not at all anxious to encourage actions for defamation. The rule developed that the plaintiff must prove not only that the defendant intended to defame him, but that he was inspired by "malice," in the sense of spite, ill will, or a desire to do harm. Whitlock v. Horton, (1791) 79 Eng. Rep. 78 (Exch.); 1 Cro. Jac. 91 (Eng.); Crawford v. Middleton, (1793) 83 Eng. Rep. 308 (K.B.); 1 Lev. 82 (Eng.). Apparently this was carried over from the ecclesiastical law of slander, which was concerned with the moral sin of speaking ill of one's neighbor, and from criminal libel, which required at least a criminal intent. Van Vechten Veeder, History and Theory of the Law of Defamation, 4 Colum. L. Rev. 33 (1904); Note, Slander and Libel, 6 Am. L. Rev. 593 (1872).

The historic case of Bromage v. Prosser, (1825) 107 Eng. Rep. 1051 (K.B.); 4 B. & C. 247 (Eng.), drew a distinction between "malice in fact and malice in law." Malice is necessary, it held, but in the ordinary defamation case, if the statement is false and defamatory and it was made intentionally, "the law implies such malice as is necessary to

maintain the action." Factual malice, on the other hand, is not a necessary part of the plaintiffs case in an ordinary defamation action; but it may be important to refute a qualified privilege or to justify punitive damages. "Malice" has also come to be used, with a still

different meaning, in the constitutional law cases set out in this Section.

Thus, malice implied in law consequently became a pure fiction, and therefore malice in fact was no longer requisite to prima facie defamation cases. Nevertheless, the courts continued to reference malice, and thus the term's role in defamation actions is one of profound confusion.

After Bromage v. Prosser, decisions imposed liability for unintended and innocent defamation. The classic case was the Scottish decision of Morrison v. Ritchie & Co., (1904) 4 F. 645 (Scot.). Here, the defendant newspaper company published a notice in good faith that plaintiffs wife had given birth to twins. It was held liable when the report proved false and was considered "defamatory in respect that the date stated was within two months of [the plaintiffs] marriage."

Then came Hulton v. Jones, [1910] A.C. 20 (appeal taken from Wales). In this case, the defendant newspaper published a report from a French correspondent from the resort of Dieppe, which contained a passage reading: " 'Whist! there is Artemus Jones with a woman who is not his wife, who must be, you know--the other thing!' whispers a fair neighbour of mine excitedly into her bosom friend's ear. Really, is it not surprising how certain of our fellow-countrymen behave when they come abroad?" Jones v. Hulton, [1909], 2 K.B. 444 at 445. The name Artemus Jones was fictitious, coined for the occasion after an American humorist named Artemus Ward. However, a real Artemus Jones, a North Wales barrister, sued. Although nothing connected him with the person parodied in the article apart from his name, he recovered on the ground that some of

his friends understood the piece to refer to him. See Jeremiah Smith, Jones v. Hulton: Three Conflicting Views as to Defamation, 60 U. Pa. L. Rev. 365, 461 (1912); W.S. Holdsworth, A Chapter of Accidents in the Law of Libel, 57 L.Q. Rev. 74 (1941).

In the United States, the leading case of Corrigan v. Bobbs-Merrill Co., 126 N.E. 260, 262 (N.Y. 1920), was similar. An author sent in a book manuscript purporting to be fictitious, and the publisher produced it without realizing that it referred in an identifiable way to a magistrate in the city of New York. "The fact that the publisher has no actual intention to defame a particular man or indeed to injure any one does not prevent recovery of compensatory damages by one who connects himself with the publication... The question is not so much who was aimed at as who was hit." There were numerous cases in accord.

Secondary Publishers. There is one important exception. A vendor or distributor of a newspaper, magazine or book is called a "secondary publisher." A secondary publisher is not liable if it did not know about, and had no reason to suspect, libelous matter in the publication. See Vizetelly v. Mudie's Select Library Ltd., [1900] 2 Q.B. 170 (Eng.)

(concerning a lending library); Balabanoff v. Fossani, 81 N.Y.S.2d 732 (N.Y. Spec. Term 1948) (concerning a newspaper vendor); Grisham v. W. Union Tel. Co., 142 S.W. 271 (Mo. 1911) (finding that the telegram was innocent on its face).

A newspaper or book publishing company does not qualify as a secondary publisher and is subject to strict liability even though it

innocently took the defamatory material from someone else without reason to be put on guard. However, republication of items received from wire services will not be subject to liability if (1) the service was reputable; (2) defendant did not know of the falsity; (3) the story itself does not reveal its falsity; and (4) no substantial change was made to the story.

There has been sharp disagreement as to how local radio and television networks are to be classified when they broadcast material directly from national networks or allow someone else to supply a program without opportunity for screening it. Holding that they are primary publishers: Sorensen v. Wood, 123 Neb. 348, 243 N.W. 82 (1932); Miles v. Louis Wasmer, Inc., 172 Wash. 466, 20 P.2d 847 (1933). See Sorensen v. Wood, 243 N.W. 82 (Neb. 1932); Miles v. Louis Wasmer, Inc., 20 P.2d 847 (Wash. 1933). See Kelly v. Hoffman, 61 A.2d 143 (N.J. 1948); Summit Hotel Co. v. Nat'l Broad. Co., 8 A.2d 302 (Pa. 1939); Auvil v. CBS "60 Minutes," 800 F. Supp. 928 (E.D. Wash. 1992), for cases holding that they are secondary publishers. A number of states have statutes, the enactment of which was supported by broadcasters, providing protection unless due care was not taken. The Restatement takes the position that a broadcasting station should be treated as an original publisher. Restatement (Second) of Torts § 581(2) (1977). See Marvin Ammori, The "New" New York Times: Free Speech Lawyering in the Age of Google and Twitter, 127 Harv. L. Rev. 2259 (2014); Rowbottom, In the Shadow of the Big Media: Freedom of Expression, 2014 Pub. L. 491. Before the promulgation of the Communications Decency Act of 1996 (CDA), 47 U.S.C. § 230, Internet service providers ("ISPs")

were classified as secondary publishers. For further discussion, see supra pages 981--983.

New York Times Co. v. Sullivan

Supreme Court of the United States, 1964.

376 U.S. 254, 84 S.Ct. 710, 11 L.Ed.2d 686.

JUSTICE Brennan delivered the opinion of the Court.

We are required in this case to determine for the first time the extent to which the constitutional protections for speech and press limit a State's power to award damages in a libel action brought by a public official against critics of his official conduct.

Respondent L.B. Sullivan is one of the three elected Commissioners of the City of Montgomery, Alabama. He testified that he was "Commissioner of Public Affairs and the duties are supervision of the

988

Police Department, Fire Department, Department of Cemetery and Department of Scales." He brought this civil libel action against the four individual petitioners, who are Negroes and Alabama clergymen, and against petitioner the New York Times Company, a New York corporation which publishes the New York Times, a daily newspaper. A jury in the Circuit Court of Montgomery County awarded him damages of $500,000, the full amount claimed, against all the petitioners, and the Supreme Court of Alabama affirmed.

[Caption: Justice Brennan.]

Respondent's complaint alleged that he had been libeled by statements in a full-page advertisement that was carried in the New

York Times on March 29, 1960. Entitled "Heed Their Rising Voices," the

advertisement began by stating that "As the whole world knows by now, thousands of Southern Negro students are engaged in wide-spread nonviolent demonstrations in positive affirmation of the right to live in human dignity as guaranteed by the U.S. Constitution and the Bill of Rights." It went on to charge that "in their efforts to uphold these guarantees, they are being met by an unprecedented wave of terror by those who would deny and negate that document which the whole world looks upon as setting the pattern for modern freedom. ***" Succeeding paragraphs purported to illustrate the "wave of terror" by describing certain alleged events. The text concluded with an appeal for funds for three purposes: support of the student movement, "the struggle for the right-to-vote," and the legal defense of Dr. Martin Luther King, Jr., leader of the movement, against a perjury indictment then pending in Montgomery.

The text appeared over the names of 64 persons, widely known for their activities in public affairs, religion, trade unions, and the performing arts. ***

Of the 10 paragraphs of text in the advertisement, the third and a portion of the sixth were the basis of respondent's claim of libel. They read as follows:

Third paragraph: "In Montgomery, Alabama, after students sang My Country, 'Tis of Thee' on the State Capitol steps, their leaders were expelled from school, and truckloads of police armed with shotguns and tear-gas ringed the Alabama State College Campus. When the

entire student body protested to state authorities by refusing to re-register, their dining hall was padlocked in an attempt to starve them into submission."

Sixth paragraph: "Again and again the Southern violators have answered Dr. King's peaceful protests with intimidation and violence. They have bombed his home almost killing his wife and child. They have assaulted his person. They have arrested him seven times--for 'speeding,' 'loitering' and similar 'offenses.' And now they have charged him with 'perjury'--a felony under which they could imprison him for ten years. ***"

[Although plaintiff was not mentioned by name, he contended that these statements attributed misconduct to him as the Montgomery Commissioner who supervised the Police Department.]

It is uncontroverted that some of the statements contained in the two paragraphs were not accurate descriptions of events which occurred in Montgomery. Although Negro students staged a demonstration on the State Capitol steps, they sang the National Anthem and not "My Country, 'Tis of Thee." Although nine students were expelled by the State Board of Education, this was not for leading the demonstration at the Capitol, but for demanding service at a lunch counter in the Montgomery County Courthouse on another day. Not the entire student body, but

most of it, had protested the expulsion, not by refusing to register, but by boycotting classes on a single day; virtually all the students did register for the ensuing semester. The campus dining hall was not padlocked on any occasion, and the only students who may have

been barred from eating there were the few who had neither signed a preregistration application nor requested temporary meal tickets. Although the police were deployed near the campus in large numbers on three occasions, they did not at any time "ring" the campus, and they were not called to the campus in connection with the demonstration on the State Capitol steps, as the third paragraph implied. Dr. King had not been arrested seven times, but only four; and although he claimed to have been assaulted some years earlier in connection with his arrest for loitering outside a courtroom, one of the officers who made the arrest denied that there was such an assault.

On the premise that the charges in the sixth paragraph could be read as referring to him, respondent was allowed to prove that he had not participated in the events described. Although Dr. King's home had in fact been bombed twice when his wife and child were there, both of these occasions antedated respondent's tenure as Commissioner, and the police were not only not implicated in the bombings, but had made every effort to apprehend those who were. Three of Dr. King's four arrests took place before respondent became Commissioner. Although Dr. King had in fact been indicted (he was subsequently acquitted) on two counts of perjury, each of which carried a possible five-year sentence, respondent had nothing to do with procuring the indictment. ***

The trial judge submitted the case to the jury under instructions that the statements in the advertisement were "libelous per se" and were not privileged, so that petitioners might be held liable if the jury found that they had published the advertisement and that the statements were made "of and concerning" respondent. ***

Under Alabama law as applied in this case ***once "libel per se" has been established, the defendant has no defense as to stated facts unless he can persuade the jury that they were true in all their particulars. [Cc] His privilege of "fair comment" for expressions of opinion depends on the truth of the facts upon which the comment is based. ***

The First Amendment, said Judge Learned Hand, "presupposes that right conclusions are more likely to be gathered out of a multitude of tongues, than through any kind of authoritative selection. To many this is, and always will be, folly; but we have staked upon it our all." United States v. Associated Press, 52 F.Supp. 362, 372 (S.D.N.Y. 1943). *** Thus we consider this case against the background of a profound national commitment to the principle that debate on public issues should be uninhibited, robust and wide-open, and that it may well include vehement, caustic, and sometimes unpleasantly sharp attacks on government and public officials. [Cc] The present advertisement, as an expression of grievance and protest, on one of the major public issues of

991

our time, would seem clearly to qualify for the constitutional protection. The question is whether it forfeits that protection by the falsity of some of its factual statements and by its alleged defamation of respondent.

Authoritative interpretations of the First Amendment guarantees have consistently refused to recognize an exception for any test of truth--whether administered by judges, juries, or administrative officials--and especially one that puts the burden of proving truth on

the speaker. [C] The constitutional protection does not turn upon "the truth, popularity, or social utility of the ideas and beliefs which are offered." [C] As Madison said, "Some degree of abuse is inseparable from the proper use of everything; and in no instance is this more true than in that of the press." [C] ***

If neither factual error nor defamatory content suffices to remove the constitutional shield from criticism of official conduct, the combination of the two elements is no less inadequate. [The Court here reviewed the history of the Sedition Act of 1798, which made it a crime to publish defamation against high officers of the United States, and reached the conclusion at this late date that the Act was unconstitutional.]

What a State may not constitutionally bring about by means of a criminal statute is likewise beyond the reach of its civil law of libel. The fear of damage awards under a rule such as that invoked by the Alabama courts here may be markedly more inhibiting than the fear of prosecution under a criminal statute. ***Presumably a person charged with violation of [a criminal-libel] statute enjoys ordinary criminal-law safeguards such as the requirements of an indictment and of proof beyond a reasonable doubt. These safeguards are not available to the defendant in a civil action. ***

The state rule of law is not saved by its allowance of the defense of truth. ***A rule compelling the critic of official conduct to guarantee the truth of all his factual assertions--and to do so on pain of libel judgments virtually unlimited in amount--leads to a comparable "self-censorship." ***

The constitutional guarantees require, we think, a federal rule that prohibits a public official from recovering damages for a defamatory falsehood relating to his official conduct unless he proves that the statement was made with "actual malice"--that is, with knowledge that it was false or with reckless disregard of whether it was false or not. An oft-cited statement of a like rule, which has been adopted by a number of state courts, is found in the Kansas case of Coleman v. MacLennan, 78 Kan. 711, 98 P. 281 (1908). The State Attorney General, a candidate for re-election and a member of the commission charged with the management and control of the state school fund sued a newspaper publisher for alleged libel in an article purporting to state facts relating to his official conduct in connection with a school-fund transaction. ***In answer to a special question, the jury found that the plaintiff had not proved actual malice, and a general verdict was returned for the defendant.

992

On appeal the Supreme Court of Kansas, in an opinion by Justice Burch, reasoned as follows:

"[I]t is of the utmost consequence that the people should discuss the character and qualifications of candidates for their suffrage. The importance to the state and to society of such discussions is so vast, and the advantages derived are so great that they more than counter-balance the inconvenience of private persons whose conduct may be involved, and occasional injury to the reputations of individuals must yield to the public welfare, although at times such injury may be great. The public benefit from publicity is so great and the chance of injury to private character so small that such

discussion must be privileged." The court thus sustained the trial court's instruction as a correct statement of the law, saying:

"In such a case the occasion gives rise to a privilege qualified to this extent. Any one claiming to be defamed by the communication must show actual malice, or go remediless. This privilege extends to a great variety of subjects and includes matters of public concern, public men, and candidates for office." [C]

We hold today that the Constitution delimits a State's power to award damages for libel in actions brought by public officials against critics of their official conduct. Since this is such an action, the rule requiring proof of actual malice is applicable. ***

[W]e consider that the proof presented to show actual malice lacks the convincing clarity which the constitutional standard demands, and hence that it would not constitutionally sustain the judgment for respondent under the proper rule of law. The case of the individual petitioners requires little discussion. Even assuming that they could constitutionally be found to have authorized the use of their names on the advertisement, there was no evidence whatever that they were aware of any erroneous statements or were in any way reckless in that regard. The judgment against them is thus without constitutional support.

As to the Times, we similarly conclude that the facts do not support a finding of actual malice. The statement by the Times' Secretary that, apart from the padlocking allegation, he thought the advertisement was "substantially correct," affords no constitutional warrant for the Alabama Supreme Court's conclusion that it was a "cavalier ignoring of the falsity of the advertisement, [from which] the jury could not

have but been impressed with the bad faith of The Times, and its maliciousness inferable therefrom." The statement does not indicate malice at the time of the publication; even if the advertisement was not "substantially correct"--although respondent's own proofs tend to show that it was--that opinion was at least a reasonable one, and there was no evidence to impeach the witness' good faith in holding it. The Times' failure to retract upon respondent's demand, although it later retracted upon the demand of Governor Patterson, is likewise not adequate evidence of malice for constitutional purposes. Whether or not a failure to retract may ever constitute such evidence, there are two reasons why it does not here.

993

First, the letter written by the Times reflected a reasonable doubt on its part as to whether the advertisement could reasonably be taken to refer to respondent at all. Second, it was not a final refusal, since it asked for an explanation on this point--a request that respondent chose to ignore. Nor does the retraction upon the demand of the Governor supply the necessary proof. It may be doubted that a failure to retract which is not itself evidence of malice can retroactively become such by virtue of a retraction subsequently made to another party. But in any event that did not happen here, since the explanation given by the Times' Secretary for the distinction drawn between respondent and the Governor was a reasonable one, the good faith of which was not impeached.

Finally, there is evidence that the Times published the advertisement without checking its accuracy against the news stories in the Times' own files.... We think the evidence against the Times supports at

most a finding of negligence in failing to discover the misstatements, and is constitutionally insufficient to show the recklessness that is required for a finding of actual malice. ***

We also think the evidence was constitutionally defective in another respect: it was incapable of supporting the jury's finding that the allegedly libelous statements were made "of and concerning" respondent.

There was no reference to respondent in the advertisement, either by name or official position. A number of the allegedly libelous statements ***did not even concern the police. ***

Although the statements may be taken as referring to the police, they do not on their face make even an oblique reference to respondent as an individual. ***

This ***has disquieting implications for criticism of governmental conduct. For good reason, "no court of last resort in this country has ever held, or even suggested, that prosecutions for libel on government have any place in the American system of jurisprudence." City of Chicago v. Tribune Co. (1923) 307 III. 595, 601, 139 N.E. 86, 88.

The present proposition would sidestep this obstacle by transmuting criticism of government, however impersonal it may seem on its face, into personal criticism, and hence potential libel of the officials of whom the government is composed. ***We hold that such a proposition may not constitutionally be utilized to establish that an otherwise impersonal attack on governmental operations was a libel of an official responsible for those operations. ***

The judgment of the Supreme Court of Alabama is reversed, and the case is remanded to that court for further proceedings not inconsistent with this opinion.

[The concurring opinions of JUSTICES BLACK and GOLDBERG are omitted. Both would categorically deny any action of defamation by a public official insofar as his public conduct is concerned. This was variously characterized as "an absolute, unconditional constitutional

994

right to ***say what one pleases about public affairs," "an absolute immunity for criticism of the way public officials do their public duty," and "an absolute privilege for criticism of official conduct." JUSTICE DOUGLAS joined in both opinions.]

NOTES AND QUESTIONS

1. For fuller accounts of this case and its background, see Harry Kalven, Jr., The New York Times Case: A Note on "The Central Meaning of the First Amendment," 1964 Sup. Ct. Rev. 191; Anthony Lewis, New York Times v. Sullivan Reconsidered: A Return to "The Central Meaning of the First Amendment," 83 Colum. L. Rev. 603 (1983); Samuel R. Pierce, Jr., The Anatomy of an Historic Decision: New York Times Co. v. Sullivan, 43 N.C. L. Rev. 315 (1964). See also Kermit L. Hall & Melvin I. Urofsky, New York Times v. Sullivan: Civil Rights, Libel Law, and the Free Press (2011); Paul Finkelman & Melvin L. Urofsky, Landmark Decisions of the United States Supreme Court (2d ed. 2008); for two articles calling for reconceptualization, see Richard A. Epstein, Was New York Times v. Sullivan Wrong?, 53 U. Chi. L. Rev. 782 (1986); Cristina Tilley, (Re)categorizing Defamation, 94 Tulane L. Rev. 435 (2020). For a

contextual history and assessment of the longevity of the principal case, see Partlett, New York Times v. Sullivan (1964), in Landmark Cases in Defamation Law, Rolph (ed.) (2019) at 125--150. The iconic standing of the case has been questioned by Justice Thomas concurring in the denial of cert, in McKee v. Cosby, 139 S. Ct. 675, 586 U.S. (2019) asserting that it was based on "policy-driven decisions rather than a good faith application of Constitutional principles."

2. Fair Comment. For many years before the principal case, the courts had developed, at common law and virtually without reference to the Constitution, a privilege of criticism of public officers and their official conduct. It usually was called the privilege of "fair comment," see Milkovich v. Lorain Journal, infra page 1035.

The existence of this qualified privilege was not disputed. There was, however, a sharp division of authority on whether it was limited to "comment" or criticism, that is, the expression of opinion, or whether it extended to false statements of fact. About three-quarters of the courts that had considered the question held that the privilege was limited to the expression of opinion, and did not include misstatements of fact. This was the position taken by the Supreme Court of Alabama before it was reversed two years later by the principal case. N.Y. Times Co. v. Sullivan, 144 So.2d 25 (Ala. 1962), rev'd, 376 U.S. 254 (1964)

The leading case to this effect was Post Pub. Co. v. Hallam. 59 Fed. 530 (6th Cir. 1893), an opinion of Judge (later President and Chief Justice) Taft. The reason he advanced was that if public men were to be subjected to false statements of fact, good men could not be

found to take public posts. A vigorous minority, headed by Coleman v. MacLennan, 98 P. 281 (Kan. 1908), and supported by most of the commentators, contended that the privilege extended to false statements of fact, so long as they were made in good faith. For an interpretive history of political libel in the United States, see Norman

L. Rosenberg, Protecting the Best Men: An Interpretive History of the Law of Libel (1986).

3. Public Officials. Rosenblatt v. Baer, 383 U.S. 75 (1966), involved comments about the supervisor of a county recreation area. The Court held that whether he was a public official was a question of federal law, not state law. The test was held to be whether "[t]he position in government has such apparent importance that the public has an independent interest in the qualifications and performance of the person who holds it, beyond the general public interest in the qualifications and performance of all governmental employees." Cf. Tucker v. Kilgore, 388 S.W.2d 112 (Ky.1964) (patrolman).

The N.Y. Times rule applies to candidates for public office. Monitor Patriot Co. v. Roy, 401 U.S. 265 (1971); Ocala Star-Banner Co. v. Damron, 401 U.S. 295 (1971).

4. Public Figures. The N.Y. Times rule was extended to apply to "public figures" in Curtis Pub. Co. v. Butts, 388 U.S. 130 (1967), and Associated Press v. Walker, 388 U.S. 130 (1967). Two cases were involved: a suit by (1) Coach Wally Butts of the University of Georgia (employed by a private corporation rather than the state) for a story in the Saturday Evening Post charging him with conspiring with Coach Bear Bryant of the University of Alabama to "fix" a football

game and (2) Edwin A. Walker, a well-known retired army general, against the Associated Press for a story regarding his alleged part in a student disturbance at the University of Mississippi involving enrollment of its first African-American student. Both were held to be public figures. Recovery below was reversed in Walker, but affirmed in Butts. For an interesting look on the factual background of the Butts case, see James Kirby, Fumble: Bear Bryant, Wally Butts and the Great College Scandal (1986).

The Walker and Butts opinions precipitated some confusion about the correct standard of proof for actual malice. Any doubt was resolved by the Court in Harte-Hanks Commns., Inc. v. Connaughton, 491 U.S. 657 (1989), infra page 1000, when the Court "emphatically" adopted the standard of "knowledge or reckless disregard" enunciated in New York Times. In Dongguk Univ. v. Yale Univ., 734 F.3d 113 (2d Cir. 2013), a Korean university sued Yale for defamation. Yale publicly denied that it had ever conferred a Ph.D. on a Korean art professor. Yale did not do due diligence before its initial denial, but then later discovered it had, in fact, arguably confirmed in a fax the existence of the bogus degree. Nonetheless, the court said the university was a public figure and that there was no actual malice.

5. Matter of Public or General Interest. Rosenbloom v. Metromedia, Inc., 403 U.S. 29 (1971), expanded the N.Y. Times knowing-or-reckless- disregard standard beyond public officials and public figures to apply to any matter of public or general interest. Rosenbloom had been arrested in a police drive against obscene books. Defendant, operating a radio news station, reported the arrest and used the terms "smut literature racket" and "girlie-book

peddlers." Following acquittal of the criminal charges, plaintiff sued for libel. He recovered $25,000 in general damages and $725,000 in

punitive damages, reduced by remittitur to $250,000. The Court of Appeals reversed, holding the N. Y. Times standard applied, though the plaintiff was not a public figure. The Supreme Court agreed.

Once again the Justices divided sharply. The plurality opinion was written by Justice Brennan, joined by Chief Justice Burger, and Justices Blackmun and Black concurred in the judgment but adhered to his absolute-privilege view. Justice White, J., concurred in the result on the ground that the report covered the official action of public officials. Justices Harlan and Marshall, J J. (joined by Justice Stewart), dissented in separate opinions deprecating the ad-hoc nature of a test depending upon whether an event was a matter of public or general interest and urged that the way for the Court to take care of the recurring cases was to limit the measure of recovery to "proven, actual damages" and to eliminate strict liability. Justice Douglas, J., did not participate in the case.

The plurality opinion of Justice Brennan remained the binding rule of constitutional law until it was repudiated in 1974 by Gertz v. Robert Welch, Inc., infra page 1010. Does its spirit still live in Dun & Bradstreet, Inc. v. Greenmoss Builders, Inc., infra page 1021?

The concept of "matters of public concern" is frequently used to identify the realm of information that attracts heightened First Amendment protection. In Bartnicki v. Vopper, 532 U.S. 514 (2001), Justice Stevens, writing for the Court, held a wiretapping statute unconstitutional when applied to defendants who had received and

disseminated recordings of unlawfully obtained cell phone conversations. The content of the tapes was "truthful information of public concern," the distribution of which could not be punished under the law. Justice Breyer, joined by Justice O'Connor, emphasized that the holding was narrow because the expectation of privacy, a legitimate state interest, was low, considering the threat of violence made in the conversations. Chief Justice Rehnquist, joined by Justices Scalia and Thomas, criticized the "amorphous concept" of "public concern," finding that the Court's decision chilled, rather than enhanced, the free speech purposes of the First Amendment.

6. As with all revolutions, so with New York Times: many problems were left in its wake. The common law had to be reconciled with First Amendment principles. We now review the "wreckage" and subsequent "salvage" work of the courts. What is the meaning of actual malice? How does it affect the press? What of imputations concerning private persons? What of information that is purely private? What of the falsity presumption of defamatory imputations? What are public figures and officials? Do defamatory imputations in the form of opinion call forth a special analysis? The case law and academic commentary on the impact of New York Times and its progeny is multitudinous. David A. Anderson, Is Libel Law Worth Reforming, 140 U. Pa. L. Rev. 487, 488 nn.2-3 (1991), gives a sampling of the debate. The flow shows no signs of diminishing. Most recently Tilley, (Re)categorizing Defamation, 94 Tulane L. Rev. 435 (2020) (arguing that the practices and technology of information production have changed making a requirement of fault inconsistent with tortious concepts of agency.)

(A) Actual Malice, Burdens of Proof, and the Press

St. Amant v. Thompson

Supreme Court of the United States, 1968.

390 U.S. 727, 88 S.Ct. 1323, 20 L.Ed.2d 262.

[Defendant St, Amant made a televised political speech, in the course of which he read questions that he had put to a union member, Albin, and Albin's answers. The answers falsely charged the plaintiff, a deputy sheriff, with criminal conduct. Plaintiff sued defendant for defamation, and was awarded damages by the trial judge. The judge then considered New York Times Co. v. Sullivan, supra page 987, decided after the trial, and denied a motion for a new trial. An intermediate appellate court reversed the judgment, finding that defendant had not acted with "actual malice" within the meaning of the New York Times rule. The Louisiana Supreme Court reversed, finding that there had been sufficient evidence that defendant had acted in "reckless disregard" of the truth. The Supreme Court granted certiorari.]

JUSTICE White delivered the opinion of the Court. ***

For purposes of this case we accept the determinations of the Louisiana courts that the material published by St. Amant charged Thompson with criminal conduct, that the charge was false, and that Thompson was a public official, and so had the burden of proving that the false statements about Thompson were made with actual malice as defined in New York Times Co. v. Sullivan and later cases.

We cannot, however, agree with either the Supreme Court of Louisiana or the trial court that Thompson sustained this burden.

Purporting to apply the New York Times malice standard, the Louisiana Supreme Court ruled that St. Amant had broadcast false information about Thompson recklessly though not knowingly. Several reasons were given for this conclusion. St. Amant had no personal knowledge of Thompson's activities; he relied solely on Albin's affidavit although the record was silent as to Albin's reputation for veracity; he failed to verify the information with those in the union office who might have known the facts; he gave no consideration as to whether or not the statements defamed Thompson and went ahead heedless of the consequences; and he mistakenly believed he had no responsibility for the broadcast because he was merely quoting Albin's words.

These considerations fall short of proving St. Amant's reckless disregard for the accuracy of his statements about Thompson. "Reckless disregard," it is true, cannot be fully encompassed in one infallible definition. Inevitably its outer limits will be marked out through case-by- case adjudication, as is true with so many legal standards for judging concrete cases, whether the standard is provided by the Constitution, statutes, or case law. Our cases, however, have furnished meaningful guidance for the further definition of a reckless publication.

998

In New York Times, the plaintiff did not satisfy his burden because the record failed to show that the publisher was aware of the likelihood that he was circulating false information. In Garrison v.

State of Louisiana, 379 U.S. 64 (1964), also decided before the decision of the Louisiana Supreme Court in this case, the opinion emphasized the necessity for showing that a false publication was made with a "high degree of awareness of ***probable falsity." Mr. Justice Harlan's opinion in Curtis Publishing Co. v. Butts, 388 U.S. 130, 153 (1967), stated that evidence of either deliberate falsification or reckless publication "despite the publisher's awareness of probable falsity" was essential to recovery by public officials in defamation actions. These cases are clear that reckless conduct is not measured by whether a reasonably prudent man would have published, or would have investigated before publishing. There must be sufficient evidence to permit the conclusion that the defendant in fact entertained serious doubts as to the truth of his publication. Publishing with such doubts shows reckless disregard for truth or falsity and demonstrates actual malice.

It may be said that such a test puts a premium on ignorance, encourages the irresponsible publisher not to inquire, and permits the issue to be determined by the defendant's testimony that he published the statement in good faith and unaware of its probable falsity. Concededly the reckless disregard standard may permit recovery in fewer situations than would a rule that publishers must satisfy the standard of the reasonable man or the prudent publisher. But New York Times and succeeding cases have emphasized that the stake of the people in public business and the conduct of public officials is so great that neither the defense of truth nor the standard of ordinary care would protect against self-censorship and thus adequately implement First Amendment policies. Neither lies nor false communications serve the ends of the First Amendment, and

no one suggests their desirability or further proliferation. But to insure the ascertainment and publication of the truth about public affairs, it is essential that the First Amendment protect some erroneous publications as well as true ones. We adhere to this view and to the line which our cases have drawn between false communications which are protected and those which are not.

The defendant in a defamation action brought by a public official cannot, however, automatically insure a favorable verdict by testifying that he published with a belief that the statements were true. The finder of fact must determine whether the publication was indeed made in good faith. Professions of good faith will be unlikely to prove persuasive, for example, where a story is fabricated by the defendant, is the product of his imagination, or is based wholly on an unverified anonymous telephone call. Nor will they be likely to prevail when the publisher's allegations are so inherently improbable that only a reckless man would have put them in circulation. Likewise, recklessness may be found where

999

there are obvious reasons to doubt the veracity of the informant or the accuracy of his reports. ***

Because the state court misunderstood and misapplied the actual malice standard which must be observed in a public official's defamation action, the judgment is reversed and the case remanded for further proceedings not inconsistent with this opinion.

[JUSTICES Black and Douglas concurred in the judgment, on the ground that there should be an absolute privilege. JUSTICE FORTAS dissented, on the ground that the defendant had a duty to

check the reliability of the statement, and hence that he published it in reckless disregard of the truth.]

NOTES AND QUESTIONS

1. Almost immediately after the New York Times decision, the Court discarded completely the old-fashioned meaning of "malice," so far as the constitutional restriction on defamation was concerned. Relying on New York Times v. Sullivan, supra page 987, and Garrison v. Louisiana, 379 U.S. 64 (1964), the Court held jury instructions incorrect because they failed to convey that a public official could only recover in libel if the defendants intended not merely to inflict harm, but to inflict harm through falsehood. Henry v. Collins, 380 U.S. 356 (1965).

2. The test of serious doubt in St. Amant is admittedly subjective in nature. In Herbert v. Lando, 441 U.S. 153 (1979), a public officer was obligated to prove knowledge or reckless disregard as to falsity in his libel action based on a "60 Minutes" report. The officer sought to depose the defendant with inquiries into his state of mind and communications with other participants in the editorial process. The defendant resisted on First Amendment grounds and the Second Circuit held for him (568 F.2d 974 (2d Cir. 1977)), declaring that the First Amendment grants him an absolute privilege regarding "his thoughts, opinions and conclusions with respect to the material gathered by him and about his conversations with his editorial colleagues." 441 U.S. at 158. The Supreme Court reversed, holding that previous decisions did not authorize or presage an editorial privilege of this nature and that it did not construe the First Amendment to authorize it as a matter of constitutional law. The

holding was unanimous regarding questions on state of mind, but three justices had somewhat varying views regarding forced disclosure of communications between participants in the editorial process. On remand, the Court of Appeals held, on the basis of evidence in the new trial, that summary judgment should be granted to the defendant. Herbert v. Lando, 781 F.2d 298 (2d Cir. 1986).

On state of mind, would it be better to substitute an objective test for the subjective one? This does not require a negligence test, but could be based on the language of Justice White in St. Amant: "publisher's allegations... so inherently improbable that only a reckless man would have put them in circulation." A pointed example is Khawar v. Globe Int'l, Inc., 965 P.2d 696 (Cal. 1998), where the imputation that plaintiff was the real assassin of Robert Kennedy was in such hopeless collision with notorious and

established facts, known to defendants, that it showed purposeful avoidance of the truth. Between truth and lying lies "bullshit." Harry G. Frankfurt, On Bullshit (2005) (analyzing the concept of "bullshit" and arguing that it is distinct from lying in that it "is grounded neither in a belief that it is true nor, as a lie must be, in a belief that it is not true. It is just this lack of connection to a concern with the truth--this indifference to how things really are--that [is] the essence of bullshit.").

Harte-Hanks Communications, Inc. v. Connaughton

Supreme Court of the United States, 1989.

491 U.S. 657, 109 S.Ct. 2678, 105 L.Ed.2d 562.

JUSTICE Stevens delivered the opinion of the Court.

A public figure may not recover damages for a defamatory falsehood without clear and convincing proof that the false "statement was made with 'actual malice'--that is, with knowledge that it was false or with reckless disregard of whether it was false or not." New York Times Co. v. Sullivan, 376 U.S. 254, 279-280 (1964). In Bose Corp. v. Consumers Union of United States, Inc., 466 U.S. 485 (1984) we held that judges in such cases have a constitutional duty to "exercise independent judgment and determine whether the record establishes actual malice with convincing clarity." [c] In this case the Court of Appeals affirmed a libel judgment against a newspaper without attempting to make an independent evaluation of the credibility of conflicting oral testimony concerning the subsidiary facts underlying the jury's finding of actual malice. We granted certiorari to consider whether the Court of Appeals' analysis was consistent with our holding in Bose.

Respondent, Daniel Connaughton, was the unsuccessful candidate for the office of Municipal Judge of Hamilton, Ohio, in an election conducted on November 8, 1983. Petitioner is the publisher of the Journal News, a local newspaper that supported the reelection of the incumbent, James Dolan. A little over a month before the election, the incumbent's Director of Court Services resigned and was arrested on bribery charges. A grand jury investigation of those charges was in progress on November 1, 1983. On that date, the Journal News ran a front-page story quoting Alice Thompson, a grand jury witness, as stating that Connaughton had used "dirty

tricks" and offered her and her sister jobs and a trip to Florida "in appreciation" for their help in the investigation.

***

After listening to six days of testimony and three taped interviews--one conducted by Connaughton and two by Journal News reporters--and reviewing the contents of 56 exhibits, the jury was given succinct instructions accurately defining the elements of public figure libel and directed to answer three special verdicts, [footnote omitted] It unanimously found by a preponderance of the evidence that the

1001

November 1 story was defamatory and that it was false. It also found by clear and convincing proof that the story was published with actual malice. After a separate hearing on damages, the jury awarded Connaughton $5,000 in compensatory damages and $195,000 in punitive damages. Thereafter, the District Court denied a motion for judgment notwithstanding the verdict, and petitioner appealed.

The Court of Appeals affirmed, [c] It separately considered the evidence supporting each of the jury's special verdicts, concluding that neither the finding that the article was defamatory [3] nor the finding that it was false [4] was clearly erroneous.

* * *

[3] The Court of Appeals observed that "the article was defamatory in its implication that Connaughton was an unethical lawyer and an undesirable candidate for the Hamilton Municipal judgeship who was

capable of extortion, who was a liar and an opportunist not fit to hold public office, particularly a judgeship." [c]

[4] As to the finding of falsity, the Court of Appeals wrote: "Equally apparent from the jury's answer to the second special interrogatory is that it considered the published Thompson charges to be false. Its finding is understandable in light of the plaintiffs proof which disclosed that the Journal's effort to verify her credibility ended in an avalanche of denials by knowledgeable individuals; [and] its inability to produce a single person who supported Thompson's accusations…

"Moreover, the jury obviously refused to credit the Journal's construction of Connaughton's interview of October 31. It accepted Connaughton's express denials of each Thompson charge and considered the significant language interpreted by the Journal to constitute his admissions of those charges, when read in context, as nothing more than conjecture elicited by structured questions calculated to evoke speculation. Thus, upon reviewing the record in its entirety, this court concludes that the jury's determinations of the operational facts bearing upon the falsity of the article in issue were not clearly erroneous." [c]

II

Petitioner contends that the Court of Appeals made two basic errors. First, while correctly stating the actual malice standard announced in New York Times Co. v. Sullivan, supra, the court actually applied a less severe standard that merely required a showing of "'highly unreasonable conduct constituting an extreme departure from the standards of investigation and reporting ordinarily adhered to by

responsible publishers.'" (quoting Curtis Publishing Co. v. Butts, 388 U.S., at 155, 87 S.Ct. at 1991 (opinion of Harlan, J.)). Second, the court failed to make an independent de novo review of the entire record and therefore incorrectly relied on subsidiary facts implicitly established by the jury's verdict instead of drawing its own inferences from the evidence.

There is language in the Court of Appeals' opinion that supports petitioner's first contention. For example, the Court of Appeals did expressly state that the Journal News' decision to publish Alice Thompson's allegations constituted an extreme departure from professional standards. Moreover, the opinion attributes considerable weight to the evidence that the Journal News was motivated by its interest in the reelection of the candidate it supported and its economic interest in gaining a competitive advantage over the Cincinnati Enquirer, its bitter rival in the local market. Petitioner is plainly correct in recognizing that a public figure plaintiff must prove more than an

1002

extreme departure from professional standards and that a newspaper's motive in publishing a story--whether to promote an opponent's candidacy or to increase its circulation--cannot provide a sufficient basis for finding actual malice.

***

It also is worth emphasizing that the actual malice standard is not satisfied merely through a showing of ill will or "malice" in the ordinary sense of the term, [c] Indeed, just last Term we unanimously held that a public figure "may not recover for the tort of intentional

infliction of emotional distress... without showing... that the publication contains a false statement of fact which was made... with knowledge that the statement was false or with reckless disregard as to whether or not it was true." Hustler Magazine, Inc. v. Falwell, 485 U.S. 46. (1988). Nor can the fact that the defendant published the defamatory material in order to increase its profits suffice to prove actual malice. The allegedly defamatory statements at issue in the New York Times case were themselves published as part of a paid advertisement. If a profit motive could somehow strip communications of the otherwise available constitutional protection, our cases from New York Times to Hustler Magazine would be little more than empty vessels. Actual malice, instead, requires at a minimum that the statements were made with a reckless disregard for the truth. And although the concept of "reckless disregard" "cannot be fully encompassed in one infallible definition," St. Amant v. Thompson, supra, we have made clear that the defendant must have made the false publication with a "high degree of awareness of... probable falsity," [c] or must have "entertained serious doubts as to the truth of his publication," [c]

When the Court of Appeals opinion is read as a whole, it is clear that the conclusion concerning the newspaper's departure from accepted standards and the evidence of motive were merely supportive of the court's ultimate conclusion that the record "demonstrated a reckless disregard as to the truth or falsity of Thompson's allegations and thus provided clear and convincing proof of 'actual malice' as found by the jury." [c] Although courts must be careful not to place too much reliance on such factors, a plaintiff is entitled to prove the defendant's state of mind through circumstantial evidence, see

Herbert v. Lando, 441 U.S. 153, 160, [c] and it cannot be said that evidence concerning motive or care never bears any relation to the actual malice inquiry. Thus, we are satisfied that the Court of Appeals judged the case by the correct substantive standard.

The question whether the Court of Appeals gave undue weight to the jury's findings--whether it failed to conduct the kind of independent review mandated by our opinion in Bose--requires more careful consideration. A proper answer to that question must be prefaced by additional comment on some of the important conflicts in the evidence. [The opinion canvasses the evidence.] ***

1003

V

The question whether the evidence in the record in a defamation case is sufficient to support a finding of actual malice is a question of law. Bose Corp. v. Consumers Union of United States, Inc., supra. This rule is not simply premised on common-law tradition, but on the unique character of the interest protected by the actual malice standard. Our profound national commitment to the free exchange of ideas, as enshrined in the First Amendment, demands that the law of libel carve out an area of " 'breathing space'" so that protected speech is not discouraged. Gertz, supra. The meaning of terms such as "actual malice"--and, more particularly, "reckless disregard"--however, is not readily captured in "one infallible definition." St. Amant v. Thompson, supra. Rather, only through the course of case-by-case adjudication can we give content to these otherwise elusive constitutional standards. Bose, supra. Moreover, such elucidation is particularly important in the area of free speech for precisely the

same reason that the actual malice standard is itself necessary. Uncertainty as to the scope of the constitutional protection can only dissuade protected speech--the more elusive the standard, the less protection it affords. Most fundamentally, the rule is premised on the recognition that "[j]udges, as expositors of the Constitution," have a duty to "independently decide whether the evidence in the record is sufficient to cross the constitutional threshold that bars the entry of any judgment that is not supported by clear and convincing proof of 'actual malice.'" Bose, supra, at 511.

There is little doubt that "public discussion of the qualifications of a candidate for elective office presents what is probably the strongest possible case for application of the New York Times rule," Ocala Star- Banner Co. v. Damron, 401 U.S. 295 (1971), and the strongest possible case for independent review. As Madison observed in 1800, just nine years after ratification of the First Amendment:

"Let it be recollected, lastly, that the right of electing the members of the government constitutes more particularly the essence of a free and responsible government. The value and efficacy of this right depends on the knowledge of the comparative merits and demerits of the candidates for public trust, and on the equal freedom, consequently, of examining and discussing these merits and demerits of the candidates respectively." 4 J. Elliot, Debates on the Federal Constitution 575 (1861).

This value must be protected with special vigilance. When a candidate enters the political arena, he or she "must expect that the debate will sometimes be rough and personal," Oilman v. Evans, 242 U.S.App.D.C. 301, 333, 750 F.2d 970, 1002 (1984) (en banc) (Bork,

J„ concurring), cert, denied, 471 U.S. 1127 (1985), and cannot "'cry Foul!' when an opponent or an industrious reporter attempts to demonstrate" that he or she lacks the "sterling integrity" trumpeted in campaign

1004

literature and speeches, Monitor Patriot Co. v. Roy, 401 U.S. 265. Vigorous reportage of political campaigns is necessary for the optimal functioning of democratic institutions and central to our history of individual liberty.

We have not gone so far, however, as to accord the press absolute immunity in its coverage of public figures or elections. If a false and defamatory statement is published with knowledge of falsity or a reckless disregard for the truth, the public figure may prevail. See Curtis Publishing Co. v. Butts, 388 U.S., at 162, (opinion of Warren, C.J.). A "reckless disregard" for the truth, however, requires more than a departure from reasonably prudent conduct. "There must be sufficient evidence to permit the conclusion that the defendant in fact entertained serious doubts as to the truth of his publication." St. Amant, supra at 731. The standard is a subjective one--there must be sufficient evidence to permit the conclusion that the defendant actually had a "high degree of awareness of... probable falsity." Garrison v. Louisiana, 379 U.S., at 74. As a result, failure to investigate before publishing, even when a reasonably prudent person would have done so, is not sufficient to establish reckless disregard. See St. Amant, supra. In a case such as this involving the reporting of a third party's allegations, "recklessness may be found

where there are obvious reasons to doubt the veracity of the informant or the accuracy of his reports." St. Amant, supra.

In determining whether the constitutional standard has been satisfied, the reviewing court must consider the factual record in full. Although credibility determinations are reviewed under the clearly-erroneous standard because the trier of fact has had the "opportunity to observe the demeanor of the witnesses," Bose, supra, the reviewing court must " 'examine for [itself] the statements in issue and the circumstances under which they were made to see... whether they are of a character which the principles of the First Amendment... protect,'" New York Times Co., supra. Based on our review of the entire record, we agree with the Court of Appeals that the evidence did in fact support a finding of actual malice. Our approach, however, differs somewhat from that taken by the Court of Appeals. In considering the actual malice issue, the Court of Appeals identified 11 subsidiary facts that the jury "could have" found. ***We agree that the jury may have found each of those facts, but conclude that the case should be decided in a less speculative ground

***

Given the trial court's instructions, the jury's answers to the three special interrogatories, and an understanding of those facts not in dispute, it is evident that the jury must have rejected (1) the testimony of petitioner's witnesses that Stephens was not contacted simply because Connaughton failed to place her in touch with the newspaper; (2) the testimony of Blount that he did not listen to the tapes simply because he thought they would provide him with no

new information; and (3) the testimony of those Journal News employees who asserted that they

1005

believed Thompson's allegations were substantially true. When these findings are considered alongside the undisputed evidence, the conclusion that the newspaper acted with actual malice inexorably follows.

There is no dispute that Thompson's charges had been denied not only by Connaughton, but also by five other witnesses before the story was published. Thompson's most serious charge--that Connaughton intended to confront the incumbent judge with the tapes to scare him into resigning and otherwise not to disclose the existence of the tapes--was not only highly improbable, but inconsistent with the fact that Connaughton had actually arranged a lie detector test for Stephens and then delivered the tapes to the police. These facts were well known to the Journal News before the story was published. Moreover, because the newspaper's interviews of Thompson and Connaughton were captured on tape, there can be no dispute as to what was communicated, nor how it was said. The hesitant, inaudible, and sometimes unresponsive and improbable tone of Thompson's answers to various leading questions raise obvious doubts about her veracity. Moreover, contrary to petitioner's contention that the prepublication interview with Connaughton confirmed the factual basis of Thompson's statements, review of the tapes makes clear that Connaughton unambiguously denied each allegation of wrongful conduct. ***It is extraordinarily unlikely that the

reporters missed Connaughton's denials simply because he confirmed certain aspects of Thompson's story.

It is also undisputed that Connaughton made the tapes of the Stephens interview available to the Journal News and that no one at the newspaper took the time to listen to them. Similarly, there is no question that the Journal News was aware that Patsy Stephens was a key witness and that they failed to make any effort to interview her. Accepting the jury's determination that petitioner's explanations for these omissions were not credible, it is likely that the newspaper's inaction was a product of a deliberate decision not to acquire knowledge of facts that might confirm the probable falsity of Thompson's charges. Although failure to investigate will not alone support a finding of actual malice, [c] the purposeful avoidance of the truth is in a different category.

There is a remarkable similarity between this case--and in particular, the newspaper's failure to interview Stephens and failure to listen to the tape recording of the September 17 interview at Connaughton's home--and the facts that supported the Court's judgement in Curtis Publishing Co. v. Butts, supra. In Butts the evidence showed that the Saturday Evening Post had published an accurate account of an unreliable informant's false description of the Georgia athletic director's purported agreement to "fix" a college football game. Although there was reason to doubt Thompson's story, the editors did not interview a witness who had the same access to the facts as the informant and did not look at films that revealed what actually happened at the

game in question... This evidence of an intent to avoid the truth was not only sufficient to convince the plurality that there had been an extreme departure from professional publishing standards, but it was also sufficient to satisfy the more demanding New York Times standard... As in Butts, the evidence in the record in this case, when reviewed in its entirety, is "unmistakably" sufficient to support a finding of actual malice.

Affirmed.

NOTES AND QUESTIONS

1. Actual Malice and Journalistic Enterprise. As the principal case demonstrates, the inquiry is richly factual. Much will turn on defendant's knowledge and actions or omissions in respect of that knowledge. In Tavoulareas v. Piro, 817 F.2d 762 (D.C. Cir.) (en banc), cert, denied, 484 U.S. 870 (1987), cert, denied, 484 U.S. 870 (1987), the Court stressed that insufficient investigation alone, in the absence of serious doubts about the truth of statements, will not support a finding of actual malice. Reporter's ill will and a newspaper policy to find sensational stories are relevant but not sufficient in sustaining the burden of showing actual malice. The court warned that mere accumulation of factors will not meet the burden. But cf. Ball v. E.W. Scripps, 801 S.W.2d 684 (Ky.1990). In the absence of direct proof establishing that the defendant "entertained serious doubts as to the truth of [its] publication," a jury may infer awareness of falsity if it finds "obvious reasons to doubt" the accuracy of the story, and that the defendant did not act reasonably in dispelling those doubts. Masson v. New Yorker Magazine, Inc., 960 F.2d 896 (9th Cir. 1992). Similarly, in St. Surin v. Virgin Islands Daily News, 21

F.3d 1309 (3d Cir. 1994), the court held that defendant could not obtain summary judgment where its editor was aware of changes in the article that made it false. More recently, see Palin v. New York Times, 266 F. Supp. 3d 527 (2017), vacated and remanded, 940 F.3d 804 (2d Cir. 2018) (concerning pleading standards for defamation of a public figure for editorial with multiple inputs from editors; ascription of actual malice at pleading stage).

In Suzuki Motor Corp. v. Consumers Union of U.S. Inc., 330 F.3d 1110 (9th Cir. 2003) a divided en banc panel of the Ninth Circuit on re-hearing held that Suzuki had made a case sufficient to resist Consumer Union's motion for a summary judgment. Defendant had published a report stating that plaintiffs vehicle was subject to rollovers. Defendant had argued that the evidence did not establish the requisite actual malice according to the principle in Liberty Lobby, Inc. v. Anderson, 746 F.2d 1563 (D.C. Cir. 1984), vacated, 477 U.S. 242 (1986). The majority, applying the principal case, analyzed the argument on two bases, i.e., whether a reasonable jury could find by clear and convincing evidence that (1) defendant had a high degree of awareness of the probable falsity of the statement, and (2) defendant, in the face of obvious reasons to doubt the statement's accuracy, did not act to dispel doubts, thereby raising an inference that defendant knew of falsity. On both grounds, it was held that plaintiff had raised a genuine issue of

material fact to resist a summary judgment. In a vehement dissent, Judge Kozinski was dismayed that after a truthful disclosure of the circumstances of the rollover test, the "information could be deemed

malicious under New York Times v. Sullivan [c]." The willingness to produce reports to the public good would be dampened. Are you persuaded by Judge Kozinski?

A critical concern for the press is maintenance of confidentiality of its sources. Can plaintiff insist on disclosure of a source in discovery in fashioning her prima facie case of actual malice? Without the opportunity to depose the source, the chances of plaintiff resisting a motion for summary judgment will be slim. Southwell v. Southern Poverty Law Center, 949 F. Supp. 1303 (W.D. Mich. 1996) (holding that confidential source need not be disclosed where plaintiff showed source was reliable and defendant failed to show that disclosure of source would yield evidence of malice confidential source need not be disclosed). For the interaction of emerging legal rules and journalism norms, see Brian C. Murchison et al., Sullivan's Paradox: The Emergence of Judicial Standards of Journalism, 73 N.C. L. Rev. 7 (1994) (arguing that in applying actual malice and negligence standards state and federal judges consider and evaluate a wide range of journalistic behavior and per force, in a baleful manner, create norms of journalistic research, writing, and editing).

2. Standards for Summary Judgment. The standard on summary judgment is often critical. Anderson v. Liberty Lobby, 477 U.S. 242 (1986), examines the standard of proof in a motion for summary judgment, finding that it varies according to whether the plaintiff is a public figure under New York Times or a private person under Gertz. Justice White stated: "In sum, we conclude that the determination of whether a given factual dispute requires submission to a jury must be guided by the substantive evidentiary standards that apply to the case. This is true at both the directed verdict and summary judgment

stages. Consequently, where the New York Times, 'clear and convincing' evidence requirement applies, the trial judge's summary judgment inquiry as to whether a genuine issue exists will be whether the evidence presented is such that a jury applying that evidentiary standard could reasonably find for either the plaintiff or the defendant." Justices Brennan and Rehnquist, dissented in separate opinions, and the Chief Justice concurred with Justice Rehnquist.

3. Fair Reporting--First Amendment Standards. In Time, Inc. v. Pape, 401 U.S. 279 (1971), Time Magazine cited a report of the U.S. Commission of Civil Rights entitled Justice, listing instances of police brutality which were alleged in complaints to have occurred. The allegations of one complaint, involving plaintiff, were stated as facts. Held: "In light of the totality of what was said in Justice, we cannot agree that, when Time failed to state that the Commission in reporting the Monroe incident had technically confined itself to the allegations of a complaint, Time engaged in a 'falsification' sufficient in itself to sustain a jury finding of 'actual malice.'... Time's omission of the word 'alleged' amounted to the adoption of one of a number of possible rational interpretations of a document that bristled with ambiguities. The deliberate choice of such an interpretation, though arguably reflecting a misconception, was not enough to create a jury issue of

'malice' under New York Times. To permit the malice issue to go to the jury because of the omission of a word like 'alleged'... would be to impose a much stricter standard of liability on errors of

interpretation or judgment than on errors of historic fact.... Nothing in this opinion is to be understood as making the word 'alleged' a superfluity in published reports of information damaging to reputation."

In Time, Inc. v. Firestone, 424 U.S. 448 (1976), Time Magazine published in its "Milestones" Section this item: "Divorced, by Russell A. Firestone, Jr., 41, heir to the tire fortune, Mary Alice Sullivan Firestone, 32, his third wife; a one time Palm Beach schoolteacher; on ground of extreme cruelty and adultery; after six years marriage, one son; in West Palm Beach Florida. The 17-month intermittent trial produced enough testimony of extramarital adventures on both sides, said the judge, 'to make Dr. Freud's hair curl.'" Although the publication's language was quite ambiguous, plaintiff demanded that Time retract its statement of adultery because, under Florida statute, she would not be entitled to the alimony she had been awarded if found guilty of such conduct. Time's refusal produced the libel action in which she was awarded $100,000 for mental distress. The Florida Supreme Court affirmed; but the Supreme Court reversed on the ground that there was never any intentional finding of fault by court or jury in the case. The Court distinguished Pape on the ground that it involved the New York Times standard (public figure) while Firestone involved the Gertz standard (private figure).

4. Repetition of Defamation. Observe that in neither Pape nor Firestone was the court concerned with the truth or falsity of the defamatory charge or the measure of defendant's fault in ascertaining it. The defendant would apparently not have been liable even if it had actually known that the plaintiff was innocent of the

charge, so long as the report of the official record was fair and accurate.

One is not ordinarily relieved of liability for repeating a defamatory charge, even if he indicates the source and accurately repeats it--even if he also says that he does not believe it. Restatement (Second) of Torts § 578 (1977).

5. Fair Reporting. At common law, there developed a special privilege, known as the "reporter's privilege" or as "record libel." It was a privilege because it did not exempt the defendant from liability unless his report was verbatim or a fair and accurate summary. Pape and Firestone now impose a constitutional requirement of fault in failing to make the report fair and accurate. It remains a privilege nonetheless. There is no liability for repetition of a defamatory statement, even if a defendant is at fault with regard to the relative truth of the charge itself, provided that the material carrying the defamatory imputation was an accurate report. An actual malice standard applies for reports on official actions providing a fair and accurate rendition. Milligan v. United States, 670 F.3d 686 (6th Cir. 2012) (holding that report of arrests is privileged even though police errors lead to plaintiffs wrongful arrest). See Restatement (Second) of Torts § 611 (1977). There is a good discussion in Gobin v. Globe Publ'g Co., 531 P.2d 76 (Kan. 1975), decided prior to Firestone.

1009

The remaining problem involves the scope of the privilege, both at common law and under the more recent constitutional doctrine, and whether they will differ or coincide.

6. The Privilege at Common Law. This began as a privilege to report all official proceedings in the public interest. Wason v. Walter, (1868) 4 L.R.Q.B. 73 (Parliament); Terry v. Fellows, 21 La. Ann. 375 (1869) (concerning evidence or testimony given before session of legislative committee); Hahn v. Holum, 162 N.W. 432 (Wis. 1917) (proceeding before justice of the peace).

A privilege to report often attaches to information of public concern uttered at public meetings. The meetings need not be official but should be open to a wide segment of the public. Jackson v. Record Pub. Co., 178 S.E. 833 (S.C.1935) (words of a candidate at a political rally); Phoenix Newspapers v. Choisser, 312 P.2d 150 (Ariz.1957) (same, at Chamber of Commerce "forum"); Pulvermann v. A.S. Abell Co., 228 F.2d 797 (4th Cir. 1956) (speech made by candidate for President); Borg v. Boas, 231 F.2d 788 (9th Cir. 1956) (mass meeting held to urge calling a grand jury to investigate local law enforcement). In all of these cases, the matter reported has been one of public concern.

On the other hand, private meetings, not open to the public, have not been included. Kimball v. Post Pub. Co., 85 N.E. 103 (Mass. 1908) (stockholders' meeting); Lewis v. Hayes, 132 P. 1022 (Cal. 1913).

7. Reports of Pleadings. Authorities divide on whether an exception to the reporter's privilege in the case of pleadings filed with a court but not yet acted upon judicially. Comment e to § 611 of the Restatement (Second) of Torts (1977), recognizes the exception. For cases in favor: see Quigley v. Rosenthal, 327 F.3d 1044, 1062 (10th Cir. Colo. 2003); Flues v. New Nonpareil Co., 135 N.W. 1083 (Iowa 1912); Sanford v. Boston Herald- Traveler Corp., 61 N.E.2d 5 (Mass.

1945); Moreno v. Crookston Times Printing Co., 610 N.W.2d 321 (Minn. 2000); Byers v. Meridian Printing Co., 408, 95 N.E. 917 (Ohio 1911). For those against, see Solaia Tech., LLC v. Specialty Publ. Co., 852 N.E.2d 825 (111.2006) (including dissent on this issue); Misao Yoshimura Kurata v. L.A. News Pub. Co., 40 P.2d 520 (Cal. Dist. Ct. App.1935); Johnson v. Johnson Pub. Co., 271 A.2d 696 (D.C. App. 1970); Paducah Newspapers, Inc. v. Bratcher, 118 S.W.2d 178 (Ky.1937).

8. The Privilege Under the Constitution. Pape and Firestone are the only Supreme Court cases on the subject. A significant issue is raised by Edwards v. National Audubon Soc'y, Inc., 556 F.2d 113 (2d Cir. 1977), cert, denied, 434 U.S. 1002 (1977), espousing a much broader privilege of "neutral reportage." The court announced as a "fundamental principle" that "when a responsible, prominent organization like the National Audubon Society makes serious charges against a public figure, the First Amendment protects the accurate and disinterested reporting of those charges, regardless of the reporter's private views regarding their validity.... What is newsworthy about such accusations is that they were made. We do not believe that the press may be required under the First Amendment to suppress newsworthy statements merely because it has serious doubts regarding their truth....

1010

The public interest in being fully informed about controversies that often rage around sensitive issues demands that the press be afforded the freedom to report such charges without assuming responsibility for them."...

The court went on the explain that: "[L]iteral accuracy is not a prerequisite: if we are to enjoy the blessings of a robust and unintimidated press, we must provide immunity from defamation suits where the journalist believes, reasonably and in good faith, that his report accurately conveys the charges made."

The authorities are divided with the doctrine of neutral reportage constituting a minority rule. The doctrine attracts four requirements:

a. The charges in the article must either relate to a current public controversy or create one in their own right (Barry v. Time, Inc., 584 F. Supp. 1110 (N.D. Cal. 1984); McManus v. Doubleday & Co., 513 F. Supp. 1383 (S.D.N.Y. 1981)).

b. The charge must be made by a public official or public figure, or by a prominent organization (Cianci v. New Times Publ. Co., 639 F.2d 54 (2d Cir. 1980); McManus, 513 F. Supp. 1383).

c. The charges must be about a public figure or a public official (Dixson v. Newsweek, Inc., 562 F.2d 626 (10th Cir. 1977)).

d. The reportage of the charges must be "neutral," that is, accurately and disinterestedly republished (Cianci, 639 F.2d 54; Dixson 562 F.2d 626; Barry, 584 F. Supp. 1110).

9. A newspaper, opposing a candidate for office, carries accurate stories about his business transactions affecting the government, but deliberately prepares slanted headlines, intended to give a misleading impression to a person who did not carefully read through the story as to the candidate's ethics. Can this be found to constitute reckless disregard as to falsity? Cf. McNair v. Hearst Corp., 494 F.2d 1309 (9th Cir. 1974); Sprouse v. Clay Commn., Inc., 211 S.E.2d 674

(W.Va.1975); Journal-Gazette Company v. Bandido's, Inc., 712 N.E.2d 446 (Ind.), cert, denied, 528 U.S. 1005 (1999) (adopting the minority "fair index" rule, i.e., if the headline is not a "fair index" of the substance, headline must be examined independently to determine its actionability in libel).

(B) Private Plaintiffs

Gertz v. Robert Welch, Inc.

Supreme Court of the United States, 1974.

418 U.S. 323, 94 S.Ct. 2997, 41 L.Ed.2d 789.

JUSTICE Powell delivered the opinion of the Court. ***

I. In 1968 a Chicago policeman named Nuccio shot and killed a youth named Nelson. The state authorities prosecuted Nuccio for the homicide and ultimately obtained a conviction for murder in the second degree. The Nelson family retained petitioner Elmer Gertz, a reputable attorney, to represent them in civil litigation against Nuccio.

1011

Respondent publishes American Opinion, a monthly outlet for the views of the John Birch Society. Early in the 1960's the magazine began to warn of a nationwide conspiracy to discredit local law enforcement agencies and create in their stead a national police force capable of supporting a Communist dictatorship. As part of the continuing effort to alert the public to this assumed danger, the managing editor of American Opinion commissioned an article on the murder trial of Officer Nuccio. For this purpose he engaged a regular contributor to the magazine. In March 1969 respondent

published the resulting article under the title "FRAME-UP: Richard Nuccio And The War On Police." The article purports to demonstrate that the testimony against Nuccio at his criminal trial was false and that his prosecution was part of the Communist campaign against the police.

In his capacity as counsel for the Nelson family in the civil litigation, petitioner attended the coroner's inquest into the boy's death and initiated actions for damages, but he neither discussed Officer Nuccio with the press nor played any part in the criminal proceeding. Notwithstanding petitioner's remote connection with the prosecution of Nuccio, respondent's magazine portrayed him as an architect of the "frame-up." According to the article, the police file on petitioner took "a big, Irish cop to lift." The article stated that petitioner had been an official of the "Marxist League for Industrial Democracy, originally known as the Intercollegiate Socialist Society, which has advocated the violent seizure of our government." It labeled Gertz a "Leninist" and a "Communist-fronter." It also stated that Gertz had been an officer of the National Lawyers Guild, described as a Communist organization that "probably did more than any other outfit to plan the Communist attack on the Chicago police during the 1968 Democratic Convention."

These statements contained serious inaccuracies. The implication that petitioner had a criminal record was false. Petitioner had been a member and officer of the National Lawyers Guild some 15 years earlier, but there was no evidence that he or that organization had taken any part in planning the 1968 demonstrations in Chicago. There was also no basis for the charge that petitioner was a "Leninist" or a "Communist- fronter." And he had never been a

member of the "Marxist League for Industrial Democracy" or the "Intercollegiate Socialist Society."

The managing editor of American Opinion made no effort to verify or substantiate the charges against petitioner. Instead, he appended an editorial introduction stating that the author had "conducted extensive research into the Richard Nuccio Case." And he included in the article a photograph of petitioner and wrote the caption that appeared under it: "Elmer Gertz of Red Guild harasses Nuccio." Respondent placed the issue of American Opinion containing the article on sale at newsstands throughout the country and distributed reprints of the article on the streets of Chicago.

1012

Petitioner filed a diversity action for libel in the United States District Court for the Northern District of Illinois.

[The District Court denied defendant's motion to dismiss. After the evidence was in, it "ruled in effect that petitioner was neither a public official nor a public figure," and it submitted the issue of damages to the jury, which awarded $50,000. On further reflection the District Court concluded that the New York Times standard applied and entered judgment for defendant notwithstanding the jury verdict. This action was affirmed by the Court of Appeals for the Seventh Circuit, on the basis of Rosenbloom v. Metromedia, Inc., 403 U.S. 29 (1971), supra page 995, which had been decided in the meantime.]

II. The principal issue in this case is whether a newspaper or broadcaster that publishes defamatory falsehoods about an individual who is neither a public official nor a public figure may claim a constitutional privilege against liability for the injury inflicted by

those statements. The Court considered this question on the rather different set of facts presented in Rosenbloom v. Metromedia, Inc. [c]. [The opinion describes in detail the facts and opinions in Rosenbloom.]

III. We begin with the common ground. Under the First Amendment there is no such thing as a false idea. However pernicious an opinion may seem, we depend for its correction not on the conscience of judges and juries but on the competition of other ideas. But there is no constitutional value in false statements of fact. Neither the intentional lie nor the careless error materially advances society's interest in "uninhibited, robust, and wide-open" debate on public issues. [C] They belong to that category of utterances which "are no essential part of any exposition of ideas, and are of such slight social value as a step to truth that any benefit that may be derived from them is clearly outweighed by the social interest in order and morality." Chaplinsky v. New Hampshire, 315 U.S. 568, 572 (1942).

Although the erroneous statement of fact is not worthy of constitutional protection, it is nevertheless inevitable in free debate. As James Madison pointed out in the Report on the Virginia Resolutions of 1798, "Some degree of abuse is inseparable from the proper use of every thing; and in no instance is this more true than in that of the press." 4 J. Elliot, Debates on the Federal Constitution of 1787, p. 571 (1876). And punishment of error runs the risk of inducing a cautious and restrictive exercise of the constitutionally guaranteed freedoms of speech and press. Our decisions recognize that a rule of strict liability that compels a publisher or broadcaster to guarantee the accuracy of his factual assertions may lead to intolerable self-censorship. Allowing the media to avoid liability only

by proving the truth of all injurious statements does not accord adequate protection to First Amendment liberties. As the Court stated in New York Times Co. v. Sullivan, supra, at 279, "Allowance of the defense of truth, with the burden of proving it on the defendant, does not mean that only false speech will be deterred."

1013

The First Amendment requires that we protect some falsehood in order to protect speech that matters.

The need to avoid self-censorship by the news media is, however, not the only societal value at issue. If it were, this Court would have embraced long ago the view that publishers and broadcasters enjoy an unconditional and indefeasible immunity from liability for defamation. [Cc] Such a rule would, indeed, obviate the fear that the prospect of civil liability for injurious falsehood might dissuade a timorous press from the effective exercise of First Amendment freedoms. Yet absolute protection for the communications media requires a total sacrifice of the competing value served by the law of defamation.

The legitimate state interest underlying the law of libel is the compensation of individuals for the harm inflicted on them by defamatory falsehood. ***The protection of private personality, like the protection of life itself, is left primarily to the individual States under the Ninth and Tenth Amendments. But this does not mean that the right is entitled to any less recognition by this Court as a basic of our constitutional system. [C]

Some tension necessarily exists between the need for a vigorous and uninhibited press and the legitimate interest in redressing

wrongful injury. ***In our continuing effort to define the proper accommodation between these competing concerns, we have been especially anxious to assure to the freedoms of speech and press that "breathing space" essential to their fruitful exercise. [C] To that end this Court has extended a measure of strategic protection to defamatory falsehood.

The New York Times standard defines the level of constitutional protection appropriate to the context of defamation of a public person. Those who, by reason of the notoriety of their achievements or the vigor and success with which they seek the public's attention, are properly classed as public figures and those who hold governmental office may recover for injury to reputation only on clear and convincing proof that the defamatory falsehood was made with knowledge of its falsity or with reckless disregard for the truth. This standard administers an extremely powerful antidote to the inducement to media self-censorship of the common-law rule of strict liability for libel and slander. And it exacts a correspondingly high price from the victims of defamatory falsehood. Plainly many deserving plaintiffs, including some intentionally subjected to injury, will be unable to surmount the barrier of the New York Times test. Despite this substantial abridgment of the state law right to compensation for wrongful hurt to one's reputation, the Court has concluded that the protection of the New York Times privilege should be available to publishers and broadcasters of defamatory falsehood concerning public officials and public figures. [C] We think that these decisions are correct, but we do not find their holdings justified solely by reference to the interest of the press and broadcast media in

immunity from liability. Rather, we believe that the New York Times rule states an

1014

accommodation between this concern and the limited state interest present in the context of libel actions brought by public persons. For the reasons stated below, we conclude that the state interest in compensating injury to the reputation of private individuals requires that a different rule should obtain with respect to them.

Theoretically, of course, the balance between the needs of the press and the individual's claim to compensation for wrongful injury might be struck on a case-by-case basis. ***But this approach would lead to unpredictable results and uncertain expectations, and it could render our duty to supervise the lower courts unmanageable. Because an ad hoc resolution of the competing interests at stake in each particular case is not feasible, we must lay down broad rules of general application. ***

The first remedy of any victim of defamation is self-help--using available opportunities to contradict the lie or correct the error and thereby to minimize its adverse impact on reputation. Public officials and public figures usually enjoy significantly greater access to the channels of effective communication and hence have a more realistic opportunity to counteract false statements than private individuals normally enjoy. Private individuals are therefore more vulnerable to injury, and the state interest in protecting them is correspondingly greater.

More important than the likelihood that private individuals will lack effective opportunities for rebuttal, there is a compelling normative

consideration underlying the distinction between public and private defamation plaintiffs. An individual who decides to seek governmental office must accept certain necessary consequences of that involvement in public affairs. He runs the risk of closer public scrutiny than might otherwise be the case. ***

Those classed as public figures stand in a similar position. Hypothetically, it may be possible for someone to become a public figure through no purposeful action of his own, but the instances of truly involuntary public figures must be exceedingly rare. ***Commonly, those classed as public figures have thrust themselves to the forefront of particular public controversies in order to influence the resolution of the issues involved. ***

The communications media are entitled to act on the assumption that public officials and public figures have voluntarily exposed themselves to increased risk of injury from defamatory falsehood concerning them. No such assumption is justified with respect to a private individual. ***He has relinquished no part of his interest in the protection of his own good name, and consequently he has a more compelling call on the courts for redress of injury inflicted by defamatory falsehood. Thus, private individuals are not only more vulnerable to injury than public officials and public figures; they are also more deserving of recovery.

1015

For these reasons we conclude that the States should retain substantial latitude in their efforts to enforce a legal remedy for defamatory falsehood injurious to the reputation of a private individual. The extension of the New York Times test proposed by

the Rosenbloom plurality would abridge this legitimate state interest to a degree that we find unacceptable. And it would occasion the additional difficulty of forcing state and federal judges to decide on an ad hoc basis which publications address issues of "general or public interest" and which do not--to determine, in the words of Mr. Justice Marshall, "what information is relevant to self-government." Rosenbloom v. Metromedia, Inc., 403 U.S., at 79. We doubt the wisdom of committing this task to the conscience of judges. Nor does the Constitution require us to draw so thin a line between the drastic alternatives of the New York Times privilege and the common law of strict liability for defamatory error. ***

We hold that, so long as they do not impose liability without fault, the States may define for themselves the appropriate standard of liability for a publisher or broadcaster of defamatory falsehood injurious to a private individual. This approach provides a more equitable boundary between the competing concerns involved here. It recognizes the strength of the legitimate state interest in compensating private individuals for wrongful injury to reputation, yet shields the press and broadcast media from the rigors of strict liability for defamation. At least this conclusion obtains where, as here, the substance of the defamatory statement "makes substantial danger to reputation apparent." ***

IV. Our accommodation of the competing values at stake in defamation suits by private individuals allows the States to impose liability on the publisher or broadcaster of defamatory falsehood on a less demanding showing than that required by New York Times. This conclusion is not based on a belief that the considerations which prompted the adoption of the New York Times privilege for

defamation of public officials and its extension to public figures are wholly inapplicable to the context of private individuals. Rather, we endorse this approach in recognition of the strong and legitimate state interest in compensating private individuals for injury to reputation.

But this countervailing state interest extends no further than compensation for actual injury. For the reasons stated below, we hold that the States may not permit recovery of presumed or punitive damages, at least when liability is not based on a showing of knowledge of falsity or reckless disregard for the truth.

The common law of defamation is an oddity of tort law, for it allows recovery of purportedly compensatory damages without evidence of actual loss. Under the traditional rules pertaining to actions for libel, the existence of injury is presumed from the fact of publication. Juries may award substantial sums as compensation for supposed damage to reputation without any proof that such harm actually occurred. The largely uncontrolled discretion of juries to award damages where there is

no loss unnecessarily compounds the potential of any system of liability for defamatory falsehood to inhibit the vigorous exercise of First Amendment freedoms. Additionally, the doctrine of presumed damages invites juries to punish unpopular opinion rather than to compensate individuals for injury sustained by the publication of a false fact. More to the point, the States have no substantial interest in securing for plaintiffs such as this petitioner gratuitous awards of money damages far in excess of any actual injury.

We would not, of course, invalidate state law simply because we doubt its wisdom, but here we are attempting to reconcile state law with a competing interest grounded in the constitutional command of the First Amendment. It is therefore appropriate to require that state remedies for defamatory falsehood reach no farther than is necessary to protect the legitimate interest involved. It is necessary to restrict defamation plaintiffs who do not prove knowledge of falsity or reckless disregard for the truth to compensation for actual injury. We need not define "actual injury," as trial courts have wide experience in framing appropriate jury instructions in tort actions. Suffice it to say that actual injury is not limited to out-of-pocket loss. Indeed, the more customary types of actual harm inflicted by defamatory falsehood include impairment of reputation and standing in the community, personal humiliation, and mental anguish and suffering. Of course, juries must be limited by appropriate instructions, and all awards must be supported by competent evidence concerning the injury, although there need be no evidence which assigns an actual dollar value to the injury.

We also find no justification for allowing awards of punitive damages against publishers and broadcasters held liable under state-defined standards of liability for defamation. In most jurisdictions jury discretion over the amounts awarded is limited only by the gentle rule that they not be excessive. Consequently, juries assess punitive damages in wholly unpredictable amounts bearing no necessary relation to the actual harm caused. And they remain free to use their discretion selectively to punish expressions of unpopular views. Like the doctrine of presumed damages, jury discretion to award punitive damages unnecessarily exacerbates the danger of media self-

censorship, but, unlike the former rule, punitive damages are wholly irrelevant to the state interest that justifies a negligence standard for private defamation actions. They are not compensation for injury. Instead, they are private fines levied by civil juries to punish reprehensible conduct and to deter its future occurrence. In short, the private defamation plaintiff who establishes liability under a less demanding standard than that stated by New York Times may recover only such damages as are sufficient to compensate him for actual injury.

V. Notwithstanding our refusal to extend the New York Times privilege to defamation of private individuals, respondent contends that

1017

we should affirm the judgment below on the ground that petitioner is either a public official or a public figure. ***

Respondent admits this but argues that petitioner's appearance at the coroner's inquest rendered him a "de facto public official." Our cases recognize no such concept. Respondent's suggestion would sweep all lawyers under the New York Times rule as officers of the court and distort the plain meaning of the "public official" category beyond all recognition. We decline to follow it.

Respondent's characterization of petitioner as a public figure raises a different question. That designation may rest on either of two alternative bases. In some instances an individual may achieve such pervasive fame or notoriety that he becomes a public figure for all purposes and in all contexts. More commonly, an individual voluntarily injects himself or is drawn into a particular public

controversy and thereby becomes a public figure for a limited range of issues. In either case such persons assume special prominence in the resolution of public questions.

Petitioner has long been active in community and professional affairs. He has served as an officer of local civic groups and of various professional organizations, and he has published several books and articles on legal subjects. Although petitioner was consequently well known in some circles, he had achieved no general fame or notoriety in the community. ***Absent clear evidence of general fame or notoriety in the community, and pervasive involvement in the affairs of society, an individual should not be deemed a public personality for all aspects of his life. It is preferable to reduce the public-figure question to a more meaningful context by looking to the nature and extent of an individual's participation in the particular controversy giving rise to the defamation.

In this context it is plain that petitioner was not a public figure. He played a minimal role at the coroner's inquest, and his participation related solely to his representation of a private client. He took no part in the criminal prosecution of Officer Nuccio. Moreover, he never discussed either the criminal or civil litigation with the press and was never quoted as having done so. He plainly did not thrust himself into the vortex of this public issue, nor did he engage the public's attention in an attempt to influence its outcome. We are persuaded that the trial court did not err in refusing to characterize petitioner as a public figure for the purpose of this litigation.

We therefore conclude that the New York Times standard is inapplicable to this case and that the trial court erred in entering

judgment for respondent. Because the jury was allowed to impose liability without fault and was permitted to presume damages without proof of injury, a new trial is necessary. We reverse and remand for further proceedings in accord with this opinion.

It is so ordered.

1018

[This opinion was joined by STEWART, MARSHALL, BLACKMUN and REHNQUIST, JJ.; BLACKMUN, J., stating in a concurring opinion that he found some difficulties with the majority opinion, but that he joined in it to attain a "definitive ruling."

BURGER, C.J., dissented, disapproving the requirement of negligence for private defamation and urging remand for a reinstatement of the jury verdict below. DOUGLAS, J., dissented on the basis of his absolute-privilege theory and would at least retain the Rosenbloom rule. BRENNAN, J., dissented and would retain the Rosenbloom rule. WHITE, J., dissented and would retain strict liability for private defamation.]

NOTES AND QUESTIONS

1. A requisite finding of fault for private defamation, adopted first in the principal case, had been urged in the dissenting opinion of Harlan, J., in Time, Inc. v. Hill, 385 U.S. 374 (1967) ("States should be free to hold the press to a duty of making a reasonable investigation of the underlying facts"), and the dissenting opinion of Justice Marshall, in Rosenbloom v. Metromedia, Inc., 403 U.S. 29 (1971) ("[o]nly constitutional caveat should be that absolute or strict liability ***cannot be used"). Eliminating presumed and punitive

damages had been urged in Rosenbloom in the dissenting opinion of Justice Marshall, (restrict "the award of damages to prove, actual injuries" and cut down on the "jury's wide ranging discretion ***since the award will be based on essentially objective discernable factors"), and, to a large extent, in the dissenting opinion of Justice Harlan, ("[legitimate function of libel law must be understood as that of compensating individuals for actual, measurable harm caused by the conduct of others").

2. Contracting the Coverage of the New York Times Standard. In receding from the position taken in Rosenbloom v. Metromedia, Inc., 403 U.S. 29 (1971), where the New York Times standard of knowledge or reckless disregard applied to any matter of public or general interest, and holding that the standard applies only to public officials and public figures, the Court was speaking only of what the Constitution requires the states to do. That is, while the NYTimes standard must apply in a suit by a public person, states are not required to do this in a suit by a private person. States are nonetheless entirely free to do so if they wish.

A few courts have indicated that they will continue to require knowledge or reckless disregard where the publication touches matters of public or general interest. For example, see Sisler v. Gannett Co., 516 A.2d 1083 (N.J. 1986). However, in Turf Lawnmower Repair, Inc. v. Bergen Record Corp., 655 A.2d 417, 435 (N.J. 1995), the protection against the threat of defamation actions extended beyond that imposed by the Supreme Court by applying the actual malice standard "where the press's statement concerns businesses affecting the public's health and safety and businesses that are subject to substantial government regulation." The court

recognized the "public benefits from having the press act as a consumer affairs watchdog." Thus, the court articulated "an actual-malice standard rather than a negligence standard, even for ordinary businesses, if the consumer fraud allegations in

the article, if true, would constitute a violation of the Consumer Fraud Act." Id. at 435. For other contexts, the most appropriate standard was negligence in conformity with forty-two jurisdictions. Only Colorado, New Jersey, and Indiana apply non-negligence standard: Journal-Gazette Company v. Bandido's, Inc., 712 N.E.2d 446 (Ind.), cert, denied, 528 U.S. 1005 (1999) (confirming the actual malice standard for "matters of general or public concern," but against strong dissent). A majority of the courts decline to impose a requirement of knowledge or reckless disregard in an action by a private person. Mead Corporation v. Hicks, 448 So.2d 308 (Ala. 1983); Stone v. Essex County Newspapers, Inc., 330 N.E.2d 161 (Mass. 1975); Jacron Sales Co., Inc. v. Sindorf, 350 A.2d 688 (Md. 1976); Cottrell v. NCAA, 975 So.2d 306 (Ala. 2007) ("If it is determined that the plaintiff is a private figure, then the plaintiff has the burden of establishing by a preponderance of the evidence that the defendant negligently published the defamatory statement."). Rouch v. Enquirer & News, 398 N.W.2d 245 (Mich. 1986); Re v. Gannett Co., 480 A.2d 662 (Del. Super. Ct. 1984).

3. Scope of Fault Requirement in Action by Private Person. Gertz seemed to indicate that strict liability for defamation is unconstitutional. This would require fault in regard, at least, to the falsity of the statement. There still remain some unanswered

questions on the scope of the requirement, however. For a general discussion of scope with regard to falsity and defamatory character, the mode of communication, and the nature of content, see Restatement (Second) of Torts § 580B comments d-f (1977). On the nature of the negligence standard, see id. comments g-h. The constitutional fault standard is probably applicable to the identification issue. What result in Hulton v. Jones, supra, under the Gertz test? Note that in New York Times v. Sullivan, supra, the Court found that the common law standard, turning on a reasonable reader's assumptions to identify the plaintiff, was constitutionally insufficient. Reference would have to be made to the plaintiff as an individual lest criticism of government be crimped. On the effect of the fault requirement on the whole system of conditional privileges, see id., comment l, and the Special Note preceding § 593. And see the discussion in Jacron Sales Co. v. Sindorf, 350 A.2d 688 (Md. 1976), infra, p. 1047.

Concerning the standard of care, Anderson has stated that, "suits under the negligence formula of Gertz have turned out the be rare." David A. Anderson, Is Libel Law Worth Reforming?, 140 U. Pa. L. Rev. 487, 503 (1991). Why?

4. Nonmedia Defendants. New York Times and Gertz both involved suits against members of the news media. Were their constitutional requirements confined to suits against media defendants? Although the Supreme Court has never expressly said so, the answer for the Times standard seems to be clearly, "no." In Times itself, the suit was also against private individuals who signed the political advertisement. See also Garrison v. Louisiana, 379 U.S. 64 (1964) (press conference); Henry v. Collins, 380 U.S. 356 (1965) (letter and

telephone conversation); St. Amant v. Thompson, 390 U.S. 727 (1968), supra page 997 (televised political speech); Old Dominion Branch No. 496, Nat'l Ass'n of Letter Carriers v. Austin, 418 U.S.

264, 285 (1974) (newsletter). But cf. Hutchinson v. Proxmire, 443 U.S. Ill, 133, n.16 (1979) (Supreme Court "has never decided... whether the New York Times standard can apply to an individual defendant rather than a media defendant"). In Milkovich v. Lorain Journal Co., infra page 1035, the court was at pains to distinguish media from nonmedia defendants, but did not decide the force of the dichotomy.

There has been less agreement about the Gertz standard, the cases dividing almost evenly. But the opinions in Greenmoss, the next principal case, indicate that some of the current members of the Court would draw no distinction between media defendants and other defendants. Although in Hepps, infra page 1026, the Supreme Court couched its decision to apply the burden of proof on the issue of the falsity of the publication only to media defendants. In Air Wisconsin v. Hoeper, 571 U.S. 237 (2014), the Court found the burden of proof of falsity fell on the defendant regardless of its media or non-media status.

5. When Is the Statement Defamatory? Is this issue subject to constitutional constraint? The Supreme Court entertained the question in 1942 when it granted certiorari on the (2-1) holding in Sweeney v. Schenectady Union Pub. Co., 122 F.2d 288 (2d Cir. 1941). However, the Court handed down a per-curiam memorandum affirming the judgment "by an equally divided court." Schenectady

Union Pub. Co. v. Sweeney, 316 U.S. 642 (1942). The Court has not accepted any other cases raising the issue.

6. Damages. Actual damages, as required by the Constitution under the holding in Gertz, are broader in scope than special damages, as required at common law for oral statements that are not slanderous per se. Special damages require pecuniary loss. Actual damages may include injury to reputation or emotional distress, without showing pecuniary loss, but the injury must be proved. It initially appeared that the purpose of this requirement was to give the trial and appellate courts greater control over the amount of damages that the jury can properly award. But the opportunity has not been utilized.

7. Public and Private Plaintiffs. The principal case turns its analysis on the characterization of the plaintiff. Under Gertz, all plaintiffs, public or private, in cases of public interest speech, may claim punitive and presumed damages where actual malice is proved. State law may dictate otherwise.

In Obsidian Finance Group, LLC v. Cox, 740 F.3d 1284 (9th Cir. 2014), the court addressed a "question of first impression": "What First Amendment protections are afforded a blogger sued for defamation?" Liability for a defamatory blog that involves a matter of public concern cannot be imposed without proof of fault and actual damages. The intersection between Sullivan and Gertz had not been explored in respect of this kind of Internet publication. Following the trend in other decisions, the court held that no distinction could be made between media and nonmedia defendants. Particularly in the age of the Internet the distinction is too unstable. The public figure

status of the plaintiff and the public importance of the statement at issue are the First Amendment "touchstones."

1021

(C) Speech of Private Concern

Dun & Bradstreet, Inc. v. Greenmoss Builders, Inc.

Supreme Court of the United States, 1985.

472 U.S. 749, 105 S.Ct. 2939, 86 L.Ed.2d 593.

[Petitioner-defendant Dun & Bradstreet supplied confidential credit rating reports to subscribers. It sent a report to five subscribers, indicating that respondent-plaintiff Greenmoss Builders had filed a voluntary petition for bankruptcy. The report was totally false, the error resulting from petitioner's use of a 17-year-old high school student to review Vermont bankruptcy proceedings. He mistakenly attributed to respondent a bankruptcy petition filed by one of respondent's former employees, and from petitioner's failure to make routine checks of accuracy. Learning of the report, respondent called petitioner's regional office, explained the error and asked for a correction. Petitioner sent out a notice which respondent regarded as inadequate, and refused to disclose the identity of the five subscribers.

Respondent sued for libel and obtained a verdict for $50,000 in compensatory or presumed damages and $300,000 in punitive damages. The trial court granted a motion for a new trial, but respondent appealed to the Vermont Supreme Court, which reversed

and reinstated the verdict on the ground that the constitutional requirements of the U.S. Supreme Court did not apply when the suit was against a non-media defendant. 143 Vt. 66, 461 A.2d 414 (1983). This court granted certiorari, and affirmed the holding, "although for reasons different from those relied on by the Vermont Supreme Court."]

JUSTICE Powell announced the judgment of the Court and delivered an opinion, in which JUSTICE REHNQUIST and JUSTICE O'CONNOR joined.

In Gertz v. Robert Welch, Inc., 418 U.S. 323, we held that the First Amendment restricted the damages that a private individual could obtain from a publisher for a libel that involved a matter of public concern. More specifically, we held that in these circumstances the First Amendment prohibited awards of presumed and punitive damages for false and defamatory statements unless the plaintiff shows "actual malice," that is, knowledge of falsity or reckless disregard for the truth. The question presented in this case is whether this rule of Gertz applies when the false and defamatory statements do not involve matters of public concern. ***

In Gertz, we held that the fact that [an] expression concerned a public issue did not by itself entitle the libel defendant to the constitutional protections of New York Times. These protections, we found, were not "justified solely by reference to the interest of the press and broadcast media in immunity from liability." [C] Rather, they represented "an accommodation between [First Amendment] concern[s] and the limited state interest present in the context of libel actions

brought by public persons." [C] In libel actions brought by private persons we found the competing interests different. Largely because private persons have not voluntarily exposed themselves to increased risk of injury from defamatory statements and because they generally lack effective opportunities for rebutting such statements, [c] we found that the State possessed a "strong and legitimate ***interest in compensating private individuals for injury to reputation." [C] Balancing this stronger state interest against the same First Amendment interest at stake in New York Times, we held that a State could not allow recovery of presumed and punitive damages absent a showing of "actual malice." Nothing in our opinion, however, indicated that this same balance would be struck regardless of the type of speech involved. ***

We have never considered whether the Gertz balance obtains when the defamatory statements involve no issue of public concern. To make this determination, we must employ the approach approved in Gertz and balance the State's interest in compensating private individuals for injury to their reputation against the First Amendment interest in protecting this type of expression. This state interest is identical to the one weighed in Gertz. There we found that it was "strong and legitimate." [C] A State should not lightly be required to abandon it. ***

The First Amendment interest, on the other hand, is less important than the one weighed in Gertz. We have long recognized that not all speech is of equal First Amendment importance. It is speech on " 'matters of public concern'" that is "at the heart of the First

Amendment's protection." First National Bank of Boston v. Bellotti, 435 U.S. 765, 776. * W *

In contrast, speech on matters of purely private concern is of less First Amendment concern. [C] As a number of state courts, including the court below, have recognized, the role of the Constitution in regulating state libel law is far more limited when the concerns that activated New York Times and Gertz are absent. ***

While ***speech on matters not of public concern is not totally unprotected by the First Amendment [cc], its protections are less stringent. In Gertz, we found that the state interest in awarding presumed and punitive damages was not "substantial" in view of their effect on speech at the core of First Amendment concern. [C] This interest, however, is "substantial" relative to the incidental effect these remedies may have on speech of significantly less constitutional interest. The rationale of the common law rules has been the experience and judgment of history that "proof of actual damage will be impossible in a great many cases where, from the character of the defamatory words and the circumstances of publication, it is all but certain that serious harm has resulted in fact." [Cc] As a result, courts for centuries have allowed juries to presume that some damage occurred from many defamatory utterances and publications. ***[Cc] This rule furthers the state interest in providing remedies for defamation by ensuring that those

remedies are effective. In light of the reduced constitutional value of speech involving no matters of public concern, we hold that the state

interest adequately supports awards of presumed and punitive damages--even absent a showing of "actual malice." ***

The only remaining issue is whether petitioner's credit report involved a matter of public concern. In a related context, we have held that "[w]hether ***speech addresses a matter of public concern must be determined by [the expression's] content, form, and context ***as revealed by the whole record." Connick v. Myers, 461 U.S., at 147-148. These factors indicate that petitioner's credit report concerns no public issue. It was speech solely in the individual interest of the speaker and its specific business audience. [C] This particular interest warrants no special protection when--as in this case--the speech is wholly false and clearly damaging to the victim's business reputation. [Cc] Moreover, since the credit report was made available to only five subscribers, who, under the terms of the subscription agreement, could not disseminate it further, it cannot be said that the report involves any "strong interest in the free flow of commercial information." [C] There is simply no credible argument that this type of credit reporting requires special protection to ensure that "debate on public issues [will] be uninhibited, robust, and wide-open." New York Times Co. v. Sullivan, 376 U.S., at 270.

In addition, the speech here, like advertising, is hardy and unlikely to be deterred by incidental state regulation. [Cc] It is solely motivated by the desire for profit, which, we have noted, is a force less likely to be deterred than others. [C] Arguably, the reporting here was also more objectively verifiable than speech deserving of greater protection. [C] In any case, the market provides a powerful incentive to a credit reporting agency to be accurate, since false credit

reporting is of no use to creditors. Thus, any incremental "chilling" effect of libel suits would be of decreased significance. ***

We conclude that permitting recovery of presumed and punitive damages in defamation cases absent a showing of "actual malice" does not violate the First Amendment when the defamatory statements do not involve matters of public concern. Accordingly, we affirm the judgment of the Vermont Supreme Court.

[Chief Justice Burger and Justice White concurred in the judgment with separate opinions. They had dissented in Gertz and urged it to be overruled. They also wished to reevaluate the extent of application of New York Times v. Sullivan.]

Justice Brennan, with whom Justice Marshall, Justice BLACKMUN and JUSTICE STEVENS join, dissenting. ***

The four who join this opinion would reverse the judgment of the Vermont Supreme Court. We believe that, although protection of the type of expression at issue is admittedly not the "central meaning of the First Amendment," [c] Gertz makes clear that the First Amendment

1024

nonetheless requires restraints on presumed and punitive damage awards for this expression. The lack of consensus in approach to these idiosyncratic facts should not, however, obscure the solid allegiance the principles of New York Times v. Sullivan continue to command in the jurisprudence of this Court. ***

When an alleged libel involves criticism of a public official or a public figure, the need to nurture robust debate of public issues and the

requirement that all state regulation of speech be narrowly tailored coalesce to require actual malice as a prerequisite to any recovery. When the alleged libel involves speech that falls outside these especially important categories, we have held that the Constitution permits states significant leeway to compensate for actual damage to reputation. The requirement of narrowly tailored regulatory measures, however, always mandates at least a showing of fault and proscribes the award of presumed and punitive damages on less than a showing of actual malice. It has remained the judgment of the Court since Gertz that this comprehensive two-tiered structure best accommodates the values of the constitutional free speech guarantee and the states' interest in protecting reputation. ***

In professing allegiance to Gertz, the plurality opinion protests too much. As Justice White correctly observes, Justice Powell departs completely from the analytic framework and result of that case: "Gertz was intended to reach any false statements ***whether or not [they] implicate a matter of public importance." [C] [11]

* * *

[11] One searches Gertz in vain for a single word to support the proposition that limits on presumed and punitive damages obtained only when speech involved matters of public concern. Gertz could not have been grounded in such a premise. Distrust of placing in the courts the power to decide what speech was of public concern was precisely the rationale Gertz offered for rejecting the Rosenbloom plurality approach. [C] It would have been incongruous for the Court to go on to circumscribe the protection against presumed and punitive damages by reference to a judicial judgment as to whether

the speech at issue involved matters of public concern. At several points the Court in Gertz makes perfectly clear the restrictions of presumed and punitive damages were to apply in all cases. [C]

Indeed, JUSTICE POWELL's opinion today is fairly read as embracing the approach of the Rosenbloom plurality to deciding when the Constitution should limit state defamation law. The limits imposed, however, are less stringent than those suggested by the Rosenbloom plurality. Under the approach of today's plurality, speech about matters of public or general interest receives only the Gertz protections against unrestrained presumed and punitive damages, not the full New York Times v. Sullivan protections against any recovery absent a showing of actual malice.

Even accepting the notion that a distinction can and should be drawn between matters of public concern and matters of purely private concern, however, the analyses presented by both JUSTICE POWELL and JUSTICE WHITE fail on their own terms. Both, by virtue of what they hold in this case, propose an impoverished definition of "matters of public concern" that is irreconcilable with First Amendment principles. The credit reporting at issue here surely involves a subject matter of sufficient public concern to require the comprehensive protections of Gertz. Were this speech appropriately characterized as a matter of only private

concern, moreover, the elimination of the Gertz restrictions on presumed and punitive damages would still violate basic First Amendment requirements. ***

The five Members of the Court voting to affirm the damage award in this case have provided almost no guidance as to what constitutes a protected "matter of public concern." JUSTICE WHITE offers nothing at all, but his opinion does indicate that the distinction turns on solely the subject matter of the expression and not on the extent or conditions of dissemination of that expression. [C] JUSTICE POWELL adumbrates a rationale that would appear to focus primarily on subject matter. [12]

The opinion relies on the fact that the speech at issue was "solely in the individual interest of the speaker and its business audience," [c] Analogizing explicitly to advertising, the opinion also states that credit reporting is "hardy" and "solely motivated by the desire for profit." [C] These two strains of analysis suggest that JUSTICE POWELL is excluding the subject matter of credit reports from "matters of public concern" because the speech is predominantly in the realm of matters of economic concern. ***

Greenmoss Builders should be permitted to recover for any actual damage it can show resulted from Dun & Bradstreet's negligently false credit report, but should be required to show actual malice to receive presumed or punitive damages. Because the jury was not instructed in accordance with these principles, we would reverse and remand for further proceedings not inconsistent with this opinion.

NOTES AND QUESTIONS

1. On studying the Gertz case, would it have occurred to you that this case would have been decided this way? After reading this case, what do you think the Court will do when it reviews a case involving a private plaintiff in a matter not of public concern, when the question

arises whether the Gertz requirement of defendant's fault is raised? What would be the effect of its decision either way?

2. Do you agree with the reasoning that the nature of this information militates against its production and dissemination being "chilled" by defamation liability? Can the hazards of liability be captured by the price charged for access to this information? How does this differ from political speech? May the susceptibility of the information to chilling describe a principled distinction between the categories of public and private concern?

[12] Justice Powell also appears to rely in part on the fact that communication was limited and confidential. Given that his analysis also relies on the subject matter of the credit report, it is difficult to decipher exactly what role the nature and extent of dissemination plays in JUSTICE POWELL's analysis. But because the subject matter of the expression at issue is properly understood as a matter of public concern, it may well be that this element of confidentiality is crucial to the outcome as far as JUSTICE POWELL's opinion is concerned. In other words, it may be that JUSTICE POWELL thinks this particular expression could not contribute to public welfare because the public generally does not receive it. This factor does not suffice to save the analysis.

1026

See Daniel A. Farber, Free Speech Without Romance: Public Choice and the First Amendment, 105 Harv. L. Rev 554 (1991), for further discussion.

3. The principal case does appear to settle, at least for the time being, one issue that had never been specifically decided. This is the

issue of whether different standards might constitutionally be applied to media defendants and nonmedia defendants. The Vermont Supreme Court had based its decision in Greenmoss on the ground that the defendant was not acting as a member of the news media. Although the Supreme Court affirmed, it pointedly stated that the affirmance was not based on the reasons given by the state supreme court. Justice Brennan stated in his dissenting opinion that he counted "at least six" Justices who "agree today that, in the context of defamation law, the rights of the institutional media are no greater and no less than those enjoyed by" others. The Justices were in some conflict and indecision: Levine and Wermiel, The Landmark that Wasn't: A First Amendment Play in Five Acts, 88 Wash. L. Rev. 1 (2013) (pointing to internal documentation and correspondence between the Justices.)

(D) Falsity

Philadelphia Newspapers, Inc. v. Hepps

Supreme Court of the United States, 1986.

475 U.S. 767, 106 S.Ct. 1558, 89 L.Ed.2d 783.

[Plaintiffs were Maurice S. Hepps, principal stockholder of General Programming, Inc. (GPI), a corporation engaged in franchising a chain of "Thrifty Stores" (selling beer, soft drinks and snacks), plus GPI itself and some of the franchisees. The charges were that plaintiffs "had links to organized crime and used some of those links to influence the State's governmental processes, both legislative and administrative." They were published in a series of articles by

defendant, Philadelphia Newspapers, Inc., in the Philadelphia Inquirer.

Suit was in the state court, where the court followed two statutes requiring (1) a private plaintiff to prove negligence or malice by the defendant and (2) the defendant to meet the burden of proving the truth of a defamatory statement. There was also a third statute ("a shield law") providing that no person employed by a public medium should be required to disclose the source of information obtained. Plaintiffs requested an instruction that the jury could draw a negative inference from the exercise of the shield law's privilege, and defendants requested an instruction that no reference could be drawn. The judge declined to give either instruction and the jury found for the defendants.

On appeal directly to the Pennsylvania Supreme Court, that court "held that to place the burden of showing truth on the defendant did not unconstitutionally inhibit free debate, and remanded the case for a new trial." This court granted certiorari.]

1027

JUSTICE O'Connor delivered the opinion of the Court.

This case requires us once more to "struggle] ***to define the proper accommodation between the law of defamation and the freedoms of speech and press protected by the First Amendment." Gertz v. Robert Welch, Inc., 418 U.S. 323, 325. In Gertz, the Court held that a private figure who brings a suit for defamation cannot recover without some showing that the media defendant was at fault in publishing the statements at issue. [C] Here, we hold that, at least where a newspaper publishes speech of public concern, a private-

figure plaintiff cannot recover damages without also showing that the statements at issue are false. ***[The opinion describes the holdings of New York Times, Gertz and Greenmoss.]

One can discern in these decisions two forces that may reshape the common-law landscape to conform to the First Amendment. The first is whether the plaintiff is a public official or figure, or is instead a private figure. The second is whether the speech at issue is of public concern. When the speech is of public concern and the plaintiff is a public official or public figure, the Constitution clearly requires the plaintiff to surmount a much higher barrier before recovering damages from a media defendant than is raised by the common law. When the speech is of public concern but the plaintiff is a private figure, as in Gertz, the Constitution still supplants the standards of the common law, but the constitutional requirements are, in at least some of their range, less forbidding than when the plaintiff is a public figure and the speech is of public concern. When the speech is of exclusively private concern and the plaintiff is a private figure, as in Dun & Bradstreet, the constitutional requirements do not necessarily force any change in at least some of the features of the common-law landscape.

Our opinions to date have chiefly treated the necessary showings of fault rather than of falsity. Nonetheless, as one might expect given the language of the Court in New York Times, a public-figure plaintiff must show the falsity of the statements at issue in order to prevail on a suit for defamation. ***

Here, as in Gertz, the plaintiff is a private figure and the newspaper articles are of public concern. In Gertz, as in New York Times, the

common-law rule was superseded by a constitutional rule. We believe that the common law's rule on falsity--that the defendant must bear the burden of proving truth--must similarly fall here to a constitutional requirement that the plaintiff bear the burden of showing falsity, as well as fault, before recovering damages.

There will always be instances when the factfinding process will be unable to resolve conclusively whether the speech is true or false; it is in those cases that the burden of proof is dispositive. Under a rule forcing the plaintiff to bear the burden of showing falsity, there will be some cases in which plaintiffs cannot meet their burden despite the fact that the speech is in fact false. The plaintiffs suit will fail despite the fact

1028

that, in some abstract sense, the suit is meritorious. Similarly, under an alternative rule placing the burden of showing truth on defendants, there would be some cases in which defendants could not bear their burden despite the fact that the speech is in fact true. Those suits would succeed despite the fact that, in some abstract sense, those suits are unmeritorious. Under either rule, then, the outcome of the suit will sometimes be at variance with the outcome that we would desire if all speech were either demonstrably true or demonstrably false. ***

In a case presenting a configuration of speech and plaintiff like the one we face here, and where the scales are in such an uncertain balance, we believe that the Constitution requires us to tip them in favor of protecting true speech. To ensure that true speech on matters of public concern is not deterred, we hold that the common-

law presumption that defamatory speech is false cannot stand when a plaintiff seeks damages against a media defendant for speech of public concern.

In the context of governmental restriction of speech, it has long been established that the government cannot limit speech protected by the First Amendment without bearing the burden of showing that its restriction is justified. ***It is not immediately apparent from the text of the First Amendment, which by its terms applies only to governmental action, that a similar result should obtain here: a suit by a private party is obviously quite different from the government's direct enforcement of its own laws. Nonetheless, the need to encourage debate on public issues that concerned the Court in the governmental-restriction cases is of concern in a similar manner in this case involving a private suit for damages: placement by state law of the burden of proving truth upon media defendants who publish speech of public concern deters such speech because of the fear that liability will unjustifiably result. [Cc] Because such a "chilling" effect would be antithetical to the First Amendment's protection of true speech on matters of public concern, we believe that a private-figure plaintiff must bear the burden of showing that the speech at issue is false before recovering damages for defamation from a media defendant. To do otherwise could "only result in a deterrence of speech which the Constitution makes free." [C]

We recognize that requiring the plaintiff to show falsity will insulate from liability some speech that is false, but unprovably so. Nonetheless, the Court's previous decisions on the restrictions that the First Amendment places upon the common law of defamation firmly support our conclusion here with respect to the allocation of

the burden of proof. In attempting to resolve related issues in the defamation context, the Court has affirmed that "[t]he First Amendment requires that we protect some falsehood in order to protect speech that matters." Gertz, 418 U.S., at 341. Here the speech concerns the legitimacy of the political process, and therefore clearly "matters." [C] To provide " 'breathing space'" [c] for true speech on matters of public concern, the Court has been willing to insulate even demonstrably false speech from liability, and has imposed

1029

additional requirements of fault upon the plaintiff in a suit for defamation. [Cc] We therefore do not break new ground here in insulating speech that is not even demonstrably false.

We note that our decision adds only marginally to the burdens that the plaintiff must already bear as a result of our earlier decisions in the law of defamation. The plaintiff must show fault. A jury is obviously more likely to accept a plaintiffs contention that the defendant was at fault in publishing the statements at issue if convinced that the relevant statements were false. As a practical matter, then, evidence offered by plaintiffs on the publisher's fault in adequately investigating the truth of the published statements will generally encompass evidence of the falsity of the matters asserted. ***[T]he judgment of the Pennsylvania Supreme Court is reversed, and the case is remanded for further proceedings not inconsistent with this opinion.

Justice Brennan, with whom Justice Blackmun joins, concurring. ***

Justice Stevens, with whom The Chief Justice, Justice White, and Justice Rehnquist join, dissenting. ***

The Court, after acknowledging the need to "'accommodat[e] ***the law of defamation and the freedom's of speech and press protected by the First Amendment,'" [c] decides to override "the common-law presumption" retained by several states that "defamatory speech is false" because of the need "[t]o ensure that true speech on matters of public concern is not deterred." [C] I do not agree that our precedents require a private individual to bear the risk that a defamatory statement--uttered either with a mind toward assassinating his good name or with careless indifference to that possibility--cannot be proven false. By attaching no weight to the state's interest in protecting the private individual's good name, the Court has reached a pernicious result. ***

While deliberate or inadvertent libels vilify private personages, they contribute little to the marketplace of ideas. In assaying the First Amendment side of the balance, it helps to remember that the perpetrator of the libel suffers from its failure to demonstrate the truth of its accusation only if the "private-figure" plaintiff first establishes that the publisher is at "fault," either that it published its libel with "actual malice" in the New York Times sense ***or that it published with that degree of careless indifference characteristic of negligence. Far from being totally in the dark about "how much of the speech affected by the allocation of the burden of proof is true and how much is false," [c] the antecedent fault determination makes irresistible the inference that a significant portion of this speech is beyond the constitutional pale. This observation is almost tautologically true with regard to libels published with "actual malice."

For that standard to be met, the publisher must come close to wilfully blinding itself to the falsity of its utterance. The observation is also valid, albeit to a lesser extent, with respect to defamations uttered with "fault." Thus, while the public's interest in an

1030

uninhibited press is at its nadir when the publisher is at fault or worse, society's "equally compelling" need for judicial redress of libelous utterances is at its zenith. ***[C]

In my opinion deliberate, malicious character assassination is not protected by the First Amendment to the United States Constitution. That Amendment does require the target of a defamatory statement to prove that his assailant was at fault, and I agree that it provides a constitutional shield for truthful statements. I simply do not understand, however, why a character assassin should be given an absolute license to defame by means of statements that can be neither verified nor disproven. The danger of deliberate defamation by reference to unprovable facts is not a merely speculative or hypothetical concern. ***

Even assuming that attacks on the reputation of a public figure should be presumed to be true, however, a different calculus is appropriate when a defamatory statement disparages the reputation of a private individual. In that case, the overriding concern for reliable protection of truthful statements must make room for "[t]he legitimate state interest underlying the law of libel"--"the compensation of individuals for the harm inflicted on them by defamatory falsehood." Gertz, 418 U.S. at 341. ***

In my view, as long as publishers are protected by the requirement that the plaintiff has the burden of proving fault, there can be little, if any, basis for a concern that a significant amount of true speech will be deterred unless the private person victimized by a malicious libel can also carry the burden of proving falsity. The Court's decision trades on the good names of private individuals with little First Amendment coin to show for it. ***

NOTES AND QUESTIONS

1. Who has the better of the argument? Remember, this is a decision of constitutional law, binding on both federal and state courts.

2. In Air Wisconsin Airlines v. Hoeper, 568 U.S. 1083 (2014), the Court reemphasized the place of falsity requiring, that if the immunity there claimed for the defendants depended upon the statute's intention to incorporate the free speech requirements under N.Y. Times v. Sullivan, the plaintiff would bear the burden of showing that the statements were materially false. Airline representatives had passed on information to the Transport Safety Administration ("TSA") that the plaintiff, a pilot for the airline, was mentally unstable, was potentially armed, and had been fired. TSA officials took the plaintiff off his flight. The Colorado Supreme Court had affirmed on the basis that the statement had been made recklessly as to its truth or falsity. The Court cited the principal case to affirm the central place of proof of falsity in contrast to the common law's strict liability doctrine. It also took the view that it should have the power to decide the issue of the material falsity of the statement. This drew a partial dissent from Justice Scalia, with whom Justices Thomas and Kagan concurred, that

the issue of material falsity was whether a jury could find it false in the estimation of the TSA official to whom it was published. The facts as established did not compel a finding of material falsity and so the matter must be put to a jury properly instructed. It was plausible for example that the false statement of mental instability would have a material effect on the judgment of the TSA official. Should this judgment reside in the judge or jury?

3. The term "of public concern" has often been employed in garnering protection for speech carrying "First Amendment" importance. Does an article in defendant's tourist guidebook, "Let's Go: Egypt and Israel," advising that proprietor of hostel had been sued for sexual harassment and warning readers to stay away, fall within Hepps, as a matter of "public concern" published by the "media"? Shaari v. Harvard Student Agencies, Inc., 691 N.E.2d 925 (Mass. 1998). A newspaper article stating that plaintiff, a married woman, had contracted chlamydia, a sexually transmitted disease, is a matter of "public concern." Cox Enters., Inc. v. Thrasher, 442 S.E.2d 740 (Ga.1994).

4. The risk of falsity is shifted to the plaintiff under the principal case. The risk is thus moved from the enterprise to the individual. Since the enterprise is likely insured, does this make sense? See David A. Anderson, Is Libel Law Worth Reforming?, 140 U. Pa. L. Rev. 487, 547--49 (1991); Frederick Schauer, Uncoupling Free Speech, 92 Colum. L. Rev. 1321, 1339- 43 (1992), for discussion on the above issue.

(E) Public Figures and Public Officials

In New York Times the status of the plaintiff as a public official was critical to the publication receiving additional First Amendment protections. This was extended to public figures in Curtis Pub. Co. v. Butts, 388 U.S. 130 (1967). The question remained open of the protection that a "private" plaintiff could garner under the First Amendment. Putting aside the wrong turning in Metromedia, supra, Gertz provided the answer that the status of the plaintiff as "private" attracted a lesser, but still substantial, protection if the publication related to a matter of public concern. Beginning in Gertz, through many a long decision, the courts have searched for a definition of the term "public figure." A completion of the journey will likely cause students to agree that an articulation of the distinction is much like trying to nail a jellyfish to a wall, Rosanova v. Playboy Enters., 411 F. Supp. 440 (S.D.Ga.1976), aff'd, 580 F.2d 859 (5th Cir. 1978). The beginning point is found in Gertz where two rationales were deployed for imposing a greater burden on public figures: (1) their "access to the media," and (2) their assumption of risk--you must accept the heat in the kitchen if you enter. Public figures can be (1) limited (vortex) figures or (2) universal (unlimited). Very few are universal; most have thrust themselves into a public controversy.

In deciding whether a person may be a limited public figure, it is necessary first to inquire whether a "public controversy" exists. Mere public interest is not enough: many people are interested in the divorces

of the wealthy, but curiosity does not a "public controversy" make. Time, Inc. v. Firestone, 424 U.S. 448 (1976). The issue must be one

publicly debated with foreseeable and substantial ramifications for nonparticipants, Waldbaum v. Fairchild Pubis., Inc., 627 F.2d 1287 (D.C. Cir.), cert, denied, 449 U.S. 898 (1980). A public controversy exists over the accreditation of a law school. Avins v. White, 627 F.2d 637 (3d Cir. 1980). It does not exist in respect of a bank's expenditures despite a great public interest in its wealth. Blue Ridge Bank v. Veribanc, 866 F.2d 681 (4th Cir. 1989). Dicta in one leading case, Wolston v. Reader's Digest Assn, 443 U.S. 157 (1979), suggests that a public controversy requires a division of opinion; the plaintiff could not have thrust himself into a "controversy" about communist espionage because "all responsible United States citizens understandably were and are opposed to it." Id. at 166 n. 8. Really?

Once a public controversy is identified, the issue then becomes whether the plaintiffs role was such that he is a limited public figure in the context of that controversy. In Wolston, Justice Rehnquist, citing the two Gertz rationales, announced that the second--the assumption of risk--was the more important. Plaintiff, the nephew of a couple who had pleaded guilty to espionage charges, had failed to answer a subpoena. Sixteen years later he was listed by the defendant as a Soviet agent who had been convicted. He never "voluntarily thrust" or "injected" himself into the controversy concerning investigations of Soviet espionage in the United States. A similar basis was relied upon in Hutchinson v. Proxmire, 443 U.S. Ill (1979), where plaintiff, director of a state mental hospital and adjunct professor at a state university, had applied for and obtained federal grants to study aggression in animals. Senator Proxmire, to illustrate his claim that federal funds were wasted on frivolous research,

invented the "Golden Fleece of the Month Award," and gave it to the Navy and NASA for their grant to Hutchinson. Hutchinson was not a public figure because he had not thrust himself or his views into public controversies to influence others. Any controversy was of the Senator's making: he could not manufacture his own defense. The twin Gertz rationales were referred to in Khawar v. Globe Inti, Inc., 965 P.2d 696 (Cal. 1998), where plaintiff was featured in a Globe article as a person implicated in the assassination of Senator Robert Kennedy. The Globe, with embellished headlines and an enhanced photograph, had lifted the story from a book written by Robert Morrow alleging that the Iranian Secret Police, at the time of the Shah, had colluded with the Mafia in the assassination. Plaintiff at the time was a photographer and had placed himself on the stage to be photographed with the Senator. The California Supreme Court reasoned he was not a vortex public figure, particularly as he had not acquired such public prominence in relation to the controversy as to permit him media access to counter the defamatory statements.

1033

Although an important factor, voluntary assumption of risk is not essential. Some persons may be deemed to be public figures even if they were drawn involuntarily into a public controversy: Johnny Carson's wife, Carson v. Allied News Co., 529 F.2d 206 (7th Cir. 1976); the leading prosecution witness in the Scottsboro case (1931), in which black youths were accused of raping the plaintiff and another white woman, Street v. Nat'l Broad. Co., 645 F.2d 1227 (6th Cir. 1981); and the only air traffic controller on duty in 1974 at Dulles Airport when a plane crashed, Dameron v. Washington Magazine, Inc., 779 F.2d 736 (D.C.Cir. 1985), cert, denied, 476 U.S.

1141 (1986). (opining that these involuntary cases would be "few and far between.") That prediction of judicial reticence may be questioned, however, in light of Atlanta Journal-Constitution v. Jewell, 555 S.E.2d 175 (Ga. Ct. App.2001) (deeming the hapless Richard Jewell, who was caught up in the Atlanta Olympic bombing, a public figure), and Lohrenz v. Donnelly, 350 F.3d 1272 (D.C. Cir. 2003) (one of the first women combat pilots in the Navy was deemed a public figure). In Hatfill v. N.Y. Times Co., 532 F.3d 312 (4th Cir. 2008) the Court held that Steven Hatfill, a biodefense research scientist was a "limited purpose public figure" in that he had "voluntarily thrust himself into the controversy surrounding the threat of bioterrorism and the nation's lack of preparedness." New York Times had named Hatfill in a series of articles as a suspect in the 2001 anthrax attacks. The court cited Hatfill's media appearances on the broad topic of bioterrorism as sufficient public engagement. The court characterized the controversy broadly and as not circumstantial to the events surrounding the anthrax attacks. Could this have an adverse impact on public debate?

General purpose or universal public figures are a select group. In Hustler Magazine v. Falwell, infra page 1112, the Reverend Jerry Falwell was found to be one. Robert C. Post, The Constitutional Concept of Public Discourse: Outrageous Opinion, Democratic Deliberation, and Hustler Magazine v. Falwell, 103 Harv. L. Rev. 601 (1990), for thorough discussion on this issue in Hustler. Wells v. Liddy, 186 F.3d 505 (4th Cir. 1999), confirmed that "instances of truly involuntary public figures must be extremely rare." In this case Wells had been a secretary at the Democratic National Committee "DNC" for a short period in 1972 during the Watergate break-in. She had

been mentioned by Liddy, commenting on Watergate many years afterwards, as a person connected with the organization of a prostitution ring and in possession of embarrassing information relating to John Dean, the White House Counsel. The court needed to determine whether Wells qualified as an "involuntary" or "voluntary" public figure. "Before a plaintiff can be classified, as a matter of law, as a limited-purpose public figure, the defendant must prove" five necessary elements:

(1) the plaintiff has access to channels of effective communication;

1034

(2) the plaintiff voluntarily assumed a role of special prominence in the public controversy;

(3) the plaintiff sought to influence the resolution or outcome of the controversy;

(4) the controversy existed prior to the publication of the defamatory statement; and

(5) the plaintiff retained public-figure status at the time of the alleged information.

Although Wells had made the contacts with the media, she had not tried to influence the merits of the controversy or thrust herself to the forefront of it. Time had changed the Watergate controversy and she was not a voluntary public figure in respect of its contemporary aspect.

Regarding the involuntary public figure examination, the District Court applied Dameron, whereas the Fourth Circuit Court of Appeals articulated a new test in an attempt to avoid resurrecting

Rosenbloom. Accordingly, it defined an "involuntary public figure" as a person who has "pursued a course of conduct from which it was reasonably foreseeable, at the time of conduct, that public interest would arise." The person must have been recognized as a "central figure" during the debate over the public controversy. On this criterion Wells was not a public figure: she was not a central figure, she was peripheral, a "footnote." Without a limiting criterion, the court was concerned that all persons connected with large public controversies would be swept up, treated as public figures, and "an individual's interest in privacy and protecting her reputation would be erased from the balance of defamation law."

Public officials are more easily identified. They are persons "who have, or appear to the public to have, substantial responsibility for or control over the conduct of governmental affairs," Rosenblatt v. Baer, 383 U.S. 75 (1966).

In Wolston, the Court emphasized the requirement of an objective approach in fashioning clear rules for those participating in public debate. Do you have a sense of clear rules prevailing? Given the absence of common law strict liability, how would you have fashioned the rules?

Although the classification is intensely factual--the person's position and responsibilities (public official) or the scope of the person's fame or connection with public affairs (public figures)--the courts regard it as a question of law, Kassel v. Gannett Co., 875 F.2d 935 (1st Cir. 1989) (staff psychologist for Veteran's Administration not a public official); White v. Mobile Press Register, Inc., 514 So.2d 902 (Ala. 1987) (former E.P.A. official who was officer in corporation

transporting hazardous waste is limited purpose public figure); Franklin v. Benevolent & Protective Order of Elks, 159 Cal. Rptr. 131 (Cal. Ct. App. 1979) (public school teacher is not a public figure); Johnston v. Corinthian Television Corp., 583 P.2d 1101 (Okla.1978) (high school wrestling coach is a public figure). Trustee in Bankruptcy is not a public figure, Obsidian Fin. Grp.

1035

v. Cox, 740 F.3d 1284 (9th Cir. 2014). But cf. O'Connor v. Burningham, 165 P.3d 1214 (Utah 2007) (denying public figure status to a high school basketball teacher/coach).

Note that a publication not unrelated to a public official's public status does not attract constitutional protection. The higher public status of the official, the more extensive is the relevant public arena. See, e.g., Hatfill v. N.Y. Times Co., 532 F.3d 312 (4th Cir. 2008). The inquiry is fact intensive, leading to a tendency of Federal District Courts to find a wide range of persons falling into the public classification. Marjorie Heins, The Brave New World of Social Media Censorship, 127 Harv. L. Rev. F. 325 (2014).

(F) Opinion

Milkovich v. Lorain Journal Co.

Supreme Court of the United States, 1990.

497 U.S. 1. 110 S.Ct. 2695, 111 L.Ed.2d 1.

Chief Justice Rehnquist delivered the opinion of the Court.

Respondent J. Theodore Diadiun authored an article in an Ohio newspaper implying that petitioner Michael Milkovich, a local high

school wrestling coach, lied under oath in a judicial proceeding about an incident involving petitioner and his team which occurred at a wrestling match. Petitioner sued Diadiun and the newspaper for libel, and the Ohio Court of Appeals affirmed a lower court entry of summary judgment against petitioner. This judgment was based in part on the grounds that the article constituted an "opinion" protected from the reach of state defamation law by the First Amendment to the United States Constitution. We hold that the First Amendment does not prohibit the application of Ohio's libel laws to the alleged defamations contained in the article.

This case is before us for the third time in an odyssey of litigation spanning nearly 15 years. [Cc]

Petitioner Milkovich, now retired, was the wrestling coach at Maple Heights High School in Maple Heights, Ohio. In 1974, his team was involved in an altercation at a home wrestling match with a team from Mentor High School. Several people were injured. In response to the incident, the Ohio High School Athletic Association (OHSAA) held a hearing at which Milkovich and H. Don Scott, the Superintendent of Maple Heights Public Schools, testified. Following the hearing, OHSAA placed the Maple Heights team on probation for a year and declared the team ineligible for the 1975 state tournament. OHSAA also censored Milkovich for his actions during the altercation. Thereafter, several parents and wrestlers sued OHSAA in the Court of Common Pleas of Franklin County, Ohio, seeking a restraining order against OHSAA's ruling on the grounds that they had been denied due process in the

OHSAA proceeding. Both Milkovich and Scott testified in that proceeding. The court overturned OHSAA's probation and ineligibility orders on due process grounds.

The day after the court rendered its decision, respondent Diadiun's column appeared in the News-Herald, a newspaper which circulates in Lake County, Ohio, and is owned by respondent Lorain Journal Co. The column bore the heading "Maple beat the law with the 'big lie,'" beneath which appeared Diadiun's photograph and the words "TD Says." The carryover page headline announced " ***Diadiun says Maple told a lie." The column contained the following passages:

"' ***a lesson was learned (or relearned) yesterday by the student body of Maple Heights High School, and by anyone who attended the Maple-Mentor wrestling meet of last Feb. 8.

" 'A lesson which, sadly, in view of the events of the past year, is well they learned early.

" 'It is simply this: If you get in a jam, lie your way out.

" 'If you're successful enough, and powerful enough, and can sound sincere enough, you stand an excellent chance of making the lie stand up, regardless of what really happened.

" 'The teachers responsible were mainly Maple wrestling coach, Mike Milkovich, and former superintendent of schools, H. Donald Scott.

***

" 'Anyone who attended the meet, whether he be from Maple Heights, Mentor, or impartial observer, knows in his heart that Milkovich and Scott lied at the hearing after each having given his solemn oath to tell the truth.

" 'But they got away with it.

" 'Is that the kind of lesson we want our young people learning from their high school administrators and coaches?

" 'I think not.'" [C]

***

Superintendent Scott had been pursuing a separate defamation action through the Ohio courts. Two years after its Milkovich decision, in considering Scott's appeal, the Ohio Supreme Court reversed its position on Diadiun's article, concluding that the column was "constitutionally protected opinion." Scott v. News-Herald, 25 Ohio St.3d 243, 254, 496 N.E.2d 699, 709 (1986). Consequently, the court upheld a lower court's grant of summary judgment against Scott.

The Scott court decided that the proper analysis for determining whether utterances are fact or opinion was set forth in the decision of the United States Court of Appeals for the D.C. Circuit in Oilman v. Evans, 242 U.S.App.D.C. 301, 750 F.2d 970 (1984), cert, denied, 471 U.S. 1127,

1037

105 S.Ct. 2662, 86 L.Ed.2d 278 (1985). Under that analysis, four factors are considered to ascertain whether, under the "totality of circumstances," a statement is fact or opinion. These factors are: (1) "the specific language used"; (2) "whether the statement is verifiable"; (3) "the general context of the statement"; and (4) "the broader context in which the statement appeared." [C] The court found that application of the first two factors to the column militated

in favor of deeming the challenged passages actionable assertions of fact. [C] That potential outcome was trumped, however, by the court's consideration of the third and fourth factors. With respect to the third factor, the general context, the court explained that "the large caption 'TD Says' ***would indicate to even the most gullible reader that the article was, in fact, opinion." [C] As for the fourth factor, the "broader context," the court reasoned that because the article appeared on a sports page--"a traditional haven for cajoling, invective, and hyperbole"--the article would probably be construed as opinion. [C]

Subsequently, considering itself bound by the Ohio Supreme Court's decision in Scott, the Ohio Court of Appeals in the instant proceedings affirmed a trial court's grant of summary judgment in favor of respondents, concluding that "it has been decided, as a matter of law, that the article in question was constitutionally protected opinion." Milkovich v. News-Herald, 46 Ohio App.3d 20, at 23, 545 N.E.2d at 1324. The Supreme Court of Ohio dismissed petitioner's ensuing appeal for want of a substantial constitutional question. App. 119. We granted certiorari [c] to consider the important questions raised by the Ohio courts' recognition of a constitutionally-required "opinion" exception to the application of its defamation laws. We now reverse. [Cc]

***As the common law developed in this country, apart from the issue of damages, one usually needed only allege an unprivileged publication of false and defamatory matter to state a cause of action for defamation. See, e.g., Restatement (First) of Torts § 558 (1938); Gertz v. Robert Welch, Inc., supra. The common law generally did not place any additional restrictions on the type of statement that

could be actionable. Indeed, defamatory communications were deemed actionable regardless of whether they were deemed to be statements of fact or opinion. See, e.g., Restatement (First) of Torts, supra, §§ 565-567. As noted in the 1977 Restatement of the Law (Second) of Torts § 566, comment a:

"Under the law of defamation, an expression of opinion could be defamatory if the expression was sufficiently derogatory of another as to cause harm to his reputation, so as to lower him in the estimation of the community or to deter third persons from associating or dealing with him. ***The expression of opinion was also actionable in a suit for defamation, despite the normal requirement that the communication be false as well as defamatory.... This position was maintained even though the truth or falsity of an opinion--as distinguished from a

1038

statement of fact--is not a matter that can be objectively determined and truth is a complete defense to a suit for defamation."

However, due to concerns that unduly burdensome defamation laws could stifle valuable public debate, the privilege of "fair comment" was incorporated into the common law as an affirmative defense to an action for defamation. "The principle of 'fair comment' afford[ed] legal immunity for the honest expression of opinion on matters of legitimate public interest when based upon a true or privileged statement of fact." 1 F. Harper & F. James, Law of Torts § 5.28, p. 456 (1956) (footnote omitted). As this statement implies, comment was generally privileged when it concerned a matter of public concern, was upon true or privileged facts, represented the actual

opinion of the speaker, and was not made solely for the purpose of causing harm. See Restatement [(Second) of] Torts, supra, § 606. "According to the majority rule, the privilege of fair comment applied only to an expression of opinion and not to a false statement of fact, whether it was expressly stated or implied from an expression of opinion." Restatement (Second) of Torts, supra, § 566 comment a. Thus under the common law, the privilege of "fair comment" was the device employed to strike the appropriate balance between the need for vigorous public discourse and the need to redress injury to citizens wrought by invidious or irresponsible speech.

[The court canvassed the authorities incorporating First Amendment safeguards.]

Respondents would have us recognize, in addition to the established safeguards discussed above, still another First Amendment-based protection for defamatory statements which are categorized as "opinion" as opposed to "fact." For this proposition they rely principally on the following dictum from our opinion in Gertz:

"Under the First Amendment there is no such thing as a false idea. However pernicious an opinion may seem, we depend for its correction not on the conscience of judges and juries but on the competition of other ideas. But there is no constitutional value in false statements of fact." [C]

Judge Friendly appropriately observed that this passage "has become the opening salvo in all arguments for protection from defamation actions on the ground of opinion, even though the case did not remotely concern the question." Cianci v. New Times Publishing Co., 639 F.2d 54, 61 (C.A.2 1980). Read in context,

though, the fair meaning of the passage is to equate the word "opinion" in the second sentence with the word "idea" in the first sentence. Under this view, the language was merely a reiteration of Justice Holmes' classic "marketplace of ideas" concept. See Abrams v. United States, 250 U.S. 616, 630, 40 S.Ct. 17, 22, 63 L.Ed. 1173 (1919) (Holmes, J., dissenting) ("[T]he ultimate good desired is better reached by free trade in ideas ***the best test of truth is the power of the thought to get itself accepted in the competition of the market").

1039

Thus we do not think this passage from Gertz was intended to create a wholesale defamation exemption for anything that might be labeled "opinion." [C] Not only would such an interpretation be contrary to the tenor and context of the passage, but it would also ignore the fact that expressions of "opinion" may often imply an assertion of objective fact.

If a speaker says, "In my opinion John Jones is a liar," he implies a knowledge of facts which lead to the conclusion that Jones told an untruth. Even if the speaker states the facts upon which he bases his opinion, if those facts are either incorrect or incomplete, or if his assessment of them is erroneous, the statement may still imply a false assertion of fact. Simply couching such statements in terms of opinion does not dispel these implications; and the statement, "In my opinion Jones is a liar," can cause as much damage to reputation as the statement, "Jones is a liar." As Judge Friendly aptly stated: "[It] would be destructive of the law of libel if a writer could escape liability for accusations of [defamatory conduct] simply by using, explicitly or implicitly, the words 'I think.'" [C] It is worthy of note that

at common law, even the privilege of fair comment did not extend to "a false statement of fact, whether it was expressly stated or implied from an expression of opinion." Restatement (Second) of Torts, supra, § 566 comment a.

Apart from their reliance on the Gertz dictum, respondents do not really contend that a statement such as, "In my opinion John Jones is a liar," should be protected by a separate privilege for "opinion" under the First Amendment. But they do contend that in every defamation case the First Amendment mandates an inquiry into whether a statement is "opinion" or "fact," and that only the latter statements may be actionable. They propose that a number of factors developed by the lower courts (in what we hold was a mistaken reliance on the Gertz dictum) be considered in deciding which is which. But we think the " 'breathing space'" which "'freedoms of expression require in order to survive'" Hepps, supra (quoting New York Times, supra), is adequately secured by existing constitutional doctrine without the creation of an artificial dichotomy between "opinion" and fact.

Foremost, we think Hepps stands for the proposition that a statement on matters of public concern must be provable as false before there can be liability under state defamation law, at least in situations, like the present, where a media defendant is involved. [6] Thus, unlike the statement, "In my opinion Mayor Jones is a liar," the statement, "In my opinion Mayor Jones shows his abysmal ignorance by accepting the teachings of Marx and Lenin," would not be actionable.

* * *

[6] In Hepps the Court reserved judgment on cases involving nonmedia defendants, see 475 U.S., at 779, n. 4, 106 S.Ct., at 1565, n. 4, and accordingly we do the same. Prior to Hepps, of course, where public-official or public-figure plaintiffs were involved, the New York Times rule already required a showing of falsity before liability could result. Id., at 775, 106 S.Ct., at 1563.

1040

Hepps ensures that a statement of opinion relating to matters of public concern which does not contain a provably false factual connotation will receive full constitutional protection. [7]

* * *

[7] We note that the issue of falsity relates to the defamatory facts implied by a statement. For instance, the statement, "I think Jones lied," may be provable as false on two levels. First, that the speaker really did not think Jones had lied but said it anyway, and second that Jones really had not lied. It is, of course, the second level of falsity which would ordinarily serve as the basis for a defamation action, though falsity at the first level may serve to establish malice where that is required for recovery.

Next, the Bresler-Letter Carriers-Falwell line of cases provide protection for statements that cannot "reasonably [be] interpreted as stating actual facts" about an individual. Falwell, 485 U.S., at 50, 108 S.Ct., at 879. This provides assurance that public debate will not suffer for lack of "imaginative expression" or the "rhetorical hyperbole" which has traditionally added much to the discourse of our Nation. [C]

The New York Times-Butts and Gertz culpability requirements further ensure that debate on public issues remains "uninhibited, robust, and wide-open," New York Times, supra. Thus, where a statement of "opinion" on a matter of public concern reasonably implies false and defamatory facts regarding public figures or officials, those individuals must show that such statements were made with knowledge of their false implications or with reckless disregard of their truth. Similarly, where such a statement involves a private figure on a matter of public concern, a plaintiff must show that the false connotations were made with some level of fault as required by Gertz. [Cc] Finally, the enhanced appellate review required by Bose Corp., provides assurance that the foregoing determinations will be made in a manner so as not to "constitute a forbidden intrusion of the field of free expression." Bose, 466 U.S., at 499, 104 S.Ct., at 1959 (quotation omitted).

We are not persuaded that, in addition to these protections, an additional separate constitutional privilege for "opinion" is required to ensure the freedom of expression guaranteed by the First Amendment. The dispositive question in the present case then becomes whether or not a reasonable factfinder could conclude that the statements in the Diadiun column imply an assertion that petitioner Milkovich perjured himself in a judicial proceeding. We think this question must be answered in the affirmative. ***This is not the sort of loose, figurative or hyperbolic language which would negate the impression that the writer was seriously maintaining petitioner committed the crime of perjury. Nor does the general tenor of the article negate this impression.

We also think the connotation that petitioner committed perjury is sufficiently factual to be susceptible of being proved true or false. A determination of whether petitioner lied in this instance can be made on a core of objective evidence by comparing, inter alia, petitioner's testimony before the OHSAA board with his subsequent testimony before the trial court. As the Scott court noted regarding the plaintiff in that case, "[w]hether or not H. Don Scott did indeed perjure himself is certainly verifiable by a perjury action with evidence adduced from the

1041

transcripts and witnesses present at the hearing. Unlike a subjective assertion, the averred defamatory language is an articulation of an objectively verifiable event." 25 Ohio St.3d, at 252, 496 N.E.2d, at 707. So too with petitioner Milkovich. [Cc]

The numerous decisions discussed above establishing First Amendment protection for defendants in defamation actions surely demonstrate the Court's recognition of the Amendment's vital guarantee of free and uninhibited discussion of public issues. But there is also another side to the equation; we have regularly acknowledged the "important social values which underlie the law of defamation," and recognize that "[s]ociety has a pervasive and strong interest in preventing and redressing attacks upon reputation." Rosenblatt v. Baer, 383 U.S. 75, 86 (1966). Justice Stewart in that case put it with his customary clarity:

"The right of a man to the protection of his own reputation from unjustified invasion and wrongful hurt reflects no more than our basic

concept of the essential dignity and worth of every human being--a concept at the root of any decent system of ordered liberty.

***

"The destruction that defamatory falsehood can bring is, to be sure, often beyond the capacity of the law to redeem. Yet, imperfect though it is, an action for damages is the only hope for vindication or redress the law gives to a man whose reputation has been falsely dishonored." [C]

We believe our decision in the present case holds the balance true. The judgment of the Ohio Court of Appeals is reversed and the case remanded for further proceedings not inconsistent with this opinion.

Reversed.

Justice Marshall joined Justice Brennan in dissenting.

NOTES AND QUESTIONS

1. Will the jury play a larger part under the rule in the principal case, than it did when opinion was constitutionally protected? The interpretation of whether the statement was a factual assertion is judged by the reasonable listener or reader. Yetman v. English, 811 P.2d 323 (Ariz.1991) (a politician calling another a "Communist"). It is for the court, and not the jury, to determine as a matter of law whether an alleged defamatory statement is one of fact or opinion. Williams v. Garraghty, 455 S.E.2d 209 (Va.1995). But cf. Greenbelt Cooperative Publg. Assn v. Bresler, 398 U.S. 6 (1970) (use of word "blackmail," reviewing court deciding the word could be understood as "no more than rhetorical hyperbole..."). Knievel v. ESPN, 393 F.3d 1068 (9th Cir. 2005) (holding that a photograph of Knievel with his

arms around his wife and another young woman, with a caption: "Evil Knievel proves that you're never too old to be a pimp" could not, as a matter of law, be interpreted

1042

as stating facts). Is expert evidence admissible on the question how the average person would understand the statement? Weller v. Am. Broad. Co., 283 Cal. Rptr. 644 (Cal. Ct. App. 1991) (evidence of linguistics expert to assist jury in determining how certain rhetorical devises or patterns of speech convey implied meanings). But cf. James v. San Jose Mercury News, Inc., 20 Cal. Rptr.2d 890 (Cal. Ct. App. 1993) (finding plaintiffs representation that he would present at trial testimony of an expert linguist to establish the impact of the defamatory statements on an average reader irrelevant at the summary judgment stage).

2. Will courts be encouraged to engage in close literal interpretation, de-emphasizing the context of the statement? Cf. Immuno AG. v. Moor- Jankowski, 567 N.E.2d 1270 (N.Y. 1991), cert, denied, 500 U.S. 954 (1991), vacated and remanded by the Supreme Court after its decision in the principal case. The New York court held that the letter to the scientific magazine was protected under the principal case but also found under the state constitution, that context played a larger part: "analysis... begins by looking at the content of the whole communication, its tone and apparent purpose." See Wachtel v. Storm, 796 F. Supp. 114 (S.D.N.Y. 1992) for decision focusing on the interpretation of the statement alone. Factual assertions were implied by the statement "outrageous overhead and unrelated business expenses." Context has re-emerged in the case law, at

least in publications where a wide license is necessary to encourage vigorous public debate. In a letter to the editor assertions about the state of a farm were construed as opinion, Rudnick v. McMillan, 31 Cal. Rptr.2d 193 (Cal. Ct. App. 1994). Likewise in book reviews, assertions referable to the text of the book being evaluated are, although factually based, protected commentary. Moldea v. New York Times Co., 22 F.3d 310 (D.C. Cir.), cert, denied, 513 U.S. 875 (1994), wherein plaintiff was accused of "sloppy journalism." In remarkable fashion the Federal Court of Appeals for the District of Columbia admitted a mistake in its earlier ruling in Moldea I, 15 F.3d 1137 (D.C. Cir. 1994). For a criticism of the turnabout, see David A. Logan, Of "Sloppy Journalism," "Corporate Tyranny," and Mea Culpas: The Curious Case of Moldea v. New York Times, 37 Wm. & Mary L. Rev. 161 (1995).

3. "Jones is a contemptable human being". Is this statement a non-factual assertion, which cannot be proved false? What if the utterer of the statement did not in fact have this opinion of Jones but was motivated to destroy him socially? How is this to be distinguished from the Falwell case where Flynt, the publisher, intended to destroy Falwell's character? What of a statement that plaintiff is "a very poor lawyer"? In Sullivan v. Conway, 157 F.3d 1092 (7th Cir. 1998), Judge Posner held this to be an expression of opinion; no "reasonable listener" would take defendant to base the "opinion" on "knowledge of facts of the sort that can be evaluated in a defamation suit." Id. at 4. However, in Armstrong v. Simon & Schuster, Inc., 610 N.Y.S.2d 503 (N.Y. App. Div. 1994), aff'd, 649 N.E.2d 825 (N.Y. 1995), defendants published a book "Den of Thieves" about Michael Milken's financial dealings. Plaintiff, a well-known criminal defense

attorney complained that a passage in the book described plaintiff as presenting a perjurious affidavit for execution.

1043

Referring to the nature of the book, its tone and purpose, the court held that the assertions were of fact and not opinion. Similarly, in Flamm v. Am. Ass'n of Univ. Women, 201 F.3d 144 (2d Cir. 2000) (fact-laden attorney referral directory accusing plaintiff of being "an ambulance chaser" and taking only "slam dunk cases" was actionable; it amounted to a factual assertion that plaintiff engaged in "improper solicitation").

4. The principal case allows an assertion to be actionable where the ex facie opinion refers to underlying facts that are false and defamatory. In Flowers v. Carville, 310 F.3d 1118 (9th Cir. 2002), plaintiff claimed to have been defamed by defendants' characterizing the Sun, which published her story, as "trash" and by defendant's assertion that plaintiff had "doctored" tapes to support her version of an affair with the President. The former was dismissed as generally invective, but the latter implied facts that would impute to plaintiff a nefarious motive. See also LRX, Inc. v. Horizon Assoc. Joint Venture, 842 So. 2d 881 (Fla. Ct. App. 2003), review denied, 859 So. 2d 514 (Fla. 2003) (accusation of unauthorized legal practice, actionable).

5. Restaurant reviews have prompted litigation. Even if review statements could be reasonably regarded as asserting fact, the restaurant is a public figure and thus the plaintiff must show actual malice. Mr. Chow of New York v. Ste. Jour Azur S.A., 759 F.2d 219 (2d Cir. 1985), Terillo v. N.Y. Newsday, 519 N.Y.S.2d 914 (N.Y. Civ.

Ct. 1987) (holding that a misstatement as to the ingredients in a dish, if it was done with actual malice, could be actionable defamation). TripAdvisor listed the plaintiffs resort in Pigeon Forge Tennessee as no.l on its "2011 Dirtiest Hotels" list. Was this an opinion or an assertion of fact? The context and hyperbole militates against finding this an assertion of fact: Seaton v. TripAdvisor LLC., 728 F.3d 592 (6th Cir. 2013).

6. A humorous context will not prevent an interpretation that the statement constituted an assertion of fact. See Unelko v. Rooney, 912 F.2d 1049 (9th Cir. 1990). Andy Rooney on "60 Minutes," in discussing the "junk" he received in the mail, mentioned that the plaintiffs product "Rain-ex," which was designed to shed rain from windshields, "didn't work." The court found this to be an implied assertion of objective fact; unlike the Falwell case it was not couched in base, figurative, or hyperbolic language. Are dry humorists in jeopardy?

7. The principal case in its terms does not apply where a private party publishes material of purely private concern about a non-public figure or official. The state law will apply. Dun and Bradstreet, supra page 1021.

5. Privileges

The common law developed a number of defenses in order to protect the interest of free speech and political and public debate. The defense of fair comment has now been constitutionalized, in the manner just observed. The common law recognized that some speech was essential for the functioning of representative government and the administration of justice and hence gave

precedence to this speech by according it an absolute privilege. In essence the nature of this speech could not be

1044

judicially reviewed. Other speech attracted a qualified or conditional privilege. This speech was not actionable, although defamatory, if it was communicated by the publisher to the recipient where both parties had a reciprocal duty and interest to communicate and receive it. A letter of reference is an example. If the purpose for the communication is outside the purpose of the privilege, the defense is lost. Similarly, if the communication is transmitted to persons who have no duty or interest to receive it, there is no privilege.

Despite the overwhelming bulk of constitutional law, these privileges remain important in defamation law.

(A) Absolute Privilege

NOTES AND QUESTIONS

1. Judicial Privilege. A judge has absolute immunity for defamatory words published in the course of judicial proceedings. An attorney says the plaintiff was not truthful and was "lower than a rattlesnake because a rattlesnake gives warning before it strikes." The trial is broadcast. Privilege attaches to the judge, the attorney and the radio station. The attorney's statement may be false and malicious but will be privileged if relevant and pertinent to the issues in the litigation. See Irwin v. Ashurst, 74 P.2d 1127 (Or. 1938). The privilege covers preliminary actions engaged in by a lawyer in good faith anticipation of litigation, e.g., demand letters, negotiations, and file investigations. Hawkins v. Harris, 661 A.2d 284 (N.J. 1995) (concerning statements

of private investigator to potential witnesses during pretrial discussions).

2. The privilege extends also to witnesses, even though they testify voluntarily, and not under subpoena. It extends to a defamatory statement in a pleading filed in the action, as in Di Blasio v. Kolodner, 197 A.2d 245 (Md. 1964); and also to affidavits filed in a judicial proceeding, or filed for the purpose of reopening it after judgment, as in Fleming v. Adams, 153 N.Y.S.2d 964 (N.Y. Spec. Term 1956). What about pretrial interviews of potential witnesses? Compare Ascherman v. Natanson, 100 Cal. Rptr. 656 (Cal. Ct. App. 1972) (absolute immunity), with Delmonico v. Traynor, 116 So. 3d 1205 (Fla. 2013) (qualified immunity). For privilege attaching to report of pleadings, see supra note 7, page 1009.

3. The privilege applies to the hearing of a sanity commission. Jarman v. Offutt, 80 S.E.2d 248 (N.C. 1954). Compare, for hearings before a grievance committee of the state bar association, Wiener v. Weintraub, 239 N.E.2d 540 (N.Y. 1968); Ramstead v. Morgan, 347 P.2d 594 (Or. 1959). When the proceedings of administrative agencies are found to be judicial in character, the same privilege applies to them. Robertson v. Industrial Insurance Co., 75 So. 2d 198 (Fla. 1954) (revocation of insurance license). University grievance procedures were not to be regarded as quasi-judicial, Overall v. Univ, of Penn., 412 F. 3d 492 (3d Cir. 2005), per Judge Alito at 498.

Once the privilege is found to exist, the only limitation on it is that what is said must be found to have some reasonable bearing upon

or relation to the subject of inquiry. Even the judge cannot seize upon the occasion of a judicial proceeding to voice entirely unrelated defamation. La Porta v. Leonard, 97 A. 251 (N.J. 1916); Stahl v. Kincade, 192 N.E.2d 493 (Ind. App. 1963). Of course, the privilege does not extend to what is said outside of court. Bochetto v. Gibson, 860 A.2d 67 (Pa. 2004) (attorney faxed a copy of the complaint to a freelance reporter); Jacobs v. Adelson, 325 P.3d 1282 (Nev. 2014) (statements made to the media outside judicial proceedings).

But the required "relevance" or "pertinence" does not mean that what is said must come within the rules of evidence as to relevancy: and a great deal of latitude is allowed. Thus when a witness answers a question asked him and not objected to, he is privileged although both the question and the answer are entirely irrelevant to the proceeding. Harman v. Belk, 600 S.E.2d 43 (N.C. Ct. App. 2004) (during deposition for breach of contract litigation, witness discussed rumors that defendant "liked to hurt people, that he broke their knees" and that he "liked to blackmail people"). And if a person speaks under an honest, but mistaken, belief as to what is called for, as when she misunderstands the question, she is privileged. Johnson v. Dover, 143 S.W.2d 1112 (Ark. 1940).

4. The result of the absolute privilege is that there is no civil remedy at all against the witness who gives perjured testimony in court, even though he does so in furtherance of a conspiracy to injure the plaintiff. Ginsburg v. Halpern, 118 A.2d 201 (Pa. 1955). On the other hand, it has been held that the privilege does not protect one not himself involved in the proceeding, who procures the false testimony. Bailey v. McGill, 100 S.E.2d 860 (N.C. 1957).

5. Legislative Proceedings. A similar absolute privilege is applied to members of Congress and of the state legislatures, in the performance of their legislative functions. See U.S. Const, art. I, § 6, cl. 1 (speech and debate clause); Cochran v. Couzens, 42 F.2d 783 (D.C. Cir. 1930).

6. The common law rule was that the defamation, to be privileged, must have some relation to the business of the legislature. Coffin v. Coffin, 4 Mass. (1 Tyng) 1 (1808). Federal and state constitutional provisions have been construed, however, to extend the privilege to anything whatever said in the course of legislative proceedings themselves. Gravel v. United States, 408 U.S. 606 (1972) (holding that privilege extends beyond pure speech and debate when the matter is "an integral part of the deliberative and communicative processes by which members of Congress participate in" proceedings); Kilbourn v. Thompson, 103 U.S. 168 (1880).

7. The Supreme Court in Hutchinson v. Proxmire, 443 U.S. lll (1979), focused on the scope of immunity under the speech and debate clause. Senator Proxmire gave "Golden Fleece of the Month Awards" to highlight what he considered wasteful federal spending. Hutchinson had been given federal grants for research on aggressive behavior in primates, for which the Senator gave a Golden Fleece Award. In a speech on the Senate Floor written by an aide, he demeaned Hutchinson's work. The speech was published in a press release and a summary distributed to Wisconsin constituents.

The Supreme Court held that the Senator was "wholly immune" for his statements on the Senate Floor, but not immune for statements in the press releases and newsletters because they were not "essential to the deliberations of the Senate" and were not "part of the deliberative process." See also Brooks v. Muldoon [1973] 1 NZLR 1 (SC) (statement by Prime Minister to reporters outside Parliament).

8. The privilege extends to the hearings of the legislative body, and to witnesses testifying at such hearings. Kelly v. Daro, 118 P.2d 37 (Cal. Dist. Ct. App. 1941); Logan's Super Markets v. McCalla, 343 S.W.2d 892 (Tenn. 1961). In the last case, it was held that the testimony of the witness was subject to the same rules as to pertinence to the proceeding as in the case of the judicial proceeding immunity.

9. There is disagreement on whether the legislative privilege extends to local legislative bodies, such as city councils. The majority view grants an absolute privilege. See Butler v. Town of Argo, 871 So. 2d 1 (Ala. 2003). But cf. Vultaggio v. Yasko, 572 N.W.2d 450 (Wise. 1998) (conditional privilege to those testifying at city council meetings).

10. In McDonald v. Smith, 472 U.S. 479 (1985), the Court dealt with the right to petition the government under the First Amendment. Those petitioning had no special constitutional status, but rather enjoyed a qualified privilege defeasible by proof of actual malice where, as in the case at hand, plaintiff was a public figure--a candidate for nomination as U.S. Attorney. Letters to the President

and other executive and legislative leaders allegedly defamed plaintiff.

11. Public Officials: Federal. The Supreme Court in Barr v. Matteo, 360 U.S. 564 (1959), decided that the immunity the Court had previously given to executive officers of the Cabinet in Spalding v. Vilas, 161 U.S. 483 (1896) (Postmaster General), from defamation liability while acting as their duties required or inherently permitted, also extended to federal agents of lower standing. Rank is not the determinant, rather it is the scope of the official's duties.

12. If the publication took place within the scope of the federal official's office, or employment, no cause of action in defamation is available against the officer or the United States. A statutory immunity is granted to the official under amendments to the Federal Torts Claims Act (FTCA): Federal Employees Liability Reform and Tort Compensation Act of 1988, Pub.L. 100--694, 102 Stat. 4563. This immunity subsists even though the plaintiff is precluded from suing the United States: United States v. Smith, 499 U.S. 160 (1991) (Federal Employees Liability Reform Act immunized federal government physicians from malpractice liability even when the FTCA precludes recovery against the United States). It follows that no action in defamation is available since the United States has not waived sovereign immunity in respect of defamation (slander and libel). This has led to attempts to frame the action in negligence, thus permitting the action against the United States. Success has been mixed. Quinones v. United States, 492 F.2d 1269 (3d Cir. 1974) (claim of negligent record keeping accepted). Cf. Jimenez-Nieves v. United States, 682 F.2d 1 (1st Cir. 1982)

(refusing to allow claims for injury to plaintiffs reputation when Social Security Administration stopped payment erroneously on plaintiffs benefit check).

13. Public Officers: State. High state officials have an absolute immunity in the discharge of their official duties. Jones v. State, 426 S.W.3d 50 (Tenn. 2013) (Department of Corrections Commissioner); Blair v. Walker, 349 N.E.2d 385 (Ill. 1976). This has been held to include press releases to inform the public of what they are doing. Hackworth v. Larson, 165 N.W.2d 705 (S.D. 1969) (state secretary of state but must not be extraneous to this informational purpose, Hutchinson v. Proxmire, supra).

14. Some state courts have adopted the federal position and extended the absolute privilege to officials of lower rank. See, e.g., Sheridan v. Crisona, 198 N.E.2d 359, 249 N.Y.S.2d 161 (N.Y. 1964) (President of the Borough of Queens accused city appraiser of "ignorance, distortion and incompetence"); Carradine v. State, 511 N.W.2d 733 (Minn. 1994) (absolute immunity for state trooper writing arrest report). Many state courts, however, hold that minor officials are entitled only to a qualified privilege. E.g., Ranous v. Hughes, 141 N.W.2d 251 (Wis. 1966); Gardner v. Hollifield, 533 P.2d 730 (Idaho 1975); Chamberlain v. Mathis, 729 P.2d 905 (Ariz. 1986) (doubting the efficacy of extending absolute immunity to minor officials and recommending an objective malice test for discharging the qualified immunity defense).

(B) Conditional or Qualified Privilege

Sindorf v. Jacron Sales Co., Inc.

Court of Special Appeals of Maryland, 1975.

27 Md.App. 53, 341 A.2d 856.

[Plaintiff Sindorf worked as salesman for Jacron Sales Co., Inc., (the parent company resident in Pennsylvania). He resigned after 18 months, as a result of a dispute over his sales practices. Jacron contended that he was selling to people without adequately checking their credit ratings and apparently held up payment of his commissions until they received payment for the sales. On resigning, Sindorf kept some of his inventory, "as partial payment of the commissions due me." He soon went to work as a salesman for Tool Box Corporation of Maryland.

At the suggestion of Langton, President of Pennsylvania Jacron, a call was made to William Brose, President of Tool Box, by Bob Fridkis, Vice President of Virginia Jacron, a subsidiary of Pennsylvania Jacron, to see whether Sindorf had started working for Tool Box before leaving Jacron. Fridkis and Brose, though competitors, were friends and had had similar conversations about employees before. In a long conversation, Fridkis learned that Sindorf had not gone to work for Tool Box until after his resignation from Jacron. Fridkis told Brose that "a few cash sales and quite a bit of merchandise was not accounted for" by Sindorf, and

suggested that Brose had better "watch your stock real, real carefully on trucks and things." There were other derogatory insinuations.

The trial court held that Fridkis' conversation was conditionally privileged and that no malice was shown. It granted a motion by Jacron for a directed verdict.]

ORTH, Chief Judge. ***The first ***question to be resolved is whether Jacron enjoyed a conditional privilege to defame Sindorf. ***

"In an action for defamation, the plaintiff's prima facie case is made out when he has established a publication to a third person for which the defendant is responsible, the recipient's understanding of the defamatory meaning, and its actionable character. It is then open to the defendant to set up various defenses, which to some extent have moderated the rigors of the law of libel and slander." W. Prosser, Law of Torts, 776 (4th ed., 1971). One of these defenses is privilege. "It rests upon the ***idea, that conduct which otherwise would be actionable is to escape liability because the defendant is acting in furtherance of some interest of social importance, which is entitled to protection even at the expense of uncompensated harm to the plaintiffs reputation. The interest thus favored may be one of the defendant himself, of a third person, or of the general public. If it is one of paramount importance, considerations of policy may require that the defendant's immunity for false statements be absolute, without regard to his purpose or motive, or the reasonableness of his conduct." Id. This is absolute privilege. [C] "If it has relatively less weight from a social point of view, the immunity may be qualified, and conditional upon good motives and reasonable behavior. The defendant's belief in the truth of what he says, the purpose for which he says it, and the manner of publication, all of which are immaterial when no question of privilege is involved, may determine the issue when he enters the defense of such a conditional privilege." Prosser,

at 776-777. In the words of Baron Parke in Toogood v. Spyring, 1 C.M. & R. 181, 149 Eng.Rep. 1044 (1834), a publication is conditionally privileged when it is "fairly made by a person in the discharge of some public or private duty, whether legal or moral, or in the conduct of his own affairs, in matters where his interest is concerned." ***The types of interest which are protected by a qualified privilege are classified by Prosser, [c], as interest of the publisher, interest of others, common interest of publisher and recipient, communications made to one who may act in the public interest, and fair comment on matters of public concern. [C] "The condition attached to all such qualified privileges is that they must be exercised in a reasonable manner and for a proper purpose. The immunity is forfeited if the defendant steps outside of the scope of the privilege, or abuses the occasion. ***[It does not] include publication to any person other than those whose hearing of it is reasonably believed to be necessary or useful for the furtherance of that interest. ***Any reasonable and appropriate method of publication may be adopted which fits the purpose of protecting the particular interest. The dictation of a business letter to a

1049

stenographer ***may be privileged on proper occasion. ***[T]he fact that the communication is incidentally read or overheard by a person to whom there is no privilege to publish it will not result in liability, if the method adopted is a reasonable and appropriate one under the circumstances." Prosser, at 792-794.

The burden is upon the defendant in the first instance to establish the existence of a privileged occasion for the publication, by proof of

a proper interest or duty justifying the utterance of the words. "Whether the occasion was a privileged one, is a question to be determined by the court as an issue of law, unless of course the facts are in dispute, in which case the jury will be instructed as to the proper rules to apply." [C]

The rules of law as to conditional privilege followed in Maryland generally reflect the views of the authorities above discussed. [Cc]

Thus, the law of this State is that a defamatory publication is conditionally privileged when the occasion shows that the communicating party and the recipient have a mutual interest in the subject matter, or some duty with respect thereto. [Cc] Over seventy-five years ago the Court of Appeals established that where an employer gives a character of an employee the communication is conditionally privileged under the principle that the party communicating has a duty owed, even though such duty is not a legal one, but only a moral or social duty of imperfect obligation. This is so even though the defamatory information was given voluntarily rather than upon request. [C] ***The authorities are in general agreement that where a former employer communicates with a new or prospective employer about a former employee, a conditional privilege arises from a discharge of duty owed to the new or prospective employer. ***

The circumstances here ***were that the defamer was the vice-president of the subsidiary of the corporation which was Sindorf's former employer, and that the communicator and recipient, even though competitors, had a close personal and business relationship. Whether based on a duty owed or a common interest, we think that a

qualified privilege arose. In the absence of a dispute as to the facts, the existence vel non of a common interest or duty giving rise to a qualified privilege is a matter of law for the court. [Cc] There was no dispute here as to such facts. We conclude that the trial court did not err in holding as a matter of law that Fridkis, and therefore Jacron, had a conditional privilege to communicate the defamatory utterance to Brose.

The second ***question is whether Jacron lost the privilege to defame. ***

Because a conditional or qualified privilege is conditioned upon publication in a reasonable manner and for a proper purpose, it is defeasible. ***The Court of Appeals said in Orrison v. Vance, 262 Md. at 295, 277 A.2d at 578: ***"In determining an abuse of privilege all relevant circumstances are admissible, [c] including the defendant's

1050

reasonable belief in the truth of his statements, [c] the excessive nature of the language used, [c] whether the disclosures were unsolicited, id., and whether the communication was made in a proper manner and only to proper parties [c]." [7]

* * *

[7] "Prosser said that the qualified privilege will be lost if the defendant publishes the defamation 'in the wrong state of mind.' At 794. He thought that the statement that the privilege is defeated if the publication is 'malicious' is misleading and discounted malice in this context as a 'meaningless and quite unsatisfactory term.' At 795. He

concluded, at 796: 'Probably the best statement of the rule is that the defendant is required to act as a reasonable man under the circumstances, with due regard to the strength of his belief, the grounds that he has to support it, and the importance of conveying the information.'"

"Malice may be a jury question." [C] It is a jury question unless only one conclusion can be drawn from the evidence. Prosser, at 796. In other words, it is only when the evidence and all inferences fairly deducible therefrom lead to conclusions from which reasonable minds could not differ, that the issue of malice is one of law for the court and not one of fact for the jury. ***

The motion for a directed verdict was primarily based on the theory that there was no sufficient showing by Sindorf of malice within the meaning of that word as defeating a conditional privilege. It appears that the grant of the motion was substantially bottomed on that reason. We think that the grant of the motion was wrong. We believe that the evidence, when viewed as required by the rule pertaining to the grant vel non of a directed verdict, led to conclusions from which reasonable minds could differ. We start with the rule that the publisher's motive will be more carefully scrutinized if his statements are volunteered than if they are in response to an inquiry, in which latter instance, greater latitude is permitted. We observe that Fridkis clearly indicated that Sindorf had been fired, whereas, as far as the record shows, he resigned. It does not appear that Langton told Fridkis that Sindorf was fired, and if Fridkis did not in fact know that Sindorf was not fired, stating that he was fired could be found to be a reckless disregard of truth. ***

We observe that the publisher will be liable if he publishes his statement to accomplish a distinct objective, which may be legitimate enough in itself but is not within the privilege. [C] We think that a reasonable person could conclude from the evidence that Fridkis's communication to Brose was an effort to pressure Sindorf into returning the material he was holding, or, perhaps, simply to ascertain, as Langton requested, the date of employment of Sindorf by Tool Box. Neither would be within the privilege. The short of it is that we cannot find, assuming the truth of all credible evidence on the issue of malice and of all inferences fairly deducible therefrom, and considering them in the light most favorable to Sindorf, that they lead to the conclusions, from which reasonable minds could not differ, that Fridkis, and through him, Jacron, did not abuse the privilege to defame by excessive publication or by use of the occasion for an improper purpose, or by lack of grounds for belief in the truth of what was said. Therefore, the question of malice was

1051

properly for the jury and the trial judge erred in granting the motion for a directed verdict. The issue of malice should have gone to the jury with appropriate instructions. We reverse the judgment and remand the case for a new trial. ***

NOTES AND QUESTIONS

1. Protection of Publisher's Own Interests. A person has a qualified privilege to make defamatory statements in a reasonable effort to recover goods stolen from him; to collect money due him or prevent others from collecting it; to protest against the mismanagement of a concern in which he has a financial interest; to protect his own

business against unfair competition; to protect his own personal safety; or to defend any other legitimate interest. See, e.g., Montgomery Ward & Co. v. Watson, 55 F.2d 184 (4th Cir. 1932) (employer accuses one employee, before others, of stealing from him); Gardner v. Standard Oil Co., 175 So. 203 (Miss. 1937) (employer warns employees that plaintiff is of bad character and they are not to deal with him). Park v. Hill, 380 F. Supp.2d 1002 (N.D. Iowa 2005) (in a letter to other bank shareholders, unsuccessful bidder for control of bank made statements about bank president; protecting his own financial interest and a common interest with other shareholders), Denardo v. Bax, 147 P.3d 672 (Alaska 2006) (defendant told coworkers that she believes plaintiff fellow coworker was stalking her).

2. Included in the privilege of protecting the defendant's own interest is the protection of his reputation against defamation on the part of others. The privilege is not limited merely to publication of the statement that the plaintiff is an unmitigated liar and the truth is not in him. The defendant may go further and attack the plaintiffs motives, to explain the defamation. Foretich v. Capital Cities/ABC, Inc., 37 F.3d 1541 (4th Cir. 1994) (when plaintiff accused defendant in-laws of molesting their grandchild, defendants' statements that plaintiff was "sick" and that her comments came "from the bottom of a cesspool" were a proportionate response). On the other hand, the privilege does not extend to an irrelevant matter, as, for example, a statement that the plaintiff beats his wife. Cf. Sternberg Mfg. Co. v. Miller, DuBrul & Peters Mfg. Co., 170 Fed. 298 (8th Cir. 1909).

3. Protection of Interests of a Third Person. The third person is usually the recipient of the communication but need not be. The

privilege exists when the publisher reasonably believes that there is information that affects a sufficiently important interest of the third party and that he publishes the information under a legal duty or in accordance with "generally accepted standards of decent conduct." Restatement (Second) of Torts § 595 (1977). Thus, there is a privilege to answer the inquiry of a prospective employer of the plaintiff concerning his character or fitness for the position. Kevorkian v. Glass, 913 A.2d 1043 (R.I. 2007); Child v. Affleck, (1839) 109 Eng. Rep. 150 (K.B.); 9 B. & C. 403 (Eng.). And a bank is privileged to answer an inquiry about the plaintiff's credit from one who has been asked to sell him goods. Melcher v. Beeler, 110 P. 181 (Colo. 1910).

4. In determining whether the privilege should be granted, weight is given to the question of whether the information was requested by the recipient or was volunteered. Thus, volunteered statements were held not privileged in such cases as Watt v. Longsdon, (1930) 1 K.B. 130 (Eng.), and Burton v. Mattson, 166 P. 979 (Utah 1917), involving personal gossip. But there are occasions when it is appropriate to volunteer the information. De Van Rose v. Tholborn, 134 S.W. 1093 (Mo. 1911) (landlord informed that his tenant was undesirable).

5. Common Interest. The existence of a common interest between the publisher and the recipient gives rise to a privilege to speak regarding the common interest. Here there is more freedom to volunteer information. See Restatement (Second) of Torts § 596 (1977). Representative cases include Bereman v. Power Pub. Co., 27 P.2d 749 (Colo. 1933) (labor union); Slocinski v. Radwan, 144 A. 787 (N.H. 1929) (church members); Smith Bros. & Co. v. W.C. Agee

& Co., 59 So. 647 (Ala. 1912) (common creditors). O'Connor v. Burningham, 165 P.3d 1214 (Utah 2007) (familial privilege when parents criticized the behavior of their daughters' basketball coach to the school board). A family relationship is given similar treatment. See Restatement (Second) of Torts § 597 (1977); Kroger Co. v. Young, 172 S.E.2d 720 (Va. 1970); Watt v. Longsdon, 1 K.B. 130 (Eng.); Gohari v. Darvish, 767 A.2d 321 (Md. 2001) (franchisor and franchisee discussing qualifications of potential new franchisee).

6. Recall that under Gertz liability could not attach to the defendant unless the plaintiff proved that the defendant was "at fault." If the plaintiff discharges her burden of proving that the defendant was negligent in the publication, can defendant, nevertheless, raise the defense of qualified privilege? In other words, does negligence under Gertz subsume malice in discharging the defense of conditional or qualified privilege? The issue arose on appeal from the preceding, Jacron Sales Co., Inc. v. Sindorf, 350 A.2d 688 (Md. 1976), finding that the malice standard was stricter than negligence (under Gertz'). It requires at least a "reckless disregard for the truth." The Virginia Supreme Court in Gazette, Inc. v. Harris, 325 S.E.2d 713 (Va. 1985), in adopting the Gertz negligence standard, maintained the defense of conditional or qualified immunity. (Id. at 727).

7. Courts all agree that the defendant cannot claim a qualified privilege if he knows that his defamatory statement is false or does not believe it to be true. Lawless v. Muller, 123 A. 104 (N.J.L. 1923); Russell v. Geis, 59 Cal. Rptr. 569 (Cal. Ct. App. 1967).

Prior to the Gertz revolution, a majority of American courts held that malice was evaluated by an objective criterion--did defendant have

reasonable grounds for believing his statement to be true. A sizeable minority followed the English rules adopting the subjective criterion--defendant does not lose his privilege if he acted in good faith and not in reckless disregard as to the falsity of the statement. A.B.C. Needlecraft v. Dun & Bradstreet, 245 F.2d 775 (2d Cir. 1957). Because the requirements of Gertz would make the defense useless under the majority/objective criterion, the Restatement (Second) of Torts has adopted reckless-disregard as to the test for determining whether the privilege is lost. See § 600 and the Special

Note preceding § 593. This position has been adopted in numerous cases. See Luster v. Retail Credit Co., 575 F.2d 609 (8th Cir. 1978); British Am. & E. Co. v. Wirth Ltd., 592 F.2d 75 (2d Cir. 1979); Moore v. Smith, 578 P.2d 26 (Wash. 1978). The attitude to malice as defeating privilege resulted from Gertz, but the Restatement does not adequately reflect the exception made by Dun & Bradstreet v. Greenmoss, supra page 1021. Where matters of purely private concern are involved, the common law rules stand and no fault is necessary to be proved. This can be a matter of real practical moment.

8. The common law doctrine of "qualified privilege," in various forms, has been extended to protect free speech in other common law countries. Australia: Lange v. Australian Broad. Corp. (1997) 189 CLR 520; Bashford v. Info. Austl. (Newsletter) Pty. Ltd. (2004) 218 CLR 366 (articulating how the defense of qualified privilege is applied). New Zealand: Lange v. Atkinson [1997] 2 NZLR 22 (HC), reconfirmed by [1998] 3 NZLR 424 (CA). England: Reynolds v.

Times Newspapers, Ltd., (2001) 2 A.C. 127 (H.L.); Jameel v. Wall Street Journal. Eur. SPRL (No. 3), [2007] 1 A.C. 359 (H.L.) (stressing the "liberalizing intention" of Reynolds and flexibility accorded to responsible journalism).

9. This necessarily means that "courts will find it desirable to reassess the circumstances under which it is appropriate to grant a conditional privilege. If a proper adjustment of the conflicting interests of the parties indicates that a publisher should be held liable for failure to use due care to determine the truth of the communication before publishing it, a conditional privilege is not needed and should not be held to apply." Restatement Second) of Torts § 593, comment c (1977). For application of this viewpoint to a privilege for credit-rating agencies, see § 595, comment h. If a plaintiff, as a public official, is already subject to the New York Times standard, a conditional privilege can have no significance and is not held to exist. Wright v. Haas, 586 P.2d 1093 (Oki. 1978).

Can you envisage situations where a person unreasonably believing a statement to be true is justified in reporting it to others?

10. At common law there were two types of privileges that were unlike the others in that they did not depend upon the measure of fault on the part of the defendant regarding falsity of the defamatory communication. A defendant might successfully rely on the privilege even though he was aware of the fact that the statement was false. Instead the privilege was controlled by other restrictions. These are:

A. Fair Reporting. This privilege is to report public proceedings, public records and official acts. The restriction is that the report must

be accurate and fair or disinterested. This has been treated supra, pages 1008-1010.

B. Privilege to Provide Means of Publication. When the author of the defamatory utterance is in fact privileged to publish it, those who provide him with the appropriate means of publication are likewise privileged to do so. Otherwise, of course, he would have great difficulty in making his communication. Thus if the author is privileged to publish his statement in a newspaper, the newspaper itself can be no less privileged; and the same is true of a stenographer taking dictation. See Israel v. Portland News Publg.

Co., 53 P.2d 529 (Or. 1936); Western Union Tel. Co. v. Lesesne, 182 F.2d 135 (4th Cir. 1950); Restatement (Second) of Torts § 612 (1977).

C. Fair Comment. The media relied heavily upon this privilege prior to the imposition of constitutional limits on the tort. It allowed the publisher to offer criticism on matters of public concern including activities of public officials and figures and on subjects scientific, artistic, literary, and dramatic. The "freer the criticism is, the better it will be for the aesthetic welfare of the public." Lyon v. Daily Telegraph, [1943] K.B. 746 at 752 (Scott L.J.). The criticism must be comment or opinion, not a misstatement of fact. It must be fair in that it must be based upon true facts and express, within wide bounds, what an honest-minded person might conclude. Neely v. Wilson, 418 S.W.3d 52 (Tex. 2013) (asking whether "the gist of the broadcast was substantially true"). The opinion, however, need not be reasonable. The privilege might be abused and lost if the criticism

did not represent the actual opinion of the critic, or if it were made solely for the purpose of causing harm to the person criticized. See generally the Restatement (First) of Torts §§ 606-610 (1938). The holding in Milkovich, supra, may revivify the common law fair comment jurisprudence as constrained by the First Amendment. Thus, the defense of fair comment applies where a private person is defamed by broadcasts. Magnusson v. N.Y. Times, 98 P.3d 1070 (Oki. 2004) (applying Oklahoma law).

6. Defamation Goes Global

In the well-known Australian High Court, Dow Jones & Co. Inc. v. Gutnick (2002) 210 CLR 575 (Austl.), an Australian businessman, Joseph Gutnick, sued an American magazine and publishing company in the Australian state of Victoria over an allegedly defamatory online article. Only five copies of the print edition were sent from New Jersey to be circulated in Australia, however, none had actually arrived in the jurisdiction. To establish an actionable tort in the jurisdiction, Gutnick resorted to the Internet based publication (the Internet version of the magazine had 550,000 international subscribers and 1,700 Australian-based credit cards). The law of Victoria applied as the place of publication; under Australian law, each download of the article in Victoria was a publication in that jurisdiction. Dow Jones' pleas of impracticality and free speech restriction were considered but rejected by the High Court. Justice Kirby lamented that the common law was bound by "judicial remarks in England in a case decided more than a hundred fifty years ago involving... a newspaper of miniscule circulation." (citing Duke of Brunswick v. Harmer, (1849) 117 E.R. 75; 14 Q.B. 185 (Eng.)).

The assumption of jurisdiction by English courts has been criticized as "libel tourism," where actions are brought in English courts by aggrieved persons against publishers who have been protected in the United States under the principles of N.Y. Times v. Sullivan. Of particular note is litigation brought by Sheikh Khalid Salim A bin Mahfouz, who sued in England complaining he had been defamed in Rachel Ehrenfeld's book "Funding Evil: How Terrorism is Financed--and

How to Stop It." The English High Court gave a default judgment in favor of the plaintiff. Concern rising to a political storm of political protest, about the implications of "libel tourism," prompted some legislatures, in particular, the U.S. Congress, to introduce legislation designed to protect Americans' First Amendment rights. David Anderson, Transnational Libel, 53 Va. J. Int'l L. 71 (2012). In 2010, Congress passed, unanimously (both in the House and the Senate), the Securing the Protection of our Enduring and Established Constitutional Heritage (SPEECH) Act, which makes foreign libel judgments unenforceable in U.S. courts, unless either the legislation applied offers at least as much protection as the U.S. First Amendment (concerning free speech), or the defendant would have been found liable even if the case had been heard under U.S. law. However, in practice, this legislation goes far beyond legitimate instances of "libel tourism," and makes recognition of any foreign defamation judgment virtually impossible. Still, this debate is nothing new and well exposes the differing balances of free speech, reputation, and individual dignity supporting different versions of defamation law. See Eric Barendt, Jurisdiction in Internet Libel

Cases, 110 Penn. St. L. Rev. 727 (2006); David F. Partlett, The Libel Tourist and the Ugly American: Free Speech in an Era of Modern Global Communications, 47 U. Louisville L. Rev. 635 (2009); David F. Partlett & Barbara McDonald, International Publications and Protection of Reputation: A Margin of Appreciation but not Subservience?, 62 Ala. L. Rev. 477 (2011); Mark D. Rosen, Exporting the Constitution, 53 Emory L.J. 171 (2004).

In 2014, the Defamation Act of 2013, c. 26, took effect in the United Kingdom. The legislation, aimed at reforming the United Kingdom's status as a libel tourism destination, raised the threshold for complaints to defamation that caused serious harm to the plaintiffs reputation, including a requirement of actual or likely serious financial loss for corporate entities and a tighter forum non conveniens threshold. For a comparison of the provisions of the Defamation Act with the United States Supreme Court's approach to defamation, see Lord Lester, Two Cheers for the First Amendment, 8 Harv. L. & Pol'y Rev. 177 (2014).

Trout Point Lodge v. Handshoe

United States Court of Appeals, Fifth Circuit, 2014.

729 F.3d 481.

ELROD, Circuit Judge. This case requires us to construe the newly-enacted Securing the Protection of our Enduring and Established Constitutional Heritage Act (the "SPEECH Act"), 28 U.S.C. § 4102. Appellants Trout Point Lodge, Ltd. ("Trout Point Lodge"), Vaughn Perret ("Perret"), and Charles Leary ("Leary") (collectively, "Trout Point") seek to enforce a defamation-based default judgment that

they obtained against Appellee Doug K. Handshoe ("Handshoe") in Nova Scotia, Canada. We agree with the district court that Trout Point cannot satisfy its burden under the SPEECH Act to show that either (A) Nova Scotian

1056

law provided at least as much protection for freedom of speech and press in Handshoe's case as would be provided by the First Amendment and relevant state law, or (B) Handshoe would have been found liable for defamation by a Mississippi court. 28 U.S.C. § 4102. Accordingly, we AFFIRM.

I.

Handshoe, a Mississippi citizen, owns and operates Slabbed.org, a public-affairs blog with the tagline "Alternative New Media for the Gulf South." He describes Slabbed.org as a "forum for local residents and other interested parties to gather and share information regarding various political and legal issues that impact the Gulf Coast."

One of the blog's focal points over the last few years has been Aaron Broussard, the former Parish President of Jefferson Parish, Louisiana. Broussard was indicted in the United States District Court for the Eastern District of Louisiana and pleaded guilty to charges of bribery and theft in September 2012. Handshoe claims that Slabbed.org has been "instrumental" in reporting the "ongoing corruption scandal, indictment, and guilty plea" involving Broussard.

During his time in office, Broussard owned property in Nova Scotia. The property sat on Trout Point Road, very close to Trout Point

Lodge, a hotel that Perret and Leary own and operate. In about January 2010, Handshoe began publishing entries on Slabbed.org alleging a link between Broussard and Trout Point Lodge, Perret, and Leary. At or near the same time, the Times-Picayune, a New Orleans newspaper, published an article indicating that Broussard had an ownership interest in Trout Point Lodge and that Jefferson Parish contractors had paid to rent the premises. The Times-Picayune retracted this assertion and issued a correction after Perret and Leary alerted the paper to purported "factual errors in [its] reporting." It appears that the corporate parent of the Times-Picayune also took the Slabbed.org blog offline after Perret and Leary demanded this retraction. The district court determined that Handshoe, "apparently in reaction to his blog being taken offline," found another web host for his site and "began an internet campaign to damage Perret and Leary." Specifically, Handshoe posted several updates regarding Trout Point Lodge, Perret, and Leary, which the district court noted "can be characterized as derogatory, mean spirited, sexist, and homophobic."

Trout Point filed suit in the Supreme Court of Nova Scotia (the "Nova Scotia Court") on September 1, 2011, alleging defamation and related claims. Trout Point's First Amended Statement of Claim referred to publications on Slabbed.org and related third-party web sites, which it asserted "were directly defamatory and were also defamatory by both true and false innuendo in that they would tend to lower the opinion or estimation of the plaintiffs in the eyes of others who read the defamatory publications as a series, or alternatively, in parts." At the outset, the First Amended Statement of Claim asserted four primary sources of

reputational harm: (1) content linking Trout Point with the "Jefferson Parish Political Corruption Scandal," the "sting" of which was that "Trout Point Lodge and its owners were somehow involved in corruption, fraud, money laundering, and 'pay to play' schemes involving Jefferson Parish President Aaron Broussard and his administration"; (2) the "clear imputation" that Trout Point "misled investors and court officials in litigation" with the Atlantic Canada Opportunities Agency ("ACOA"), the "sting" of which was that "Leary perjured himself, investors were misled, businesses nefariously changed ownership, and that the ACOA litigation is ongoing, with the plaintiffs [losing] every step of the way"; (3) the "imputation" that the "Trout Point Lodge business is actively failing, near bankruptcy, having once relied on the good graces of Aaron Broussard," along with the "related imputation" that Perret and Leary "have had a series of failed businesses that used other people's money, creating a pattern," the "sting" of which was that Trout Points's "13-year- old business is on the verge of bankruptcy, that the plaintiffs will take the money and run, and that the plaintiffs are either con artists or have no business acumen whatsoever"; and (4) the "unabashed anti-gay, anti-homosexual rhetoric and rants of the defendant," used to "amplify and support the three other stings listed above" and "support[ ] and shore[ ] up all the other defamatory imputations."

The First Amended Statement of Claim continued to describe several specific blog posts on Slabbed.org, reciting much of the offensive language that Handshoe used to refer to Perret and Leary. Some of the alleged defamatory statements indicated Handshoe's poor opinion of Perret and Leary, for example, that they "had

Champagne taste on a beer budget," "work as a unit to grift their way through life," and were either "first-class b-tches, common thugs, or plain ol' morons."

In stating its defamation claim, Trout Point generically alleged that Handshoe's publications were false and malicious. It did not, however, make any specific statements to refute the truth of the individual blog posts at issue. ***

Trout Point purportedly served Handshoe with a notice of the First Amended Statement of Claim in Mississippi, but Handshoe did not appear in the Nova Scotia action. In December 2011, the Nova Scotia Court entered a default judgment against Handshoe (the "Nova Scotia Judgment"). ***

The Nova Scotia Court set the matter for a hearing to assess damages. At the hearing, Perret and Leary testified and offered additional evidence regarding Handshoe's allegedly defamatory statements and the damage that they inflicted on Trout Point Lodge, and Perret and Leary individually. ***Ultimately, the court awarded Trout Point Lodge $75,000 in general damages, and Leary and Perret each $100,000 in general damages, $50,000 in aggravated damages, and $25,000 in punitive damages. It also awarded $2,000 in costs.

1058

Trout Point enrolled the Nova Scotia Judgment in the Circuit Court of Hancock County, Mississippi, in March 2012 in an attempt to collect its damages award. Handshoe removed the action to the United States District Court for the Southern District of Mississippi pursuant to the SPEECH Act. ***

The district court entered summary judgment in Handshoe's favor, finding that Trout Point failed to meet its burden under the SPEECH Act to show that "Handshoe was afforded at least as much protection for freedom of speech in [the Nova Scotia] action as he would have in a domestic proceeding or, alternatively, that Handshoe would have been found liable for defamation by a domestic court." Trout Point timely appealed.

II.

***

III.

This action depends on our interpretation of the SPEECH Act. The task of statutory interpretation begins and, if possible, ends with the language of the statute. ***

Many commentators have explained that Congress enacted the SPEECH Act in 2010 in response to the perceived threat of "libel tourism," a form of international forum-shopping in which a plaintiff chooses to file a defamation claim in a foreign jurisdiction with more favorable substantive law. In enacting the statute, Congress found that "by seeking out foreign jurisdictions that do not provide the full extent of free-speech protections to authors and publishers that are available in the United States" and by suing United States authors or publishers in those foreign jurisdictions, some persons were "obstructing" the free expression rights of domestic authors and publishers and "chilling" domestic citizens' First Amendment interest in "receiving information on matters of importance." ***It further found that "[g]overnments and courts of foreign countries scattered around the world have failed to curtail this practice... and foreign libel

judgments inconsistent with United States [F]irst [A]mendment protections are increasingly common." Id.

With these findings in mind, the SPEECH Act provides that a domestic court "shall not recognize or enforce a foreign judgment for defamation" unless it satisfies both First Amendment and due process considerations. See 28 U.S.C. § 4102. We focus our inquiry on the statute's "First Amendment considerations" provision.

Under the "First Amendment considerations" provision of the SPEECH Act, a foreign defamation judgment is unrecognizable and unenforceable unless

(A) the defamation law applied in the foreign court's adjudication provided at least as much protection for freedom of speech and press in

1059

that case as would be provided by the [F]irst [A]mendment to the Constitution of the United States and by the constitution and law of the State in which the domestic court is located; or

(B) even if the defamation law applied in the foreign court's adjudication did not provide as much protection for freedom of speech and press as the [F]irst [A]mendment to the Constitution of the United States and the constitution and law of the State, the party opposing recognition or enforcement of that foreign judgment would have been found liable for defamation by a domestic court applying the [F]irst [A]mendment to the Constitution of the United States and the constitution and law of the State in which the domestic court is located.

§ 4102(a)(1).

Although there is no case law directly interpreting these two prongs, the plain language of the statute suggests two distinct options for a party seeking to enforce a foreign defamation judgment: one focused on the law applied by the foreign forum and one focused on the facts the parties presented in the foreign proceeding. Put differently, a party may enforce a foreign defamation judgment in a domestic court if either (A) the law of the foreign forum, as applied in the foreign proceeding, provides free- speech protection that is coextensive with relevant domestic law, or (B) the facts, as proven in the foreign proceeding, are sufficient to establish a defamation claim under domestic law. We address each prong in turn.

A.

There is no meaningful dispute that the law applied by the Nova Scotia Court provides less protection of speech and press than First Amendment and Mississippi law. Canadian defamation law is derivative of the defamation law of the United Kingdom, which has long been substantially less protective of free speech. As Justice Black noted in Bridges v. California:

No purpose in ratifying the Bill of Rights was clearer than that of securing for the people of the United States much greater freedom of religion, expression, assembly, and petition than the people of Great Britain had ever enjoyed.... Ratified as it was while the memory of many oppressive English restrictions on the enumerated liberties was still fresh, the First Amendment cannot reasonably be taken as approving prevalent English practices. On the contrary, the only conclusion supported by history is that the unqualified prohibitions

laid down by the framers were intended to give to liberty of the press, as to the other liberties, the broadest scope that could be countenanced in an orderly society.

***Thus, while Canadian law generally comports with England's traditional common-law approach, the United States has parted ways with its northern neighbor in matters of free speech.

The most critical legal difference here is that a Canadian plaintiff--unlike a plaintiff subject to First Amendment and Mississippi state law--need

1060

not prove falsity as an element of its prima facie defamation claim. Rather, in Canada, truth is a defense that a defamation defendant may raise and, if so, must prove. ***The balance in favor of free speech is restored by a number of defenses, but the burden of proof rests on the defendant. In comparison,... American laws both seem to show a certain bias towards freedom of expression and freedom of the press; the burden of proof of the wrongful nature of the injury to reputation lies in both cases with the person defamed." (footnote omitted)). Thus, Trout Point cannot satisfy the first prong of the First-Amendment considerations inquiry; that is, the law applied in the Nova Scotia proceeding did not provide at least as much protection for freedom of speech and press as Handshoe would have received under domestic law.

B.

The more challenging question in this case arises from the statute's second prong: whether a Mississippi court presented with the same

facts and circumstances would have found Handshoe liable for defamation. The answer depends on whether the facts Trout Point proved in the Nova Scotia proceeding were sufficient to demonstrate falsity under the United States Constitution and Mississippi state law. In Mississippi, "[t]he threshold question in a defamation suit is whether the published statements are false. Truth is a complete defense to an action for libel. The plaintiff bears the burden to prove such falsity." Armistead v. Minor, 815 So.2d 1189, 1194 (Miss.2002) (quotations and citations omitted). Significantly, statements that are "substantially true" are not defamatory in Mississippi. Id. "As the United States Supreme Court has noted, minor inaccuracies do not amount to falsity so long as the substance, the gist, the sting, of the libelous charge be justified." Id. (internal quotation marks omitted) (quoting Masson v. New Yorker Magazine, Inc., 501 U.S. 496.)

Applying First Amendment and Mississippi law, the district court concluded that Trout Point failed to prove falsity in the Nova Scotia proceeding:

***

On appeal, Trout Point criticizes the district court's reasoning because it "hinges entirely upon the faulty premise that [Trout Point] failed to prove the falsity of the publications at issue." Trout Point relies on two key sources to establish the falsity of Handshoe's statements: (1) the allegations in Trout Point's First Amended Statement of Claim, deemed admitted by the Nova Scotia Judgment, and (2) the Nova Scotia Court's purported factual findings made in the course of awarding damages. In our view, neither is sufficient to establish that a Mississippi court confronted with the same facts and

circumstances would have found Handshoe liable for defamation. We turn first to the allegations deemed admitted by Nova Scotia Judgment.

1061

1.

In Mississippi, a plaintiff may obtain a default judgment when the defendant "has failed to plead or otherwise defend" the case. Miss. R. Civ. P. 55(a); see also Fed.R.Civ.P. 55(a). But a default judgment is not appropriate if the plaintiff's allegations are insufficient to state a claim. ***

***

Applying these principles here, Trout Point failed to show that a state or federal court in Mississippi faced with the First Amended Statement of Claim would have awarded a default judgment in its favor. Although Handshoe's failure to answer or otherwise defend the case satisfies the basic prerequisite for default, the allegations in the First Amended Statement of Claim--particularly those regarding the falsity of Handshoe's statements--are not particularly well-pleaded for at least three reasons.

First, the First Amended Statement of Claim is unclear regarding whether all, or just some, of Handshoe's statements are false. At the outset, it indicates that Handshoe's statements were "defamatory by both true and false innuendo." (emphasis added). In explaining the particular statements at issue, the First Amended Statement of Claim repeatedly emphasizes that the statements were "defamatory," in that they would tend to lower one's opinion of Trout Point. But it

specifically alleges falsity with respect to only a limited few of the statements, and offers no facts to rebut or undermine most of Handshoe's statements. Although Trout Point includes some generic allegations of falsity towards the end of its defamation claim--***this catch-all language offers little guidance regarding whether some or all of the statements are allegedly false, especially in light of the First Amended Statement of Claim's earlier reference to "true innuendo" as a source of harm.

For this reason, Trout Point cannot show that a state or federal court in Mississippi would grant a default judgment based on the First Amended Statement of Claim. Indeed, a Mississippi court has affirmed dismissal where a complaint failed to specify which of a series of statements constituted slander. ***Similarly, here, a Mississippi court could deny a default judgment because the First Amended Statement of Claim does not clearly and specifically allege that each of the relevant statements is false.

Second, some of the publications at issue are statements of unverifiable opinion. For example, Trout Point based its defamation claim, in part, on the allegation that Handshoe used "unabashed anti- gay, anti-homosexual rhetoric and rants of the defendants" intended to "engender[ ] discrimination and hatred." The First Amended Statement of Claim complains that Handshoe referred to Perret and Leary as " 'girls,' 'blow buddies,' 'queer f-g scum,' and 'b-tches,' published more than one reference to a gay-themed movie, and posted video clips of

movies and music videos commonly associated with gay stereotypes." While less grotesque, many of the other statements at issue also involve expressions of opinion; for example, that Trout Point had "Champagne taste on a beer budget," that Perret and Leary were a "litigious bunch," and that the Nova Scotia action was "foolish and frivolous."

Though offensive, these statements generally are not actionable in Mississippi. The Mississippi Supreme Court has recognized that "name calling and verbal abuse are to be taken as statements of opinion, not fact, and therefore will not give rise to an action for libel." ***Here, although some of Handshoe's opinions certainly imply facts (e.g., that Trout Point was involved in the Aaron Broussard scandal), his bare "linguistic slings and arrows" do not. Indeed, counsel for Trout Point conceded at oral argument that Handshoe's offensive insults and opinion statements would not be actionable in Mississippi. Thus, Trout Point cannot show that a state or federal court in Mississippi would grant a default judgment on these opinion-based allegations.

Finally, a state or federal court in Mississippi could view some of the allegations in the First Amended Statement of Claim as legal conclusions, as opposed to well-pleaded facts.

***Given the legal significance attached to the word "falsity," Mississippi law requires Trout Point to do more than merely cry "false" to prove its claim. Therefore, even deemed admitted, the allegations likely would have been insufficient--without subsequent evidence, analysis, and fact-finding--to satisfy Trout Point's burden in a Mississippi court.

For these three reasons, Trout Point failed to show that the allegations in the First Amended Statement of Claim, standing alone and taken as true, would be sufficient to support a defamation claim in a Mississippi court. Trout Point asserts a second ground to establish falsity, however: the Nova Scotia Court's purported factual findings that Handshoe's statements were false and malicious. We turn next to that issue.

2.

As a threshold matter, the plain language of the SPEECH Act suggests that the purported "factual findings" of the Nova Scotia Court are irrelevant to the enforceability inquiry. The critical question is not whether the Nova Scotia Court found falsity, but rather whether a state or federal court in Mississippi faced with the allegations in the First Amended Statement of Claim would have done so. See § 4102(a)(1)(B) (requiring the party seeking to enforce the foreign defamation judgment to establish that the defendant "would have been found liable for defamation by a domestic court applying the [F]irst [A]mendment to the Constitution of the United States and the constitution and law of the State in which the domestic court is located"). Moreover, the Nova Scotia

Court issued its factual findings at a damages hearing that occurred after it had already granted default judgment in favor of Trout Point.

But even assuming, arguendo, that the Nova Scotia Court's factual findings have some bearing on the enforceability inquiry, they are insufficient to demonstrate falsity. As the district court summarized, the Nova Scotia Court's oral decision "does not contain specific

findings of fact with respect to the falsity of Handshoe's statements." Indeed, despite repeated entreaties at oral argument, Trout Point could not identify a single specific allegation in the Statement of Claim that the Nova Scotia Court found was actually false. Rather, the Nova Scotia Court noted generically that some statements were "erroneous," but remained silent as to the truth of others. The only statement with arguably global reach is that Handshoe's conduct was "outrageous" in the "face of true facts" about Trout Point. This simply is not direct enough to constitute a meaningful factual finding that all of Handshoe's statements were false.

In analyzing the Nova Scotia Court's oral opinion and purported factual findings, it is important to note that the court based its damages award on allegations and evidence that a Mississippi court would not have credited. ***In sum, much of the conduct that underlies the Nova Scotia Court's oral opinion and damages award would not give rise to relief in Mississippi.

IV.

Before we conclude, we note that the SPEECH Act also contains a "jurisdictional considerations" provision, which requires "the party seeking recognition or enforcement of the foreign judgment" to show that "the exercise of personal jurisdiction by the foreign court comported with the due process requirements that are imposed on domestic courts by the Constitution of the United States." § 4102(b).

Handshoe asserts that Trout Point also failed to satisfy this provision because the Nova Scotia Court's exercise of personal jurisdiction over him did not comport with our nation's due process requirements. He makes a strong argument that Nova Scotia was

not the "focal point" of the statements that preceded the First Amended Statement of Claim. ***.

V.

For the above-stated reasons, Trout Point failed to satisfy its burden to show that either (1) Canadian law offers as much free speech protection as the United States Constitution and Mississippi state law, or (2) a Mississippi court presented with the same facts and circumstances would have found Handshoe liable for defamation. Accordingly, we hold that the Nova Scotia Judgment is unrecognizable and unenforceable. We AFFIRM.

1064

NOTES AND QUESTIONS

1. Trout Point Lodge was the first appellate level ruling issued under the Act, affirming a lower court decision holding that a Nova Scotia Judgment was unrecognizable and unenforceable in the United States. As explained in the case and the prefatory note (see supra page 1054), the SPEECH Act was a response to the perceived threat of "libel tourism"--"a form of international forum-shopping in which a plaintiff chooses to file a defamation claim in a foreign jurisdiction with more favorable substantive law." However, many commentators have argued that the SPEECH Act goes too far and "systematic parochialism has the potential to cause harms that are greater than might be anticipated, because the Act's broad language makes it applicable to far more than just libel tourism." Mark D. Rosen, The SPEECH Act's Unfortunate Parochialism: Of Libel Tourism and Legitimate Pluralism, 53 Va. J. Int'l L. 99 (2012). Could any foreign libel judgments survive and receive recognition under

this Act? Was Trout Point Lodge even an instance of libel tourism? See Partlett & McDonald, supra page 1055.

7. Remedies

1. Damages. As with most other torts the prime remedy for defamation is damages. For libel and for slander per se, it was presumed at common law that there were "general damages," the damages were "at large," and thus the jury were permitted to estimate the harm to plaintiffs reputation that they thought the defamation had caused, without the need of evidence to support the conclusion. This meant that there was little control by the court over the amount that the jury assessed. As a result of the holding in Gertz v. Robert Welch, Inc., supra page 1010, damages were confined to "compensation for actual injury" unless plaintiff establishes actual malice. But see Dun & Bradstreet v. Greenmoss, supra page 1021, where the common law position of presumed damages is restored for publications which are not of public concern.

To the extent that damages cover pecuniary, or out-of-pocket loss, an award of money damages is entirely appropriate, as it purports to make the plaintiff whole. These are the special damages that must be proved in the case of slander, if it is not actionable per se. The Supreme Court has explained, however, that "actual injury," may include "impairment of reputation and standing in the community, personal humiliation, and mental anguish and suffering," so long as there is adequate proof of these matters. This gives the court some control over the action of the jury and it remains to be seen whether the Supreme Court will take further steps to prevent the award of very large verdicts against news media in a manner that makes them

a figurative sandbag. Significantly, most of the cases that the Court has entertained have involved large sums of money that can constitute a heavy burden on the news media.

There is something anomalous in attempting to convert general impairment of standing in the community, personal humiliation and

mental anguish into a money award. What kind of conversion standard can there be? Would a better approach be to limit recovery to pecuniary loss but include within this concept the plaintiffs litigation expenses, including reasonable attorney's fees? This would utilize a much more objective standard and would pay the out-of-pocket costs to the plaintiff in vindicating his name. It might also have the effect of discouraging efforts to make the prosecution of the suit so expensive as to force the plaintiff to discontinue it. For a criticism of defamation law's preoccupation with money damages as a vindication of reputation, see John G. Fleming, Retraction and Reply: Alternative Remedies for Defamation, 12 Univ. Brit. Colum. L. Rev. 15 (1978).

Mitigation of Damages. Provocation by the plaintiff is generally regarded as admissible for the purpose of mitigating punitive damages. Palmer v. Mahin, 120 Fed. 737 (8th Cir. 1903). Under a minority holding, it may also be considered in mitigation of compensatory damages. Craney v. Donovan, 102 A. 640 (Conn. 1917); Conroy v. Fall River Herald News Co., 28 N.E.2d 729 (Mass. 1940). Where the defamatory statement would not be believed, the resultant damages are reduced: Bishop v. New York Times Co., 135 N.E. 845 (N.Y. 1922). Note that prior publication of the same

defamatory matter is not considered in mitigating damages, cf., Sun Printing & Publishing Ass'n v. Schneck, 98 F. 925 (2d Cir. 1900).

The "Libel-Proof" Plaintiff. Plaintiffs may possess such an atrocious reputation that they are, in effect, immune from libel in a given suit. "The libel-proof plaintiff doctrine is to be applied with caution, since few plaintiffs will have so bad a reputation that they are not entitled to obtain redress for defamatory statements, even if their damages cannot be quantified and they receive only nominal damages." Guccione v. Hustler Magazine, Inc., 800 F.2d 298, 303 (2d Cir. 1986) (citations omitted). In Cerasani v. Sony Corp., 991 F.Supp. 343 (S.D.N.Y. 1998), the court found that plaintiffs reputation was so "badly tarnished" that he was "libel proof." Plaintiff was, the court found, a "convicted racketeer, Mafia associate, bank robber, and drug dealer." An unsuccessful prosecution did not rehabilitate him. See also Ray v. Time, Inc., 452 F.Supp. 618 (W.D. Tenn. 1976), aff'd, 582 F.2d 1280 (6th Cir. 1978) (holding that James Earl Ray, the convicted assassin of Dr. Martin Luther King, Jr., was effectively libel proof). Lamb v. Rizzo, 391 F.3d 1133 (10th Cir.2004) (doctrine applied to convicted murderer and kidnapper). Defendant may plead true damaging facts relevant to the plaintiffs reputation but those must be "closely related to the false ones." The requirement of relevance guards against the introduction of evidence of a broad and boundless litany of plaintiffs discreditable acts of all kinds. Haynes v. Alfred A. Knopf, Inc., 8 F.3d 1222, 1229 (7th Cir. 1993).

Incremental Harm Doctrine. Suppose the plaintiff pleads as defamatory only part of a published work, while the rest of the publication contains other harmful but true statements. Under the incremental harm doctrine, if the defamatory portion does not go

significantly beyond the harm done by the non-pleaded portions (if the defamatory portion adds no more than "incremental" additional harm), an action for defamation will not lie. The doctrine is a specific application of the doctrine that a plaintiff may be "libel proof." In Masson v. New Yorker Magazine, Inc., 895 F.2d 1535 (9th Cir. 1989), the Ninth Circuit relied on this "incremental harm" doctrine as an alternative basis for affirming the decision of the District Court. The Court ruled that "[g]iven the ***many provocative, bombastic statements indisputably made by Masson and quoted by Malcolm, the additional damage caused [by the pleaded imputation] was nominal or non-existent, rendering the defamation claim as to this quote nonactionable." Id, at 1541. On appeal the Supreme Court stated that this "incremental harm" doctrine is not part of First Amendment jurisprudence although it may be accepted under state law. 501 U.S. 496 (1991). The Ninth Circuit noted that the doctrine was one of state law and quoted the words of then-Judge Scalia in Liberty Lobby, Inc. v. Anderson, 746 F.2d 1563, 1568 (D.C. Cir. 1984).

"The theory must be rejected because it rests upon the assumption that one's reputation is a monolith, which stands or falls in its entirety. The law, however, proceeds upon the optimistic premise that there is a little bit of good in all of us--or perhaps upon the pessimistic assumption that no matter how bad someone is, he can always be worse.... ('He was a liar and a thief, but for all that he was a good family man.')"

Judge Scalia concluded that the incremental harm doctrine is simply a "bad idea." Liberty Lobby, 746 F.2d at 1569. The Ninth Circuit agreed it was a "bad idea" and that therefore the incremental harm doctrine was not an "element of the California libel law." See also Maguire v. Journal Sentinel, Inc., 605 N.W.2d 881 (Wise. Ct. App. 1999) (noting that Wisconsin has yet to adopt an incremental harm defense to defamation).

Other states have retained the incremental harm doctrine. See Tonnessen v. Denver Publ'g Co., 5 P.3d 959 (Colo. Ct. App. 2000); Jewell v. NYP Holdings, Inc., 23 F. Supp. 2d 348 (S.D.N.Y. 1998). (when defamatory and non-defamatory statements both referred to the same incident, harm was incremental); (applying the doctrine but finding that the defamatory portions added more than incremental harm when, compared to true statement that plaintiff was the "prime suspect," they stated that "the noose was tightening" around him and that his arrest was only "a matter of time").

Bad Reputation. Evidence of a bad reputation may reduce the damages a plaintiff can recover. Generally, that evidence of bad reputation must relate to the content of the supposed defamation claimed. Towle v. St. Albans Publg Co., 165 A.2d 363 (Vt. 1960). "A defendant in an action for slander may introduce, for the purpose of reducing the damages, evidence to show that the plaintiffs general character or reputation is bad, but evidence of particular facts tending to establish the plaintiffs reputation is inadmissible." Small v. Chronical & Gazette Publishing Co., 267, 74 A.2d 544, 545 (N.H. 1950); see also

Snively v. Record Publ'g Co., 198 P. 1, 7 (Cal. 1921). In Sclar v. Resnik, 192 Iowa 669, 185 N.W. 273 (1921), a defendant was charged with defamation in calling a plaintiff "a whore and an immoral woman." The defendant was allowed to enter evidence of the plaintiffs reputation, including that she was associated with a "house of ill fame" and was generally known to be an "inmate" of that establishment, to mitigate the harm of his statement to her reputation. Rumors are admissible if shown to be sufficiently widespread to affect the plaintiffs reputation. Blickenstaff v. Perrin, 27 Ind. 527 (1867); Stuart v. News Publ'g Co., 51 A. 709 (N.J.L. 1902). The law is a reflection of defamation's foundational concept that reputation is protected even if that reputation may not be deserved.

Punitive Damages. Punitive damages were freely awarded at common law, if "malice" in the literal sense of that term were shown. Gertz v. Robert Welch, Inc., supra page 1010, has placed some limitations on this. It seems clear that in the absence of "malice" in the constitutional sense--i.e., knowledge or reckless disregard as to falsity--they cannot be awarded. The Court did not expressly hold whether they can be awarded then, but it seems later to have assumed that they can and Dun and Bradstreet permits such an award in the private figure/private speech context. Herbert v. Lando, 441 U.S. 153, 162 n.7 (1979). See, awarding punitive damages, Ayala v. Washington, 679 A.2d 1057 (D.C. 1996) (pilot plaintiffs defendant girlfriend told his employer and the FAA that he smoked marijuana during off-duty hours). Newspaper Publ'g Corp. v. Burke, 224 S.E.2d 132 (Va. 1976). See generally Note, Punitive Damages and Libel Law, 98 Harv. L. Rev. 847 (1985). The Supreme Court in Pac. Mutual Life Ins. Co. v. Haslip, 499 US. 1 (1991), upheld as

constitutional Alabama's scheme for awarding punitive damages in a case outside the defamation and First Amendment arena. The Court in its decision in State Farm Mutual Auto. Ins. Co. v. Campbell, 538 U.S. 408 (2003), page 618, provided the constitutional principles. Are these principles likely to differ in the defamation context?

Nominal Damages. Gertz v. Robert Welch held that a plaintiff cannot recover unless he proves "actual injury." If he proves that the statement is both defamatory and false, but does not prove actual injury, can he recover nominal damages? The Supreme Court has not ruled, nor does it indicate whether he can bring the initial action for the purpose of recovering only nominal damages and thus vindicating his name. It would seem, however, that the latter action ought to be allowed, and even favored. See discussion in Hearst Corp. v. Hughes, 466 A.2d 486 (Md. 1983).

2. Declaratory Relief. The action brought solely for nominal damages, referred to immediately above, essentially seeks declaratory relief. Its purpose is to obtain a judicial determination that the statement about the plaintiff is false, and thus to vindicate his reputation--to make him whole, as far as the law can. Marc. A. Franklin, Good Names and

Bad Law: A Critique of Libel Law and a Proposal, 18 U.S.F. L. Rev. 1 (1983), Anna L. Moore, Note, The Defamed Reputation: Will Declaratory Judgment Bill Provide Vindication?, 13 J. Legis. 72 (1986).

In a declaratory proceeding of this sort, should all of the requirements of an action for compensatory damage be imposed? If

the plaintiff is not seeking to recover damages, but only a ruling that the statement was false, should he have to show that defendant was at fault regarding its falsity? Do privileges serve a useful purpose here? Would it be feasible to have the trial judge pose two separate questions to the jury--(1) was the statement false, and (2) was the defendant at fault regarding its falsity?

Judge Leval, who presided over Westmoreland v. CBS Inc., 596 F. Supp. 1170 (S.D.N.Y. 1984), strongly supported a form of "no-money, no-fault suit," as "enhancing the primary object of the law of defamation: the restoration of a falsely damaged reputation." Pierre N. Leval, The NoMoney, No-Fault. Libel Suit: Keeping Sullivan in Its Proper Place, 101 Harv. L. Rev. 1287 (1988).

There were a number of trial innovations used in the famous Westmoreland and Sharon trials. One of special interest here was the use of "tripartite verdicts" in Sharon. Judge Sofaer instructed the jury to render separate special verdicts on whether the communication was defamatory, whether it was false, and whether the defendant was motivated by "actual malice." The verdicts were returned on separate days. Uses of this technique should be easily apparent.

3. Self-Help. "The first remedy of any victim of defamation is self-help--using available opportunities to contradict the lie or correct the error and thereby to minimize its adverse impact on reputation." Gertz v. Robert Welch, Inc., 418 U.S. 323, 344 (1974). Thus, the defamed party may make a response to the defamatory statement about him--provided he can find a suitable medium for making the response.

Right-of-Response Statutes. Several states have passed statutes requiring a public communications medium to give a right of response to a person who claims that he has been defamed by it. A Florida statute to this effect was held unconstitutional in Miami Herald Publ'g. Co. v. Tornillo, 418 U.S. 241 (1974). While the particular statute was overly broad and did not limit the requirement to cases in which there was a claim of actual defamation, the holding seems broad enough to cover a more limited statute. What about a statute requiring a newspaper to publish a news item of a defamation judgment obtained against it?

The person claiming to have been defamed may also go to the person publishing the defamation, explain that there has been a mistake and request a correction or a retraction. On the effect of refusal to retract after notice of falsity as evidence of "malice," see Morgan v. Dun & Bradstreet, Inc., 421 F.2d 1241 (5th Cir. 1970).

Retraction Statutes. There are retraction statutes in about thirty states. They vary considerably in their provisions, as to the types of defamation covered, the requirement of notice, the types of plaintiffs and defendants covered, and the effect of compliance. See, e.g., Fla. Stat. § 770.02. Some may be outdated as a result of constitutional developments, as in applying only to "innocent misrepresentation," or in limiting recovery to "actual damages."

A retraction, to be effective, must be unequivocal and not partial or hesitant and hypothetical. Goolsby v. Forum Printing Co., 135 N.W. 661 (N.D. 1912). (retraction not full and fair when article entitled "Blind Pigger's Frightful Crime. Ran Amuck at Geneseo and Killed

One Man" retracted with "It is now asserted that there was no murder.... The sensational story put Mr. Goolsby in the limelight in a manner that he does not desire."). Indeed, an "evasive" and "incomplete" retraction may be grounds for punitive damages. Burnett v. Nat'l Enquirer, Inc., 144 Cal.App.3d 991, 193 Cal. Rptr. 206 (1983), appeal dismissed, 465 U.S. 1014 (1984).

To the effect that the Tornillo case on right-of-reply statutes does not indicate the unconstitutionality of retraction statutes, see Brennan, J., concurring, in Miami Herald Pub. Co. v. Tornillo, 418 U.S. 241, 258 (1974). The Uniform Correction or Clarification of Defamation Act of 1993 (National Conference of Commissioners on Uniform State Laws) proposed mechanisms for correction and clarification to mend the "flaws in current law by providing strong incentives for parties in a defamation as an alternative to costly litigation."

4. Injunctive Relief. Ever since the decision in Near v. Minnesota, 283 U.S. 697 (1931), it has been recognized that prior restraint of a publication runs afoul of the First Amendment. (On the Near case, see the thorough study in F. Friendly, Minnesota Rag (1981)). Nevertheless, it remains possible that injunctive relief might become a suitable supplement to other relief when it has been formally determined in court that a statement is both defamatory and false, and the defendant persists in continuing to publish it. An injunction, carefully worded so as not to be too broad, might be both appropriate and constitutional. In Tory v. Cochran, 544 U.S. 734 (2005) the United States Supreme Court granted certiorari to hear the issue of the constitutionality of the grant of a permanent injunction prohibiting continuing libels directed against the famous late trial lawyer, Johnnie Cochran. Cochran's death occurred before

the appeal was heard, and the primary purpose of the injunction to prevent the coercion of Mr. Cochran lapsed. Thus the court in this light found the injunction an overly broad prior restraint upon speech. Common law courts weigh heavily the public interest in free speech when exercising discretions in granting injunctions:

The above remedial rubrics are brought together in the form of a Model Communicative Torts Act that seeks to limit and clarify the law, weigh First Amendment concerns, establish procedures, and remedies

1070

reflecting parties' realistic expectations, and promote as central features limited damages and encouragement of corrections and retractions. The Model Communicative Torts Act, 47 Wash. & Lee L. Rev. 1 (1990).

The Report of the Libel Reform Project of the Annenberg Washington Program, Proposal for Reform of Libel Law (1988) sets forth uniform state based legislation including remedial provisions of retraction and reply, a declaratory judgment option and abolition of punitive damages. Anderson, Is Libel Law Worth Reforming?, 140 U. Pa. L. Rev. 487, 550- 554 (1991), views the present law as a failure in that it denies defamation victims any remedy, but at the same time chills speech by encouraging high litigation costs and occasional large judgments. Anderson calls on the Supreme Court to instigate reform that would bring uniformity and reduce even more the role of the jury by a greater resort to summary judgment and judicial review, and perhaps take the assessment of damages out of the jury's hands.

1071

CHAPTER 18 PRIVACY

The recognition and development of the "right of privacy" is perhaps the outstanding illustration of the influence of legal journals upon the courts. Prior to 1890, no English or American court had ever granted relief expressly based upon the invasion of this right, although there were cases that seem in retrospect to have been groping in that direction. For instance Judge Cooley had coined the phrase "the right to be let alone." See, e.g., DeMay v. Roberts, supra, page 117, and Hardin v. Harshfield, 12 S.W. 779 (Ky.1890) (loss of marriage engagement caused by defendant's spreading a true tale of plaintiffs embarrassing combination of expelling flatus in a public place and her lapsus linguae--treated as slander).

"The Right to Privacy," written by Samuel D. Warren and Louis D. Brandeis, in 1890, was published in 4 Harvard Law Review 193. The article discussed several cases in which relief had been granted on the basis of defamation, breach of confidence, or of an implied contract for the publication of letters, portraits and the like. It concluded that these cases were, in reality, founded upon a broader principle entitled to separate recognition: the right of a private individual to be let alone and protected from unauthorized publicity in essentially private affairs.

One of the first states to consider the doctrine advanced by Warren and Brandeis was New York. After two lower courts apparently had accepted the article and recognized the right of privacy, it fell into the unfriendly hands of the Court of Appeals in Roberson v. Rochester Folding Box Co., 171 N.Y. 538, 64 N.E. 442 (1902), where the

defendant used a picture of an attractive young woman in an advertisement without her permission. The court rejected the entire doctrine, as it denied the existence of any "right of privacy" at common law. It feared any recognition of such legal fiction would ignite a "vast amount of litigation," a slippery slope that would involve not only pictures, but "a comment upon one's looks, conduct, domestic relations or habits." It said that any such change in the law must be made by the legislature. The decision was met immediately with widespread public disapproval, which led to the enactment of a statute the following year, now New York Civil Rights Law §§ 50--51. It prohibits the use of the name, portrait or picture of any living person without prior written consent for "advertising purposes" or for "purposes of trade." Similar statutes were adopted in Virginia, Oklahoma, and Utah.

Three years later the same question was presented in Pavesich v. New England Life Ins. Co., 122 Ga. 190, 50 S.E. 68 (1905), when the defendant used the plaintiffs name and picture, together with a bogus testimonial, in an insurance advertisement. The court rejected the

Roberson case, accepted the views of Warren and Brandeis, and recognized the existence of a distinct right of privacy. This became the leading case, but authority remained divided until the 1930's when the tide set in strongly in favor of recognition.

Today the right of privacy is clearly recognized by all but two or three states in one form or another, although not explicitly. Some states limit it to commercial uses of the plaintiffs name or likeness.

Elsewhere in the common law world the courts generally refused, until recently, to recognize a tort for invasion of privacy. See Wainwright v. Home Office, [2004] 2 A.C. 406 (refusing to articulate a separate cause of action for invasion of privacy). Dean Prosser made a profound contribution to the law in synthesizing and categorizing the case law discerning that the law falls into four distinct rubrics that are exemplified by the following principal cases in this chapter. See Prosser, Privacy, 48 Calif.L.Rev. 383 (1960). The Prosser conceptualization has been criticized as depriving the tort of conceptual core and falling short in the future digital age. Richards and Solove, Prosser's Privacy Law: A Mixed Legacy, 98 Calif. L. Rev. 1887 (2010).

In the age of the internet the protection of data privacy has loomed large as an issue of social concern and legal regulation. Privacy is a protean term. No single definition is capable of capturing its scope. The term data privacy refers to the sharing, use, and collection of personal data. See Daniel Solove, Conceptualizing Privacy, 90 Cal. L. Rev. 1087 (2002). The American Law Institute has completed its project, Principles of the Law: Data Privacy and are in the process of formally approving the report. The principles are drawn around Fair Information Practice Principles (FIPPs). These are designed to establish duties and responsibilities for entities that process personal data. They describe also the rights and duties that people should have regarding their data. There is thick jurisprudence around these principles, the sources of which are legislation, agency practices, the common law, and comparative international law and practice. More recently the Institute has embarked on the Restatement of the Law (Third) of Torts: Defamation and Privacy. The process will begin in

2020. This chapter addresses the law of torts in the protection of privacy. That law has a long history and one that is most fraught in its capacity to clash with the constitutional protection of free speech under the First Amendment.

Joe Dickerson & Associates, LLC v. Dittmar

Supreme Court of Colorado, En Banc., 2001.

34 P.3d 995.

JUSTICE Bender delivered the Opinion of the Court.

I. INTRODUCTION

This appeal involves the tort of invasion of privacy by appropriation of another's name or likeness. The defendant published an article in a

1073

newsletter, identifying the plaintiff by name and including her picture, which detailed his investigation of the plaintiffs theft of bearer bonds and her subsequent criminal conviction. The plaintiff sued the defendant claiming that her privacy was invaded by appropriation of her name and likeness.

Ruling on the defendant's motion for summary judgment, the trial court held that even if the tort were cognizable in Colorado, the plaintiffs appropriation claim failed because she presented no evidence that her name or likeness had any value.

We hold that the tort of invasion of privacy by appropriation of another's name or likeness is cognizable under Colorado law. The elements of this tort are: (1) the defendant used the plaintiff's name or likeness; (2) the use of the plaintiffs name or likeness was for the defendant's own purposes or benefit, commercially or otherwise; (3) the plaintiff suffered damages; and (4) the defendant caused the damages incurred. A plaintiffs claim of invasion of privacy by appropriation of her name and likeness will not succeed, however, if the defendant's use of the plaintiffs name and likeness is privileged under the First Amendment. In this case, the defendant is entitled to summary judgment as a matter of law because we find that the defendant's use of the plaintiffs name and likeness in the context of an article about the plaintiffs crime and felony conviction is a matter of legitimate public concern and is, therefore, privileged. Hence, we reverse the court of appeals and return this case to that court with directions to reinstate the trial court's order granting summary judgment to the defendant.

II. FACTS AND PROCEEDINGS BELOW

Defendants Joe Dickerson & Associates, LLC and Joe Dickerson were hired during a child custody dispute to investigate plaintiff Rosanne Marie (Brock) Dittmar. During the course of this investigation, Dickerson noticed inconsistencies in the way Dittmar came to possess certain bearer bonds. He reported the results of his investigation to authorities. Thereafter, Dittmar was charged with and convicted of felony theft of these bonds.

Dickerson publishes a newsletter called "The Dickerson Report," which is sent free of charge to law enforcement agencies, financial institutions, law firms, and others. ***Dickerson ran a series of articles in the report under the heading "Fraud DuJour." This column included such articles as "Fraud DuJour--Wireless Cable Investments," "Fraud DuJour--Prime Bank Instruments," and the article at issue here, "Fraud--DuJour Five Cases, 100%+ Recovery."

In this article, Dickerson related the role his firm played in five cases in recovering 100%--and in one case more than 100%--of the value of stolen assets. Dittmar's case was discussed first. Dickerson's article detailed how Dittmar, who worked as a secretary at a brokerage firm, stole a customer's bearer bonds from her place of employment and cashed

them for personal use. In addition, the article described Dickerson's investigation of Dittmar, the fact that the jury convicted Dittmar of theft, and how the court ordered her to pay restitution to the theft victim. This article appears on the front page of The Dickerson Report, mentions Dittmar by name, and includes her photograph.

Dittmar sued Dickerson on a number of tort theories including defamation, outrageous conduct, and invasion of privacy by appropriation of another's name or likeness. The trial court granted summary judgment for Dickerson on all claims. With respect to Dittmar's claim for invasion of privacy by appropriation of another's name or likeness, the only claim relevant to this appeal, the trial court noted that Colorado has not explicitly recognized this tort. The trial court granted Dickerson's motion for summary judgment

because, even assuming the tort was cognizable under Colorado law, Dittmar "present[ed] no evidence that her name or likeness had any value." The trial court noted that, under the definition of the tort in the Second Restatement of Torts, appropriation requires more than mere publication of the plaintiff's name or likeness:

The value of a plaintiffs name is not appropriated by mere mention of it, or by reference to it in connection with legitimate mention of his public activities; nor is the value of his likeness appropriated when it is published for purposes other than taking advantage of his reputation, prestige, or other value associated with him, for purposes of publicity.

Restatement (Second) of Torts § 652C, comment d (1976).

Dittmar appealed the trial court's dismissal of her appropriation claim. The court of appeals agreed with the trial court that this tort requires the defendant to appropriate certain values associated with the plaintiffs name or likeness: "In order for liability to exist, the defendant must have appropriated to his or her own use or benefit the reputation, prestige, social or commercial standing, public interest or other values of the plaintiffs name or likeness." [C] The court of appeals concluded, however, that the plaintiff raised issues of material fact regarding different aspects of the tort, namely the purpose of the publication and whether the use benefited Dickerson. [C] These issues of fact, the court of appeals reasoned, precluded summary judgment in favor of Dickerson. Hence, that court reversed the trial court's grant of summary judgment. [C]

Dickerson petitioned this court for certiorari on three issues: (1) whether the tort of invasion of privacy based on appropriation of

another's name or likeness is cognizable under Colorado law; (2) if so, whether an appropriation claim requires evidence that the plaintiffs name has an exploitable value; and (3) whether the article constituted constitutionally protected speech.

1075

We agree with the court of appeals' recognition of this tort but we disagree that a plaintiff must provide evidence of the value of her name and likeness when she seeks only personal damages. Because we find that the defendant's publication of the plaintiffs name and likeness in the context of an article about her crime and felony conviction is privileged under the First Amendment, we hold that the defendant is entitled to summary judgment as a matter of law.

III. ANALYSIS

A. Overview of the Appropriation Tort

In 1890, an influential law review article outlined the contours of the tort of invasion of privacy. Samuel D. Warren & Louis D. Brandeis, The Right To Privacy, 4 Harv. L. Rev. 193 (1890). Warren and Brandeis suggested that increased abuses by the press required a remedy that would protect private individuals from mental distress and anguish. [C] They proposed that the right of privacy would protect a person's rights in their appearance, sayings, acts, and personal relations. [C] To Warren and Brandeis, the right of privacy did not involve property so much as the "more general immunity of the person--the right to one's personality." [C] In short, they desired to protect the individual's right "to be let alone." [C]

Over the years, almost every state has recognized, either statutorily or by case law, that one way that an individual's privacy can be invaded is when a defendant appropriates a plaintiff's name or likeness for that defendant's own benefit. While the exact parameters of this tort of invasion of privacy by appropriation of identity vary from state to state, it has always been clear that a plaintiff could recover for personal injuries such as mental anguish and injured feelings resulting from an appropriation. [C]

There has been a great deal of debate, however, over the ability of a plaintiff to recover for pecuniary loss resulting from an unauthorized commercial exploitation of her name or likeness. Courts initially had difficulty reconciling how a celebrity, well-known to the public, could recover under the misleading heading of "privacy." [C] Such plaintiffs often sought damages for commercial injury that resulted when defendants used plaintiffs' identities in advertising. [C]

Therefore, in the context of pecuniary damages, some courts and commentators have resorted by analogy to property law and have recognized a "right of publicity" which permits plaintiffs to recover for injury to the commercial value of their identities. [C]

In a seminal law review article, William Prosser described invasion of privacy as a complex of four related torts: (1) unreasonable intrusion upon the seclusion of another; (2) publicity that places another in a false light before the public; (3) public disclosure of embarrassing private facts about another; and (4) appropriation of another's name or likeness. [C] The first three of these four torts protect only personal interests. [C]

But, perhaps in response to the simmering legal debate about the scope of the protection afforded by the appropriation tort, Prosser defined the appropriation tort as protective of both personal and economic interests. In doing so, Prosser emphasized the proprietary nature of the appropriation tort without removing it from the framework of privacy: "The interest protected is not so much a mental as a proprietary one, in the exclusive use of the plaintiffs name and likeness as an aspect of his identity." [C]

Thus, Prosser's formulation of the appropriation tort subsumed the two types of injuries--personal and commercial--into one cause of action that existed under the misleading label of "privacy." The privacy label is misleading both because the interest protected (name and/or likeness) is not "private" in the same way as the interests protected by other areas of privacy law and because the appropriation tort often applies to protect well-known "public" persons. Despite these problems, Prosser's view of the appropriation tort was ultimately incorporated into the Second Restatement of Torts. Restatement (Second) of Torts 652C.

Prosser's emphasis on the property-like aspects of the tort has led to a great deal of confusion in the law of privacy, [c] Some courts have partially rejected the Prosser formulation, choosing to distinguish claims for injury to personal feelings caused by an unauthorized use of a plaintiffs identity ("right of privacy") from claims seeking redress for pecuniary damages caused by an appropriation of the commercial value of the identity ("right of publicity"). [C] Thus, in those jurisdictions, the right of publicity is viewed as an independent doctrine distinct from the right of privacy. This view finds support in the Third Restatement of Unfair Competition, which recognizes that

the right of publicity protects against commercial injury, while the right of privacy appropriation tort protects against personal injury. Restatement (Third) of Unfair Competition 346, comments a & b (1995).

Some jurisdictions attempt to follow Prosser's formulation of the tort and provide relief for both personal and commercial harm through a single common law or statutory cause of action. [C]

In other states, however, the parameters or even the existence of the appropriation tort remain undetermined. Such is the case in Colorado.

B. Colorado's Recognition of the Appropriation Tort

A brief review of the development of the tort of invasion of privacy in Colorado demonstrates that recognition of the appropriation tort is a natural outgrowth of our earlier precedent.

We have recognized that invasion of privacy is a cognizable tort under Colorado law. Rugg v. McCarty, 173 Colo. 170, 175, 476 P.2d 753, 755 (1970). In Rugg, we held that a plaintiff may assert a claim for invasion of privacy where a creditor unreasonably attempts collection of a debt in a manner that will foreseeably result in extreme mental anguish and embarrassment to the debtor.

1077

Recently, we recognized the tort of invasion of privacy by unreasonable publicity given to another's private life. Ozer v. Borquez, 940 P.2d 371, 377 (Colo. 1997). As in Rugg, we relied

upon the fact that a majority of jurisdictions have recognized this tort. [C]

Similarly, the tort of invasion of privacy by appropriation of a plaintiff's name or likeness has been recognized throughout most of the United States, either statutorily or through the common law. Staruski v. Cont'l Tel. Co., 154 Vt. 568, 581 A.2d 266, 268 (1990) (stating that almost all states have recognized the tort). ***We now hold that Colorado recognizes the tort of invasion of privacy by appropriation of an individual's name or likeness.

C. Elements of the Tort

Having recognized that the invasion of privacy by appropriation of name or likeness tort is recognized in Colorado, we now consider the elements of this tort.

The Second Restatement of Torts articulates the tort of appropriation of another's name or likeness, stating: "One who appropriates to his own use or benefit the name or likeness of another is subject to liability to the other for invasion of his privacy." Restatement (Second) of Torts 652C. The Colorado Civil Jury Instructions divide the tort into five distinct elements: (1) the defendant used the plaintiffs name or likeness; (2) the defendant sought to take advantage of the plaintiffs reputation, prestige, social or commercial standing, or any other value attached to the plaintiffs name, likeness, or identity; (3) the use of the plaintiffs name or likeness was for the defendant's own purposes or benefit, commercially or otherwise; (4) damages; and (5) causation. [C]

The dispute in this case centers around the second element listed above, that defendant must appropriate "the reputation, prestige, social or commercial standing, or other value associated with the plaintiffs name or likeness." The defendant, Dickerson, argues that summary judgment in his favor is appropriate because the plaintiff, Dittmar, has presented no evidence that her name and likeness had any value.

The Colorado Civil Jury Instructions were developed from the comments to section 652C of the Second Restatement of Torts. Comment c implies that one element that a plaintiff must prove is that the plaintiffs identity has value, stating that "the defendant must have appropriated to his own use or benefit the reputation, prestige, social or commercial standing, public interest or other values of the plaintiffs name or likeness." Restatement (Second) of Torts 652C, comment c. Based on this and other comments to section 652C, some courts that follow the Restatement have explicitly required that one element of the tort is that the plaintiffs identity must have had pre-existing commercial value. [C]

***

1078

A plaintiff whose identity had no commercial value might still experience mental anguish based on an unauthorized use of her name and likeness. Of the numerous cases that have considered the tort of invasion of privacy by appropriation of the plaintiffs name or likeness, few have suggested that there is any requirement that the plaintiff prove the value of her identity as a prerequisite to recovery for mental suffering. Rather, a more typical summary of the law is

found in Motschenbacher v. R.J. Reynolds Tobacco Co., where the 9th Circuit attempted to reconcile the relationship between commercial damages, mental anguish damages, and the requirement of value, stating:

It is true that the injury suffered from an appropriation of the attributes of one's identity may be "mental and subjective"--in the nature of humiliation, embarrassment and outrage. However, where the identity appropriated has a commercial value, the injury may be largely, or even wholly, of an economic or material nature. [C]

Consistent with this approach, we decline to include the second element of value, as described by the Colorado Civil Jury Instructions, as a required element of the tort. Hence, we hold that the elements of an invasion of privacy by appropriation claim are: (1) the defendant used the plaintiffs name or likeness; (2) the use of the plaintiffs name or likeness was for the defendant's own purposes or benefit, commercially or otherwise; (3) the plaintiff suffered damages; and (4) the defendant caused the damages incurred.

Applying these elements in this case, we conclude that Dittmar, the plaintiff, alleged sufficient facts to satisfy each of the required elements. We do not require the plaintiff, who seeks only personal damages, to prove the value of her identity. Thus, her failure to do so is not fatal to her claim.

***Thus, we hold that the trial court erred by granting summary judgment to the defendant on the grounds that the plaintiff failed to provide evidence of the value of her name or likeness.

D. Newsworthiness Privilege

Having defined the elements of the tort of invasion of privacy by appropriation of name or likeness, we now consider the defendant's argument that the trial court properly granted summary judgment in his favor because his publication of the plaintiffs name and picture was constitutionally protected speech as a matter of law. We note, as discussed below, that our review is de novo because this is a question of law.

Dickerson, the defendant, argues that his article relates to a matter of legitimate public concern and that, therefore, it is constitutionally protected speech. The plaintiff agrees that the circumstances surrounding her arrest and conviction are newsworthy and of legitimate public concern. She does not object to the fact that a local newspaper

1079

wrote articles regarding her crime, arrest, trial, and conviction, or that these articles identified her by name. Instead, she argues that the defendant's republication of these same facts in his newsletter, in conjunction with her name and picture, constitutes an invasion of her privacy. She characterizes Dickerson's newsletter as an "infomercial" that is "designed to promote Dickerson's private investigation firm and to attract business for the firm." Hence, she argues that the character of the defendant's article is primarily commercial and that it should not receive the protection of the First Amendment. Under the particular facts of this case, we disagree with the plaintiffs argument.

In the context of invasion of privacy by appropriation of name and likeness, there is a First Amendment privilege that permits the use of a plaintiffs name or likeness when that use is made in the context of,

and reasonably relates to, a publication concerning a matter that is newsworthy or of legitimate public concern. [C]

In many situations, however, it is not altogether clear whether a particular use of a person's name or likeness is made for the purpose of communicating news or for the purpose of marketing a product or service. After all, many advertisements incorporate factual information as part of their sales message. [C] ***

To resolve this question, courts must determine whether the character of the publication is primarily noncommercial, in which case the privilege will apply, or primarily commercial, in which case the privilege will not apply. [C] Under this test, an article that has commercial undertones may still be protected if it concerns a legitimate matter of public concern. [C] The question of whether a use of plaintiffs identity is primarily commercial or noncommercial is ordinarily decided as a question of law. [C] ***

To determine whether the defendant's use of the plaintiff's name and likeness was for a primarily commercial or noncommercial purpose, we must first define "commercial speech." Commercial speech is speech that proposes a commercial transaction. [C] It is the content of the speech, not the motivation of the speaker, which determines whether particular speech is commercial. [C]

A profit motive does not transform a publication regarding a legitimate matter of public concern into commercial speech. [C] Many news publishers, including newspapers and magazines, are motivated by their desire to make a profit. Courts have repeatedly held that, in order to be actionable, the use of a plaintiffs identity must be more directly commercial than simply being printed in a

periodical that operates for profit. [C] A contrary rule would preclude the publication of much news and other matters of legitimate public concern.

Applying the above principles to the instant case, we conclude that the defendant's publication was primarily noncommercial because it related to a matter of public concern, namely the facts of the plaintiffs

1080

crime and felony conviction. The defendant's article detailed how the plaintiff, who worked as a secretary at a brokerage firm, stole a customer's bearer bonds from her place of employment and cashed them for personal use. In addition, the article described the defendant's investigation of the plaintiff, the fact that the jury convicted the plaintiff of theft, and how the court ordered her to pay restitution to the theft victim. There can be no question that these details about the plaintiffs crime and conviction are matters of legitimate public concern. ***

The fact that the defendant's article did not appear in a traditional newspaper does not change this result. We have previously stated that "[i]t is... well established that freedom of the press is not confined to newspapers or periodicals, but is a right of wide import and 'in its historic connotation comprehends every sort of publication which affords a vehicle of information and opinion.'" [C] This means that if the contents of an article are newsworthy when published by a local newspaper, then they do not cease to be newsworthy when subsequently communicated by a different sort of publisher.

Further, the fact that the defendant's reason for publishing the newspaper may have been his own commercial benefit does not

necessarily render the speech "commercial." As noted above, a magazine or newspaper article is protected despite the fact that a publisher may publish a particular article in order to make a profit. Similarly, the defendant's speech is protected even if he intends it to result in profit to him, so long as the contents of the speech qualify for protection.

The defendant's profit motive does not affect the fact that the article relates to the arrest and circumstances of a felony conviction, which are matters of legitimate public concern. Therefore, we conclude that the defendant's publication was predominately a noncommercial publication. We hold that the publication of a plaintiffs name and likeness in connection with a truthful article regarding the plaintiffs felony conviction is privileged. As such, the plaintiffs claim of invasion of privacy by appropriation of name or likeness cannot prevail.

IV. CONCLUSION

Since the defendant's use of the plaintiffs name and picture is privileged under the First Amendment, we reverse the court of appeals and return this case to that court with directions to reinstate the trial court's order granting summary judgment to the defendant.

NOTES AND QUESTIONS

1. This was the first type of invasion of privacy to be recognized by the courts. Statutes in some states are limited to commercial appropriations of name or likeness. One example is New York, where the statute limits actions to appropriations for advertising purposes of trade. Griffin v. Law Firm of Harris, Beach, Wilcox,

Rubin, and Levey, 126 Mise.2d 209, 481 N.Y.S.2d 963 (1984) aff'd, 112 A.D.2d 514, 490 N.Y.S.2d 919 (3d Dept.1985). Other courts,

not restricted by statute, have allowed recovery for appropriations of the plaintiffs name for non-commercial purposes. State ex rel. Lafollette v. Hinkle, 131 Wash. 86, 229 P. 317 (1924) (use of name as candidate for office by political party); Hamilton v. Lumbermen's Mutual Cas. Co., 82 So.2d 61 (La.App.1955) (advertising in name of plaintiff for witness to an accident); Vanderbilt v. Mitchell, 72 N.J.Eq. 910, 67 A. 97 (1907) (naming defendant as father of child on birth certificate).

Should an action be available where Sears photographs a three and a half month old child in its studio and uses, without parental consent, the photograph for its own promotion? Slocum v. Sears Roebuck & Co., 542 So.2d 777 (La.App.1989) (invasion of infant's privacy occurred but the limited exhibition of the photograph, its flattering quality, and the age of the infant did not reach a threshold of seriousness to make the invasion actionable).

2. While most cases involve advertisements, other forms of commercial appropriation have resulted in liability. Edison v. Edison Polyform Mfg. Co., 73 N.J.Eq. 136, 67 A. 392 (1907) (use of name in title of corporation); Goodyear Tire & Rubber Co. v. Vandergriff, 52 Ga.App. 662, 184 S.E. 452 (1936) (impersonation to obtain secret information); Binns v. Vitagraph Co. of America, 147 App.Div. 783, 132 N.Y.S. 237 (1911), aff'd, 210 N.Y. 51, 103 N.E. 1108 (1913) (motion picture based on incident in life of plaintiff, in which an actor represented him). Morse v. Studin, 283 A.D.2d 622, 725 N.Y.S.2d 93

(2001) (plastic surgeon's use of before and after photographs to promote business); Michaels v. Internet Entertainment Group, Inc., 5 F. Supp.2d 823 (C.D. Cal.1998) (publicizing plaintiffs' names and identities to advertise pornographic videos on the Internet).

3. There is no liability for the mere use of the same name as that of the plaintiff. Swacker v. Wright, 154 Mise. 822, 277 N.Y.S. 296 (1935) (novel); Nebb v. Bell Syndicate, Inc., 41 F.Supp. 929 (S.D.N.Y. 1941) (comic strip).

4. Right of Publicity. The right of common law protects a person's "name and likeness from unwarranted intrusion or exploitation...." Lugosi v. Universal Pictures, 25 Cal.3d 813, 160 Cal.Rptr. 323, 603 P.2d 425, 431 (1979). Whereas the privacy tort of misappropriation protects a plaintiffs personal dignity, the right of publicity action protects the commercial value of a plaintiffs personal image. Doe v. TCI Cablevision, 110 S.W.3d 363 (Mo. 2003). The former action requires that the defendant used the plaintiffs name or likeness to obtain some advantage, while the latter requires that the advantage be specifically commercial. Restatement (Second) of Torts § 652C (1977).

In an era of media celebrity, the right has been widely litigated, especially in California before the Ninth Circuit Court of Appeals. California and eleven other states supplement, or displace in few instances, the common law right with statutory protections. Cal. Civ. Code § 3344(a) (1971). The right is not confined to "appropriation of name or likeness" but extends to identity. Thus, at common law and under California statute, causes of action have been stated for advertisements that used an imitation of an iconic singer's unique

voice to promote Doritos (Waits v. Frito-Lay, Inc., 978 F.2d 1093 (9th Cir. 1992)); a soundalike voice (Midler v. Ford Motor Co., 849

F.2d 460 (9th Cir. 1988); a robot redolent of Vanna White (White v. Samsung Electronics America, Inc., 971 F.2d 1395 (9th Cir. 1992)), rehearing en banc denied, 989 F.2d 1512 (9th Cir. 1993)); a birthname of a famous athlete (Abdul-Jabbar v. General Motors Corporation, 75 F.3d 1391 (9th Cir. 1996)); a claim of an endorsement that was not given. Larry King Enterprises, Inc. v. Holzapfel, No. CV 18-9454 PA (RAOX), 2019 WL 3064459, at *1 (C.D. Cal. Feb. 28, 2019).

Courts elsewhere have taken the same approach, Carson v. Here's Johnny Portable Toilets, Inc., 698 F.2d 831 (6th Cir. 1983) (holding actionable under Michigan common law distributor's use of "Here's Johnny" in conjunction with promotion of a portable lavatory); Ali v. Playgirl, Inc., 447 F.Supp. 723 (S.D.N.Y. 1978) (holding publication of drawing of nude black man labeled "the greatest" entitled plaintiff to preliminary injunction under New York statutory and common law right of action); Onassis v. Christian Dior-New York, Inc., 122 Mise.2d 603, 472 N.Y.S.2d 254, aff'd, 110 A.D.2d 1095, 488 N.Y.S.2d 943 (1985) (holding plaintiff entitled to injunction under New York law for posing a look-alike of plaintiff in advertisement of defendant's product); Parks v. LaFace Records, 329 F.3d 437 (6th Cir. 2003) (entitling a song after civil rights movement icon actionable where there was no artistic nexus to the song's content). Note, however, that where the appropriation consists of copyrighted material, federal copyright statutes may preempt privacy actions. Laws v. Sony Music

Entertainment, Inc., 448 F.3d 1134 (9th Cir. 2006), cert, denied 549 U.S. 1252 (2007).

5. The inherently ambiguous nature of the right to publicity presents jurisprudential and practical issues. Is it an action to vindicate the privacy rights of the person, or is it a recognition of a separate property right--a form for intellectual property? If it is a property right, is it alienable and does it survive the death of the person? The majority favors such survivability, either by case law or by statute. Herman Miller, Inc. v. Palazzetti Imports and Exports, Inc., 270 F.3d 298 (6th Cir. 2001) (counting jurisdictions). Selling busts in the likeness of a deceased famous person, then, gives rise to right of publicity liability. Martin Luther King, Jr., Center for Social Change v. American Heritage Products, Inc., 250 Ga. 135, 296 S.E.2d 697 (1982).

Oftentimes the courts are not careful in distinguishing dignitary interests from the right to publicity. Contra, Doe v. TCI Cablevision, 110 S.W.3d 363 (Mo. 2003) for a discussion of damages that draws a careful bifurcation between the actions. Whereas the plaintiff in Doe brought a misappropriation action, the Missouri court concluded that the claim was more properly a publicity action. The recognition of a property right also allows for some cases to embrace unjust enrichment in justifying liability: Zacchini v. Scripps-Howard Broadcasting Co., 433 U.S. 562 (1977). What are the implications of allowing a remedy for unjust enrichment? Should damages be only economic or should they extend to non-economic losses, see Abdul-Jabbar v. General Motors Corp., 85 F.3d 407 (9th Cir. 1996) (damages for economic loss and for humiliation and mental distress in conclusions that he had abandoned his religion) and Petty v.

Chrysler Corp., 343 Ill.App. 3d 815, 278 Ill.Dec. 714, 799 N.E.2d 432 (2003) (court will presume damages for misappropriation of identity; actual and special damages available).

1083

Should an injunction and/or punitive damages be available? See Partlett, A Study of a Different Hedgehog, in Remedies for Breach of Privacy, Varuhas and Morham (eds.) (2018), 293.

6. Constitutional Law. The capacious protection of the right to privacy potentially invades the First Amendment. The principal case asserts a First Amendment interest in protecting "newsworthy" material. Take the leading Supreme Court decision in Zacchini v. Scripps-Howard Broadcasting Co., 433 U.S. 562 (1977). Plaintiff was an entertainer commercially performing a "human cannonball act" in which he was shot from a cannon into a net 200 feet away, the performance taking some 15 seconds. Defendant broadcasting station, though requested not to do so, took a film of the act and showed it on the evening news broadcast. Plaintiffs suit for damages was held not maintainable by the Supreme Court of Ohio because of the station's privilege to report in its newscasts matters of legitimate public interest, relying on New York Times Co. v. Sullivan, supra page 987 and Time, Inc. v. Hill, 385 U.S. 374 (1967), infra page 1106. The Supreme Court reversed.

Speaking for the majority, Justice White said: "The differences between [false-light privacy and appropriation privacy] are important. First, the State's interests in providing a cause of action in each instance are different. 'The interest protected' in permitting recovery for placing the plaintiff in a false light 'is clearly that of reputation,

with the same overtones of mental distress as in defamation.' [C] By contrast, the State's interest in permitting a 'right of publicity' is in protecting the proprietary interest of the individual in his act in part to encourage such entertainment. As we later note, the State's interest is closely analogous to the goals of patent and copyright law, focusing on the right of the individual to reap the reward of his endeavors and having little to do with protecting feelings or reputation. Second, the two torts differ in the degree to which they intrude on dissemination of information to the public. In 'false light' cases the only way to protect the interests involved is to attempt to minimize publication of the damaging matter, while in 'right of publicity' cases the only question is who gets to do the publishing. An entertainer such as petitioner usually has no objection to the widespread publication of his act as long as he gets the commercial benefit of such publication. Indeed, in the present case petitioner did not seek to enjoin the broadcast of his act; he simply sought compensation for the broadcast in the form of damages. ***

Wherever the line in particular situations is to be drawn between media reports that are protected and those that are not, we are quite sure that the First and Fourteenth Amendments do not immunize the media when they broadcast a performer's entire act without his consent. The Constitution no more prevents a State from requiring respondent to compensate petitioner for broadcasting his act on television than it would privilege respondent to film and broadcast a copyrighted dramatic work without liability to the copyright owner [cc], or to film and broadcast a prize fight [c], or a baseball game [c], where the promoters or the participants had other plans for

publicizing the event. There are ample reasons for reaching this conclusion."

Speaking for the dissenters, Justice Powell said: "Rather than begin with a quantitative analysis of the performer's behavior--is this or is this

1084

not his entire act?--we should direct initial attention to the actions of the news media: what use did the station make of the film footage? When a film is used, as here, for a routine portion of a regular news program, I would hold that the First Amendment protects the station from a 'right of publicity' or 'appropriation' suit, absent a strong showing by the plaintiff that the news broadcast was a subterfuge or cover for private or commercial exploitation."

7. Public Commentary Often Focuses upon Personalities. Pursued by many but attained by few, fame is often accompanied by the price of others' exploitation of such status. In the course of public speech, celebrities are used to sell products, influence attitudes, and affect public discourse. The balance between free speech under the First Amendment on the privacy right is often at issue. In White, supra page 1082 the court held that Vanna White had made a supportable claim when a robot identifiable as a representation of her was featured in an ad for defendant's product. The Ninth Circuit rejected the application for rehearing en banc, 989 F.2d 1512 (9th Cir.1993). Judge Kozinski, joined by others, dissented, finding that the right to publicity had become too expansive and inconsistent with free speech notions, where actionability rests simply on the invocation of the "celebrity's image in the public's mind." Id. at 1514. The use of a

bewigged robot may be a powerful way of expressing the durability of defendant's product: as the "Wheel of Fortune" has survived, so would defendant's product.

There is a large and accumulating number of authorities drawing the line between protection of the right of publicity and legitimate free expression. The Ninth Circuit has long experience: Downing v. Abercrombie & Fitch, 265 F.3d 994 (9th Cir. 2001) (use of well-known surfer's image actionable under the Lanham Act). The courts have found images protected if they contain "significant expressive content." Winter v. DC Comics, 30 Cal.4th 881, 134 Cal.Rptr.2d 634, 69 P.3d 473 (2003). But compare Doe v. TCT Cablevision, 110 S.W.3d 363 (Mo. 2003) (on facts similar to Winter, adopting a "predominant use" test). What of an art print of Tiger Woods winning the 1997 Masters? ETW Corp. v. Jireh Pub., Inc., 332 F.3d 915 (6th Cir. 2003) (finding Wood's publicity right was outweighed by society's interest in "artistic expression"). What of lithographs and T-shirts featuring the Three Stooges? Comedy III Productions v. Gary Saderup, 25 Cal.4th 387, 106 Cal.Rptr.2d 126, 21 P.3d 797 (2001) (adopting a test requiring the work have a transformative element as to make it a creative contribution). What about players in football video games? In re NCAA Student-Athlete Name & Likeness Licensing Litig., 724 F.3d 1268 (9th Cir. 2013) (concluding that the use of college football players' likenesses were not sufficiently transformative).

Sanders v. American Broadcasting Companies, Inc., et al.

Supreme Court of California, 1999.

20 Cal.4th 907, 978 P.2d 67, 85 Cal.Rptr.2d 909.

WERDEGAR, J., Defendant Stacy Lescht, a reporter employed by defendant American Broadcasting Companies, Inc. (ABC), obtained

1085

employment as a "telepsychic" with the Psychic Marketing Group (PMG), which also employed plaintiff Mark Sanders in that same capacity. While she worked in PMG's Los Angeles office, Lescht, who wore a small video camera hidden in her hat, covertly videotaped her conversations with several coworkers, including Sanders.

Sanders sued Lescht and ABC for, among other causes of action, the tort of invasion of privacy by intrusion. Although a jury found for Sanders on the intrusion cause of action, the Court of Appeal reversed the resulting judgment in his favor on the ground that the jury finding for the defense on another cause of action, violation of Penal Code section 632, established Sanders could have had no reasonable expectation of privacy in his workplace conversations because such conversations could be overheard by others in the shared office space. We granted review to determine whether the fact that a workplace interaction might be witnessed by others on the premises necessarily defeats, for purposes of tort law, any reasonable expectation of privacy the participants have against covert videotaping by a journalist. We conclude it does not: In an office or other workplace to which the general public does not have unfettered access, employees may enjoy a limited, but legitimate, expectation that their conversations and other interactions will not be secretly videotaped by undercover television reporters, even though

those conversations may not have been completely private from the participants' coworkers.

Although we reverse, for these reasons, the Court of Appeal's judgment for defendants, we do not hold or imply that investigative journalists necessarily commit a tort by secretly recording events and conversations in offices, stores or other workplaces. Whether a reasonable expectation of privacy is violated by such recording depends on the exact nature of the conduct and all the surrounding circumstances. In addition, liability under the intrusion tort requires that the invasion be highly offensive to a reasonable person, considering, among other factors, the motive of the alleged intruder. (Shulman v. Group W Productions, Inc. (1998) 18 Cal.4th 200, 231, 236). [c] The scope of our review in this case does not include any question regarding the offensiveness element of the tort, and we therefore express no view on the offensiveness or inoffensiveness of defendants' conduct. We hold only that, where the other elements of the intrusion tort are proven, the cause of action is not defeated as a matter of law simply because the events or conversations upon which the defendant allegedly intruded were not completely private from all other eyes and ears.

Factual and Procedural Background

In 1992, plaintiff Mark Sanders was working as a telepsychic in PMG's Los Angeles office, giving "readings" to customers who telephoned PMG's 900 number (for which they were charged a per-minute fee). The psychics' work area consisted of a large room with rows of cubicles, about 100 total, in which the psychics took their calls. Each cubicle was

enclosed on three sides by five-foot-high partitions. The facility also included a separate lunchroom and enclosed offices for managers and supervisors. During the period of the claimed intrusion, the door to the PMG facility was unlocked during business hours, but PMG, by internal policy, prohibited access to the office by nonemployees without specific permission. An employee testified the front door was visible from the administration desk and a supervisor greeted any nonemployees who entered.

Defendant Stacy Lescht, employed by defendant ABC in an investigation of the telepsychic industry, obtained employment as a psychic in PMG's Los Angeles office. ***Lescht secretly videotaped conversations [among employees] with a "hat cam," i.e., a small camera hidden in her hat; a microphone attached to her brassiere captured sound as well. Among the conversations Lescht videotaped were two with Sanders, the first at Lescht's cubicle, the second at Sanders's. [The court described the relatively discrete nature of the conversation.]

[The court described the two causes of action, one statutory and the other the "common law tort of invasion of privacy by intrusion." The Court of Appeal reversed the judgment for plaintiffs entering a judgment for defendants.]

***

We granted plaintiff's petition for review and, by later order, limited the issues to be briefed and argued to the following: (1) whether a person who lacks a reasonable expectation of complete privacy in a conversation because it could be seen and overheard by coworkers

(but not the general public) may nevertheless have a claim for invasion of privacy by intrusion based on a television reporter's covert videotaping of that conversation; (2) whether the jury's findings in the first phase of trial, on liability under section 632, legally precluded maintenance of a common law intrusion claim; and (3) whether the jury instructions in the second phase of trial, on liability for intrusion, were prejudicially erroneous.

Discussion

Question 1: May a person who lacks a reasonable expectation of complete privacy in a conversation because it could be seen and overheard by coworkers (but not the general public) nevertheless have a claim for invasion of privacy by intrusion based on a television reporter's covert videotaping of that conversation?

Answer: Yes.

Neither the trial court nor the Court of Appeal had the benefit of our recent decision in Shulman v. Group W Productions, Inc., supra. We therefore begin by recounting what we said in Shulman regarding the privacy element of an intrusion cause of action.

In Shulman, we adopted the definition of the intrusion tort articulated in [prevailing caselaw] and in the Restatement (Second) of

1087

Torts section 652B. The cause of action, we held, has two elements: (1) intrusion into a private place, conversation or matter, (2) in a manner highly offensive to a reasonable person, [c] The first element, we stated, is not met when the plaintiff has merely been observed, or even photographed or recorded, in a public place, [c]

Rather, "the plaintiff must show the defendant penetrated some zone of physical or sensory privacy surrounding, or obtained unwanted access to data about, the plaintiff. The tort is proven only if the plaintiff had an objectively reasonable expectation of seclusion or solitude in the place, conversation or data source." [C]

While Shulman reiterated the requirement that an intrusion plaintiff have a reasonable expectation of privacy, neither in Shulman nor in any other case have we stated that an expectation of privacy, in order to be reasonable for purposes of the intrusion tort, must be of absolute or complete privacy. Indeed, our analysis of the issues in Shulman suggested, to the contrary, that mass media videotaping may constitute an intrusion even when the events and communications recorded were visible and audible to some limited set of observers at the time they occurred. In Shulman, a television producer had fitted a rescue nurse with a small microphone, by which the nurse's conversation with a severely injured accident victim was recorded. Although a number of other persons were participating in the rescue, the record on summary judgment, we noted, left unclear whether any nonparticipant members of the general public were present or could overhear any of the patient's communications to the nurse and other rescuers, [c] Partly on that basis, we found triable issues of fact as to the patient's reasonable expectation of privacy in her conversation with the nurse and other rescuers, [c] We thereby implied the plaintiff patient could have a reasonable expectation of privacy in her communications even if some of them may have been overheard by those involved in the rescue, but not by the general public.

Shulman's discussion of possible bases for a reasonable expectation of privacy on the patient's part also suggests that a person may reasonably expect privacy against the electronic recording of a communication, even though he or she had no reasonable expectation as to confidentiality of the communication's contents. [W]e stated: " 'While one who imparts private information risks the betrayal of his confidence by the other party, a substantial distinction has been recognized between the secondhand repetition of the contents of a conversation and its simultaneous dissemination to an unannounced second auditor, whether that auditor be a person or a mechanical device... [S]uch secret monitoring denies the speaker an important aspect of privacy of communication-the right to control the nature and extent of the firsthand dissemination of his statements.'" [C]

This case squarely raises the question of an expectation of limited privacy. On further consideration, we adhere to the view suggested in Shulman: privacy, for purposes of the intrusion tort, is not a binary, all- or-nothing

characteristic. There are degrees and nuances to societal recognition of our expectations of privacy, the fact that the privacy one expects in a given setting is not complete or absolute does not render the expectation unreasonable as a matter of law. Although the intrusion tort is often defined in terms of "seclusion" (see, e.g., Rest.2d Torts, 652B [Intrusion upon Seclusion]; Shulman, supra, ["intrusion on seclusion"]), the seclusion referred to need not be absolute. "Like 'privacy,' the concept of 'seclusion' is relative. The

mere fact that a person can be seen by someone does not automatically mean that he or she can legally be forced to be subject to being seen by everyone." [C]

Dietemann v. Time, Inc., supra, 449 F.2d 245 upon which the trial court relied, does, indeed, exemplify the idea of a legitimate expectation of limited privacy. Reporters for a news magazine deceitfully gained access to a quack doctor's home office, where they secretly photographed and recorded his examination of one of them. [C] The court held the plaintiff could, under California law, reasonably expect privacy from press photography and recording, even though he had invited the reporters-unaware of their true identity-into his home office: "Plaintiffs den was a sphere from which he could reasonably expect to exclude eavesdropping newsmen. He invited two of defendant's employees to the den. One who invites another to his home or office takes a risk that the visitor may not be what he seems, and that the visitor may repeat all he hears and observes when he leaves. But he does not and should not be required to take the risk that what is heard and seen will be transmitted by photograph or recording, or in our modern world, in full living color and hi-fi to the public at large...." [C]

***The court cited numbers of cases illustrating the principle.] [I]n a famous early case, the presence of an unnecessary male observer at the home delivery of the plaintiffs child was held to be an intrusion, even though the delivery was also observed by the plaintiffs husband, the attending doctor and a woman assistant. (De May v. Roberts, supra p. 117) The existence of such limited privacy is not dependent on the plaintiff being in his or her home, as demonstrated by Huskey v. National Broadcasting Co. Inc. [C] See also Pearson v.

Dodd (D.C. Cir. 1969) 410 F.2d 701, 704 [133 App.D.C. 279] [intrusion tort protects against intrusion "whether by physical trespass or not, into spheres from which an ordinary man in a plaintiffs position could reasonably expect that the particular defendant should be excluded"].)

Defendants' claim, that a "complete expectation of privacy" is necessary to recover for intrusion, thus fails as inconsistent with case law as well as with the common understanding of privacy. Privacy for purposes of the intrusion tort must be evaluated with respect to the identity of the alleged intruder and the nature of the intrusion. As seen below, moreover, decisions on the common law and statutory protection of workplace privacy show that the same analysis applies in the workplace as in other settings; consequently, an employee may, under

1089

some circumstances, have a reasonable expectation of visual or aural privacy against electronic intrusion by a stranger to the workplace, despite the possibility that the conversations and interactions at issue could be witnessed by coworkers or the employer.

***

Defendants' cited cases on workplace privacy do not establish a contrary rule. None of them hold or demonstrate that employee privacy in the workplace is nonexistent if not complete. ***

Finally, defendants rely on Com. v. Alexander (1998) 551 Pa. 1 [708 A.2d 1251] (Alexander) and Desnick v. American Broadcasting

Companies, Inc. (7th Cir. 1995) 44 F.3d 1345 (Desnick). Both involved investigations into suspected misconduct by doctors; the investigation was by ABC in Desnick and by the Philadelphia police in Alexander. In both cases, patients or those posing as such, acting for the investigators, covertly recorded or videotaped the doctors' conversations with the patients in the doctors' offices. [C] Both courts rejected claims the taping illegally invaded the doctors' privacy.

In Desnick, the question was whether the covert videotaping by "testers" posing as patients was a tortious invasion of privacy. The appellate court held it was not, partly because "the only conversations that were recorded were conversations with the testers themselves." [C] "The test patients entered offices that were open to anyone expressing a desire for ophthalmic services and videotaped physicians engaged in professional, not personal, communications with strangers (the testers themselves)." [C]

The Desnick court characterized the doctor-patient relationship as one between a service provider and a customer and therefore viewed these parties' conversations in the medical office as essentially public conversations between strangers. We need not agree or disagree with this characterization in order to see that it renders the decision's reasoning inapplicable to the question before us. We are concerned here with interactions between coworkers rather than between a proprietor and customer. As the briefed question is framed, the interactions at issue here could not have been witnessed by the general public, although they could have been overheard or observed by other employees in the shared workplace.

To summarize, we conclude that in the workplace, as elsewhere, the reasonableness of a person's expectation of visual and aural privacy depends not only on who might have been able to observe the subject interaction, but on the identity of the claimed intruder and the means of intrusion, [c] For this reason, we answer the briefed question affirmatively: a person who lacks a reasonable expectation of complete privacy in a conversation, because it could be seen and overheard by coworkers (but not the general public), may nevertheless have a claim for

1090

invasion of privacy by intrusion based on a television reporter's covert videotaping of that conversation.

Defendants warn that "the adoption of a doctrine of per se workplace privacy would place a dangerous chill on the press' investigation of abusive activities in open work areas, implicating substantial First Amendment concerns." (Italics in original.) We adopt no such per se doctrine of privacy. We hold only that the possibility of being overheard by coworkers does not, as a matter of law, render unreasonable an employee's expectation that his or her interactions within a nonpublic workplace will not be videotaped in secret by a journalist. In other circumstances, where, for example, the workplace is regularly open to entry or observation by the public or press, or the interaction that was the subject of the alleged intrusion was between proprietor (or employee) and customer, any expectation of privacy against press recording is less likely to be deemed reasonable. Nothing we say here prevents a media defendant from attempting to show, in order to negate the offensiveness element of the intrusion

tort, that the claimed intrusion, even if it infringed on a reasonable expectation of privacy, was "justified by the legitimate motive of gathering the news." (Shulman, supra, 18 Cal.4th at pp. 236--237.) As for possible First Amendment defenses, any discussion must await a later case, as no constitutional issue was decided by the lower courts or presented for our review here.

Disposition

The judgment of the Court of Appeal is reversed, and the cause is remanded to that court for further proceedings consistent with our opinion.

NOTES AND QUESTIONS

1. Physical intrusion upon seclusion or solitude has been recognized as a distinct form of invasion of privacy. Byfield v. Candler, 33 Ga.App. 275, 125 S.E. 905 (1924) (woman's stateroom on a steamboat); Welsh v. Pritchard, 125 Mont. 517, 241 P.2d 816 (1952) (landlord moving in on tenant); Sutherland v. Kroger Co., 144 W.Va. 673, 110 S.E.2d 716 (1959) (search of woman's shopping bag in store); K-Mart Corp. Store No. 7441 v. Trotti, 677 S.W.2d 632 (Tex.App. 1984) (search of employee's locker). Are privacy rights violated by the mere presence of a video camera installed in a bathroom, even if it's inoperable? See Koeppel v. Speirs, 808 NW2d 177 (Iowa 2011) (holding that because the camera was capable of operation, a reasonable person would believe that his or her privacy had been invaded, thus establishing that an invasion occurred under the intrusion on solitude component of the tort.)

2. As to eavesdropping, see Rhodes v. Graham, 238 Ky. 225, 37 S.W.2d 46 (1931) (wiretapping); Roach v. Harper, 143 W.Va. 869,

105 S.E.2d 564 (1958) (microphone); Hamberger v. Eastman, 106 N.H. 107, 206 A.2d 239 (1964) (landlord "bugs" tenant's bedroom). Suppose a telephone user customarily records his telephone conversations without informing the other parties? Cf. Marks v. Bell Tel. Co., 460 Pa. 73, 331 A.2d 424 (1975).

1091

Suppose husband secretly videotapes in marital bedroom? Cf. In re Marriage of Tigges, 758 N.W.2d 824 (Iowa 2008). What about installing spyware on a spouse's phone? Crocker C. v. Anne R., 58 Mise. 3d 1221(A), 100 N.Y.S.3d 609 (N.Y. Sup. Ct. 2018)(unreported opinion) (husband used spyware to listen to conversations between his wife and her psychologist and lawyer); O'Brien v. O'Brien, 899 So. 2d 1133, 1136 (Fla. Dist. Ct. App. 2005) (wife installed spyware to intercept emails and instant messages between husband and another woman).

On "telephone harassment," repeated telephone calls at unreasonable hours, see Donnel v. Lara, 703 S.W.2d 257 (Tex.App.1985); cf. Ruple v. Brooks, 352 N.W.2d 652 (S.D.1984) (obscene phone calls may create liability for intentional infliction of emotional distress). And see Nader v. General Motors Corp., 25 N.Y.2d 560, 255 N.E.2d 765, 307 N.Y.S.2d 647 (1970), involving a general campaign of harassment including lengthy surveillance, probing inquiries about Nader's political, social, racial and religious views and beliefs, his sexual behavior and attempts to entrap him in illicit relationships.

3. Some courts limit the tort of invasion of seclusion or solitude to actual physical invasion. Compare Davis v. Emmis Pub. Corp., 244

Ga.App. 795, 536 S.E.2d 809 (2000) (requiring physical invasion) with Lawlor v. N. Am. Corp, of Ill., 983 N.E.2d 414, 425 (2012), in which telephone records were gathered through misrepresentation to determine whether plaintiff violated a covenant not to compete. The Illinois Supreme Court adopted the Restatement (Second) of Torts definition of the tort of intrusion upon seclusion: " 'The intrusion itself makes the defendant subject to liability, even [where] there is no publication or other use of any kind of the ***information ***Today, we join the vast majority of other jurisdictions that recognize the tort of intrusion upon seclusion." See also Zimmermann v. Wilson, 81 F.2d 847 (3d Cir.1936) (unauthorized prying into private bank account); Frey v. Dixon, 141 N.J.Eq. 481, 58 A.2d 86 (1948) (invalid order requiring production of books and documents); Melvin v. Burling, 141 Ill.App. 3d 786, 490 N.E.2d 1011, 95 Ill.Dec. 919 (1986) (harassed by intentional ordering of merchandise without consent). Cf. Galella v. Onassis, 487 F.2d 986 (2d Cir.1973) (continued surveillance and persistent harassment by taking photographs).

4. The invasion test has two interlinking elements. The intrusion must be into a private place, conversation, or matter, and must be highly offensive to a reasonable person. The essence of the first requirement is an objective expectation of privacy and it will vary with respect to the identity of the intruder or the nature of the intrusion. See Shulman v. Group W Productions, Inc., 18 Cal.4th 200, 74 Cal.Rptr.2d 843, 955 P.2d 469 (1998), discussed in the principal case. But compare Deteresa v. American Broadcasting Companies, Inc., 121 F.3d 460 (9th Cir.1997), discussed in the principal case, where plaintiff was an attendant on the flight taken by O.J. Simpson to Chicago after the murder of his former wife, Nicole Brown. Plaintiff

refused an interview with ABC, but did speak on the street with an ABC reporter and was, without her knowledge, videotaped. The court as

1092

noted held that considering the circumstances she could not expect privacy, and defendant did not act offensively.

5. No liability usually obtains for taking the plaintiffs photograph in a public place. Gill v. Hearst Pub. Co., 40 Cal.2d 224, 253 P.2d 441 (1953) (Farmers' Market in Los Angeles); Berg v. Minneapolis Star & Tribune Co., 79 F.Supp. 957 (D.Minn. 1948) (courtroom); Nelson v. Maine Times, 373 A.2d 1221 (Me. 1977) (picture of Native American infant). But in Daily Times Democrat Co. v. Graham, 276 Ala. 380, 162 So.2d 474 (1964), where defendant photographed plaintiff in a "Fun House" with her dress blown up over her head, it was held to be an invasion of privacy. The public nature of the place bears on the fundamental issue: the reasonable expectation of privacy. Where the interest protected is highly personal, for example of a sexual or intimate kind, psychological tranquility is at stake and the expectation of privacy is at its highest. However, knowingly exposing one's self in public attracts no privacy right, even where the photograph is taken surreptitiously: Barnhart v. Paisano Publications, LLC, 457 F. Supp. 2d 590 (D. Md. 2006).

6. Intrusion upon seclusion is the aspect of the privacy tort that relates more closely to the concerns expressed by Warren and Brandeis in the article cited by the "principal" case. Nonetheless, as the preceding notes demonstrate, the scope of the tort is continually tested as the press engages in modes of newsgathering that affect

privacy interests. See J.H. Desnick v. American Broadcasting Companies, 44 F.3d 1345 (7th Cir.1995). Posner C.J. referred to First Amendment protection pertaining to defamation suits. He noted that "tabloid" style reporting was "often shrill, one-sided, and offensive, and sometimes defamatory." Yet it was entitled to protection. Id. at 1355. However, limits were drawn on capacity of the press to intrude in Food Lion v. Capital Cities/ABC, Inc., 194 F.3d 505 (4th Cir.1999) (holding that plaintiff supermarket chain had a cause of action in trespass where defendant had breached their duty of loyalty by secretly videotaping in plaintiffs non-public areas to which they had fraudulently obtained entry). Note that the tort in this form does not possess a publication element.

The media enjoys no immunity from the general law in news-gathering. A breach of general law, as in Cohen v. Cowles Media Company, 501 U.S. 663 (1991) (discussed infra page 1104, does not raise First Amendment issues. The court in Shulman, discussed in the principal case, confirms this principle. Yet the First Amendment dimension does have a role because, as the Shulman court acknowledges, the issue of whether the intrusion was "highly offensive to a reasonable person" makes relevant offender's motivation in news-gathering. The court in Food Lion, for First Amendment reasons, disallowed damages flowing from the publication. Disallowing publication damages effectively detooths the tort. But cf. Dietemann supra allowing enhanced damages for subsequent publication. Food Lion has spawned considerable academic comment attempting to chart a rule that provides for ample and certain newsgathering prerogatives, but balances the privacy interests of individuals: Lidsky, Prying, Spying, and Lying: Intrusive

Newsgathering and What the Law Should Do About It, 73 Tul.L.Rev. 173 (1998).

1093

Hall v. Post

Supreme Court of North Carolina, 1988.

323 N.C. 259, 372 S.E.2d 711.

MITCHELL, Justice. In the present case, this Court must decide whether claims for tortious invasion of privacy by truthful public disclosure of "private" facts concerning the plaintiffs are cognizable at law in North Carolina. We hold that they are not and reverse the decision of the Court of Appeals.

The plaintiffs, Susie Hall and her adoptive mother, Mary Hall, brought separate civil actions against the defendants for invasion of privacy. The actions were based upon two articles printed in The Salisbury Post and written by its special assignment reporter, Rose Post.

[O]n 18 July 1984, The Salisbury Post published an article by Rose Post which bore the headline "Ex-Carny Seeks Baby Abandoned 17 Years Ago." The article concerned the search by Lee and Aledith Gottschalk for Aledith's daughter by a previous marriage, whom she and her former husband had abandoned in Rowan County in September of 1967. The article told of Aledith's former marriage to a carnival barker named Clarence Maxson, the birth of their daughter in 1967, their abandonment of the child at the age of four months, events in Aledith's life thereafter, and her return to Rowan County after seventeen years to look for the child. The article indicated that Clarence Maxson had made arrangements in 1967 for a babysitter

named Mary Hall to keep the child for a few weeks. Clarence and Aledith then moved on with the carnival, and Clarence later told Aledith that he had signed papers authorizing the baby's adoption.

Aledith was married to Lee Gottschalk in 1984, and they decided to travel to Rowan County to look for Aledith's child. The newspaper article of 18 July 1984 related the details of their unsuccessful search and then stated:

If anyone, they say, knows anything about a little blonde baby left here when the county fair closed and the carnies moved on in September 1967, Lee and Aledith Gottschalk can be reached in Room 173 at the Econo Motel.

Shortly after the article was published, the Gottschalks were called at the motel and informed of the child's identity and whereabouts.

The defendants published a second article on 20 July 1984 reporting that the Gottschalks had located the child with the aid of responses to the earlier article. The second article identified the child as Susie Hall and identified her adoptive mother as Mary Hall. The article related the details of a telephone encounter between the Gottschalks and Mrs. Hall and described the emotions of both families.

The plaintiffs alleged that they fled their home in order to avoid public attention resulting from the articles. Each plaintiff alleged that

she sought and received psychiatric care for the emotional and mental distress caused by the incident.

The defendants have contended at all times that the imposition of civil liability for their truthful public disclosure of facts about the

plaintiffs would violate the First Amendment to the Constitution of the United States. The defendants have contended in the alternative that this Court should refuse to adopt any tort which imposes liability for such conduct as a part of the common law of this State.

Although the plaintiffs contended before the Court of Appeals that their claims constituted valid claims both for public disclosure of embarrassing private facts and for intrusion upon the plaintiffs' seclusion or solitude or into their private affairs, we agree with the Court of Appeals that the intrusion branch of the invasion of privacy tort is not involved here, [c] Therefore, we strictly limit our consideration in the present case to issues concerning the private facts branch of the invasion of privacy tort. We neither consider nor decide whether any other tort is constitutional or cognizable at law upon facts such as those presented here.

***

Since the publication of the nineteenth century Warren and Brandeis article in the Harvard Law Review, two different broad categories of privacy rights have evolved. [C] One is the constitutional right of privacy which protects personal privacy from certain types of governmental intrusion, [c] The other is the general right of privacy, violations of which have been viewed by some as giving rise to a tort composed of four branches, only one of which is of concern in the present case. This Court has recently acknowledged that, as to this general right to privacy:

A review of the current tort law of all American jurisdictions reveals cases identifying at least four types of invasion of four different interests in privacy: (1) appropriation, for the defendant's advantage,

of the plaintiffs name or likeness; (2) intrusion upon the plaintiffs seclusion or solitude or into his private affairs; (3) public disclosure of private facts about the plaintiff; and (4) publicity which places the plaintiff in a false light in the public eye. See W. Prosser, Handbook of the Law of Torts § 117 (4th ed. 1971) (emphasis added).

In the present case, we consider for the first time that branch of the invasion of privacy tort which is most commonly referred to as the "public disclosure of private facts." The plaintiffs have at all times acknowledged that the facts published about them by the defendants were true and accurate in every respect, but they contend, nevertheless, that they are entitled to recover.

Under the definition of the private facts tort set out in the Restatement (Second) of Torts, liability will be imposed for publication of

1095

"private facts" when "the matter publicized is of a kind that (a) would be highly offensive to a reasonable person, and (b) is not of legitimate concern to the public." Restatement (Second) of Torts § 652D (1977). That definition includes four elements: (1) publicity; (2) private facts; (3) offensiveness; and (4) absence of legitimate public concern. Id., commentary. With regard to what has become known as the "newsworthiness" or "public interest," i.e., "legitimate public concern" standard, the Restatement view is that:

In determining what is a matter of legitimate public interest, account must be taken of the customs and conventions of the community; and in the last analysis what is proper becomes a matter of the community mores. The line is to be drawn when the publicity ceases

to be the giving of information to which the public is entitled, and becomes a morbid and sensational prying into private lives for its own sake, with which a reasonable member of the public, with decent standards, would say that he has no concern. [C]

The private facts branch of the invasion of privacy tort was not recognized at common law in 1776 or at the times of adoption of either the Constitution or the Bill of Rights. It has never been recognized in England, Australia, New Zealand, Canada, or other jurisdictions sharing the heritage of the English common law. [C] After an extensive study, the British Committee on Privacy recommended that the invasion of privacy tort not be adopted in Great Britain, because its application would be too difficult and time consuming and would unnecessarily threaten free speech.

Although expressing constitutional and other reservations, this Court has recognized a general right of privacy as a part of the tort law of this State. (Recognizing the "appropriation" branch of the tort). However, we have not recognized or applied either of the two branches of the tort which, because they arise from publicity, most directly affect First Amendment speech and press rights. [False light claims are not recognized as overlapping existing claims for relief.] For the same reasons, we now hold that claims for invasions of privacy by publication of true but "private" facts are not cognizable at law in this State.

The Supreme Court of the United States has specifically declined to "address the broader question whether truthful publications may ever be subjected to civil or criminal liability consistently with the First and Fourteenth Amendments." Cox Broadcasting Corp. v. Cohn, 420

U.S. 469 (1975) (emphasis added). But see Smith v. Daily Mail Publishing Co., 443 U.S. 97, 99 S.Ct. 2667, 61 L.Ed.2d 399 (1979) (statute prohibiting publication of defendant-juvenile's name unconstitutional, because state's interest in protecting juveniles and ensuring their rehabilitation could not overcome defendants' rights of speech and press); Landmark Communications, Inc. v. Virginia, 435 U.S. 829, 98 S.Ct. 1535, 56 L.Ed.2d 1 (1978) (same result and reasoning where statute prohibited publishing

information regarding confidential proceedings before state judicial review commission). We do not find it necessary to answer that "broader question" here. It is enough for us to decide here, ***, that adoption of the tort sought by the plaintiffs would add to the existing tensions between the First Amendment and the law of torts and would be of little practical value to anyone.

This action between two non-governmental parties does not involve "a situation in which two constitutional interests must be balanced in apposition, but rather one in which state [tort] laws protecting privacy are constrained by the federal Constitution. As the constitutional right of privacy is not involved here, a reasonable argument certainly can be made that the First Amendment rights of speech and press[,] control and prohibit recovery in these actions against the defendants for publishing the truth.

Further, the Supreme Court of the United States has consistently held that even false statements which cause actual harm must be given limited "breathing space." [C] To do otherwise would unduly limit the rights of free speech and press by causing writers and

speakers to cautiously exercise those rights for fear of liability. Hustler Magazine v. Falwell, [C]. This in turn would reduce the vigor and limits of public debate. Surely, it would be reasonable to argue that the publication of true statements, such as those made by the defendants, are entitled to no less constitutional protection than that guaranteed false statements.

"[A] cause of action predicated on public disclosure of private facts depends for its success on the truthfulness of the published material." [C] The Supreme Court of the United States has specifically recognized that "it is here that claims of privacy most directly confront the constitutional freedoms of speech and press." Cox Broadcasting Corp. v. Cohn, 420 U.S. at 489, 43 L.Ed.2d at 346 (emphasis added). Thus, it is obvious here, just as it was obvious in Renwick that the branch of the invasion of privacy tort which the plaintiffs seek to have us adopt is constitutionally suspect and, even if it ultimately manages to survive constitutional review, "would tend to add to the tension already existing between the First Amendment and the law of torts...." Renwick v. News and Observer, 310 N.C. at 323, 312 S.E.2d at 412.

***

We conclude that any possible benefits which might accrue to plaintiffs are entirely insufficient to justify adoption of the constitutionally suspect private facts invasion of privacy tort which punishes defendants for the typically American act of broadly proclaiming the truth by speech or writing. Accordingly, we reject the notion of a claim for relief for invasion of privacy by public disclosure of true but "private" facts.

For the foregoing reasons, the decision of the Court of Appeals is reversed.

1097

REVERSED.

FRYE, Justice, concurring in result.

The majority holds that summary judgment was appropriately entered for the defendants in these cases in which the plaintiffs sought recovery for tortious invasion of privacy by public disclosure of private but true facts concerning the plaintiffs. I agree that plaintiffs have failed to forecast evidence sufficient to withstand defendants' motions for summary judgment and that summary judgment was appropriately entered against the plaintiffs. I therefore concur in the result reached by the majority.

I do not concur in the reasoning of the majority which leads it to "reject the notion of a claim for relief for invasion of privacy by public disclosure of true but 'private' facts." I do not accept the notion that the tension already existing between the First Amendment [sic] and the law of torts requires the non-recognition of a legitimate claim by a non-public figure against a media defendant for wrongfully publishing highly offensive private facts which are not of legitimate concern to the public. While public figures give up some of their rights to privacy in the public interest, I do not believe that the media should be given a license to pry into the private lives of ordinary citizens and spread before the public highly offensive but very private facts without any degree of accountability. Such is not required by either the federal or state constitutions.

The Supreme Court has specifically left unanswered the "question whether truthful publication of very private matters unrelated to public affairs could be constitutionally proscribed." Cox Broadcasting Corp. v. Cohn, supra. However, I agree with our Court of Appeals' conclusion that the resolution of the conflicting rights lies in the "application of a 'newsworthiness' or 'public interest' standard in determining what publications are constitutionally privileged and what publications are actionable." [C] Adopting this standard gives credence to the viewpoint that neither the right to privacy nor the right of freedom of the press is absolute.

[T]he chilling effect is minimized if the question of whether the published material is of legitimate concern to the public is initially a question of law for the trial court. ***Therefore, if the court determines that every reasonable person applying the proper standard would have to conclude that the published matter was of legitimate concern to the public, then the publication would be privileged and the granting of summary judgment would be proper. [C]

In determining whether published information is of legitimate concern to the public, I would adopt the standard set out in the Restatement (Second) of Torts:

[t]he line is to be drawn when the publicity ceases to be the giving of information to which the public is entitled, and

1098

becomes a morbid and sensational prying into private lives for its own sake, with which a reasonable member of the public, with decent standards, would say that he had no concern.

Restatement (Second) of Torts, § 652D comment h. [C]

In short, I would adopt the private facts tort consisting of the elements as stated in the Restatement (Second) of Torts. [The judge considered the elements of the tort.]

I now turn to the application of the legitimate public concern standard to the facts of the case sub judice. I do not agree with the Court of Appeals' conclusion that a reasonable juror could conclude that the articles at issue here constituted a "morbid and sensational prying into private lives for its own sake." ***This was unquestionably a story of matters of public interest and concern. ***However much plaintiffs may have wished to keep their personal histories out of public view, they became a legitimate public concern upon Mrs. Gottschalk's return. "There are times when one, whether willingly or not, becomes an actor in an occurrence of public or general interest." Meetze v. Associated Press, 230 S.C. 330, 337, 95 S.E.2d 606, 609 (1956).

In summary, I would hold that the private facts tort is cognizable in this jurisdiction but that plaintiffs' forecast of evidence was insufficient to withstand defendants' summary judgment motion. Thus, I concur in the result reached by the majority in this case while disagreeing with the reasons given therefor.

NOTES AND QUESTIONS

1. This form of the tort of invasion of privacy acutely implicates interests of free speech. The authorities have been at pains to map the common law and to articulate restrictions imposed by the First Amendment. See Skinner-Thompson, Privacy's Double Standards, 93 Wash. L. Rev. 2015 (2018) (offering a close analysis of case law,

2006--2016, and looking to a resolution of conflicts restricting the tort's effectiveness).

2. Common Law: The Right to Privacy. The cases suggest that disclosure of an embarrassing private fact to only one or just a few persons does not amount to an invasion of privacy. Thus there is no invasion of privacy when defendant calls plaintiffs employer and asks his help in collecting a debt from plaintiff. Household Finance Corp. v. Bridge, 252 Md. 531, 250 A.2d 878 (1969); Timperley v. Chase Collection Service, 272 Cal.App.2d 697, 77 Cal.Rptr. 782 (1969); Contra Pack v. Wise, 155 So.2d 909 (La.Ct.App.1963), writ refused, 245 La. 84, 157 So.2d 231 (1963). These cases might well be explained, however, on the basis that defendant's disclosure was privileged as a legitimate means of collecting the debt. See also Restatement (Second) of Torts § 652G (1977). For an example of how courts approach "public" disclosure, see Chisholm v. Foothill Capital Corp., 3 F. Supp. 2d 925 (N.D. III. 1998) ("If a plaintiff has a special relationship with the individuals to whom the matter was disclosed, the publicity requirement may be satisfied by disclosure to a small number of people."). See also

Pachowitz v. LeDoux, 265 Wis.2d 631, 666 N.W.2d 88 (Wis. Ct. App. 2003) (medic's disclosure of plaintiffs drug overdose to plaintiffs friend-coworker constituted sufficient publicity). In determining whether the facts were communicated to a sufficient number of persons, the Pachowitz court considered whether the person to whom defendant made the disclosure "was 'the biggest gossip in Muskego and West Allis Hospital' or whether 'she had the stiffest

upper lip of anyone in the state.'" But see Restatement (Second) of Torts, § 652D cmt. a ("[I]t is not an invasion of the right of privacy... to communicate a fact concerning the plaintiffs private life to a single person or even to a small group of persons.") Accord C.L.D. v. Wal-Mart Stores, Inc., 79 F. Supp. 2d 1080 (D. Minn. 1999) (applying Minnesota law) (manager's disclosure to coworkers of embarrassing grounds for plaintiffs medical leave insufficient for the action).

3. One who intentionally seeks publicity, or puts himself in the public eye, as does an actor, professional baseball player, explorer or inventor, is often held to become a "public figure," and to have no right to complain of publicity that reasonably bears upon his public activity. Cohen v. Marx, 94 Cal.App.2d 704, 211 P.2d 320 (1949) (prize fighter); Koussevitzky v. Allen, Towne & Heath, Inc., 188 Mise. 479, 68 N.Y.S.2d 779 (1947), aff'd, 272 App.Div. 759, 69 N.Y.S.2d 432 (1947) (symphony conductor); Martin v. Dorton, 210 Miss. 668, 50 So.2d 391 (1951) (sheriff). But note the field of sexual privacy stimulated by the power of the internet and social media. In revenge porn and other online sexual assault, the harm is clear and often intended, supporting liability. Another is the use of videos of sexual behavior intended to be private but which are surreptitiously obtained and made public. (This a combination of the intrusion and disclosure torts.) The famous case is that of Hulk Hogan, the wrestler, who is obviously a public figure. In Bollea v. Gawker Media, 105 US PQ 2d 1496 (2012) Mr. Bollea, Hulk Hogan, with the financial aid of Peter Theil, a famous Silicon Valley billionaire with a grudge against Gawker, managed to show that the videotaped sex scene published by Gawker was beside his public persona. The jury awarded massive damages sufficient to drive Gawker out of business. For a

description see Partlett, Remedies for Breach of Privacy: A Study of a Different Hedgehog, in Remedies for Breach of Privacy, see above p. at 1083.

Others may incidentally become actors in an event of public interest--and become a public figure in relation to that event. Jones v. Herald Post Co., 230 Ky. 227, 18 S.W.2d 972 (1929) (plaintiffs husband murdered before her eyes); See also Berg v. Minneapolis Star & Tribune Co., 79 F.Supp. 957 (D.Minn. 1948) (plaintiff engaged in divorce litigation); Stryker v. Republic Pictures Corp., 108 Cal.App.2d 191, 238 P.2d 670 (1951) (war hero); Elmhurst v. Pearson, 153 F.2d 467 (D.C.Cir.1946) (defendant in sedition trial), note 11 at page 1103.

Persons captured on film incidental to newsworthy reports have no cause of action. See Jacova v. Southern Radio and Television Co., 83 So.2d 34 (Fla. 1955) (plaintiff present in store to make a purchase was filmed being interviewed by police subsequent to a raid of the store); Mark v. King Broadcasting, 27 Wash.App. 344, 618 P.2d 512 (1980) (plaintiff filmed for television broadcast from outside his store in relation to a story on Medicare

fraud); Heath v. Playboy Enterprises, Inc., 732 F.Supp. 1145 (S.D.Fla. 1990) (plaintiff, the daughter of Christopher Carson (son of Johnny), was photographed with her mother outside a courthouse after a paternity hearing; no action available).

4. Common Law: Breach of Confidence. The Reporters for the Restatement of Data Privacy Principles formulate the duty of confidentiality as follows: Whenever personal data is collected under

an express or implied promise of confidentiality or a legal obligation of confidentiality, the entity collecting it shall maintain its confidentiality. A duty of confidentiality may also be based upon ethical standards, such as professional rules of conduct, or applicable law. Model Rules of Prof'l Conduct R. 1.6 (2019).

The English law has recognized a right to confidentiality as right in equity and has created an extensive right to privacy from it. (See note 6). It arises from the relationship of a giver of information to a recipient of it and confidence with which it is impressed. Neil Richards and Daniel Solove, Privacy's Other Path: Recovering the Law of Confidentiality, 96 Geo. L.J. 123 (2007). In Humphers v. First Interstate Bank of Oregon, 298 Or. 706, 696 P.2d 527 (1985), plaintiff birth mother agreed to place for adoption her child, born out of wedlock. An anonymous adoption was effected. Later, the child approached the doctor who had delivered her seeking her birth mother's identity. The doctor gave her a letter to the hospital which enabled her to obtain release of the sealed information by falsely stating that plaintiff had taken DES during her pregnancy and that her daughter needed the records for medical reasons. The plaintiff was distressed when located and sued the doctor's estate (he had died) for invasion of privacy and for unauthorized disclosure of the confidential information. The court held no recovery for invasion of privacy, but held for the plaintiff on her confidentiality claim. Similarly, in Doe v. Portland Health Centers, 99 Or.App. 423, 782 P.2d 446 (1989), a hospital employee disclosed information about a patient's suicide attempt to a person who subsequently publicized it widely. The patient's mother sued in breach of confidentiality and invasion of privacy, among other causes of action. The court agreed that plaintiff

had no action under invasion of privacy because defendant's disclosure was not made to the public or a large number of persons. She also failed in her confidentiality action, since it was not her confidence which had been breached, although her claim in breach of contract, and the duty arising therefrom, was allowed to proceed.

Not all courts have maintained the distinction between the two actions: often the action, in substance for breach of confidence, is labelled an action for invasion of privacy: See Doe v. Roe, 93 Mise.2d 201, 400 N.Y.S.2d 668 (1977) (psychiatrist published a book recording the plaintiff patient's thoughts, feelings, and fantasies; actionable although patient not named). The confluence of the two actions may be observed in the following cases on disclosure of HIV status. Such disclosure of a private fact that may give rise to a breach of confidentiality claim (Estate of Behringer v. Medical Center at Princeton, 249 N.J.Super. 597, 592 A.2d 1251 (1991) (hospital failed to preserve confidentiality of HIV antibody test results of patient)). Such disclosure may also give rise to an invasion of privacy claim. Urbaniak v.

1101

Newton, 226 Cal.App.3d 1128, 277 Cal.Rptr. 354 (1991) (disclosure of HIV status by defendant physician violated privacy rights of plaintiff when information was revealed by plaintiff to protect others who may come in contact with examining instrument). The latter case was characterized as one of "public disclosure of true, embarrassing private facts * * But a better characterization would be as a breach of confidence claim where the information was disclosed within a relationship of confidence.

The action in breach of confidence, from a fiduciary relationship between the parties or from a confidential relationship: See Horne v. Patton, 291 Ala. 701, 287 So.2d 824 (1973) (physician's duty to patient); Street v. Hedgepath, 607 A.2d 1238 (D.C. App. 1992) (same). In the United States, the accumulating law has been conceptualized as providing a new action in tort: the relationship establishes a duty of confidentiality: Note, Breach of Confidence: An Emerging Tort, 82 Colum. L. Rev. 1426 (1982) is based on the relationship established between the person entrusting the information and the person receiving it.

5. Two important issues remain. First, the information must be confidential. If the information is in the public domain, there is nothing to protect. Messinger v. United States, 769 F.Supp. 935, 937 (D.Md. 1991) ("It is axiomatic that in order to bring suit for breach of confidentiality, the information allegedly published without consent cannot have previously been made public in a legitimate manner").

See also Meetze v. Associated Press, 230 S.C. 330, 95 S.E.2d 606 (1956) (dates of birth and marriage); Stryker v. Republic Pictures Corp., 108 Cal.App.2d 191, 238 P.2d 670 (1951) (military service record); Bell v. Courier- Journal & Louisville Times Co., 402 S.W.2d 84 (Ky. 1966) (tax delinquency); cf. Rome Sentinel Co. v. Boustedt, 43 Mise.2d 598, 252 N.Y.S.2d. 10 (1964) (death certificate). Second, even confidential information may be disclosed to appropriate parties on occasion. Thus, in Bryson v. Tillinghast, 749 P.2d 110 (Okla. 1988), the plaintiff, while committing a rape, had been bitten on his penis. He sought medical treatment. No cause of action was maintainable against the physician who provided information to investigating police.

The recipient of the confidential information also may owe a duty to warn or protect persons who may be injured at the hands of the provider of the information: recall Tarasoff, supra Chapter 8 (duty of mental health professionals to warn or protect third parties of dangers posed by patients). Presumably, if there is a tort duty to disclose information, there is no liability for doing so. See In re Viviano, 645 So.2d 1301 (La. Ct. App. 4th Cir. 1994), writ denied, 650 So.2d 254 (La. 1995) (holding that psychotherapist's disclosure of a patient's threats to a federal judge, who was an intended victim, and the FBI violated neither the patient's right of privacy nor the professional standard of care). Do the cases provide a dilemma for some classes of defendants?

6. In a number of cases, the English courts have developed the law on breach of confidence to protect privacy interests more broadly. Campbell v. Mirror Group Newspapers Ltd., [2004] 2 A.C. 457 (photograph published of plaintiff celebrity supermodel on a public street leaving a "Narcotics

Anonymous" group meeting was a breach of plaintiffs confidentiality that protects human autonomy and dignity, in the right to control dissemination of information about private life and the right to esteem and respect of people) and Douglas & Others v. Hello! Ltd. & Others, [2006] QB 125 (unauthorized photographs of the Douglas, Zeta-Jones wedding).

7. Defendant, an exasperated creditor, put up a placard in the show window of his garage, on the public street, stating that "Dr. W.R. Morgan owes an account here of $49.67. This account will be

advertised as long as it remains unpaid." Brents v. Morgan, 221 Ky. 765, 299 S.W. 967 (1927). Cf. Hamilton v. Crown Life Ins. Co., 246 Or. 1, 423 P.2d 771 (1967).

8. On the requirement that the publicity be highly offensive to a person of ordinary sensitivities, see Bitsie v. Walston, 85 N.M. 655, 515 P.2d 659 (1973), cert, denied, 85 N.M. 639, 515 P.2d 643 (1973) (holding that traditional beliefs of the Navajo about taking a child's photograph were not sufficient to make the action highly offensive where defendant newspaper did not know of the beliefs).

9. Constitutional Law. The Supreme Court has stopped short of constitutionally condemning the tort. The Court in The Florida Star v. B.J.F., 491 U.S. 524 (1989), addressed the issue of civil liability of a newspaper which had published the name of the victim of a sexual offense in violation of a Florida statute. The newspaper reporter had lawfully copied the police report which mistakenly included the victim's name. Unlike the foundational case of Cox Broadcasting Corp. v. Cohn, 420 U.S. 469 (1975), the protected nature of accurate reports of judicial proceedings was not implicated. Nevertheless, the Court found the publication was not actionable under per se negligence theory because it was of "truthful information about a matter of public interest." Such publication could be proscribed only where it served to "further a state interest of the highest order."

The Court, however, did not completely eliminate the tort. Justice Marshall, delivering the Court's opinion, announced:

Our holding today is limited. We do not hold that truthful publication is automatically constitutionally protected, or that there is no zone of personal privacy within which the State may protect the individual

from intrusion by the press, or even that the State may never punish publication of the name of a victim of a sexual offence. We hold only that where a newspaper publishes truthful information which it has lawfully obtained, punishment may lawfully be imposed, if at all, only when narrowly tailored to a state interest of the highest order ***.

Justice White, joined by the Chief Justice and Justice O'Connor, dissented. He was not sanguine about the future of the tort. Citing, Time, Inc. v. Hill, 385 U.S. 374 (1967), and the principal case, he concluded:

[T]he trend in "modern" jurisprudence has been to eclipse an individual's right to maintain private any truthful information that the press wished to publish. ***Today, we hit the bottom of the slippery slope.

In Bartnicki v. Vopper, 532 U.S. 514 (2001), defendants broadcast plaintiffs' taped cellphone conversations that had been intercepted and

recorded by an unknown person in violation of federal and state law. The tape had been left with Vopper, a radio talk show host who, knowing of their illegal source, later broadcast the tapes, revealing plaintiffs' telephone numbers, together with private information about the teachers' union tactics in a labor dispute. Plaintiff Bartnicki received threatening phone calls. The Court held that illegally intercepted phone calls later broadcast by others were protected by the First Amendment. The holding, however, bristles with qualifications. The majority determined that the legal garnering of the tape was critical. In weighing the interests, privacy versus free

speech, the Court's opinion puts much emphasis on the "newsworthiness" of the information weighing that against the privacy interests that were diminished. This was particularly the view of Justices Breyer and O'Connor, who pointed to the threat of violence in the conversation as eroding "legitimate interest in maintaining privacy," Id. at 539. The dissenting judges noted that want of enforcement reduced deterrence of illegal scanning. Protection of privacy by enforcement would increase speech.

10. The Colorado Supreme Court has identified at least one other area in which a State's interest may be of a sufficiently high order as to impinge on the First Amendment: protection of sexual assault victims' privacy, however newsworthy the facts. People v. Bryant, 94 P.3d 624 (Colo. 2004) (rape shield law prevented media from publishing transcript of in camera testimony concerning the sexual behavior of accuser prior and subsequent to her alleged rape by a basketball star). Accountability for sexual abuse has increased in recent years in terms of civil remedies. Should victims be able to remain anonymous? Consider the words of the New York Supreme Court in Doe v. MacFarland, "Concomitant with the ["Me Too"] movement to empower victims by providing the possibility of monetary or other redress, comes a recognition that the victims should not remain in the shadows, hiding as if they have done something wrong that warrants them feeling shame. In this Court's opinion, asking the Court to allow plaintiff to remain in the shadows only reinforces the ill informed opinion that a victim of sexual abuse is to be stigmatized. This Court believes that only by allowing these claims to be seen openly in the light of day can society truly come to grips with child sexual abuse and appreciate that victims are not to

be held responsible and it is the abusers who must be made accountable." No. 34675/2019, 2019 WL 6766012, at *16 (N.Y. Sup. Ct. Dec. 10, 2019).

11. Should individuals be given privacy protection to allow them to "make a new start in life?" Judicial attitudes have changed. Melvin v. Reid, 112 Cal.App. 285, 297 P. 91 (1931), is a widely cited privacy case. Gabrielle Darley, a prostitute, had been tried for murder and acquitted in a famous case. She subsequently married, left the state and "thereafter at all times lived an exemplary, virtuous, honorable and righteous life." Defendant produced and released a movie entitled "The Red Kimono" based on plaintiffs experiences, using her true maiden name and advertising the film as a true account.

These cases, however, are exceptional and the modern trend is to confine them. See Johnson v. Harcourt, Brace, Jovanovich, Inc., 43 Cal. App. 3d 880, 118 Cal. Rptr. 370 (Cal. Ct. App. 1974); Haynes v. Alfred A. Knopf, Inc., 8

1104

F.3d 1222 (7th Cir. 1993); Gates v. Discovery Commc'ns, Inc., 34 Cal. 4th 679, 101 P.3d 552 (2004). Haynes v. Alfred A. Knopf, 8 F.3d 1222, 1231 (7th Cir. 1993). In Haynes, Posner J. trenchantly discusses the case law. Plaintiffs early married life had been described at length in a book about African- American migration to the North. Plaintiff had reformed and was involved in community and church affairs when the book publicized his early and wayward ways. Posner J. found the publication was not actionable because although the disclosure may have deeply offended plaintiff, the facts were of a kind in which the public has a legitimate interest. Id. at 1232. The

question turns on two criteria, "offensiveness and newsworthiness." Publications, particularly photographs that gratuitously ridicule, especially with a connotation, are actionable. In Gates v. Discovery Communications, Inc., 101 P.3d 552 (Calif. 2004) defendants' television producers and transmitters aired an account of a crime in which plaintiff was involved a dozen years prior. Citing the fact that the published information was on the public record, the court held the disclosure was not actionable. Any state interest on rehabilitation was found not to outweigh the interest in publication of truthful public information.

Beyond this, the state may have an interest to prevent the publication of true facts in vindication of a paramount social interest, Capra v. Thoroughbred Racing Ass'n of North America, Inc., 787 F.2d 463 (9th Cir.1986), cert, denied, 479 U.S. 1017 (1986) (disclosures of identity of persons in witness protection program).

12. In The Florida Star, as in other cases, the court emphasizes that the information could have been kept secret. Once it reached the "public domain" through lawful means, however, the media can publish it. What constitutional law restrictions apply to breach of confidence? In Cohen v. Cowles Media Company, 501 U.S. 663 (1991), the plaintiff gave information about a political candidate to reporters of the defendant newspapers, conditioned upon the promise that his identity remain confidential. The defendant newspapers published stories identifying the plaintiff as the source of the information. The plaintiff was fired by his employer. The majority found the plaintiff to have a good cause of action for the loss occasioned by the breach. The Court's opinion distinguished The Florida Star line of cases. Minnesota law "simply requires those

making promises to keep them." In Ruzicka v. Conde Nast Publications, Inc., 999 F.2d 1319 (8th Cir. 1993), Glamour magazine published a story about therapist-patient sexual abuse. Plaintiff gave information to the story's author on condition that she not be identified or identifiable. Story was published changing her name but supplying details allowing a reasonable recipient of the communication to identify her. (She was the only female law student or lawyer serving on the Minnesota Task Force Against Sexual Abuse.) Liability was based on a promissory estoppel theory. What measure of damages could be given? Would they include the harm done by the subsequent publications?

Is protection of confidentiality consistent with the tenets of the First Amendment? The government contracts with its employees to keep information secret. An employee subject to such a contract discloses the

information. Is the employee (or former employee) liable for breach of confidence? Can a publisher of the information, knowing of its confidential nature, be held liable? May that publisher be enjoined from publication? These issues were aired in United States v. Marchetti, 466 F.2d 1309 (4th Cir.1972), cert, denied, 409 U.S. 1063 (1972) (former CIA agent revealed secrets in book in violation of agreement) and United States v. Snepp, 897 F.2d 138 (4th Cir.1990) (similar facts). The English and Commonwealth courts in the Spycatcher litigation wrestled with the same issues when a former M.I.5 agent in retirement in Tasmania wrote a book disclosing intelligence secrets. The British Government waged a global

campaign to suppress the publication: Attorney-General v. Guardian Newspapers (No. 2), [1990] 1 A.C. 109. Most recently, the United States has sued Edward Snowden for breach of contract and breach of fiduciary duty over his autobiography, Permanent Record (September 17, 2019).

Cantrell v. Forest City Publishing Co.

Supreme Court of the United States, 1974.

419 U.S. 245, 95 S.Ct. 465, 42 L.Ed.2d 419.

Mr. JUSTICE Stewart delivered the opinion of the Court.

Margaret Cantrell and four of her minor children brought this diversity action in a federal district court for invasion of privacy against the Forest City Publishing Company, publisher of a Cleveland newspaper, The Plain Dealer, and against Joseph Eszter has, a reporter formerly employed by The Plain Dealer, and Richard Conway, a Plain Dealer photographer. The Cantrells alleged that an article published in The Plain Dealer Sunday Magazine unreasonably placed their family in a false light before the public through its many inaccuracies and untruths. The District Judge struck the claims relating to punitive damages as to all the plaintiffs and dismissed the actions of three of the Cantrell children in their entirety, but allowed the case to go to the jury as to Mrs. Cantrell and her oldest son, William. The jury returned a verdict against all three of the respondents for compensatory money damages in favor of these two plaintiffs.

The Court of Appeals for the Sixth Circuit reversed, holding that, in the light of the First and Fourteenth Amendments, the District Judge

should have granted the respondents' motion for a directed verdict as to all the Cantrells. Cantrell v. Forest City Publishing Co., 484 F.2d 150. We granted certiorari, 418 U.S. 909.

I. In December 1967, Margaret Cantrell's husband Melvin was killed along with 43 other people when the Silver Bridge across the Ohio River at Point Pleasant, West Virginia, collapsed. The respondent Eszterhas was assigned by The Plain Dealer to cover the story of the disaster. He wrote a "news feature" story focusing on the funeral of Melvin Cantrell and the impact of his death on the Cantrell family.

Five months later, after conferring with the Sunday Magazine editor of The Plain Dealer, Eszterhas and photographer Conway returned to the

1106

Point Pleasant area to write a follow-up feature. The two men went to the Cantrell residence, where Eszterhas talked with the children and Conway took 50 pictures. Mrs. Cantrell was not at home at any time during the 60 to 90 minutes that the men were at the Cantrell residence.

Eszterhas's story appeared as the lead feature in the August 4, 1968, edition of The Plain Dealer Sunday Magazine. The article stressed the family's abject poverty; the children's old, ill-fitting clothes and the deteriorating condition of their home were detailed in both the text and accompanying photographs. As he had done in his original, prize-winning article on the Silver Bridge disaster, Eszterhas used the Cantrell family to illustrate the impact of the bridge collapse on the lives of the people in the Point Pleasant area.

It is conceded that the story contained a number of inaccuracies and false statements. Most conspicuously, although Mrs. Cantrell was not present at any time during the reporter's visit to her home, Eszterhas wrote, "Margaret Cantrell will talk neither about what happened nor about how they are doing. She wears the same mask of non-expression she wore at the funeral. She is a proud woman. She says that after it happened, the people in town offered to help them out with money and they refused to take it." Other significant misrepresentations were contained in details of Eszterhas' descriptions of the poverty in which the Cantrells were living and the dirty and dilapidated conditions of the Cantrell home.

The case went to the jury on a so-called "false light" theory of invasion of privacy. In essence, the theory of the case was that by publishing the false feature story about the Cantrells and thereby making them the objects of pity and ridicule, the respondents damaged Mrs. Cantrell and her son William by causing them to suffer outrage, mental distress, shame, and humiliation.

II. In Time, Inc. v. Hill, 385 U.S. 374, the Court considered a similar false light, invasion of privacy action. The New York Court of Appeals had interpreted New York Civil Rights Law, McKinney's Consol.Laws, c. 6, §§ 50-51 to give a "newsworthy person" a right of action when his or her name, picture or portrait was the subject of a "fictitious" report or article. Material and substantial falsification was the test for recovery. [C] Under this doctrine the New York courts awarded the plaintiff James Hill compensatory damages based on his complaint that Life Magazine had falsely reported that a new Broadway play portrayed the Hill family's experience in being held hostage by three escaped convicts. This Court, guided by its decision in NYT v.

Sullivan, which recognized constitutional limits on a State's power to award damages for libel in actions brought by public officials, held that the constitutional protections for speech and press precluded the application of the New York statute to allow recovery for "false reports of matters of public interest in the absence of proof that the defendant published the report with knowledge of its falsity or in reckless disregard of the truth."

1107

[C] Although the jury could have reasonably concluded from the evidence in the Hill case that Life had engaged in knowing falsehood or had recklessly disregarded the truth in stating in the article that "the story re-enacted" the Hill family's experience, the Court concluded that the trial judge's instructions had not confined the jury to such a finding as a predicate for liability as required by the Constitution. [C]

The District Judge in the case before us, in contrast with the trial judge in Time, Inc. v. Hill, did instruct the jury that liability could be imposed only if it concluded that the false statements in the Sunday Magazine feature article on the Cantrells had been made with knowledge of their falsity or in reckless disregard of the truth. No objection was made by any of the parties to this knowing-or-reckless-falsehood instruction. Consequently, this case presents no occasion to consider whether a State may constitutionally apply a more relaxed standard of liability for a publisher or broadcaster of false statements injurious to a private individual under a false-light theory of invasion of privacy, or whether the constitutional standard announced in Time, Inc. v. Hill applies to all false-light cases. Cf.

Gertz, supra p. 1010. Rather, the sole question that we need decide is whether the Court of Appeals erred in setting aside the jury's verdict.

III. At the close of the petitioners' case-in-chief, the District Judge struck the demand for punitive damages. He found that Mrs. Cantrell had failed to present any evidence to support the charges that the invasion of privacy "was done maliciously within the legal definition of that term." The Court of Appeals interpreted this finding to be a determination by the District Judge that there was no evidence of knowing falsity or reckless disregard of the truth introduced at the trial. ***

The Court of Appeals appears to have assumed that the District Judge's finding of no malice "within the legal definition of that term" was a finding based on the definition of "actual malice" established by this Court in NYT v. Sullivan: "with knowledge that [a defamatory statement] was false or with reckless disregard of whether it was false or not." As so defined, of course, "actual malice" is a term of art, created to provide a convenient shorthand for the standard of liability that must be established before a State may constitutionally permit public officials to recover for libel in actions brought against publishers. As such, it is quite different from the common-law standard of "malice" generally required under state tort law to support an award of punitive damages. In a false- light case, common-law malice--frequently expressed in terms of either personal ill will toward the plaintiff or reckless or wanton disregard of the plaintiff's rights--would focus on the defendant's attitude toward the plaintiffs privacy, not towards the truth or falsity of the material

published. See Time, Inc. v. Hill, 385 U.S., at 396 n. 12. See generally W. Prosser, Law of Torts 9-10 (4th ed.).

1108

***[T]he conclusion is inescapable that the District Judge was referring to the common-law standard of malice rather than to the New York Times "actual malice" standard when he dismissed the punitive damages claims. For at the same time that he dismissed the demands for punitive damages, the District Judge refused to grant the respondents' motion for directed verdicts as to Mrs. Cantrell's and William's claims for compensatory damages. And, as his instructions to the jury made clear, the District Judge was fully aware that the Time, Inc. v. Hill meaning of the New York Times "actual malice" standard had to be satisfied for the Cantrells to recover actual damages. Thus, the only way to harmonize these two virtually simultaneous rulings by the District Judge is to conclude, contrary to the decision of the Court of Appeals, that in dismissing the punitive damages claims he was not determining that Mrs. Cantrell had failed to introduce any evidence of knowing falsity or reckless disregard of the truth. This conclusion is further fortified by the District Judge's subsequent denial of the respondents' motion for judgment N.O.V. and alternative motion for a new trial.

Moreover, the District Judge was clearly correct in believing that the evidence introduced at trial was sufficient to support a jury finding that the respondents Joseph Eszterhas and Forest City Publishing Company had published knowing or reckless falsehoods about the Cantrells. There was no dispute during the trial that Eszterhas, who did not testify, must have known that a number of the statements in

the feature story were untrue. In particular, his article plainly implied that Mrs. Cantrell had been present during his visit to her home and that Eszterhas had observed her "wearing] the same mask of nonexpression she wore [at her husband's] funeral." These were "calculated falsehoods," and the jury was plainly justified in finding that Eszterhas had portrayed the Cantrells in a false light through knowing or reckless untruth.

The Court of Appeals concluded that there was no evidence that Forest City Publishing Company had knowledge of any of the inaccuracies contained in Eszterhas' article. However, there was sufficient evidence for the jury to find that Eszterhas' writing of the feature was within the scope of his employment at The Plain Dealer and that Forest City Publishing Company was therefore liable under traditional doctrines of respondeat superior. Although Eszterhas was not regularly assigned by The Plain Dealer to write for the Sunday Magazine, the editor of the magazine testified that as a staff writer for The Plain Dealer, Eszterhas frequently suggested stories he would like to write for the magazine. When Eszterhas suggested the follow-up article on the Silver Bridge disaster, the editor approved the idea and told Eszterhas the magazine would publish the feature if it was good. From this evidence, the jury could reasonably conclude that Forest City Publishing Company, publisher of The Plain Dealer should be held vicariously liable for the damage caused by the knowing falsehoods contained in Eszterhas' story.

1109

For the foregoing reasons the judgment of the Court of Appeals is reversed and the case is remanded to that court with directions to

enter a judgment affirming the judgment of the District Court as to the respondents Forest City Publishing Company and Joseph Eszterhas. [Justice Douglas dissented, with opinion.]

NOTES AND QUESTIONS

1. This branch of the tort of invasion of privacy can be described as placing the plaintiff in an objectionable false light in the public eye. It goes back as far as Lord Byron v. Johnston, 2 Mer. 29, 35 Eng. Rep. 851 (1816), when Byron succeeded in enjoining the circulation of a bad poem that had been attributed to his pen. The Restatement (Second) of Torts § 652E (1977) explains that false-light actions protect the plaintiffs interest in "not being made to appear before the public... otherwise than as he is." Courts have likened this interest to the plaintiffs interest in possessing a good reputation.

Plaintiff, a war hero, was the subject of a motion picture produced by the defendant. In addition to portraying plaintiffs immense valor on the battlefield, defendant's film includes a detailed yet wholly fictitious narrative of plaintiffs private life, "including a non-existent romance with a girl." Is defendant liable to plaintiff for defamation? For invasion of privacy? See Restatement (Second) of Torts § 652E, comment b, illustration 5. (1977). But see Crowley v. Fox Broadcasting Co., 851 F.Supp. 700 (D. Md. 1994) (requiring the elements of defamation be met in a false-light action). The tort focuses not on the truth or falsity of a statement, but on whether a statement leads the public to believe something false about the plaintiff. Phillips v. Lincoln County School Dist., 161 Or.App. 429, 984 P.2d 947 (1999). The false light must be shed on the individual plaintiff. Michigan United Conservation Clubs v. CBS News, 485

F.Supp. 893 (W.D. Mich. 1980) (no action available to individual Michigan hunters for television documentary's offensive portrayal of hunters in Michigan generally).

Representative cases include Leverton v. Curtis Pub. Co., 192 F.2d 974 (3d Cir.1951) (picture of child, hurt in automobile accident, used to illustrate article, "They Ask to be Killed"); Peay v. Curtis Pub. Co., 78 F.Supp. 305 (D.D.C.1948) (picture of honest taxi driver illustrating article on the cheating propensities of taxi drivers); Douglass v. Hustler Magazine, Inc., 769 F.2d 1128 (7th Cir.1985), cert, denied, 475 U.S. 1094 (1986) (plaintiff allowed Playboy to run nude picture of her, but Hustler did it without permission; false light lies for implying that she would allow that magazine to carry the picture); Lerman v. Flynt Distributing Co., Inc., 745 F.2d 123 (2d Cir.1984), cert, denied, 471 U.S. 1054 (1985) (plaintiff identified as actress in photographs topless and in "orgy" scene in defendant's magazine); Peoples Bank and Trust Co. of Mountain Home v. Globe International Publishing, Inc., 978 F.2d 1065 (8th Cir.1992), aff'g 786 F.Supp. 791 (W.D.Ark. 1992) (plaintiff, a ninety-five-year-old woman, had her photograph featured in defendant's tabloid reporting that an Australian woman of 101 had been forced to quit her job because an affair with a millionaire had left her

pregnant; award of $850,000 in punitive damages); Kolegas v. Heftel Broadcasting Corp., 154 I11.2d 1, 607 N.E.2d 201, 180 III.Dec. 307 (1992) (plaintiff placed in false light by defendant's disc jockey stating that plaintiff and his wife were in shotgun wedding and his

wife and son had abnormally large heads; the imputations were highly offensive).

2. In Samuel v. Curtis Pub. Co., 122 F.Supp. 327 (N.D.Cal. 1954), a woman stood on the edge of the Golden Gate bridge in San Francisco, about to jump. Plaintiff was photographed while trying to dissuade her. Two years later defendant published in its magazine an article on suicide, and used the picture as an illustration. This was held not to invade the plaintiffs privacy. In accord are Sarat Lahiri v. Daily Mirror, Inc., 162 Mise. 776, 295 N.Y.S. 382 (1937) (picture of Hindu illusionist illustrating article on the Indian rope trick); Oma v. Hillman Periodicals, 281 App.Div. 240, 118 N.Y.S.2d 720 (1953) (picture of boxer illustrating article on boxing); Kline v. Robert M. McBride & Co., 170 Mise. 974, 11 N.Y.S.2d 674 (1939) (picture of strikebreaker, book on strike-breaking). How are the two groups of cases to be distinguished?

3. In the privacy action, what becomes of the various safeguards thrown about the freedom of the press in defamation cases, such as the necessity of a defamatory innuendo, the requirement of proof of special damage when what is published is not actionable per se, the retraction statutes, and those requiring the filing of a bond for costs? See Prosser, Privacy, 48 Calif.L.Rev. 383, 422--23 (1960); Wade, Defamation and the Right of Privacy, 15 Vand. L. Rev. 1093 (1962).

4. At least 28 states and the District of Columbia expressly recognize false light invasion of privacy. Jurisdictions that reject the tort include: Colorado: Denver Publishing Co. v. Bueno, 54 P.3d 893 (2002); Minnesota: Markgraf v. Douglas Corporation., 468 N.W.2d 80 (Minn.App.1991); Lake v. Wal-Mart Stores, Inc., 582 N.W.2d 231,

235 (Minn. 1998) (finding that false- light actions are similar to, but more expansive than, defamation actions, and as such create an unacceptable tension between tort law and the First Amendment); North Carolina: Renwick v. News and Observer Publishing Co., 310 N.C. 312, 312 S.E.2d 405 (1984); Hall v. Post and the Post Publishing Co., Inc., supra page 1093; South Carolina: Brown v. Pearson, 326 S.C. 409, 483 S.E.2d 477 (S.C. App. Ct. 1997); Texas: Cain v. Hearst Corporation, 878 S.W.2d 577 (Tex. 1994) (plaintiff, a prison inmate with a shocking criminal record, claimed defendant's article actionable because it claimed he was a member of the "Dixie Mafia" and had killed as many as eight people; held tort should not be recognized, but against strong dissent). In Missouri, no action is available where a defamation action would be adequate to afford relief: Sullivan v. Pulitzer Broadcasting Co., 709 S.W.2d 475 (Mo.1986); Renner v. Donsbach, 749 F.Supp. 987 (W.D.Mo.1990); but in Meyerkord v. Zipatoni Co., 276 S.W.3d 319 (Mo. Ct. App. 2008) the court favored the cognizability of the tort. In Florida, the court rejected the tort as "failing to add anything distinctive to the law." Jews for Jesus, Inc. v. Rapp, 997 So.2d 1098 (Fla. 2008). Three other jurisdictions have found that state statutory rights to privacy exclude false-light actions: Howell v. New York Post Co., Inc., 81 N.Y.2d 115, 596 N.Y.S.2d 350, 612 N.E.2d 699 (1993); Zinda v.

Louisiana Pacific Corp., 149 Wis.2d 913, 440 N.W.2d 548 (1989); Falwell v. Penthouse Intern., Ltd., 521 F.Supp. 1204 (W.D. Va. 1981) (applying Virginia law); and Franchise Tax Bd. of Cal v. Hyatt, 335 P.3d 125, 141 (2014) vacated and remanded sub. nom. Franchise Tax Bd. of Cal. v. Hyatt, 136 S.Ct. 431 (2016).

5. Constitutional Law. As the principal case notes, Time, Inc. v. Hill, 385 U.S. 374 (1967) established that false-light cases involving matters of public concern require actual malice: that the defendant knew of the statement's falsity, or acted with reckless disregard of the statement's truth. Subsequently, the Court limited the malice requirement to statements concerning public figures, and held that mere negligence is sufficient for claims by private individuals. Gertz v. Robert Welch, Inc., supra page 1010. Gertz, however, was a defamation case, and its effect on the Time's false-light standard is not presumptive. The Court did not reconcile the two cases in the principal case here, and it remains unclear whether the Gertz relaxation applies to false-light cases, or whether the Time standard continues to require malice whenever the false-light case, regardless of the private character of the plaintiff, involves a matter of public concern. See, applying the negligence standard to a false-light case, Wood v. Hustler Mag., Inc., 736 F.2d 1084 (5th Cir. 1984); Jones v. Palmer Communications, Inc., 440 N.W.2d 884, 894 (Iowa 1989) (the "false light" cases are subject to the same constitutional constraints as defamation cases); Crump v. Beckley Newspapers, Inc., 173 W.Va. 699, 320 S.E.2d 70 (1983) (holding that the inconsistency will be resolved in favor of Gertz-, photograph of woman coal miner was used to illustrate an article about sexual harassment in mines). But cf. Lovgren v. Citizens First Nat'l Bank, 126 III.2d 411, 534 N.E.2d 987, 128 III.Dec. 542 (1989) (ruling that at common law a false light action requires a showing of at least reckless falsification). Even though the resolution of the conflict between Gertz and Time Inc. is in doubt as to the libel of a private

person where the material is of public interest, is there doubt where the material is of purely private interest?

Tennessee has attempted to reconcile the various policies evinced in the Supreme Court cases, favoring plaintiffs in wholly private matters and the First Amendment in matters of public discourse. West v. Media General Convergence, Inc., 53 S.W.3d 640 (Tenn. 2001) (requiring actual malice for claims by public figures and for claims involving matters of public concern brought by private individuals, but permitting a negligence standard for claims by private individuals involving matters of private concern). Defendant running to unseat the plaintiff incumbent senator produced a political ad that edited courtroom footage, showing plaintiff, to have been involved with getting rich in the sale of "$3,000 worth of Oxycodone". Plaintiff claimed he had been placed in a false light. The court held that the false light, if it were so, did not rise to the level of actual malice and was protected as "legitimate political speech". Palmer v. Alvarado, 561 S.W.3d 367 (Ky. Ct. App. 2018), rev. denied (Dec. 5, 2018).

1112

Hustler Magazine v. Falwell

Supreme Court of the United States, 1988.

485 U.S. 46. 108 S.Ct. 876, 99 L.Ed.2d 41.

Chief Justice Rehnquist delivered the opinion of the Court.

Petitioner Hustler Magazine, Inc., is a magazine of nationwide circulation. Respondent Jerry Falwell, a nationally known minister who has been active as a commentator on politics and public affairs, sued petitioner and its publisher, petitioner Larry Flynt, to recover

damages for invasion of privacy, libel, and intentional infliction of emotional distress. The District Court directed a verdict against respondent on the privacy claim, and submitted the other two claims to a jury. The jury found for petitioners on the defamation claim [on the ground that the "ad parody could not 'reasonably be understood as describing actual facts' about plaintiff or actual events in which he participated." It also] found for respondent on the claim for intentional infliction of emotional distress and awarded damages [of $200,000, including punitive damages]. We now consider whether this award is consistent with the First and Fourteenth Amendments of the United States Constitution.

The inside front cover of the November 1983 issue of Hustler Magazine featured a "parody" of an advertisement for Campari Liqueur that contained the name and picture of respondent and was entitled "Jerry Falwell talks about his first time." This parody was modeled after actual Campari ads that included interviews with various celebrities about their "first times." Although it was apparent by the end of each interview that this meant the first time they sampled Campari, the ads clearly played on the sexual double entendre of the general subject of "first times." Copying the form and layout of these Campari ads, Hustler's editors chose respondent as the featured celebrity and drafted an alleged "interview" with him in which he states that his "first time" was during a drunken incestuous rendezvous with his mother in an outhouse. The Hustler parody portrays respondent and his mother as drunk and immoral, and suggests that respondent is a hypocrite who preaches only when he is drunk. In small print at the bottom of the page, the ad contains the disclaimer, "ad parody--not to be taken seriously." The magazine's

table of contents also lists the ad as "Fiction; Ad and Personality Parody." ***

On appeal [from the District Court,] the United States Court of Appeals for the Fourth Circuit affirmed the judgment against petitioners. The court rejected petitioners' argument that the "actual malice" standard of New York Times Co. v. Sullivan, 376 U.S. 254 (1964), must be met before respondent can recover for emotional distress. The court agreed that because respondent is concededly a public figure, petitioners are "entitled to the same level of first amendment protection in the claim for intentional infliction of emotional distress that they received in [respondent's] claim for libel." [C] But this does not mean that a literal application of the actual malice rule is appropriate in the context of an

1113

emotional distress claim. In the court's view, the New York Times decision emphasized the constitutional importance not of the falsity of the statement or the defendant's disregard for the truth, but of the heightened level of culpability embodied in the requirement of "knowing ***or reckless" conduct. Here, the New York Times standard is satisfied by the state-law requirement, and the jury's finding, that the defendants have acted intentionally or recklessly. [3] The Court of Appeals then went on to reject the contention that because the jury found that the ad parody did not describe actual facts about respondent, the ad was an opinion that is protected by the First Amendment. As the court put it, this was "irrelevant," as the issue is "whether [the ad's] publication was sufficiently outrageous to constitute intentional infliction of emotional distress." [C] Petitioners

then filed a petition for rehearing en banc, but this was denied by a divided court. Given the importance of the constitutional issues involved, we granted certiorari.

* * *

[3] Under Virginia law, in an action for intentional infliction of emotional distress a plaintiff must show that the defendant's conduct (1) is intentional or reckless; (2) offends generally accepted standards of decency or morality; (3) is causally connected with the plaintiffs emotional distress; and (4) caused emotional distress that was severe. 797 F.2d, at 1275, n. 4 (citing Womack v. Eldridge, 215 Va. 338, 210 S.E.2d 145 (1974)).

This case presents us with a novel question involving First Amendment limitations upon a State's authority to protect its citizens from the intentional infliction of emotional distress. We must decide whether a public figure may recover damages for emotional harm caused by the publication of an ad parody offensive to him, and doubtless gross and repugnant in the eyes of most. Respondent would have us find that a State's interest in protecting public figures from emotional distress is sufficient to deny First Amendment protection to speech that is patently offensive and is intended to inflict emotional injury, even when that speech could not reasonably have been interpreted as stating actual facts about the public figure involved. This we decline to do.

At the heart of the First Amendment is the recognition of the fundamental importance of the free flow of ideas and opinions on matters of public interest and concern. "[T]he freedom to speak one's mind is not only an aspect of individual liberty--and thus a good unto

itself--but also is essential to the common quest for truth and the vitality of society as a whole." Bose Corp. v. Consumers Union of United States, [c] Inc., 466 U.S. 485, 503-504 (1984). We have therefore been particularly vigilant to ensure that individual expressions of ideas remain free from governmentally imposed sanctions. The First Amendment recognizes no such thing as a "false" idea. Gertz. ***

The sort of robust political debate encouraged by the First Amendment is bound to produce speech that is critical of those who hold public office or those public figures who are "intimately involved in the resolution of important public questions or, by reason of their fame, shape events in areas of concern to society at large." [C] Justice Frankfurter put it succinctly in Baumgartner v. United States, 322 U.S.

1114

665, 673-674 (1944), when he said that "[o]ne of the prerogatives of American citizenship is the right to criticize public men and measures." Such criticism, inevitably, will not always be reasoned or moderate; public figures as well as public officials will be subject to "vehement, caustic, and sometimes unpleasantly sharp attacks," New York Times, supra, at 270. "[T]he candidate who vaunts his spotless record and sterling integrity cannot convincingly cry 'Foul!' when an opponent or an industrious reporter attempts to demonstrate the contrary." Monitor Patriot Co. v. Roy, 401 U.S. 265, 274 (1971).

Of course, this does not mean that any speech about a public figure is immune from sanction in the form of damages. Since New York

Times Co. v. Sullivan, supra, we have consistently ruled that a public figure may hold a speaker liable for the damage to reputation caused by publication of a defamatory falsehood, but only if the statement was made "with knowledge that it was false or with reckless disregard of whether it was false or not." [C] False statements of fact are particularly valueless; they interfere with the truth-seeking function of the marketplace of ideas, and they cause damage to an individual's reputation that cannot easily be repaired by counterspeech, however persuasive or effective. See Gertz [C]. But even though falsehoods have little value in and of themselves, they are "nevertheless inevitable in free debate," [C], and a rule that would impose strict liability on a publisher for false factual assertions would have an undoubted "chilling" effect on speech relating to public figures that does have constitutional value. "Freedoms of expression require 'breathing space.'" Philadelphia Newspapers, Inc. v. Hepps, 475 U.S. 767, 772 (1986) (quoting New York Times, 376 U.S. at 272). This breathing space is provided by a constitutional rule that allows public figures to recover for libel or defamation only when they can prove both that the statement was false and that the statement was made with the requisite level of culpability.

Respondent argues, however, that a different standard should apply in this case because here the State seeks to prevent not reputational damage, but the severe emotional distress suffered by the person who is the subject of an offensive publication. Cf. Zacchini v. Scripps-Howard Broadcasting Co., 433 U.S. 562 (1977) (ruling that the "actual malice" standard does not apply to the tort of appropriation of a right of publicity). In respondent's view, and in the view of the Court of Appeals, so long as the utterance was intended to inflict emotional

distress, was outrageous, and did in fact inflict serious emotional distress, it is of no constitutional import whether the statement was a fact or an opinion, or whether it was true or false. It is the intent to cause injury that is the gravamen of the tort, and the State's interest in preventing emotional harm simply outweighs whatever interest a speaker may have in speech of this type.

Generally speaking the law does not regard the intent to inflict emotional distress as one which should receive much solicitude, and it is

1115

quite understandable that most if not all jurisdictions have chosen to make it civilly culpable where the conduct in question is sufficiently "outrageous." But in the world of debate about public affairs, many things done with motives that are less than admirable are protected by the First Amendment. In Garrison v. Louisiana, 379 U.S. 64 (1964), we held that even when a speaker or writer is motivated by hatred or ill-will his expression was protected by the First Amendment: "Debate on public issues will not be uninhibited if the speaker must run the risk that it will be proved in court that he spoke out of hatred; even if he did speak out of hatred, utterances honestly believed contribute to the free interchange of ideas and the ascertainment of truth." Id., at 73.

Thus, while such a bad motive may be deemed controlling for purposes of tort liability in other areas of the law, we think the First Amendment prohibits such a result in the area of public debate about public figures.

Were we to hold otherwise, there can be little doubt that political cartoonists and satirists would be subjected to damages awards without any showing that their work falsely defamed its subject. [The court discusses a number of well-known cartoon caricatures.]

Respondent contends, however, that the caricature in question here was so "outrageous" as to distinguish it from more traditional political cartoons. There is no doubt that the caricature of respondent and his mother published in Hustler is at best a distant cousin of the political cartoons described above, and a rather poor relation at that. If it were possible by laying down a principled standard to separate the one from the other, public discourse would probably suffer little or no harm. But we doubt that there is any such standard, and we are quite sure that the pejorative description "outrageous" does not supply one. "Outrageousness" in the area of political and social discourse has an inherent subjectiveness about it which would allow a jury to impose liability on the basis of the jurors' tastes or views, or perhaps on the basis of their dislike of a particular expression. An "outrageousness" standard thus runs afoul of our longstanding refusal to allow damages to be awarded because the speech in question may have an adverse emotional impact on the audience. ***[A]s we stated in FCC v. Pacifica Foundation, 438 U.S. 726 (1978): "[T]he fact that society may find speech offensive is not a sufficient reason for suppressing it. Indeed, if it is the speaker's opinion that gives offense, that consequence is a reason for according it constitutional protection. For it is a central tenet of the First Amendment that the government must remain neutral in the marketplace of ideas." [C] See also Street v. New York, 394 U.S. 576, 592 (1969) ("It is firmly settled that... the public expression of

ideas may not be prohibited merely because the ideas are themselves offensive to some of their hearers").

Admittedly, these oft-repeated First Amendment principles, like other principles, are subject to limitations. We recognized in Pacifica

1116

Foundation, that speech that is " 'vulgar,' 'offensive,' and 'shocking'" is "not entitled to absolute constitutional protection under all circumstances." 438 U.S., at 747. In Chaplinsky v. New Hampshire, 315 U.S. 568 (1942), we held that a state could lawfully punish an individual for the use of insulting " 'fighting' words--those which by their very utterance inflict injury or tend to incite an immediate breach of the peace." Id., at 571-572. These limitations are but recognition of the observation in Dun & Bradstreet, supra that this Court has "long recognized that not all speech is of equal First Amendment importance." But the sort of expression involved in this case does not seem to us to be governed by any exception to the general First Amendment principles stated above.

We conclude that public figures and public officials may not recover for the tort of intentional infliction of emotional distress by reason of publications such as the one here at issue without showing in addition that the publication contains a false statement of fact which was made with "actual malice," i.e., with knowledge that the statement was false or with reckless disregard as to whether or not it was true. This is not merely a "blind application" of the New York Times standard, [c] it reflects our considered judgment that such a standard is necessary to give adequate "breathing space" to the freedoms protected by the First Amendment.

Here it is clear that respondent Falwell is a "public figure" for purposes of First Amendment law. [He cannot recover in libel and] is thus relegated to his claim for damages awarded by the jury for the intentional infliction of emotional distress by "outrageous" conduct. But for reasons heretofore stated this claim cannot, consistently with the First Amendment, form a basis for the award of damages when the conduct in question is the publication of a caricature such as the ad parody involved here. The judgment of the Court of Appeals is accordingly

Reversed.

JUSTICE White, concurring in the judgment. As I see it, the decision in New York Times v. Sullivan, 376 U.S. 254 (1964), has little to do with this case, for here the jury found that the ad contained no assertion of fact. But I agree with the Court that the judgment below, which penalized the publication of the parody, cannot be squared with the First Amendment.

NOTES AND QUESTIONS

1. Why is New York Times v. Sullivan, supra page 987, invoked?

2. Once the plaintiff is identified as a public figure and the speech is directed toward public debate in which the public figure is involved, the courts, consistent with the principal case, have permitted robust and vitriolic attack: Dworkin v. Hustler Magazine Inc., 867 F.2d 1188 (9th Cir.1989) (ad hominem attack on feminist who had advocated suppression of pornography).

In Milkovich supra page 1035, the principal case was treated as one of "imaginative expression" where the burden of falsity rests on the plaintiff. The reasoning implies that the principal case extends beyond public figures to private figures in matters of public interest. It follows that the principal case does not protect the publisher or utterer of statement from liability where the attack is directed to a private individual in a matter of no public interest: Esposito-Hilder v. SFX Broadcasting, 171 Mise.2d 286, 654 N.Y.S.2d 259 (1996) (plaintiff, who worked for a rival radio station, was identified by defendants in an "Ugliest Bride Contest"; held action for intentional infliction of emotional distress could lie, although no defamation action would lie since it asserted no facts about plaintiff).

3. Should limits be applied to speech in order to protect the viability of community norms that "inculcate the ideal of rational deliberation"? See Post, The Constitutional Concept of Public Discourse: Outrageous Opinion, Democratic Deliberation, and Hustler Magazine v. Falwell, 103 Harv.L.Rev. 601, 684 (1990).

4. The Reverend Falwell's mother proposes to bring an action for intentional infliction of emotional distress. Advise her.

Snyder v. Phelps

Supreme Court of the United States, 2011.

562 U.S. 443, 131 S.Ct. 1207, 179 L.Ed.2d 172.

CHIEF JUSTICE Roberts delivered the opinion of the Court.

A jury held members of the Westboro Baptist Church liable for millions of dollars in damages for picketing near a soldier's funeral service. The picket signs reflected the church's view that the United

States is overly tolerant of sin and that God kills American soldiers as punishment. The question presented is whether the First Amendment shields the church members from tort liability for their speech in this case.

Fred Phelps founded the Westboro Baptist Church in Topeka, Kansas, in 1955. The church's congregation believes that God hates and punishes the United States for its tolerance of homosexuality, particularly in America's military. The church frequently communicates its views by picketing, often at military funerals. In the more than 20 years that the members of Westboro Baptist have publicized their message, they have picketed nearly 600 funerals.

Marine Lance Corporal Matthew Snyder was killed in Iraq in the line of duty. Lance Corporal Snyder's father selected the Catholic church in the Snyders' hometown of Westminster, Maryland, as the site for his son's funeral. Local newspapers provided notice of the time and location of the service.

Phelps became aware of Matthew Snyder's funeral and decided to travel to Maryland with six other Westboro Baptist parishioners (two of his daughters and four of his grandchildren) to picket. On the day of the

memorial service, the Westboro congregation members picketed on public land adjacent to public streets near the Maryland State House, the United States Naval Academy, and Matthew Snyder's funeral. The Westboro picketers carried signs that were largely the same at all three locations. They stated, for instance: "God Hates the USA/Thank God for 9/11," "America is Doomed," "Don't Pray for the

USA," "Thank God for IEDs," "Thank God for Dead Soldiers," "Pope in Hell," "Priests Rape Boys," "God Hates Fags," "You're Going to Hell," and "God Hates You."

The church had notified the authorities in advance of its intent to picket at the time of the funeral, and the picketers complied with police instructions in staging their demonstration. The picketing took place within a 10- by 25-foot plot of public land adjacent to a public street, behind a temporary fence. That plot was approximately 1,000 feet from the church where the funeral was held. Several buildings separated the picket site from the church, [c]. The Westboro picketers displayed their signs for about 30 minutes before the funeral began and sang hymns and recited Bible verses. None of the picketers entered church property or went to the cemetery. They did not yell or use profanity, and there was no violence associated with the picketing.

The funeral procession passed within 200 to 300 feet of the picket site. Although Snyder testified that he could see the tops of the picket signs as he drove to the funeral, he did not see what was written on the signs until later that night, while watching a news broadcast covering the event.

Snyder filed suit against Phelps, Phelps's daughters, and the Westboro Baptist Church (collectively Westboro or the church) in the United States District Court for the District of Maryland under that court's diversity jurisdiction. Snyder alleged five state tort law claims: defamation, publicity given to private life, intentional infliction of emotional distress, intrusion upon seclusion, and civil conspiracy.

Westboro moved for summary judgment contending, in part, that the church's speech was insulated from liability by the First Amendment.

The District Court awarded Westboro summary judgment on Snyder's claims for defamation and publicity given to private life, concluding that Snyder could not prove the necessary elements of those torts.

A trial was held on the remaining claims. At trial, Snyder described the severity of his emotional injuries. He testified that he is unable to separate the thought of his dead son from his thoughts of Westboro's picketing, and that he often becomes tearful, angry, and physically ill when he thinks about it. Expert witnesses testified that Snyder's emotional anguish had resulted in severe depression and had exacerbated preexisting health conditions.

A jury found for Snyder on the intentional infliction of emotional distress, intrusion upon seclusion, and civil conspiracy claims, and held

1119

Westboro liable for $2.9 million in compensatory damages and $8 million in punitive damages. Westboro filed several post-trial motions, including a motion contending that the jury verdict was grossly excessive and a motion seeking judgment as a matter of law on all claims on First Amendment grounds. The District Court remitted the punitive damages award to $2.1 million, but left the jury verdict otherwise intact.

In the Court of Appeals, Westboro's primary argument was that the church was entitled to judgment as a matter of law because the First

Amendment fully protected Westboro's speech. The Court of Appeals agreed. The court reviewed the picket signs and concluded that Westboro's statements were entitled to First Amendment protection because those statements were on matters of public concern, were not provably false, and were expressed solely through hyperbolic rhetoric.

We granted certiorari, [c].

To succeed on a claim for intentional infliction of emotional distress in Maryland, a plaintiff must demonstrate that the defendant intentionally or recklessly engaged in extreme and outrageous conduct that caused the plaintiff to suffer severe emotional distress. See Harris v. Jones, supra page 66. The Free Speech Clause of the First Amendment--"Congress shall make no law... abridging the freedom of speech"--can serve as a defense in state tort suits, including suits for intentional infliction of emotional distress. See, e.g., Hustler Magazine, Inc. v. Falwell, supra page 1112.

Whether the First Amendment prohibits holding Westboro liable for its speech in this case turns largely on whether that speech is of public or private concern, as determined by all the circumstances of the case. "[S]peech on 'matters of public concern'... is 'at the heart of the First Amendment's protection.'" Dun & Bradstreet, Inc. v. Greenmoss Builders, Inc., supra page 1021. The First Amendment reflects "a profound national commitment to the principle that debate on public issues should be uninhibited, robust, and wide-open." New York Times Co. v. Sullivan, supra page 987. That is because "speech concerning public affairs is more than self-expression; it is the essence of self- government." Garrison v. Louisiana, 379 U. S. 64,

74-75 (1964). Accordingly, "speech on public issues occupies the highest rung of the hierarchy of First Amendment values, and is entitled to special protection." Connick v. Myers, 461 U. S. 138, 145 (1983)

" '[N]ot all speech is of equal First Amendment importance,'" however, and where matters of purely private significance are at issue, First Amendment protections are often less rigorous, [c] That is because restricting speech on purely private matters does not implicate the same constitutional concerns as limiting speech on matters of public interest: "[T]here is no threat to the free and robust debate of public issues; there is no potential interference with a meaningful dialogue of ideas"; and the "threat of liability" does not pose the risk of "a reaction of self-censorship" on matters of public import.

1120

***"[T]h e boundaries of the public concern test are not well defined." San Diego v. Roe, 543 U.S. 77, 83 (2004) (per curiam). Although that remains true today, we have articulated some guiding principles, principles that accord broad protection to speech to ensure that courts themselves do not become inadvertent censors.

Speech deals with matters of public concern when it can "be fairly considered as relating to any matter of political, social, or other concern to the community," Connick [c] or when it "is a subject of legitimate news interest; that is, a subject of general interest and of value and concern to the public," San Diego [c] The arguably "inappropriate or controversial character of a statement is irrelevant

to the question whether it deals with a matter of public concern." Rankin v. McPherson, 483 U. S. 378, 387 (1987).

Our opinion in Dun & Bradstreet, on the other hand, provides an example of speech of only private concern. In that case we held, as a general matter, that information about a particular individual's credit report "concerns no public issue." The content of the report, we explained, "was speech solely in the individual interest of the speaker and its specific business audience." That was confirmed by the fact that the particular report was sent to only five subscribers to the reporting service, who were bound not to disseminate it further. ***

Deciding whether speech is of public or private concern requires us to examine the " 'content, form, and context'" of that speech, " 'as revealed by the whole record.'" As in other First Amendment cases, the court is obligated "to 'make an independent examination of the whole record' in order to make sure that 'the judgment does not constitute a forbidden intrusion on the field of free expression.'" Bose Corp. v. Consumers Union of United States, Inc., 466 U. S. 485, 499 (1984). In considering content form, and context, no factor is dispositive, and it is necessary to evaluate all the circumstances of the speech, including what was said, where it was said, and how it was said.

The "content" of Westboro's signs plainly relates to broad issues of interest to society at large, rather than matters of "purely private concern." The placards read "God Hates the USA/Thank God for 9/11," "America is Doomed," "Don't Pray for the USA," "Thank God for IEDs," "Fag Troops," "Semper Fi Fags," "God Hates Fags,"

"Maryland Taliban," "Fags Doom Nations," "Not Blessed Just Cursed," "Thank God for Dead Soldiers," "Pope in Hell," "Priests Rape Boys," "You're Going to Hell," and "God Hates You." While these messages may fall short of refined social or political commentary, the issues they highlight--the political and moral conduct of the United States and its citizens, the fate of our Nation, homosexuality in the military, and scandals involving the Catholic clergy--are matters of public import. The signs certainly convey Westboro's position on those issues, in a manner designed, unlike the private speech in Dun & Bradstreet, to reach as broad a public audience as possible. And even if a few of the signs--such as 'You're Going to Hell"

and "God Hates You"--were viewed as containing messages related to Matthew Snyder or the Snyders specifically, that would not change the fact that the overall thrust and dominant theme of Westboro's demonstration spoke to broader public issues.

Apart from the content of Westboro's signs, Snyder contends that the "context" of the speech--its connection with his son's funeral--makes the speech a matter of private rather than public concern. The fact that Westboro spoke in connection with a funeral, however, cannot by itself transform the nature of Westboro's speech. Westboro's signs, displayed on public land next to a public street, reflect the fact that the church finds much to condemn in modern society. Its speech is "fairly characterized as constituting speech on a matter of public concern," Connick [c] and the funeral setting does not alter that conclusion.

Snyder argues that the church members in fact mounted a personal attack on Snyder and his family, and then attempted to "immunize their conduct by claiming that they were actually protesting the United States' tolerance of homosexuality or the supposed evils of the Catholic Church." We are not concerned in this case that Westboro's speech on public matters was in any way contrived to insulate speech on a private matter from liability. Westboro had been actively engaged in speaking on the subjects addressed in its picketing long before it became aware of Matthew Snyder, and there can be no serious claim that Westboro's picketing did not represent its "honestly believed" views on public issues. Garrison, 379 U. S., at 73. There was no preexisting relationship or conflict between Westboro and Snyder that might suggest Westboro's speech on public matters was intended to mask an attack on Snyder over a private matter.

Snyder goes on to argue that Westboro's speech should be afforded less than full First Amendment protection "not only because of the words" but also because the church members exploited the funeral "as a platform to bring their message to a broader audience." ***

Westboro's choice to convey its views in conjunction with Matthew Snyder's funeral made the expression of those views particularly hurtful to many, especially to Matthew's father. The record makes clear that the applicable legal term--"emotional distress"--fails to capture fully the anguish Westboro's choice added to Mr. Snyder's already incalculable grief. But Westboro conducted its picketing peacefully on matters of public concern at a public place adjacent to a public street. Such space occupies a "special position in terms of First Amendment protection." United States v. Grace, 461 U. S. 171,

180 (1983). "[W]e have repeatedly referred to public streets as the archetype of a traditional public forum," noting that " '[t]ime out of mind' public streets and sidewalks have been used for public assembly and debate." Frisby v. Schultz, 487 U. S. 474, 480 (1988).

That said, "[e]ven protected speech is not equally permissible in all places and at all times."[c], Westboro's choice of where and when to

conduct its picketing is not beyond the Government's regulatory reach--it is "subject to reasonable time, place, or manner restrictions" that are consistent with the standards announced in this Court's precedents. [C] Maryland now has a law imposing restrictions on funeral picketing, Md. Crim. Law Code Ann. § 10-205. To the extent these laws are content neutral, they raise very different questions from the tort verdict at issue in this case. Maryland's law, however, was not in effect at the time of the events at issue here, so we have no occasion to consider how it might apply to facts such as those before us, or whether it or other similar regulations are constitutional.

We have identified a few limited situations where the location of targeted picketing can be regulated under provisions that the Court has determined to be content neutral. In Frisby, for example, we upheld a ban on such picketing "before or about" a particular residence, 487 U. S., at 477. In Madsen v. Women's Health Center, Inc., we approved an injunction requiring a buffer zone between protesters and an abortion clinic entrance. 512 U. S. 753, 768 (1994). The facts here are obviously quite different, both with respect to the activity being regulated and the means of restricting those activities.

Simply put, the church members had the right to be where they were. Westboro alerted local authorities to its funeral protest and fully complied with police guidance on where the picketing could be staged. The picketing was conducted under police supervision some 1,000 feet from the church, out of the sight of those at the church. The protest was not unruly; there was no shouting, profanity, or violence.

The record confirms that any distress occasioned by Westboro's picketing turned on the content and view point of the message conveyed, rather than any interference with the funeral itself. A group of parishioners standing at the very spot where Westboro stood, holding signs that said "God Bless America" and "God Loves You," would not have been subjected to liability. It was what Westboro said that exposed it to tort damages.

Given that Westboro's speech was at a public place on a matter of public concern, that speech is entitled to "special protection" under the First Amendment.

The jury here was instructed that it could hold Westboro liable for intentional infliction of emotional distress based on a finding that Westboro's picketing was "outrageous." "Outrageousness," however, is a highly malleable standard with "an inherent subjectiveness about it which would allow a jury to impose liability on the basis of the jurors' tastes or views, or perhaps on the basis of their dislike of a particular expression." Hustler, [c]. In a case such as this, a jury is "unlikely to be neutral with respect to the content of [the] speech," posing "a real danger of becoming an instrument for the suppression of... 'vehement, caustic, and sometimes unpleasan[t]'" expression.

Bose Corp., [c]. Such a risk is unacceptable; "in public debate [we] must tolerate insulting, and even

1123

outrageous, speech in order to provide adequate 'breathing space' to the freedoms protected by the First Amendment." Boos v. Barry, [c]. What Westboro said, in the whole context of how and where it chose to say it, is entitled to "special protection" under the First Amendment, and that protection cannot be overcome by a jury finding that the picketing was outrageous.

For all these reasons, the jury verdict imposing tort liability on Westboro for intentional infliction of emotional distress must be set aside.

The jury also found Westboro liable for the state law torts of intrusion upon seclusion and civil conspiracy. The Court of Appeals did not examine these torts independently of the intentional infliction of emotional distress tort. Instead, the Court of Appeals reversed the District Court wholesale, holding that the judgment wrongly "attache[d] tort liability to constitutionally protected speech." 580 F. 3d, at 226.

***

As a general matter, we have applied the captive audience doctrine only sparingly to protect unwilling listeners from protected speech.

Here, Westboro stayed well away from the memorial service. Snyder could see no more than the tops of the signs when driving to the funeral. And there is no indication that the picketing in any way

interfered with the funeral service itself. We decline to expand the captive audience doctrine to the circumstances presented here.

***Our holding today is narrow. We are required in First Amendment cases to carefully review the record, and the reach of our opinion here is limited by the particular facts before us. As we have noted, "the sensitivity and significance of the interests presented in clashes between First Amendment and [state law] rights counsel relying on limited principles that sweep no more broadly than the appropriate context of the instant case." Florida Star v. B. J. F., supra page 1104.

Westboro believes that America is morally flawed; many Americans might feel the same about Westboro. Westboro's funeral picketing is certainly hurtful and its contribution to public discourse may be negligible. But Westboro addressed matters of public import on public property, in a peaceful manner, in full compliance with the guidance of local officials. The speech was indeed planned to coincide with Matthew Snyder's funeral, but did not itself disrupt that funeral, and Westboro's choice to conduct its picketing at that time and place did not alter the nature of its speech.

Speech is powerful. It can stir people to action, move them to tears of both joy and sorrow, and--as it did here--inflict great pain. On the facts before us, we cannot react to that pain by punishing the speaker. As a Nation we have chosen a different course--to protect even hurtful speech on public issues to ensure that we do not stifle public debate. That

choice requires that we shield Westboro from tort liability for its picketing in this case.

The judgment of the United States Court of Appeals for the Fourth Circuit is affirmed.

It is so ordered

JUSTICE Breyer joined the Court's opinion in a separate concurrence. JUSTICE Alito dissented stressing the "vicious verbal assault in this case" and that Snyder was a private figure. He stressed the limited scope of the tort of infliction of emotional distress.

NOTES AND QUESTIONS

1. The Chief Justice in the principal case admits and Justice Alito in dissent stresses the pain and hurt suffered by the plaintiffs. Why should a discrete and narrow sector of the public bear the costs of free speech for the benefit of the general public? Consider the reflections of the courts in Spano v. Perini Corp., supra page 13 and Surocco v. Geary supra page 137.

2. The Chief Justice describes the tort of intentional infliction of emotional distress as presenting too "malleable" a standard considering the need to allow for "vehement, caustic and sometimes unpleasant" expression. Thinking back to the tort, is its formulation inattentive to the need to provide scope for robust speech? Note in Gertz v. Robert Welch, Inc., supra page 1010 the Court rejects the test in Rosenbloom, extending NYT v. Sullivan, based on the published matter being of public interest and concern. (See note 5. page 995). Rosenbloom was rejected in Gertz as abridging a legitimate state interest and residing too much "latitude to the conscience of judges." Does Rosenbloom ride again?

3. Even in respect of areas of consumer protection where the states have traditionally enjoyed considerable powers in protection of citizens, the Supreme Court has exercised First Amendment doctrine to limit regulations in favor of privacy and maintenance of doctor patient relationships. Sorrell v. IMS Health Inc, 564 U.S. 552 (2011).

CHAPTER 19 CIVIL RIGHTS

Ashby v. White

Court of King's Bench, 1702; House of Lords, 1703.

2 Ld.Raym. 938, 92 Eng.Rep. 126; 1 Brown P.C. 62, 1 Eng.Rep. 417.

HOLT, Chief Justice. The single question in this case is, whether, if a free burgess of a corporation, who has an undoubted right to give his vote in the election of a burgess to serve in Parliament, be refused and hindered to give it by the officer, if an action on the case will lie against such officer.

I am of opinion that judgment ought to be given in this case for the plaintiff. My brothers differ from me in opinion, and they all differ from one another in the reasons of their opinion; but notwithstanding their opinion, I think the plaintiff ought to recover, and that this action is well maintainable, and ought to lie.

But to proceed, I will do these two things: first, I will maintain that the plaintiff has a right and privilege to give his vote: secondly, in consequence thereof, that if he be hindered in the enjoyment or exercise of that right, the law gives him an action against the disturber, and that this is the proper action given by the law. ***

If the plaintiff has a right, he must of necessity have a means to vindicate and maintain it, and a remedy if he is injured in the exercise or enjoyment of it; and indeed it is a vain thing to imagine a right without a remedy; for want of right and want of remedy are reciprocal. ***Where a new Act of Parliament is made for the benefit

of the subject, if a man be hindered from the enjoyment of it, he shall have an action against such person who so obstructed him. ***If then when a statute gives a right, the party shall have an action for the infringement of it, is it not as forcible when a man has his right by the common law? This right of voting is a right in the plaintiff by the common law, and consequently he shall maintain an action for the obstruction of it. ***

And I am of opinion, that this action on the case is a proper action. My brother Powell indeed thinks, that an action upon the case is not maintainable, because here is no hurt or damage to the plaintiff; but surely every injury imports a damage, though it does not cost the party one farthing, and it is impossible to prove the contrary; for a damage is not merely pecuniary, but an injury imports a damage, when a man is thereby hindered of his right. ***. So here in the principal case, the plaintiff is obstructed of his right, and shall therefore have his action. And it is no objection to say, that it will occasion multiplicity of actions; for if men will multiply injuries, actions must be multiplied too; for every man that is injured ought to have his recompence. Suppose the defendant

1126

had beat forty or fifty men, the damage done to each one is peculiar to himself, and he shall have his action. So if many persons receive a private injury by a publick nusance, every one shall have his action. ***

But in the principal case my brother says, we cannot judge of this matter, because it is a Parliamentary thing. O! By all means be very tender of that. Besides it is intricate, and there may be contrariety of

opinions. But this matter can never come in question in Parliament; for it is agreed that the persons for whom the plaintiff voted were elected; so that the action is brought for being deprived of his vote; and if it were carried for the other candidates against whom he voted, his damage would be less. To allow this action will make publick officers more careful to observe the constitution of cities and boroughs, and not to be so partial as they commonly are in all elections, which is indeed a great and growing mischief, and tends to the prejudice of the peace of the nation. But they say, that this is a matter out of our jurisdiction, and we ought not to inlarge it. I agree we ought not to incroach or inlarge our jurisdiction; by so doing we usurp both on the right of the Queen and the people: but sure we may determine on a charter granted by the King, or on a matter of custom or prescription, when it comes before us without incroaching on the Parliament. And if it be a matter within our jurisdiction, we are bound by our oaths to judge of it. This is a matter of property determinable before us. Was ever such a petition heard of in Parliament, as that a man was hindred of giving his vote, and praying them to give him remedy? The Parliament undoubtedly would say, take your remedy at law. It is not like the case of determining the right of election between the candidates. ***

Therefore my opinion is, that the plaintiff ought to have judgment. ***

[The opinions of GOULD, POWYS and POWELL, JJ., constituting the majority in the Court of King's Bench and reversing the jury verdict for the plaintiff, are omitted.

The report of the proceeding in the House of Lords concludes: "After hearing counsel on this writ of error, a debate ensued; and the

question being put, Whether this judgment should be reversed? it was resolved in the affirmative. ***It was therefore ordered and adjudged, that the said judgment should be reversed, and that the plaintiff should recover his damages assessed by the jury; and also, the further sum of 10£. for his costs, in this behalf sustained."]

NOTES AND QUESTIONS

1. Accord: Lane v. Mitchell, 153 Iowa 139, 133 N.W. 381 (1911); Valdez v. Gonzales, 50 N.M. 281, 176 P.2d 173 (1946).

"The objection that the subject-matter of the suit is political is little more than a play upon words. Of course[] the petition concerns political action but it alleges and seeks to recover for private damage. That private

1127

damage may be caused by such political action and may be recovered for in a suit at law hardly has been doubted for over two hundred years. ***If the defendants' conduct was a wrong to the plaintiff the same reasons that allow a recovery for denying the plaintiff a vote at a final election allow it for denying a vote at the primary election that may determine the final result." Holmes, J., in Nixon v. Herndon, 273 U.S. 536, 540 (1927).

2. A similar action lies for wrongfully depriving a person of the right to hold political office. See, e.g., Hill v. Carr, 186 III.App. 515 (1914), and Goetcheus v. Matthewson, 61 N.Y. 420 (1875), both indicating a right to damages based on deprived emoluments of office. Cf. Sutton v. Adams, 180 Ga. 48, 178 S.E. 365 (1934); Judd v. Polk, 267 Ky. 408, 102 S.W.2d 325 (1937). On both of these torts, see

Restatement (Second) of Torts § 865. The right to hold office can be abrogated by legislation, however. See, e.g., People by Foxx v. Agpawa, 2018 IL App (1st) 171976, 105 N.E.3d 846 (legislature's decision to preclude persons who had been convicted of an infamous crime from holding municipal office was a reasonable means of protecting the integrity of elected municipal offices, and thus did not constitute an equal protection violation). The decision of Lord Holt in the principal case was to influence the course of British constitutional history in its transformation to representative democracy. Cornish & Clark, Law and Society in England 1750-1950, 12 (1989).

3. In Morningstar v. Lafayette Hotel Co., 211 N.Y. 465, 105 N.E. 656 (1914), plaintiff was publicly refused service at the restaurant of the hotel where he resided. The reason was his refusal to pay a disputed bill of $1 for special service. Judgment had been given for the defendant. In reversing, Cardozo, J., said: "It is no concern of ours that the controversy at the root of this lawsuit may seem to be trivial. That fact [i.e. apparent triviality] supplies, indeed, the greater reason why the jury should not have been misled into the belief that justice might therefore be denied to the suitor. To enforce one's rights when they are violated is never a legal wrong, and may often be a moral duty. It happens in many instances that the violation passes with no effort to redress it--sometimes from praiseworthy forbearance, sometimes from weakness, sometimes from mere inertia. But the law, which creates a right, can certainly not concede that an insistence upon its enforcement is evidence of a wrong." On a common law action for refusal to serve, see Restatement (Second) of Torts § 866 (1979).

4. To discharge an employee for complying with her duty to serve on a jury will give rise to an action by the employee against the employer. Nees v. Hocks, 272 Or. 210, 536 P.2d 512 (1975); Hodges v. S.C. Toof & Co., 833 S.W.2d 896 (Tenn. 1992) (noting additionally that an action lies where the retaliatory discharge violates a clear public policy, as where an employee is fired for refusing to act illegally). See also 28 U.S.C. § 1875 (2018).

5. Should these torts be confined to an intentional interference with civil rights and duties, or should they extend to a negligent interference? Should they perhaps be restricted to a purposive interference? Consider the approach of English courts, which have adopted a "bad faith" requirement for the tort of misfeasance in public office. See, e.g., Three Rivers District

Council v. Governor and Company of the Bank of England, [2003] 2 A.C. 1 (HL).

6. Despite the remarks of Judge Cardozo in note 3 supra, the tort action for damages sometimes proves inadequate and other remedies are needed. Thus, if a person is wrongfully prevented from voting and recovers in an action of tort, what is the measure of damages? Would it justify the plaintiff in bringing suit or the attorney in taking the case? How might this be handled?

For these reasons, in both the voting and refusal-of-service situations, statutory provisions for injunctive, criminal and administrative relief have largely replaced the common law action. As to voting rights, federal and state statutes control: Voting Rights Act of 1965, 42 U.S.C.A. § 1971. As to refusal of service, see

particularly 42 U.S.C.A. § 2000a. Congress has enacted legislation relying, for its enforcement, on private rights of action. Two examples are the Sherman Act (Title 15, §§ 1--3, 104 Stat. 2880, Pub. L. 101--588) and RICO (Racketeer Influenced and Corrupt Organizations Act) (Title 18, §§ 1961-1968, 84 Stat. 941). Both statutes encourage litigation in furtherance of their aims by providing for the award of super-compensatory charges to private litigants. The Supreme Court in Sedima, S.P.R.L. v. Imrex Co., 473 U.S. 479 (1985), gave a broad interpretation to civil RICO. The parameters of the action are still in flux, see DeFalco v. Bernas, 244 F.3d 286 (2d Cir. 2001) and notes, infra page 1318.

7. Tort law, either alone or arising out of statute, provides a way for the individual to assert rights against government. In this way it can be said to empower the individual in his relations with the state: thus the law functions as an ombudsman, see Wade, Tort Law as Ombudsman, 65 Or. L. Rev. 309 (1986).

8. The most pervasive cause of action arises from the Ku Klux Klan Act of 1871 wherein Congress, acting under the newly ratified Fourteenth Amendment, responded to the violence and lawlessness during Reconstruction. Section 1 of the Act is now codified as 42 U.S.C.A. § 1983 and provides:

Every person who, under color of any statute, ordinance, regulation, custom, or usage of any State or Territory, subjects, or causes to be subjected, any citizen of the United States or other person within the jurisdiction thereof to the deprivation of any rights, privileges, or immunities secured by the Constitution and laws, shall be liable to

the party injured in an action at law, suit in equity, or other proper proceeding for redress...

Very few actions were brought until the Supreme Court decision in Monroe v. Pape, 365 U.S. 167 (1961), which made it clear that the term "every person" included state officers such as state police. The late start has not diminished the power of the section; in fact, the courts have struggled to define its limits. Much of the debate turns on balancing the need to vindicate rights with the conviction that not every wrong needs to be remedied by a federal (as opposed to state) cause of action. Justice Scalia has excoriated the law flowing from Monroe v. Pape, supra. In his dissent in Crawford-El v.

Britton, 523 U.S. 574, 611 (1998), he describes Monroe as a case "that pours into the federal courts tens of thousands of suits each year, and engages this Court in a losing struggle to prevent the Constitution from degenerating into a general tort law,". But compare, Eisenberg and Schwab, The Reality of Constitutional Tort Litigation, 72 Cornell L. Rev. 641 (1987) (empirical survey showed burden of § 1983 litigation was not excessive).

9. In an effort to curb § 1983 litigation, federal courts have "borrowed" the statute of limitations for personal injury claims from state law in the jurisdiction where the § 1983 claims arose. Wilson v. Garcia, 471 U.S. 261 (1985). This has led to varying limitations on the same civil rights claims brought by plaintiffs in different states. Cameron, Civil Rights: Determining the Appropriate Statute of Limitations for Section 1983 Claims, 61 Notre Dame L. Rev. 440, 451 (1986). In 1990, Congress passed 28 U.S.C.A. § 1658, imposing

a standard 4-year Statute of Limitations on all civil actions arising under an act of Congress passed or amended after December 1, 1990; however, this standardization does not apply to § 1983.

10. If the term "every person" included state officers such as state police, did it include local government? In Monell v. New York City Department of Social Services, 436 U.S. 658 (1978), the Supreme Court held, overruling Monroe in part, that a municipality may be held liable for a "policy" or "custom" that causes a constitutional violation. The Court thereby rejected respondeat superior liability under § 1983, holding that a municipality cannot be held liable for a civil rights violation merely because the tortfeasor was in that municipality's employ. Monell, 436 U.S. at 691. Given this liability requirement, could a municipality be liable for a single instance of a civil rights violation? Board of the County Commissioners of Bryan County, Oklahoma v. Brown, 520 U.S. 397 (1997) (holding that Monell does not create municipal liability for isolated failure to properly screen police applicant, but hypothesizing that the Monell test may permit single-instance liability in the case of a systemic failure to train employees). The Court has been willing to find liability where municipal action has the force of law (in Monroe, supra), but has refused to create municipal liability solely for the action of municipal employees (in Monell). In Canton v. Harris, 489 U.S. 378 (1989), the Court established an approach to hard cases: a municipality may be liable for an individual employee's single instance of wrongful conduct when the plaintiff shows that a civil rights violation was a "highly predictable consequence" of the municipality's action, such that the conduct evinces policymakers' "deliberate indifference" to civil rights, (finding liability for failure to

properly train police officers); Bryan County, supra (distinguishing failure-to-train cases, which contain obvious potential for violations, from a failure-to-screen case where violation was not a "plainly obvious consequence" of hiring without scrutiny). Note the strong dissent of Justices Breyer, Stevens, and Ginsberg in Bryan County arguing for "reexamination" of the Monell holding as it relates to the "continued viability" of the "distinction between vicarious municipal liability and municipal liability based upon policy and custom."

State-created causes of action, in contrast to § 1983, may permit municipalities to be held vicariously liable. Washington v. Robertson Co., 29

1130

S.W.3d 466 (Tenn. 2000) (finding the relevant action in the Tennessee Human Rights Act).

11. The Supreme Court has often reiterated that § 1983 is "not itself a source of substantive rights, but a method for vindicating federal rights elsewhere conferred by those parts of the United States Constitution and federal statutes that it describes." Baker v. McCollan, 443 U.S. 137 (1979). The remedial context in which the Court is asked to define constitutional rights influences the scope of the rights: Daryl Levinson, Rights Essentialism and Remedial Equilibration, 99 Colum. L. Rev. 857 (1999). Suits in some areas call for injunctions and declarative relief, others call for relief from criminal law sanctions (e.g. Fourth Amendment), yet others have clear damages common law antecedents. In the area of damages the courts are called upon to balance concerns about liability overreach affecting official decision-making. Limits are drawn by way

of immunities, absolute and qualified. The underlying rights are sometimes circumscribed by reference to whether

1. The interest is cognizable as a "life," "liberty," or "property" interest;

2. The interest was protected by the state;

3. There was a deprivation without due process of law. Paul v. Davis, 424 U.S. 693 (1976). The case has been controversial because of the indeterminacy of the "due process". The next principal case takes up the issue of identifying the rights that fall within the scope of § 1983.

A § 1983 cause of action may be expressly excluded by Congress or impliedly precluded by an alternative remedial scheme. Wilder v. Virginia Hosp. Ass'n, 496 U.S. 498 (1990). The right under legislation must "unambiguously" confer "an enforceable right upon the Act's beneficiaries." Suter v. Artist M, 503 U.S. 347, 362 (1992) (holding that the Adoption Assistance and Child Welfare Act did not create such a right through the obligation imposed on states to provide "reasonable efforts" to maintain and reunify families). Similarly, no § 1983 action is available for disclosing a student's educational records in breach of the Family Educational Rights and Privacy Act (FERPA): Gonzaga University v. Doe, 536 U.S. 273 (2002). It is necessary to ascertain whether the claim arises under a specific constitutional provision, say the Fourth or Eighth Amendment or, more generally, under the rubric of substantive due process. If the violative activity falls into a specific constitutional provision, it must be analyzed within the purview of that constitutional provision and not under substantive due process. United States v. Lanier, 520 U.S.

259 (1997). This restrictive approach was reaffirmed in City of Ranchos Palos Verdes v. Abrams, 544 U.S. 113 (2005). Plaintiff had sued his municipality claiming that a denial of a zoning permit for a radio antenna on his property had violated obligations of the city imposed under Telecommunications Act of 1996. The Court found that Congressional intent guided the founding of the right to be enforced and that lack of intent is the "ordinary inference" in the presence of another statutory enforcement scheme. It follows that an abuse

of governmental power that does not violate an individual's constitutional or federal legal rights is not actionable under § 1983: Collins v. City of Harker Heights, Tex., 503 U.S. 115 (1992) (failure of public employer to provide a safe working environment does not violate the 14th Amendment and is thus not actionable under § 1983).

12. Does § 1983 provide a remedy to innocent bystanders injured by state action? See, Corbitt v. Vickers, 929 F.3d 1304 (11th Cir. 2019) (holding that police officer who shot a 10 year old child while attempting to shoot the family dog was entitled to qualified immunity because the child had yielded to the officer's show of authority, and was thus "seized" under the Fourth Amendment definition governing seizures). See also, Cooper v. Rutherford, 503 F. App'x 672 (11th Cir. 2012) (police officer firing 24 shots into a hijacked car with hostages, injuring a mom and her young son entitled to qualified immunity because no established law that held that firing 24 shots was unreasonable for the circumstances); but see Popow v. City of

Margate, 476 F.Supp. 1237 (1979) (after an officer shot an innocent bystander, the court held that that gross negligence by a police officer could rise to the level of a constitutional violation).

13. Federal officers may be liable in tort for violations of the plaintiff's constitutional rights. See Bivens v. Six Unknown Named Agents of the Federal Bureau of Narcotics, 403 U.S. 388 (1971), infra page 1306. The Court, however, has hedged the scope of Bivens by considering any "special factors counseling hesitation" before fashioning such remedy. See Bush v. Lucas, 462 U.S. 367 (1983) (deferring to previously established "elaborate remedial system" in retaliatory demotion case); Chappell v. Wallace, 462 U.S. 296 (1983) (declining to provide Bivens-type remedy to enlisted military personnel against superior officers). Nor does Bivens liability extend to supervisory federal officials, except where such officials have pursued purposefully unconstitutional courses of action. See Ashcroft v. Iqbal, 556 U.S. 662 (2009). Similarly, courts have refused to grant Bivens remedies against state officials. Vakas v. Rodriquez, 728 F.2d 1293 (10th Cir. 1984) (members of administrative board immune when acting in judicial capacities); Berrios v. Agosto, 716 F.2d 85 (1st Cir. 1983) (refusing to allow Bivens abrogation of legislative immunity).

14. Expanding liability has per force placed an emphasis on the defense of governmental immunity. See Chapter 12(3); see also, Imbler v. Pachtman, 424 U.S. 409 (1976) (absolute immunity for certain legislative and judicial officials); Butz v. Economou, 438 U.S. 478 (1978) (good-faith immunity for executive officials performing discretionary functions); Monell v. Department of Social Services, 436 U.S. 658 (1978) (governmental immunity); Pembaur v. City of

Cincinnati, 475 U.S. 469 (1986) (municipal immunity, single act); Anderson v. Creighton, 483 U.S. 635, 638 (1987) (F.B.I. officials making a warrantless search of house have "a qualified immunity, shielding them from civil damages liability as long as their actions could reasonably have been thought consistent with the rights they are alleged to have violated"); Mireles v. Waco, 502 U.S. 9 (1991) (judge enjoyed absolute immunity when ordering that plaintiff be taken from another courtroom to appear before him). Harlow v. Fitzgerald, 457 U.S. 800

1132

(1982) (officials shielded from liability if conduct does not "violate clearly established statutory or constitutional rights of which a reasonable person would have known"). For an instructive application, see Hope v. Pelzer, 536 U.S. 730 (2002) (actions of prison guards sufficiently egregious to base an Eighth Amendment violation). The immunity enjoyed by public officials cannot be invoked by private defendants acting under "color of state law" threatened with a § 1983 suit: Wyatt v. Cole, 504 U.S. 158 (1992). Private prison guards were not entitled to qualified immunity from suit by prisoners charging a § 1983 violation. Richardson v. McKnight, 521 U.S. 399 (1997).

Camp v. Gregory

United States Court of Appeals, Seventh Circuit, 1995.

67 F.3d 1286.

POSNER, Circuit Judge. Anthony Young died on his sixteenth birthday. At the time of his death, Anthony was under the

guardianship of the Illinois Department of Children and Family Services ("DCFS"). His aunt and former guardian, Elnora Camp, brought this suit contending that George Gregory, the DCFS caseworker assigned to Anthony, had denied Anthony substantive due process by failing to ensure that Anthony was placed in a safe living environment. The district court dismissed the suit, believing that the Supreme Court's decision in DeShaney v. Winnebago County Dep't of Social Services, 489 U.S. 189 (1989), shielded Gregory from liability for his decision where to place Anthony. Because the DCFS had assumed guardianship over Anthony, we do not think DeShaney necessarily bars Camp's due process claim. However, we do conclude that Gregory is entitled to qualified immunity, as prior caselaw did not make clear that a state official could be liable under facts analogous to those alleged here.

FACTS

***

The DCFS became Anthony's guardian on June 25, 1991, by order of the Circuit Court of Cook County, Illinois. Prior to that time, Camp had assumed guardianship of Anthony from his mother, whose medical condition rendered her unable to care for him. Camp ultimately sought appointment of another guardian, however, after concluding that she could not provide the highly structured and closely supervised environment necessary to assure Anthony's safety and well-being. The state court granted her request and by agreement appointed the DCFS Anthony's guardian. Gregory was subsequently assigned to be Anthony's caseworker.

A DCFS referral form completed by a probation officer assigned to the Cook County Juvenile Court recommended that Anthony be placed in a highly structured environment. Despite knowing that Camp could not provide the degree of supervision and care that Anthony required and that Anthony faced a greater than normal risk of physical harm while

1133

living in her home, Gregory returned him to Camp's care. Subsequently, he neglected to make any referral or application for any appropriate educational or guidance program and failed to follow up on Anthony's progress. Yet, on September 20, 1991, he represented under oath to the state court (which had retained jurisdiction over Anthony's case to monitor his progress) that Anthony had been returned to Camp at the request of the Camp family, that Anthony was attending school, and that he was "doing fine." [C] Each of these representations was false and Gregory knew as much.

Ten days later, on September 30, 1991, Camp wrote to Gregory noting that her previous telephone calls to him had gone unanswered. She requested information concerning appropriate referrals and advised Gregory that Anthony was not attending school and was "placing himself in situations jeopardizing his physical safety as well as his education." [C] She also reiterated that she could not ensure Anthony's safety.

Anthony remained in Camp's care until he died on December 30, 1991. Camp contends that his death resulted directly from Gregory's failure to arrange for Anthony to be placed in an appropriate

environment and to be given the types of services he required in order to ensure his safety and well-being.

***

SUBSTANTIVE DUE PROCESS CLAIM

Relying on the Supreme Court's decision in DeShaney v. Winnebago County Dep't of Social Servs., 489 U.S. 189 (1989), Gregory argues that "Anthony had no constitutional right to have his DCFS caseworker protect him from being killed in a gang-related incident in his neighborhood." [C] ***[T]he precise circumstances of Anthony's death are not at all clear at this juncture. Yet, it does seem reasonable, in light of what has been alleged, to assume that Anthony's death occurred outside of his home at the hands of someone other than a family member. The essence of Camp's claim, after all, is not that she or someone else in the Camp household posed a danger to Anthony, but that she was unable to protect him from dangers posed by others. And, indeed, Camp's counsel represented to us at oral argument that Anthony was shot and killed two blocks from Camp's home. Having this in mind, we take up two questions: first, whether, by virtue of it being appointed Anthony's guardian, the DCFS (and thus Gregory) acquired any duty to protect Anthony that it otherwise would not have under DeShaney, and second, whether that duty extends to dangers beyond the household in which the DCFS and Gregory placed Anthony. We understand Gregory to answer "no" to both inquiries. Our analysis begins with review of DeShaney.

A. DeShaney

In DeShaney, the Court held that due process did not require the state to protect a child from the abuse he suffered at the hands of his father. Joshua DeShaney had repeatedly been taken to the local

emergency room with injuries that physicians suspected were due to physical abuse. At one point Joshua was temporarily placed in the custody of the hospital while a "Child Protection Team" evaluated his situation; however, the Team determined there was insufficient evidence that he was being abused to retain custody. Joshua was returned to his father's custody and, despite subsequent hospital admissions for injuries indicative of abuse, local officials failed to intervene. Ultimately, his father beat Joshua so severely that he was expected to spend the remainder of his life in an institution for the profoundly retarded.

Despite the fact that local officials had suspected ongoing abuse, the Court rejected the contention that they had deprived Joshua of his liberty in violation of due process by taking no action:

Nothing in the language of the Due Process Clause itself requires the State to protect the life, liberty, and property of its citizens against invasion by private actors. The Clause is phrased as a limitation on the State's power to act, not as a guarantee of certain minimal levels of safety and security. It forbids the State itself to deprive individuals of life, liberty, or property without "due process of law," but its language cannot fairly be extended to impose an affirmative obligation on the State to ensure that those interests do not come to harm through other means. Nor does history support such an expansive reading of the constitutional text.... Its purpose was to

protect the people from the State, not to ensure that the State protected them from each other. The Framers were content to leave the extent of governmental obligation in the latter area to the democratic political processes.

The Court acknowledged that "in certain limited circumstances the Constitution imposes upon the State affirmative duties of care and protection with respect to particular individuals." 489 U.S. at 198. Thus, when someone is incarcerated, the Eighth Amendment (via the Fourteenth) requires the State to provide him with adequate medical care. Estelle v. Gamble, 429 U.S. 97, 97 S. Ct. 285, 50 L. Ed. 2d 251 (1976). Similarly, substantive due process compels the State to take reasonable steps to ensure the safety of individuals involuntarily committed to its mental facilities. Youngberg v. Romeo, 457 U.S. 307, 102 S. Ct. 2452, 73 L. Ed. 2d 28 (1982).

But these cases afford petitioners no help. Taken together, they stand only for the proposition that when the State takes a person into its custody and hold[s] him there against his will, the Constitution imposes upon it a corresponding duty to assume some responsibility for his safety and general wellbeing. The rationale for this principle is simple enough: when the State by the affirmative exercise of its power so restrains an individual's liberty that it renders him unable to care for himself, and at the same time fails to provide for his basic

human needs--e.g., food, clothing, shelter, medical care, and reasonable safety--it transgresses the substantive limits on state action set by the Eighth Amendment and the Due Process Clause. The affirmative duty to protect arises not from the State's knowledge

of the individual's predicament or from its expressions of intent to help him, but from the limitation which it has imposed on his freedom to act on his own behalf. In the substantive due process analysis, it is the State's affirmative act of restraining the individual's freedom to act on his own behalf--through incarceration, institutionalization, or other similar restraint of personal liberty--which is the "deprivation of liberty" triggering the protections of the Due Process Clause, not its failure to act to protect his liberty interests against harms inflicted by other means.

The Estelle-Youngberg analysis simply has no applicability in the present case. Petitioners concede that the harms Joshua suffered occurred not while he was in the State's custody, but while he was in the custody of his natural father, who was in no sense a state actor. While the State may have been aware of the dangers that Joshua faced in the free world, it played no part in their creation, nor did it do anything to render him any more vulnerable to them. That the State took temporary custody of Joshua does not alter the analysis, for when it returned him to his father's custody, it placed him in no worse position than that in which he would have been had it not acted at all; the State does not become the permanent guarantor of an individual's safety by having once offered him shelter. Under these circumstances, the State had no constitutional duty to protect Joshua.

B. Gregory's Duty to Protect Anthony Generally

In essence, Gregory argues that this case is on all fours with DeShaney, and that he bore no duty to protect Anthony from a

danger that neither he nor the State played any role in creating. Likewise, although it was Gregory who made the decision to return Anthony to the Camp household after a court had made the DCFS his guardian, Gregory reasons that in doing so he placed Anthony in no worse position than if he had taken no action whatsoever.

We believe the fact that the DCFS had been made Anthony's guardian represents a key point of distinction from DeShaney, however. Camp had sought to surrender her own guardianship responsibilities because she believed she could not provide him adequate care and supervision. With the agreement of both Camp and the state, the complaint tells us, the court made the DCFS Anthony's guardian. At that juncture, whether the DCFS had a duty to intervene on Anthony's behalf was moot; it had already assumed a role that made it constitutionally liable (at least to some extent) for Anthony's well-being.

1136

That the DCFS had a cognizable duty to protect Anthony as his guardian is reflected in a series of cases holding government officials liable for placing minors in foster homes where they suffered abuse or neglect. Prominent among these is our opinion in K.H. through Murphy v. Morgan, 914 F.2d 846 (7th Cir.1990), which post-dates DeShaney. In that case, an abused child who had been removed from the custody of her parents was then shuffled among a series of foster homes in which she continued to suffer abuse and was deprived of the special care she required in view of her history. The child sued DCFS officials, contending that they had deprived her of due process by placing her in foster homes that they knew to be

either abusive or unable to care for her properly. We agreed that the plaintiff might have a viable claim in this circumstance. We noted at the outset that the Due Process Clause quite clearly prohibits a public officer from intentionally harming an individual physically without justification, citing, inter alia, K. H. v. Morgan, 914 F.2d at 848. "The extension [of this principle] to the case in which the plaintiffs mental health is seriously impaired by deliberate and unjustified action is," we observed, "straightforward." Id. We proceeded to distinguish DeShaney:

This is not a "positive liberties" case, like DeShaney, where the question was whether the Constitution entitles a child to governmental protection against physical abuse by his parents or other private persons not acting under the direction of the state.... Here, in contrast, the state removed a child from the custody of her parents; having done so, it could no more place her in a position of danger, deliberately and without justification, without thereby violating her rights under the due process clause of the Fourteenth Amendment than it could deliberately and without justification place a criminal defendant in a jail or prison in which his health or safety would be endangered, without violating his rights either under the cruel and unusual punishments clause of the Eighth Amendment (held applicable to the states through the Fourteenth Amendment) if he was a convicted prisoner, or the due process clause if he was awaiting trial. In either case the state would be a doer of harm rather than merely an inept rescuer, just as the Roman state was a doer of harm when it threw Christians to the lions.

The Roman analogy is sound even if one concedes, as one must in the light of DeShaney, that the State of Illinois has no constitutional

obligation to protect children from physical or sexual abuse by their parents. The state could have left K.H. to the tender mercies of her parents without thereby violating her rights under the Constitution. But having removed her from their custody the state assumed at least a limited responsibility for her safety.... The Illinois Department of Children and

1137

Family Services could not have subjected K.H. to sexual abuse and then defended on the ground that by doing this it did not make her any worse off than she would have been had she been left with her parents.... Once the state assumes custody of a person, it owes him a rudimentary duty of safekeeping no matter how perilous his circumstances were when he was free. The distinction follows the lines of tort law. There is no duty to rescue a bystander in distress, but having rescued him from certain death you are not privileged to kill him. This is not to say that you assume responsibility for his future welfare. You do not. Our point is only that the absence of a duty to rescue does not entitle the rescuer to harm the person whom he has rescued.

***

Thus, as our opinion in K.H. reflects, DeShaney does not preclude liability when the state, as guardian of a child, places that child in an environment where harm results. [Cc]

To be sure, there are differences between this case and K.H. First among them is that Gregory is not alleged to have placed Anthony in an abusive home, at least not one we would normally think of as abusive. The complaint does not suggest that anyone in the Camp

household was prone to strike Anthony, or to molest him, or to deprive him of food or clothing, or to denigrate him emotionally. The focus of K.H. was confined to this realm: "The only right in question in this case is the right of a child in state custody not to be handed over by state officers to a foster parent or other custodian, private or public, whom the state knows or suspects to be a child abuser." [C] Camp moves a step beyond this narrow right; her theory is that Gregory knowingly returned Anthony to a household that could not supervise and guide Anthony to the degree he required. This is a theory that K.H. neither addressed nor endorsed. ***Thus, we believe a child placed in the guardianship of the state has a due process right not to be placed by the state with a custodian whom the state knows will fail to exercise the requisite degree of supervision over the child. This is precisely the right that Camp alleges Gregory denied to Anthony; and it is the denial of that right, she further alleges, which resulted in Anthony's death.

In this case, of course, Gregory did not place Anthony with a stranger, but returned him to his aunt. That fact is important for two reasons. First, our cases acknowledge a difference between the state placing a child with a relative and placing him with a foster home. Second, DeShaney emphasized that although the state may have been aware of the danger that Joshua faced in his family's home, it had done nothing to create those dangers nor had it done anything rendering Joshua more vulnerable to them. Neither of these points necessarily bars Camp's claim, however, in view of the facts alleged.

***

C. Duty to Protect Anthony from Violence Outside of the Home

Whether Gregory's duty extended to dangers outside of the household to which he had returned Anthony is a more novel and difficult question. Gregory argues that this aspect of Camp's claim makes the case even more compelling for him than DeShaney. In one sense he is no doubt correct. Government officials can and routinely do make assessments of the adults with whom children under the state's guardianship are placed. Thus, as we recognized in K.H., if a DCFS caseworker places a child in a foster home where he knows the child will likely suffer abuse, he can be held liable. But to place on the caseworker a duty to evaluate and protect a child from dangers outside of the household is a great step beyond that. Given the widespread escalation of violence we have witnessed over the years, many a child may be in danger of injury at the hands of strangers when he is outside of his home, and public officials cannot be deemed constitutionally obligated to shield a child from all such dangers beyond the reasonable control of his parent or foster parent any more than the parents themselves can be.

Even so, a parent does not relinquish all responsibility once a child leaves the house. No one would think it reasonable, for example, for a parent to knowingly permit a toddler to wander the streets at will, confronting a gamut of risks from inattentive motorists to Mr. or Ms. Stranger Danger. We expect, instead, that the parent will have the child in hand, protecting him from danger that the child is otherwise unequipped to avoid. As the child matures, the degree to which his

parent is expected to supervise his activities lessens, but it does not cease altogether. We still expect parents to see to it that their children attend school, obey statutory curfews, and stay out of trouble. Parents are not the insurers of their children's conduct, but when they fail to exercise a reasonable degree of supervision, they can be held liable for their omissions. See, e.g., Restatement (Second) of Torts § 316 (1965).

Commensurate with the parental obligation to supervise a child's activities outside the home is a duty on the part of the state not to place one of its charges with an adult that it knows will not or cannot exercise that responsibility. The DCFS regulations governing placement with relative caretakers recognize that responsibility, specifying as a precondition to approval that the DCFS staff must find that "supervision of the related child(ren) can be assured at all times including times when the related caregiver is employed or otherwise engaged in activity outside of the home." [C] Thus, we believe that when a DCFS caseworker places a child in a home knowing that his caretaker cannot provide reasonable supervision, and the failure to provide that degree of supervision and care results in injury to the child outside of the home, it might be appropriate, depending upon the facts culminating in the injury, for the caseworker to be held liable for a deprivation of liberty.

1139

Liability must, nonetheless, be confined to what we believe will be a very narrow range of cases. Without attempting to identify all of the factors that might limit this category, we mention a few that come readily to mind. First, before a DCFS worker or other state official

can be held liable for a placement decision, he must, as we indicated in K.H., have failed to exercise bona fide professional judgment. [C] Second, a caretaker can be expected only to provide a reasonable degree of supervision to a minor in her care. ***

Because the complaint does not detail the particular circumstances of Anthony's death, we cannot say one way or another whether this case would fit the criteria we have articulated. In light of our conclusion below that Gregory is entitled to qualified immunity, it does not matter; no factual development of the case is required.

***

[W]e cannot say that the amended complaint failed to state a claim upon which relief could be granted.

D. Qualified Immunity

A public official who has deprived someone of his constitutional right may nonetheless enjoy immunity from an award of damages if his actions were "objectively reasonable, meaning that [if] '[his] conduct does not violate clearly established statutory or constitutional rights of which a reasonable person would have known,'" he is immune from an action for civil damages. Supreme Video, Inc. v. Schauz, 15 F.3d 1435,1438-39 (7th Cir.1994) (quoting Harlow v. Fitzgerald, 457 U.S. 800, 818 (1982)).

***

CONCLUSION

Although we believe that Camp's complaint alleged facts sufficient to state a claim for the deprivation of Anthony's liberty in violation of his

Fourteenth Amendment right to substantive due process, we also conclude that Gregory is entitled to qualified immunity. Because Camp did not argue below that her complaint stated a separate procedural due process claim, we deem any such argument waived and need not consider its merits.

AFFIRMED

NOTES AND QUESTIONS

1. A "state-created danger" claim under § 1983 consists of four elements: direct and foreseeable harm; conduct by a state actor that shocks the conscience; a relationship between the state and the plaintiff whereby the plaintiff was a particularly foreseeable victim of the conduct; and a state actor's affirmative use of authority "in a way that created a danger to the citizen or that rendered the citizen more vulnerable to danger than had the state not acted at all." Bright v. Westmoreland County, 443 F.3d 276, 281 (3d Cir. 2006).

1140

2. In dealing with the affirmative creation of risk, other courts have been less expansive than that in the principal case. In S.S. v. McMullen, 225 F.3d 960 (8th Cir. 2000), plaintiff brought a § 1983 claim against state family service officials where she had been released from state custody and returned to her father, although the officers knew that she would be exposed to a known pedophile. She was subsequently sexually abused by the pedophile on at least two occasions. Applying DeShaney, and distinguishing the Seventh Circuit decision in K.H. through Murphy v. Morgan, supra, the court found that plaintiffs claim failed because the allegations did not show that by returning her to her father the officers had "created greater

risks to her than the ones to which she was originally exposed." Id. at 968. It was as though the state had not acted. The dissent, relying on K.H., found that S.S. was rescued from danger and that the child's fate thus fell into the hands of the state. The rescuer would be liable for "knowingly exposing a small girl to a convicted child molester." Id. A relative increase in some danger to which the plaintiff voluntarily exposed himself is not likely to trigger liability. See Johnson v. City of Seattle, 474 F.3d 634 (9th Cir. 2007) (plaintiffs voluntarily entered a crowd that subsequently became unruly; police department's decision to decrease active efforts to control the crowd's violence did not amount to creating a danger to plaintiffs).

3. Litigation began with prisons but has vigorously moved to state child services and to the schoolhouse. In Daniels v. Williams, 474 U.S. 327 (1986), the Court held that an official's negligent causation of loss or injury to life, liberty or property does not violate due process rights. The Due Process Clause does not extend a duty of due care to prisoners. Davidson v. Cannon, 474 U.S. 344 (1986). Much litigation has attended the protection of school pupils from sexual harassment and other abuse while in school. The questions in these cases are whether the student is in a special relationship denoted by control and whether the school has maintained a policy, practice or custom of deliberate indifference. Stoneking v. Bradford Area Sch. Dist., 882 F.2d 720 (3d Cir. 1989) (finding liability). Cf. Maldonado v. Josey, 975 F.2d 727 (10th Cir. 1992) (no liability); Johnson v. Dallas Indep. Sch. Dist., 38 F.3d 198 (5th Cir. 1994), cert, denied 514 U.S. 1017 (1995) (no liability). The courts are reluctant to extend liability beyond sexual abuse. Abeyta v. Chama Valley Indep. Sch. Dist., 77 F.3d 1253 (10th Cir. 1996) (no liability where teacher

repeatedly called student a "prostitute" and allowed other students to taunt her).

4. In claims based on denial of substantive due process as in the principal case, the courts require that the behavior of the officer is so egregious, so outrageous, that it may be said to "shock the contemporary conscience." See County of Sacramento v. Lewis, 523 U.S. 833 (1998) (holding that a high-speed police chase, albeit unreasonable, did not "shock the conscience" in order to found an action). The need for this high threshold is dictated by the need to "preserve the constitutional proportions of constitutional claims, lest the Constitution be demoted to what [the Court has] called a font of tort law." Id. at 847 n. 8. See also Schieber v. City of Philadelphia, 320 F.3d 409 (3d Cir. 2003) (holding that police failure to go further than cursory inquiries after 911 call reporting screams and choking

noise did not "shock the conscience"; victim, daughter of plaintiffs, was raped and murdered); S.S. v. McMullen, supra note 2 (state officials' conduct in returning child to father's custody, despite knowing that father was allowing her to have contact with convicted pedophile, was not sufficiently outrageous as to "shock the conscience"). Cf. Rochin v. People of California, 342 U.S. 165 (1952) (repeatedly pumping suspect's stomach to retrieve illegal drugs "shocked the conscience"); Culberson v. Doan, 125 F. Supp. 2d 252 (S.D. Ohio 2000) (sheriff warned murderer of search for victim's body and delayed draining a pond so that murderer could successfully re-conceal the victim; conduct "shocked the conscience").

5. Many ills of modern society are catalogued in these claims. In Pinder v. Johnson, 54 F.3d 1169 (4th Cir. 1995), plaintiffs children died in a fire. The perpetrator of the arson had been taken into custody earlier in the evening for an attempted arson. Plaintiff asked defendant, a police officer, whether it would be safe to leave her children and go to work in view of this attempted arson and others in the past. Defendant assured plaintiff that the perpetrator would be held in custody. He was not. He returned and carried out his plan. Judge Wilkinson, recounting the "genuinely tragic" circumstances and applying DeShaney, could not find the sufficient "custodial relationship" upon which to base an "affirmative constitutional duty." Promises alone do not create the required "special relationship." Moreover, it was held that an immunity covered defendant's acts because of the embryonic quality of the law. In Town of Castle Rock v. Gonzales, 545 U.S. 748 (2005), the Court held that the due process clause protects only against deprivation of benefits to which persons are legally entitled, from which entitlement stems a property right. The police had failed to heed plaintiffs repeated entreaties to enforce a restraining order, whereby the husband and father was afforded the opportunity to murder the couple's children. Justice Scalia, writing for the majority, did not interpret the Colorado restraining order statute as making mandatory the enforcement of such orders; indeed his opinion finds an implied reservation of discretion to peace officers in enforcement of the law "even in the presence of seemingly mandatory legislative commands." Id. at 761. Over Justice Souter's dissent, Justice Scalia finds that, even if the statute mandated the issuance of an arrest warrant, such was "an entitlement to nothing but procedure" into which a property interest

cannot be imputed. Id. at 764. Again declining to recognize the Fourteenth Amendment as a "font of tort law," the Court strained to interpret the legislation to bestow discretion to the police. Id. at 768. In Guertin v. Michigan, 912 F.3d 907 (6th Cir. 2019) plaintiffs claiming injuries from city water provided by Flint, Michigan brought a § 1983 class action against the city and officials. The court's opinion described the case "as arising out of the infamous governmental-created environmental disaster". The court dismissed the defendants' motion to dismiss. The US Supreme Court denied cert, sub nom. Flint v. Guertin, 2020 WL 283268 (Jan. 20, 2020).

6. Section 1983 is not the only source of private right of action. Title IX, 20 U.S.C. § 1681(a) provides: "No person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of,

or be subjected to discrimination under any education program or activity receiving Federal financial assistance." 20 U.S.C. § 1681(a).

In Gebser v. Lago Vista Independent School Dist., 524 U.S. 274 (1998), the Court held that a school district may be liable for damages under Title IX where it is deliberately indifferent to known acts of teacher-student sexual harassment. Pointing out that the common law holds liable those put on notice of the tortious actions of third parties, the Court in Davis v. Monroe County Board of Education, 526 U.S. 629 (1999) held that Title IX liability could obtain where the abuse or harassment was "student-on-student." Such liability requires the plaintiff to establish the school was both aware of and deliberately indifferent to the harassment. Moreover, "such an

action will lie only for harassment that is so severe, pervasive, and objectively offensive that it effectively bars the victim's access to an educational opportunity or benefit." Id. at 633. However, the very existence of a statutory civil rights claim has led some common law courts to declare that tort claims for sexual assault are pre-empted or solidify the boundary between torts and civil rights law by limiting tort claims to only the most unusual or egregious cases that are not commonly litigated under Title VII or Title IX. Martha Chamallas, Will Tort Law Have Its #me Too Moment?, 11 J. Tort L. 39, 58 (2018)

7. The principal case utilizes causation rules and duty of care analysis canvassed in Chapter 8. The Davis case supra note 6 also draws on common law duty of care. Do you agree that the common law would fix a school board with liability in the circumstances in Davis! Title IX extends to universities. Do you see a problem?

Memphis Community School Dist. v. Stachura

Supreme Court of the United States, 1986.

477 U.S. 299, 106 S.Ct. 2537, 91 L.Ed.2d 249.

[Respondent, a tenured teacher in the Memphis, Michigan, public schools, was suspended following parents' complaints about his teaching methods in a 7th-grade life science course that included the showing of allegedly sexually explicit pictures and films. While respondent was later reinstated, he, before being reinstated, brought suit in Federal District Court under 42 U.S.C. § 1983 against petitioner School District, Board of Education, Board Members, school administrators, and parents, alleging that his suspension

deprived him of liberty and property without due process of law and violated his First Amendment right to academic freedom. He sought both compensatory and punitive damages. The District Court instructed the jury on the standard elements of compensatory and punitive damages and also charged the jury that additional compensatory damages could be awarded based on the value or importance of the constitutional rights that were violated. The jury found petitioners liable, awarding both compensatory and punitive damages. The Court of Appeals affirmed. (Facts from official syllabus.)]

1143

JUSTICE Powell delivered the opinion of the Court. ***

We granted certiorari limited to the 474 U.S. 918, 106 S.Ct. 245, 88 L.Ed.2d 254 (1985) question whether the Court of Appeals erred in affirming the damages award in the light of the District Court's instructions that authorized not only compensatory and punitive damages, but also damages for the deprivation of "any constitutional right." 474 U.S. 918, 106 S.Ct. 245, 88 L.Ed.2d 254 (1985). We reverse, and remand for a new trial limited to the issue of compensatory damages. ***

We have repeatedly noted that 42 U.S.C. § 1983 creates " 'a species of tort liability' in favor of persons who are deprived of 'rights, privileges, or immunities secured' to them by the Constitution." Carey v. Piphus, 435 U.S. 247, 253 (1978). [Cc] Accordingly, when § 1983 plaintiffs seek damages for violations of constitutional rights, the level of damages is ordinarily determined according to principles derived from the common law of torts. [Cc]

Punitive damages aside, damages in tort cases are designed to provide "compensation for the injury caused to plaintiff by defendant's breach of duty." 2 F. Harper, F. James & O. Gray, Law of Torts § 25.1, p. 490 (2d ed. 1986) (emphasis in original), quoted in Carey v. Piphus, supra. [Cc] To that end, compensatory damages may include not only out- of-pocket loss and other monetary harms, but also such injuries as "impairment of reputation ***, personal humiliation, and mental anguish and suffering." Gertz v. Robert Welch, Inc., 418 U.S. 323, 350 (1974). See also Carey v. Piphus, supra, 435 U.S., at 264 (mental and emotional distress constitute compensable injury in § 1983 cases). Deterrence is also an important purpose of this system, but it operates through the mechanism of damages that are compensatory--damages grounded in determinations of plaintiffs' actual losses. ***Congress adopted this common-law system of recovery when it established liability for "constitutional torts." Consequently, "the basic purpose" of § 1983 damages is "to compensate persons for injuries that are caused by the deprivation of constitutional rights." Carey v. Piphus, 435 U.S., at 254 (emphasis added). See also id., at 257 ("damages awards under § 1983 should be governed by the principle of compensation").

Carey v. Piphus represents a straightforward application of these principles. ***Where no injury was present, no "compensatory" damages could be awarded.

The instructions at issue here cannot be squared with Carey, or with the principles of tort damages on which Carey and § 1983 are grounded. The jurors in this case were told that, in determining how much was necessary to "compensate [respondent] for the deprivation" of his constitutional rights, they should place a money

value on the "rights" themselves by considering such factors as the particular right's "importance ***in our system of government," its role in American history, and its "significance ***in the context of the activities" in which

1144

respondent was engaged. These factors focus, not on compensation for provable injury, but on the jury's subjective perception of the importance of constitutional rights as an abstract matter. Carey establishes that such an approach is impermissible. The constitutional right transgressed in Carey--the right to due process of law--is central to our system of ordered liberty. We nevertheless held that no compensatory damages could be awarded for violation of that right absent proof of actual injury. Carey, 435 U.S., at 264. Carey thus makes clear that the abstract value of a constitutional right may not form the basis for § 1983 damages. [11]

* * *

[11] We did approve an award of nominal damages for the deprivation of due process in Carey. 435 U.S., at 266. Our discussion of that issue makes clear that nominal damages, and not damages based on some undefinable "value" of infringed rights, are the appropriate means of "vindicating" rights whose deprivation has not caused actual, provable injury:

"Common-law courts traditionally have vindicated deprivations of certain 'absolute' rights that are not shown to have caused actual injury through the award of a nominal sum of money. By making the deprivation of such rights actionable for nominal damages without proof of actual injury, the law recognizes the importance to organized

society that those rights be scrupulously observed; but at the same time, it remains true to the principle that substantial damages should be awarded only to compensate actual injury or, in the case of exemplary or punitive damages, to deter or punish malicious deprivations of rights." Ibid.

Respondent nevertheless argues that Carey does not control here, because in this case a substantive constitutional right--respondent's First Amendment right to academic freedom--was infringed. The argument misperceives our analysis in Carey. That case does not establish a two-tiered system of constitutional rights, with substantive rights afforded greater protection than "mere" procedural safeguards. We did acknowledge in Carey that "the elements and prerequisites for recovery of damages" might vary depending on the interests protected by the constitutional right at issue. [C] But we emphasized that, whatever the constitutional basis for § 1983 liability, such damages must always be designed "to compensate injuries caused by the [constitutional] deprivation." [Cc] That conclusion simply leaves no room for noncompensatory damages measured by the jury's perception of the abstract "importance" of a constitutional right.

Nor do we find such damages necessary to vindicate the constitutional rights that § 1983 protects. See n. 11, supra. Section 1983 presupposes that damages that compensate for actual harm ordinarily suffice to deter constitutional violations. ***

Moreover, damages based on the "value" of constitutional rights are an unwieldy tool for ensuring compliance with the Constitution. History and tradition do not afford any sound guidance concerning the precise value that juries should place on constitutional

protections. Accordingly, were such damages available, juries would be free to award arbitrary amounts without any evidentiary basis, or to use their unbounded discretion to punish unpopular defendants. [C] Such damages would be too uncertain to be of any great value to plaintiffs, and would inject caprice into determinations of damages in § 1983 cases. We therefore hold that damages based on the abstract "value" or "importance" of

1145

constitutional rights are not a permissible element of compensatory damages in such cases. ***

Respondent further argues that the challenged instructions authorized a form of "presumed" damages--a remedy that is both compensatory in nature and traditionally part of the range of tort law remedies. Alternatively, respondent argues that the erroneous instructions were at worst harmless error.

Neither argument has merit. Presumed damages are a substitute for ordinary compensatory damages, not a supplement for an award that fully compensates the alleged injury. When a plaintiff seeks compensation for an injury that is likely to have occurred but difficult to establish, some form of presumed damages may possibly be appropriate. [Cc]

In those circumstances, presumed damages may roughly approximate the harm that the plaintiff suffered and thereby compensate for harms that may be impossible to measure. As we earlier explained, the instructions at issue in this case did not serve this purpose, but instead called on the jury to measure damages based on a subjective evaluation of the importance of particular

constitutional values. Since such damages are wholly divorced from any compensatory purpose, they cannot be justified as presumed damages. [14] Moreover, no rough substitute for compensatory damages was required in this case, since the jury was fully authorized to compensate respondent for both monetary and non-monetary harms caused by petitioners' conduct.

* * *

[14] For the same reason, Nixon v. Herndon, 273 U.S. 536 (1927), and similar cases do not support the challenged instructions. ***

Nixon followed a long line of cases, going back to Lord Holt's decision in Ashby v. White, 2 Ld.Raym. 938, 92 Eng.Rep. 126 (1703), authorizing substantial money damages as compensation for persons deprived of their right to vote in particular elections. [Cc] Although these decisions sometimes speak of damages for the value of the right to vote, their analysis shows that they involve nothing more than an award of presumed damages for a non-monetary harm that cannot easily be quantified:

"In the eyes of the law th[e] right [to vote] is so valuable that damages are presumed from the wrongful deprivation of it without evidence of actual loss of money, property, or any other valuable thing, and the amount of the damages is a question peculiarly appropriate for the determination of the jury, because each member of the jury has personal knowledge of the value of the right." Ibid. ***

See also Ashby v. White, supra, at 955, 92 Eng.Rep., at 137 (Holt, C.J.) ("As in an action for slanderous words, though a man does not lose a penny by reason of the speaking [of] them, yet he shall have an action"). The "value of the right" in the context of these decisions

is the money value of the particular loss that the plaintiff suffered--a loss of which "each member of the jury has personal knowledge." It is not the value of the right to vote as a general, abstract matter, based on its role in our history or system of government. Thus, whatever the wisdom of these decisions in the context of the changing scope of compensatory damages over the course of this century, they do not support awards of non-compensatory damages such as those authorized in this case.

Nor can we find that the erroneous instructions were harmless. [Cc] When damages instructions are faulty and the verdict does not reveal the means by which the jury calculated damages, "[the] error in the charge

1146

is difficult, if not impossible, to correct without retrial, in light of the jury's general verdict." [C]

The jury was authorized to award three categories of damages: (i) compensatory damages for injury to respondent, (ii) punitive damages, and (iii) damages based on the jury's perception of the "importance" of two provisions of the Constitution. The submission of the third of these categories was error. ***

The judgment of the Court of Appeals is reversed, and the case is remanded for further proceedings consistent with this opinion.

Justice Marshall, with whom Justice Brennan, Justice Blackmun, and JUSTICE Stevens join, concurring in the judgment.

I agree with the Court that this case must be remanded for a new trial on damages. Certain portions of the Court's opinion, however,

can be read to suggest that damages in § 1983 cases are necessarily limited to "out-of-pocket loss," "other monetary harms," and "such injuries as 'impairment of reputation ***, personal humiliation, and mental anguish and suffering.'"

I do not understand the Court so to hold, and I write separately to emphasize that the violation of a constitutional right, in proper cases, may itself constitute a compensable injury. ***

Following Carey, the courts of appeals have recognized that invasions of constitutional rights sometimes cause injuries that cannot be redressed by a wooden application of common-law damages rules. In Hobson v. Wilson, 237 U.S.App.D.C. 219, 275-281, 737 F.2d 1, 57-63 (1984), [c] plaintiffs claimed that defendant FBI agents had invaded their First Amendment rights to assemble for peaceable political protest, to associate with others to engage in political expression, and to speak on public issues free of unreasonable government interference. The District Court found that the defendants had succeeded in diverting plaintiffs from, and impeding them in, their protest activities. The Court of Appeals for the District of Columbia Circuit held that that injury to a First Amendment-protected interest could itself constitute compensable injury wholly apart from any "emotional distress, humiliation and personal indignity, emotional pain, embarrassment, fear, anxiety and anguish" suffered by plaintiffs. [C] The court warned, however, that that injury could be compensated with substantial damages only to the extent that it was "reasonably quantifiable"; damages should not be based on "the so- called inherent value of the rights violated."

I believe that the Hobson court correctly stated the law. ***There is no reason why such an injury should not be compensable in damages. At the same time, however, the award must be proportional to the actual loss sustained.

The instructions given the jury in this case were improper because they did not require the jury to focus on the loss actually sustained by respondent. ***

1147

The Court therefore properly remands for a new trial on damages. I do not understand the Court, however, to hold that deprivations of constitutional rights can never themselves constitute compensable injuries. Such a rule would be inconsistent with the logic of Carey, and would defeat the purpose of § 1983 by denying compensation for genuine injuries caused by the deprivation of constitutional rights.

NOTES AND QUESTIONS

1. No damages award that can be made to vindicate the abstract value of deprivation of a constitutional right. This contrasts with damages awards for the intentional torts. The Justices' refusal to swell damages for dignitary harm may be related to the Civil Rights Attorneys' Fees Act of 1976 wherein civil rights claimants may recover attorneys' fees. This encourages such suits and meets in an indirect way the objective of vindication. Municipalities are not ordinarily subject to punitive damages in § 1983 cases. City of Newport v. Fact Concerts, Inc., 453 U.S. 247 (1981). The principal case has been applied broadly.

2. In Heck v. Humphrey, 512 U.S. 477 (1994), the Court held that plaintiffs asserted § 1983 claim could not be established since the corresponding common law action in malicious prosecution would not lie in the circumstances. Thus a § 1983 cause of action for damages attributable to an unconstitutional conviction or sentence does not accrue until the conviction or sentence has been invalidated. Justice Souter, with whom Justices Blackmun, Stevens and O'Connor concurred, warned that while the malicious prosecution analogy was useful in starting analysis, Congressional policy was the ultimate lodestar. Furthermore, the Court notes the Heck accrual rule may not apply in cases where a § 1983 claim does not "necessarily imply the invalidity" of a criminal conviction, but does allude to "actual, compensable injury." Heck, 512 U.S. at 487 n. 7. While formal exhaustion of state remedies is not only unnecessary, but also inconsistent with the scheme of § 1983, a court may be guided by federal principles, applying Patsy v. Board of Regents of Fla., 457 U.S. 496 (1982) (superceded in part by the Prison Litigation Reform Act of 1995, requiring that prisoners exhaust all state and federal administrative remedies before bringing suit under § 1983).

3. An iconoclastic view is presented by John Jeffries, Damages for Constitutional Violations: the Relation of Risk to Injury in Constitutional Torts, 75 Va. L. Rev. 1461 (1989). The article argues that the only damages encompassed relate to "constitutionally relevant injuries--that is, injuries within the risks that the constitutional prohibition seeks to avoid."

1149

CHAPTER 20 MISUSE OF LEGAL PROCEDURE

Texas Skaggs, Inc. v. Graves

Court of Civil Appeals of Texas, 1979.

582 S.W.2d 863.

[Suit for malicious prosecution. Plaintiff-appellee, Mrs. Sharon Graves, had "worked as a checker in the Skaggs store but was fired for reasons not material to this case." She continued to purchase groceries at Skaggs and had given the store two checks totaling $34.70. The checking account was in her name, but she had left a few blank checks signed by her at home, for her husband to use. The couple had separated and, unknown to her, her husband had withdrawn all of her funds. She agreed to pay "as soon as she could get the money from the Skaggs' credit union." Over two weeks later, when she received her money from the credit union, she "purchased a money order and mailed it to Skaggs to cover the 'hot' checks."

The next day, Bill Pennington, a Skaggs manager, filed an "Incident Report" with the Texarkana, Arkansas, Police Department reporting Mrs. Graves for a violation of the Arkansas Hot Check Law. Four days later, he filed an affidavit for warrant of her arrest. Over a week later, when Mrs. Graves was shopping in the Skaggs store, a manager summoned the police, who came and arrested her. She tried to explain to police sergeant Larry Arnold that she had paid the checks, but he took her out of the store and to the police station where she was booked on a hot check charge. Arnold then

telephoned Skaggs and learned that the checks had, in fact, been paid. Arnold then released Graves and returned the two checks to her (that had been attached to the Affidavit for Warrant of Arrest). Sgt. Arnold talked to an employee of Skaggs again that afternoon and when the person he was talking to learned that Graves had been released, that person (unidentified) told Arnold that he wanted Graves prosecuted and that he did not care if she had paid the checks. The next morning, March 4th, Arnold drove to Sharon Graves' home in Texas and told her that Skaggs intended to prosecute her that afternoon. Mrs. Graves immediately hired an attorney and appeared in Court. The municipal judge dismissed the case when the prosecution could not produce the "hot checks."]

RAY, JUSTICE. ***In Arkansas, a cause of action for malicious prosecution consists of the following elements: (1) A criminal prosecution instituted or continued by the defendant against the plaintiff; (2) Termination of the proceedings in favor of the accused; (3) Absence of probable cause for the proceeding; (4) Malice; and, (5) Damages. ***.

1150

In response to special issues, the jury found that Graves did not know that her bank account had insufficient funds for the payment of the two checks; that Skaggs did not have probable cause to institute the prosecution of Sharon Graves; that Skaggs acted with malice; and, that the sum of $20,000.00 would reasonably compensate Graves for her actual damages.

Institution of Criminal Proceedings. The evidence is clear and undisputed that Skaggs initiated and continued the prosecution of

Sharon Graves.

Termination of the Proceedings in Favor of the Accused. The record reflects that the case against Graves was dismissed in the Municipal Court of Texarkana, Arkansas, with the notation, "dismissed on basis checks not available for presentation of case." Skaggs argues that this type of termination is indecisive and is not sufficient to establish malicious prosecution. Prosser describes types of termination that are sufficient to sustain a malicious prosecution suit:

"On the other hand, it will be enough that the proceeding is terminated in such a manner that it cannot be revived, and the prosecutor, if he proceeds further, will be put to a new one. This is true, for example, of an acquittal in court, ***the entry of a nolle prosequi or a dismissal, abandonment of the prosecution by the prosecuting attorney or the complaining witness, ***where any of these things have the effect of ending the particular proceeding and requiring new process or other official action to commence a new prosecution. It may be said generally, that this is true whenever the charges or the proceeding are withdrawn on the initiative of the prosecution. ***

"On the other hand, where charges are withdrawn or the prosecution is terminated at the instigation of the accused himself, or by reason of a compromise into which he has entered voluntarily, there is no sufficient termination in favor of the accused. ***" W. Prosser, Torts Sec. 113, pp. 857, 858 (3rd ed.1964).

Prosser is in accord with the rule established by the Restatement (Second) Torts, §§ 658, 659 (1977). The abandonment of the proceedings because a conviction has, in the natural course of

events, become impossible or improbable, is a sufficient termination in favor of the accused. [C] We are of the opinion that this case was not dismissed on technical or procedural grounds, but was an abandonment of the prosecution by the prosecuting attorney and that the inferences to be drawn from the evidence support that conclusion. We are of the further opinion that because there was a dismissal for lack of incriminating evidence, Graves could have procured a finding of "not guilty" by the municipal court had the matter been pressed for a full trial by the prosecuting attorney. Closely connected with the element of successful termination is the defense that Graves was in fact guilty of the charge. This defense was available even if Graves had been acquitted of the criminal charge. The rational basis is that the law protects only the

1151

innocent and, if guilty, the plaintiff deserved the treatment complained of. Thus, Skaggs had the option to assert the defense that Graves was in fact guilty of the charge. There was apparently some attempt to prove this defense, but the jury rejected it.

Absence of Probable Cause. Graves had the burden of proving that the criminal proceeding was initiated or continued by Skaggs without probable cause; that is, Graves had to show that Skaggs had no honest or reasonable belief in the truth of the charge however suspicious the circumstances of Graves' acts. Probable cause has been defined by the Arkansas Supreme Court in Hitson v. Sims, 69 Ark. 439, 441, 64 S.W. 219, 220 (1901), as follows: " ***such a state of facts known to the prosecutor, or such information received by him from sources entitled to credit, as would induce a man of ordinary

caution and prudence to believe, and did induce the prosecutor to believe, that the accused is guilty of the crime alleged, and thereby caused the prosecution ***"

However, it is stated in 22 Ark.L.Rev. 349: "Liability is imposed on the defendant where there are sufficient facts to indicate to a reasonable man that the plaintiff was guilty but the defendant himself knew better, i.e., a subjective test. Since the test requires more than mere unfounded suspicion the courts will hold a defendant liable in cases where a reasonable man would further investigate the facts."

The facts supporting the jury's finding of lack of probable cause are that Graves was well-known by the employees of Skaggs; that the two checks were relatively small; that the checks were used to pay for groceries alone and that no cash was obtained with the checks; that Graves could have obtained large amounts of cash because she knew all of the Skaggs' employees; that she could have cashed many checks obtaining cash, but did not; that the checks were written on her regular bank account and not some fictitious bank or bank account; that once she was notified that her two checks had been returned to Skaggs, she immediately agreed to make restitution; that Graves in fact mailed her money order to Skaggs prior to the time that prosecution was instituted; that Skaggs was aware of the restitution before her arrest; that Skaggs had agreed to await restitution and to accept payment for the checks when Graves received her money from the Skaggs credit union; that Skaggs, pursuant to its agreement with Graves, had accepted restitution but issued instructions that the prosecution continue; and, that Skaggs further insisted that the prosecution continue after having been apprised of the fact that Mrs. Graves had been arrested and

released by the officer after the officer had called one of Skaggs' employees and learned that restitution had been made. From the foregoing facts, and the inferences to be drawn therefrom, the jury could have reasonably concluded that Graves did not intend to defraud Skaggs and that no probable cause existed to institute or continue the prosecution proceedings. As a defense, the burden of persuasion was on Skaggs to show that the complaining witness, Bill Pennington, believed in Graves' guilt at the time the original

proceeding commenced and that this belief was supported with facts which would lead a reasonable, cautious or prudent man to the same conclusion, and which in fact did lead Pennington to this conclusion. Pennington was not called as a witness. The jury apparently believed that the testimony of Sharon Graves was more plausible than that of the employees at Skaggs and that Skaggs knew or should have known or found out from further investigation that Graves did not issue the checks knowing at the time of issuing them that she did not have sufficient funds in her bank account to cover the checks. The jury could have further believed that while a reasonable person might have concluded that Graves was guilty, Skaggs' employees knew better and should have further investigated the facts.

The "Arkansas Hot Check Law", Ark.Stat.Ann. Sec. 67-720 (Supp.1978) provides:

"It shall be unlawful for any person to procure any article or thing of value, ***or for any other purpose to make or draw or utter or deliver, with intent to defraud, any check, ***upon any bank, ***knowing at

the time of such making, ***that the maker, ***has not sufficient funds in, or on deposit with, such bank, ***",

Evidence of the requisite intent to defraud is supplied by Ark.Stat.Ann. Sec. 67-722 which provides that the making of a check, " ***payment of which is refused by the drawee, shall be prima facie evidence of intent to defraud ***", While the statute raises the presumption of intent to defraud, such presumption may be rebutted by evidence explaining the transaction and where the evidence is sufficient to dispel any presumption of intent to defraud, the statute alone will not support a conviction under the Arkansas Hot Check Law. [Cc]. In the present case, there was no intent to defraud because there was ample evidence to support the jury finding that Graves did not know that she had insufficient funds in her bank account at the time of writing the checks with which to make payment of the two checks when they were processed for payment at her bank. And while restitution alone is not an absolute defense to the Arkansas Hot Check Law [c], the fact that Graves immediately agreed to make restitution and did in fact make restitution is some evidence that she did not intend to defraud Skaggs. Certainly, once Graves had made restitution and that fact was coupled with all the other facts known to Skaggs' employees, a conclusion that Skaggs had no probable cause to further insist upon the prosecution of Graves would be justified.

Malice. Regarding the element of malice, it is generally agreed that the lack of probable cause may give rise to an inference of malice, sufficient to carry the question to the jury. W. Prosser, Torts, Sec. 113, p. 868 (3rd ed. 1964). The courts require that malice in fact be shown in order to sustain a recovery for malicious prosecution. This

is usually established by proving that the defendant had a wrongful or improper motive or was motivated by some purpose other than bringing a guilty

1153

person to justice, such as, using the prosecution as a means to recover property, to extort money, or to collect a debt. " ***Hence, proof of malice need not be direct but may be inferred from circumstances surrounding the defendant's act. This does not mean the defendant must have acted out of hatred, ill will, spite or grudge." 22 Ark.L.Rev. 340, 353, supra. The jury could and probably did believe that Skaggs instituted the criminal proceedings without probable cause in an effort to collect the two checks. The jury finding that Skaggs acted with malice has ample support in the record. Certainly, Skaggs' insistence that the prosecution continue against Graves after she had been released by Sgt. Arnold following her arrest with the statement to the effect that Skaggs did not care if Graves had paid the checks, Skaggs wanted her prosecuted anyway, supports the inference that Skaggs continued to act maliciously.

Damages. Appellant argues that the jury verdict was so grossly excessive as to show that it was the result of passion, prejudice or other improper motives. No cases are cited to guide this Court in its determination of this issue. The general rule is as follows:

"Although the verdict is large and the trial court, in the exercise of a sound discretion, might properly have set it aside, the appellate court will not disturb the verdict, although it may seem too large, in the absence of circumstances tending to show that it was the result of

passion, prejudice, or other improper motive, or that the amount fixed was not the result of a deliberate and conscientious conviction in the minds of the jury and the court, or so excessive as to shock a sense of justice in the minds of the appellate court." 17 Tex.Jur.2d Damages, Sec. 341, p. 415 (1960).

As stated in Green v. Meadows, 527 S.W.2d 496 (Tex.Civ.App. Houston-1st Dist. 1975, writ ref'd n.r.e.), there are no objective guidelines by which we can measure the money equivalent of mental pain.

" ***Much discretion must be allowed the jury in fixing this amount. The trial judge refused to order a remittitur. We are unable to say that the jury's verdict is excessive to the extent that the judgment should be reversed for that reason only. ***"

In Green, the jury had awarded the plaintiff $20,000.00 in a malicious prosecution suit.

The facts in the present case show that Sharon Graves has suffered substantial injury. She was arrested and paraded through the store by a uniformed policeman and the store manager in front of her friends and former fellow employees. She was taken to the police station where she was booked and suffered the humiliation of a criminal charge. She testified that because of this criminal record she was not hired by several prospective employers because of her arrest record which will follow her the rest of her life. The evidence supports the jury verdict. ***

To recapitulate, the pleadings were adequate to support the judgment; there was sufficient evidence to establish that Skaggs had

instituted and continued criminal prosecution against Sharon Graves; there was evidence that the proceeding was terminated in favor of Graves; that the evidence established an absence of probable cause for institution of the criminal proceedings against Graves; that the evidence supports the finding of malice; and, the evidence supports the jury finding of $20,000.00 in damages. ***

NOTES AND QUESTIONS

1. Institution of Criminal Proceedings. This element may be met by (1) indictment or information or (2) the issuance of criminal process to bring the accused before a magistrate whose function is to determine whether he is guilty or is to be held for later determination or (3) arrest on a criminal charge. The commencement must have been either initiated or procured by the private prosecuting witness, or he must have played an active part in continuing the proceeding. See Wilson v. Yono, 65 Mich.App. 441, 237 N.W.2d 494 (1975). Giving evidence to authorities to initiate criminal prosecution is commonly referred to as "pressing charges" and is often the factual predicate in malicious criminal prosecution. The defendant's malicious prosecution must be the proximate legal cause of the commencement of criminal charges. Where such defendant "simply gives a statement of fact to the authorities (assuming he does not know it to be false), and leaves the decision to prosecute solely in the hands of the authorities, who have the opportunity to conduct an independent evaluation, he is not regarded as having instigated the criminal action." Dorf v. Usher, 514 So.2d 68, 69 (Fla. Dist. Ct. App. 1987).

2. Termination in Favor of the Accused. This element is met by discharge by magistrate at a preliminary hearing, Tritchler v. West Virginia Newspaper Pub. Co., Inc., 156 W.Va. 335, 193 S.E.2d 146 (1972); grand jury refusal to indict, Davis v. Quille, 248 Md. 631, 237 A.2d 745 (1968); a nolle prosequi, Bickford v. Lantay, 394 A.2d 281 (Me. 1978); dismissal, Green v. Warnock, 144 Kan. 170, 58 P.2d 1059 (1936); failure to prosecute for lack of evidence, Southern Farmers Ass'n v. Whitfield, 238 Ark. 607, 383 S.W.2d 506 (1964); quashing of indictment, Davis v. McCrory Corp., 262 So.2d 207 (Fla.App.1972); or acquittal, Singer Mfg. Co. v. Bryant, 105 Va. 403, 54 S.E. 320 (1906). It is not met by an indecisive termination, Weissman v. K-Mart Corp., 396 So.2d 1164 (Fla.App.1981); Hoog v. Strauss, 567 S.W.2d 353 (Mo.App. 1978); or by the impossibility of bringing the accused to trial, Halberstadt v. New York Life Ins. Co., 194 N.Y. 1, 86 N.E. 801 (1909); however, the abandonment or termination must touch the merits and indicate "accused's innocence." MacFawn v. Kresler, 88 N.Y.2d 859, 644 N.Y.S.2d 486, 666 N.E.2d 1359 (1996); O'Brien v. Alexander, 101 F.3d 1479, 1486 (2d Cir. 1996) (applying New York law). New York has held that a termination is favorable when it is merely "not inconsistent with innocence." See Smith-Hunter v. Harvey, 95 N.Y.2d 191, 712 N.Y.S.2d 438, 734 N.E.2d 750 (2000) (holding that termination in a manner "such that the proceeding cannot be brought again, qualifies as a favorable termination for purposes of a malicious prosecution action"). The disposition of the underlying case need not reach the merits in all circumstances. The Restatement (Second) of Torts

§ 674, comment j (1977) enunciates a test that turns on the "circumstances under which the proceedings are withdrawn." In Cult Awareness Network v. Church of Scientology International, 177 Ill.2d 267, 278--79, 226 Ill.Dec. 604, 685 N.E.2d 1347, 1353 (1997), the court found that the Restatement's position "best balances the right of citizens to have free access to our courts and the right of the individual to be free from being haled into court without reason, thereby better serving the interests of justice."

3. Lack of Probable Cause.

A. Mistake of Fact. The private prosecutor must have reasonable grounds for believing that the accused is guilty of the criminal charge. But if the private prosecutor does not honestly believe that the accused was guilty, there is no probable cause. Hanson v. Couch, 360 So.2d 942 (Ala. 1978).

A reasonable mistake will not destroy probable cause. The standard is akin to the reasonable person in a negligence case, but the difference is that probable cause is for the court, rather than the jury, to decide. The defendant's subjective knowledge is a question of fact for the jury under proper instructions; but whether, upon established facts, there was probable cause is not left to them. See generally Smith v. Tucker, 304 A.2d 303 (D.C.App.1973); Turner v. City of Chicago, 91 Ill.App. 3d 931, 47 Ill.Dec. 476, 415 N.E.2d 481 (1980). If a reasonable person would investigate further to make more certain of the facts before instituting criminal proceedings and the private prosecutor fails to do so, he may be found to have acted without probable cause. Food Fair Stores, Inc. v. Kincaid, 335 So.2d

560 (Fla.App.1976); Lambert v. Sears, Roebuck & Co., 280 Or. 123, 570 P.2d 357 (1977).

In both Kroger Co. v. Standard, 283 Ark. 44, 670 S.W.2d 803 (1984), and Wal-Mart Stores, Inc. v. Yarbrough, 284 Ark. 345, 681 S.W.2d 359 (1984), a customer was accosted after leaving the store with an article not paid for. Disbelieving the customer's explanation, the store prosecuted for shoplifting and the jury acquitted. Suit for malicious prosecution by the customer, who obtained a jury award of compensatory damages and substantial punitive damages in each. The appellate court affirmed one case and reversed the other, by a divided vote each time.

B. Mistake of Law. A layman who institutes a criminal proceeding on facts that do not constitute a crime may be held to have acted without probable cause if he failed to consult an attorney before initiating the charges; there may be circumstances, however, under which such conduct is reasonable. See generally Restatement (Second) of Torts § 662, comment i (1977). For a case law sampling, see Meadows v. Grant, 15 Ariz.App. 104, 486 P.2d 216 (1971); Ruff v. Eckerds Drugs, Inc., 265 S.C. 563, 220 S.E.2d 649 (1975). Some courts hold, however, that even a reasonable mistake of law will not support probable cause. See Thomas v. Kessler, 334 Pa. 7, 5 A.2d 187 (1939); Atkinson v. Birmingham, 44 R.I. 123, 116 A. 205 (1922).

4. Effect of Various Occurrences on Determination of Probable Cause.

A. Action of Magistrate on Preliminary Hearing. Discharge is conclusive of lack of probable cause unless it was not on the merits

or was based on testimony of the accused at the hearing. Hawkins v. Hawkins, 32

1156

N.C.App. 158, 231 S.E.2d 174 (1977); Huntley v. Harberts, 264 N.W.2d 497 (S.D.1978). Contra, Hoene v. Associated Dry Goods Corp., 487 S.W.2d 479 (Mo. 1972). The modern trend of the authorities is that commitment is more than just evidence that there was probable cause; rather it establishes a presumption of probable cause unless it is shown that the decision of the magistrate or grand jury was contaminated by deception. Solitro v. Moffatt, 523 A.2d 858 (RI 1987). Restatement (Third) of Torts: Liability for Economic Harm § 22, comment e, illus. 14.

B. Outcome of Proceedings. Restatement (Third) Torts: Liability for Economic Harm § 23 provides that a criminal proceeding terminates in favor of the accused when the final disposition is not inconsistent with the innocence of the accused. Not inconsistent with the innocence of the accused includes not only acquittal, but also dismissal that does not suggest culpability of the accused. Restatement (Third) of Torts: Liability for Economic Harm § 23 (2020). Abandonment by the private prosecutor is evidence of lack of probable cause. See Exxon Corp. v. Kelly, 281 Md. 689, 381 A.2d 1146 (1978). Conviction is usually held to be conclusive on existence of probable cause. Earley v. Harry's LG.A., Inc., 223 Kan. 32, 573 P.2d 572 (1977); cf. J.C. Penney Co., Inc. v. Blush, 356 So.2d 590 (Miss. 1978) (presumption). Acquittal does not have any effect, according to the majority rule. Meyer v. Nedry, 159 Or. 62, 78 P.2d 339 (1938); Kroger Texas Ltd. Partnership v. Suberu, 216 S.W.3d

788 (Tex. 2006) (alleged shoplifter's acquittal does not prove lack of probable cause).

C. Advice of counsel is conclusive on the issue of probable cause, if the advice is sought in good faith and is given after a full and fair disclosure of the facts within the accuser's knowledge and information. Varner v. Hoffer, 267 Or. 175, 515 P.2d 920 (1973); Bain v. Phillips, 217 Va. 387, 228 S.E.2d 576 (1976); Murray v. Wal-Mart, Inc., 874 F.2d 555 (8th Cir. 1989) (applying Arkansas law).

5. "Malice." This troublesome word turns up again in malicious prosecution, and has given its name to the action. Here, it does not necessarily mean hatred, spite or ill will, but rather a purpose in initiating the prosecution other than that of bringing a criminal to justice. "Malice" is constituted where defendant has used the prosecution to extort money from the accused, to recover property from him, to collect a debt, or to compel performance of a contract. Dislike and ill will, which are not uncommon toward any criminal, may not be enough for "malice," if the proper purpose is also found to exist. The courts have tended, however, to look to the primary objective of the defendant. This element is usually left to the jury, unless the facts in evidence permit only one decision. See Restatement (Second) of Torts § 668 (1977). It is generally agreed that the jury are to be instructed that lack of probable cause may be evidence of the existence of malice, but that malice is not evidence of lack of probable cause.

6. Damages. The plaintiff must have suffered damage from the prosecution; it is assumed by the law that some damage, such as harm to reputation, will necessarily follow. The same is true of

humiliation and other mental suffering. There may, in addition, be recovery for any special damages that the plaintiff can prove, as for example those for arrest or

1157

imprisonment; discomfort or injury to health; and expenses, such as attorney's fees, incurred in defending the criminal case. Punitive damages are clearly appropriate for this tort and can be awarded at the discretion of the jury in most jurisdictions.

Malice is an ingredient in the determination of punitive damages. For a discussion of the differences in the meaning of "malice" for the substantive cause of action and for the purposes of determining entitlement to punitive damages, see Sanders v. Daniel International Corporation, 682 S.W.2d 803 (Mo. 1984). Malice inferred from want of probable cause is not sufficient to sustain punitive damage award where actual malice for punitive damages must be established on clear and convincing evidence. Montgomery Ward v. Wilson, 339 Md. 701, 664 A.2d 916 (1995).

7. Malicious prosecution has been considered an action "disfavored by law." Moon v. Pillion, 2 So. 3d 842, 845 (Ala. 2008). Courts are careful to consider the "public policy that all persons shall resort freely to the courts for redress of wrongs and to enforce their rights, and that this may be done without the peril of a suit for damages in the event of an unfavorable judgment by jury or judge." Mitchell v. Folmar & Assocs., LLP, 854 So. 2d 1115, 1117 (Ala. 2003).

Friedman v. Dozorc

Supreme Court of Michigan, 1981.

412 Mich. 1, 312 N.W.2d 585.

LEVIN, Justice. ***Leona Serafin entered Outer Drive Hospital in May, 1970, for treatment of gynecological problems. A dilation and curettage was performed by her physician, Dr. Harold Krevsky. While in the hospital, Mrs. Serafin was referred to the present plaintiff, Dr. Friedman, for urological consultation. Dr. Friedman recommended surgical removal of a kidney stone which was too large to pass, and the operation was performed on May 20, 1970. During the surgery, the patient began to ooze blood uncontrollably. Although other physicians were consulted, Mrs. Serafin's condition continued to worsen and she died five days after the surgery. An autopsy was performed the next day; the report identified the cause of death as thrombotic thrombocytopenic purpura, a rare and uniformly fatal blood disease, the cause and cure of which are unknown.

On January 11, 1972, attorneys Dozorc and Golden, the defendants in this action, filed a malpractice action on behalf of Anthony Serafin, Jr., for himself and as administrator of the estate of Leona Serafin, against Peoples Community Hospital Authority, Outer Drive Hospital, Dr. Krevsky and Dr. Friedman, as well as another physician who was dismissed as a defendant before trial. ***No expert testimony tending to show that any of the defendants had breached accepted professional standards in making the decision to perform the elective surgery or in the manner of its performance was presented as part of the plaintiff's case. The judge entered a directed verdict of no cause of action in favor of

Dr. Friedman and the other defendants at the close of the plaintiffs proofs. The judge subsequently denied a motion for costs brought by codefendant Peoples Community Hospital Authority, pursuant to GCR 1963, 111.6. The Court of Appeals affirmed and this Court denied leave to appeal.

Dr. Friedman commenced the present action on March 17, 1976 in Oakland Circuit Court.

[The trial court granted summary judgment for the defendants. The Court of Appeals affirmed in part and reversed in part.]

This Court granted leave to appeal on both the plaintiff's application from that portion of the Court of Appeals decision affirming the dismissal of the causes of action sounding in negligence and abuse of process and on the defendants' application to cross-appeal from that portion of the decision reversing the dismissal of the cause of action for malicious prosecution. ***

Plaintiff and amici in support urge this Court to hold that an attorney owes a present or prospective adverse party a duty of care, breach of which will give rise to a cause of action for negligence. We agree with the circuit judge and the Court of Appeals that an attorney owes no actionable duty to an adverse party.

Plaintiff and amici argue that an attorney who initiates a civil action owes a duty to his client's adversary and all other foreseeable third parties who may be affected by such an action to conduct a reasonable investigation and re-examination of the facts and law so that the attorney will have an adequate basis for a good-faith belief that the client has a tenable claim. Plaintiff contends that this duty is

created by the Code of Professional Responsibility and by the Michigan General Court Rules. ***

In a negligence action the question whether the defendant owes an actionable legal duty to the plaintiff is one of law which the court decides after assessing the competing policy considerations for and against recognizing the asserted duty. ***

Assuming that an attorney has an obligation to his client to conduct a reasonable investigation prior to bringing an action, that obligation is not the functional equivalent of a duty of care owed to the client's adversary. We decline to so transform the attorney's obligation because we view such a duty as inconsistent with basic precepts of the adversary system. ***

[C]reation of a duty in favor of an adversary of the attorney's client would create an unacceptable conflict of interest which would seriously hamper an attorney's effectiveness as counsel for his client. Not only would the adversary's interests interfere with the client's interests, the attorney's justifiable concern with being sued for negligence would detrimentally interfere with the attorney-client relationship. ***

1159

Because ***a cause of action for negligence in favor of a client's adversary might unduly inhibit attorneys from bringing close cases or advancing innovative theories, or taking action against defendants who can be expected to retaliate, we decline to recognize a duty of due care to the adverse party. ***

To recover upon a theory of abuse of process, a plaintiff must plead and prove (1) an ulterior purpose and (2) an act in the use of process which is improper in the regular prosecution of the proceeding. ***

We need not decide whether plaintiffs pleadings sufficiently allege that the defendants had an ulterior purpose in causing process to issue, since it is clear that the plaintiff has failed to allege that defendants committed some irregular act in the use of process. *** [A] summons and complaint are properly employed when used to institute a civil action, and thus plaintiff has failed to satisfy the second element required. ***

We note that other courts that have addressed the question whether abuse of process is a possible theory of recovery in the context of a medical malpractice countersuit have found that mere commencement of an action for malpractice is not an improper use of process. [Cc]

Plaintiff relies upon the same allegations respecting defendants' conduct and their failure to meet professional standards which assertedly constitute negligence in contending that he has pled a cause of action for malicious prosecution. He argues that the question of probable cause in a malicious prosecution action against the attorney for an opposing party turns on whether the attorney fulfilled his duty to reasonably investigate the facts and law before initiating and continuing a lawsuit. If the attorney's investigation discloses that the claim is not tenable, then it is his obligation to discontinue the action. ***

We agree with defendants that under Michigan law special injury remains an essential element of the tort cause of action for malicious

prosecution of civil proceedings. ***

The recognition of an action for malicious prosecution developed as an adjunct to the English practice of awarding costs to the prevailing party in certain aggravated cases where the costs remedy was thought to be inadequate and the defendant had suffered damages beyond the expense and travail normally incident to defending a lawsuit. In 1698 three categories of damage which would support an action for malicious prosecution were identified: injury to one's fame (as by a scandalous allegation), injury to one's person or liberty, and injury to one's property. To this day the English courts do not recognize actions for malicious prosecution of either criminal or civil proceedings unless one of these types of injury, as narrowly defined by the cases, is present.

A substantial number of American jurisdictions today follow some form of "English rule" to the effect that "in the absence of an arrest, seizure, or special damage, the successful civil defendant has no remedy,

1160

despite the fact that his antagonist proceeded against him maliciously and without probable cause." A larger number of jurisdictions, some say a majority, follow an "American rule" permitting actions for malicious prosecution of civil proceedings without requiring the plaintiff to show special injury. ***

The plaintiffs complaint does not allege special injury. We are satisfied that Michigan has not significantly departed from the English rule and we decline to do so today. ***

Since this Court has not heretofore declared that an action for malicious prosecution of civil proceedings may be maintained in the absence of special injury, it remains to be decided whether we should so hold today. ***

Most commentators appear to favor abrogation of the special injury requirement to make the action more available and less difficult to maintain. Their counsel should, however, be evaluated skeptically. The lawyer's remedy for a grievance is a lawsuit, and a law student or tort professor may be particularly predisposed by experience and training to see the preferred remedy for a wrongful tort action as another tort action. In seeking a remedy for the excessive litigiousness of our society, we would do well to cast off the limitations of a perspective which ascribes curative power only to lawsuits.

We turn to a consideration of Dean Prosser's criticisms of the three reasons commonly advanced by courts for adhering to the English rule. First, to the assertion that the costs awarded to the prevailing party are intended as the exclusive remedy for the damages incurred by virtue of the wrongful litigation, Prosser responds that "in the United States, where the costs are set by statute at trivial amounts, and no attorney's fees are allowed, there can be no pretense at compensation even for the expenses of the litigation itself." This argument is compelling, but it does not necessarily justify an award of compensation absent the hardship of special injury or dictate that an award of compensation be assessed in a separate lawsuit. Second, to the arguments that an unrestricted tort of wrongful civil proceedings will deter honest litigants and that an innocent party must bear the costs of litigation as the price of a system which

permits free access to the courts, Prosser answers that "there is no policy in favor of vexatious suits known to be groundless, which are a real and often a serious injury." But a tort action is not the only means of deterring groundless litigation, and other devices may be less intimidating to good-faith litigants. Finally, in response to the claim that recognition of the tort action will produce interminable litigation, Prosser argues that the heavy burden of proof which the plaintiff bears in such actions will safeguard bona fide litigants and prevent an endless chain of countersuits. But if few plaintiffs will recover in the subsequent action, one may wonder whether there is any point in recognizing the expanded cause of action. If the subsequent action does not succeed, both parties

1161

are left to bear the expenses of two futile lawsuits, and court time has been wasted as well.

***

[Successful defense of the former action is no assurance of recovery in a subsequent tort action, but the unrestricted availability of such an action introduces a new strategic weapon into the arsenal of defense litigators, particularly those whose clients can afford to devote extensive resources to prophylactic intimidation.

***If the instant plaintiffs approach is adopted, all plaintiffs and their attorneys henceforth must also weigh the likelihood that if they persevere in the action and receive an unfavorable decision, they will not only take nothing but also be forced to defend an action for malicious prosecution of civil proceedings. ***[T]his would push the

pendulum too far in favor of the defense, more than is necessary to rectify the evil to which this effort is directed. ***

The cure for an excess of litigation is not more litigation. Meritorious as well as frivolous claims are likely to be deterred. There are sure to be those who would use the courts and such an expanded tort remedy as a retaliatory or punitive device without regard to the likelihood of recovery or who would seek a means of recovering the actual costs of defending the first action without regard to whether it was truly vexatious. ***

Apart from special injury, elements of a tort action for malicious prosecution of civil proceedings are (1) prior proceedings terminated in favor of the present plaintiff, (2) absence of probable cause for those proceedings, and (3) "malice," more informatively described by the Restatement as "a purpose other than that of securing the proper adjudication of the claim in which the proceedings are based."

The following discussion addresses the chief concern of this case: the conditions under which the attorney for an unsuccessful plaintiff may be held liable. ***

The absence of probable cause in bringing a civil action may not be established merely by showing that the action was successfully defended. To require an attorney to advance only those claims that will ultimately be successful would place an intolerable burden on the right of access to the courts.

The Court of Appeals adopted, and plaintiff endorses, the standard for determining whether an attorney had probable cause to initiate and continue a lawsuit articulated in Tool Research & Engineering Corp. v. Henigson, 46 Cal.App.3d 675, 683-684, 120 Cal.Rptr. 291

(1975): "The attorney is not an insurer to his client's adversary that his client will win in litigation. Rather, he has a duty 'to represent his client zealously ***[seeking] any lawful objective through legally permissible means ***[and presenting] for adjudication any lawful claim, issue, or defense.' (ABA, Code of Professional Responsibility, EC 7-1, DR 7-101[A][l],

1162

***.) So long as the attorney does not abuse that duty by prosecuting a claim which a reasonable lawyer would not regard as tenable or by unreasonably neglecting to investigate the facts and law in making his determination to proceed, his client's adversary has no right to assert malicious prosecution against the attorney if the lawyer's efforts prove unsuccessful. ***

"The attorney's obligation is to represent his client honorably and ethically, and he may, without being guilty of malicious prosecution, vigorously pursue litigation in which he is unsure of whether his client or the client's adversary is truthful, so long as that issue is genuinely in doubt."

The Henigson court also said: "An attorney has probable cause to represent a client in litigation when, after a reasonable investigation and industrious search of legal authority, he has an honest belief that his client's claim is tenable in the forum in which it is to be tried."

In our view, this standard, while well-intentioned, is inconsistent with the role of the attorney in an adversary system.

Our legal system favors the representation of litigants by counsel. Yet the foregoing standard appears skewed in favor of non-

representation; the lawyer risks being penalized for undertaking to present the client's claim to a court unless satisfied, after a potentially substantial investment in investigation and research, that the claim is tenable.

***

Moreover, the Henigson standard suggests rather ominously that every time a lawyer representing, say, a medical malpractice plaintiff encounters a fact adverse to the client's position or an expert opinion that there was no malpractice, he must immediately question whether to persevere in the action. An attorney's evaluation of the client's case should not be inhibited by the knowledge that perseverance may place the attorney personally at risk; the next fact or the next medical opinion may be the one that makes the case, and such developments may occur even on the eve of trial.

Indeed, a jury-submissible claim of medical malpractice may sometimes be presented even without specific testimony that the defendant physician violated the applicable standard of care. Thus, a lawyer may proceed in the good-faith belief that his proofs will establish a prima facie case of medical malpractice without expert testimony, only to find that the court disagrees. Such conduct is not the equivalent of proceeding without probable cause. ***

This Court has said, in opinions addressed to the tort of malicious prosecution, that malice may be inferred from the facts that establish want of probable cause, although the jury is not required to draw that inference. This rule, developed in cases where damages were sought from

a lay person who initiated proceedings, fails to make sufficient allowance for the lawyer's role as advocate and should not be applied in determining whether a lawyer acted for an improper purpose.

A client's total lack of belief that the action he initiates or continues can succeed is persuasive evidence of intent to harass or injure the defendant by bringing the action. But a lawyer who is unaware of such a client's improper purpose may, despite a personal lack of belief in any possible success of the action, see the client and the claim through to an appropriate conclusion without risking liability. ***

The Restatement defines the mental element of the tort of wrongful civil proceedings as "a purpose other than that of securing the proper adjudication of the claim in which the proceedings are based." A finding of an improper purpose on the part of the unsuccessful attorney must be supported by evidence independent of the evidence establishing that the action was brought without probable cause.

We affirm that portion of the Court of Appeals decision which upheld summary judgment in favor of defendants on plaintiff's claims sounding in negligence and abuse of process. With respect to plaintiffs claim for malicious prosecution, we reverse the decision of the Court of Appeals and affirm the trial court's grant of summary judgment; we do so on the ground that an action for malicious prosecution of a civil action may not be brought absent special injury and the plaintiff failed to plead special injury.

[LEVIN, Justice concurred separately, suggesting that the Court devise a new rule authorizing the judge "to order payment of the

prevailing party's actual expenses, including reasonable attorneys' fees and limited consequential damages, where the action was wrongfully initiated, defended or continued."]

NOTES AND QUESTIONS

1. The title of malicious prosecution is often expanded to cover not only criminal prosecutions but also frivolous or unwarranted civil actions. To avoid confusion, the latter action is sometimes called malicious civil prosecution. The Restatement (Third) of Torts: Liability for Economic Harm § 24 (2020) gives it the title of wrongful use of civil proceedings. It describes a claim arising when a person brings a baseless civil claim.

2. In general, the elements of the cause of action are the same for both criminal and civil prosecutions, although the gravity of a criminal prosecution makes the grounds more burdensome to establish for the plaintiff in the latter suit. As the principal case indicates, the major variance involves the element of damages. In the case of wrongful use of civil proceedings, damages are not presumed and must be proved. The American rule is that each party to a civil action bears his own expenses of litigation, including attorney's fees. In England, attorney's fees are normally awarded to the winning party, and as a result there is no occasion for awarding them in a subsequent tort action, as part of the damages. Around a third of the

American states follow the so-called "English rule"--not in awarding attorney's fees to the winner but only in declining to allow recovery of attorney's fees as damages in the subsequent tort action. This result is distinctly anomalous: the damages that are an inevitable result of

the tortious conduct and that always arise cannot be recovered, and the only recoverable damages are the abnormal special damages that are specifically proved. The Restatement (Second) of Torts meets this persistent anomaly by providing expressly for certain types of injuries, such as civil proceedings involving arrest of person or deprivation of property, or repetitive actions. See §§ 677--680. But see Johnson v. Calado, 159 Wis.2d 446, 464 N.W.2d 647 (1991), reaffirming adherence to the English rule. The courts have often resisted expansion of the tort of malicious prosecution or wrongful civil actions. The remedy for excessive litigation is best addressed by facilitating speedy resolution of litigation or authorizing sanctions for abuses. With the policy of reducing litigation in mind, the California Supreme Court in Brennan v. Tremco Inc., 25 Cal.4th 310, 105 Cal.Rptr.2d 790, 20 P.3d 1086 (2001), decided that an adverse finding in a contractual arbitration proceeding could not be a basis for a malicious prosecution action. But cf. where the arbitration is ordered by a court, see Stanley v. Superior Court, 130 Cal.App.3d 460, 181 Cal.Rptr. 878 (1982). See also Brennan, 20 P.3d at 1089.

3. Note the differences in the elements of probable cause and "malice." The courts pride themselves in being open to the public to settle civil disputes. What is required is not a better-than-even chance that the suit will be won, but a finding by the court that there was a reasonably good chance that it would. How does this concept apply when the original plaintiff was trying to persuade the court to change the law?

If "malice" means bringing a civil action with an ulterior motive, how does this apply? Does it mean that the plaintiff brought the action with a subjective awareness that he had no actual chance of

prevailing? Can the attorney be held liable? What is the effect of his failure to make an adequate investigation?

Is there real basis for requiring both lack of probable cause and "malice," or should either one be sufficient?

4. Is it feasible to arrange for award of appropriate litigation expenses in the original action, rather than requiring a second action in tort, with a different judge and jury? The cases have held that a countersuit, rather than a counterclaim in the same suit, is required, because there must have been a termination in favor of the plaintiff at the time the tort claim is filed; Lees v. Smith, 363 So.2d 974 (La. Ct. App. 1978). A few states have provided by statute for allowing counterclaims; see, e.g., Clark v. Baines, 150 Wash.2d 905, 84 P.3d 245 (2004) (discussing malicious prosecution counterclaim pursuant to Washington's relevant statutory cause of action, RCWA 4.24.350).

5. Other states have provided that a party may file a motion to recover litigation expenses against someone who "asserted a claim, defense, or other position with respect to which there existed such a complete absence of any

justiciable issue of law or fact that it could not be reasonably believed that a court would accept the asserted claim, defense, or other position" or "it finds that an attorney or party brought or defended an action, or any part thereof, that lacked substantial justification or that the action, or any part thereof, was interposed for delay or harassment, or if it finds that an attorney or party unnecessarily expanded the proceeding by other improper conduct..." O.C.G.A. § 9-15-14.

6. If the case is filed in federal court, another remedy may be available through Rule 11 of the Federal Rules of Civil Procedure. Rule 11 establishes the standards that attorneys and parties must meet when filing pleadings, motions, or other documents in court and the circumstances under which a court may impose sanctions for the violation of those standards. At its core, the rule requires that representations made to the court be based on the best of the person's knowledge, information, and belief, formed after an inquiry reasonable under the circumstances. Violations of the standard of conduct may subject the attorney or client to various sanctions designed to deter repetition of the conduct. If the principal case had been filed in federal court under the current version of Rule 11, defendants might have served motions for summary judgment (based on the absence of proof of violation of the standard of care) and for sanctions under Rule 11. The rule specifies that the plaintiffs would then have had twenty-one days to withdraw their complaint to avoid the imposition of sanctions. Rule 11 permits the trial court judge to sanction conduct without the filing of another action. Its primary purpose, however, is to streamline litigation. Rule 11 is not foremost intended to compensate the aggrieved party. Michigan enacted a statute responding to the principal case. For discussion see Wade, On Frivolous Litigation: A Study of Tort Liability and Procedural Sanctions, 14 Hofstra L. Rev. 433 (1986).

However, a claim for Rule 11 sanctions in federal court is not necessarily subject to issue or claim preclusion with regards to a malicious prosecution claim in state court. Donaldson v. Ovella, 228 So. 3d 820 (Miss. Ct. App.), reh'g denied (June 13, 2017), cert, denied, 229 So. 3d 121 (Miss. 2017) (holding that "elements

required for sanctions under the federal rules were not identical to the elements of malicious prosecution, and there was no evidence that the federal court's denial of sanctions adjudicated whether party possessed probable cause to bring suit").

Grainger v. Hill

Court of Common Pleas, 1838.

4 Bing.N.C. 212, 132 Eng.Rep. 769.

TINDAL C.J. This is a special action on the case, in which the Plaintiff declares that he was the master and owner of a vessel which, in September 1836, he mortgaged to the Defendants for the sum of 80£, with a covenant for repayment in September 1837, and under a stipulation that, in the mean time, the Plaintiff should retain the command of the vessel, and prosecute voyages therein for his own profit: that the Defendants, in order to compel the Plaintiff through duress to give up the register of the vessel, without which he could not go to sea, before the

1166

money lent on mortgage became due, threatened to arrest him for the same unless he immediately paid the amount: that, upon the Plaintiff refusing to pay it, the Defendants, knowing he could not provide bail, arrested him under a capias, indorsed to levy 95£ 17s. 6d., and kept him imprisoned, until, by duress, he was compelled to give up the register, which the Defendants then unlawfully detained; by means whereof the Plaintiff lost four voyages from London to Caen. ***The Defendants pleaded the general issue; after a verdict

for the Plaintiff, the case comes before us ***under an application for a nonsuit. ***

The ***ground urged for a nonsuit is, that there was no proof of the suit commenced by the Defendants having been terminated. But the answer to this ***namely, the omission to allege want of reasonable and probable cause for the Defendants' proceeding, is ***that this is an action for abusing the process of the law, by applying it to extort property from the Plaintiff, and not an action for a malicious arrest or malicious prosecution, in order to support which action the termination of the previous proceeding must be proved, and the absence of reasonable and probable cause be alleged as well as proved. ***If the course pursued by the Defendants is such that there is no precedent of a similar transaction, the Plaintiffs remedy is by an action on the case, applicable to such new and special circumstances; and his complaint being that the process of the law has been abused, to effect an object not within the scope of the process, it is immaterial whether the suit which that process commenced has been determined or not, or whether or not it was founded on reasonable and probable cause. ***

Judgment for Plaintiff.

NOTES AND QUESTIONS

1. The principal case is the classic authority. A more contemporary case on abuse of process is Board of Education of Farmingdale Union Free School District v. Farmingdale Classroom Teachers Association, Inc., 343 N.E.2d 278 (N.Y. 1975), where, in litigation between the School District and the Teachers Association, the latter served subpoenas on all the teachers in the school system, requiring

them to report to court at the same time. This harassment of the District was held to give rise to tort liability. See also Bell v. Icard, 986 S.W.2d 550 (Tenn. 1999) (filing of conservatorship proceedings to "scuttle" an allied lawsuit); Ash v. Cohn, 119 N.J.L. 54, 194 A. 174 (1937) (malicious abuse of process wherein defendant was seized and incarcerated under a body execution); Ginsberg v. Ginsberg, 84 A.D.2d 573, 443 N.Y.S.2d 439 (2d Dep't 1981) (in divorce action, defendant charged with using subpoena process "for the unjustified purpose of harassing [wife] and exhausting her financial resources in order to win a collateral advantage in the legal struggle over custody of the child"). Generally, liability is ascribed to the uses of process that are "primarily" intended to achieve an ulterior or improper purpose. See, e.g., Greenberg v. Wolfberg, 890 P.2d 895 (Okla. 1994).

1167

The tort of abuse of process is not available for merely filing a frivolous action, absent proof that the claim was filed for a collateral or ulterior purpose. Wells v. Orthwein, 670 S.W.2d 529 (Mo.App.1984); Martin v. Trevino, 578 S.W.2d 763 (Tex.Civ.App. 1978) and In re Burzynski, 989 F.2d 733 (5th Cir. 1993) (Texas law setting forth elements of claim). The tort of abuse of process requires misusing or misapplying process itself, for an end other than that which it was designed to accomplish. The filing of a lawsuit (or a counterclaim), even a baseless or frivolous one, where the suit or counterclaim is followed through to its natural conclusion, is not using legal means improperly. Pinon Sun Condo. Ass'n, Inc. v. Atain Specialty Ins. Co., No. 17-CV-01595-CMA-MJW. 2019 WL 140710, at *5 (D. Colo. Jan. 9, 2019). The procurement or issuance of

process with malicious intent, or without probable cause, is not actionable. To bring an action for medical malpractice to coerce a settlement by tying a physician up in litigation with its attendant time away from practice, while it may establish malice, does not constitute abuse of process. Detenbeck v. Koester, 886 S.W.2d 477 (Tex. App. 1994); accord, Commerce Bank, N.A. v. Plotkin, 255 III.App. 3d 870, 194 III.Dec. 409, 627 N.E.2d 746 (1994) (action against developers by landowners). The tort of abuse of process is not delimited by the requirements of malicious prosecution: Brownsell v. Klawitter, 102 Wis.2d 108, 306 N.W.2d 41 (1981) (action for abuse of process may proceed without termination of action in favor of defendant, an essential element in malicious prosecution).

In order to prove the tort of abuse of process, a plaintiff must prove: (1) the existence of an ulterior purpose; (2) a wrongful use of process, and (3) malice. Preskitt v. Lyons, 865 So.2d 424, 430 (Ala. 2003).

2. The Tort of Spoliation of Evidence. The integrity of the litigation process depends upon the availability of accurate and reliable information being made available in evidence. The California Supreme Court in Smith v. Superior Court, 151 Cal.App.3d 491, 198 Cal.Rptr. 829 (1984), implied a cause of action for failure to preserve evidence where a car dealership, accused of negligence in installing the wheels of a van, lost or destroyed parts of the vehicle. The van wheels had spun off the van injuring plaintiff as she drove past the van. The actions of the dealership relating to the van after the accident made investigation of the cause of the accident impossible. The Court of Appeals recognized a cause of action. It found that the expectation of preservation of evidence was akin to a "probable

expectancy that the court must protect from the kind of interference alleged here." Id. at 502.

In Willard v. Caterpillar, Inc., 40 Cal.App.4th 892, 911 (1995), an intermediate appellate court enunciated the elements of the tort of intentional spoliation of evidence

(1) pending or probable civil litigation, (2) defendant's knowledge that litigation is pending or probable, (3) willful destruction of evidence, (4) intent to interfere with plaintiffs prospective civil suit, (5) a causal relationship between the evidence destruction and the inability to prove the lawsuit, and (6) damages. Id. at 911.

1168

The development of the tort was, however, arrested by the California Supreme Court in Cedars-Sinai Medical Center v. Superior Court, 18 Cal.4th 1, 74 Cal.Rptr.2d 248, 954 P.2d 511 (1998):

when the alleged intentional spoliation is committed by a party to the underlying cause of action to which the evidence is relevant and when the spoliation is or reasonably should have been discovered before the conclusion of the underlying litigation, it is preferable to rely on existing nontort remedies rather than creating a tort remedy.

In a footnote, the court explicitly overruled Smith and Willard "to the extent they are inconsistent with [this holding]." Id. at 18 n.4.

In Cedars-Sinai, a hospital could not locate fetal monitoring strips that were allegedly critical to a plaintiff "prevailing in his malpractice action." Id. at 4--5. In response to the hospital's inability to produce these records, the guardian ad litem of the infant plaintiff attempted to amend his complaint to include an intentional spoliation of

evidence claim. The trial court granted the motion to amend precipitating the California Supreme Court's review of the writ of mandate and subsequent holding that scaled back the tort remedy for the intentional spoliation of evidence.

The court ironically decried intentional spoliation of evidence as "a grave affront to the cause justice... deserving] of [the court's] unqualified condemnation." Id. at 4. Despite the effect that the destruction of evidence has on "fairness and justice," the Court cited three concerns with the tort liability it originally created.

The first concern addressed by the Court involved "the conflict between a tort remedy for intentional first party spoliation and the policy against creating derivative tort remedies for litigation-related misconduct." Id. at 8. Deciding this conflict in favor of denying an independent tort remedy, the Court cited its traditional presumption against creating new derivative torts, the "spiraling]" burden of lawsuits, and other jurisdictions emphasis on the "finality of adjudication." Id. at 9-10. In addition, the court analogized the lack of an independent civil remedy for perjury as support for its conclusion.

The second concern for the Court was "the strength of existing nontort remedies for spoliation." Id. at 8. "Chief among these is the evidentiary inference that evidence which one party has destroyed or rendered unavailable was unfavorable to that party." Id. at 11. Other nontort remedies include the sometimes crippling sanctions imposed for violating discovery laws, id. at 12 (such as "dismissing part or all of the action, or granting a default judgment against the offending party"), and local bar associations' authority to firmly discipline lawyers that participate in the "suppression or destruction of

evidence." Id. at 13 ("Lawyers are subject to discipline, including suspension and disbarment...."). The deterrent effect of criminal penalties imposed on persons found guilty of intentionally destroying evidence provides more support for relying on the strength of existing nontort remedies.

The third and final concern for the Cedars-Sinai court was "the uncertainty of the fact of harm in spoliation cases." Id. at 8. In other words,

1169

"even if the jury infers from the act of spoliation that the spoliated evidence was somehow unfavorable to the spoliator, there will typically be no way of telling what precisely the evidence would have shown and how much it would have weighed in the victim's favor." Id. at 13-14. Furthermore, "if evidence would not have helped to establish plaintiffs case[J an award of damages for its destruction would work a windfall for the plaintiff." Id. at 14. Jurisdictions remain divided. In Gribben v. Wal-Mart Stores, Inc., 824 N.E.2d 349 (Ind. 2005), the court rejected the test on the grounds that existing remedies within the original or intended litigation suffice. It follows that third-party spoliation might give rise to an independent tort where such parties are not subject to remedies available against parties to the original litigation. Compare Rizzuto v. Davidson Ladders, Inc., 280 Conn. 225, 905 A.2d 1165 (2006), wherein the Connecticut court adopted the action on the grounds that it most adequately serves the fundamental purpose of tort law: compensating injured parties, shifting such loss to the responsible parties, and deterring wrongful conduct.

Where the spoliation of evidence is at the hands of third parties or it is not intentional, the tort is even more problematic: Lueter v. State of California, 94 Cal.App.4th 1285, 115 Cal.Rptr.2d 68 (2002) (declining the recognize the tort of negligent spoliation of evidence).

The California courts' experience with the tort of spoliation of evidence has been volatile. In the space of fifteen years, California courts went from an expansive recognition of both intentional and negligent spoliation of evidence causes of action, to a narrow, uncertain toleration of the tort in only the rarest cases. It is reported that over twenty-seven jurisdictions have considered the recognition of the tort. Six have adopted the tort of negligent spoliation, while seven have approved its intentional version. The Mississippi Supreme Court has succinctly stated an implicit truth of the action: the tort is available "only to dissatisfied plaintiffs and never to dissatisfied defendants." Dowdle Butane Gas Co., Inc. v. Moore, 831 So.2d 1124, 1134 (Miss. 2002) (action exists to compensate for the loss of prospective economic advantage in a separate lawsuit; only a plaintiff may have contemplated such advantage).

The Louisiana Supreme Court declined to recognize a cause of action in tort for negligent spoliation of evidence. Reynolds v. Bordelon, (La. 6/30/15), 172 So. 3d 589, 598. However, intentional spoliation of evidence has been recognized as a separate cause of action. Boutte v. Motorcycle Tour Conversions, Inc., (La. App. 3 Cir. 2/1/17). In Boutte, the court identified that that the "tort of spoliation of evidence has its roots in the evidentiary doctrine of 'adverse presumption,' which allows a jury instruction for the presumption that the destroyed evidence contained information detrimental to the party who destroyed the evidence unless such destruction is

adequately explained." Id at 3 (quoting Pham v. Contico Int'l, Inc., 759 So. 2d 880, 882 (La. App. 2000)).

CHAPTER 21 MISREPRESENTATION

1. Introduction

"Misrepresentation runs all through the law of torts, as a method of accomplishing various types of tortious conduct which, for reasons of historical development or as a matter of convenience, usually are grouped under categories of their own. Thus a battery may be committed by feeding the plaintiff poisoned chocolates, or by inducing his consent to a physical contact by misrepresenting its character; false imprisonment may result from a pretense of authority to make an arrest, a trespass to land from fraudulent statements inducing another to enter, or a conversion from obtaining possession of goods by false representations; and a malicious lie may give rise to a cause of action for the intentional infliction of mental suffering. A great many of the common and familiar forms of negligent conduct, resulting in invasions of tangible interests of person or property, are in their essence nothing more than misrepresentation, from a misleading signal by a driver of an automobile about to make a turn, or an assurance that a danger does not exist, to false statements concerning a chattel sold, or non-disclosure of a latent defect by one who is under a duty to give warning. In addition, misrepresentation may play an important part in the invasion of intangible interests, in such torts as defamation, malicious prosecution, or interference with contractual relations. In all such cases the particular form which the defendant's conduct has taken has become relatively unimportant, and misrepresentation has been merged to such an extent with other

kinds of misconduct that neither the courts nor legal writers have found any occasion to regard it as a separate basis of liability." William L. Prosser, Law of Torts 683-84 (4th ed. 1971).

Misrepresentation as a distinct cause of action has usually been associated with the common law action of deceit. The law of negligent misrepresentation or misstatement has developed rapidly in the past 50 years. The causes of action in misrepresentation normally protect economic interests and consequently the parameters of liability have been carefully controlled. See Restatement (Third) of Torts: Liability for Economic Harm, §§ 9--15 (2020). A form of strict liability, although occasionally recognized, is mainly banished from the ambit of tort liability.

Misrepresentation is thus a very complex field. The complexity results primarily from the existence of numerous alternative causes of action and subsequent remedies. They include:

1. The tort action of deceit.

2. An action for breach of contract, when the representation is found to be an express or implied term of the contract itself. In the case of the sale of chattels, this may take the form of an action for breach of warranty, which has definite tort characteristics of its own. The contract liability is of course a strict one, and requires no intent to deceive, negligence, or other fault than the breach of the contract itself.

3. A negligence action for negligent misrepresentation or misstatement. This is now recognized by nearly all courts where

tangible injury to person or property results, and by most of the American jurisdictions where the only damage is financial loss.

4. A suit in equity to rescind the transaction giving rise to a right of restitution with subsequent equitable remedies of constructive trust, equitable lien, and subrogation.

History. The action of deceit is of ancient origin. The old writ of deceit was employed in the Royal Courts as early as 1201. The writ lay only in cases of what we would now call malicious prosecution. At a later period this writ was superseded by an action on the case in the nature of deceit, which became the general common law remedy for any misrepresentation, whether fraudulent or not, which resulted in actual damage. It was used to afford a remedy for many wrongs that we should now regard as breaches of contract, such as false warranties in the sale of goods. Its use was limited almost entirely to direct transactions between the plaintiff and the defendant, and it was treated as inseparable from some contract relation. In other words, tort and contract were not at all clearly distinguished.

"Caveat emptor"--let the buyer beware--was the default rule. The buyer could garner protection by exacting a warranty from the seller. Thus in the picturesque old case of Chandelor v. Lopus, (1603) 79 Eng. Rep. 3 (Exch.); Cro. Jac. 4 (Eng.), a goldsmith sold a stone to the plaintiff, falsely stating that it was a bezar stone--a "calcareous concretion in the stomach of a goat," believed to have medicinal properties, particularly as a remedy against snake-bite. It was held that there was no liability, even though the seller knew his statement to be false, in the absence of an express undertaking to be bound. The only exception was in the sale of food and drink.

In 1789, in Pasley v. Freeman, (1789) 100 Eng. Rep. 450 (K.B.); 3 T.R. 51 (Eng.), the action of deceit was held to lie in a case where the plaintiff had had no dealings with the defendant, but had been induced by his misrepresentation to extend credit to a third person. After that date deceit was recognized as purely a tort action, and not necessarily founded upon a contract. At about the same time, in Stuart v. Wilkins, (1778) 99 Eng. Rep. 15 (K.B.); 1 Doug 18 (Eng.), the remedy for breach of warranty was taken over into the action of assumpsit, and it was thus established that it had a contract character. Thereafter the two lines of recovery slowly diverge, although some vestige of confusion between the two still remains, even today.

1173

At the beginning of the 19th Century the elements were in place to provide a wide liability for misrepresentations. These developments were put asunder by the momentous case of Derry v. Peek, infra at 1179. Deceit was established as the basis of tortious liability and deceit required an actual "intention to cheat." Nocton v. Ashburton, [1914] A.C. 932, 953 (HL Eng.), Dishonesty rather than negligence was the lodestar of liability. The tort requires a fraudulent misrepresentation relied upon by the plaintiff to his detriment. What is a "misrepresentation"?

2. Concealment and Nondisclosure

Swinton v. Whitinsville Savings Bank

Supreme Judicial Court of Massachusetts, 1942.

311 Mass. 677, 42 N.E.2d 808.

Action by Neil W. Swinton against Whitinsville Savings Bank to recover damages for alleged fraudulent concealment by defendant in sale of a house to plaintiff. From an order sustaining a demurrer to plaintiff's declaration, the plaintiff appeals.

Qua, JUSTICE. The declaration alleges that on or about September 12, 1938, the defendant sold the plaintiff a house in Newton to be occupied by the plaintiff and his family as a dwelling; that at the time of the sale the house "was infested with termites, an insect that is most dangerous and destructive to buildings"; that the defendant knew the house was so infested; that the plaintiff could not readily observe this condition upon inspection; that "knowing the internal destruction that these insects were creating in said house", the defendant falsely and fraudulently concealed from the plaintiff its true condition; that the plaintiff at the time of his purchase had no knowledge of the termites, exercised due care thereafter, and learned of them about August 30, 1940; and that, because of the destruction that was being done and the dangerous condition that was being created by the termites, the plaintiff was put to great expense for repairs and for the installation of termite control in order to prevent the loss and destruction of said house.

There is no allegation of any false statement or representation, or of the uttering of a half truth which may be tantamount to a falsehood. There is no intimation that the defendant by any means prevented the plaintiff from acquiring information as to the condition of the house. There is nothing to show any fiduciary relation between the parties, or that the plaintiff stood in a position of confidence toward or dependence upon the defendant. So far as appears the parties made a business deal at arm's length. The charge is concealment

and nothing more; and it is concealment in the simple sense of mere failure to reveal, with nothing to show any peculiar duty to speak. The characterization of the concealment as false and fraudulent of course adds nothing in the absence of further allegations of fact. ***

1174

If this defendant is liable on this declaration every seller in liable who fails to disclose any nonapparent defect known to him in the subject of the sale which materially reduces its value and which the buyer fails to discover. Similarly it would seem that every buyer would be liable who fails to disclose any nonapparent virtue known to him in the subject of the purchase which materially enhances its value and of which the seller is ignorant. [C] The law has not yet, we believe, reached the point of imposing upon the frailties of human nature a standard so idealistic as this. That the particular case here stated by the plaintiff possesses a certain appeal to the moral sense is scarcely to be denied. Probably the reason is to be found in the facts that the infestation of buildings by termites has not been common in Massachusetts and constitutes a concealed risk against which buyers are off their guard. But the law cannot provide special rules for termites and can hardly attempt to determine liability according to the varying probabilities of the existence and discovery of different possible defects in the subjects of trade. The rule of nonliability for bare nondisclosure has been stated and followed by this court. ***It is adopted in the American Law Institute's Restatement of Torts § 551.

The order sustaining the demurrer is affirmed, and judgment is to be entered for the defendant. ***

So ordered.

NOTES AND QUESTIONS

1. The classic statement of the effect of nondisclosure is that of Lord Cairns in Peek v. Gurney, (1873) 6 L.R.E. & I. App. 377 (HL) 403 (Lord Cairns) (Eng.) "Mere non-disclosure of material facts, however morally censurable, however that nondisclosure might be a ground in a proper proceeding at a proper time for setting aside an allotment or a purchase of shares, would in my opinion form no ground for an action in the nature of an action for misrepresentation. There must, in my opinion, be some active misstatement of fact, or, at all events, such a partial and fragmentary statement of fact, as that the withholding of that which is not stated makes that which is stated absolutely false." The leading case espousing the view is Keates v. Earl of Cardogan, (1851) 138 Eng. Rep. 234 (C.P.); 10 C.B. 591 (Eng.)

2. What is the foundation of the "general rule" that an action of deceit will not lie for tacit nondisclosure, as distinguished from active misrepresentation?

3. Three different rules modifying the harshness of the common law position developed quite early:

A. The courts assumed a much more liberal attitude when the plaintiff sought rescission of the contract, or other equitable relief. Even mutual mistake as to a basic fact affecting the transaction is ordinarily held to be sufficient grounds for such relief; and the position of the defendant is not improved if he has knowledge of the plaintiffs mistake, failed to make

disclosure, and took advantage of the situation. Weintraub v. Krobatsch, 317 A.2d 68 (N.J. 1974) (discussing modern trend away from Peek v. Gurney in suits in equity).

B. Even in actions at law, the defendant was held liable for nondisclosure if the parties were in some confidential or fiduciary relation to one another, so that reliance upon good faith and full disclosure was justified. McDonough v. Williams, 92 S.W. 783 (Ark. 1905); Brasher v. First Nat'l. Bank of Birmingham, 168 So. 42 (Ala. 1936). "For instance, the relations of trustee and cestui que trust, principal and agent, attorney and client, physician and patient, priest and parishioner, partners, tenants in common, husband and wife, parent and child, guardian and ward, and many others of like character." Farmers' State Bank of Newport v. Lamon, 231 P. 952 (Wash. 1925). As to banker and customer, see Buxcel v. First Fidelity Bank, 601 N.W.2d 593 (S.D. 1999). The duty stems from the original case of Nocton v. Ashburton, [1914] A.C. 932 (HL, Eng.). See also Partlett, Professional Negligence, (1985) 119-126 (discussing the fiduciary obligations requiring information disclosure).

C. In addition, certain types of contracts, such as those of suretyship and guaranty, joint adventure, or insurance, were recognized as in themselves creating or involving something of a confidential relation, and hence as requiring the utmost good faith, and full and fair disclosure of all material facts.

4. An active concealment may constitute an act sufficient to base liability. The leading American case is Croyle v. Moses, 90 Pa. 250 (1879), where defendant, selling a horse to plaintiff, hitched him up

short for the purpose of concealing the fact that the horse was a cribber and a windsucker.

5. Are words necessary to a misrepresentation? In Kuelling v. Roderick Lean Mfg. Co., 75 N.E. 1098 (N.Y. 1905), defendant sold a road roller with its defects concealed with putty and paint. To demonstrate that fraud actions have remained remarkably stable, see Reichelt v. Urban Inv. & Dev. Co., 577 F. Supp. 971 (N.D. Ill. 1984) (seller of home covered up cracks in home with fiberglass and paint).

6. Defendant, selling plaintiff sheets of aluminum, placed good undamaged sheets on top of bundles of sheets that were corroded or otherwise damaged. The bundles were bulky and heavy, and plaintiff did not take them apart. Is this deceit? Salzman v. Maldaver, 24 N.W.2d 161 (Mich. 1946).

7. Suppose the defendant, in possession of the facts, denies all knowledge in response to plaintiffs inquiry, and thereby discourages him from investigating further? Smith v. Beatty, 40 Am. Dec. 435 (N.C. 1843).

Griffith v. Byers Constr. Co. of Kansas, Inc.

Supreme Court of Kansas, 1973.

212 Kan. 65, 510 P.2d 198.

FROMME, JUSTICE. The purchasers of new homes in Woodlawn East Addition, City of Wichita, Kansas, brought separate actions for damages

because of the saline condition of the soil of their homesites. These actions were filed on alternative theories, (1) breach of an implied warranty of fitness and (2) fraud in the concealment of a material matter. The actions were brought against the developer. This appeal is from an order granting summary judgments in favor of the developer, Byers Construction Co. of Kansas, Inc. (Byers).

The petitions allege that Byers developed and advertised the addition as a choice residential area. Prior to the time of development the addition was part of an abandoned oil field which contained salt water disposal areas which Byers knew or should have known would not sustain vegetation because of the saline content of the soil. It was alleged that Byers graded and developed the whole addition for homesites in such a manner that it became impossible for a purchaser to discover the presence of these salt areas. It further appears from allegations in the petitions and testimony in depositions that each of the plaintiffs selected a homesite which was located within a salt water disposal area. After houses were constructed attempts to landscape the homesites failed. Grass, shrubs and trees were planted and died because of the saline content of the soil. ***No inquiry was made and no assurance was given by Byers on soil fertility.

The facts of this case appear to be unique for, although many cases can be found on a vendor-builder's liability for the sale of a defective home no cases are cited and we find none which discuss a developer's liability for defects arising from sterility of soil. The saline content of the soil of these homesites does not affect the structural

qualities of the homes. The allegations of the petitions and deposition testimony indicate that landscaping is either impossible or highly expensive.

A real estate developer by subdividing and offering lots for sale as choice residential homesites does not by implication warrant the fertility of the soil of said lots. Liability on an implied warranty of soil fertility cannot reasonably be imposed upon the real estate developer in this case. ***

Our next inquiry is directed to the claims based on fraud. The trial court held as a matter of law no claims for fraud could be maintained because of lack of privity between the developer and these appellants. The residential lots were sold to the builders who in turn constructed the houses and then deeded the improved lots to the appellants. ***

The allegations of fraud appear to be viable issues for trial if nondisclosure of a known material defect in the lots constitutes actionable fraud as to the appellants.

This court has held that the purchaser may recover on the theory of fraud from a vendor-builder for nondisclosure of defects. In Jenkins v. McCormick, 184 Kan. 842, 339 P.2d 8, it is stated:

"Where a vendor has knowledge of a defect in property which is not within the fair and reasonable reach of the vendee and which he could

1177

not discover by the exercise of reasonable diligence, the silence and failure of the vendor to disclose the defect in the property constitutes

actionable fraudulent concealment." ***

This Jenkins rule approximates that stated in Restatement (Second) of Torts, § 551:

"(1) One who fails to disclose to another a thing that he knows may justifiably induce the other to act or refrain from acting in a business transaction is subject to the same liability to the other as though he had represented the nonexistence of the matter that he has failed to disclose, if, but only if, he is under a duty to the other to exercise reasonable care to disclose the matter in question.

"(2) One party to a business transaction is under a duty to disclose to the other before the transaction is consummated. ***

"(e) Facts basic to the transaction, if he knows that the other is about to enter into it under a mistake as to them, and that the other, because of the relationship between them, the customs in the trade or other objective circumstances, would reasonably expect a disclosure of those facts."

***We see no reason why the rule in Jenkins should not be extended in the present case to a developer of residential lots.

The appellee Byers next contends, without agency, there can be no privity and without privity there can be no duty to disclose. Here, of course, appellants never dealt with the appellee, Byers. The duty to disclose the saline nature of the soil must extend to appellants if their fraud claims are to be upheld. However, the doctrine of privity provides no defense to appellee Byers if appellants were within a class of persons appellee intended to reach. ***

Under the alleged facts of our present case, accepting the same in the light most favorable to the appellants, we must assume the appellee, Byers, had knowledge of the saline content of the soil of the lots it placed on the market. After the grading and development of the area this material defect in the lots was not within the fair and reasonable reach of the vendees, as they could not discover this latent defect by the exercise of reasonable care. The silence of the appellee, Byers, and its failure to disclose this defect in the soil condition to the purchasers could constitute actionable fraudulent concealment under the rule in Jenkins v. McCormick, supra. One who makes a fraudulent misrepresentation or concealment is subject to liability for pecuniary loss to the persons or class of persons whom he intends or has reason to expect to act or to refrain from action in reliance upon the misrepresentation or concealment.

Of course, the fraudulent concealment to be actionable has to be material to the transaction. A matter is material if it is one to which a reasonable man would attach importance in determining his choice of action in the transaction in question. (Restatement (Second) of Torts,

1178

§ 538.) There is little doubt in this case a prospective purchaser of a residential building site would consider the soil condition a material factor in choosing a lot on which to build his home. It materially affected the value and acceptability of the homesite.

As to privity we do not believe it is important to categorize its existence under a particular legal theory. Suffice it to say the appellants were in that class of persons desiring building lots in a

choice residential area whom appellee intended and had reason to expect would purchase and build their homes. The fact that title was first taken in the names of the builders did not change the identity of those who would be ultimately affected by any fraudulent misrepresentations or nondisclosure of material defects in the lots. The building contractors were acting on behalf of their respective purchasers as a conduit or temporary way station for the legal title which, it was understood, would pass on completion of the homes to the appellants. There is no lack of privity in this case which would prevent causes of action based on fraud, and, in this, the district court erred in entering summary judgments for the appellee, Byers.
***

The order of the district court entering summary judgment in favor of the appellee is affirmed as to those claims based on implied warranty but reversed as to the alternative claims based on fraud, and these cases are remanded with instructions to proceed in accordance with the views expressed herein.

NOTES AND QUESTIONS

1. The principal case was applied in Ensminger v. Terminix Int'n. Co., 102 F.3d 1571 (10th Cir. 1996) (applying Kansas law), where the buyers of a home, found to be infested with termites, brought an action in fraudulent misrepresentation against the termite company that, at the request of the seller, had inspected the house prior to its sale. The court stressed the unequal access to information in the hands of a specialist on whom reliance is rested.

2. The duty to disclose material information is much debated and replete with contradictory law. The information may be possessed

exclusively by the buyer or by the seller. Sellers knowing of a termite infestation are often obligated to disclose; buyers knowing of particularly valuable gold deposits on the properties are generally found not to owe duty to disclose that information to the seller. When is it that parties assume the risk that information will not be disclosed?

3. A person in the contemplation of the provider of the information who will act upon the information as given, although not directly given to that person, may have an action against the information provider in both fraudulent and negligent misrepresentation. Thus, the issuer of a letter of credit intended to be acted upon for a third party in a transaction may be liable for a fraudulent and negligent misrepresentation. See Banca del Sempione v. Provident Bank of Md, 75 F.3d 951 (4th Cir. 1996) (applying

Maryland law). The scope of liability is more narrowly circumscribed for fraudulent misrepresentation because of the intentional core of the tort. Thus, in the classic case of Peek v. Gurney, (1873) 6 L.R.E. & I. App. 377 (HL) 403 (Lord Cairns) (Eng.), corporate directors prepared a prospectus to induce the public to buy stock in the company. It was held that no liability would attach to persons who bought the stock from a stockholder. Under the Restatement (Second) of Torts § 531 (1977), a person who makes a misrepresentation is liable to the person or class of persons the maker intends, or "has reason to expect" will act in reliance upon the misrepresentation. Foreseeability alone is not sufficient; the tortfeasor must have information that would at least lead a

reasonable person to conclude that there is an "especial" likelihood that it would influence persons in plaintiffs position. See Ernst & Young, L.L.P. v. Pac. Mutual Life Ins. Co., 51 S.W.3d 573 (Tex. 2001). With the more expansive definition of intent in the modern law, the courts, as in Banca del Sempione, have extended the range of persons able to recover in fraudulent misrepresentation. Note Cardozo's recognition of the limits of liability in Ultramares, infra page 1208.

3. Basis of Liability

(A) To the Recipient

Derry v. Peek

House of Lords, 1889.

14 App. Cas. 337.

[This action on the case was brought by Sir Henry William Peek against William Derry, chairman, and four directors of the Plymouth, Devonport and District Tramways Company, for the fraudulent misrepresentations of the defendant; whereby the plaintiff was induced to take shares in the company.

By Section 34 of the Tramways Act, 1870, which section was incorporated in the special Act, "all carriages used on any tramway shall be moved by the power prescribed by the special Act, and where no such power is prescribed, by animal power only."

Under Section 35 of the same Act, the vehicles used on the tramways might be moved by steam or mechanical power, with the consent of the Board of Trade, for fixed periods and subject to the

regulations of the Board. In February, 1883, the defendants as directors of the company issued a prospectus.

The heading, which was in large type, was as follows: "Incorporated by special Act of Parliament authorizing the use of steam or mechanical motive power." It also contained the following paragraph: "One great feature of this undertaking to which considerable importance should be attached, is, that by the special Act of Parliament obtained the company has the right to use steam or mechanical motive power, instead of horses, and it is fully expected that by means of this a considerable saving will

1180

result in the working expenses of the line as compared with other tramways worked by horses," and there were other paragraphs further setting forth the advantages to be derived from steam as compared with horse power.

Soon after the issuing of the prospectus, a copy of which the plaintiff received, he applied for and was allotted shares in the company relying, as he alleged, upon the representations of this paragraph, believing the company had an absolute right to use steam and other mechanical power.

The company proceeded to construct its tramways, but the Board of Trade refused to consent to the use of steam or mechanical power except on certain portions of the tramway, and the corporations of Devonport refused their consent to the company opening the completed part of their lines until the remainder was ready for use. In consequence the company was wound up, and immediately thereafter the plaintiff brought this action against the defendants.

At the trial the defendants all testified that they knew that consent of the Board of Trade was required for the use of steam, but that they either thought that it had been obtained, or assumed that it was assured as a matter of course once the company had been incorporated by Act of Parliament with power to use steam.

STIRLING, Justice, dismissed the action, having come to the conclusion that the directors all believed that the company had the rights stated in the prospectus and that their belief was not unreasonable, nor was their conduct so reckless or careless that they ought to be held liable in an action of deceit.

On appeal the judgment of Stirling, J., was reversed on the ground that while the defendants honestly believed that the statements in the prospectus were true, the statements were made without any reasonable grounds for believing them. The defendants appealed to the House of Lords. The House of Lords unanimously reversed the decisions of the Court below and unanimously restored the opinion of Stirling, J.]

LORD HERSCHELL. ***"This action is one which is commonly called an action of deceit, a mere common-law action." This is the description of it given by Cotton, L.J., in delivering judgment. I think it important that it should be borne in mind that such an action differs essentially from one brought to obtain rescission of a contract on the ground of misrepresentation of a material fact. The principles which govern the two actions differ widely. Where rescission is claimed it is only necessary to prove that there was misrepresentation; then, however honestly it may have been made, however free from blame the person who made it, the contract, having been obtained by

misrepresentation, cannot stand. In an action of deceit, on the contrary, it is not enough to establish misrepresentation alone; it is conceded on all hands that something more must be proved to cast liability upon the defendant, though it has been a matter of controversy what additional elements are requisite. I lay stress

1181

upon this because observations made by learned judges in actions for rescission have been cited and much relied upon at the bar by counsel for the respondent. Care must obviously be observed in applying the language used in relation to such actions to an action of deceit. ***

I think the authorities establish the following propositions: First, in order to sustain an action of deceit there must be proof of fraud, and nothing short of that will suffice. Secondly, fraud is proved when it is shown that a false representation has been made (1) knowingly, or (2) without belief in its truth, or (3) recklessly, careless whether it be true or false. Although I have treated the second and third as distinct cases, I think the third is but an instance of the second, for one who makes a statement under such circumstances can have no real belief in the truth of what he states. To prevent a false statement being fraudulent there must, I think, always be an honest belief in its truth. And this probably covers the whole ground, for one who knowingly alleges that which is false has obviously no such honest belief. Thirdly, if fraud be proved, the motive of the person guilty of it is immaterial. It matters not that there was no intention to cheat or injure the person to whom the statement was made. ***

In my opinion making a false statement through want of care falls far short of, and is a very different thing from, fraud, and the same may be said of a false representation honestly believed though on insufficient grounds. ***

At the same time I desire to say distinctly that when a false statement has been made the questions whether there were reasonable grounds for believing it, and what were the means of knowledge in the possession of the person making it, are most weighty matters for consideration. The ground upon which an alleged belief was founded is a most important test of its reality. I can conceive of many cases where the fact that an alleged belief was destitute of all reasonable foundation would suffice of itself to convince the Court that it was not really entertained, and that the representation was a fraudulent one. So, too, although means of knowledge are ***a very different thing from knowledge, if I thought that a person making a false statement had shut his eyes to the facts, or purposely abstained from inquiring into them I should hold that honest belief was absent, and that he was just as fraudulent as if he had knowingly stated that which was false. ***

I quite admit that the statements of witnesses as to their belief are by no means to be accepted blindfolded. The probabilities must be considered. Whenever it is necessary to arrive at a conclusion as to the state of mind of another person, and to determine whether his belief under given circumstances was such as he alleges, we can only do so by applying the standard of conduct which our own experience of the ways of men has enabled us to form; by asking ourselves whether a reasonable man situated as the defendants were, with their knowledge and means

of knowledge, might well believe what they state they did believe, and consider that the representations made were substantially true. ***

I think the judgment of the Court of Appeals should be reversed. ***

Order of the Court of Appeal reversed; order of STIRLING, J., restored.

NOTES AND QUESTIONS

1. Lord Bramwell in his speech approved the remark of Stirling J. in the lower court: "[M]ercantile men dealing with matters of business would be the first to cry out if I extended the notion of deceit into what is honestly done * * Liability was confined to deceit (fraud), breach of contract, and breach of fiduciary obligation. It was not until 1964 that the House of Lords in Hedley Byrne & Co. v. Heller & Partners Ltd., [1964] A.C. 465 (HL) (Eng.) extended liability to the situation where a person relied upon information negligently supplied by another in a "special relationship."

2. The principal case has influenced American courts. See Lambert v. Smith, 201 A.2d 491 (Md. 1964). In many of these states, however, a negligence action will lie for the pecuniary loss. See Int'l Prod. Co. v. Erie R.R. Co., infra page 1183.

3. The unreasonableness of the defendant's belief may be strong evidence that it does not in fact exist, and that conclusion may be reached as an inference of fact. For example, Kimber v. Young, 137 Fed. 744 (8th Cir. 1905); Palmacci v. Umpierrez, 121 F.3d 781 (1st Cir. 1997) (applying bankruptcy law).

4. It is generally agreed that a bad motive, as distinguished from an intent to mislead, is not essential to the tort of deceit. The defendant is liable if he intended to deceive, notwithstanding the fact that he meant no harm, was disinterested or intended to do the plaintiff a kindness. Polhill v. Walter, (1832) 110 Eng. Rep. 43 (KB); 3 B & Ad. 114 (Eng.) Nielsen v. Adams, 388 N.W.2d 840 (Neb. 1986). The presence or absence of bad motive may, however, affect the issue of punitive damages for deceit. Thompson v. Modern Sch. of Bus. & Correspondence, 190 P. 451 (Cal. 1920); Laughlin v. Hopkinson, 126 N.E. 591 (Ill. 1920).

5. Section 526 of the Restatement (Second) of Torts (1977) reads as follows:

A misrepresentation is fraudulent if the maker

(a) knows or believes that the matter is not as he represents it to be,

(b) does not have the confidence in the accuracy of his representation that he states or implies, or

(c) knows that he does not have the basis for his representation that he states or implies.

Section 10: Scienter, of Restatement (Third) of Torts: Liability for Economic Harm (2020), follows this except that the requirement in (b) explicitly requires knowledge of lack of confidence.

1183

How does this fit with the definition of Lord Herschell in Derry v. Peek?

6. Suppose the plaintiff knows that the matter represented is one upon which the defendant could not have any definite knowledge? Thus a representation that there is water under land, and it will be found when a well is drilled. Harris v. Delco Prod., Inc., 25 N.E.2d 740 (Mass. 1940) (finding that at most it is a strong expression of opinion).

7. Suppose the defendant makes a statement that can reasonably be understood in two ways, one true and the other false. Plaintiff understands it in the false sense, and is misled, but defendant believes that plaintiff has understood in the true one. Will an action for deceit lie? Nash v. Minn. Title Ins. & Trust Co., 40 N.E. 1039 (Mass. 1895). A statement made by seller that the land was a certain acreage when he took no steps to verify it was justifiably relied on by buyer. The statement implied his secure knowledge when that was not the case. Seller liable. Cabot v. Christie, 42 Vt. 121 (1869).

8. Sometimes paragraph c of § 526 above is dubbed "recklessness." Here the speaker must act in "conscious disregard" of the risk that the statement is false. Whereas courts generally will not reward punitive damages for representations that are made recklessly, statements made with willful blindness as to whether a statement is false will sometimes constitute sufficient knowledge to warrant punitive damages. Hoffman v. Stamper, 385 Md. 1, 867 A.2d 276 (2005).

International Products Co. v. Erie R.R. Co.

Court of Appeals of New York, 1927.

244 N.Y. 331, 155 N.E. 662.

[Plaintiff, an importer, was expecting a valuable consignment of goods to arrive on the steamer Plutarch, and had made arrangements with defendants to receive and store the goods until they could be reshipped. The shipment was covered by insurance until it reached the warehouse, and plaintiff desired to insure it after that time. Giving this reason for its question, it inquired of defendant where the goods would be stored. Defendant, taking time to obtain the information, replied that the goods were docked at Dock F, Weehawken. From this reply, plaintiff reasonably inferred that the goods were already received and stored, and obtained its insurance on this basis. The goods arrived later and were stored at Dock D. They were destroyed by fire, and plaintiff was unable to collect any insurance payments because of the misdescription. Plaintiff seeks to recover from defendant the sum it would have received if defendant's statement had been correct. The trial court directed a verdict for plaintiff, which was affirmed by the Appellate Division. Defendant appeals.]

ANDREWS, J. ***Confining ourselves to the issues before us, we eliminate any theory of fraud or deceit. ***[C] We come to the vexed question of liability for negligent language. In England the rule is fixed. "Generally speaking there is no such thing as liability for negligence in words as distinguished from act." Pollock on Torts (12th Ed.) p. 565; [c].

1184

Dicta to the contrary may be found in earlier cases. ***But since Derry v. Peek, L.R. 14 App.Cas. 337, although what was said was

not necessary to the decision, the law is clearly to the effect "that no cause of action is maintainable for a mere statement, although untrue, and although acted upon to the damage of the person to whom the statement is made unless the statement be false to the knowledge of the person making it," [c] or, as said elsewhere, "we have to take it as settled that there is no general duty to use any care whatever in making statements in the way of business or otherwise, on which other persons are likely to act" [c], ***

These cases have not been without criticism. The denial, under all circumstances, of relief because of the negligently spoken or written word, is, it is said, a refusal to enforce what conscience, fair dealing, and the usages of business require. The tendency of the American courts has been towards a more liberal conclusion. The searcher of a title employed by one who delivers his abstract to another to induce action on the faith of it must exercise care. [C] So must a physician who assures a wife that she may safely treat the infected wound of her husband [c], or hired by another, examines a patient, and states the result of his diagnosis [c]. So of a telegraph company stating that a telegram was delivered when in fact it was not. [C] And the liability of such a company to the receiver for the erroneous transcription of a telegram has also sometimes been placed on this ground. [C]

In New York we are already committed to the American as distinguished from the English rule. In some cases a negligent statement may be the basis for a recovery of damages. ***[In] Glanzer v. Shepard, 233 N.Y. 236, 135 N.E. 275, [a] public weigher, hired by the seller to weigh goods, realizing that the buyer would rely

on his certificate in paying therefor, was held liable for erroneous statements contained therein. ***

The negligence was inferred from the issuance of a false certificate. That was the wrong for which a recovery was allowed. "Diligence was owing, not only to him who ordered, but to him also who relied."

Obviously, however, the rule we have adopted has its limits. Not every casual response, not every idle word, however damaging the result, gives rise to a cause of action. ***Liability in such cases arises only where there is a duty, if one speaks at all, to give the correct information. And that involves many considerations. There must be knowledge, or its equivalent, that the information is desired for a serious purpose; that he to whom it is given intends to rely and act upon it; that, if false or erroneous, he will because of it be injured in person or property. Finally, the relationship of the parties, arising out of contract or otherwise, must be such that in morals and good conscience the one has the right to rely upon the other for information, and the other giving the information owes a duty to give it with care. [C] An inquiry made of a stranger is one thing; of a person with whom the inquirer has entered, or is about to enter into a contract concerning the goods which are, or are to be, its subject, is another.

1185

Even here the inquiry must be made as the basis of independent action. We do not touch the doctrine of caveat emptor. But in a proper case we hold that words negligently spoken may justify the recovery of the proximate damages caused by faith in their accuracy.

When such a relationship as we have referred to exists may not be precisely defined. All that may be stated is the general rule. In view of the complexity of modern business, each case must be decided on the peculiar facts presented. The same thing is true, however, in the usual action for personal injuries. There whether negligence exists depends upon the relations of the parties, the thing done or neglected, its natural consequences, and many other considerations. No hard and fast line may be drawn.

Here, as we view the facts, the duty to speak with care, if it spoke at all, rested on the defendant. We have [defendant] about to become the bailee of the plaintiffs goods; the inquiry made by [plaintiff] with whom [defendant] was dealing for the purpose as it knew of obtaining insurance; the realization that the information it gave was to be relied upon, and that, if false, the insurance obtained would be worthless. We have an inquiry such as might be expected in the usual course of business made of one who alone knew the truth. We have a negligent answer, untrue in fact, actual reliance upon it, and resulting proximate loss. True, the answer was not given to serve the purposes of the defendant itself. This we regard as immaterial.

If there was negligence justifying a recovery, we cannot hold the plaintiff guilty of contributory negligence as a matter of law. Whether or not it should have discovered the error by an inspection of the bill of lading when it received it was a question of fact. ***

The judgment appealed from should be affirmed, with costs.

NOTES AND QUESTIONS

1. A few of the American courts have held that the action for deceit itself will lie for negligent misrepresentations resulting in pecuniary

loss. They have either declared outright that the fault of a negligent defendant is equivalent to that of a defendant intending to deceive, or have resorted to the obvious fiction that a duty to learn the facts is the equivalent of knowledge of their existence. See, for example, Mullen v. E. Trust & Banking Co., 81 A. 948 (Me. 1911); Schoefield Gear & Pulley Co. v. Schoefield, 40 A. 1046 (Conn. 1898).

2. As to the dictum in the principal case that "not every casual response, not every idle word ***gives rise to a cause of action," see Renn v. Provident Trust Co., 196 A. 8 (Pa. 1938) (gratuitous supplying of copy of will, wrong will supplied by mistake); Vartan Garapedian, Inc. v. Anderson, 31 A.2d 371 (N.H. 1943) (casual statement about credit of prospective buyer). Is an attorney or a physician liable to one who is not his client or his patient for "curbstone advice," when it is negligently given? Fish v. Kelly, (1864) 144 Eng. Rep. 78 (Exch.); 17 C.B. (N.S.) 194 (Eng.); Buttersworth v. Swint, 186

1186

S.E. 770 (Ga. App. Ct. 1936); DiMarco v. Lynch Homes, 583 A.2d 422 (Pa. 1990) (liability of physician for negligent advice given to sexual partner of plaintiff) but cf. D'Amico v. Delliquadri, 683 N.E.2d 814 (Ohio Ct. App. 1996) (holding that plaintiff contracting genital warts from boyfriend could not sue boyfriend's physician for negligent advice regarding the communicability of the disease).

3. What if the information, although not volunteered and given without consideration, is supplied in the course of the defendant's business or professional relations? For example, the lessor of a truck gratuitously tells the lessee, in good faith but negligently, that it is

covered by insurance? Manock v. Amos D. Bridge's Sons, Inc., 169 A. 881 (N.H. 1934). Cf. Va. Dare Stores v. Schuman, 1 A.2d 897 (Md. 1938) (owner to invitee). The duty may attach to the provider of information who, although not in the business of supplying information, had a pecuniary interest in the transaction contemplated by the parties. See Hawaii v. United States Steel Corporation, 919 P.2d 294 (Haw. 1996). But cf. Fry v. Mount, 554 N.W.2d 263 (Iowa 1996) (duty limited to those in the business of supplying information). Even where a statutory duty of accuracy in business dealings exists, courts may still decline to find a corresponding duty in tort. See Cameron v. Harshbarger, 998 P.2d 221 (Or. 2000). Note that if a duty has been breached, plaintiff must still prove that, given competent advice, on the balance of probabilities, he would have secured effective insurance to cover the loss. Norwest Refrigeration Servs. Pty. Ltd v. Bain Dawes (WA) Pty. Ltd (1984) 157 CLR 149 (Austl.).

4. Representations of fact made in precontractual negotiations may be actionable. Weisman v. Connors, 540 A.2d 783 (Md. 1988) (representations about employment prospects). But cf. Onita Pac. Corp. v. Tr. of Bronson, 843 P.2d 890 (Or. 1992) (duty dependent upon professional relationship and could not be generated in arms-length, pre-contractual negotiations), and Sagent Tech., Inc. v. Micros Sys., Inc., 276 F. Supp. 2d. 464 (D. Md. 2003) (applying Maryland law; requiring contractual privity for a misrepresentation claim).

Winter v. G.P. Putnam's Sons

United States Court of Appeals, Ninth Circuit, 1991.

938 F.2d 1033.

Before SNEED, TANG and THOMPSON, CIRCUIT JUDGES.

Sneed, Circuit Judge: ***

I.

FACTS AND PROCEEDINGS BELOW

The Encyclopedia of Mushrooms is a reference guide containing information on the habitat, collection, and cooking of mushrooms. It was written by two British authors and originally published by a British publishing company. Defendant Putnam, an American book publisher, purchased copies of the book from the British publisher and distributed

1187

the finished product in the United States. Putnam neither wrote nor edited the book.

Plaintiffs purchased the book to help them collect and eat wild mushrooms. In 1988, plaintiffs went mushroom hunting and relied on the descriptions in the book in determining which mushrooms were safe to eat. After cooking and eating their harvest, plaintiffs became critically ill. Both have required liver transplants.

Plaintiffs allege that the book contained erroneous and misleading information concerning the identification of the most deadly species of mushrooms. In their suit against the book publisher, plaintiffs allege liability based on products liability, breach of warranty, negligence, negligent misrepresentation, and false representations. Defendant moved for summary judgment asserting that plaintiffs' claims failed as a matter of law because 1) the information contained in a book is not a product for the purposes of strict liability under

products liability law; and 2) defendant is not liable under any remaining theories because a publisher does not have a duty to investigate the accuracy of the text it publishes. The district court granted summary judgment for the defendant. Plaintiffs appeal. We affirm.

II.

DISCUSSION

A book containing Shakespeare's sonnets consists of two parts, the material and print therein, and the ideas and expression thereof. The first may be a product, but the second is not. The latter, were Shakespeare alive, would be governed by copyright laws; the laws of libel, to the extent consistent with the First Amendment; and the laws of misrepresentation, negligent misrepresentation, negligence, and mistake. These doctrines applicable to the second part are aimed at the delicate issues that arise with respect to intangibles such as ideas and expression. Products liability law is geared to the tangible world.

A. Products Liability

The language of products liability law reflects its focus on tangible items. In describing the scope of products liability law, the Restatement (Second) of Torts lists examples of items that are covered. All of these are tangible items, such as tires, automobiles, and insecticides. The American Law Institute clearly was concerned with including all physical items but gave no indication that the doctrine should be expanded beyond that area.

The purposes served by products liability law also are focused on the tangible world and do not take into consideration the unique characteristics of ideas and expression. ***

Although there is always some appeal to the involuntary spreading of costs of injuries in any area, the costs in any comprehensive cost/benefit analysis would be quite different were strict liability concepts

1188

applied to words and ideas. We place a high priority on the unfettered exchange of ideas. We accept the risk that words and ideas have wings we cannot clip and which carry them we know not where. The threat of liability without fault (financial responsibility for our words and ideas in the absence of fault or a special undertaking or responsibility) could seriously inhibit those who wish to share thoughts and theories. As a New York court commented, with the specter of strict liability, "[w]ould any author wish to be exposed ***for writing on a topic which might result in physical injury? e.g. How to cut trees; How to keep bees?" Walter v. Bauer, 109 Misc.2d 189, 191, 439 N.Y.S.2d 821, 823 (Sup.Ct 1989) (student injured doing science project described in textbook; court held that the book was not a product for purposes of products liability law), aff'd in part & rev'd in part on other grounds, 88 A.D.2d 787, 451 N.Y.S.2d 533 (1982). One might add: "Would anyone undertake to guide by ideas expressed in words either a discrete group, a nation, or humanity in general?"

Strict liability principles even when applied to products are not without their costs. Innovation may be inhibited. We tolerate these

losses. They are much less disturbing than the prospect that we might be deprived of the latest ideas and theories.

***

Plaintiffs ***assert that The Encyclopedia of Mushrooms should be analogized to aeronautical charts. Several jurisdictions have held that charts which graphically depict geographic features or instrument approach information for airplanes are "products" for the purpose of products liability law. See Brocklesby v. United States, 767 F.2d 1288, 1294-95 (9th Cir.1985) (applying Restatement for the purpose of California law), cert, denied, 474 U.S. 1101, 106 S.Ct. 882, 88 L.Ed.2d 918 (1986); Saloomey v. Jeppesen & Co., 707 F.2d 671, 676-77 (2d Cir.1983) (applying Restatement for the purpose of Colorado Law). Plaintiffs suggest that The Encyclopedia of Mushrooms can be compared to aeronautical charts because both items contain representations of natural features and both are intended to be used while engaging in a hazardous activity. We are not persuaded.

Aeronautical charts are highly technical tools. They are graphic depictions of technical, mechanical data. The best analogy to an aeronautical chart is a compass. Both may be used to guide an individual who is engaged in an activity requiring certain knowledge of natural features. Computer software that fails to yield the result for which it was designed may be another. In contrast, The Encyclopedia of Mushrooms is like a book on how to use a compass or an aeronautical chart. The chart itself is like a physical "product" while the "How to Use" book is pure thought and expression.

Given these considerations, we decline to expand products liability law to embrace the ideas and expression in a book. We know of no court that has chosen the path to which the plaintiffs point.

B. The Remaining Theories

As discussed above, plaintiffs must look to the doctrines of copyright, libel, misrepresentation, negligent misrepresentation, negligence, and mistake to form the basis of a claim against the defendant publisher. Unless it is assumed that the publisher is a guarantor of the accuracy of an author's statements of fact, plaintiffs have made no case under any of these theories other than possibly negligence. Guided by the First Amendment and the values embodied therein, we decline to extend liability under this theory to the ideas and expression contained in a book.

***The plaintiffs urge this court that the publisher had a duty to investigate the accuracy of The Encyclopedia of Mushrooms' contents. We conclude that the defendants have no duty to investigate the accuracy of the contents of the books it publishes. A publisher may of course assume such a burden, but there is nothing inherent in the role of publisher or the surrounding legal doctrines to suggest that such a duty should be imposed on publishers. Indeed the cases uniformly refuse to impose such a duty. Were we tempted to create this duty, the gentle tug of the First Amendment and the values embodied therein would remind us of the social costs.

Finally, plaintiffs ask us to find that a publisher should be required to give a warning 1) that the information in the book is not complete and that the consumer may not fully rely on it or 2) that this publisher has not investigated the text and cannot guarantee its accuracy. With

respect to the first, a publisher would not know what warnings, if any, were required without engaging in a detailed analysis of the factual contents of the book. This would force the publisher to do exactly what we have said he has no duty to do--that is, independently investigate the accuracy of the text. We will not introduce a duty we have just rejected by renaming it a "mere" warning label. With respect to the second, such a warning is unnecessary given that no publisher has a duty as a guarantor.

For the reasons outlined above, the decision of the district court is AFFIRMED.

NOTES AND QUESTIONS

1. Section 311 of the Restatement (Second) of Torts (1965) states:

1. One who negligently gives false information to another is subject to liability for physical harm caused by action by the other in reasonable reliance upon such information, where such harm results

(a) to the other, or

1190

(b) to such third persons as the actor should expect to be put in peril by the action taken.

2. Such negligence may consist of failure to exercise reasonable care

(a) in ascertaining the information, or

(b) in the manner in which it is communicated.

Comment b to section 311 provides that "[t]he rule... extends to any person who, in the course of an activity which is in furtherance of his

own interests, undertakes to give information to another, and knows or should realize that the safety of the person of others may depend upon the accuracy of the information."

2. See Chapter 15:1 above, for discussion of liability for misrepresentation in products liability. Restatement (Third) of Torts: Products Liability § 9 (1998) (liability for harm to person or property caused by misrepresentation of material fact).

3. Plaintiff fraudulently misrepresented the safety and lack of danger of white lead pigment. Plaintiff could not prove that it directly relied on the representation, but could prove that the representation led to the injury foreseeably caused to consumers of the white lead pigment. In City of New York v. Lead Indus. Ass., 241 A.D.2d 387 (N. Y. App. Div. 1997), the court found that reliance in cases of bodily injury, in contrast to economic loss, may be indirect.

4. Alm v. Van Nostrand Reinhold Co., 480 N.E.2d 1263 (Ill. App. Ct. 1985), finding no duty to insure the accuracy of instruction manual; plaintiff was injured when tool shattered while following manual's instructions. No duty was found in the following cases: Jones v. J.B. Lippincott, 694 F. Supp. 1216 (D. Md. 1988) (self-treatment of constipation following textbook); Smith v. Linn, 563 A.2d 123 (Pa. 1989) (plaintiffs decedent died of malnutrition following diet set forth in defendant's book); and Birmingham v. Fodor's Travel Publ'g, Inc., 833 P.2d 70 (Haw. 1992) (plaintiff sued Fodor's for failure to warn of surf conditions in a travel guide). In Birmingham, the publisher of the book did not author it, and had no duty to warn of the dangerous conditions at a beach described in the book.

5. The opinion in the principal case distinguished Weirum v. RKO Gen., Inc., 539 P.2d 36, 123 Cal. Rptr. 468 (Cal. 1975) (en banc) wherein defendant ran a promotional contest involving the location of a roving disc jockey. Plaintiffs decedent was killed in an accident caused by teenager speeding to meet the disc jockey. Court found liability. The principal case commented at footnote 8: "A publisher's role in bringing ideas and information to the public bears no resemblance to the Weirum scenario."

6. Other cases have distinguished Weirum where the communication, albeit not a misrepresentation or misstatement, has caused the plaintiff physical injury. Bill v. Sup. Ct. of San Francisco, 187 Cal. Rptr. 625 (Cal. Ct. App. 1982) (plaintiff shot by gang member after viewing movie "Boulevard Nights"); Yakubowicz v. Paramount Pictures, 536 N.E.2d 1067 (Mass. 1989) (sixteen-year-old boy knifed to death by another youth after viewing a violent

movie, "The Warriors"); Herceg v. Hustler Magazine, 814 F.2d 1017 (5th Cir. 1987), cert, denied. 485 U.S. 959 (1988) (fourteen-year-old boy died while engaged in "autoerotic asphyxiation" described in defendant magazine); Sanders v. Acclaim Entm't., Inc., 188 F. Supp.2d 1264 (D. Colo. 2002) (Klebold & Harris, both seventeen, were avid viewers of violent video games and movies; they entered Columbine High School and murdered fellow students and teachers; relatives of victims brought negligence and strict liability claims against producers and manufacturers of the games and videos); on similar facts, James v. Meow Media, Inc., 300 F.3d 683 (6th Cir. 2002). But cf. cases where Soldier of Fortune Magazine has been

sued for deaths and injuries resulting from advertisements for "Gun for Hire": Norwood v. Soldier of Fortune Magazine, 651 F. Supp. 1397 (W.D. Ark. 1987); Eimann v. Soldier of Fortune Magazine, 880 F.2d 830 (5th Cir. 1989), cert, denied, 493 U.S. 1024 (1990); Braun v. Soldier of Fortune Magazine, 968 F.2d 1110 (11th Cir. 1992), cert, denied, 506 U.S. 1071 (1993); Rice v. Paladin Enter. Inc., 128 F.3d 233 (4th Cir. 1997) (applying Maryland law) (liability for advice on how to commit a murder on the basis of aiding and abetting).

7. Plaintiff, a female high school student, was sexually molested by her teacher. The teacher had been employed by the school after the school board had received a detailed recommendation by the teacher's former employer. The report did not mention the teacher's sexual proclivities known to the former employer. In Randi W. v. Muroc Joint Unified Sch. Dist., 929 P.2d 582 (Cal. 1997), the court held that the "writer of a letter of recommendation owes third persons a duty not to misrepresent the facts in describing the qualifications and character of a former employee, if making the representations would present a substantial and foreseeable risk of physical injury to the third persons." Id. at 591. The half-truths amounted to misrepresentation. But cf. Richland Sch. Dist. v. Mabton Sch. Dist., 45 P.3d 580 (Wash. Ct. App. 2002) (no duty of employee to disclose information not present in recommendation letters).

8. In M.H. & J.L.H. v. Caritas Family Serv., 488 N.W.2d 282 (Minn. 1992), an adoption agency owed a duty of care to disclose information to adoptive parents about the incestuous parentage of a child. However, the courts have drawn back from imposing an affirmative duty to investigate. Meracle v. Children's Serv. Soc. of Wis., 437 N.W.2d 532 (Wis. 1989); Mallette v. Children's Friend &

Serv., 661 A.2d 67 (R.I. 1995) (holding agency liable for nondisclosure of genetic or medical information when information of this nature is volunteered; agency must act with reasonable care or refuse to disclose any information); Jackson v. State, 956 P.2d 35 (Mont. 1998) (recognizing a common law duty to disclose concurrent with a statutory obligation). An agency is liable for fraudulent misrepresentation. See Burr v. Board of Cnty. Comm'rs, 491 N.E.2d 1101 (Ohio 1986) (knowing misrepresentations as to the background and health risks of child who subsequently became disabled by Huntington's Disease). Some courts have limited liability to business relationships, see Hodge v. Craig. 382 S.W.3d 325 (Tenn. 2012).

1192

Hanberry v. Hearst Corp.

Court of Appeal of California, 1969.

276 Cal.App.2d 680, 81 Cal.Rptr. 519.

[Plaintiff-appellant purchased from defendant Akron a pair of shoes manufactured by defendant Handal. She alleges that the shoes were defective in being "slippery and unsafe" when used on vinyl floor coverings, and that "she stepped on the vinyl floor of her kitchen, slipped, fell and sustained several physical injuries."

She also sues defendant Hearst Corporation on the ground that it had negligently given a Good Housekeeping seal of approval to the shoes as "good ones." Hearst demurred to the causes against it, and the court granted judgment of dismissal to Hearst. Plaintiff appealed from this judgment.]

Ault, Associate Justice, Pro Tem. ***Appellant further alleges respondent Hearst publishes a monthly magazine known as Good Housekeeping in which products, including the shoes she purchased, were advertised as meeting the "Good Housekeeping's Consumers' Guaranty Seal." With respect to this seal the magazine states: "This is Good Housekeeping's Consumers' Guaranty" and "We satisfy ourselves that products advertised in Good Housekeeping are good ones and that the advertising claims made for them in our magazine are truthful." The seal itself contained the promise, "If the product or performance is defective, Good Housekeeping guarantees replacement or refund to the consumer." ***

In the second and eighth causes of action, appellant seeks to recover on the theory of negligent misrepresentation. ***

The basic question presented on this appeal is whether one who endorses a product for his own economic gain, and for the purpose of encouraging and inducing the public to buy it, may be liable to a purchaser who, relying on the endorsement, buys the product and is injured because it is defective and not as represented in the endorsement. We conclude such liability may exist and a cause of action has been pleaded in the instant case. ***

In both the second and eighth causes of action of the complaint under consideration, appellant has alleged respondent extended it certification and permitted the use of its seal in connection with the shoes she purchased without test, inspection or examination of the shoes, or a sample thereof, or if it tested, inspected or examined, it did so in a careless and negligent manner which did not reveal their

dangerous and defective condition. If either of the alternative allegations is true, respondent violated its duty of care to the appellant and the issuance of its seal and certification with respect to the shoes under that circumstance would amount to a negligent misrepresentation.

Hearst urges its representation the shoes were "good ones" was a mere statement of opinion, not a statement of a material fact, and

1193

therefore not actionable. Since the very purpose of the seal and its certification the shoes were "good ones" was to induce and encourage members of the public to buy the shoes, respondent is in poor position to argue its endorsement cannot legally be considered as the inducing factor in bringing about their sale. [C] Respondent was not the seller or manufacturer of the shoes; it held itself out as a disinterested third party which had examined the shoes, found them satisfactory, and gave its endorsement. By the very procedure and method it used, respondent represented to the public it possessed superior knowledge and special information concerning the product it endorsed. Under such circumstance, respondent may be liable for negligent representations of either fact or opinion. [C]

Respondent argues no basis for liability has been shown because, "It is a matter of common knowledge that brand new soles on brand new shoes have a tendency of being slick and slippery until the shoes have been worn sufficiently long thereafter." The argument may well have merit [c], but it is one addressed properly to the trier of fact. The case is presented to us in the pleading context. We are

unwilling to hold as a matter of law that liability will not attach under any circumstance based upon a defectively designed shoe. ***

The judgment of dismissal is ***reversed as to the second and eighth causes of action (negligent misrepresentation).

Richard v. A. Waldman & Sons, Inc.

Supreme Court of Connecticut, 1967.

155 Conn. 343, 232 A.2d 307.

Cotter, Associate Justice. The plaintiffs, owners of a house and lot in Vernon which they purchased from the defendant corporation, instituted an action ***for damages for alleged false representations in connection with the sale of land. ***[Plaintiff obtained] a judgment for damages from which the defendant has appealed. ***

At the time of the closing, the defendant delivered to the plaintiffs a plot plan prepared by a registered engineer and land surveyor. This plan showed a sideyard of twenty feet on the southerly boundary of the lot which was in compliance with the minimum requirements for this lot according to the zoning regulations on file with the town clerk of Vernon. A permit had previously been granted for the construction of the building, consisting of a house with an attached garage, and the survey submitted at the time the defendant made the application indicated that the structure was to be located twenty feet more or less from the southerly property line. Subsequently, a certificate of occupancy was erroneously issued based on the survey submitted by the defendant. Approximately four months after the delivery of the deed to the plaintiffs, the defendant discovered, when it set pins

defining the boundaries of the premises, that the southeast corner of the foundation of the plaintiffs' house was only

1194

1.8 feet from the southerly boundary of the lot. At this time, it was found that trespass upon adjoining property occurred in entering and leaving the plaintiffs' back door and stoop. Prior to this discovery, the parties were unaware that there was a violation of the zoning regulations as to sideyard requirements. The defendant, under a mistaken assumption, had represented by the plot plan that the structure on the lot was twenty feet from the southerly boundary. Unaware of the true fact, the plaintiffs relied on this representation.

The court concluded (1) that the defendant falsely and recklessly represented to the plaintiffs, for the purpose of inducing action, that the premises had a southerly sideyard of twenty feet and that there was no violation of the zoning regulations, and (2) that the plaintiffs were induced to rely on these representations, which were the result of a mistake on the part of the defendant but were not innocent.

The defendant claims that "[a]t most, there was an innocent misrepresentation of fact by the defendant." An innocent misrepresentation may be actionable if the declarant has the means of knowing, ought to know, or has the duty of knowing the truth. [C]

The facts, as properly found, clearly show that the plaintiffs had reasonable grounds upon which to attribute to the defendant accurate knowledge of what it represented as to the location of the structure on the lot. This was a statement of fact about which the defendant as a developer of residential real estate, had special means of knowledge, and it was a matter peculiarly relating to its

business and one on which the plaintiffs were entitled to rely. [Cc] The defendant was commercially involved in and responsible for the preliminary and final plans for building and locating the structure which was then constructed on the lot by the defendant in a manner which violated the zoning ordinance. Thereafter, the defendant undertook to provide the plaintiffs with a survey and plot plan which erroneously showed a southerly sideyard of twenty feet. Actual knowledge of the falsity of the representation need not be shown under the circumstances, nor must the plaintiffs allege fraud or bad faith. They have alleged all the facts material to support their claim and demand for damages. It is immaterial whether the wrong which can be legally inferred from the facts arises in contract or in tort. The plaintiffs may seek damages resulting from the defendant's misrepresentation and at the same time retain title to the property. [C] Such a misrepresentation was "in the nature of a warranty" entitling them to a recovery under the contract "as for a breach of warranty." It would be unjust to permit the defendant under these circumstances to "retain the fruits of a bargain induced by" a material misrepresentation upon which the plaintiffs relied. ***

There was sufficient evidence which supported the court's finding that the plaintiffs were entitled to a recovery based on the rule that the measure of damages was the difference between the actual value of the property and the value of the property had it been as represented. ***

1195

[In Rich v. Rankl, 6 Conn.Cir. 185, 269 A.2d 84 (1969), the court says: "The relief granted in the Richard case was the cost of the

construction work and the moving of the house to relocate it on the plaintiffs' lot."]

The facts necessary to establish the defendant's liability were alleged in the complaint, and the conclusions of the trial court are amply supported by the facts found.

There is no error.

NOTES AND QUESTIONS

1. If the plaintiff is seeking to rescind the contract, an innocent misrepresentation that is material is basis for relief. Neither scienter nor negligence is necessary. The action is not in tort, but for restitution. See Seneca Wire & Mfg. Co. v. A.B. Leach & Co., 159 N.E. 700 (N.Y. 1928); Ross v. Harding, 391 P.2d 526 (Wash. 1964).

2. The principal case allows recovery for innocent misrepresentation in a tort action. It follows a minority position. The earliest case to carry the strict liability over to a tort action for damages for the misrepresentation was Holcomb v. Noble, 37 N.W. 497 (Mich. 1888), where the court appears to have confused equitable relief with an action at law. But Michigan now fully and consciously follows the "doctrine of innocent misrepresentation." U.S. Fidelity & Guar. Co. v. Black, 313 N.W.2d 77 (Mich. 1981).

3. This minority position has been adopted in the Restatement (Second) of Torts, § 552C (1977), which reads as follows:

(1) One who, in a sale, rental or exchange transaction with another, makes a misrepresentation of a material fact for the purpose of inducing the other to act or to refrain from acting in reliance upon it, is subject to liability to the other for pecuniary loss caused to him by

his justifiable reliance upon the misrepresentation, even though it is not made fraudulently or negligently.

(2) Damages recoverable under the rule stated in this Section are limited to the difference between the value of what the other has parted with and the value of what he has received in the transaction.

Caveat: The Institute expresses no opinion as to whether there may not be other types of business transactions, in addition to those of sale, rental and exchange, in which strict liability may be imposed for innocent misrepresentation, under the conditions stated in this Section.

4. Is the remedy of rescission adequate to take care of the plaintiff's needs, or should he be able to keep the property and sue for damages? Is a tort action needed if an action for breach of warranty is available? Is the rule in § 5520 really a development of the law of torts, or one of the law of restitution, eliminating the requirement of restoring the status quo as a condition for relief? In Growall v. Maietta, 931 A.2d 667, Pa. Super. Ct. 2007, plaintiff sought out-of-pocket losses, but not rescission of the contract in question. In rejecting the claim, the court cited Bortz v. Noon, 729 A.2d 555

(Pa. 1999), refusing monetary relief for innocent misrepresentations. Elucidating the distinction between legal and equitable remedies for misrepresentation, the opinion cites Miller v. Bare, 457 F. Supp. 1359 (W.D. Pa. 1978), in which a federal court (apparently erroneously) determined that Pennsylvania courts would have adopted § 552C in keeping with the trend in that state's case law.

(B) To Third Persons

Credit Alliance Corp. v. Arthur Andersen & Co.

Court of Appeals of New York, 1985.

65 N.Y.2d 536. 483 N.E.2d 110, 493 N.Y.S.2d 435.

JASEN, JUDGE. The critical issue common to these two appeals is whether an accountant may be held liable, absent privity of contract, to a party who relies to his detriment upon a negligently prepared financial report and, if so, within what limits does that liability extend.

[In Credit Alliance Corp. v. Andersen & Co., the defendant accountants prepared consolidated financial statements for L.B. Smith, Inc. Credit Alliance had provided financing to Smith for some time, insisting in 1978 upon audited financial statements. Smith supplied statements that had been prepared by defendant. "These statements contained an auditor's report prepared by Andersen stating that it had examined the statements in accordance with generally accepted auditing standards ('GAAS') and found them to reflect fairly the financial position of Smith in conformity with generally accepted accounting principles ('GAAP')." Plaintiff alleged that the statements were inaccurate because of failure to conduct investigations in accordance with proper auditing standards. Special Term denied defendant's motion to dismiss causes of action, based on negligence and fraud. A divided Appellate Division affirmed, 101 A.D.2d 231, 476 N.Y.S.2d 539, and certified to the Court of Appeals the question, "Was the order of the Supreme Court, as affirmed by this court, properly made?"

In European Am. Bank & Trust Co. v. Strahs & Kaye, ("S. & K."), the bank ("EAB") made substantial loans to Majestic Electro Industries. Majestic having become bankrupt, EAB sued S. & K. for seriously exaggerating Majestic's solvency assets. Special Term dismissed the complaint and Appellate Division reversed but certified a similar question to the Court of Appeals. EAB specifically alleges that S. & K. at all relevant times knew that EAB was Majestic Electro's principal lender, was familiar with the terms of the lending relationship and was fully aware that EAB was relying on the statements, and that S. & K. and Majestic were in communication during the entire course of the lending relationship.!

In the seminal case of Ultramares Corp. v. Touche, 255 N.Y. 170, 174 N.E. 441 [1931], this court, speaking through the opinion of Chief Judge

1197

Cardozo more than 50 years ago, disallowed a cause of action in negligence against a public accounting firm for inaccurately prepared financial statements which were relied upon by a plaintiff having no contractual privity with the accountants. This court distinguished its holding from Glanzer v. Shepard, 233 N.Y. 236, 135 N.E. 275 [1922], a case decided in an opinion also written by Cardozo nine years earlier. We explained that in Glanzer, an action in negligence against public weighers had been permitted, despite the absence of a contract between the parties, because the plaintiffs intended reliance, on the information directly transmitted by the weighers, created a bond so closely approaching privity that it was, in practical effect, virtually indistinguishable therefrom. This court has

subsequently reaffirmed its holding in Ultramares which has been, and continues to be, much discussed and analyzed by the commentators and by the courts of other jurisdictions. These appeals now provide us with the opportunity to reexamine and delineate the principles enunciated in both Ultramares and Glanzer. Inasmuch as we believe that a relationship "so close as to approach that of privity" [c] remains valid as the predicate for imposing liability upon accountants to noncontractual parties for the negligent preparation of financial reports, we restate and elaborate upon our adherence to that standard today.

The doctrine of privity is said to have had its source in the classic enunciation of its rationale in Winterbottom v. Wright, 10 M. & W. 109, 152 Eng. Rep. 402, [supra page 458], From Winterbottom, the privity doctrine developed into a general rule prevailing well into the Twentieth Century. [Cc]

By the time 90 years had passed, however, this court could note in Ultramares that the "assault upon the citadel of privity is proceeding in these days apace." [C] We acknowledged that inroads had been made, for example, where third-party beneficiaries or dangerous instrumentalities were involved. [C] Indeed, we referred to this court's holding in MacPherson v. Buick Motor Co., 217 N.Y. 382, [supra page 460] where it was decided that the manufacturer of a defective chattel--there an automobile--may be liable in negligence for the resulting injuries sustained by a user regardless of the absence of privity--a belated rejection of the doctrine of privity as applied to the facts in Winterbottom. Nevertheless, regarding an accountant's liability to unknown parties with whom he had not

contracted, the considerations were deemed sufficiently dissimilar to justify different treatment.

Although accountants might be held liable in fraud to nonprivy parties who were intended to rely upon the accountants' misrepresentations, we noted that "[a] different question develops when we ask whether they owed a duty to these to make [their reports] without negligence." Ultramares Corp. v. Touche, supra. Disputing the wisdom of extending the duty of care of accountants to anyone who might foreseeably rely upon their financial reports, Cardozo, speaking for this

1198

court, remarked: "If liability for negligence exists, a thoughtless slip or blunder, the failure to detect a theft or forgery beneath the cover of deceptive entries, may expose accountants to a liability in an indeterminate amount for an indeterminate time to an indeterminate class. The hazards of a business conducted on these terms are so extreme as to enkindle doubt whether a flaw may not exist in the implication of a duty that exposes to these consequences." [C]

In Ultramares, the accountants had prepared a certified balance sheet for their client to whom they provided 32 copies. The client, in turn, gave one to the plaintiff company. The latter, relying upon the misinformation contained in the balance sheet, made loans to the accountants' client who, only months later, was declared bankrupt. This court, refusing to extend the accountants' liability for negligence to their client's lender, with whom they had no contractual privity, noted that the accountants had prepared a report on behalf of their client to be exhibited generally to "banks, creditors, stockholders,

purchasers or sellers, according to the needs of the occasion". [C] In reciting the facts, we emphasized that: "Nothing was said as to the persons to whom these [copies] would he shown or the extent or number of the transactions in which they would be used. In particular there was no mention of the plaintiff, a corporation doing business chiefly as a factor, which till then had never made advances to the [accountants' client], though it had sold merchandise in small amounts. The range of the transactions in which a certificate of audit might be expected to play a part was as indefinite and wide as the possibilities of the business that was mirrored in the summary." [C]

The accountants' report was primarily intended as a convenient instrumentality for the client's use in developing its business. "[O]nly incidentally or collaterally" was it expected to assist those to whom the client "might exhibit it thereafter". [C] Under such circumstances, permitting recovery by parties such as the plaintiff company would have been to impose a duty upon accountants "enforce[able] by any member of an indeterminate class of creditors, present and prospective, known and unknown." [C]

By sharp contrast, the facts underlying Glanzer bespoke an affirmative assumption of a duty of care to a specific party, for a specific purpose, regardless of whether there was a contractual relationship. There, a seller of beans employed the defendants who were engaged in business as public weighers. Pursuant to instructions, the weighers furnished one copy of the weight certificate to their employer, the seller, and another to the prospective buyer. In reliance upon the inaccurately certified weight, the buyer purchased beans from the seller and, thereby, suffered a loss.

Explaining the imposition upon the weighers of a "noncontractual" duty of care to the buyer, this court held: "We think the law imposes a duty toward buyer as well as seller in the situation here disclosed. The

1199

[buyer's] use of the certificates was not an indirect or collateral consequence of the action of the weighers. It was a consequence which, to the weighers' knowledge, was the end and aim of the transaction. [The seller] ordered, but [the buyer was] to use. The defendants held themselves out to the public as skilled and careful in their calling. They knew that the beans had been sold, and that on the faith of their certificate payment would be made. They sent a copy to the [buyer] for the very purpose of inducing action. All this they admit. In such circumstances, assumption of the task of weighing was the assumption of a duty to weigh carefully for the benefit of all whose conduct was to be governed. We do not need to state the duty in terms of contract or of privity. Growing out of a contract, it has none the less an origin not exclusively contractual. Given the contract and the relation, the duty is imposed by law." [0]

The critical distinctions between the two cases were highlighted in Ultramares, where we explained: "In Glanzer v. Shepard ***[the certificate of weight], which was made out in duplicate, one copy to the seller and the other to the buyer, recites that it was made by order of the former for the use of the latter ***Here was something more than the rendition of a service in the expectation that the one who ordered the certificate would use it thereafter in the operations of his business as occasion might require. Here was a case where

the transmission of the certificate to another was not merely one possibility among many, but the 'end and aim of the transaction,' as certain and immediate and deliberately willed as if a husband were to order a gown to be delivered to his wife, or a telegraph company, contracting with the sender of a message, were to telegraph it wrongly to the damage of the person expected to receive it ***The intimacy of the resulting nexus is attested by the fact that after stating the case in terms of legal duty, we went on to point out that ***we could reach the same result by stating it in terms of contract ***The bond was so close as to approach that of privity, if not completely one with it. Not so in the case at hand [i.e., Ultramares]. No one would be likely to urge that there was a contractual relation, or even one approaching it, at the root of any duty that was owing from the [accountants] now before us to the indeterminate class of persons who, presently or in the future, might deal with the [accountants' client] in reliance on the audit. In a word, the service rendered by the defendant in Glanzer v. Shepard was primarily for the information of a third person, in effect, if not in name, a party to the contract, and only incidentally for that of the formal promisee." [C]

Several years subsequent to the decision in Ultramares, this court reiterated the requirement for a "contractual relationship or its equivalent" (State St. Trust Co. v. Ernst, 278 N.Y. 104, 111, 15 N.E.2d 416), and more recently, in White v. Guarente, 43 N.Y.2d 356, 401 N.Y.S.2d 474, 372 N.E.2d 315, such an equivalent was presented for our consideration. There, the accountants had contracted with a limited

partnership to perform an audit and prepare the partnership's tax returns. The nature and purpose of the contract, to satisfy the requirement in the partnership agreement for an audit, made it clear that the accountants' services were obtained to benefit the members of the partnership who, like plaintiff, a limited partner, were necessarily dependent upon the audit to prepare their own tax returns. After outlining the principles articulated in Ultramares and Glanzer, this court observed that: "[T]his plaintiff seeks redress, not as a mere member of the public, but as one of a settled and particularized class among the members of which the report would be circulated for the specific purpose of fulfilling the limited partnership agreed upon arrangement." [C]

Because the accountants knew that a limited partner would have to rely upon the audit and tax returns of the partnership, and inasmuch as this was within the specific contemplation of the accounting retainer, we held that, "at least on the facts here, an accountant's liability may be so imposed." [C] The resulting relationship between the accountants and the limited partner was clearly one "approach[ing] that of privity, if not completely one with it." (Ultramares Corp. v. Touche, supra).

Upon examination of Ultramares and Glanzer and our recent affirmation of their holdings in White, certain criteria may be gleaned. Before accountants may be held liable in negligence to noncontractual parties who rely to their detriment on inaccurate financial reports, certain prerequisites must be satisfied: (1) the accountants must have been aware that the financial reports were to be used for a particular purpose or purposes; (2) in the furtherance of which a known party or parties was intended to rely; and (3) there

must have been some conduct on the part of the accountants linking them to that party or parties, which evinces the accountants' understanding of that party or parties' reliance. While these criteria permit some flexibility in the application of the doctrine of privity to accountants' liability, they do not represent a departure from the principles articulated in Ultramares, Glanzer and White, but, rather, they are intended to preserve the wisdom and policy set forth therein.

We are aware that the courts throughout this country are divided as to the continued validity of the holding in Ultramares. Some courts continue to insist that a strict application of the privity requirement governs the law of accountants' liability except, perhaps, where special circumstances compel a different result. ***

In all of [these] cases, the courts found the facts amenable to the imposition of accountants' liability under the principles of Ultramares-Glanzer or extended those principles to permit a more liberalized application. To the extent that the holdings in those cases are predicated upon certain criteria--to wit, a particular purpose for the accountants' report, a known relying party, and some conduct on the part of the accountants linking them to that party--they are consonant with the principles reaffirmed in this decision. To the extent, however, that those

1201

cases were decided upon the ground that Ultramares should not be followed and, instead, a rule permitting recovery by any foreseeable plaintiff should be adopted, the law in this State, as reiterated today, is clearly distinguishable. ***

In the appeals we decide today, application of the foregoing principles presents little difficulty. In Credit Alliance, the facts as alleged by plaintiffs fail to demonstrate the existence of a relationship between the parties sufficiently approaching privity. Though the complaint and supporting affidavit do allege that Andersen specifically knew, should have known or was on notice that plaintiffs were being shown the reports by Smith, Andersen's client, in order to induce their reliance thereon, nevertheless, there is no adequate allegation of either a particular purpose for the reports' preparation or the prerequisite conduct on the part of the accountants. While the allegations state that Smith sought to induce plaintiffs to extend credit, no claim is made that Andersen was being employed to prepare the reports with that particular purpose in mind. Moreover, there is no allegation that Andersen had any direct dealings with plaintiffs, had specifically agreed with Smith to prepare the report for plaintiffs' use or according to plaintiffs' requirements, or had specifically agreed with Smith to provide plaintiffs with a copy or actually did so. Indeed, there is simply no allegation of any word or action on the part of Andersen directed to plaintiffs, or anything contained in Andersen's retainer agreement with Smith which provided the necessary link between them.

By sharp contrast, in European American, the facts as alleged by EAB clearly show that S. & K. was well aware that a primary, if not the exclusive, end and aim of auditing its client, Majestic Electro, was to provide EAB with the financial information it required. The prerequisites for the cause of action in negligence, as well as in gross negligence, are fully satisfied. Not only is it alleged, as in Credit Alliance, that the accountants knew the identity of the specific

nonprivy party who would be relying upon the audit reports, but additionally, the complaint and affidavit here allege both the accountants' awareness of a particular purpose for their services and certain conduct on their part creating an unmistakable relationship with the reliant plaintiff. It is unambiguously claimed that the parties remained in direct communication, both orally and in writing, and, indeed, met together throughout the course of EAB's lending relationship with Majestic Electro, for the very purpose of discussing the latter's financial condition and EAB's need for S. & K.'s evaluation. Moreover, it is alleged that S. & K. made repeated representations personally to representatives of EAB, on these occasions, concerning the value of Majestic Electro's assets. It cannot be gainsaid that the relationship thus created between the parties was the practical equivalent of privity. The parties' direct communications and personal meetings resulted in a nexus between them sufficiently approaching

1202

privity under the principles of Ultramares, Glanzer and White to permit EAB's causes of action.

Finally, disposition of the second cause of action alleged in Credit Alliance need not detain us long. The cause of action for fraud repeats the allegations for the negligence cause of action and merely adds a claim that Andersen recklessly disregarded facts which would have apprised it that its reports were misleading or that Andersen had actual knowledge that such was the case. This single allegation of scienter, without additional detail concerning the facts constituting the alleged fraud, is insufficient under the special pleading standards

required under CPLR 3016(b), and, consequently, the cause of action should have been dismissed. [Cc].

Accordingly, in Credit Alliance both causes of action should be dismissed, the order of the Appellate Division reversed, with costs, and the certified question answered in the negative. In European American, the order of the Appellate Division should be affirmed, with costs, and the certified question answered in the affirmative.

Citizens State Bank v. Timm, Schmidt & Co.

Supreme Court of Wisconsin, 1983.

113 Wis.2d 376, 335 N.W.2d 361.

[For the years 1973-76, defendant Timm, Schmidt & Co. (Timm), an accounting firm, prepared financial statements for Clintonville Fire Apparatus, Inc. (CFA), including statements of financial condition, yearly income, retained income and changes in financial condition. These were accompanied by an opinion letter to CFA stating that "the financial statements fairly presented the financial condition of CFA and that the statements were prepared in accordance with generally accepted accounting principles."

In 1975 and 1976 CFA obtained loans from Citizens State Bank amounting to $380,000, relying on Timm's statements. In 1977 Timm discovered mistakes in its statements totaling over $400,000. It notified Security, which called in all of its loans due. CFA went into receivership and was ultimately liquidated and dissolved. Still due to Citizens was $152,214. Citizens sued Timm for that amount.

Timm moved for summary judgment. All persons in the Timm firm who had worked on the CFA statements filed affidavits that they had no knowledge that CFA intended to obtain or had any loans from Citizens. There were some contradictory affidavits, especially from the CFA president, Dando, indicating that he believed that Timm knew of the dealing. The trial court granted the motion for summary judgment, and the court of appeals affirmed. The case is now before the state supreme court.)

1203

Day, JUSTICE. ***The question on review is whether accountants may be held liable for the negligent preparation of an audit report to a third party not in privity who relies on the report.

This is a question of first impression in this state. However, the issue has received wide consideration in both courts and law journals.

Accountants have long been held not liable for their negligence to relying third parties not in privity under an application of Judge Cardozo's decision in Ultramares v. Touche, 255 N.Y. 170, 174 N.E. 441 (1931). In Ultramares, Judge Cardozo absolved the defendant accountants from liability for overvaluing the assets of a company in an audit report to a plaintiff who had loaned money in reliance on a certified balance sheet in the report. Judge Cardozo expressed the concern that "if liability exists, a thoughtless slip or blunder ***may expose accountants to a liability in an indeterminate amount for an indeterminate time to an indeterminate class." [C]

[At one time] Ultramares was relied on by every jurisdiction to consider this question to deny accountant liability to third parties.

However, in recent years, Ultramares has received new attention and courts have started to find accountants liable to third parties.

In Rusch Factors, Inc., v. Levin, 284 F.Supp. 85 (D.C.R.I.1968), the court, citing section 552 of the Restatement, imposed liability on an accountant to a relying third party not in privity. In Rusch Factors, the accountant knew the statements he prepared were to be used by his client for the purpose of obtaining credit from a third party even though they did not know of the specific relying third party. Nevertheless, the court allowed liability to be imposed. 284 F.Supp. at 93.

Similarly, in Ryan v. Kanne, 170 N.W.2d 395 (Iowa 1969), the Iowa Supreme Court applying Restatement section 552, determined that an accountant could be held liable to a foreseen third party who had relied upon a negligently prepared audit report. Because the relying third party was "actually known," the court did not address the extent of foreseeability that would be necessary before an accountant could be held liable to a third party not actually known. [C]

In this state, although the liability of accountants to third parties not in privity has not been examined, the liability of an attorney to one not in privity was recently examined in Auric v. Continental Casualty Co., Ill Wis. 2d 507, 331 N.W.2d 325 (1983). This court concluded that an attorney may be held liable to a will beneficiary not in privity for the attorney's negligence in supervising the execution of a will. [C] Part of the rationale for this decision was that the imposition of liability would make attorneys more careful in the execution of their responsibilities to their clients. [C]

That rationale is applicable here. Unless liability is imposed, third parties who rely upon the accuracy of the financial statements will not

1204

be protected. Unless an accountant can be held liable to a relying third party, this negligence will go undeterred.

There are additional policy reasons to allow the imposition of liability. If relying third parties, such as creditors, are not allowed to recover, the cost of credit to the general public will increase because creditors will either have to absorb the costs of bad loans made in reliance on faulty information or hire independent accountants to verify the information received. Accountants may spread the risk through the use of liability insurance.

We conclude that the absence of privity alone should not bar negligence actions by relying third parties against accountants.

Although the absence of privity does not bar this action, the question remains as to the extent of an accountant's liability to injured third parties. Courts which have examined this question have generally relied upon section 552 of the Restatement to restrict the class of third persons who could sue accountants for their negligent acts. Under section 552(2)(a) and (b), liability is limited to loss suffered:

"(a) By the person or one of a limited group of persons for whose benefit and guidance he [in this case the accountant] intends to supply the information or knows the recipient intends to supply it; and

"(b) Through reliance upon it in a transaction that he [the accountant] intends the information to influence or knows the recipient so intends or in a substantially similar transaction."

Under section 552, liability is not extended to all parties whom the accountant might reasonably foresee as using the information. Rather, as one commentator noted, "The Restatement's formulation of 'a limited group of persons' extends causes of action to a limited number of third parties who are expected to gain access to the financial statement information in an expected transaction." This limitation is stressed in comment h to section 552, where it is noted that:

"It is not required that the person who is to become the plaintiff be identified or known to the defendant as an individual when the information is supplied. It is enough that the maker of the representation intends it to reach and influence either a particular person or persons, known to him, or a group or class of persons, distinct from the much larger class who might reasonably be expected sooner or later to have access to the information and foreseeably to take some action in reliance upon it."

The fundamental principle of Wisconsin negligence law is that a tortfeasor is fully liable for all foreseeable consequences of his act except as those consequences are limited by policy factors. [Cc] The Restatement's statement of limiting liability to certain third parties is too restrictive a statement of policy factors for this Court to adopt.

1205

We conclude that accountants' liability to third parties should be determined under the accepted principles of Wisconsin negligence

law. According to these principles, a finding of non-liability will be made only if there is a strong public policy requiring such a finding. [Cc]

Liability will be imposed on these accountants for the foreseeable injuries resulting from their negligent acts unless, under the facts of this particular case, as a matter of policy to be decided by the court, recovery is denied on grounds of public policy. [C] This Court has set out a number of public policy reasons for not imposing liability despite a finding of negligence causing injury:

"(1) The injury is too remote from the negligence; or (2) the injury is too wholly out of proportion to the culpability of the negligent tort-feasor; or (3) in retrospect it appears too highly extraordinary that the negligence should have brought about the harm; or (4) because allowance of recovery would place too unreasonable a burden on the negligent tort-feasor; or (5) because allowance of recovery would be too likely to open the way for fraudulent claims; or (6) allowance of recovery would enter a field that has no sensible or just stopping point." Ollerman [v. O'Rourke Co., 94 Wis. 2d 17, 48, 288 N.W.2d 95 (1980).]

Although in some cases this court has decided at the motion-to-dismiss stage that policy factors preclude the imposition of liability for negligent acts, [c] it has generally been found to be better practice to have a full factual resolution before evaluating the public policy considerations involved. Ollerman, [cc].

In this case we conclude that a determination of the public policy questions should be made after the facts of this case have been fully explored at trial. The question of the proper scope of these

accountants' liabilities to the third party bank cannot be determined upon the information contained in the record. A full factual resolution is necessary before it can be said that public policy precludes Timm's liability for its allegedly negligent conduct.

The pleadings, affidavits and other information in the record before this court do not establish that Timm was entitled as a matter of law to summary judgment. Under the accepted principles of Wisconsin negligence law, Timm could be liable to Citizens if Timm's actions were the cause of Citizens' injuries and if the injuries were reasonably foreseeable unless public policy precluded recovery.

Timm's affidavits do not dispute that Citizen's reliance upon the financial statements led to the making of the loans and ultimately to the losses which were incurred. Each affidavit recites that Timm employees had no knowledge that the financial statements would actually be used by CFA to apply for a new bank loan or to increase existing loan indebtedness. However, the affidavit of Elmer Timm stated that "as a

1206

certified public accountant, I know that audited statements are used for many purposes and that it is common for them to be supplied to lenders and creditors, and other persons."

These affidavits and other information contained in the record do not dispose of the issue of whether it was foreseeable that a negligently prepared financial statement could cause harm to Citizens.

Therefore, Timm having failed to establish a prima facie case for summary judgment, we conclude the trial judge erred in granting the

motion for summary judgment.

Decision of the court of appeals is reversed and cause remanded to the trial court for further proceedings not inconsistent with this opinion.

NOTES AND QUESTIONS

1. The scope of auditors' liability has been debated. The two principal cases represent the ends of the spectrum. Credit Alliance was thoroughly reexamined and reaffirmed by the Court of Appeals of New York in Sec. Pac. Bus. Credit, Inc. v. Peat Marwick Main & Co., 597 N.E.2d 1080, 586 N.Y.S.2d 87 (N.Y. 1992) (requisite relationship is not established by plaintiff calling auditor and announcing reliance). Elsewhere, the English courts have insisted upon a narrow scope of liability, see Caparo Indus. P.L.C. v. Dickman, (1990) 2 A.C. 605 (HL) (Eng.). The duty is limited to where defendant, giving advice or information, was fully aware of the nature of the transaction which the plaintiff had in contemplation, knew that the advice or information would be communicated to him directly or indirectly, and knew that it was very likely that the plaintiff would rely on that advice or information in deciding whether or not to engage in the transaction in contemplation. Needless to say, the boundaries of the duty have been much debated and remain contentious. Henderson v. Merrett Syndicates Ltd. (No. 1), (1995) 2 A.C. 145 (HL) (Eng.). Restatement (Third) of Torts: Liability for Economic Harm, § 5 (2020), rejects a general foreseeability test but adopts the test that the duty of reasonable care is imposed on a person supplying information in the course of his business, profession, or employment where reliance is invited.

2. As quoted in the Citizens State Bank case [supra at 1202], the Second Restatement takes an intermediate position, confining recovery to a "limited group of persons" and to a transaction or "substantially similar transaction" intended by the defendant. In Bily v. Arthur Young & Co., 834 P.2d 745 (Cal. 1992), the California Supreme Court adopted the Restatement test. The opinion, like that of the House of Lords, supports the criterion of knowledge of the class of persons and transactions that the supplier of the information "intends the information to influence." Unlimited liability is avoided and the scope of liability regulated by the supplier of the information. The court observes that the test is applicable to other professionals supplying information and evaluations for the use and benefit of others, including "attorneys, architects, engineers, title insurers and abstracters." The court formulated the following jury instructions: "The representation must have been made with the intent to induce plaintiff, or a

particular class of persons to which plaintiff belongs, to act in reliance upon the representation in a specific transaction, or a specific type of transaction, that defendant intended to influence. Defendant is deemed to have intended to influence [its client's] transaction with plaintiff whenever defendant knows with substantial certainty that plaintiff, or the particular class of persons to which plaintiff belongs, will rely on the representation in the course of the transaction. If others become aware of the representation and act upon it, there is no liability even though defendant should reasonably have foreseen such a possibility." See supra, Southern California Gas Leaks Case, Chapter 8:3 Pure Economic Loss.

The California Supreme Court expressly rejected the approaches exemplified in Credit Alliance and Citizens State Bank. Other cases adopting the Restatement position after close examination of the vying authorities and the policies at play are First National Bank of Commerce v. Monco Agency, 911 F.2d 1053 (5th Cir. 1990) (applying Louisiana law); Nycal v. KPMG Peat Marwick LLP, 688 N.E.2d 1368 (Mass. 1998); ML-Lee Acquisition v. Deloitte & Touche, 463 S.E.2d 618 (S.C. Ct. App. 1995), aff'd ML-Lee Acquisition v. Deloitte & Touche, 489 S.E.2d 470 (S.C. 1997).

3. Managers of a corporation engaged in a fraudulent scheme whereby the valuations of inventories were inflated to give a misleading picture of the corporation's wealth. Auditor failed to uncover the fraud. Eventually a corporation officer unmasked the fraud. Should the corporation have a good cause of action against the auditors? Any other person or persons? See Cenco Inc. v. Seidman & Seidman, 686 F.2d 449 (7th Cir. 1982) (applying Illinois law).

4. As suggested, other professionals who proffer advice upon which third parties rely are subject to the same liability as in the auditor cases. Vereins-Und Westbank, AG v. Carter, 691 F. Supp. 704 (S.D.N.Y. 1988) (liability of attorney for opinion letter within the principles in Ultramares)', Prudential Ins. Co. v. Dewey, Ballantine, 605 N.E.2d 318, 590 N.Y.S.2d 831 (N.Y. 1992) (opinion letter by borrower's lawyers to lender creates a duty of care). But cf. Ackerman v. Schwartz, 733 F. Supp. 1231 (N.D. Ind. 1989) (no liability for opinion letter relied on by non-client). In Robinson v. Omer, 952 S.W.2d 423 (Tenn. 1997), defendant attorney advised his client that to videotape secretly his sexual encounters would be

legally permissible. Plaintiff, after being informed of this advice by the client, agreed to help him videotape the encounters. Plaintiff was sued by a number of the women who had been videotaped and settled the claims at considerable cost. The Tennessee Supreme Court held that no duty was established since the advice was not relied on for a contemplated commercial or business transaction.

5. In M. Miller Co. v. Dames & Moore, 18 Cal.Rptr. 13 (Cal. Ct. App. 1961), an engineering company was hired to prepare a soil report, knowing that it would be used by bidders for work on a sewer system. The report was negligently done and inaccurate, and the successful bidder lost money. He was allowed to recover damages although the report was not made directly to him. Accord, Ossining Union Free Sch. Dist. v. Anderson LaRocca Anderson, 541 N.Y.S.2d 335, 539 N.E.2d 91 (N.Y. 1989) (engineers reporting to architects, reporting to a school district; liability on the basis that the

relationship was "the functional equivalent of contractual privity"). But cf. Tex. Tunneling Co. v. Chattanooga, 329 F.2d 402 (6th Cir. 1964), rev'g, 204 F. Supp. 821 (E.D. Tenn. 1962); Barrie v. V.P. Exterminators, Inc., 625 So.2d 1007 (La. 1993) (duty owed by termite inspector to third parties); and Marcellus Constr. Co. v. Broadalbin, 755 N.Y.S.2d 474 (N.Y. App. Div. 2003) (no duty owed by engineer retained by city to contracting company relying on engineer's statements about subsurface conditions; no relationship within test in Credit Alliance above).

6. Another line of cases concern the liability of attorneys to disappointed beneficiaries of wills. Does the attorney who negligently

causes a testamentary gift to fail owe a duty of care to the disappointed donee? See cases cited in note 6 on page 225 and notes 3 and 4 page 469. The duty was narrowly construed in Noble v. Bruce, 709 A.2d 1264 (1998) (holding that no duty is owed to beneficiaries for negligence leading to large tax liability). Elsewhere, the duty owed to a disappointed beneficiary has been recognized. White v. Jones, (1995) 2 A.C.207 (HL) (Eng.).

Ultramares Corp. v. Touche

Court of Appeals of New York, 1931.

255 N.Y. 170, 174 N.E. 441.

[The opinions of Judge Cardozo in Glanzer v. Shepard and Ultramares Corp. v. Touche have been well described in the opinion of Judge Jason in Credit Alliance Co., supra page 1196. The description of Ultramares there, however, covered only the holding regarding the accountants' liability to a third person for negligent preparation of financial statements. The Ultramares opinion went on to discuss liability in fraud or deceit under the American doctrine in Sovereign Pocohontas Co. v. Bond, 120 F.2d 39 (D.C. Cir. 1941). That part of the Ultramares opinion is set forth here.]

Touche, Niven's certificate in the case had stated: "We have examined the accounts of Fred Stern & Co. ***and hereby certify that the annexed balance sheet is in accordance therewith and with the information and explanations given us. We further certify that ***the said statement in our opinion presents a true and correct view of the financial condition of Fred Stern & Co. ***."]

CARDOZO, C.J. ***Our holding [on liability for negligence] does not emancipate accountants from the consequences of fraud. It does not relieve them if their audit has been so negligent as to justify a finding that they had no genuine belief in its adequacy, for this again is fraud. It does no more than say that, if less than this is proved, if there has been neither reckless misstatement nor insincere profession of an opinion, but only honest blunder, the ensuing liability for negligence is one that is bounded by the contract, and is to be enforced between the parties by whom the contract has been made. We doubt whether the average businessman receiving a certificate without paying for it, and receiving

1209

it merely as one among a multitude of possible investors, would look for anything more.

The defendants certified as a fact, true to their own knowledge, that the balance sheet was in accordance with the books of account. If their statement was false, they are not to be exonerated because they believed it to be true. [Cc] We think the triers of the facts might hold it to be false. ***

In this connection we are to bear in mind the principle ***that negligence or blindness, even when not equivalent to fraud, is none the less evidence to sustain an inference of fraud. At least this is so if the negligence is gross. ***Even Derry v. Peek, as we have seen, asserts the probative effect of negligence as an evidentiary fact. ***No such charity of construction exonerates accountants, who by the very nature of their calling profess to speak with knowledge when certifying to an agreement between the audit and the entries.

***The defendants were put on their guard by the circumstances touching the December accounts receivable to scrutinize with special care. A jury might find that, with suspicions thus awakened, they closed their eyes to the obvious, and blindly gave assent.

We conclude, to sum up the situation, that in certifying to the correspondence between balance sheet and accounts the defendants made a statement as true to their own knowledge, when they had, as a jury might find, no knowledge on the subject. If that is so, they may also be found to have acted without information leading to a sincere or genuine belief when they certified to an opinion that the balance sheet faithfully reflected the condition of the business. ***

Upon the plaintiffs appeal as to the second cause of action, the judgment [for the defendants in the lower courts] should be reversed, and a new trial granted, with costs to abide the event.

NOTES AND QUESTIONS

1. This part of the Ultramares case involves liability for fraudulent, as distinguished from negligent, misrepresentation. The defendant's conduct being more reprehensible, the opinion indicates that a wider circle of liability is required. When the defendant's conduct is not only reckless but also intended to deceive, it would appear that the scope of liability would be even broader.

2. The central requirement of intent in fraudulent misrepresentation or deceit avoids the expansiveness of reasonable foreseeability employed in negligence. The scope of deceit has broadened as the notion of intent has become more liberal but nevertheless, the nexus, as Cardozo recognized, will be close and the duty more

narrowly drawn. The Siren call of reasonable foreseeability is thus nicely avoided. For the scope of liability in deceit, see page 1182, note 5.

1210

4. Reliance

Williams v. Rank & Son Buick, Inc.

Supreme Court of Wisconsin, 1969.

44 Wis.2d 239, 170 N.W.2d 807.

[Plaintiff went to defendant's used car lot on March 19 and looked at a Chrysler automobile. Plaintiff testified that he was looking for an air- conditioned car; that the salesman told him the car was air-conditioned, and that the particular car had been so described in an advertisement on which he relied. The evidence was, however, that the advertisement was first published two days after plaintiff bought the car, and defendant contended that plaintiff "seized upon an error in the ad to seek a reduction in the price previously paid for the automobile." Plaintiff was invited to take the car out for a test run, and did so, driving it for about an hour and a half. According to plaintiff, however, it was not until several days after the purchase that he discovered that the knobs marked "AIR" were for ventilation, and that the car was not air-conditioned. Plaintiff brought an action for fraud, and received a judgment for $150 damages. Defendant appeals.]

HANLEY, Justice. ***[T]here is ample evidence to warrant the trial court's finding that the oral misrepresentation of the appellant's

salesman was in fact made. ***

The question of reliance is another matter. Many previous decisions of this court have held that one cannot justifiably rely upon obviously false statements. In Jacobsen v. Whitely (1909), 138 Wis. 434, 436, 437, 120 N.W. 285, 286, the court said:

" ***It is an unsavory defense for a man who by false statements, induces another to act to assert that if the latter had disbelieved him he would not have been injured. ***Nevertheless courts will refuse to act for the relief of one claiming to have been misled by another's statements who blindly acts in disregard of knowledge of their falsity or with such opportunity that by the exercise of ordinary observation, not necessarily by search, he would have known. He may not close his eyes to what is obviously discoverable by him. ***"

It is apparent that the obviousness of a statement's falsity vitiates reliance since no one can rely upon a known falsity. Were the rule otherwise a person would be free to enter into a contract with no intent to perform under the contract unless it ultimately proved profitable. On the other hand, a party who makes an inadvertent slip of the tongue or pencil would continually lose the benefit of the contract.

The question is thus whether the statement's falsity could have been detected by ordinary observation. Whether the falsity of a statement could have been discovered through ordinary care is to be determined in light of the intelligence and experience of the misled individual. Also to

be considered is the relationship between the parties. [Cc] In several cases this court has held that the above factors negated the opportunity to inspect and the obviousness of the statement's falsity. [C]

In the instant case, however, no such negating factors exist. The respondent specifically testified that, being a high school graduate, he was capable of both reading and writing. It is also fair to assume that he possessed a degree of business acumen in that he and his brother operated their own business. No fiduciary relationship existed between the parties. They dealt with each other at arms' length. The appellant made no effort to interfere with the respondent's examination of the car, but, on the contrary, allowed him to take the car from the premises for a period of one and one-half hours.

Although the obviousness of a statement's falsity is a question of fact, this court has decided some such questions as a matter of law. [Cc]

In the instant case the respondent had ample opportunity to determine whether the car was air-conditioned. He had examined the car on the lot and had been allowed to remove the car from the lot unaccompanied by a salesman for a period of approximately one and one- half hours. This customers were normally not allowed to do.

No great search was required to disclose the absence of the air conditioning unit since a mere flip of a knob was all that was necessary. If air conditioning was, as stated by the respondent, the

main reason he purchased the car, it is doubtful that he would not try the air conditioner. ***

We conclude that as a matter of law the respondent under the facts and circumstances was not justified in relying upon the oral representation of the salesman. This is an action brought in fraud and not an action for a breach of warranty.

Order reversed [by a vote of 4 to 3],

WILKIE, Justice (dissenting). ***I would hold that the falsity of the representation was not so obvious that it could be held as a matter of law that the respondent had no right to rely on it. It was for the finder of fact and by finding reliance the trial court, by implication, found respondent had a right to rely thereon. ***

NOTES AND QUESTIONS

1. Restatement (Third) of Torts: Liability for Economic Harm, § 11 (2020):

The recipient of a fraudulent misrepresentation can recover against its maker for economic loss only if

(a) the misrepresentation causes the loss,

(b) the recipient relies on the misrepresentation in acting or refraining from action, and

(c) the reliance is justifiable.

2. In H. Hirschberg Optical Co. v. Michaelson, 95 N.W. 461 (Neb. 1901), plaintiff, buying a pair of glasses, testified that he was told by defendant's salesman that the glass used in them had a special

quality which would make them adapt themselves to his eyes. On this evidence, can the plaintiff recover for deceit? See also that foremost classic of legal humor, the sad but fascinating tale of the land of Shalam. Ellis v. Newbrough, 27 P. 490 (N.M. 1891). In Hitachi Credit Am. Corp. v. Signet Bank, 166 F.3d 614 (4th Cir. 1999) (applying Virginia Law), Hitachi was persuaded by Signet Bank to participate in the financing of a highly secret, off-shore cigarette venture that had been represented as a venture sponsored by Philip Morris with the cooperation of the United States government. In fact, the venture was a fraud. A former Philip Morris employee falsely represented to Signet and other original parties that he acted for Philip Morris in the venture, but that the venture was so secret it would be denied by Philip Morris. Hitachi was found to have reasonably relied on Signet Bank's representations about the secret off-shore venture. The touchstone of reasonableness in reliance was "prudent investigation." The case also discusses contractual provisions relevant to reliance. In this case there was no express disclaimer of responsibility for representations. Cf. Hoover Universal, Inc. v. Brockway Imco, Inc., 809 F.2d 1039 (4th Cir. 1987). No-reliance clauses will usually control in sophisticated business relationships but may be set aside in consumer transactions: Danann Realty Corp. v. Harris, 157 N.E.2d 597 (N.Y. 1959); cf. Cirillo v. Slomin's Inc., 768 N.Y.S.2d 759 (2003). A prudent investigation will encompass mounting evidence that a takeover target's financial statements represent a ridiculous overvaluation: Atari Corp. v. Ernst & Whinney, 981 F.2d 1025 (9th Cir. 1992) (applying California law).

3. What if it is made clear by the evidence that plaintiff knew that the representation made to him was false? Cox v. Johnson, 40 S.E.2d

418 (N.C. 1946). Or that he paid no attention to it, and acted for other reasons entirely? McIntyre v. Lyon, 37 N.W.2d 903 (Mich. 1949); Tsang v. Kan, 177 P.2d 630 (Cal. Dist. Ct. App. 1947).

4. Suppose that A and B each make the same false statement to C, and his decision to act is substantially influenced by both. Strong v. Strong, 5 N.E. 799 (N.Y. 1886); Shaw v. Gilbert, 86 N.W. 188 (Wis. 1901). Does it make any difference that either statement alone would have been sufficient to induce the action? What case does this resemble?

5. Does the fact that plaintiff has made an inspection, examination or investigation of his own establish:

A. That he did not believe the representation, and so did not rely on it, but relied instead on his own investigation? See McNabb v. Thomas, 190 F.2d 608 (D.C. Cir. 1951); Savings Banks Ret. Sys. v. Clarke, 258 Md. 501, 265 A.2d 921 (1970).

B. That he believed the representation, and relied upon it, but sought verification before acting, and in the end relied upon both? John Hancock Mut. Life Ins. Co. v. Cronin, 51 A.2d 2 (N.J. 1947); Fausett & Co. v. Bullard, 229 S.W.2d 490 (Ark. 1950).

6. Materiality. Suppose that defendant, as agent, is selling plaintiff a tract of land on behalf of a principal whom plaintiff never has seen. Defendant falsely states that his principal is left-handed. No other false statements are made. Can plaintiff recover in deceit after he buys the land? Farnsworth v. Duffner, 142 U.S. 43 (1891) (social,

religious and political affiliation); Haverland v. Lane, 154 P. 1118 (Wash. 1916) (identity of party).

7. Defendant induces plaintiff to send his daughter to a particular school by false representations that it is attended by her former classmates. Is this a material representation? Brown v. Search, 111 N.W. 210 (Wis. 1907). What if plaintiff is induced to buy pictures by a false statement that his wife likes them? Washington Post Co. v. Sorrells, 68 S.E. 337 (Ga. Ct. App. 1910). Or he is induced to give money to a college by a statement that it is to be named after one of his friends? Collinson v. Jeffries, 54 S.W. 28 (Tex. Civ. App. 1899). Restatement (Third) of Torts: Liability for Economic Harm § 12 (2020) provides: "An actor who makes a fraudulent misrepresentation is subject to liability for harm only if the risk the harm was foreseeability increased by the fraud."

8. Contributory Negligence. Contributory negligence does not bar recovery when the misrepresentation is intentional, Yorke v. Taylor, 124 N.E.2d 912 (Mass. 1955); and Judd v. Walker, 114 S.W. 979 (Mo. 1908) ("the laws of hospitality seem to require that strangers should be taken in in a good sense, but courts should be astute not to permit such a 'taking in' as appears here").

9. What if the defendant's representation is made without scienter or intent to deceive, but is made negligently and the action is one for negligent misrepresentation? Is contributory negligence then a defense? How can plaintiff have reasonably relied if he has failed to take reasonable precautions to protect himself? Does the scope of the defense differ according to whether plaintiff and defendant may interact with one another? Maxwell Ice Co. v. Brackett, Shaw & Lunt

Co., 116 A. 34 (N.H. 1921); Gould v. Flato, 10 N.Y.S.2d 361 (N.Y. Spec. Term. 1938); Grand Restaurants of Can. Ltd. v. Toronto, [1982] 39 O.R. 2d 752 (Can.). Greycas, Inc. v. Proud, 826 F.2d 1560 (7th Cir. 1987) (applying Illinois law). Does comparative negligence apply here? Adopting comparative negligence for negligent misrepresentations, see Kramer v. Petisi, 940 A.2d 800 (Con. 2008).

10. The great majority of the cases now hold that the plaintiff has no duty to make inquiry or investigation as to the truth of an apparently reliable statement made to him. This is held even though investigation could be made quickly, with little effort, by means readily at hand. Buckley v. Buckley, 202 N.W. 955 (Mich. 1925). Circumstances, however, may require further investigation. Failure to investigate may persuade the court that the loss was the plaintiffs "own responsibility." Chicago Title & Trust Co. v. First Arlington Nat'l Bank, 73 III.Dec. 626, 454 N.E.2d 723 (Ill. App. Ct. 1983).

11. Plaintiff, a "gullible young man," whose occupation was that of playing the piano in resorts of ill repute, inherited $40,000 from his mother. On learning this, defendant promptly offered to sell him a disreputable roadhouse, representing that it was worth $35,000. Defendant advised

plaintiff not to ask questions of others, because if it got out that the place was for sale other purchasers would probably come and get the bargain away from him. Relying upon these representations, plaintiff made no inquiry, and bought the roadhouse for $35,000. It proved to be practically worthless, and had to be closed down when

its license was not renewed. Plaintiff recovered from defendant. Adan v. Steinbrecher, 133 N.W. 477 (Minn. 1911).

5. Opinion

Italian Cowboy Partners, Ltd. v. Prudential Ins. Co. of Am.

Supreme Court of Texas, 2011.

341 S.W.3d 323. 54 Tex. Sup. Ct. J. 822.

Paul W. Green, Justice delivered the opinion of the court. Hecht, Justice filed a dissenting opinion, in which WILLETT, JUSTICE and GUZMAN, JUSTICE joined.

I. Facts

This dispute arose when Jane and Francesco Secchi, owners and operators of a restaurant, Italian Cowboy, terminated the restaurant's lease because of a persistent sewer gas odor. In a suit against the landlord, Prudential Insurance Company of America, and the property manager, Prizm Partners, the Secchis sought to rescind the lease and recover damages for fraud and breach of the implied warranty of suitability. The landlord maintains that rescission is not warranted and seeks to recover for breach of contract.

The Secchis successfully owned and operated restaurants for more than twenty years. The Secchis identified Keystone Park, a Dallas shopping center owned by Prudential and managed by Prizm, as a possible site for a new restaurant, Italian Cowboy. Keystone Park housed three successful restaurants and had a vacant restaurant building available for lease. The Secchis began negotiating a

potential lease of the vacant restaurant building with Prizm's property management director, Fran Powell.

During the lease negotiations, Powell told the Secchis that the building was practically new and had no problems. In particular, Francesco Secchi testified that Powell told him "the building was in perfect condition, never a problem whatsoever." according to Secchi, Powell also said, "[t]his is my baby and I was here from the first day when they put the first brick until the last one. The size--it's in perfect condition. There is no problem whatsoever.... [it is] a perfect building." Similarly, Jane Secchi testified that Powell told her that "this was a very new building and she had been present at the very beginning of this building and watched it all the way through," that "[i]t was somewhat of her baby," and that "there had been nothing wrong with the place at all."

1215

The Secchis began remodeling the property after signing the lease. During this time, the Secchis first heard that a severe odor had plagued Hudson's Grill, the previous tenant. Francesco Secchi testified that a nearby cinema manager had asked Ron Perry, Italian Cowboy's general contractor, if he knew of the problematic odor existing in the previous restaurant. Secchi stated that a few days later, "[a] guy with a motorcycle" stopped by the restaurant and said to "be very careful.... [there] used to be a place called Hudson's here and they used to serve excellent hamburgers, but there was a very, very bad odor."

***

III. Fraud and Negligent Misrepresentation

Because the Court of Appeals concluded that a binding disclaimer of reliance existed, it did not reach the merits of Italian Cowboy's fraud claims. However, Prudential asserts alternate bases for why Italian Cowboy's fraud claims fail as a matter of law. the elements of fraud are:

(1) that a material representation was made; (2) the representation was false; (3) when the representation was made, the speaker knew it was false or made it recklessly without any knowledge of the truth and as a positive assertion; (4) the speaker made the representation with the intent that the other party should act upon it; (5) the party acted in reliance on the representation; and (6) the party thereby suffered injury.***

Prudential maintains that Italian Cowboy's fraud claims fail as a matter of law because either Powell's representations were statements of opinion (undercutting the first element), or were not known to be false (undercutting the third element). We disagree. We conclude that her statements were actionable material misrepresentations as a matter of law, and that legally sufficient evidence established that those misrepresentations were known to be false when made.

The trial court listed in its findings of fact three actionable representations made during the lease negotiations:

a. The Secchis were lucky to be able to lease the premises because the building on the premises was practically new and was problem-free;

b. No problems had been experienced with the premises by the prior tenant; [and]

c. The building was a perfect restaurant site and the Secchis could get into the building for next to nothing. ***

Pure expressions of opinion are not representations of material fact, and thus cannot provide a basis for a fraud claim. "[W]hether a statement is an actionable statement of 'fact' or merely one of 'opinion' often depends on the circumstances in which a statement is made." [c] Special or one-sided knowledge may help lead to the conclusion that a statement is one

1216

of fact, not opinion. [This includes] "the comparative levels of the speaker's and the hearer's knowledge" as among the relevant circumstances upon which the classification of a statement as fact or opinion depends. Moreover, even if an expression is an opinion, "[t]here are exceptions to this general rule that an expression of an opinion cannot support an action for fraud." [c] One such exception is that "when an opinion is based on past or present facts.... Special knowledge establishes a basis for fraud." [c]

Initially, it defies common sense and any plausible meaning of the word "problem" to infer from the first two representations that in Prudential's "opinion," the sewer gas odor was not a problem for Hudson's Grill. A foul odor is obviously problematic to a restaurant. Testimony indicated that Powell herself personally experienced the odor and described it as "almost unbearable" and "ungodly." According to its regional manager, Hudson's Grill had even indicated to Powell that it was late in making rent payments because of the odor. In light of the circumstances, we conclude that the statements

concealing the odor "problem" are more properly statements of fact, not pure expressions of opinion. ***

Even assuming, however, that Powell's statements are properly considered pure expressions of opinion, Prudential's one-sided knowledge of past facts makes these particular representations actionable under the circumstances, [c] Powell emphasized to Italian Cowboy that she had been working with the restaurant site since its inception, implying that she had personal knowledge of its entire history from her experience--i.e., if there had been something worth mentioning, she would have known about it and mentioned it. Powell's honest representations about her superior knowledge of the site--such as stating that she "was here from the first day when they put the first brick until the last one"--were so intertwined with her other statements that they are actionable the persistent odor problem did not appear until a layer of solidified grease was removed from the grease trap, meaning that a reasonable inspection of the premises by Italian cowboy would not have revealed the problem. Thus, Italian Cowboy did not have access to the same information as Powell.

While it is true that Italian Cowboy could have interviewed the former tenant to inquire about prior problems with the property, we are unwilling to require prospective commercial tenants to undertake this burden simply to ensure that they can later bring claims arising from their reliance on representations about the property made by a lessor with superior, personal knowledge. Rather, commercial tenants are entitled to rely on the fact that a landlord will not actively conceal material information. Firsthand knowledge--like Powell's--concerning material information--like an odor problem in a restaurant

site--is exactly the sort of scenario that demonstrates the sound policy behind

1217

the exception allowing an opinion to be actionable under certain circumstances where material information was withheld. ***

We conclude that as a matter of law, Powell's representations were actionable, and legally sufficient evidence existed to demonstrate that they were known to be false when made. Because the Court of Appeals concluded that Italian Cowboy disclaimed reliance, it never reached Prudential's argument as to the factual sufficiency of the evidence supporting Italian Cowboy's fraud claims. Accordingly, having decided that there is no alternative legal basis to render judgment in favor of prudential on Italian Cowboy's fraud claims, we remand the case to the court of appeals for further consideration.

***

VI. Conclusion

We reverse the Court of Appeals' judgment and render judgment in favor of Italian Cowboy on its claim for rescission premised on Prudential's breach of the implied warranty of suitability. We remand the case to the Court of Appeals for additional consideration consistent with this court's opinion.

NOTES AND QUESTIONS

1. Which of the following statements, made by a seller to a buyer, are to be regarded as opinion, and which as fact? "This land is worth $5,000." "I paid $5,000 for this land two years ago." Medbury v. Watson, 47 Mass. (6 Met.) 246 (1843). "Property exactly like this is

selling for $5,000." Brody v. Foster, 158 N.W. 824 (Minn. 1916). "I have been offered $5,000 for this land by another party." Kabatchnick v. Hanover-Elm Building Corp., 328 Mass. 341, 103 N.E.2d 692 (1952). "The lowest price at which this land can be purchased from my principal is $5,000." Hokanson v. Oatman, 131 N.W. lll (Mich. 1911).

2. Suppose the statement of opinion as to value is made by the buyer to the seller? The seller has had her car wrecked. She is told by the buyer that in its present condition it is worth only $200, and she sells it for that. Fossier v. Morgan, 474 S.W.2d 801 (Tex. Civ. App. 1971).

3. The statement of any opinion is a statement of at least one fact--the fact that the defendant does have such an opinion. If this is false and dishonest, why should the defendant not be held liable? See W. Page Keeton, Fraud--Misrepresentation of Opinion, 21 Minn.L.Rev. 643 (1937).

4. Does a statement of opinion ever imply any other facts? In Simpson v. W. Nat'l Bank of Casper, 497 P.2d 878 (Wyo. 1972), a banker, when asked about the financial condition of a customer for whose benefit the person inquiring was depositing a check, replied that he would come out all right and there was nothing wrong with his financial condition. Held, this "was an implied statement and representation that he knew of no fact incompatible with his opinion." In Wink Enter, v. Dow, 491 S.W.2d 451 (Tex. Civ. App. 1973), an opinion was expressed to a prospective investor that a bank was "a

good sound one and will continue to make money." Held, the statement "means that facts exist which lead the maker to believe the statement, or facts actually exist that the bank is in sound condition."

5. Some statements clearly in the form of an opinion are actionable: Hanberry v. Hearst Corp., 81 Cal.Rptr. 519 (Cal. Ct. App. 1969), supra page 1192. Take the following:

A. What about the opinion of an attorney on a point of law, given to a layman with whom he is dealing? Sec. Savings Bank v. Kellems, 9 S.W.2d 967 (Mo. 1928). And what of an attorney's opinion on a point of law when given to an adversary with legal training? Hoyt Prop., Inc. v. Prod. Res. Group, L.L.C., 736 N.W.2d 313 (Minn. 2007).

B. Suppose a violin expert, selling a violin, gives his opinion to a purchaser who knows nothing about such instruments that it is a genuine Stradivarius? Powell v. Flechter, 18 N.Y.S. 451 (N.Y. Gen. Term. 1892). What if the purchaser is another expert? Banner v. Lyon & Healy Inc., 293 N.Y.S. 236 (N.Y. App. Div. 1937). Suppose a so-called "impartial expert" misleads the plaintiff into believing that he is actually impartial? Cf. Oltmer v. Zamora, 94 Ill.App. 3d 651, 418 N.E.2d 506 (Ill. App. Ct. 1981).

C. What if the disparity in bargaining power does not arise from any expert knowledge or special information of the defendant, but from the unusual ignorance, inexperience, illiteracy or lack of intelligence of the plaintiff? Ellis v. Gordon, 231 N.W. 585 (Wis.1930).

D. Why is reliance upon statements of opinion, including value, always held to be justified where there is a special relation of trust and confidence between the parties? For example, see Jekshewitz v.

Groswald, 164 N.E. 609 (Mass. 1929) (affianced); Allen v. Frawley, 82 N.W. 593 (Wis. 1900) (attorney and client).

Vulcan Metals Co. v. Simmons Mfg. Co.

United States Circuit Court of Appeals, Second Circuit, 1918.

248 Fed. 853.

[Two actions tried together. The Vulcan Metals Company brought action against the Simmons Manufacturing Company for deceit, by reason of misrepresentations in the sale by Simmons to Vulcan of machinery for the manufacture of vacuum cleaners, together with the patents covering their manufacture. The Simmons Company brought action against the Vulcan Company upon notes given for the purchase price, and in this action Vulcan counterclaimed for the same alleged misrepresentations.

The misrepresentations included "commendations of the cleanliness, economy and efficiency of the machine, that it was absolutely perfect in even the smallest detail; that water power, by which it worked, marked the most economical means of operating a vacuum cleaner with the greatest efficiency; that the cleaning was more thoroughly done than by beating or brushing; that, having been perfected, it was a necessity which

1219

every one could afford; that it was so simple a child of six could use it; that it worked completely and thoroughly; that it was simple, long-lived, easily operated, and effective; that it was the only sanitary

portable cleaner on the market; that perfect satisfaction would result from its use; that it would last a lifetime; that it was the only practical jet machine on the market, and that perfect satisfaction would result from its use, if properly adjusted. The booklet is in general the ordinary compilation, puffing the excellence and powers of the vacuum cleaner, and asserting its superiority over all others of a similar sort." There were further representations that the vacuum cleaner never had been put on the market.

The trial court directed a verdict on each action for the Simmons Company. The Vulcan Company appeals.]

Learned Hand, District Judge. The first question is of the misrepresentations touching the quality and powers of the patented machine. These were general commendations, or, in so far as they included any specific facts, were not disproved; e.g., that the cleaner would produce 18 inches of vacuum with 25 pounds water pressure. They raise, therefore, the question of law how far general "puffing" or "dealers' talk" can be the basis of an action for deceit.

The conceded exception in such cases has generally rested upon the distinction between "opinion" and "fact"; but that distinction has not escaped the criticism it deserves. An opinion is a fact, and it may be a very relevant fact; the expression of an opinion is the assertion of a belief, and any rule which condones the expression of a consciously false opinion condones a consciously false statement of fact. When the parties are so situated that the buyer may reasonably rely upon the expression of the seller's opinion, it is no excuse to give a false one. [C] And so it makes much difference whether the parties stand "on equality." For example, we should treat very

differently the expressed opinion of a chemist, to a layman about the properties of a composition from the same opinion between chemist and chemist, when the buyer had full opportunity to examine. The reason of the rule lies, we think, in this: There are some kinds of talk which no sensible man takes seriously, and if he does he suffers from his credulity. If we were all scrupulously honest, it would not be so; but, as it is, neither party usually believes what the seller says about his own opinions, and each knows it. Such statements, like the claims of campaign managers before election, are rather designed to allay the suspicion which would attend their absence than to be understood as having any relation to objective truth. It is quite true that they induce a compliant temper in the buyer, but it is by a much more subtle process than through the acceptance of his claims for his wares.

So far as concerns statements of value, the rule is pretty well fixed against the buyer. ***It has been applied more generally to statements of quality and serviceability. ***But this is not always so. ***As respects the validity of patents it also obtains. ***Cases of warranty

1220

present the same question and have been answered in the same way. ***

In the case at bar, since the buyer was allowed full opportunity to examine the cleaner and to test it out, we put the parties upon an equality. It seems to us that general statements as to what the cleaner would do, even though consciously false, were not of a kind to be taken literally by the buyer. As between manufacturer and

customer, it may not be so; but this was the case of taking over a business, after ample chance to investigate. Such a buyer, who the seller rightly expects will undertake an independent and adequate inquiry into the actual merits of what he gets, has no right to treat as material in his determination statements like these. ***

As respects the representation that the cleaners had never been put upon the market or offered for sale, the rule does not apply; nor can we agree that such representations could not have been material to Freeman's decision to accept the contract. The actual test of experience in their sale might well be of critical consequence in his decision to buy the business, and the jury would certainly have the right to accept his statement that his reliance upon these representations was determinative of his final decision. We believe that the facts as disclosed by the depositions of the Western witnesses were sufficient to carry to the jury the question whether those statements were false. It is quite true, as the District Judge said, that the number of sales was small, perhaps not 60 in all; but they were scattered in various parts of the Mountain and Pacific states, and the jury might conclude that they were enough to contradict the detailed statements of Simmons that the machines had been kept off the market altogether. ***

[New trial ordered in the action of deceit.]

NOTES AND QUESTIONS

1. What about a statement that "there is no better land in Vermont"? Nichols v. Lane, 106 A. 592 (Vt. 1919). Or that a machine is "the pride of our line," and "the best on the American market"? Prince v. Brackett, Shaw & Lunt Co., 130 A. 509 (Me. 1925). Or that shares of

stock are "hot stock," "very good," and "with unlimited possibilities"? Ryan v. Collins, 496 S.W.2d 205 (Tex. Civ. App.1973). Or that a prospect for dancing lessons had "exceptional potential to be a fine and accomplished dancer," that he was a "natural dancer" and a "terrific dancer"? Parker v. Arthur Murray, Inc., 295 N.E.2d 487 (Ill. App. Ct. 1973). See also Letellier v. Small, 400 A.2d 371 (Me. 1979), on "dealer talk"; Schott Motorcycle Supply v. Am. Honda Motor Co., 976 F.2d 58 (1st Cir. 1992) (defendant's assurance of Honda's future commitment to motorcycle business "puffing" and "track talk"); Charpentier v. L.A. Rams Football Co., Inc., 89 Cal. Rptr. 2d 115 (Cal. Ct. App. 1999) (defendant represented no intention "to move the team," plaintiff bought season tickets in reliance; held jury could conclude representation was "material.").

1221

2. In Bertram v. Reed Automobile Co., 49 S.W.2d 517 (Tex. Civ. App. 1932), the seller of a second-hand automobile described it as a "dandy," a "bearcat," a "good automobile," a "good little car," and a "sweet job." The court said: "Common experience and observation causes one to marvel at the moderation of the selling agent in making his trade talk to appellant.... These are relative terms, they may mean anything the orator or the listener wants, and neither may be penalized if the one exaggerates or the other is disappointed. There may be something more definite in the representations that the car had been well taken care of, had good rubber on it, had been driven but 19,000 miles, had not been mistreated, that mechanics had found it in perfect condition."

3. "The rule of law is hardly to be regretted when it is considered how easily and insensibly words of hope or expectation are converted by an interested memory into statements of quality or value when the expectation has been disappointed." in Deming v. Darling, 20 N.E. 107 (Mass. 1889) (Holmes, J.).

6. Law

National Conversion Corp. v. Cedar Bldg. Corp.

Court of Appeals of New York, 1969.

23 N.Y.2d 621, 246 N.E.2d 351, 298 N.Y.S.2d 499.

BREITEL, J. A former tenant of industrial premises sued its landlords for damages in fraud and for breach of warranty. The landlords counterclaimed for subsequent rents and for use and occupation, and also brought a summary proceeding to recover possession which was consolidated with this action. After a trial without a jury the tenant recovered a judgment for $70,086.81 and defendant landlords appeal, the Appellate Division having affirmed, two Justices dissenting.

There is no dispute that the lease contained a false representation that the demised premises were situated in an unrestricted zone. The primary contention made by landlords is that in the same lease the tenant covenanted that the operation of its business would produce no objectionable odors or gases and that, therefore, the false representation by landlord and broken covenant by the tenant nullified one another, disentitling the tenant to remedies for fraud.

There are also auxiliary issues with respect to the fixation of damages. As will be seen, landlords distort the issue in the case. The tenant's inability to continue its business as it contemplated is not determined solely by the presence or avoidability of offensive odors from the operation of its enterprise. In short, tenant did not receive the unrestricted premises for which it bargained and as landlords represented was the situation. Consequently, judgment was properly rendered in favor of tenant for fraud in the inducement.

Tenant, intending to engage in the conversion of restaurant garbage into fertilizer, entered into a five-year lease with landlords. The lease

1222

contained a representation that the demised premises were in an unrestricted zone and that the proposed use would not be in violation of the zoning ordinance. Concomitantly, the lease contained a covenant by tenant that the operation of its business would produce no objectionable odors or gases.

After alteration of the premises, installation of equipment, but before the initial operation of the enterprise, violations were filed by the City of New York. In due course, the enterprise was terminated, tenant moved out, and this action for fraud was instituted. The judgment recovered included all rent previously paid by tenant, the cost of installation of equipment, and the cost of removal.

The lease was executed March 4, 1964 for a five-year term commencing March 9, 1964. Prior to December 15, 1961, the premises, located in Brooklyn in New York City, were in an unrestricted zone. On that date, however, a new zoning resolution took effect and the premises were placed in an M-l district allowing

light manufacturing uses. Under the new resolution, however, garbage conversion would be permitted in an M-l district provided odors did not become readily detectable at the lot line, and provided various other performance standards not confined to odors were satisfied. In contrast, in an M-3 district, which would also permit a garbage conversion use, odors were objectionable only if they created a public nuisance or hazard, and the other nonodor performance standards were considerably lower.

Concededly, the premises were never adapted to control odors in order to comply with an M-l standard, or to satisfy nonodor performance standards required in an M-l district. The violations filed, despite contrary interpretations given by the parties, covered both the failure to engage in a permitted use and to obtain a certificate of occupancy permitting the actual use and reflecting M-l standards required for the actual use. Undisputed in the case is that a significant added expense would be required to adapt the premises to an M-l conditionally permitted use, an expense which would not be entailed if the premises were in a wholly unrestricted area or, for that matter, if the premises were in an M-3 (heavy manufacturing) district. ***

Even in an unrestricted zone there is an obligation on the part of landowners and users not to permit objectionable odors. Anterior to zoning requirements there is the common law of nuisance (see, generally, Prosser, Torts [3d ed.], p. 611 et seq., esp. 612, 620-621). Hence, the tenant's covenant is a rational inclusion even in a lease covering premises in an unrestricted zone.

Such reconciliation, however, does not dispose of the main problem. Landlords argue that tenant, represented by a lawyer, was just as much on notice, as they, the landlords, were, that the premises were located in a restricted zone. Ergo, they invoke the familiar rule that one may not charge another with fraud if one knew, or should have known, the actual situation.

1223

True, both sides were represented by lawyers. But tenant's testimony is that when it sought an adjournment of the negotiations in order for its lawyer to check whether the premises were located in an unrestricted zone, landlords' lawyer, who was also one of the principals, said that it would not be necessary, that they (landlords) "own the property, and we know the area", that it is in an unrestricted zone, and "We [landlords] guarantee it." (Landlords' testimony denied ever making such statements.) The discussion was resolved only by including the representation in the lease. Tenant contended and proved that it had not actually known of the zoning requirement and had relied on what it was told. This proof, if accepted (as it was in the affirmed finding of the trial court), made out a classic instance of fraud in the inducement, for landlords intentionally or recklessly made false representations either as to their knowledge of the facts or the facts themselves (for the significance of recklessness as equivalent to scienter. ***

Landlords also contend that only a misrepresentation of law rather than of fact is involved and, therefore, that fraud will not lie. There is no longer any doubt that the law has recognized, even in this State, a sharp distinction between a pure opinion of law which may not,

except in unusual circumstances, base an action in tort, and a mixed statement of fact as to what the law is or whether it is applicable. ***

Most important it is that the law has outgrown the over-simple dichotomy between law and fact in the resolution of issues in deceit. It has been said that "a statement as to the law, like a statement as to anything else, may be intended and understood either as one of fact or one of opinion only, according to the circumstances of the case", [c] The statements in this case, both before the execution of the lease, and in the body of the lease, exemplify ideally an instance in which the statements are not intended or understood merely as an expression of opinion. Landlords said they knew the premises were in an unrestricted district. This meant that they knew as a fact, that the zoning resolution did not restrict the use of the particular premises, and tenant so understood it. When coupled with the further fact that tenant's lawyer was persuaded not to verify the status of the premises on the landlords' representation, it is equally clear that tenant understood the statement to be one of fact, namely, what the zoning resolution provided by description, map, and requirements as to the area in question. The misrepresented fact, if it is at all necessary to find misrepresented facts, was what the zoning resolution contained by way of description, map, and requirements, hardly opinions as to the law albeit matters to be found in a law.

Moreover, the modern rule extends even further to cover a false opinion of law if misrepresented as a sincere opinion, as in the case of any other opinion, where there is reasonable reliance [Cc] But the rule is outdated and fails to recognize [that]: "No presumption exists that all men know the law. The maxim 'a man is presumed to know

the law,' is a trite, sententious saying, 'by no means universally true.' Ignorance of the

1224

law does not excuse persons so as to exempt them from the consequences of their acts, such as punishment for criminal offenses ***If ignorance of the law did not in fact exist, we would not have lawyers to advise and courts to decide what the law is." [c] True, this was not said in a fraud context but the realities involved are the same whether the applicable category is contract or fraud. Hence, in the proper circumstances there may indeed be reliance on a fraudulently expressed statement of the law. Arguably, the facts of this case do not require so great a reach, for here the statements were keyed to the underlying data (facts) upon which the applicability of the particular zoning provisions governing the rights of owners and users were to be determined (the law). But, for the reasons indicated, it is not necessary to make the distinction rest on so narrow an analysis.

Consequently, the affirmed findings of fact establish landlords' liability for fraud in the inducement. It is only necessary to pass to the factors affecting damage, the tenant having chosen to rescind the fraudulently induced agreement. ***

Accordingly, the order of the Appellate Division should be affirmed, with costs.

NOTES AND QUESTIONS

1. Defendant, a layman, is seeking to settle a claim against plaintiff, and assures him that he is legally liable for his conduct. Plaintiff,

relying upon the assurance, settles the claim. He was not in fact liable. Has he a cause of action? Williams v. Dougherty County, 113 S.E.2d 168 (Ga. Ct. App. 1960).

2. Defendant, a layman, sold plaintiff beverages containing 18 to 25 per cent alcohol, assuring him that the local law would permit him to sell them in unbroken packages at retail. In fact, the law did not permit such sales, and plaintiff was arrested and convicted for the unlawful sale of intoxicating liquor. Defendant was held not liable. Ad. Dernehl & Sons Co. v. Detert, 202 N.W. 207 (Wis. 1925). Cf. Gibson v. Mendenhall, 224 P.2d 251 (Oki. 1950) (representation that plaintiff could easily obtain a license).

3. Representations as to the law of another state are treated as statements of fact, upon which the plaintiff may justifiably rely. See, for example, Hembry v. Parreco, 81 A.2d 77 (Mun. App. D.C. 1951); Fireman's Ins. Co. v. Jones, 431 S.W.2d 728 (Ark. 1968) (deception as to foreign statute of limitations).

4. What about a statement that defendant's hospital is legally accredited? Myers v. Lowery, (Cal. Dist. Ct. App. 1920) or that the defendant's title is good? Barnett v. Kunkle, 256 F. 644 (8th Cir. 1919).

5. What about a statement of law made by an attorney to his client? By one member of a family to another? By an insurance company to its policy- holder? Some relationships will demand a disclosure of material facts. Thus, fraudulent misrepresentation may be constituted in the absence of an affirmative statement misrepresenting existing fact. Stiley v. Block, 925 P.2d

194, 208 925 P.2d 194 (Wash. 1996) (en banc) (Talmadge, J., concurring); Stark v. Equitable Life Assurance Soc., 285 N.W. 466 (Minn. 1939).

7. Prediction and Intention

McElrath v. Electric Investment Co.

Supreme Court of Minnesota, 1911.

114 Minn. 358. 131 N.W. 380.

BROWN, J. Appeal from an order overruling a general demurrer to plaintiffs' complaint. It appears from the complaint that the defendant was the owner of a certain summer hotel property, including the land upon which the building was situated, and certain personal property used in connection with the operation of the hotel, situated at Antlers Park, in Dakota county. On the 15th day of April, 1909, the parties to the action entered into a contract by the terms of which defendant leased the property to plaintiffs for a term of years. ***

The action is for damages occasioned by the alleged false and fraudulent representations made by defendant for the purpose of inducing plaintiffs to enter into the contract. The complaint alleges: "That for the purpose of inducing said plaintiffs to enter into said contract, Exhibit A, this defendant wrongfully, falsely, and fraudulently stated and represented to these plaintiffs that the Minneapolis, St. Paul, Rochester and Dubuque Electric Traction Company would complete its electric railroad, and would run electric cars over said road from the city of Minneapolis to and beyond said Antlers Park during the summer of 1909, and about July 1st of that year; and said defendant further stated and represented to said

plaintiffs that said defendant would, during said summer of 1909 and as soon as said electric railroad should run to said Antlers Park, make of said Antlers Park and surrounding ground an important summer resort for people living at said city of Minneapolis, and further stated and represented to plaintiffs that if they would enter into said contract, Exhibit A, they would make, through the assistance and efforts of said defendant, not less than fifteen hundred dollars ($1,500.00) per annum clear above all expenses of running and management. ***

It is contended by defendant that the alleged false representations do not constitute a cause of action, for the reason that, when made, they had reference to the future intentions of the traction company, and were not representations of present existing facts, and further, that the complaint contains no allegations that the electric road was not constructed and in operation according to the representations.

We ***hold that the complaint, in so far as it alleges the making of false representations for the purpose of inducing plaintiffs to enter into the contract, knowing the same to be false, to the effect that the electric road would be completed and in operation by July 1, 1909, states a cause

1226

of action. While it is true as a general rule that false representations, upon which fraud may be predicated, must be of existing facts, and cannot consist of mere promises or conjectures as to future acts or events, yet, [c] if in making the representations defendant "intended to create in plaintiffs the belief that it was, as a fact, the then intention of the" traction company to complete the road at the time

represented, and "the representations might be understood and were understood by plaintiffs as asserting that fact," then a charge of fraud may be based thereon, though the represented event was to occur in the future. Upon this theory, the complaint, as against a demurrer, states a cause of action. [Cc]

Upon the question of the sufficiency of the other allegations of fraud, the case comes within the general rule that promises or assurances as to future events cannot be made the basis of an action of fraud. In this respect the complaint alleges that defendant represented that it would, as soon as the electric road reached Antlers Park, "make of said Antlers Park and surrounding ground an important summer resort for people living at said City of Minneapolis." This, aside from being a mere promise to do something in the future, namely, "make an important summer resort," rests wholly in conjecture and speculation, depending for its accomplishment upon many facts, of which both parties had, presumptively, equal notice, and depending upon conditions over which neither had control. Whether an important or other summer resort may be established at a particular place depends in the main upon its location and the disposition of the public to make it a place of recreation or pleasure. ***The naked allegation is of a promise to create a particular condition in the future, a condition surrounded with known uncertainty and beyond defendant's control, and the general rule applies. The other allegations, namely, that plaintiffs would, in the conduct of the leased property, make a specified profit during the season, also rests in conjecture and opinion, and therefore is not open to the charge of actionable fraud.

Affirmed.

NOTES AND QUESTIONS

1. Restatement (Third) of Torts: Liability for Economic Harm § 15 (2020): Promissory Fraud: "A statement of a speaker's intention to perform a promise is a fraudulent misrepresentation if the intention does not exist at the time the statement is made."

2. In Trustees of Columbia Univ. v. Jacobsen, 574, 148 A.2d 63 (N.J. 1959) cert, denied, 363 U.S. 808, plaintiff, a university student, claimed that the University represented to him that he would acquire "wisdom, truth, character, enlightenment, understanding, justice, liberty, honesty, courage, beauty and similar virtues and qualities; that it would develop the whole man, maturity, well-roundedness, objective thinking and the like...." He failed to graduate because of poor scholastic standing. What result?

1227

3. Contrast Steinberg v. Chicago Medical Sch., 13 Ill.Dec. 699, 371 N.E.2d 634 (Ill. 1977). Plaintiff applied for admission to defendant medical school, paying the application fee, and was rejected. He alleges fraud in the catalog statements regarding selection standards to be applied, and the use of "nonacademic criteria, primarily the ability of the applicant or his family to pledge or make payment of large sums of money to the school." Held, cause of action stated, and class action permitted. Recovery allowed "where the false promise or representation of future conduct is alleged to be the scheme employed to accomplish the fraud." See also NECO, Inc. v. Larry Price & Assoc., Inc., 597 N.W.2d 602 (Neb. 1999). Landlord of mixed-use tower induced a fire safety monitoring company to purchase monitoring space in the building with assurances that a

newly-installed fire sprinkler system would cover the entire building. In fact, the landlord had previously instructed a renovator to omit installation of sprinklers in significant portions of the building, and did not subsequently revise those instructions. Cause of action found where the party making the representation as to a future event was in control of the event's occurrence or non-occurrence. Not all statements concerning prospective occurrences, without more, are barred from giving rise to misrepresentation claims; some such statements may in fact be representations of present conditions. See Campbell v. Bettius, 421 S.E.2d 433 (Va. 1992) (attorney's false assertion that plaintiffs "would be able" to collect on a guarantee was not a prediction of future events, but a representation of the present effect of contract language).

4. For close analysis, see Ayres and Klass, Insincere Promises: The Law of Misrepresented Intent (Yale U. P. 2005).

8. Damages

Hinkle v. Rockville Motor Co., Inc.

Court of Appeals of Maryland, 1971. 262 Md. 502, 278A.2d 42.

BARNES, Judge. The appellant, Donald Hinkle (Hinkle), purchased a 1969 Ford Galaxie automobile from the appellee, Rockville Motor Company, Inc. (Rockville), in January of 1970. ***Hinkle alleged that Rockville fraudulently represented to him at the time of sale that the 1969 Galaxie was a new car when, in fact, it had over 2,000 miles on the speedometer and had been involved in an accident in the State of Tennessee. Hinkle discovered the mileage recorded on the speedometer while driving home on the day of the sale. He brought

this to the attention of Rockville and an adjustment was made whereby he was compensated in the amount of $109.86, the amount of his first payment, in exchange for a release from any further claims except for those falling within his standard new car warranty. The adjustment for mileage was made on January 27, 1970. Hinkle maintains that it was not until April, 1970, that he learned the automobile had been involved in an accident in Tennessee in July of 1969. It is alleged in the declaration that the front and rear portions of the automobile had been welded together after

having been severed in the accident. Hinkle alleged that Rockville had knowledge of the accident but that it "willfully concealed the true circumstances" and "willfully, maliciously and fraudulently misrepresented the quality and condition of the aforesaid Ford vehicle" and that he relied on these misrepresentations to his detriment. Damages were claimed in the amount of $100,000.

At the close of Hinkle's case, Rockville moved for a directed verdict. In granting the directed verdict, the trial court only found it necessary to consider Rockville's argument that Hinkle's failure to produce evidence in regard to the automobile's actual value at the time of sale deprived the jury of the only permissible standard by which the jury could determine the existence or amount of damages. The trial court determined this to be a correct statement of the law and directed a verdict in favor of Rockville notwithstanding the fact that Hinkle had produced expert testimony that the effects of the accident could be remedied and the car returned to new car condition by the expenditure of $800 for repairs. ***

A majority of States will allow the plaintiffs to recover the "benefit of his bargain" if sufficiently proved. The theory is to compensate the plaintiff as though the transaction had been carried out as represented. [Cc]

Other States restrict the plaintiff to his "out of pocket" losses. The classic formula is the value of the object as represented less its actual value at the time of sale. The theory is to return the plaintiff economically to the position he was in prior to the fraudulent transaction thus allowing him recoupment of actual losses but not expected gain. This rigid limitation on the nature of recovery is often explained as being required because the action is one of tort rather than contract and that it has always been recognized that tort remedies are designed to compensate for actual harm suffered. ***Maryland is one of those States which has not adopted a rigid stand as far as adopting one of the above theories to the exclusion of the other. Both theories have been used and approved in Maryland. ***

In summary, the review of the Maryland cases on this question of the proper measure of damages in fraud and deceit cases demonstrates that this Court has applied the so-called "flexibility theory" without heretofore expressly stating the factors to be considered in its application. Selman v. Shirley, 161 Or. 582, 609, 85 P.2d 384, 394 (1938) the first case to define expressly this flexible approach, set forth the following four rules as a guide for the proper measure of damages in these cases.

"(1) If the defrauded party is content with the recovery of only the amount that he actually lost, his damages will be measured under

that rule;

"(2) if the fraudulent representation also amounted to a warranty, recovery may be had for the loss of the bargain because a fraud

1229

accompanied by a broken promise should cost the wrongdoer as much as the latter alone;

"(3) where the circumstances disclosed by the proof are so vague as to cast virtually no light upon the value of the property had it conformed to the representations, the court will award damages equal only to the loss sustained; and

"(4) where ***the damages under the benefit-of-the-bargain rule are proved with sufficient certainty, that rule will be employed." ***

This position was advocated by Professor McCormick who wrote, "In the first place, it seems that in every case the defrauded plaintiff should be allowed to claim under the 'out of pocket' loss theory if he prefers. In the second place, the plaintiff should be allowed to choose the other theory, and recover the value of the bargain as represented, if the trial judge in his discretion considers that, in view of the probable moral culpability of the defendant and of the definiteness of the representations and the ascertainability of the represented value, the case is an appropriate one for such treatment." McCormick, Damages § 122 (1935) at p. 454. Williston on Contracts § 1392 (Rev.Ed.1937) at p. 3886 and Sutherland on Damages § 1172 (4th ed. 1916) at p. 4409 both indicate a preference for allowing the plaintiff to recover the benefit of his bargain in these cases. Sedgewick on Damages § 781 (9th ed.1912)

at pp. 1629- 31, while recognizing that the majority rule allows "benefit of bargain" recovery, favors a strict adherence to the "out of pocket" remedy in accordance with English common law as set forth in Peek v. Derry, 37 Ch.Div. 541 (1888). The Restatement of Torts, § 549 (1938) also sets forth the "out of pocket" rule of damages.

After the above review of cases and texts on the subject, it is concluded that the trial court erred in directing the verdict against Hinkle for failure to produce evidence upon which damages could be awarded. Hinkle's evidence in regard to the cost of necessary repairs demonstrated the existence of damages and provided an adequate measure upon which they could be predicated.

Judgment reversed and case remanded for new trial, the appellee to pay the costs.

NOTES AND QUESTIONS

1. Does the court in the principal case correctly state the test for the "tort" or "out of pocket" test?

2. "It is the very essence of an action of fraud or deceit that the same shall be accompanied by damage, and neither damnum absque injuria nor injuria absque damnum by themselves constitute a good cause of action." Casey v. Welch, 50 So.2d 124 (Fla. 1951). In an action for rescission, it may not be necessary to show pecuniary loss and plaintiff can prevail, in restitution, if he did not receive what he was promised. See Hirschman v.

Healy, 202 N.W. 734 (Minn. 1925); Nance v. McClellan, 89 S.W.2d 774 (Tex. Comm'n App. 1936).

3. Of the two standard measures of damages discussed here, the contract or "benefit-of-the-bargain" measure will usually result in greater damages. Thus: Price paid $5,000; Value of property purchased $3,000; Value as represented $7,000. Here the tort, or "out-of-pocket" measure results in damages of $2,000, while the "benefit-of-the-bargain" measure is $4,000.

There may, however, be cases in which the out-of-pocket measure is higher. For example, Estell v. Myers, 56 Miss. 800 (1879), where plaintiff paid $62,500 for land actually worth $27,500, and the value if the representations had been true would have been $50,000. Also Erde v. Fenster, 141 N.Y.S. 943 (1913), where plaintiff was induced to sell a claim for less than it was worth by the buyer's representation that the debtor was totally insolvent.

4. The out-of-pocket measure of damages is adopted in all deceit actions by the English courts, and by a minority of about a dozen American jurisdictions. The "benefit-of-the-bargain" rule has been adopted by about two-thirds of the American courts that have considered the question. Neither group has followed either rule with entire consistency in all cases.

5. The compromise formula, first stated in Selman v. Shirley, 161 Or. 582, 85 P.2d 384 (1938), reh'g granted as affirmed, 91 P.2d 312 (Or. 1939), has met general approval by legal writers, and has been followed in some other states. Salter v. Heiser, 239 P.2d 327 (Wash. 1951); Rice v. Price, 164 N.E.2d 891 (Mass. 1960).

6. In addition to the standard measure of damages, whether it is under the tort or the contract rule, plaintiff can recover for consequential damages resulting from the misrepresentation. Thus,

one who buys a horse represented to him as gentle may recover for personal injuries if he is kicked by the horse. Vezina v. Souliere, 152 A. 798 (Vt. 1931). And one who buys infected bees, represented to be healthy, may recover for damage to his other bees when the infection spreads to them. Sampson v. Penney, 187 N.W. 135 (Minn. 1922). Plaintiff may recover for expenses to which he has been put, as when he is induced to employ an architect by misrepresentations as to his skill and compelled to incur extra expenses in completing the building as a result. Edward Barron Estate Co. v. Woodruff Co., 126 P. 351 (Cal. 1912). In Brooks v. Doherty, Rumble & Butler, 481 N.W.2d 120 (Minn. Ct. App. 1992), the court warned of the possible overlap of contract and tort damages, allowing damages against plaintiffs law firm employer for emotional distress, damage to personal and professional reputation, lost income, and expenses in moving across the country to find a job.

7. Questions of proximate cause (scope of liability) can arise in misrepresentation cases, too. Plaintiff is induced to buy stock in a company by defendant's fraudulent statement. The treasurer of the company subsequently absconds with funds that he had been embezzling over a period of time and the company turns out to be insolvent. Defendant knew nothing about the treasurer's misconduct and the misrepresentation did not relate to

the value of the stock. Can plaintiff recover in deceit for his loss? Fottler v. Moseley, 70 N.E. 1040 (Mass. 1904), would indicate that the answer is yes. But a majority of the courts would apparently disagree. See Boatmen's Nat'l Co. v. M.W. Elkins & Co., 63 F.2d 214

(8th Cir. 1933); Morrell v. Wiley, 178 A. 121 (Conn. 1935). Plaintiff would be able to prevail if he sued in rescission and obtained restitution. Seneca Wire & Mfg. Co. v. A.B. Leach & Co., 159 N.E. 700 (N.Y. 1928).

8. Damages recoverable as consequential loss under deceit may be broader than those under negligent misrepresentation. See Doyle v. Olby (Ironmongers) Ltd., [1969] 2 Q.B. 158, at 167 (Eng.): "[I]t does not lie in the mouth of the fraudulent person to say [damages] could not reasonably have been foreseen." Can an analogy be drawn with proximate cause in relation to the intentional torts? Damages are recoverable if loss might reasonably be expected to result from reliance on the representation. Punitive damages may be awarded. Warner Comm., Inc. v. Keller, 888 S.W.2d 586 (Tex. App. 1994); Roboserve, Inc. v. Kato Kagaku Co., Limited, 78 F.3d 266, 277 (7th Cir. 1996) (stating the necessity of a showing of "intent to injure constituting gross misconduct or malicious behavior"). Mental anguish is often mentioned as an element in setting damages in actions of deceit and providing a reason for a contractual measure of damages in some cases, see Liberty National v. Sanders, 792 So.2d 1069 (Ala. 2000).

9. The scope liability and measure of damages depends on the description of the duty and rules of causation. The problem is exemplified in Banque Bruxelles Lambert SA v. Eagle Star Ins. Co., [1995] Q.B. 375, sub nom. S. Australia Asset Mgmt. Corp. v. York Montague Ltd., [1997] A.C. 191 (HL) (Eng.), and Kenny & Good Pty. Ltd. v. MGICA (1992) Ltd. (1999) 199 CLR 413 (Austl.). The English House of Lords and the Australia High Court respectively struggled to establish the correct principle in the following situation. A lends

money to B on security of certain real estate. Valuer V is retained by B to value the real estate, knowing that A will rely on the valuation as a basis for advancing the money. V is negligent and the land is worth a fraction of its valuation. A recovers but a fraction of the money loaned to B. It is easy to establish a duty of care owed by V to A, but what is the measure of damages? If A would not have entered the transaction but for the high valuation, could it be said that A should recover from B all the losses necessary to put him back in the position he enjoyed prior to the transaction? That is, the amount of the loan less the money received on foreclosure. (Interest would be calculated.) This measure of damages includes any drop in the market value of the real estate after the loan contract. Should damages, however, incorporate a drop in the market? The House of Lords, describing the scope of the duty, argued that the damages are those caused by the wrongfulness of the valuation: the responsibility extends only to the risk of the negligent advice. To make V liable for the drop in the market would hold him liable for an event that would have occurred even if the valuation had been correct. Thus, the measure should turn on the consequences of the wrong valuation--the difference between the wrong valuation and the correct value. Similar reasoning was employed in the following cases: First Federal Svgs. & Loan Assn. v. Charter Appraisal Co.,

Inc., 724 A.2d 497 (Conn. 1999); Movitz v. First Nat'l Bank of Chicago, 148 F.3d 760 (7th Cir. 1998); and in Or. Steel Mills, Inc. v. Coopers & Lybrand, 83 P.3d 322 (Or. 2004).

The Australian High Court found, in Kenny & Good above, that the market drop should be included because the scope of the duty (the undertaking) included the assumption of the risk of a drop in the market value of the real estate.

In the cases, the analysis is the same whether the action is in tort or contract. The Doyle case, note supra 9, may be justified because fraud requires a strong restitutionary remedy.

In a remarkable round of U.S. Supreme Court cases pleaded in deceit seeking awards of punitive damages, the federalism vectors can be observed: In Philip Morris USA v. Williams, 549 U.S. 346 (2007), plaintiff pleaded an action in deceit, claiming that defendant tobacco company had systematically misrepresented the risks of smoking. The jury awarded $79.5 million in punitive damages; the ratio of punitive to compensatory damages for the death was about 100:1. The case involved an exquisite dance, over a decade, wherein the case wound through three Oregon courts and was granted certiorari three times and remanded back to the Oregon Supreme Court twice before the United States Supreme Court dismissed the third grant of cert, as improvidently granted. 556 U.S. 178 (2009), per curium. Thus, is seen in strong relief a struggle for authority between the state and federal courts.

The Supreme Court in Dura Pharm., Inc. v. Broudo, 544 U.S. 336 (2005), instructs that lower courts in federal securities fraud cases must seek guidance in "traditional elements of causation and loss," id. at, 346, derived from "common-law deceit and misrepresentation actions," id. at, 343. See also Merrill Lynch & Co. v. Alleghany

Energy Inc., 500 F.3d 171 (2d Cir. 2007) (reaffirming the use of proximate cause principles in securities fraud cases).

1233

CHAPTER 22 INTERFERENCE WITH ADVANTAGEOUS RELATIONSHIPS

1. Business Relations

(A) Injurious Falsehood

Ratcliffe v. Evans

Court of Appeal, 1892.

[1892] 2 Q.B. 524.

[Plaintiff alleged that he and his father had carried on the business of engineer and boiler maker for many years under the name Ratcliffe & Sons, that the father died but plaintiff carried on the business and that defendant, publisher of the County Herald, "falsely and maliciously" published "certain words" importing "that the plaintiff had ceased to carry on his business ***and that the firm of Ratcliffe & Sons did not then exist."]

BOWEN, L.J. This was a case in which an action for a false and malicious publication about the trade and manufactures of the plaintiff was tried at the Chester assizes, with the result of a verdict for the plaintiff for 120l. Judgment having been entered for the plaintiff for that sum and costs, the defendant appealed to this Court for a new trial, or to enter a verdict for the defendant, on the ground, amongst others, that no special damage, such as was necessary to support the action, was proved at the trial. The injurious statement

complained of was a publication in the County Herald, a Welsh newspaper. It was treated in the pleadings as a defamatory statement or libel; but this suggestion was negatived, and the verdict of the jury proceeded upon the view that the writing was a false statement purposely made about the manufactures of the plaintiff, which was intended to, and did in fact, cause him damage. The only proof at the trial of such damage consisted, however, of evidence of general loss of business without specific proof of the loss of any particular customers or orders, and the question we have to determine is, whether in such an action such general evidence of damage was admissible and sufficient. That an action will lie for written or oral falsehoods, not actionable per se nor even defamatory, where they are maliciously published, where they are calculated in the ordinary course of things to produce, and where they do produce, actual damage, is established law. Such an action is not one of libel or of slander, but an action on the case for damage wilfully

and intentionally done without just occasion or excuse, analogous to an action for slander of title. To support it, actual damage must be shown, for it is an action which only lies in respect of such damage as has actually occurred. It was contended before us that in such an action it is not enough to allege and prove general loss of business arising from the publication, since such general loss is general and not special damage, and special damage, as often has been said, is the gist of such an action on the case.

In an action like the present, brought for a malicious falsehood intentionally published in a newspaper about the plaintiff's business--a falsehood which is not actionable as a personal libel, and which is not defamatory in itself--is evidence to shew that a general loss of business has been the direct and natural result admissible in evidence, and, if uncontradicted, sufficient to maintain the action? In the case of a personal libel, such general loss of custom may unquestionably be alleged and proved. Every libel is of itself a wrong in regard of which the law, as we have seen, implies general damage. By the very fact that he has committed such a wrong, the defendant is prepared for the proof that some general damage may have been done. ***"It is not special damage, [c] it is general damage resulting from the kind of injury the plaintiff has sustained." [C]

In the case before us to-day, it is a falsehood openly disseminated through the press--probably read, and possibly acted on, by persons of whom the plaintiff never heard. To refuse with reference to such a subject-matter to admit such general evidence would be to ***involve an absolute denial of justice and of redress for the very mischief which was intended to be committed. ***

Appeal dismissed.

NOTES AND QUESTIONS

1. This is the leading case giving sufficient scope to the "action on the case for words" to justify the use of the term "injurious falsehood"--a name suggested by Sir John Salmond in his treatise on Torts. Earlier cases had involved "slander of title" or "trade libel," which had developed as isolated torts of a limited scope. Sometimes

they were joined together and the term "disparagement" was used. "Injurious falsehood" now denotes a broad general principle of liability for any false and malicious statement resulting in pecuniary loss to another. The principle is generally recognized at the present time, but the courts have been slow to adopt the name.

2. The elements necessary to the cause of action usually include:

A. A false statement of a kind calculated to damage a pecuniary interest of the plaintiff.

B. Publication to a third person.

C. "Malice" in the publication. As in Defamation, this element has received close treatment and has caused about as much confusion.

D. Resulting special damage to the plaintiff, in the form of pecuniary loss.

3. The following are illustrations of the broader scope of injurious falsehoods: Statements that the plaintiff is dead or is not in business or is going out of business. Davis v. New England Railway Pub. Co., 203 Mass. 470, 89 N.E. 565 (1909); McRoberts Protective Agency, Inc. v. Lansdell Protective Agency, Inc., 61 A.D.2d 652, 403 N.Y.S.2d 511 (1978). Or that he does not deal in certain goods. Jarrahdale Timber Co. v. Temperley & Co., 11 T.L.R. 119 (1894). Or that another similar business is "unique," the only one in existence. Dale System v. Time, Inc., 116 F. Supp. 527 (D. Conn. 1953). Or that plaintiff is employed by defendant, as a result of which he loses an independent sale and a commission. Balden v. Shorter, [1933] Ch. 427 (defining injurious falsehood as a false statement made with

respect to any person which induces other persons to act in a manner which causes loss to him). See also Gale v. Ryan, 263 A.D. 76, 31 N.Y.S.2d 732 (1941); and Penn- Ohio Steel Corp. v. Allis-Chalmers Mfg. Co., 7 A.D.2d 441, 184 N.Y.S.2d 58 (1959) (defendant made false reports to Internal Revenue of payments made to plaintiff, as a result of which plaintiff had income-tax trouble); Al Raschid v. News Syndicate Co., 265 N.Y. 1, 191 N.E. 713 (1934) (defendant gave false information that plaintiff was not a citizen, subjecting him to deportation proceedings); Bartlett v. Federal Outfitting Co., 133 Cal.App. 747, 24 P.2d 877 (1933) (forged assignment of wages presented to an employer, in consequence of which the employee was discharged); Owens v. Mench, 81 Pa. D. & C. 314 (1953) (false report of a physician on a worker's injury necessitated suit to recover workers' compensation); and Cooper v. Weissblatt, 154 Mise. 522, 277 N.Y.S. 709 (1935) (false statements to church authorities forced the plaintiff to defend a suit).

4. Special Damage. Pleading and proof of special damage are held to be essential to any cause of action for injurious falsehood. Personal elements of damage such as mental distress, which are recoverable for defamation, are not sufficient to sustain this action.

5. When the damages claimed consist only of loss of prospective contracts or customers, the older and still prevailing rule is that the plaintiff must identify the particular customers who have refrained from dealing with him, and specify the transactions of which he claims to have been deprived. Wilson v. Dubois, 35 Minn. 471, 29 N.W. 68 (1886). It is not enough merely to show a general decline in plaintiffs business following the false publication. HipSaver, Inc. v. Kiel, 464 Mass. 517, 984 N.E.2d 755 (2013) (Manufacturer of hip-

protection device brought action alleging claim of commercial disparagement against physician who had written a medical journal article concluding that such devices were not effective in preventing hip fractures among nursing home residents. Court found for defendant because plaintiff failed to show it had a reasonable expectation of proving the elements of the claim, one of which was proving it suffered pecuniary loss from the publication). Amerinet, Inc. v. Xerox Corporation, 972 F.2d 1483 (8th Cir.1992), cert, denied, 506 U.S. 1080 (1993); but cf. Imperial Developers, Inc. v. Seaboard Surety Co., 518 N.W.2d 623 (Minn.App.1994) (finding Amerinet not persuasive because it did not distinguish between

product and business disparagement; the former is not actionable per se while the latter is). Pecuniary Loss is defined in Restatement (Second) of Torts § 633 (1977).

6. The modern tendency, deriving from the principal case, is to require the plaintiff to be specific only when it is reasonable to expect him to do so, and to allow recovery for a general decline in business if all other reasonably possible causes are excluded. Thus in Craig v. Proctor, 229 Mass. 339, 118 N.E. 647 (1918), a general allegation in the complaint was upheld, but it was said that the defendant might compel the plaintiff to furnish before trial such information as he had. If it is impracticable to prove specific losses, as is often the case, a plaintiff may adduce sufficient evidence by using detailed statistical and expert proof to exclude the influence of other factors causing the loss of general business. Teilhaber Manufacturing Company v. Unarco Materials Storage, 791 P.2d 1164 (Colo. App. 1989), cert,

denied by the Colorado Court of Appeals, 803 P.2d 517 (1991). The American Law Institute announced in 2019 that it is beginning work on the Restatement (Third) of Torts: Defamation and Privacy. The Restatement will include "business disparagement". The project commencing in 2020 promises to bring clarity and order to a cluttered corner of law.

Slander of Title

Horning v. Hardy

Court of Special Appeals of Maryland, 1977.

36 Md.App. 419, 373 A.2d 1273.

["The Hardys" filed suit in trespass and ejectment against "the Hornings," claiming that they owned certain real property that the Hornings were developing. The Hornings filed a counterclaim seeking to recover damages on the two bases of slander of title and tortious interference with contract. The trial court held for the Hornings on the initial suit and for the Hardys on the counterclaim, thus allowing neither party to recover. This court agrees with the holding in the suit for trespass and ejectment, on the ground that the Hardys had failed to establish ownership through either deed descriptions or adverse possession.

On the counterclaim, the trial court regarded slander of title and interference with contract as raising the same issues and analyzed the case in terms of slander of title. The Hornings were developing land in the disputed area and had one house ready for sale. On the morning of the settlement, a phone call from the Hardys' attorney advised the parties to the settlement that the Hardys had filed suit

claiming ownership on the previous day. The settlement "was immediately aborted and no sales or settlements have been consummated since that day."]

LISS, Judge. ***Prosser ***suggests that the tort we are here discussing has been incorrectly designated as "slander of title." Such nomenclature derives from the earliest cases--decided before 1600--

where it applied primarily to oral aspersions on the plaintiff's ownership of land, which aspersions prevented the owner from leasing or selling the land. Prosser points out that from the beginning the tort was recognized as being only loosely allied to defamation of the person and was considered instead to be an action on the case for the special damage resulting from the defendant's interference. As the years progressed, the tort was expanded to include written aspersions on property, whether land or personalty, and the disparagement of the quality of property. The tort has, therefore, been known as "disparagement of property," "slander of goods," and "trade libel." ***

A ***valuable contribution to the clarification of the tort in Maryland was made by Judge Wilson K. Barnes in the case of Beane v. McMullen, 265 Md. 585, 291 A.2d 37 (1972). Quoting extensively from Prosser, Judge Barnes said:

"Injurious falsehood or disparagement, then, may consist of the publication of matter derogatory to the plaintiff's title to his property, or its quality, or to his business in general, or even to some element of his personal affairs, of a kind calculated to prevent others from dealing with him, or otherwise to interfere with his relations with

others to his disadvantage. The cause of action founded upon it resembles that for defamation, but differs from it materially in the greater burden of proof resting on the plaintiff, and the necessity for special damage in all cases. The falsehood must be communicated to a third person, since the tort consists of interference with the relation with such persons. But the plaintiff must plead and prove not only the publication and its disparaging innuendo, as in defamation, but something more. There is no presumption, as in the case of personal slander, that the disparaging statement is false, and the plaintiff must establish its falsity as a part of his cause of action. Although it has been contended that there is no essential reason against liability where even the truth is published for the purpose of doing harm, the policy of the courts has been to encourage the publication of the truth, regardless of motive.

"In addition, the plaintiff must prove in all cases that the publication has played a material and substantial part in inducing others not to deal with him, and that as a result he had suffered special damage. ***

"There is liability when the defendant acts for a spite motive, and out of a desire to do harm for its own sake; and equally so when he acts for the purpose of doing harm to the interests of the plaintiff in a manner in which he is not privileged so to interfere. There is also liability when the defendant knows that what he says is false, regardless of whether he has an ill motive or intends to affect the plaintiff at all. The deliberate liar must take the risk that his statement will prove to be economically damaging to others; and there is something like the 'scienter' found in an action of deceit. Any of these three is sufficient to constitute 'malice' and support the action.

But in the absence of any of the three there is no liability, where the defendant has made his utterance in good faith, even

1238

though he may have been negligent in failing to ascertain the facts before he made it." Id. at 607-09, 291 A.2d at 49.

***

[S]tate law [adopts] the standard of negligence as set forth in Restatement (Second) of Torts, § 580B (Tentative Draft #21, 1975), which states that liability may accrue only if the defendant a) knows that the statement is false and that it defames the other, b) the defendant acts in reckless disregard of these matters, or c) acts negligently in failing to ascertain them. The opinion further held that the quantum of proof required of the plaintiff was the usual negligence standard of the preponderance of the evidence.

In the case here being considered, there is one further complicating factor: the assertion of a qualified privilege by the appellees. Prosser ***states the privilege to be as follows: "If [the defendant] has a present, existing economic interest to protect, such as the ownership or condition of property ***he is privileged to prevent performance of the contract of another which threatens it; and for obvious reasons of policy he is likewise privileged to assert an honest claim, or bring or threaten a suit in good faith, to exercise the right of petition to public authorities or to settle his own case out of court."

Further justification for the recognition of the conditional privilege is stated in 1 Harper and James, The Law of Torts, § 6.2 (1956): "If, knowing that another is offering or about to offer land or other thing

for sale as his own, he fails to take advantage of a readily available opportunity to inform the intending purchaser, or those likely to become purchasers, as where the sale is by auction, of his claim to the thing, he may preclude himself from afterwards asserting it against the purchaser. Therefore, he must be permitted without fear of liability to protect the enforceability of his claim by asserting it before the purchase is made."

*Jacron [Sales Co., Inc. v. Sindorf, 276 Md. 580, 350 A.2d 688 (1975),] makes it clear that the adoption of the negligence standard of fault in defamation cases does not make obsolete the defense of conditional privilege. In a case where a common law conditional privilege is asserted and found as a matter of law to exist, "the negligence standard of Gertz [v. Welch, 418 U.S. 323 (1974)] is logically subsumed in the higher standard for proving malice, reckless disregard as to truth or falsity * * Id. at 600, 350 A.2d at 700. If the plaintiff, faced with a conditional privilege, is unable to prove the malice necessary to overcome that defense, the proof of the lesser standard of negligence would not permit a recovery. [C] In conditional privilege cases, the privilege may be lost either by proof of "constitutional malice" in the form of reckless disregard for truth or falsity or knowing falsehood or by proof of common law malice in the form of spite or ill-will.

The question of whether a conditional privilege exists is a matter of law for the court. Whether the privilege has been abused or forfeited by

malice is a question of fact for the trier of the facts. [C] The trial court found as a matter of law that the interference by Hardy with the Hornings' title was privileged. It concluded that the "original plaintiffs asserted an honest claim to the land in question which they had reason to believe was part of their property and they therefore had a present economic interest to protect." We hold this conclusion to be correct ***.

Appellants urge strenuously that the failure of the appellees to act in good faith to verify the boundaries of the land which they claimed and in their failure to secure expert opinion as to the validity of their claim is evidence of a reckless disregard for the truth. This contention ignores, however, our holding in Kapiloff [v. Dunn, 27 Md.App. 514, 343 A.2d 251 (1975)], where we said:

"Although the test for reckless disregard does not avail itself of easy application, one point is clear: mere failure to investigate, in and of itself, is not sufficient evidence under the New York Times privilege. ***Since failure to investigate cannot satisfy the constitutional test of reckless disregard, we cannot perceive how mere failure to seek assistance of educational experts, without more, could satisfy that standard." ***

The trial court found as a fact that there was no abuse of the conditional privilege and we find no plain error in its conclusions. ***

Judgments affirmed.

NOTES AND QUESTIONS

1. Slander of title was the first form of injurious falsehood. See, e.g., Gerard v. Dickinson, Cro. Eliz. 196, 76 Eng. Rep. 903 (1590), a case

remarkably similar to the principal case, except it was alleged the defendant knew her claim to the castle was based on forgery.

2. Any type of legally protected property interest that can be sold may be the subject of disparagement, including remainders, leases, mineral rights, trademarks, copyrights, patents, corporate shares and literary productions. A common form of "slander of title" is the assertion, as by filing for record, of a false claim to a mortgage or other lien on the property. See, e.g., Wharton v. Tri-State Drilling & Boring, 175 Vt. 494, 824 A.2d 531 (2003), where defendant mistakenly drilled on plaintiffs property and then levied a mechanic's lien on the property in order to force plaintiff to grant a well easement to defendant.

3. Privileges. It appears that any absolute or qualified privilege that applies to defamation under the common law applies also to injurious falsehood. Whenever the defendant is privileged to publish a false statement that is personally defamatory, he must be no less privileged to publish one that is not. See Davis v. Union State Bank, 137 Kan. 264, 20 P.2d 508 (1933) (absolute privilege for statements in pleading filed); Bearce v. Bass, 88 Me. 521, 34 A. 411 (1896) (criticism of public building as badly constructed); Mack, Miller Candle Co. v. Macmillan Co., 239 App. Div. 738, 269 N.Y.S. 33 (1934), aff'd, 266 N.Y. 489, 195 N.E. 167 (1934) (report of judicial proceeding). But see Hatch Cos. Contracting v. Arizona Bank, 170 Ariz. 553, 826 P.2d

1179 (Ariz. Ct. App. 1991); Palmer v. Zaklama, 109 Cal. App. 4th 1367, 1 Cal.Rptr.3d 116 (2003) (State legislatures changed this

common law rule by statute. Thereby, if a lis pendens is filed with respect to an action that does not affect title to real property, the lis pendens is groundless and is not subject to judicial privilege.).

4. The defendant has a qualified privilege to protect his own interests by the assertion of a bona fide claim to any kind of property. This includes, for example, an assertion that plaintiff is infringing defendant's patent, copyright or trademark rights by the sale of his product. Oil Conservation Engineering Co. v. Brooks Engineering Co., 52 F.2d 783 (6th Cir. 1931); Alliance Securities Co. v. De Vilbiss, 41 F.2d 668 (6th Cir. 1930). The privilege is, however, qualified and is defeated if defendant's motive is shown to be actual malice, as motivated by a desire to do harm. Sinclair Ref. Co. v. Jones Super Service Station, 188 Ark. 1075, 70 S.W.2d 562 (1934); A.B. Farquhar Co. v. National Harrow Co., 102 Fed. 714 (3d Cir. 1900). It is also defeated if the defendant has acted in bad faith, as where it is found that he did not honestly believe his assertions to be true. Hopkins v. Browne, 21 R.I. 20, 41 A. 567 (1898); Ezmirlian v. Otto, 139 Cal. App. 486, 34 P.2d 774 (1934).

Like other qualified privileges, the defendant will be liable for excessive publication to persons whom it is not reasonably necessary to reach or if he includes statements that he knows to be untrue. Donovan v. Wilson Sporting Goods Co., 285 F.2d 714 (1st Cir. 1961). Similarly, privilege has been afforded to defendants who disseminate truthful information. See Liebe v. City Fin. Co., 98 Wis.2d 10, 17, 295 N.W.2d 16, 20 (Ct. App. 1980); and see Walnut St. Assocs. v. Brokerage Concepts, Inc., 20 A.3d 468, 478 (2011). Many of these cases had adopted the rule in the Restatement

(Second), but the Restatement (Third) of Torts: Liability for Economic Harm § 19 (2020) has reaffirmed this privilege.

Goods and Trade

More common, and controversial is the application of the disparagement tort to goods and trade. An early instance of trade disparagement is Dickes v. Fenne, March N.R. 59, 82 Eng. Rep. 411 (1639) ("Defendant having communication with some of the Customers of the Plaintiff, who was a Brewer, said. That he would give a peck of malt to his mare and she should pisse as good beare as Dickes doth Brew"; no recovery because no allegation of special damages).

In Bose Corp. v. Consumers Union of United States, Inc., 466 U.S. 485 (1984), the Supreme Court entertained an action by Bose against the defendant's magazine "Consumer Reports" commenting adversely on Bose's 901 speakers. The court applied the reasoning derived from New York Times in deciding that, since Bose was a public figure, it had the burden of showing "actual malice" by "clear and convincing proof' and that an appellate court must exercise independent judgment on this issue. This displaced the usual standard that findings of fact shall not be set aside unless "clearly erroneous."

It remains unclear how far constitutional jurisprudence will influence the action for disparagement of a product. The Supreme Court in Central

Hudson Gas and Elec. Corp. v. Public Serv. Comm'n of N.Y., 447 U.S. 557 (1980), and in 44 Liquormart, Inc. v. Rhode Island and Rhode Island Liquor Stores Ass'n, 517 U.S. 484 (1996), has clarified the extent to which the state may regulate advertising. Bans on truthful, nonmisleading information require the state to show that they promote a legitimate state interest which alleviates a real harm "to a material degree." Edenfield v. Fane, 507 U.S. 761, 771 (1993).

This standard has even been extended to attorney advertisements. See Ibanez v. Fla. Dep't of Bus. & Prof'l Regulation, 512 U.S. 136 (1994) (striking down sanctions prohibiting an attorney from listing accounting credentials in advertisements for her services); see also Florida Bar v. Went for It, 515 U.S. 618, 630 (1995) (upholding a 30-day restriction on targeted solicitation of accident victims on lawyer advertising because it protected the "personal privacy and tranquility of... citizens from crass commercial intrusion by attorneys upon their personal grief in times of trauma.") Liability under a disparagement action will tend to promote the reliability and accuracy of information, and unlike the regulation in Central Hudson and 44 Liquormart, it does not, by its intent, suppress truthful and nonmisleading commercial messages.

As in defamation, however, this liability may chill the production of information. Political and commercial speech both attract First Amendment scrutiny and the disparagement action is therefore subject to examination under New York Times. Reinforcing the constitutional focus is the Supreme Court's opinion in Sorrell v. IMS Health Inc., 564 U.S. 552 (2011), wherein data miners compiled and sold information about prescription habits of physicians. Vermont attempted to regulate this practice, arguing that it was detrimental to

physicians' faithfulness to patients and privacy. The Court struck down the provision as violative of plaintiffs' First Amendment rights in commercial speech. By focusing on the content of the message, the assertion of the state interest could not stand against the merits of a market in this truthful information. But the state has an interest in consumer protection and regulating speech. Mass. Ass'n of Private Career Sch. v. Healey, 159 F. Supp.3d 173 (2016) distinguishing Sorrell). To punish criminally the publication of false information, as in falsely claiming to have been awarded military decorations, without more, does not pass muster under the First Amendment that exalts free speech against all others. U.S. v. Alvarez, 567 U.S. 183 (2012). The tort however, in its requirement, not only of falsity, but also of harm caused, is distinguishable and within the exceptions enumerated by the Court's majority.

Intentional Infliction of Harm and Causation

Injurious falsehood requires malice involving a showing of knowledge that the statement was false, or intent to harm the plaintiff or affect his interests in an unprivileged manner. Prosser, Injurious Falsehood: The Basis of Liability, 59 Colum. L. Rev. 425 (1959). See Advance Music Corp. v. American Tobacco Co., 296 N.Y. 79, 70 N.E.2d 401 (1946) (sufficient to allege that defendants "wantonly caused damage to the plaintiff by a system of conduct [that] warrants an inference that they intend harm of that type"); Remick Music Corp. v. American Tobacco Co., 57 F. Supp. 475 (S.D.N.Y.

1944) ("defendants deliberately and wilfully indulged in such unfairness"); Dale System v. General Teleradio, 105 F. Supp. 745 (S.D.N.Y. 1952) ("intentional publication for the sake of injuring the plaintiff'). The harm identified must have been either intended or the "natural and probable," or direct, result of the publication of the false statement. Gilliam v. Richard M. Greenspan, P.C., 793 N.Y.S.2d 526, 527 (App. Div. 2005) ("plaintiff failed to raise a triable issue of fact that the defendants made false statements, maliciously and with the intent to harm her"); Fowler v. Curtis Publ'g Co., 86 U.S. App. D.C. 349, 182 F.2d 377, 379 (1950) (finding the plaintiff failed to show that special damages were the natural and direct result of the false publication); Gillon v. Bernstein, 218 F. Supp. 3d 285, 299 (D.N.J. 2016) (requiring plaintiff to show that such a loss in its sales was the natural and probable result of defendant's publication).

Relationship of Injurious Falsehood to Defamation

The wellspring of the tort is deceit, although most attention has been devoted to its overlap with defamation. The same statement may both defame a person and disparage the goods he sells. See Hatchard v. Mege, 18 Q.B.D. 771 (1887). The distinction drawn by the courts is that if the statement made reflects only upon the quality of what the plaintiff has to sell, or the character of his business as such, it is merely injurious falsehood, and proof of special damage is essential to the cause of action. Evans v. Harlow, 5 Q.B. 624 (1844); National Refining Co. v. Benzo Gas Motor Fuel Co., 20 F.2d 763 (8th Cir. 1927); U.S. Healthcare, Inc. v. Blue Cross of Greater Philadelphia, 898 F.2d 914 (3d Cir. 1990). On the other hand, if the

statement imputes to the plaintiff reprehensible personal characteristics or misconduct, it is regarded as defamation. Merle v. Sociological Research Film Corp., 166 App. Div. 376, 152 N.Y.S. 829 (1915) (defendant filmmaker implied that plaintiff factory owner was connected to "white slave traffic"); Kilpatrick v. Edge, 85 N.J.L. 7, 88 A. 839 (1913) (misconduct in a Turkish bath). In appropriate circumstances, if injurious falsehood is established, an injunction may be granted; but cf. defamation. Restatement (Second) of Torts § 626 comment b (1977); Restatement (Second) of Torts § 942 comment e (1979).

Testing Systems, Inc. v. Magnaflux Corp.

United States District Court, Eastern District of Pennsylvania, 1966.

251 F. Supp. 286.

[Plaintiff and defendant were competing manufacturers of equipment, devices and systems for use in testing industrial and commercial materials. The complaint alleged that defendant circulated to plaintiffs current and prospective customers a false report to the effect that the United States Government had tested plaintiffs product and found it to be only about 40% as effective as that of the defendant. Plaintiff also claimed that at a manufacturers' convention in Philadelphia defendant's agent, in the presence of plaintiffs current and prospective customers, "did in a loud voice state that ***[plaintiff s] ***stuff is no good," and that "the government is throwing [it] out."]

LORD, District Judge. This is an action for trade libel or disparagement of property. ***The matter is now before this Court on defendant's motion to dismiss for failure to state a claim upon which relief can be granted.

For the purposes of this motion, defendant admits the truth of the allegation, but asserts that the action must nevertheless be dismissed because (1) the defendant did no more than make an unfavorable comparison of plaintiff's product with its own; and (2) even assuming that the statements were actionable, plaintiff has failed to allege his damages with the required specificity. ***

It would serve no useful purpose to dwell at length on the issue of unfavorable comparison. Suffice it to say, as the defendant properly points out, that a statement which takes the form of an unfavorable comparison of products, or which "puffs" or exaggerates the quality of one's own product is not ordinarily actionable. [Cc] This has long been the rule in England, where the action originated, and is now well established in the vast majority of United States jurisdictions. [Cc]

However, this Court is not convinced by the defendant's arguments that his comments amounted to mere unfavorable comparison. The modern history of the doctrine of unfavorable comparison and its permissible use in the conduct of business traces its origin to the leading English case of White v. Mellin [1895] A.C. 154. There the defendant had advertised his product as being far more healthful than plaintiffs. In refusing relief the Court established the precedent that irrespective of their truth or falsity, statements by one competitor which compare his product with that of another are not actionable.

It does not follow from this, however, that every trade disparagement is protectible under the guise of unfavorable comparison merely because the perpetrator was canny enough to mention not only the product of his competitor but also his own. The decision in White v. Mellin, supra, was founded on the near impossibility of ascertaining the truth or falsity of general allegations respecting the superiority of one product over another. To decide otherwise, explained Lord Herschell, would turn the courts "into a machinery for advertising rival productions by obtaining a judicial determination [as to] which of the two was better. [C] One is expected to believe in the superiority of his wares, and he may properly declare his belief to interested parties. It has even been said that he may 'boast untruthfully of his wares.'" Phila. D. Prod. v. Quaker City I. Co., 306 Pa. 164, 172, 159 A. 3 (1932). ***

The fine line that separates healthy competitive effort from underhanded business tactics is frequently difficult to determine. Apart from the tradesman's right of free speech, which must be vigorously safeguarded, the public has a genuine interest in learning the relative merits of particular products, however that may come about. ***

1244

Nonetheless, there is an outer perimeter to permissible conduct. The tradesman must be assured that his competitors will not be suffered to engage in conduct which falls below the minimum standard of fair dealing. "[I]t is no answer that they can defend themselves by also resorting to disparagement. A self-respecting business man will not voluntarily adopt, and should not be driven to adopt, a selling method

which he regards as undignified, unfair, and repulsive. A competitor should not, by pursuing an unethical practice force his rival to choose between its adoption and the loss of his trade." Wolfe, Unfair Competition, 47 Yale L.J. 1304, 1334--35 (1938).

The defendant's comments in the case presently before this Court do not entitle him to the protection accorded to "unfavorable comparison." There is a readily observable difference between saying that one's product is, in general, better than another's ***and asserting, as here, that such other's is only 40% as effective as one's own. The former, arguably, merely expresses an opinion, the truth or falsity of which is difficult or impossible of ascertainment. The latter, however, is an assertion of fact, not subject to the same frailties of proof, implying that the party making the statement is fortified with the substantive facts necessary to make it. This distinction has never been seriously questioned. See, e.g., Restatement, Torts, §§ 626, 627, 628. The defendant in this case admittedly circulated to plaintiffs present and prospective customers false statements to the effect that the government had tested both products and found the defendant's to be 60% more effective than plaintiffs. This is not the sort of "comparison" that courts will protect.

Apart from this, there is at least one additional factor which withdraws the defendant's comments from the category of unfavorable comparison. Not content with making the admittedly false statements and allowing them to be evaluated independently of any extraneous influence, the defendant here gave added authenticity to its assertions, by invoking the reputation of a third party, the United States Government. It is unnecessary to speculate on the additional force the defendant's remarks must have had when

coupled with the purported approval of so highly credible a source. This, of course, is to say nothing of the statements to the effect that plaintiff had been "thrown out," which by no stretch of the imagination could be termed mere comparison.

For all of the above reasons, it is the judgment of this Court that the defendant's remarks are actionable.

NOTES AND QUESTIONS

1. How does this case compare with Vulcan Metals Co. v. Simmons Mfg. Co., supra page 1218?

2. The competitor's "puffing" privilege permits statements of comparison, that the defendant's goods are the best in the market, that they are better than the plaintiffs, or other boasting or exaggeration, even though

the defendant is fully aware that what he says is false, and the publication is made for the purpose of injuring the plaintiff by taking business away from him. One of the leading cases is White v. Mellin, [1895] A.C. 154, where the defendant sold packages of plaintiffs baby food with a wrapper affixed to them which stated that defendant's was better. This was held to be privileged. In this respect, there is an obvious difference from personal defamation, which would not be privileged under the same circumstances.

3. Competition for business does not, however, justify intentional false statements of fact concerning the competitor's business or product when the statements are not confined to comparing the product or conduct of the competitor with that of the plaintiff. Unfair

competition is not privileged. U.S. Healthcare, Inc. v. Blue Cross of Greater Philadelphia, 898 F.2d 914 (3d Cir. 1990); Hopkins Chemical Co. v. Read Drug & Chemical Co., 124 Md. 210, 92 A. 478 (1914). Consider a commercial some of you may have viewed during the NFL's Superbowl LIII, 2019 in which Anheuser-Busch sought to advertise its Bud Light brand comparing it to its rivals Miller Lite and Coors Light made by MillerCoors. The Bud Light King is told it has a very large barrel of Corn Syrup along with other barrels of Barley and other ingredients used in the fermentation of beer. He orders the barrel be taken to the Miller Lite Kingdom where they use corn syrup. After an arduous journey, the barrel arrives at the Miller Lite castle but is told it already has a supply but that King of Coors also uses the product. The campaign may be said to rely on a consumer confusion between corn syrup and high fructose corn syrup that has a negative reputation among a large segment of the population and that the syrup is used to aid the fermentation process and does not remain in the beer itself. In the case, MillerCoors pleaded violations of the Lanham Act, 15 U.S.C. § 1125(a) and § 1125(c). MillerCoors, LLC v. Anheuser-Busch Cos., LLC, 2019 U.S. Dist. LEXIS 88259, at 3* (W.D. Wis. May 24, 2019). Could an action have been pleaded at common law?

Sometimes the courts have been reluctant to construe an assertion as a misstatement of fact. Thus in Nonpareil Cork Mfg. Co. v. Keasbey & Mattison Co., 108 Fed. 721 (E.D. Pa. 1901), a statement that cork covering for steam pipes was a "fraud" was held to be "really but the expression of an unfavorable opinion of the goods" of its competitor. See also Dairy Stores, Inc. v. Sentinel Pub. Co., 104 N.J. 125, 516 A.2d 220 (1986) (applying the distinction between fact

and opinion in defamation law). But such expressions are not uncommon among rivals in trade, and their correctness in each instance is for determination by those whose custom is sought, and not by the courts. Is the standard too tolerant of commercial conduct that misleads consumers in the modern marketplace? See Hayden, A Goodly Apple Rotten at the Heart: Commercial Disparagement in Comparative Advertising as Common Law Tortious Unfair Competition, 76 Iowa L. Rev. 67 (1990).

1246

(B) Interference with Existing or Prospective Contractual Relations

Lumley v. Gye

Queen's Bench, 1853.

2 El. & Bl. 216, 118 Eng.Rep. 749.

[The declaration alleged: Plaintiff, manager of the Queens Theatre for performing operas, contracted with Johanna Wagner for her to perform in his theatre for a designated time. She agreed not to perform elsewhere during the contract term. Defendant, "knowing the premises and maliciously intruding to injure plaintiff ***, enticed and procured Wagner to refuse to perform." Defendant demurred.]

ERLE, J. The question raised upon this demurrer is, Whether an action will lie by the proprietor of a theatre against a person who maliciously procures an entire abandonment of a contract to perform exclusively at that theatre for a certain time; whereby damage was sustained? And it seems to me that it will. The authorities are

numerous and uniform, that an action will lie by a master against a person who procures that a servant should unlawfully leave his service. The principle involved in these cases comprises the present; for, there, the right of action in the master arises from the wrongful act of the defendant in procuring that the person hired should break his contract, by putting an end to the relation of employer and employed; and the present case is the same. If it is objected that this class of actions for procuring a breach of contract of hiring rests upon no principle, and ought not to be extended beyond the cases heretofore decided, and that, as those have related to contracts respecting trade, manufactures, or household service, and not to performance at a theatre, therefore they are no authority for an action in respect of a contract for such performance; the answer appears to me to be, that the class of cases referred to rests upon the principle that the procurement of the violation of the rights is a cause of action, and that, when this principle is applied to a violation of a right arising upon a contract of hiring, the nature of the service contracted for is immaterial.

It is clear that the procurement of the violation of a right is a cause of action in all instances where the violation is an actionable wrong, as in violations of a right to property, whether real or personal, or to personal security: he who procures the wrong is a joint wrongdoer, and may be sued, either alone or jointly with the agent, in the appropriate action for the wrong complained of. ***He who maliciously procures a damage to another by violation of his right ought to be made to indemnify; and that, whether he procures an actionable wrong or a breach of contract. He who procures the non-delivery of goods according to contract may inflict an injury, the same

as he who procures the abstraction of goods after delivery; and both ought on the same ground

1247

to be made responsible. The remedy on the contract may be inadequate * w it

The result is that there ought to be, in my opinion, judgment for the plaintiff.

[The concurring opinion of CROMPTON, J., and dissenting opinion of Coleridge, J., are omitted.]

NOTES AND QUESTIONS

1. The companion case of Lumley v. Wagner, 1 De G.M. & G. 604, 42 Eng. Rep. 687 (1852), a landmark in the law of equitable relief, affirmed injunctions preventing Miss Wagner from breaking the negative covenant in her contract with Lumley by singing for Gye at Covent Garden or elsewhere during the period of her contractual obligation to Lumley. This was a battle in a long war between Lumley and Gye, rival London impresarios. Johanna Wagner, a cantatrice to the King of Prussia and niece of Richard Wagner, finally returned to the London stage five years later, but London audiences were deprived of her voice at its zenith.

2. The principle announced in this case was at first received with a great deal of hesitation and disapproval, but was reaffirmed almost thirty years later in Bowen v. Hall, 6 Q.B.D. 333 (1881). In the United States, the use of "malice" became the touchstone for determining liability for tortious interference with contract. See Wal-Mart Stores, Inc. v. Sturges, 52 S.W.3d 711, 717 (Tex. 2001). But by degrees the

principle was extended--first to contracts other than those for personal services, and then to a holding that ill-will on the part of the defendant was not essential to the tort. Another landmark case, Temperton v. Russell [1893] 1 Q.B. 715 (Eng.), extended liability for tortious interference with prospective relations that had not yet produced a contract. See Restatement (Third) of Torts: Liability for Economic Harm § 17 (2020), Reporter's Note b. It was after the extension to interference with prospective relationships that the line blurred between the two torts, which finally ended in California with Della Penna v. Toyota Motor Sales, U.S.A., Inc., 902 P.2d 740 (Cal. 1995) (below) and Korea Supply Co. v. Lockheed Martin Corp., 63 P.3d 937 (Cal. 2003), which clearly distinguished between interference with a complete contract and with prospective contractual relations (discussed below).

3. Defendant's tortious conduct is not confined to inducing the third person to break the contract. It may apply to other means of preventing the third person from performing. See, e.g., Phez Co. v. Salem Fruit Union, 103 Or. 514, 205 P. 970 (1922) (D refused to carry out his contract to supply goods to T, to prevent T from supplying them to P).

4. Plaintiff must prove defendant knew of the contract. Imperial Ice Co. v. Rossier, 18 Cal.2d 33, 112 P.2d 631 (1941); Continental Research, Inc. v. Cruttenden, Podesta & Miller, 222 F. Supp. 190 (D. Minn. 1963) (circumstantial evidence of knowledge); Mid-Continent Tel. Corp. v. Home Tel. Co., 319 F. Supp. 1176 (N.D. Miss. 1970) (reason to know and reasonable ignorance).

5. A third party beneficiary will be able to recover in tort for interference with the contract if he could have recovered in an action on the contract. Reynolds v. Owen, 34 Conn. Sup. 107, 380 A.2d 543 (1977).

6. If the third party has already breached the contract or decided to do so, and offers to contract with the defendant, defendant has not induced the breach. See Middleton v. Wallichs Music & Entertainment Co., 24 Ariz.App. 180, 536 P.2d 1072 (1975); Northern Wis. Co-op. Tobacco Pool v. Bekkedal, 182 Wis. 571, 197 N.W. 936 (1924).

7. Does the tort interfere with the freedom of a party to a contract to breach and pay contract damages as a result? The theory of efficient breach holds that the freedom to breach and recontract more favorably, allows resources to be allocated to a higher valued use. Perlman, Interference with Contract and Other Economic Expectancies: A Clash of Tort and Contract Doctrine, 49 U. Chi. L. Rev. 61 (1982), formulates the tort to avoid this flouting of the efficiency goal of contract law.

But the contracts to which the tort applies are relational contracts--employment, leases, professional, and long-term business relationships--where the goal of efficient breach is remote and the goal of maintenance of cooperation more important. Thus, the question is whether the tort supports that relational goal. See BeVier, Reconsidering Inducement, 76 Va. L. Rev. 877 (1990) (viewing the tort as promoting parties' value-enhancing behavior) and Partlett, From Victorian Opera to Rock and Rap: Inducement to Breach of Contract in the Music Industry, 66 Tulane L. Rev. 771 (1992)

(viewing the tort as filling gaps in contract relationship and obliging the dissemination of information about the existence of the contract). But see Dobbs, Tortious Interference with Contractual Relationships, 34 Ark. L. Rev. 335 (1980) (criticizing the tort for its authoritarian and anti-autonomy tendencies) and Gergen, Tortious Interference: How it is Engulfing Commercial Law, Why This is Not Entirely Bad, and a Prudential Response, 38 Ariz. L. Rev. 1175 (1996) (criticizing economic analysis and supporting application of the tort to avoid unforeseen opportunistic behavior).

Consider how defamation claims could be made as a part of an interference claim. Could freedom of speech be used as a defense? What if the statements were puffery or parody? See King, Defamation Claims Based on Parody and Other Fanciful Communications Not Intended to Be Understood as Fact, 3 Utah L. Rev. 875 (2008).

Bacon v. St. Paul Union Stockyards Co.

Supreme Court of Minnesota, 1924.

161 Minn. 522, 201 N.W. 326.

[Plaintiff's complaint alleges that he was employed by the Drover Livestock Commission Co., engaged in buying, selling and dealing in livestock in the defendant's stockyards, but that the defendant "wrongfully, unlawfully, and willfully excluded plaintiff from its said stockyards, barred and prevented him from carrying on his occupation therein, and forbade any person, firm, or corporation to employ him in or

about" the stockyards. Defendant's demurrer to the complaint was sustained. Plaintiff appealed.]

PER CURIAM. ***The wrongful interference with the contract relations of others causing a breach is a tort. We are of the opinion that the complaint states a cause of action for wrongful interference with plaintiffs employment. It appears from the complaint that the plaintiff had steady employment, and that defendant wrongfully, willfully, and unlawfully prevented him from continuing in that employment. We think such conduct is in violation of plaintiffs rights. [C] The defendant may have reasons to justify its conduct, but such reasons do not appear in the complaint. ***

Reversed.

NOTES AND QUESTIONS

1. The principle also applies to conduct making plaintiffs performance of his contract more burdensome or expensive, as by deliberate damage to a highway he is under a duty to repair. McNary v. Chamberlain, 34 Conn. 384, 91 Am. Dec. 732 (1867); Cue v. Breland, 78 Miss. 864, 29 So. 850 (1901); Piedmont Cotton Mills v. H.W. Ivey Constr. Co., 109 Ga.App. 876, 137 S.E.2d 528 (1964). Cf. Price v. Sorrell, 784 P.2d 614 (Wyo. 1989) (Court refused to adopt Restatement § 766A finding that causing performance of a contract to be more costly "as an element of proof is too speculative and subject to abuse to provide a meaningful basis for a cause of action.").

2. The bulk of "hindrance" cases involve a physical interference with person or property and the commission of an independent tort. This interference may be either with a plaintiffs performance or with performance of a third party. Previously, the Second Restatement separated these into different tort claims. The Third Restatement has combined these hindrance claims because they are similar in function. Restatement (Third) of Torts: Liability for Economic Harm (2020), Reporter's note i; Wilspec Techs., Inc. v. Dunan Holding Grp. Co., 204 P.3d 69, 72 (2009) (recognizing similarities between the two claims, noting that the "core distinction between the torts... is to whom the defendant's conduct is targeted."). Generally, the interference must cause a plaintiff to lose a right under a contract or make contract rights more costly or less valuable. Thus, no action is available where defendant induced plaintiffs tenant to vacate premises but where the lease was not breached. Sampson Investments v. Jondex Corp., 176 Wis.2d 55, 499 N.W.2d 177 (1993).

Della Penna v. Toyota Motor Sales, U.S.A., Inc.

Supreme Court of California, 1995.

11 Cal.4th 376, 45 Cal.Rptr.2d 436, 902 P.2d 740.

ARABIAN, J. We granted review to reexamine, in light of divergent rulings from the Court of Appeal and a doctrinal evolution among other state high courts, the elements of the tort variously known as interference with "prospective economic advantage," "prospective contractual relations," or

"prospective economic relations," and the allocation of the burdens of proof between the parties to such an action. We conclude that those Court of Appeal opinions requiring proof of a so-called "wrongful act" as a component of the cause of action, and allocating the burden of proving it to the plaintiff, are the better reasoned decisions; we accordingly adopt that analysis as our own, disapproving language in prior opinions of this court to the contrary. Such a requirement, incorporating the views of several other jurisdictions, much of the Restatement Second of Torts, the better reasoned decisions of the Court of Appeal, and the views of leading academic authorities, sensibly redresses the balance between providing a remedy for predatory economic behavior and keeping legitimate business competition outside litigative bounds. We do not in this case, however, go beyond approving the requirement of a showing of wrongfulness as part of the plaintiff's case; the case, if any, to be made for adopting refinements to that element of the tort--requiring the plaintiff to prove, for example, that the defendant's conduct amounted to an independently tortious act, or was a species of anticompetitive behavior proscribed by positive law, or was motivated by unalloyed malice--can be considered on another day, and in another case.

In this case, after the trial court modified the standard jury instruction to require the plaintiff automobile dealer to show that defendant Toyota's interference with his business relationships was "wrongful," the jury returned a verdict for Toyota. The Court of Appeal reversed the ensuing judgment and ordered a new trial on the ground that plaintiffs burden of proof did not encompass proof of a "wrongful" act

and that the modified jury instruction was therefore erroneous. Given our conclusion that the plaintiffs burden does include proof that the defendant's conduct was wrongful by some measure other than an interference with the plaintiffs interest itself, we now reverse the Court of Appeal and direct that the judgment of the trial court be affirmed.

I

John Della Penna, an automobile wholesaler doing business as Pacific Motors, brought this action for damages against defendant Toyota Motor Sales, U.S.A., Inc., and its Lexus division, alleging that certain business conduct of defendants both violated [the] state antitrust statute [c], and constituted an intentional interference with his economic relations. The impetus for Della Penna's suit arose out of the 1989 introduction into the American luxury car market of Toyota's Lexus automobile. Prior to introducing the Lexus, the evidence at trial showed, both the manufacturer, Toyota Motor Corporation, and defendant, the American distributor, had been concerned about the possibility that a resale market might develop for the Lexus in Japan. ***Fearing that auto wholesalers in the United States might reexport Lexus models back to Japan for resale, and concerned that, with production and the availability of Lexus models in the American market limited, reexports would jeopardize its fledgling network of American Lexus dealers, Toyota

1251

inserted in its dealership agreements a "no export" clause, providing that the dealer was "authorized to sell [Lexus automobiles] only to customers located in the United States. [Dealer] agrees that it will

not sell [Lexus automobiles] for resale or use outside the United States. [Dealer] agrees to abide by any export policy established by [distributor]."

Following introduction into the American market, it soon became apparent that some domestic Lexus units were being diverted for foreign sales, principally to Japan. To counter this effect, Toyota managers wrote to their retail dealers, reminding them of the "no-export" policy and explaining that exports for foreign resale could jeopardize the supply of Lexus automobiles available for the United States market. In addition, Toyota compiled a list of "offenders"--dealers and others believed by Toyota to be involved heavily in the developing Lexus foreign resale market--which it distributed to Lexus dealers in the United States. American Lexus dealers were also warned that doing business with those whose names appeared on the "offenders" list might lead to a series of graduated sanctions, from reducing a dealer's allocation to possible reevaluation of the dealer's franchise agreement.

During the years 1989 and 1990, plaintiff Della Penna did a profitable business as an auto wholesaler purchasing Lexus automobiles, chiefly from the Lexus of Stevens Creek retail outlet, at near retail price and exporting them to Japan for resale. By late 1990, however, plaintiffs sources began to dry up, primarily as a result of the "offenders list." Stevens Creek ceased selling models to plaintiff; gradually other sources declined to sell to him as well.

In February 1991, plaintiff filed this lawsuit against Toyota Motor Sales, U.S.A., Inc., alleging both state antitrust claims ***and interference with his economic relationship with Lexus retail dealers.

At the close of plaintiffs case-in-chief, the trial court granted Toyota's motion for nonsuit with respect to the remaining [antitrust] claim (plaintiff had previously abandoned a related claim--unfair competition--prior to trial). The tort cause of action went to the jury, however, under the standard BAJI instructions applicable to such claims with one significant exception. At the request of defendant and over plaintiffs objection, the trial judge modified BAJI No. 7.82--the basic instruction identifying the elements of the tort and indicating the burden of proof--to require plaintiff to prove that defendant's alleged interfering conduct was "wrongful." ***

II

A

Although legal historians have traced the origins of the so-called "interference torts" as far back as the Roman law, the proximate historical impetus for their modern development lay in mid-19th century English common law. (See, e.g., Sayre, Inducing Breach of Contract (1923) 36 Harv. L. Rev. 663; Note, Tortious Interference With

Contractual Relations in the Nineteenth Century: The Transformation of Property, Contract, and Tort (1980) 93 Harv. L. Rev. 1510.) The opinion of the Queen's Bench in Lumley v. Gye (1853) 2 El. & Bl. 216 [118 Eng. Rep. 749], a case that has become a standard in torts casebooks, is widely cited as the origin of the two torts--interference with contract and its sibling, interference with prospective economic relations [1] --in the form in which they have come down to us. ***

* * *

[1] Throughout this opinion, in an effort to avoid both cumbersome locutions and clumsy acronyms ("UPEA"), we use the phrase "interference with economic relations" to refer to the tort generally known as "intentional interference with prospective contractual or economic relations" and to distinguish it from the cognate form, "intentional interference with contract."

The opinion in Lumley v. Gye [c] dealt, of course, with conduct intended to induce the breach of an existing contract, not conduct intended to prevent or persuade others not to contract with the plaintiff. That such an interference with prospective economic relations might itself be tortious was confirmed by the Queen's Bench over the next 40 years. In Temperton v. Russell (1893) 1 Q.B. 715 (Temperton), a labor union, embroiled in a dispute with a firm of builders, announced what today would be called a secondary boycott, intended to force a resolution of the union's grievances by pressuring suppliers of the builder to cease furnishing him construction materials. A failure to comply with the union's boycott demands, suppliers were warned, would result in union pressure on those who bought their supplies not to deal with them.

One such supplier of the builder, Temperton, sued the union's leadership, alleging that his business had been injured by breaches of supply contracts and the refusal of others to do business with him, all as a result of the union's threats. A unanimous Queen's Bench upheld the jury's verdict for the plaintiff, reasoning in part on the authority of Lumley v. Gye, supra, 2 El. & Bl. 216, that in the words of Lord Esher, the Master of the Rolls, "the distinction... between the

claim for inducing persons to break contracts already entered into... and... inducing persons not to enter into contracts... can[not] prevail." (Temperton, supra, 1 Q.B. at page 728.)

"There was the same wrongful intent in both cases, wrongful because malicious," Lord Esher wrote. "There was the same kind of injury to the plaintiff. It seems rather a fine distinction to say that, where a defendant maliciously induces a person not to carry out a contract already made with the plaintiff and so injures the plaintiff, it is actionable, but where he injures the plaintiff by maliciously preventing a person from entering into a contract with the plaintiff, which he would otherwise have entered into, it is not actionable." (Temperton, supra, 1 Q.B. at page 728.)

As a number of courts and commentators have observed, the keystone of the liability imposed in Lumley v. Gye, supra, 2 El. & Bl. 216, and Temperton, supra, 1 Q.B. 715, to judge from the opinions of the justices, appears to have been the "malicious" intent of a defendant in enticing an employee to breach her contract with the plaintiff, and in

damaging the business of one who refused to cooperate with the union in achieving its bargaining aims. While some have doubted whether the use of the word "malicious" amounted to anything more than an intent to commit an act, knowing it would harm the plaintiff, [c] Dean Keeton, assessing the state of the tort as late as 1984, remarked that "[w]ith intent to interfere as the usual basis of the action, the cases have turned almost entirely upon the defendant's motive or purpose and the means by which he has sought to

accomplish it. As in the cases of interference with contract, any manner of intentional invasion of the plaintiffs interests may be sufficient if the purpose is not a proper one." (Prosser & Keeton on Torts (5th ed. 1984) Interference with Prospective Advantage, § 130, page 1009.)

It was, legal historians have suggested, this early accent on the defendant's "intentionality" that was responsible for allying the interference torts with their remote relatives, intentional torts of a quite different order--battery, for example, or false imprisonment. More than one account of the rise of the tort has relied on Lord Bowen's statement in an interference with contract case that "intentionally to do that which is calculated in the ordinary course of events to damage, and which does, in fact, damage another in that person's property or trade, is actionable if done without just cause or excuse." (Mogul Steamship Co. v. McGregor, Gow & Co. (1889) 23 Q.B.D. 598, 613.)

One consequence of this superficial kinship was the assimilation to the interference torts of the pleading and burden of proof requirements of the "true" intentional torts: the requirement that the plaintiff need only allege a so-called "prima facie tort" by showing the defendant's awareness of the economic relation, a deliberate interference with it, and the plaintiffs resulting injury. [C] By this account of the matter--the traditional view of the torts and the one adopted by the first Restatement of Torts--the burden then passed to the defendant to demonstrate that its conduct was privileged, that is, "justified" by a recognized defense such as the protection of others or, more likely in this context, the defendant's own competitive

business interests. (See, e.g., Restatement, Torts (1939) § 766, coms, b-m, pages 50-63 ***)

These and related features of the economic relations tort and the requirements surrounding its proof and defense led, however, to calls for a reexamination and reform as early as the 1920's. ***The nature of the wrong itself seemed to many unduly vague, inviting suit and hampering the presentation of coherent defenses. More critically in the view of others, the procedural effects of applying the prima facie tort principle to what is essentially a business context led to even more untoward consequences.

Because the plaintiff's initial burden of proof was such a slender one, amounting to no more than showing the defendant's conscious act and plaintiffs economic injury, critics argued that legitimate business competition could lead to time consuming and expensive lawsuits (not to

speak of potential liability) by a rival, based on conduct that was regarded by the commercial world as both commonplace and appropriate. The "black letter" rules of the Restatement of Torts surrounding the elements and proof of the tort, some complained, might even suggest to "foreign lawyers reading the Restatement as an original matter [that] the whole competitive order of American industry is prima facie illegal." [C]

Calls for a reformulation of both the elements and the means of establishing the economic relations tort reached a height around the time the Restatement Second of Torts was being prepared for publication and are reflected in its departures from its predecessor's

version. Acknowledging criticism, the American Law Institute discarded the prima facie tort requirement of the first Restatement. A new provision, section 766B, required that the defendant's conduct be "improper," and adopted a multifactor "balancing" approach, identifying seven factors for the trier of fact to weigh in determining a defendant's liability. ***

B

In the meantime, however, an increasing number of state high courts had traveled well beyond the Restatement Second's reforms by redefining and otherwise recasting the elements of the economic relations tort and the burdens surrounding its proof and defenses. In Top Serv. Body Shop, Inc. v. Allstate Ins. Co. (1978) 283 Ore. 201 [582 P.2d 1365] (Top Service), the Oregon Supreme Court, assessing this " 'most fluid and rapidly growing tort,'" noted that "efforts to consolidate both recognized and unsettled lines of development into a general theory of 'tortious interference' have brought to the surface the difficulties of defining the elements of so general a tort without sweeping within its terms a wide variety of socially very different conduct." [C]

Recognizing the force of these criticisms, the court went on to hold in Top Service [c] that a claim of interference with economic relations "is made out when interference resulting in injury to another is wrongful by some measure beyond the fact of the interference itself. Defendant's liability may arise from improper motives or from the use of improper means. They may be wrongful by reason of a statute or other regulation, or a recognized rule of common law, or perhaps an established standard of a trade or profession. No question of

privilege arises unless the interference would be wrongful but for the privilege; it becomes an issue only if the acts charged would be tortious on the part of an unprivileged defendant." ***

[The court reviewed other state authorities going to the same conclusion.]

Over the past decade or so, close to a majority of the high courts of American jurisdictions have imported into the economic relations tort variations on the Top Service line of reasoning, explicitly approving a rule that requires the plaintiff in such a suit to plead and prove the alleged

1255

interference was either "wrongful," "improper," "illegal," "independently tortious" or some variant on these formulations. ***

III

***

[O]ur early economic relations cases were principally of two types, either the classic master and servant pattern of the pre-Lumley v. Gye cases (see, e.g., Buxbom v. Smith (1944) 23 Cal. 2d 535, 548 [145 P.2d 305] [hiring away of plaintiffs employees by defendant after plaintiff had built up his business to distribute defendant's publication and defendant had breached distribution contract held actionable as "an unfair method of interference with advantageous relations"]) or those involving circumscribed kinds of business relations in which the plaintiff, typically a real estate broker or attorney working on a contingency, sued to recover fees after defendant had refused to share property sales proceeds or a personal injury recovery (see,

e.g., Buckaloo v. Johnson (1975) 14 Cal. 3d 815 [122 Cal. Rptr. 745, 537 P.2d 865] [defendant refused to pay plaintiff his broker's commission on the sale of beach property after plaintiff had discussed sale with buyers and directed them to defendant; held, the complaint stated a claim for relief for intentional interference with prospective economic relations].)

***

Our opinion in Buckaloo [c] reviewed a number of Court of Appeal decisions upholding the applicability of the tort to real estate brokerage situations [C] and concluded by identifying the following elements of the cause of action. "In a real estate brokerage context these are: (1) an economic relationship between broker and vendor or broker and vendee containing the probability of future economic benefit to the broker, (2) knowledge by the defendant of the existence of the relationship, (3) intentional acts on the part of the defendant designed to disrupt the relationship, (4) actual disruption of the relationship, (5) damages to the plaintiff proximately caused by the acts of the defendant." [C]

"In California," we went on to observe, "privilege or justification is an affirmative defense, and the lack thereof need not be shown by the original pleader." [C] A note of caution, however, crept into our formulation of principles at this point. "Perhaps the most significant privilege or justification for interference with a prospective business advantage is free competition," we wrote, "Ours is a competitive economy in which business entities vie for economic advantage. In a sense, all vendees are potential buyers of the products and services

of all sellers in a given line, and success goes to him who is able to induce potential customers not to deal with a competitor." [C]

In Seaman's Direct Buying Service, Inc. v. Standard Oil Co. (1984) 36 Cal. 3d 752 [206 Cal. Rptr. 354, 686 P.2d 1158] (Seaman's), overruled in part by Freeman & Mills, Inc. v. Belcher Oil Co. (1995) 11 Cal. 4th 85 [44 Cal. Rptr. 2d 420, 900 P.2d 669], relying on the first Restatement and

1256

without reviewing or even mentioning intervening revaluations of the tort by the Restatement Second, other state high courts and our own Court of Appeal, we again endorsed the prima facie tort pleading and burden of proof format, noting that "[o]nly if and when plaintiff establishes an 'intent to interfere' does the issue of 'justification' come into play. [C] '[W]hile defendant's culpable intent is an element of the cause of action to be pleaded and proved by plaintiff, defendant's justification is an affirmative defense....'" [C] We went on to observe that "[defendant] is mistaken when it implies that an improper 'motive' is an element of plaintiffs cause of action rather than a factor in defendant's affirmative defense. It is not." [C]

Although our opinions following Seaman's, [c] to the extent they addressed the question at all, continued to enumerate the same prima facie elements of the economic relations tort, the cases consistently denied the plaintiff recovery. ***

Meanwhile, developments in the Court of Appeal and in the practical administration of such claims in the trial courts had, if anything, outdistanced our own formulations of the elements of the tort and the allocation of the burden of proof in at least two respects. First,

several Court of Appeal opinions appeared to engraft onto the elements of the plaintiffs cause of action allegations and proof that the defendant's conduct was "wrongful." ***

Second, in 1990, BAJI, the Book of Approved Jury Instructions widely used by trial judges in civil cases, relying on the Restatement Second of Torts... included an instruction providing that a defendant in an economic relations tort case could defeat liability by showing that its conduct was not independently "wrongful." [C]

These developments, of course, closely reflect a nearly concurrent change in views both within the American Law Institute and in other jurisdictions. In the face of those twin lines of development, we are thus presented with the opportunity to consider whether to expressly reconstruct the formal elements of the interference with economic relations tort to achieve a closer alignment with the practice of the trial courts, emerging views within the Court of Appeal, the rulings of many other state high courts, and the critiques of leading commentators. We believe that we should.

IV

In searching for a means to recast the elements of the economic relations tort and allocate the associated burdens of proof, we are guided by an overmastering concern articulated by high courts of other jurisdictions and legal commentators: the need to draw and enforce a sharpened distinction between claims for the tortious disruption of an existing contract and claims that a prospective contractual or economic relationship has been interfered with by the defendant. Many of the cases do in fact acknowledge a greater array of justificatory defenses against

claims of interference with prospective relations. Still, in our view and that of several other courts and commentators, the notion that the two torts are analytically unitary and derive from a common principle sacrifices practical wisdom to theoretical insight, promoting the idea that the interests invaded are of nearly equal dignity. They are not.

The courts provide a damage remedy against third party conduct intended to disrupt an existing contract precisely because the exchange of promises resulting in such a formally cemented economic relationship is deemed worthy of protection from interference by a stranger to the agreement. Economic relationships short of contractual, however, should stand on a different legal footing as far as the potential for tort liability is reckoned. Because ours is a culture firmly wedded to the social rewards of commercial contests, the law usually takes care to draw lines of legal liability in a way that maximizes areas of competition free of legal penalties.

A doctrine that blurs the analytical line between interference with an existing business contract and interference with commercial relations less than contractual is one that invites both uncertainty in conduct and unpredictability of its legal effect. The notion that inducing the breach of an existing contract is simply a subevent of the "more inclusive" class of acts that interfere with economic relations, while perhaps theoretically unobjectionable, has been mischievous as a practical matter. Our courts should, in short, firmly distinguish the two kinds of business contexts, bringing a greater solicitude to those relationships that have ripened into agreements, while recognizing

that relationships short of that subsist in a zone where the rewards and risks of competition are dominant.

***

Conclusion

We hold that a plaintiff seeking to recover for an alleged interference with prospective contractual or economic relations must plead and prove as part of its case-in-chief that the defendant not only knowingly interfered with the plaintiffs expectancy, but engaged in conduct that was wrongful by some legal measure other than the fact of interference itself. The judgment of the Court of Appeal is reversed and the cause is remanded with directions to affirm the judgment of the trial court.

MOSK, J. I concur in the judgment.

***

[T]he only reasonable choice is reformulation. Indeed, an undertaking of this sort is compelled by the almost unanimous agreement ***that the interfering party should not be allowed to interfere with impunity at all times and under all circumstances.

To this end, we should clearly define the tort, basing it on stable and circumscribed ground, and eschewing the prima facie tort doctrine, the "protectionist" premise, and the interfering party's motive. Our focus

should be on objective conduct and consequences. Further, our concern should be with such conduct and consequences as are

unlawful.

General considerations of a formal nature counsel us to take this path. As noted, the tort's rules are "admittedly vague" and their applications "difficult to classify." An objective definition based on unlawfulness, cast in understandable and usable terms, would reduce or remove such weaknesses. ***

It also follows that the tort may be satisfied by intentional interference with prospective economic advantage through restraint of trade, including monopolization. [C]

*fc w *

So reformulated, the tort can be distinctly stated and consistently applied.

The independently tortious means that commonly appear in this context, including assault and battery, defamation, and fraud and deceit. [Cc] Surely, one would not be left to the scant "guidance" of the so-called " 'business ethics' standard" [Cc] which presupposes that "[t]he nature of the conduct which is acceptable today may... prove unacceptable tomorrow." [C]

Also, restraints of trade may be "measured by objective economic criteria." [Cc]

Moreover, the tort's internally inconsistent "protectionist" premise is now removed. The interfered-with party is not favored over the interfering party by virtue of their respective status: the former is merely protected against the latter's use of independently tortious means and restraints of trade.

Furthermore, the tort itself does not now impair the common law's policy of freedom of competition. By its very terms, the freedom in question does not extend to the use of independently tortious means or restraints of trade.

Neither does the tort now undermine the First Amendment's guaranty of freedom of speech, freedom of association, or right of petition. That is because, to the extent that speech or association or petitioning is involved, the federal constitutional provision itself limits liability. [C]

Finally, in any action based on the tort, it is the interfered-with party as plaintiff who should bear the burden of pleading and the burden of proof as to whether there has been intentional interference with prospective economic advantage either by independently tortious means or through restraint of trade by the interfering party as defendant.

***

It is evident in the analysis presented above that, on many points, I agree with the majority's discussion of the tort of intentional interference

1259

with prospective economic advantage and Della Penna's claim against Toyota asserting such a cause of action.

On two major points, however, I am compelled to state my disagreement.

First, I would not adopt the "standard" of "wrongfulness." As I have noted, the term and its cognates are inherently ambiguous. They

should probably be avoided. They should surely not be embraced. That is the course we followed in Buckaloo. It should be followed here as well.

Second, if I were to adopt such a "standard," I would not allow it to remain undefined. ***Any definition of the "standard," of course, should avoid suggesting that the interfering party's motive might be material for present purposes. As I have explained, the focus on this issue is inappropriate, [c] A position of this sort, one must acknowledge, would result in the imposition of no liability on a person who is purely, but merely, "malicious"--who acts, to quote Justice Holmes, with "disinterested malevolence" (Amer. Bank & Trust Co. v. Federal Bank (1921) 256 U.S. 350, 358 [65 L. Ed. 983, 990, 41 S. Ct. 499, 25 A.L.R. 971]). Although such a person might be held responsible in conscience, he should not be made answerable in tort.

***

NOTES AND QUESTIONS

1. The principal case represents a modern articulation of a tort with ancient roots. Has the court formulated the tort in a way that avoids the vices identified in former formulations? Two later cases, Speakers of Sport, Inc. v. ProServ, Inc., 178 F.3d 862 (7th Cir. 1999) (applying Illinois law) and Wal-Mart Stores, Inc. v. Sturges, 52 S.W.3d 711 (Tex. 2001), confirm the principal case. Citing the principal case, the latter court stresses the importance of "decoupling interference with contract from interference with prospective relations, and of grounding liability for the latter in conduct that is independently tortious by nature or otherwise

unlawful," id., at 721. The California Supreme Court has explained the principal case and its relationship with Buckaloo in Korea Supply Co. v. Lockheed Martin Corp., 29 Cal.4th 1134, 63 P.3d 937, 131 Cal.Rptr.2d 29 (2003).

The American Law Institute in the Restatement (Third) of Torts: Liability for Economic Harm § 16 (2020) has acceded to Justice Mosk's plea for a reformulation of the tort:

Interference with Contract:

1) A defendant is subject to liability for interference with contract if:

a) a valid contract existed between the plaintiff and a third party;

b) the defendant engaged in wrongful conduct as defined in Subsection (2);

1260

c) the defendant intended to cause a breach of the plaintiff's contract or disruption of its performance; and

d) the defendant's wrongful conduct caused a breach of the contract or disruption of performance.

2) Conduct is wrongful for purposes of this Section if

a) the defendant acted for the purpose of appropriating the benefits of the plaintiff's contract; or

b) the defendant's conduct constituted an independent and intentional legal wrong; or

c) the defendant engaged in the conduct for the sole purpose of injuring the plaintiff.

The Tort of Interference with Economic Expectation is separately addressed in § 17.

1) A defendant is subject to liability for interference with economic expectation if:

a) the plaintiff had a reasonable expectation of an economic benefit from a relationship with a third party;

b) the defendant committed an independent and intentional legal wrong;

c) the defendant intended to interfere with the plaintiffs expectation; and

d) the defendant's wrongful conduct caused the. expectation to fail.

2. The Third Restatement follows belatedly the lead of the English courts which, soon after permitting a cause of action for interference with prospective contractual relations, throttled the tort. In Allen v. Flood, [1898] App.Cas. 1, 121, Lord Herschell stated that there was a "chasm" between inducing a breach of contract and inducing a person not to enter a contract. This is the law elsewhere: AI Enterprises Ltd. v. Bram Enterprises Ltd., 2014 SCC 12, [2014] 1 S.C.R. 177 (Canadian law) and confirmed in the UK OBG Ltd. v. Allan, [2007] UKHL 21 (UK law); see also Sanders v. Snell, (1998) 196 C.L.R. 329 at 349 (Australian law.)

3. In the principal case, Justice Mosk's challenge that wrongful conduct ought to be defined and could not include conduct motivated by malice alone, addresses a long-lingering issue--the "prima facie tort doctrine." The genesis of this tort is the action on the case. The elements were expressed by Lord Justice Bowen in the English

Court of Appeal in Mogul Steamship Co. v. McGregor Gow & Co., 23 Q.B.D. 598, 613 (1889): "[I]ntentionally to do that which is calculated in the ordinary course of events to damage, and which does, in fact, damage another in that person's property or trade, is actionable if done without just cause or excuse." Lord Justice Bowen's formulation resonated with Justice Holmes in launching the "prima facie tort doctrine." See, Taggart, Private Property and Abuse of Rights in Victorian England: The Story of Edward Pickles and the Bradford Water Supply 167--92 (Oxford University Press, 2002). Holmes' ideas influenced

legal thought throughout the common-law world. His fault principle as "the fulcrum of liability" led to the formulation of the general principle governing the law of negligence. If there were a general principle for negligence, should there be a general principle for all liability based on intentional wrongdoing? After some shifting in his original position, Holmes accepted the prima facie liability theory as an overarching principle. This theory would account for otherwise separate torts such as interference with business relations and malicious prosecution. But its force as a unifying theory has been weak, even in some jurisdictions where the doctrine was planted by some courts. See Brown v. Missouri Pacific Railroad Co., 720 S.W.2d 357, 361 (Mo. 1986) (en banc) ("No case resulting in a verdict for the plaintiff on a prima facie tort theory has been affirmed by the Missouri appellate courts."); Taylor v. Metzger, 152 N.J. 490, 706 A.2d 685 (1998) (the prima facie tort cause of action cannot be properly pleaded when the essential elements of an established and relevant cause of action are missing).

4. Earlier case law found liability where the plaintiff had a business or legal right that was intentionally interfered with by the defendant's unlawful activities. In Garret v. Taylor, Cro.Jac. 567, 79 Eng. Rep. 485 (1621), the defendant made threats of mayhem and vexatious suits against customers and workmen. In Tarleton v. McGawley, Peake N.P. 270, 170 Eng. Rep. 153 (1793), the defendant rained gunfire upon Africans with whom the plaintiff was about to trade. The best early statement of the principle is found in Keeble v. Hickeringill, 11 East 574, 103 Eng. Rep. 1127 (1707), where the defendant, inspired by pure malice, fired guns to frighten ducks away from the plaintiffs pond, and so prevented him from taking them.

5. A leading American case is Tuttle v. Buck, 107 Minn. 145, 119 N. W. 946 (1909). Plaintiffs complaint alleged that defendant, a wealthy banker with influence in the community, maliciously established a barber shop, employed a barber to carry on the business, and used his personal influence to attract customers from the plaintiffs barber shop, not to serve any legitimate purpose of his own, but for the sole purpose of maliciously injuring the plaintiff; and that as a result of this conduct the plaintiffs business was ruined. The trial court overruled a demurrer to this complaint, and the supreme court affirmed, saying:

"When a man starts an opposition place of business, not for the sake of profit to himself, but regardless of loss to himself, and for the sole purpose of driving his competitor out of business, and with the intention of himself retiring upon the accomplishment of his malevolent purpose, he is guilty of a wanton wrong and an actionable tort. In such a case he would not be exercising his legal right, or doing an act which can be judged separately from the motive which actuated him. To call such conduct competition is a

perversion of terms. It is simply the application of force without legal justification, which in its moral quality may be no better than highway robbery."

6. Is the tort applicable to a contract terminable at the will of either party? As in the Restatement (Second) of Torts, the Restatement (Third) of Torts: Liability for Economic Harm (2020) treats this as falling under § 17,

see 111. 17. See Roy v. Woonsocket Instit. for Saving, 525 A.2d 915 (R.I. 1987) (bank's at will employee has at best, an action for interference with prospective advantage); Duggin v. Adams, 234 Va. 221, 360 S.E.2d 832 (1987) (at will employment contract requires proof of (1) knowledge of contract and (2) improper conduct; if for definite term knowledge would suffice).

7. Plaintiff must prove the inference with the expectation caused harm, requiring the plaintiff to show that without the interference plaintiff would have received its benefits. For this reason, some courts afford greater protection to an interest in an existing contract than to a more speculative prospective relationship. See White Plains Coat & Apron Co., Inc. v. Cintas Corp., 867 N.E.2d 381, 383 (2007). Certain negotiations, such as for the purchase of a house, must have reached some state of finality. See, e.g., MacNaughton v. Cossin, 493 A.2d 1040, 1043 (Me. 1985) (affirming lower court's grant of summary judgment where plaintiff failed to show the existence of a contract to purchase a house and therefore failed to support her argument for tortious interference with contract); cf. Royal Realty Co. v. Levin, 69 N.W.2d 667, 672 (1955) (holding

defendants liable for breach of contract despite noncompliance of contract with the statute of frauds). For more examples, see the Restatement (Third) of Torts: Liability for Economic Harm (2020) § 16, III. 8, 9, 21 and 23.

8. Contracts that are illegal, in restraint of trade, or against public policy, such as those intended to stifle competition, are not protected from interference. Fairbanks, Morse & Co. v. Texas Elec. Serv. Co., 63 F.2d 702 (5th Cir. 1933), cert, denied, 290 U.S. 655.

9. Contracts to marry have received special treatment. Almost without exception, courts have refused to hold that it is a tort to induce the parties to break them. See Nelson v. Melvin, 236 Iowa 604, 19 N.W.2d 685 (1945); Brown v. Glickstein, 347 Ill.App. 486, 107 N.E.2d 267 (1952). The reason usually given is that contracts to marry are highly personal agreements, and anyone should be free to advise the parties to change their minds.

10. Liability arises when the defendant interferes with the prospective relationship between the plaintiff and a third party. See, e.g., Stewart Title Guar. Co. v. Am. Abstract & Title Co., 215 S.W.3d 596, 612 (2005) (requiring plaintiff to show a sufficiently certain prospective relationship with a third party to bring an interference claim); Watson's Carpet & Floor Covering, Inc. v. McCormick, 247 S.W.3d 169, 184 (Tenn. Ct. App. 2007) (finding sufficient evidence to support a finding of defendant's tortious interference with plaintiffs business relationships with third party). The Restatement (Third) of Torts: Liability for Economic Harm § 17, comment b. (2020) highlights the unique relationship between defendant liability and plaintiff or third-party harm:

"If a defendant commits a fraud against a third party, and as a result the third party cancels a planned transaction with the plaintiff, the plaintiff cannot sue the defendant for fraud. But the fraud may have caused great damage to the plaintiff, and less

damage--possibly none--to the third party who was the immediate victim... It is true that a plaintiff ordinarily cannot sue to recover for economic losses that result from a tort committed against someone else. But when the defendant's misconduct is intentional and satisfies the other elements of this Section, the case for recovery is compelling."

11. Knowing interference with a valid enforceable contract is usually itself improper. Duggin v. Adams, 234 Va. 221, 360 S.E.2d 832 (1987). The burden then rests on the defendant to justify the interference. The Element of Impropriety looms when the claim is based on interference with prospective advantage.

12. In light of the California Supreme Court's opinion in Della Penna, supra at 1249, consider the following broad grounds for wrongfulness or impropriety, not the restricted grounds under Restatement of Torts (Third): Liability for Economic Harm § 17 (2020).

A. Violating Ethical Standards. See Sustick v. Slatina, 48 N.J.Super. 134, 137 A.2d 54 (1957) (ultimate question is whether the conduct was "both injurious and transgressive of generally accepted standards of common morality or of law," whether it was "sanctioned by the rules of the game," and constituted "right and just dealing"); Leonard Duckworth, Inc. v. Michael L. Field & Co., 516 F.2d 952 (5th

Cir. 1975) ("sharp dealing or overreaching or other conduct below the behavior of fair men similarly situated"); Herron v. State Farm Mut. Ins. Co., 56 Cal.2d 202, 363 P.2d 310, 14 Cal.Rptr. 294 (1961) (rules of Nat'l Conf. Comm, on Adjusters); and Nostrame v. Santiago, 61 A.3d 893 (2013) (finding that for an attorney to lure away a client from another may be tortious if the act violates ethics rules.

B. Other Kinds of Wrongful Conduct. Physical violence, threats and intimidation: Williams v. Maloof, 223 Ga. 640, 157 S.E.2d 479 (1967). Misrepresentation: Gold v. Los Angeles Democratic League, 49 Cal.App.3d 365, 122 Cal. Rptr. 732 (1975); Johnson v. Gustafson, 201 Minn. 629, 277 N.W. 252 (1938). Defamation: Woody v. Brush, 178 App. Div. 698, 165 N.Y.S. 867 (1917). Threats of suit: Pratt Food Co. v. Bird, 148 Mich. 631, 112 N.W. 701 (1907); Gresh v. Potter-McCune Co., 235 Pa.Super. 537, 344 A.2d 540 (1975).

The 2008 financial crisis provided a modern illustration of this rule. In a deal, led by government, by Citigroup Inc. to purchase Wachovia Corp.'s failing assets, Wachovia signed an exclusivity agreement requiring it to negotiate only with Citigroup. Before the agreement expired, Wachovia accepted a better buy-out package with Wells Fargo & Co. Citigroup promptly filed suit alleging, amongst other things, tortious interference with contract. At the prompting of federal regulators from the F.D.I.C., the three banks agreed to a legal standstill to negotiate a division of Wachovia's assets. After four days of intense negotiations, Citigroup ceded Wachovia's assets to Wells Fargo but reinstated its lawsuit seeking $60 billion in damages. Wachovia obtained a declaratory judgment that ruled unenforceable its exclusivity agreement with Citigroup. Wachovia appealed and

sought a declaratory judgment that the exclusivity agreement made the merger valid,

1264

but the motion was denied. Wachovia Corp. v. Citigroup, Inc., 634 F. Supp. 2d 445 (S.D.N.Y. 2009).

13. Many cases involve conduct designed to prevent or hinder a person entering into a contractual or business relationship. Where a number of persons combine, it is called a boycott, a term that immortalizes a pariah during the Irish "troubles":

"Captain Boycott, an Englishman, who was agent of Lord Earne and a farmer of Lough Mask, served notices upon the lord's tenants, and they in turn, with the surrounding population, resolved to have nothing to do with him, and, as far as they could prevent it, not to allow anyone else to have. His life appeared to be in danger, and he had to claim police protection. His servants fled from him, and the awful sentence of excommunication could hardly have rendered him more helplessly alone for a time. No one would work for him, and no one would supply him with food. He and his wife were compelled to work their own fields with the shadows of armed constabulary ever at their heels; Justin MacCarthy's England Under Gladstone." Bouvier's Law Dictionary, summarizing statement in State v. Glidden, 55 Conn. 46, 8 A. 890 (1887).

14. Boycotts are "primary," where the defendant himself refuses to deal with the plaintiff, or "secondary," where he seeks to compel third parties to refuse to deal with plaintiff, by refusing to deal with parties dealing with plaintiff. Competition in business was held under the common law to be a sufficient justification for a primary boycott on

the part of a single defendant. This has been extensively limited by statute in many jurisdictions. Discrimination in competition has been penalized federally by the Robinson- Patman Act, and by various acts in the states, which are beyond the scope of this book.

Secondary boycotts open up whole areas of law, particularly as to restraints of trade, antitrust acts, and labor disputes, where many complex problems have arisen, also beyond the scope of this book. They are usually dealt with in courses on unfair competition, antitrust or restraint of trade, or labor law.

15. In Bear v. Reformed Mennonite Church, 462 Pa. 330, 341 A.2d 105 (1975), plaintiff alleged that his business collapsed after bishops of the Mennonite Church ordered all members to "shun" him. "Shunning" was a church practice that had been traditionally applied to persons who violated church rules and were excommunicated. Defendant contended that plaintiff fell within that group. Should plaintiff have a claim in tort?

16. When the defendant has no legitimate purpose and acts for a purpose that the law does not accept, he becomes liable if he interferes with a contractual relation of the plaintiff. Thus, there is liability when the defendant procures the discharge of a workman to prevent him from bringing a suit, as in Johnson v. Aetna Life Ins. Co., 158 Wis. 56, 147 N.W. 32 (1914); when defendant forces worker to settle, as in London Guarantee & Accident Co. v. Horn, 206 III. 493, 69 N.E. 526 (1903); when defendant attempts to

maliciously force debtor to pay a debt. Warschauser v. Brooklyn Furniture Co., 159 App. Div. 81, 144 N.Y.S. 257 (1913); Hill Grocery

Co. v. Carroll, 223 Ala. 376, 136 So. 789 (1931). There also is liability when the defendant uses a termination clause in a contract solely for the purpose of injuring subcontractor, without other justification. Alyeska Pipeline Serv. Co. v. Aurora Air Serv., 604 P.2d 1090 (Alaska 1979).

17. Consider the following facts. A local, family-owned bakery, long established, situated in a small college town called police to arrest three African American students who had attempted to shoplift from their store. The proprietors thwarted the robbery after a scuffle with the students. The students were arrested and subsequently convicted of offenses related to the robbery. Shortly thereafter, student groups and college representatives alike began protesting outside the bakery. These demonstrations included shouting defamatory statements and handing out a flyer falsely accusing the bakery of being a racist establishment and encouraging customers to buy from other stores instead. The college then pronounced it would cease further business with the bakery, despite having a long-time contract to supply baked goods to the college. It also put pressure on a company that supplied food and related services to the college to cease business with the bakery from whom it had bought a large bulk of its supply. Before these events unfolded, a substantial portion of the bakery's revenue derived from business with the college. The bakery filed suit, accusing the college of interference with business relationships and interference with contract, among other claims. From these facts, what do you think the bakery's chances of success might be? Suggest the quantum of damages that could be awarded. Would other remedies be available? See Gibson Bros Inc. v. Oberlin College, 19 N.W.P.I.Lit.Rpts. 267 (May 8, 2019, Ohio Com.Pl.)

18. The law of civil conspiracy provides that two or more persons will be liable when they act in concert to cause harm to another and such harm results. See Restatement (Third) of Torts: Liability for Economic Harm § 27 (2020). The significance of the action, and a source of criticism, is that the act, if done alone, would not be actionable. In Margolin v. Morton F. Plant Hospital Assn., Inc., 342 So.2d 1090 (Fla. App. 1977), the court recognized the action where all the anesthesiologists in a hospital refused to provide services to a particular surgeon, making it impossible for him to practice. It was open to the defendant anesthesiologists to justify by establishing legitimate reasons for their actions. Is the concerted action appropriate considering the potential overlap with antitrust laws? Considering the width of the tortious interference action, the potential overlap with statutory and other common law actions, and the paucity of authorities, some courts have denied the existence of a separate conspiracy tort. See, e.g., Bloom v. Hennepin County, 783 F. Supp. 418 (D. Minn. 1992).

19. Note the difference between civil conspiracy and aiding and abetting, which are similar on a superficial level. See Restatement (Third) of Torts: Liability for Economic Harm § 28 (2020). The Third Restatement points out the most significant difference between these two causes of action: in a conspiracy, the defendant need only to have agreed to commit a tort. See L-3 Communs. Corp. v. Serco, Inc., 926 F.3d 85, 92 (4th Cir. 2019) (clarifying

that there is no requirement that the defendants sued for conspiracy have committed the tortious action, just that they agree upon the

tortious undertaking). In this sense, the agreement serves "as a substitute for the substantial assistance required to support a claim of aiding and abetting." Restatement (Third) of Torts: Liability for Economic Harm § 28 comment a. (2020).

Defenses and Privileges

1. The Restatement (Third) of Torts: Liability for Economic Harm § 19 (2020) states: Conduct that would otherwise be subject to liability under this Chapter is privileged if it consists of:

a) lawful disclosure of truthful facts to another; or

b) lawful and good-faith efforts to protect a legal interest; or

c) lawful and good-faith efforts to protect an economic interest in the contractual relationship at issue.

2. A reasonable and disinterested motive for the protection of other individuals, or the public, will justify intentional interference with contract: The locus classicus is Brimelow v. Casson, [1924] 1 Ch. 302. See also, Caverno v. Fellows, 300 Mass. 331, 15 N.E.2d 483 (1938) (high school supervisor, principal and superintendent reporting on conduct of teacher); RCDI Constr. v. Spaceplan/Architecture, Planning & Interiors, P.A., 148 F. Supp. 2d 607 (W.D.N.C. 2001) (unlicensed construction contractor); Porter v. King County Medical Society, 186 Wash. 410, 58 P.2d 367 (1936) (enforcing ethical rules of medical association).

3. Instances of privilege to interfere with prospective advantage, in the interest of others or the public include: NAACP v. Claiborne Hardware Co., 458 U.S. 886 (1982) (picketing and boycott activity to prevent racial discrimination); Harris v. Thomas, 217 S.W. 1068 (Tex.

Civ. App. 1920) (acting to protect ethical standards of medical association). The California Supreme Court in Della Penna, supra at 1249, canvasses the justification issue, stressing that "free competition" was paramount.

4. Several cases hold that there is a privilege to give disinterested advice to withdraw from a contractual relation. Arnold v. Moffitt, 30 R.I. 310, 75 A. 502 (1910) (electrical inspector's report). But the privilege does not extend to officious intermeddling: Calbom v. Knudtzon, 65 Wash.2d 157, 396 P.2d 148 (1964) (accountant convinced his client to fire her attorney although he was reputable). On whether the advice is disinterested if it also benefits other advisees, see Welch v. Bancorp Management Advisors, Inc., 296 Or. 208, 675 P.2d 172 (1983) and McGanty v. Staudenraus, 321 Or. 532, 901 P.2d 841 (1995).

5. Justification may arise from a contractual or property right or economic interest of sufficient weight to take precedence. See Felsen v. Sol Café Mfg. Corp., 24 N.Y.2d 682, 249 N.E.2d 459, 301 N.Y.S2d 610 (1969) (sole shareholder justified in attempt to protect economic interest). Some courts place the burden on the plaintiff to show that the interference was otherwise improper or malicious: compare M&M Rental Tools, Inc. v. Milchem, Inc., 94 N.M. 449, 612 P.2d 241 (1980) (holding competition sufficient interest to

justify interference with prospective but not existing contract), with Johnson & Johnson v. Guidant Corp., 525 F. Supp. 2d 336 (S.D.N.Y. 2007) (competitive business interest sufficient justification for interference with existing contract). Other courts place the burden on

the defendant to show that the interference was justified: Lowell v. Mother's Cake & Cookie Co., 79 Cal.App.3d 13, 144 Cal.Rptr. 664 (1978).

Remedies

1. The interference must cause a loss to the plaintiff. In re Alert Holdings, Inc., 148 B.R. 194 (Bkrtcy. N.Y. 1992). Amgro, Inc. v. Lincoln Gen. Ins. Co., 361 F. App'x 338 (3d Cir. 2010) (assessing lost profits). The Court may grant an injunction if the plaintiff shows that damages would be inadequate, such as in the case of a continuing threat of interference. Courts are reluctant to grant an injunction if it would effectively enforce specific performance for a contract for personal services. Beverly Glen Music, Inc. v. Warner Communications, 178 Cal.App.3d 1142, 224 Cal. Rptr. 260 (1986). But see Alan Schwartz, The Case for Specific Performance, 89 Yale L.J. 271, 274--79 (1979) (arguing that specific performance should be a matter of course).

2. Punitive damages are available, in most jurisdictions, on the basis that the defendant's action is intentional and without justification. Envtl. Energy Ptnrs., Inc. v. Siemens Bldg. Techs., Inc., 178 S.W.3d 691 (Mo. Ct. App. 2005) (awarding punitive damages when defendant's actions were "egregious, unwarranted, overbearing, reprehensible, and without justification").

3. Recovery of damages for breach of contract will not preclude the plaintiffs action for tortious interference, although no double recovery will be allowed. Tort damages will include consequential losses to reputation and mental suffering. Duff v. Engelberg, 237 Cal.App.2d 505, 47 Cal. Rptr. 114 (1965). See Farber, Reassessing the

Economic Efficiency of Compensatory Damages for Breach of Contract, 66 Va. L. Rev. 1443, 1476-78 (1980) (arguing that the effects of transaction costs and imperfect information weaken the case for exclusive reliance on compensatory damages).

4. The potency of available remedies was starkly demonstrated in Texaco, Inc. v. Pennzoil, Co., 729 S.W.2d 768 (Tex. App. 1987), cert, dismissed, 485 U.S. 994 (1988). After determining that Texaco knowingly inveigled Getty Oil Co. away from an acquisition agreement with Pennzoil, the jury handed down a verdict in excess of ten billion dollars. Texaco subsequently filed for Chapter 11 bankruptcy. The damages were first reduced to the sum of three billion dollars, and then further reduce to one billion because there was "a point where punitive damages... overstate their purpose and serve to confiscate rather than to deter or punish." 729 S.W.2d at 866. See Feltham, Tortious Interference with Contractual Relations: The Texaco Inc. v. Pennzoil Co. Litigation, 33 N. Y. L. Sch. L. Rev. Ill, 144 (1988); and Baron and Baron, The Pennzoil-Texaco Dispute: An Independent Analysis, 38 Baylor L. Rev. 253 (1986); and Coll, The Taking of Getty Oil: The Full Story of the Most Spectacular and Catastrophic Takeover of All Times (1987). The cause of action turned on whether Pennzoil and

Getty had entered a binding contract. Is there a good reason to be especially wary of concluding that a contract is formed in respect of acquisitions?

5. In considering the totality of remedies that may be available, the interference may also result in unjust enrichment. For example, if a

CIA officer publishes a book revealing confidential information in violation of a contractual agreement, the court may order that he or she be stripped of profits made from the publication. Snepp v. United States, 444 U.S. 507 (1980). Under the Restatement (Third) of Restitution and Unjust Enrichment, § 39 (2011), profits generated from an opportunistic breach of contract may be awarded. In other words, the profits may be ordered to be disgorged.

(C) Interference with Prospective Advantage

1. Most of the cases dealing with interference with prospective advantage have concerned future contract relations, such as the prospect of obtaining employment or hiring employees, or the opportunity of attracting customers or purchasing property. In these cases, there is a background of business experience, on the basis of which it is possible to estimate with some fair amount of success both the value of what has been lost and the likelihood that the plaintiff would have received it if the defendant had not interfered. Some state courts have specifically highlighted the similarities between intentional interference with the expectancy of inheritance and intentional interference with prospective economic advantage or contractual relations. Harmon v. Harmon, 404 A.2d 1020 (Maine, 1979); Allen v. Hall, 328 Or. 276, 281, 974 P.2d 199, 202 (1999); Douglass v. Boyce, 344 S.C. 5, 9 n.4, 542 S.E.2d 715, 717 (2001) (noting that South Carolina has adopted the closely analogous tort of intentional interference with prospective contractual relations).

2. When the attempt is made to extend liability for interference beyond commercial dealings to other "expectancies," the courts

have found themselves on unfamiliar ground, and frequently have refused to allow the action. The reason usually given is that there is no sufficient degree of certainty that the plaintiff would ever have received the prospective benefits. States that do recognize the tort sometimes do so in limited circumstances. See, e.g., Jackson v. Kelly, 44 S.W.3d 328, 333 (Ark. 2001) (refusing to recognize the tort when an adequate remedy exists in probate court).

Accordingly, the majority of courts have not recognized a broad cause of action. Archer v. Anderson, 556 S.W.3d 228 (Tex. 2018) (holding there is no cause of action in Texas for interference with inheritance); Norvell v. Norvell, 2018 Ala. LEXIS 107, at *9 (Oct. 19, 2018) (defendant contending that Alabama's appellate courts have not yet recognized a claim of tortious interference with an inheritance); McNeil v. Jordan, 934 A.2d 739, 741 (Pa. Superior Ct. 2007) (describing the elements of the cognizable tort of interference with testamentary expectancy);

1269

Litherland v. Jurgens, 869 N.W.2d 92, 96 (Neb. 2015) (declining to recognize the tort of interference with expectancy of inheritance).

3. Some decisions involving interference with an expected gift or legacy under a will have denied recovery on the ground that there was not sufficient certainty that the donor would not have changed his mind. Creek v. Laski, 248 Mich. 425, 227 N.W. 817 (1929) (will destroyed after testator's death); Morton v. Petitt, 124 Ohio St. 241, 177 N.E. 591 (1931) (substitution of a fraudulent will after testator's death). See Restatement (Third) of Torts: Liability for Economic Harm § 18 (2020), Interference with Inheritance or Gift, note a.,

recognizes recovery as a special case of §17 Interference with Economic Expectation.

4. Other cases have granted recovery on the basis of other evidence of a high degree of probability that the testator would have made or changed a bequest. See, e.g., Brignati v. Medenwald, 315 Mass. 636, 53 N.E.2d 673 (1944); Bohannon v. Wachovia Bank & Trust Co., 210 N.C. 679, 188 S.E. 390 (1936). Morrill v. Morrill, 1998 ME 133, 712 A.2d 1039 (holding that parental relationship established existence of an expectancy, while the extent of expectancy could be evidenced by intestacy of the parents, content of any previous wills, or previous transfers of property during the parents' lifetimes). See also, Latham v. Father Divine, 299 N.Y. 22, 85 N.E.2d 168 (1949) (allowing equitable relief in the form of a constructive trust); Allen v. Leybourne, 190 So.2d 825 (Fla. App. 1966); White v. Mulvania, 575 S.W.2d 184 (Mo. 1978). The availability of other sufficient remedies convinced the Supreme Judicial Court of Massachusetts to reject the principal case. Labonte v. Giordano, 426 Mass. 319, 687 N.E.2d 1253 (1997).

5. The reluctance found in will cases has been carried over to cases of other non-commercial expectancies, when there is no high degree of probability. The gambling spirit dies hard as plaintiffs, over a period of a hundred years, have brought, and courts have dismissed, actions for thwarted chances of winning bets on horse racing: Western Union Tel. Co. v. Crall, 39 Kan. 580, 18 P. 719 (1888); Cain v. Vollmer, 19 Idaho 163, 112 P. 686 (1910); and Youst v. Longo, 43 Cal.3d 64, 233 Cal. Rptr. 294, 729 P.2d 728 (1987). See also Smitha v. Gentry, 20 Ky. L. Rep. 171, 45 S.W. 515 (1898) (chance of obtaining a reward for apprehending a criminal); Wachtel v. National

Alfalfa Journal, 190 Iowa 1293, 176 N.W. 801 (1920) (when based on the number of contestants, plaintiff was "absolutely sure to win a prize").

6. Interference with Inheritance or Gift. The Restatement (Third) of Torts: Liability for Economic Harm § 18 (2020) supports extending liability for intentional interference with an inheritance or gift in certain circumstances:

(1) A defendant is subject to liability for interference with an inheritance or gift if:

(a) the plaintiff had a reasonable expectation of receiving an inheritance or gift;

(b) the defendant committed an intentional and independent legal wrong;

(c) the defendant's purpose was to interfere with the plaintiff's expectancy;

(d) the defendant's conduct caused the expectancy to fail; and

(e) the plaintiff suffered injury as a result

The previous Restatement (Second) of Torts § 774B Intentional Interference with Inheritance of Gift stated: "One who by fraud, duress or other tortious means intentionally prevents another from receiving from a third person an inheritance or gift that he would otherwise have received is subject to liability to the other for loss of the inheritance or gift." Do you think the Restatement (Third)'s position will be adopted by more states? Why or why not?

(D) Tortious Breach of Contract

A party to a contract cannot be liable in tort for interfering with his own contract. Applied Equipment Corp. v. Litton Saudi Arabia Ltd., 7 Cal.4th 503, 28 Cal.Rptr.2d 475, 869 P.2d 454 (1994). The interfering conduct must constitute an independent tort, such as fraud. See Restatement (Third) of Torts, Liability for Economic Harm § 16(2)(b) (2020) ("Conduct is wrongful for purposes of this Section if... the defendant's conduct constituted an independent and intentional legal wrong"). The rule underlines the distinction between tort and contract liability. As tort liability has moved beyond physical interests and focused attention on protecting economic interests, the boundary line between tort and contract has been much debated. Negligence has stretched, as witnessed in Chapter 8, to protect parties in select circumstances from negligent infliction of pure economic loss. The defining scholarly contribution was published by Powers, Border Wars: Law of Bad Faith Breach in Insurance Contracts, 72 Texas L. Rev. 1209 (1993).

Contract has generally refused to provide protection for non-economic losses arising from breach. This is true despite the fact that in many contracts the parties expose themselves to the risk of the other parties' opportunistic behavior; contracts often expose parties to significant loss not conveniently and adequately measured under the usual rules of breach of contract. Consider that you have contracted with a tour company for a vacation after your first year of law school. Instead of the relaxing, rejuvenating vacation promised, you endure the hardships of Hannibal crossing the Alps. Will a return of the contract price suffice? On occasion, the relationship goes

beyond contract to forge a fiduciary relationship, thus, allowing the incidents of equitable remedies.

1271

The law may also impose equitable type terms--covenants of good faith--into the contract. The remedy, however, remains in breach of contract.

The law contemplates that parties are free on pain of paying damages in breach of contract to intentionally breach a contract. The last section highlighted that third parties do not have a commensurate freedom. If they should induce a breach of contract, they will be subject to tort liability with its attendant remedies.

Neibuhr v. Gage

Supreme Court of Minnesota, 1906.

99 Minn. 149, 108 N.W. 884.

ELLIOTT, J. This action was brought to recover damages which the plaintiff claims he suffered by reason of being required while under duress to transfer to the defendant certain shares of stock in a corporation. In the court below he recovered a verdict for $8,478. The trial court denied the defendant's motion for judgment notwithstanding the verdict, but granted a new trial. Both parties appealed. ***

[Plaintiff possessed 91 shares of stock in Gage, Hayden & Co., having a face value of $9,100. Defendant Gage accused him of the felony of grand larceny and threatened to have him convicted unless he transferred the shares to Gage. Plaintiff alleged that he was

innocent and that Gage led him to believe that Gage "would produce false testimony against him, in order to establish and justify [the] false accusation." Under threat of immediate arrest and imprisonment and without opportunity for consultation, plaintiff transferred the shares.]

The defendant contends ***that if the contract resulted from duress it was voidable, and the sole remedy of the injured party was either to rescind and to restore the benefits, and then bring his action for what he had parted with, or bring his action in equity for a rescission and for such relief as he was entitled to upon rescission. ***

In form this is an action at law to recover damages for an injury caused by the wrongful act of the defendant Gage. It was so regarded by the trial court, and the plaintiffs evidence was offered and received upon this theory. The pleadings do not raise the question of ratification or laches. The defendant stands squarely upon the proposition that there was no duress and that the plaintiff admitted that he was an embezzler, and for the purpose of paying an acknowledged debt to Gage, Hayden & Co. freely and voluntarily transferred the stock to Gage. ***

The remedies which are available to one who has been induced to part with his property or execute a contract by ordinary fraud are well understood. He may keep what he has received under the contract and bring an action to recover the damages which he has sustained by reason of the fraud, or he may rescind the contract by his own act, and sue at law for what he parted with by reason of the fraud, or he may sue in

equity for a rescission of the contract by the court and recover what he parted with upon such conditions as the court may deem equitable. ***If he seeks equitable relief, he must proceed promptly and comply with all the conditions which equity imposes. If he elects to rescind by his own act and sue at law for what he parted with by reason of the fraud, he must do all that he reasonably can to place the defendant in status quo. [C]

The plaintiff abandoned his stock to the defendant. He aske [sic] no equitable relief. He ratifies and affirms the contract, but not the fraud by which it was obtained. The equitable doctrine of laches has no application in an action at law to recover damages. ***In an action for damages where no rescission is sought a return of the consideration received under the contract is unnecessary.

But is a party who has been injured by duress entitled to the same remedies as one who has been injured by deception? We are unable to see why there should be any distinction made between these two classes of cases. Fraud is ordinarily accomplished by deceit, but it is also accomplished by many other practices. As commonly understood, fraud is a wrong accomplished by deception but ***duress is a species of fraud in which compulsion in some form takes the place of deception in accomplishing the injury. [C]

We find no principle ***which limits the remedy by reason of some inherent quality found in the definition of the word "deceit." The practice in either case is equally bad, and there is no reason why the remedy should not be as comprehensive and complete in one as in the other. The wrongdoer accomplishes the same wrong in each case, and does it with the same bad intent. The cases are at least

analogous and on principle the remedies should be the same. It is not necessary that the law should show any special and extraordinary consideration for the wrongdoer. All he is entitled to is a fair opportunity to make good the damages resulting from his wrong without unnecessary injury to himself. It is not for him to determine the choice of remedies for the injured party. If the remedy of an action at law for damages is available to a person who has been injured by deceit, it should not lie in the mouth of the wrongdoer to say that the remedy is more restricted when the wrong is the result of the more gross and brutal acts which are known as "duress." ***A party who has been injured by duress is entitled to the same remedies which are available in cases of deceit. ***

The entire record has been carefully read, and we are satisfied that there is evidence to sustain the verdict. ***

The order granting a new trial is reversed, with directions to the trial court to enter a judgment in favor of the plaintiff upon the verdict.

1273

NOTES AND QUESTIONS

1. The principal case has not attracted a large following. In accord see Housing Authority of Dallas v. Hubbell, 325 S. W.2d 880 (Tex. Civ. App. 1959) (economic pressure). The case may suffer from its appellation as "duress" when that term is commonly used in the law of contract and restitution. The English courts have fashioned a more certain, albeit controversial tort, of "intimidation." The tort encompasses those cases in which harm is inflicted by the use of unlawful threats. The threats may interfere with the actions of the plaintiff or of other persons resulting in harm to the plaintiff. Rookes

v. Barnard, [1964] A.C. 1129 (appeal taken from Q.B.) (strike threats made by Union, forcing dismissal of plaintiff employee). To threaten to do what one has a legal right to do does not constitute intimidation.

2. The law of fraudulent and negligent misrepresentation plays a similar role in increasing the reliability of information upon which parties act in entering into contracts.

3. Take Silsbee v. Webber, 171 Mass. 378, 50 N.E. 555 (1898), where defendant threatened to charge plaintiff mother's son with embezzlement before plaintiffs ailing husband. To spare her husband's delicate physical condition, plaintiff transferred property to defendant. Should plaintiff be allowed to recover for her own emotional distress? Should it make any difference whether her son had actually embezzled funds?

The case raises the conundrums surrounding blackmail. Is the criminal law, and therefore tort law building on it, inefficient in foreclosing the blackmailed person's choice to pay for silence? This topic has led to trenchant academic exchanges: Symposium on Blackmail, 141 U. Pa. L. Rev. 1565 (1993). See also Lawrence M. Friedman, Guarding Life's Dark Secrets: Legal and Social Contracts over Reputation, Propriety, and Privacy (2007), 81--100.

Freeman & Mills, Inc. v. Belcher Oil Company

Supreme Court of California, 1995.

11 Cal.4th 85, 44 Cal.Rptr.2d 420, 900 P.2d 669.

LUCAS, C. J. We granted review in this case to resolve some of the widespread confusion that has arisen regarding the application of our opinion in Seaman's Direct Buying Service, Inc. v. Standard Oil Co. (1984) 36 Cal. 3d 752 [206 Cal. Rptr. 354, 686 P.2d 1158] (Seaman's). We held in that case that a tort cause of action might lie "when, in addition to breaching the contract, [defendant] seeks to shield itself from liability by denying, in bad faith and without probable cause, that the contract exists." [c]

In the present case, the Court of Appeal reversed judgment for plaintiff and remanded the case for a limited retrial, but also suggested that "it is time for the Supreme Court to reexamine the tort of 'bad faith denial of contract.'" We agree, and proceed to do so here. As our order granting review stated, "the issue to be argued before this court is limited to whether, and under what circumstances, a party to a contract may

1274

recover in tort for another party's bad faith denial of the contract's existence."

***

[W]e have concluded that the Seaman's court incorrectly recognized a tort cause of action based on the defendant's bad faith denial of the existence of a contract between the parties. That holding has been widely criticized by legal scholars, has caused considerable confusion among lower courts, and has been rejected by the courts of several other jurisdictions. These critics convincingly argue that the Seaman's decision is confusing and ambiguous, analytically flawed, and promotes questionable policy. After careful review of all

the foregoing considerations, we conclude that our Seaman's holding should be overruled.

I. Facts

***In June 1987, defendant Belcher Oil Company (Belcher Oil) retained the law firm of Morgan, Lewis & Bockius (Morgan) to defend it in a Florida lawsuit. Pursuant to a letter of understanding signed by Belcher Oil's general counsel (William Dunker) and a Morgan partner (Donald Smaltz), Belcher Oil was to pay for costs incurred on its behalf, including fees for accountants. In February 1988, after first obtaining Dunker's express authorization, Smaltz hired plaintiff, the accounting firm of Freeman & Mills, Incorporated (Freeman and Mills), to provide a financial analysis and litigation support for Belcher Oil in the Florida lawsuit.

In March, an engagement letter was signed by both Morgan and Freeman & Mills. At about this time, William Dunker left Belcher Oil and was replaced by Neil Bowman. In April 1988, Bowman became dissatisfied with Morgan's efforts and the lawyers were discharged. Bowman asked Morgan for a summary of the work performed by Freeman & Mills and, at the same time, directed Smaltz to have Freeman & Mills stop their work for Belcher Oil. Smaltz did as he was asked. Freeman & Mills's final statement was for $70,042.50 in fees, plus $7,495.63 for costs, a total of $77,538.13.

Freeman & Mills billed Morgan, but no payment was forthcoming. Freeman & Mills then billed Belcher Oil directly and, for about a year, sent monthly statements and regularly called Bowman about the bill, but no payment was forthcoming. In August 1989, Smaltz finally told Freeman & Mills that Belcher Oil refused to pay their bill. Freeman &

Mills then wrote to Bowman asking that the matter be resolved. In September 1989, Bowman responded, complaining that Belcher Oil had not been consulted about the extent of Freeman & Mills's services and suggesting Freeman & Mills should look to Morgan for payment of whatever amounts were claimed due.

Ultimately, Freeman & Mills filed this action against Belcher Oil, alleging (in its second amended complaint) causes of action for breach of

contract, "bad faith denial of contract," and quantum meruit. Belcher Oil answered and the case was presented to a jury in a bifurcated trial, with punitive damages reserved for the second phase. According to the evidence presented during the first phase, the amount owed to Freeman & Mills (as indicated on their statements) was $77,538.13.

The jury returned its first phase verdict. On Freeman & Mills's breach of contract claim, the jury found that Belcher Oil had authorized Morgan to retain Freeman & Mills on Belcher Oil's behalf, that Freeman & Mills had performed its obligations under the contract, that Belcher Oil had breached the contract, and that the amount of damages suffered by Freeman & Mills was $25,000. The jury also answered affirmatively the questions about whether Belcher Oil had denied the existence of the contract and had acted with oppression, fraud, or malice. Thereafter, the jury returned its verdict awarding $477,538.13 in punitive damages and judgment was entered consistent with the jury's verdicts.

In three post-trial motions, Freeman & Mills asked for orders (1) "correcting" the jury's verdicts and the court's judgment to reflect compensatory damages of $77,538.13 and punitive damages of $425,000 (on the ground that the jury's questions showed this was its true intent); (2) awarding attorney fees as sanctions for the litigation tactics of Belcher Oil's attorneys; and (3) awarding prejudgment interest on the compensatory damage award. Over Belcher Oil's opposition, all three motions were granted--but with some changes in the course of correcting the judgment--by giving Freeman & Mills $131,614.93 in compensatory damages (the $25,000 actually awarded by the jury, plus the $77,538.13 included in the punitive damage award, plus $29,076.80 for prejudgment interest), and $400,000 (not $425,000 as requested) in punitive damages.

Belcher Oil appealed from the "corrected" judgment. Freeman & Mills cross-appealed from a mid-trial order denying its request to amend its complaint to add a cause of action for fraud, an issue not presently before us. The Court of Appeal majority, finding no "special relationship" between the parties to justify a tort theory of recovery under Seaman's, reversed the judgment and remanded the case to the trial court for a retrial limited to the issue of damages under plaintiffs breach of contract cause of action. (The Court of Appeal dissenting justice would have sustained the tort cause of action and remanded for retrial of the damage issue as to both causes of action.) As will appear, we affirm the judgment of the Court of Appeal, concluding that a tort recovery is unavailable in this case.

II. The Seaman's Decision

The tort of bad faith "denial of contract" was established in a per curiam opinion in Seaman's [C]. These were the facts before the court in that case: In 1971, Seaman's Direct Buying Service, a small marine fueling station in Eureka, wanted to expand its operation by developing a marine fuel dealership in conjunction with a new marina under development by the City of Eureka. When Seaman's approached the city

1276

about a long-term lease of a large parcel of land in the marina, the city required Seaman's to obtain a binding commitment from an oil supplier. To that end, Seaman's negotiated with several companies and, by 1972, reached a tentative agreement with Standard Oil Company of California.

Both Seaman's and Standard Oil signed a letter of intent setting forth the basic terms of their arrangement, but that letter was subject to government approval of the contract, continued approval of Seaman's credit status, and future agreement on specific arrangements. Seaman's showed the letter to the city and, shortly thereafter, signed a 40-year lease with the city. [C]

Shortly thereafter, an oil shortage dramatically reduced the available supplies of oil and, in November 1973, Standard Oil told Seaman's that new federal regulations requiring allocation of petroleum products to those that had been customers since 1972 precluded its execution of a new dealership agreement. In response, Seaman's obtained an exemption from the appropriate federal agency. Standard Oil appealed and persuaded the agency to reverse the order, but Seaman's eventually had the exemption reinstated

contingent on a court determination that a valid contract existed between the parties. [C]

Seaman's then asked Standard Oil to stipulate to the existence of a contract, stating that a refusal would force it to discontinue operations. Standard Oil's representative refused the request, telling Seaman's, "See you in court." Seaman's business collapsed and it sued Standard Oil for damages on four theories--breach of contract, fraud, breach of the implied covenant of good faith and fair dealing, and interference with Seaman's contractual relationship with the city. [C]

The case was tried to a jury, which returned its verdicts in favor of Seaman's on all theories except fraud, awarding compensatory and punitive damages. Standard Oil appealed. [C] We considered "whether, and under what circumstances, a breach of the implied covenant of good faith and fair dealing in a commercial contract may give rise to an action in tort." [C] For purposes of completeness, we quote from Seaman's at some length:

"It is well settled that, in California, the law implies in every contract a covenant of good faith and fair dealing. Broadly stated, that covenant requires that neither party do anything which will deprive the other of the benefits of the agreement. California courts have recognized the existence of this covenant, and enforced it, in cases involving a wide variety of contracts.... In the seminal cases of Comunale v. Traders & General Ins. Co. [(1958)] 50 Cal. 2d 654 [328 P.2d 198, 68 A.L.R.2d 883], and Crisci v. Security Ins. Co. [(1967)] 66 Cal. 2d 425 [58 Cal. Rptr. 13, 426 P.2d 173], this court held that a breach of the covenant

of good faith and fair dealing by an insurance carrier may give rise to a cause of action in tort as well as in contract. [C]

1277

"While the proposition that the law implies a covenant of good faith and fair dealing in all contracts is well established, the proposition advanced by Seaman's--that breach of the covenant always gives rise to an action in tort--is not so clear. In holding that a tort action is available for breach of the covenant in an insurance contract, we have emphasized the 'special relationship' between insurer and insured, characterized by elements of public interest, adhesion, and fiduciary responsibility. No doubt there are other relationships with similar characteristics and deserving of similar legal treatment.

"When we move from such special relationships to consideration of the tort remedy in the context of the ordinary commercial contract, we move into largely uncharted and potentially dangerous waters. Here, parties of roughly equal bargaining power are free to shape the contours of their agreement and to include provisions for attorney fees and liquidated damages in the event of breach. They may not be permitted to disclaim the covenant of good faith but they are free, within reasonable limits at least, to agree upon the standards by which application of the covenant is to be measured. In such contracts, it may be difficult to distinguish between breach of the covenant and breach of contract, and there is the risk that interjecting tort remedies will intrude upon the expectations of the parties. This is not to say that tort remedies have no place in such a commercial context, but that it is wise to proceed with caution in determining their scope and application.

"For the purposes of this case it is unnecessary to decide the broad question which Seaman's poses. Indeed, it is not even necessary to predicate liability on a breach of the implied covenant. It is sufficient to recognize that a party to a contract may incur tort remedies when, in addition to breaching the contract, it seeks to shield itself from liability by denying, in bad faith and without probable cause, that the contract exists.

"It has been held that a party to a contract may be subject to tort liability, including punitive damages, if he coerces the other party to pay more than is due under the contract terms through the threat of a lawsuit, made " 'without probable cause and with no belief in the existence of the cause of action.'" There is little difference, in principle, between a contracting party obtaining excess payment in such manner, and a contracting party seeking to avoid all liability on a meritorious contract claim by adopting a 'stonewall' position ('see you in court') without probable cause and with no belief in the existence of a defense. Such conduct goes beyond the mere breach of contract. It offends accepted notions of business ethics. [C] Acceptance of tort remedies in such a situation is not likely to intrude upon the bargaining relationship or upset reasonable expectations of the contracting parties." [C]

Seaman's concluded that, because a good faith denial of the existence of a binding contract is not a tort [c], the trial court's failure to instruct

1278

the jury on the requirement of bad faith was error (ibid.) and that error was prejudicial. [C]

***

IV. Subsequent Developments

A. California Supreme Court Decisions--Subsequent opinions of this court indicate a continuing reluctance, originally reflected in Seaman's itself, to authorize tort recovery for noninsurance contract breaches.

In Foley v. Interactive Data Corp. (1988) 47 Cal. 3d 654 [254 Cal. Rptr. 211, 765 P.2d 373] (Foley), we considered the availability of tort damages for the wrongful termination of a discharged employee. Declining to rely on dictum in Seaman's [c] regarding the possible availability of tort remedies for breach of the implied covenant of good faith and fair dealing (hereafter the implied covenant) in the employment context, we refused to afford such remedies for the essentially contractual claim of breach of the implied covenant arising in that context. [C]

In reaching our conclusion in Foley, we relied in part on certain basic principles relevant to contract law, including the need for "predictability about the cost of contractual relationships," and the purpose of contract damages to compensate the injured party rather than punish the breaching party. [C] Focusing on the implied covenant, we observed that, with the exception of insurance contracts, "[b]ecause the covenant is a contract term,... compensation for its breach has almost always been limited to contract rather than tort remedies." [C]

We acknowledged in Foley that "[t]he insurance cases... were a major departure from traditional principles of contract law," and we stressed that the courts should take "great care" before extending

"the exceptional approach taken in those cases" to "another contract setting." [C] We concluded that "the employment relationship is not sufficiently similar to that of insurer and insured to warrant judicial extension of the proposed additional tort remedies...." [C]

[The Court discusses Hunter v. Up-Right and Applied Equipment v. Litton Saudi Arabia, 6 Cal. 4th 1174, 26 Cal. Rptr. 2d 8, 864 P.2d 88 (1993), 7 Cal. 4th 503, 28 Cal. Rptr. 2d 475, 869 P.2d 454 (1994).]

***

Our decisions in Foley, Hunter, and Applied Equipment each contains language that strongly suggests courts should limit tort recovery in contract breach situations to the insurance area, at least in the absence of violation of an independent duty arising from principles of tort law other than denial of the existence of, or liability under, the breached contract. (See also White v. Western Title Ins. Co. (1985) 40 Cal. 3d 870, 901 [221 Cal. Rptr. 509, 710 P.2d 309] (cone, and dis. opn. of Kaus, J.) [observing that "our experience in Seaman's surely tells us that there are real problems in applying the substitute remedy of a tort

1279

recovery--with or without punitive damages--outside the insurance area," and urging a legislative solution].)

***

Without analyzing the particular facts of each case, it is sufficient to observe that our Seaman's holding has presented the lower courts with a number of unanswered questions, and that these courts have

reached varying, and often inconsistent, conclusions in response. [Cc]

***

[Much] confusion and conflict has arisen regarding the scope and application of our Seaman's holding. For example, does the Seaman's tort derive from breach of the implied covenant or from some other independent tort duty? [Cc]

Confusion and conflict alone might not justify a decision to abrogate Seaman's, for we could attempt to resolve all the uncertainties engendered by that decision. But there are additional considerations that convince us to forgo that predictably Herculean effort. Many of the pertinent Court of Appeal decisions recognize compelling policy reasons supporting the preclusion of tort remedies for contractual breaches outside the insurance context. ***

[I]n Harris [v. Atlantic Richfield Co.], 14 Cal. App. 4th 70 [(1993)], the Court of Appeal denied a tort recovery for bad faith contract breach in violation of public policy. The court elaborated on the applicable policy considerations as follows: "The traditional goal of contract remedies is compensation of the promisee for the loss resulting from the breach, not compulsion of the promisor to perform his promises. Therefore, 'willful' breaches have not been distinguished from other breaches. [C] The restrictions on contract remedies serve purposes not found in tort law. They protect the parties' freedom to bargain over special risks and they promote contract formation by limiting liability to the value of the promise. This encourages efficient breaches, resulting in increased production of goods and services at lower cost to society. [C] Because of these overriding policy

considerations, the California Supreme Court has proceeded with caution in carving out exceptions to the traditional contract remedy restrictions." [C]

The Harris court set forth as reasons for denying tort recovery in contract breach cases (1) the different objectives underlying the remedies for tort and contract breach, (2) the importance of predictability in assuring commercial stability in contractual dealings, (3) the potential for converting every contract breach into a tort, with accompanying punitive damage recovery, and (4) the preference for legislative action in affording appropriate remedies. [Cc]

[T]he foregoing policy considerations fully support our decision to overrule Seaman's rather than attempt to clarify its uncertain boundaries. (We observe that plaintiff has asked us to take judicial notice

1280

of certain records purportedly showing there were only a few jury verdicts involving Seaman's claims during the period from 1981 to 1994. Because jury verdicts are an inconclusive indicia of excessive litigation, and because defendant has raised some doubts regarding the accuracy and completeness of the submitted materials, the application for judicial notice is denied.)

***

Ninth Circuit Judge Kozinski expressed his candid criticism of Seaman's in a concurring opinion in Oki America, Inc. v. Microtech Intern., Inc. (9th Cir.1989) 872 F.2d 312, 314-317 (Oki America). Among other criticism, Judge Kozinski found the Seaman's holding

unduly imprecise and confusing. As he stated, "It is impossible to draw a principled distinction between a tortious denial of a contract's existence and a permissible denial of liability under the terms of the contract. The test... seems to be whether the conduct 'offends accepted notions of business ethics.' This gives judges license to rely on their gut feelings in distinguishing between a squabble and a tort. As a result, both the commercial world and the courts are needlessly burdened...." [C]

Judge Kozinski also mentioned the substantial costs associated with Seaman's litigation, and the resulting interference with contractual relationships. ***

[The Court discussed other critical case law and scholarship.]

***

As previously indicated, the Seaman's decision has generated uniform confusion and uncertainty regarding its scope and application, and widespread doubt about the necessity or desirability of its holding. These doubts and criticisms, express or implied, in decisions from this state and from other state and federal courts, echoed by the generally adverse scholarly comment cited above, convince us that Seaman's should be overruled in favor of a general rule precluding tort recovery for noninsurance contract breach, at least in the absence of violation of "an independent duty arising from principles of tort law" (Applied Equipment, supra, 7 Cal. 4th at page 515) other than the bad faith denial of the existence of, or liability under, the breached contract.

As set forth above, the critics stress, among other factors favoring Seaman's abrogation, the confusion and uncertainty accompanying

the decision, the need for stability and predictability in commercial affairs, the potential for excessive tort damages, and the preference for legislative rather than judicial action in this area.

Even if we were unimpressed by the nearly unanimous criticism leveled at Seaman's, on reconsideration the analytical defects in the opinion have become apparent. It seems anomalous to characterize as "tortious" the bad faith denial of the existence of a contract, while treating as "contractual" the bad faith denial of liability or responsibility

1281

under an acknowledged contract. In both cases, the breaching party has acted in bad faith and, accordingly, has presumably committed acts offensive to "accepted notions of business ethics." [C] Yet to include bad faith denials of liability within Seaman's scope could potentially convert every contract breach into a tort. Nor would limiting Seaman's tort to incidents involving "stonewalling" adequately narrow its potential scope. Such conduct by the breaching party, essentially telling the promisee, "See you in court," could incidentally accompany every breach of contract.

For all the foregoing reasons, we conclude that Seaman's should be overruled. We emphasize that nothing in this opinion should be read as affecting the existing precedent governing enforcement of the implied covenant in insurance cases. Further, nothing we say here would prevent the Legislature from creating additional civil remedies for noninsurance contract breach, including such measures as providing litigation costs and attorney fees in certain aggravated cases, or assessing increased compensatory damages covering lost

profits and other losses attributable to the breach, as well as restoration of the Seaman's holding if the Legislature deems that course appropriate. [Cc] Thus far, however, the Legislature has not manifested an intent either to expand contract breach recovery or to provide tort damages for ordinary contract breach.

The judgment of the Court of Appeal, reversing the trial court's judgment in plaintiffs favor and remanding the case for a retrial limited to the issue of damages under plaintiffs breach of contract cause of action, and for judgment in favor of defendant on plaintiffs bad faith denial of contract cause of action, is affirmed.

NOTES AND QUESTIONS

1. As the principal case indicates, the insurance context is the only firm category in which the courts are prepared to find an action in tort for breach of the covenant of good faith. Careau & Co. v. Security Pacific Business Credit, Inc., 222 Cal.App.3d 1371, 272 Cal.Rptr. 387 (1990) (noting the "well-developed history of recognizing" a tort remedy in insurance cases); Roehl Transp., Inc. v. Liberty Mut. Ins. Co., 2010 WI 49, 325 Wis. 2d 56, 784 N. W.2d 542 (tort remedy for failure to settle even when judgment was within policy limits); Willis v. Swain, 129 Haw. 478, 304 P.3d 619 (2013) (extending tort liability even in the absence of an underlying contract under the state's joint underwriting scheme). Courts have refused to extend liability to other contexts: Cates Construction, Inc. v. Talbot Partners, 21 Cal. 4th 28, 86 Cal.Rptr.2d 855, 980 P.2d 407 (1999) (refusing to extend tort liability to breach of surety bond). Intent is not a required element of bad faith: Zoppo v. Homestead Insurance, 71 Ohio St. 3d 552, 644

N.E.2d 397 (1994) (failure to conduct adequate investigation sufficient for finding of bad faith).

2. Should tortious relief be permitted where in-house counsel is dismissed for pursuing a legal agenda that he regards as ethically binding but corporate management finds incompatible with the profit-seeking motive of the corporation? GTE Products Corp. v. Stewart, 421 Mass. 22, 653 N.E.2d

1282

161 (1995) (allowing, in limited circumstances, in-house counsel's recovery for wrongful discharge, but refusing to grant it to plaintiff). The Stewart court, in making its decision, recognized that most jurisdictions which recognize employee actions for retaliatory discharge are split on also affording in-house counsel the same ability. See General Dynamics Corp. v. Rose, 7 Cal. 4th 1164 (1994) (concluding that in-house counsel may recover for wrongful discharge); cf. Balla v. Gambro, Inc., 145 III. 2d 492, 501 (1991) (holding that in-house counsel do not have a claim of retaliatory discharge). For this reason, an employee's title or status may be determinative or at least influential as to whether they will be afforded the opportunity to recover for wrongful discharge. See, e.g., Crowley v. Watson, 51 N.E.3d 69, 85 (2016) (rejecting defendant's argument that plaintiff served as in-house counsel and could not recover because most of his duties related to his administrative role).

Other "Business Torts"

There are several fields of the law in the business milieu that involve the imposition of economic injury on a person who is therefore

entitled to monetary damages or an injunction against continuing the conduct. These remedies were derived essentially from the philosophy of tort law, but they have now become separate fields of the law developing through statutory provisions, administrative regulations and their own independent concepts. Only a brief reference can be made here.

1. Copyright and Patent Infringement. Article I, § 8, cl. 8 of the U.S. Constitution provides that Congress has the power to "promote the Progress of Science and useful Arts by securing for limited Times to Authors and Inventors the exclusive Right to their respective Writings and Discoveries." Congress has exercised this power. See 17 U.S.C.A. §§ 101 et seq. (copyright); 35 U.S.C.A. §§ 1 et seq. (patents).

There are, of course, unsettled problems. Particularly relevant is the issue of federal preemption. See, for example, the twin cases of Sears, Roebuck & Co. v. Stiffel Co., 376 U.S. 225 (1964); and Compco Corp. v. Day- Brite Lighting, Inc., 376 U.S. 234 (1964), holding that there can be no common law protection of the functional design of a product. If it is capable of being patented, compliance with the statutory procedure is necessary; if it is not, it cannot be protected by the common law. "To allow a state by use of its law of unfair competition to prevent the copying of an article which represents too slight an advance to be patented would be to permit the state to block off from the public something which federal law has said belongs to the public." However, provided the torts are not construed to offer patent- like protection, they are not pre-empted. In Rodime PLC v. Seagate Technology, Inc., 174 F.3d 1294, 1306 (Fed. Cir. 1999), the court held that tortious interference and unfair

competition protect separate interests: they protect business relationships from wrongful interference or attack "unethical and oppressive business practices."

2. Trade Marks and Trade Names. A considerable body of learning has developed regarding trade marks and trade names. Much of it has been

common law, but the Lanham Act (Trademark Act of 1946, 15 U.S.C.A. §§ 1051 et seq.) has extensively revised and reorganized it.

3. Trade Secrets. Much of this is common law, but there are state statutes and a Uniform Trade Secrets Act. Issues of federal preemption give difficulty here, too.

4. Unfair Competition. The three previous topics have often been combined under the generic term "unfair competition," which is also inclusive of such matters as "passing off' of one's goods as another's or misappropriation of another's ideas, news items or unpublished writings. State statutes covering unfair trade practices, false advertising and similar matters are included.

5. Other Statutes Involving Regulation of Business. Federal statutes include The Sherman Antitrust Act, 15 U.S.C.A. §§ 1-7 (conspiracy in restraint of trade, attempt to monopolize), Clayton Antitrust Act, 15 U.S.C.A. §§ 12-27 (restraints and monopolies); Robinson-Patman Act, 15 U.S.C.A. §§ 12 et seq. (price discrimination); Federal Trade Commission Act, 15 U.S.C.A. §§ 41-58 et seq., and regulations. There are also various state antitrust statutes.

6. Labor Law. Many of the early cases on tortious interference with existing or prospective economic advantage involved contests between employers and employees. Today these have all been incorporated into the law of labor relations, both federal and state, and much of it statutory or based on administrative regulations or rulings.

7. Civil RICO. The Racketeer Influenced and Corrupt Organizations Act, 18 U.S.C.A. §§ 1961--1968, is primarily a criminal statute. However, Congress has provided a private cause of action for its breach under § 1964(c). Because of its potent remedies--treble damages and attorney's fees--the statutory cause of action has been increasingly asserted, especially in light of the Section's wide interpretation by the United States Supreme Court in Sedima, S.P.R.L. v. Imrex Co., Inc., 473 U.S. 479 (1985). The action is more thoroughly canvassed infra in Chapter 23.

2. Family Relations

Nash v. Baker

Court of Appeals of Oklahoma, 1974.

522 P.2d 1335.

ROMANG, JUDGE. The appellants, hereinafter referred to as plaintiffs, are five minor children whose mother, Marian Nash, brings this appeal as their natural guardian and next friend. The appellee is hereinafter referred to as the defendant.

Marian Nash filed the petition in her own right and as next friend of the infant plaintiffs, alleging that after Marian Nash and James Nash

had been husband and wife for about 18 years and had five children (the minor plaintiffs) of that union, the defendant, a wealthy widow, who

1284

knew or should have known of the marriage and children, lured James Nash, the husband and father, away from the plaintiffs by providing said James Nash with a finer home, sexual charms, and other inducements. The plaintiff Marian Nash sought to recover actual and punitive damages in her own right for the alienation of her husband's affections, loss of consortium, and loss of a prospective increased standard of living. In addition, as next friend of her children, she sought recovery of actual and punitive damages under the common law for alienation of their father's affections, interference with their family relationships, and "loss of the society, affection, assistance, moral support and guidance" of their father. The petition also alleged adultery by the defendant with said James Nash.

The trial court sustained the defendant's demurrer as to each of the minor plaintiffs' asserted causes of action and overruled it as to Marian Nash's suit in her own right. The latter suit was tried to a jury, resulting in a verdict for the defendant. The only questions before this court deal with whether any cause of action may be maintained on behalf of the minor children of a marriage, against a woman who entices away their father from the marital home.

The sole question remaining is whether ***a minor child has in Oklahoma a common law right to sue a third person whose luring away of the father breaks up the parents' marriage and deprives the child of the father's society and guidance. The common law

recognized no such right in the child. That the injured spouse has an action for alienation of affections, loss of consortium, or criminal conversation does not require that a cause of action be given to the child. ***The plaintiffs cite Prosser, Law of Torts 908 (3d ed. 1964) which, although recognizing that the majority of those jurisdictions which passed on the question have denied the child an action, predicts that in the future additional jurisdictions will allow his action. On the other hand, ***modern statutes abolishing causes of action for alienation of affections, breach of promise to marry, and related actions; the increasing failure of marriages, reportedly more than one in three ending in absolute divorce or permanent separation; and the recent liberalization of divorce in several more states, including a ground or grounds not based on "fault"; and the increase in the number of children whose parents have divorced and remarried; may well prevent the future development predicted by the late Professor Prosser. In addition, there may be a growing feeling that very often the "fault" leading to the breakup of a marriage may not be readily determinable in court, and that the "fault" which caused one spouse to be attracted to a third person was not the magnetism of such third person, but that of an emotional vacuum in the home.

Affirmed.

1285

NOTES AND QUESTIONS

The law of torts has been concerned not only with the protection of property and associated interests, but also with what may be called "relational" interests founded upon the relation in which plaintiff stands toward one or more third persons. W. Prosser and Keeton,

Torts § 124 (5th ed. 1984); Green, Relational Interests, 29 III. L. Rev. 460 (1934). Much development in this area has been based on claims alleging an interference with a family relationship. At early common law, most claims were brought by husbands for loss of economic services of a wife or child. Today there is potential for a claim to be brought by any member of the family unit and the focus is more likely to be on loss of intangible matters such as companionship or affection. The concentration here is on modern remedies.

Claims Based on Intentional Interference

1. Alienation of Affections.

A. Husband and Wife. In some states today a spouse may bring a claim against a third party for alienation of affections. The plaintiff must show that the spouse's mental attitude and conjugal kindness were converted by the defendant. Pankratz v. Miller, 401 N.W.2d 543, 547 (S.D. 1987) (no liability when alienated wife initiated and pursued the affair). Most courts have held that it is not necessary to show an act of adultery; in fact, the defendant need not be a romantic rival.

However, parents may be privileged to act when they reasonably believe it to be in the best interest of their child. Compare Koehler v. Koehler, 248 Iowa 144, 79 N.W.2d 791 (1956) (noting parental right to "advise and assist" child in marital decisions), with Glatstein v. Grund, 243 Iowa 541, 51 N.W.2d 162 (1952) (bad faith when husband's mother insisted on sleeping in the same room as the

couple, told the wife she was one of "a litter of pigs," and forced the wife to take contraceptives).

While the majority of jurisdictions have abolished the cause of action for alienation of affection, see Helsel v. Noellsch, 107 S.W.3d 231 (Mo. 2003), it lives on in a handful of states, see Fitch v. Valentine, 959 So. 2d 1012 (Miss. 2007) (justifying recognition in the "interest of protecting the marital relationship"). Abolition of the tort of alienation of affections was confirmed in Helsel, but cf. the tort of criminal conversation lives in North Carolina, Nunn v. Allen, 154 N.C.App. 523, 574 S.E.2d 35 (2002).

B. Parent and Child. If a child is abducted or defendant intentionally deprives a parent of a child's economic services, precedent supports a claim. Most courts have declined, however, to create an alienation-of-affections remedy either on behalf of a parent for loss of a child or a child for loss of a parent. Bartanus v. Lis, 332 Pa.Super. 48, 480 A.2d 1178 (1984) (finding no action for parent absent proof of elements in intentional infliction of emotional distress); Doe v. McKay, 183 III.2d 272, 233 111.Dec. 310, 700 N.E.2d 1018 (1988) (no cause of action when therapist encouraged daughter to recover memories of sexual molestation by her father). In Wolf v. Wolf, 690 N.W.2d 887 (Iowa 2005): both compensatory and punitive damages were awarded to father for mother's interference with award of custody.

1286

2. Criminal Conversation. This is a tort in which a married person may recover both compensatory and punitive damages by proving that the spouse and the defendant engaged in sexual intercourse. In the 17th Century, the action became preliminary to divorce

proceedings and, thus, divorce for adultery was introduced into the Law. How should damages be computed? Where both an action for criminal conversation and alienation of affection are pleaded, the jury should be instructed not to allow recovery for the same loss under both. When the crime of adultery has been abolished by the legislature or has been reduced to a misdemeanor with a slight fine, should this affect the tort remedy? Neal v. Neal, 125 Idaho 627, 873 P.2d 881 (App. 1993), aff'd in part on appeal in Neal v. Neal, 873 P.2d 881, 882 (Ct. App. 1993) (describing the action as an anachronism).

3. Statutory Abolition of Actions. Beginning in the late 1930's, legislatures in a substantial number of states have abolished tort actions based on intentional interference with family relations that carry an accusation of sexual behavior. See, e.g., Ala. Code § 6-5-331; Md. Code Ann., Cts. & Jud. Proc. § 5-801; N.Y. Civ. Rights Law § 80-a. The statutes, known as "Anti-Heart Balm" laws, have generally withstood constitutional challenge. Do you think there should be an action against a spouse or lover for intentional infliction of emotional distress? See Speer v. Dealy, 242 Neb. 542, 495 N.W.2d 911 (1993). For an application of a statute eliminating the action for alienation of affections, see Bailey v. Faulkner, 940 So.2d 247 (Ala. 2006) (action by husband against pastor who had relationship with wife during counseling). What policy reasons support such actions? If a state has an "Anti-Heart Balm" statute, should a child's claim for alienation of affections be automatically barred? See Russick v. Hicks, 85 F. Supp. 281 (W.D. Mich. 1949).

Claims Based on Negligent Interference

4. At common law a husband was legally entitled to his wife's earnings and services. Courts protected the husband's right to these "assets" against negligent interference by third parties. The action is known as one for loss of consortium. The husband also may be able to recover general damages for loss of companionship and sexual relations. Because a wife had no legal interest in her husband's personal property, she was denied a claim.

5. With the growth of legal equality between the spouses, it might be anticipated that the cause of action for loss of consortium would disappear. Instead, beginning with Hitaffer v. Argonne Co., Inc., 183 F.2d 811 (D.C. Cir. 1950), cert, denied, 340 U.S. 852 (1950), courts in many states have permitted both spouses to bring a claim for loss of consortium. See, e.g., Rodriguez v. Bethlehem Steel Corp., 12 Cal. 3d 382, 525 P.2d 669, 115 Cal. Rptr. 765 (1974); Millington v. Southeastern Elevator Co., 22 N.Y.2d 498, 239 N.E.2d 897, 293 N.Y.S.2d 305 (1968). The emphasis on the damage element in the claim has shifted away from economic loss to intangibles such as loss of companionship and affection.

6. Can the claim stand where the marriage has not been formalized? Authority is divided. For a decision insisting on the existence of a formalized marriage, see Elden v. Sheldon, 46 Cal. 3d 267, 758 P.2d 582, 250 Cal. Rptr.

254 (1988) (requiring formalized marriage to prevent burden on courts of determining whether cohabitating couple is "closely related"). New Mexico is the exception to the rule: Loyoza v. Sanchez, 133 N.M. 579, 66 P.3d 948 (2003) (abrogated on other grounds).

7. Although loss of consortium could be viewed as a wholly independent injury, most courts regard it as a derivative claim, subject to all defenses that could be asserted against the spouse who was physically injured. See Buckley v. Nat'l Freight, 90 N.Y.2d 210, 659 N.Y.S.2d 841, 681 N.E.2d 1287 (1997) (discussing various jurisdictions' approaches to joining a loss of consortium claim).

8. The first court to adopt a loss of parental consortium common law action was the Supreme Judicial Court of Massachusetts. Ferriter v. Daniel O'Connell's Sons, 413 N.E.2d 690 (Mass. 1980). Today, a majority of states recognize claims for loss of companionship or loss of parental consortium when a child seeks a recovery from a defendant who has either injured or killed his or her parent. See Campos v. Coleman, 123 A.3d 854, 863-68 (2015) (considering the majority of authority supporting the recognition of the cause of action for loss of parental consortium); see also Horner v. Sanitop, Inc., 141 P.3d 1099 (2006) ("general damages, such as loss of... companionship, will be presumed upon death when the plaintiff is the... child... of the decedent"). Some states recognize the tort through statute: La. C.C. Art. 2315 (extending loss of consortium to any party who could have brought an action for wrongful death); and see Thompson v. Love, 661 So. 2d 1131, 1132 (Miss. 1995) (declining to create a cause of action for minor child to recover for loss of parental consortium from a third party tortfeasor who has

injured his parent, instead leaving its creation to the state legislature).

As mentioned above, many states recognize loss of parental consortium when a parent is actually killed. Claims for loss of parental consortium stemming from parental injury, on the other hand, has caused much more disagreement among the courts. At least one state has recognized loss of parental consortium claims arising from parental injury via statute. See R.I. Gen. Laws § 9--1-41(b) (2012); cf. Lambert v. Franklin Real Estate Co., 37 S.W.3d 770, 780 (Ky. Ct. App. 2000) (determining that loss of parental consortium should likewise be limited to cases involving the wrongful death of the parent and should not include severe injuries to parents). Claims by parents solely for loss of companionship of their injured children has caused similar disagreement among the states. Elgin v. Bartlett, 994 P.2d 411, 419 (Colo. 1999) (holding loss of filial consortium because of a child's injury is not a viable claim available to parents under Colorado law). Finally, the success of a loss of consortium claim may depend on the status or age of the child. See Estate of Wells by Jeske v. Mount Sinai Med. Ctr., 183 Wis. 2d 667, 515 N.W.2d 705 (1994) (noting that Wisconsin permits recovery for loss of filial consortium of minor, but not adult, children).

What about siblings? Wachocki v. Bernalillo Cnty. Sheriffs Dep't, 150 N.M. 650, 265 P.3d 701 (2011) (holding that adult siblings may have a cause of action for loss of consortium if they are "mutually dependent").

CHAPTER 23 TORTS IN THE AGE OF STATUTES

The Twentieth Century saw an explosion in the number of statutes enacted by state legislatures and by Congress. The common law of torts is now riddled with statutory inroads. Legislative change has been noted in contributory negligence, contribution between tortfeasors, the abrogation of immunities, limitation periods, and many other topics touched on in the Torts course. This chapter examines those instances where statutes may impliedly or expressly provide for or take away a remedy in tort. This chapter is divided into several sections. The first section addresses implied rights of action derived from state law, constitutional law, and federal statutes. The next section addresses express rights of action created by federal statute. Finally, the chapter turns to the question of tort reform. Our present century has witnessed an increase in legislative activity, especially as regulation flowed from the wreckage of the 2009 financial crisis and subsequent retrenchment. An antiregulatory strain has taken hold in recent years. For example, in the wake of the relaxation of environmental regulatory protections a reexamination of common law remedies is likely to follow. As we observed in Chapter 15, Congress has enacted legislation that restricts resort to tort law. The issue of federal preemption often touches prescription drugs and medical devices and the remedial power of the common law still has great influence; it is not excluded unless it cannot stand with the regulatory regime. In a different sphere, that of protective legislation to immunize firearm

manufacturers from liability, the Supreme Court of Connecticut in Soto v. Bushmaster Firearms International LLC, 331 Conn. 53, 202 A.3d 262 (2019), found that there could be liability for negligent marketing of the firearm that was used in the Sandy Hook killings if plaintiffs can prove their allegations that defendants' advertising encouraged consumers to use its weapons for illegal purposes, thus avoiding the preemptive effect of the Protection of Lawful Commerce in Arms Act ("PLCAA"). The Supreme Court of the United States denied cert, on the case, leaving the Connecticut decision to stand and a trial to be held on remand.

As you study the chapter keep in mind that the balance being struck between the legislature and courts in granting, implying, interpreting, and even removing causes of action based upon the Constitution and statutes. What do you think are the important issues to be considered?

1290

1. Implied Rights of Action

(A) Implied Rights of Action from State Law

The following cases, both from the Oregon Supreme Court both deal with the question of whether a right of action may be implied from state statutory law, reaching opposite conclusions. How would you distinguish the two cases?

Burnette v. Wahl

Supreme Court of Oregon, 1978.

284 Or. 705, 588 P.2d 1105.

HOLMAN, Justice. Three identical cases have been consolidated for appeal. Plaintiffs are five minor children aged two to eight who, through their guardian, are bringing actions against their mothers for emotional and psychological injury caused by failure of defendant-mothers to perform their parental duties to plaintiffs. Plaintiffs appeal from orders of dismissal entered after demurrers were sustained to the complaints and plaintiffs refused to plead further.

The complaints allege that plaintiffs are in the custody of the Children's Services Division of the Department of Human Resources of the State of Oregon and are wards of Klamath County Juvenile Court.

The complaints are substantially identical, each one being in three counts. Among these counts are strewn various allegations of parental failure upon which the causes of action rest. They are:

"1. Since [date], defendant intentionally, wilfully, maliciously and with cruel disregard of the consequences failed to provide plaintiff with care, custody, parental nurturance, affection, comfort, companionship, support, regular contact and visitation.

"2. She has failed in violation of ORS 109.010 [1] to maintain plaintiff, who, due to ***age and indigency, is poor and unable to work to maintain ***self.

* * *

[1] '"ORS 109.010 Duty of Support. Parents are bound to maintain their children who are poor and unable to work to maintain

themselves; and children are bound to maintain their parents in like circumstances."

"3. She has abandoned plaintiff by deserting the child with intent to abandon ***and with intent to abdicate all responsibility for ***care and raising, in violation of ORS 163.535. [2]

* * *

[2] "ORS 163.535 Abandonment of a Child. (1) A person commits the crime of abandonment of a child if, being a parent, lawful guardian or other person lawfully charged with the care or custody of a child under 15 years of age, he deserts the child in any place with intent to abandon it.

"(2) Abandonment of a child is a Class C felony."

"4. She has neglected the plaintiff by negligently leaving ***unattended in or at a place for such period of time as would have been

1291

likely to endanger the health or welfare of the plaintiff, in violation of ORS 163.545. [3]

* * *

[3] "ORS 163.545 Child Neglect. (1) A person having custody or control of a child under 10 years of age commits the crime of child neglect if, with criminal negligence, he leaves the child unattended in or at any place for such period of time as may be likely to endanger the health or welfare of such child.

"(2) Child neglect is a Class A misdemeanor."

"5. She has refused or neglected without lawful excuse to provide support for plaintiff, in violation of ORS 163.555. [4]

* * *

[4] ORS 163.555 Criminal Nonsupport. (1) A person commits the crime of criminal nonsupport if, being the parent, lawful guardian or other person lawfully charged with the support of a child under 18 years of age, born in or out of wedlock, he refuses or neglects without lawful excuse to provide support for such child.

"(3) Criminal nonsupport is a Class C felony."

"6. Defendant has maliciously, intentionally, and with cruel disregard of the consequences, deserted and abandoned her child.

"7. Defendant has alienated the affections of the plaintiff in that she has intentionally, wilfully and maliciously abandoned, deserted, neglected and failed to maintain regular contact or visitation, or to provide for the plaintiff and has deprived plaintiff of the love, care, affection and comfort to which plaintiff is entitled."

It is apparent that the first allegation is general in nature and is intended to be all-encompassing. The second, third, fourth and fifth allege violation of statutory duties in which abandonment and desertion comprise the central theme. The sixth allegation is one of abandonment and desertion purportedly based on common law. The seventh allegation is an attempt to allege alienation of affections. Although these allegations of parental failure allege lack of support and physical care along with affectional neglect, from the allegations of injury in the complaint and the statements made in plaintiffs' brief,

it appears that the injuries claimed are solely emotional and psychological.

Preliminary to a more detailed discussion, it should be noted that these claims of parental failure are different from those tort claims usually made upon behalf of children against parents. The adjudicated cases concern physical or emotional injuries resulting from physical acts inflicted upon children such as beatings and rapes and from automobile accidents. Plaintiffs admit they can cite no cases permitting them to recover from their parents for solely emotional or psychological damage resulting from failure to support, nurture and care for them.

The legislature, recognizing the necessity of parental nurture, support and physical care for children, has enacted a vast array of laws for the purpose of protecting or vindicating those rights. These are much more extensive and all-inclusive than are those statutes alleged to have been violated in plaintiffs' allegations of tortious conduct. [5]

* * *

[5] Among these laws are ORS 108.040, providing an action against both parents for family necessities: ORS 108.110 et seq., which allow a petition for the support of children to be brought against a parent by the other parent or a state agency for the support of the children; ORS ch. 110. providing both criminal and civil means for reciprocal enforcement between states of the right of support for children; ORS 411.120(4), providing for assistance to dependent children; ORS ch. 416, establishing the relative responsibility law (specifically see ORS 416.090, 416.100, and 416.220 for the means

of enforcement); ORS ch. 418, providing for child welfare services (specifically see ORS 418.135(1) and 418.460, concerning enforcement of parental duties); ORS ch. 419, establishing juvenile courts (specifically see ORS 419.513, 419.515, and 419.517 concerning enforcement of support of children by parents).

1292

ORS ch. 418 establishes extensive provisions for aid to dependent children, and it is under the provisions of this chapter and as wards of the juvenile court that plaintiffs are presently attempting to have their needs met. [The court discusses specific sections of the chapter.]

We recognize that this is not a proceeding to secure parental nurturing, support and physical care for plaintiffs, but rather an action for psychological injury claimed to have been caused by the absence of these services. However, the statutory enactments demonstrate that the legislature has put its mind to the deprivations of which plaintiff children are alleged to be victims and has attempted to remedy such situations by enacting a vast panoply of procedures, both civil and criminal, to insure that children receive proper nurturing, support and physical care. It has never undertaken to establish, however, a cause of action for damages for any emotional injury to the child which may have been caused by a parent's refusal to provide these services. This failure of the legislature to act is significant because this is not a field of recovery which has heretofore been recognized by courts and it would therefore be natural for it to have provided such a remedy if it thought it was wise in view of the social problem it attempts to solve and the statutory

provisions it has enacted for that purpose. It has had no difficulty in the past in creating new causes of action for persons aggrieved by conditions which it is attempting to rectify. Examples are the creation of causes of action, including punitive damages, in aid of enforcing ethics in the marketplace, ORS 646.638; actions for compensatory and punitive damages for unlawful discrimination by places of public accommodation, ORS 30.680, and by employers, ORS 659.030 and 659.121; and actions for double and triple damages for timber trespass, ORS 105.810 and 105.815.

The establishment by courts of a civil cause of action based on a criminal or regulatory statute is not premised upon legislative intent to create such an action. It is obvious that had the legislature intended a civil action it would have provided for one, as legislatures many times do. Therefore, the underlying assumption is that it was not intended that the statute create any civil obligation or afford civil protection against the injuries which it was designed to prevent. When neither the statute nor the common law authorizes an action and the statute does not expressly deny it, the court should recognize that it is being asked to bring into existence a new type of tort liability on the basis of its own appraisal of the policy considerations involved. If a court decides to create a cause of action for the act or omission which violates the statute, the interest which is invaded derives its protection solely from the court although the

legislative action in branding the act or omission as culpable is taken into consideration by the court in deciding whether a common law

action should be established. If a civil cause of action based upon a statute is established by a court, it is because the court, not the legislature, believes it is necessary and desirable to further vindicate the right or to further enforce the duty created by statute.

Because it is plain to the legislature that it could have created the civil liability and it has not, courts must look carefully not only at the particular statute establishing the right or duty but at all statutes which might bear either directly or indirectly on the legislative purpose. If there is any chance that invasion into the field by the court's establishment of a civil cause of action might interfere with the total legislative scheme, courts should err on the side of non-intrusion because it is always possible for the legislature to establish such a civil cause of action if it desires. Courts have no omnipotence in the field of planning, particularly social planning of the kind involved here. Courts should exercise restraint in fields in which the legislature has attempted fairly comprehensive social regulation.

There is no doubt but that the statutory provisions previously cited show a strong state policy of requiring the kind of parental nurturing, support and physical care of children which the defendants here are alleged to have denied their children. As previously indicated, it does not follow as a matter of course that it would be wise or judicious to vindicate that policy by a tort action for damages by children against their mothers. The state also has other policies within its statutory plan of which such a cause of action might well be destructive, particularly the policy of reuniting abandoned children with their parents, if possible. ***

It is recognized by the statutory scheme that in some instances the reestablishment of a biological family is impossible and it therefore provides for a proceeding to terminate parental rights in order that a new family unit for the child may be formed. ***

It is significant that plaintiffs' complaints do not allege that proceedings for the termination of the defendants' parental rights have taken place. In such circumstances, it would be exceedingly unwise for this court to step in and to initiate a new and heretofore unrecognized cause of action in a field of social planning to which the legislature has devoted a great deal of time and effort in evolving what appears to be an all-encompassing plan. Those persons designated by statute for aiding the plaintiffs in these cases have not yet taken the step for which the plan provides when there is no longer any hope of reestablishing these children in a family unit with their mothers. Tort actions such as the present ones might well be destructive of any plans the social agencies and the juvenile court might have for these children. It is inappropriate for this court to insert a new cause of action into the picture.

1294

***Plaintiffs are unable to point to any literature in the field of child care or family planning which advocates an action for money damages to vindicate a right of the kind asserted here.

In addition, there is a limitation to the extent to which use may be made of tort actions for the purpose of accomplishing social aims. If there is ever a field in which juries and general trial courts are ill equipped to do social engineering, it is in the realm of the emotional relationship between mother and child. It is best we leave such

matters to other fields of endeavor. There are certain kinds of relationships which are not proper fodder for tort litigation, and we believe this to be one of them. ***

In addition to the contention that defendants should be liable for civil damages because of their violation of criminal and regulatory statutes, plaintiffs also contend that defendants are responsible because of the infliction of severe emotional distress by intentional acts. Plaintiffs allege that defendants intentionally deserted and abandoned them; however, they do not contend that defendants deserted them for the purpose of inflicting emotional harm upon them. We recognize that this tort usually also encompasses the infliction of emotional harm under circumstances from which a reasonable person would conclude that harm was almost certain to result. ***

Plaintiffs generally contend that without respect to previously recognized theories of recovery, we should recognize a new tort of parental desertion. For all the reasons previously given in declining to use recognized theories of recovery, we also decline this invitation.

The judgment of the trial court is affirmed.

LINDE, Justice, dissenting. ***The simple issue before us is whether a young child who allegedly has suffered severe mental and emotional injuries as a result of being deserted and abandoned by a parent acting "maliciously, intentionally, and with cruel disregard of the consequences"--conduct which the legislature has declared to be a crime--may upon proper proof hold the parent responsible in damages for these severe mental and emotional injuries. Contrary to

the majority opinion, I believe that these allegations, which plead a violation of ORS 163.535, state a claim on which a child so injured may go to trial. [1]

* * *

[1] ORS 163.535:

(1) A person commits the crime of abandonment of a child if, being a parent, lawful guardian or other person lawfully charged with the care or custody of a child under 15 years of age, he deserts the child in any place with intent to abandon it.

(2) Abandonment of a child is a Class C felony.

Since the complaint alleges at least one cause of action, the validity of the other theories of recovery contained in the complaint need not be considered in overruling the demurrer. ***

In reaching this conclusion, I differ with the majority's treatment of its two crucial premises: (1) the source of civil liability for violation of criminal laws, and (2) the significance to be accorded to Oregon's child protection laws.

1295

Liability for Damages from Prohibited Conduct. It should be noted at the outset that awarding civil damages for violations of prohibitory laws is not an uncommon or radical theory of recovery. The question when the victim of criminal or otherwise prohibited conduct may recover damages from the wrongdoer is increasingly important in many areas of law. In a number of recent cases the issue has occupied the United States Supreme Court and the federal courts, whose greater attention to statutory premises of liability probably

reflects the fact that these courts are not empowered to formulate common law torts unrelated to the Constitution or laws of the United States. [C] Thus the Supreme Court has also referred to potential civil liability under state law as one factor in determining whether such liability arises implicitly from an act of Congress. [C] Apart from these differences, however, federal and state courts face the same question when prohibitory legislation implies a civil liability toward those for whose protection the legislation is enacted and when it does not. The answer depends first on whether a legislative policy to allow or to deny a civil remedy can be discerned in the text or the legislative history of the statute. If neither can be discerned, then it depends on whether the plaintiff belongs to the class for whose special protection the statute was enacted and whether the civil remedy would contribute to or perhaps detract from achieving the object of the legislation. [C]

***The American Law Institute's Restatement of the Law (Second) of Torts (Am. Law Inst. Tentative Draft No. 23, 1977), lists a number of other illustrations in its discussion of proscriptive or prescriptive statutes as sources of civil liability. [2] Sometimes a common law court will assimilate the statutory duty into an existing principle of liability... but that is not always so. See Restatement of the Law (Second) of Torts, Tentative Draft No. 23, 1977, § 874A, comment f. [3]

* * *

[2] Restatement of the Law (Second) of Torts § 874A (Tentative Draft No. 23, 1977):

"3. A statute makes it a crime to have sexual intercourse with a previously chaste female under the age of 17, even though she

factually consents. The court may hold that the tort action of battery will lie, regardless of the consent.

"4. A federal act makes it a crime to intercept and divulge a telephone conversation. The court may 'assimilate' this conduct to the torts of defamation and invasion of the right of privacy and grant damages. ***

"6. A statute makes it a crime to utter insulting and abusive language to another publicly. The court may hold that a civil action will lie, amounting to the intentional infliction of emotional distress. ***

"8. A statute makes it a crime to seduce a woman under promises of marriage. The court may hold that this conduct gives rise to a tort action for damages. ***

"14. A statute imposes a criminal penalty upon an employer who, upon request of a former employee, fails to supply a 'service letter' providing details of his service. The court may supply a civil action for damages for violation.

[3] As early as 1934, and until 1965, the original Restatement (Second) of Torts, § 286, stated:

"The violation of a legislative enactment by doing a prohibited act, or by failing to do a required act, makes the actor liable for an invasion of an interest of another if:

"(a) the intent of the enactment is exclusively or in part to protect an interest of the other as an individual; and

"(b) the interest invaded is one which the enactment is intended to protect; and,

"(c) where the enactment is intended to protect an interest from a particular hazard, the invasion of the interests results from that hazard; and,

"(d) the violation is a legal cause of the invasion, and the other has not so conducted himself as to disable himself from maintaining an action."

1296

Of course, the question of civil recovery for breach of a statutory duty can be an issue only when the legislation itself is silent on the point. If the legislature either provides for a civil remedy or clearly indicates that it means other provisions for enforcement to be complete and exclusive, there is nothing for a court to decide. It would help to clarify not only private rights but also the particular public policy if the legislative assembly as a routine step in the drafting of penal legislation faced the question of its civil consequences, or alternatively, if it were to enact a general formula for determining these consequences when a statute is otherwise silent.

Unfortunately legislatures do neither, but nothing can be inferred from that fact, given the existing practice of recognizing such consequences when the nature of the protective statute appears to imply them. The majority overstates the case when it equates legislative silence with an "underlying assumption ***that it was not intended that the statute create any civil obligation or afford civil protection against the injuries which it was designed to prevent." Nor does it follow, when a court finds that the duty created or defined by the statute does imply a civil cause of action, that the court is engaged in pronouncing common law. The difference between a new

common law theory of recovery in tort or otherwise and a civil claim based on a statute is obvious: The latter claim stands and falls with the statute from which it is implied, and it will disappear as soon as the amendment or repeal of the statute indicates a reconsideration of the previous public policy. Thus, while a court is often left at large to divine the implications of a statutory policy, it is equally an overstatement to say that the court simply makes its own judgment whether to "create a cause of action" deriving "solely" from the court's own appraisal whether additional protection for the claimed interest is "necessary and desirable." [4]

* * *

[4] Long ago, Chief Justice Harlan F. Stone deplored the reluctance of "modern courts [to] resort to standards of conduct set up by legislation" as sources of liability or other consequences beyond those provided by the legislation. "The statute was looked upon as in the law but not of it, a formal rule to be obeyed, it is true, since it is the command of the sovereign, but to be obeyed grudgingly, by construing it narrowly and treating it as though it did not exist for any purpose other than that embraced within the strict construction of its words. It is difficult to appraise the consequences of the perpetuation of incongruities and injustices in the law by this habit of narrow construction of statutes and by the failure to recognize that, as recognitions of social policy, they are as significant and rightly as much a part of the law, as the rules declared by judges." Stone, The Common Law in the United States, 50 Harv.L.Rev. 4 (1936).

The relevance of criminal or regulatory laws to civil liability is more complex than merely being an element "taken into consideration by

the court in deciding whether a common law action should be established," as the majority puts it. Such laws express distinct kinds of policies. First, the most familiar criminal laws are redefinitions of common-law crimes

1297

against private persons or property. They have equally familiar civil analogues in common-law torts. Only "victimless crimes" and crimes deemed to endanger the public as a collectivity, such as bribery, counterfeiting, or tax evasion, are likely to lack a corresponding civil liability. Violations of game laws or environmental protection laws may be other examples. Second, regulatory laws specify standards of socially responsible conduct for the protection of persons endangered by the conduct. While the tort standard may go further, we have recognized the force of the criminal or regulatory standard in negligence cases even when it was set by agencies or local governments that presumably could not themselves create civil liability whether or not they had such an intent. [Cc] Third, governmental sanctions, penal or otherwise, may be enacted to add governmental enforcement to the recognized obligations of a relationship existing apart from the legislation. In such a situation the "underlying assumption," to use the majority's phrase, is hardly that the penal sanction makes the civil obligation unnecessary. Rather, the statute shows that the obligation is considered of such importance that it deserves enforcement by public prosecution.

The Child Protection Laws. It can hardly be questioned that a statute like 163.535, which makes it a crime intentionally to desert and abandon a child, is of the third kind. It and the related sections did

not enact a novel prohibition against parental neglect for the convenience of the general public or the protection of taxpayers. They enacted a legislative definition and public enforcement of certain minimal obligations of an existing relationship. Jurisprudentially it might be said that parents have a duty not to abandon and desert their young children because ORS 163.535 makes it a crime to do so, but a legislator would surely think ORS 163.535 should make it a crime to abandon and desert a child because the parent's existing duty--the duty to the child, not to the state--deserved governmental reenforcement. It is the parent's duty thus recognized under Oregon law that plaintiffs invoke in these cases.

The majority does not really deny that ORS 163.535 constitutes such a legislative recognition and reenforcement of the parent's private obligation to the child, not of some socially convenient behavior. Rather, the majority would deny a remedy for the intentional breach of this obligation on the ground that other public policies militate against such a remedy. Upon examination, the majority's statutory citations refer to the single policy of maintaining and preserving the position of the child within a functioning family as long as this is possible. Without in any way questioning that this is indeed the state's public policy, I do not agree that it supports the conclusion that the legislature meant to deny the child a remedy for injuries from a parent's unlawful acts.

First, it must be kept in mind what conduct violates ORS 163.535. The statute makes it a felony to desert one's child with intent to abandon it. Of course, we have no evidence of the actual facts in

these cases, but the allegations are that defendants did desert and abandon their children

1298

"maliciously, intentionally, and with cruel disregard of the consequences." If that is true, the parents have in fact ended the family unit, so that solicitude about not impairing it by litigation may sacrifice the children's legal rights to a pious hope. Contrary to the majority, I do not believe it is this court's own judgment of the possible effects of litigation on family relations that matters (a question on which counsel was unable to enlighten us and that, if taken seriously, is hardly within judicial notice) but rather what view of these effects may be attributed to the legislature. More important for interpreting the legislative policy, however, the statute means that a district attorney or grand jury on the alleged facts could prosecute the parents for a felony. It is incongruous to hold that the legislature provided for a felony prosecution of parents who egregiously violate a duty toward their children, but that it meant to exclude civil actions on behalf of the maliciously abandoned children for fear of impairing the family unit. To hold that the plaintiffs cannot invoke this duty, one must assume a legislative policy that a deserted and abandoned child (or a guardian on its behalf) should ask a district attorney to seek the criminal punishment of the parent for this desertion, but that the child should have no claim that would be of any benefit to itself. That seems too unlikely a policy to attribute to the legislature without some showing that it was intended.

Moreover, the majority's premise proves too much. For purposes of the issue of law before us on these demurrers, it can be assumed

that the plaintiffs have suffered actual, demonstrable injuries of a kind for which the law provides money damages against defendants other than parents, that defendants have assets from which these real injuries of the plaintiffs could be compensated, and that defendants caused these injuries by intentionally breaching a specific duty toward plaintiffs that is recognized in Oregon law. Perhaps the explanation for the majority's unwillingness to follow these assumptions to their conclusion is that the injuries alleged are psychological and emotional rather than physical. But if a civil remedy is denied on the majority's premise that it is precluded by a state policy of preserving family unity, that premise would apply equally to bar recovery of damages by a child crippled by physical abuse. [5] And despite the majority's reference to statutory proceedings for the termination of parental rights, it is at least questionable that a termination proceeding would create rights to a financial recovery to compensate for such very real and costly harm caused before the termination proceeding.

* * *

[5] Defendant presented a "parade of horribles" such as actions for psychological or emotional injury from receiving fewer Christmas gifts than a sibling and the like. I note this only to point out that the argument misses the point. The nature of the breach of duty in this case is fixed by ORS 163.535 and would not give rise to an expandable common law precedent. As far as the present issue is concerned, the case would be the same if a child had been deliberately abandoned in an unheated mountain cabin and lost a limb to frostbite or suffered other permanent injuries from lack of food or pneumonia.

Nothing is said here about claims based on other statutes invoked by plaintiffs that deal with general but unintentional neglect or nonsupport of children. The provision of alternative social services relied on by the majority may militate against implying a civil remedy for these less final and culpable violations of parental duty.

1299

Although the majority does not say so, its premise is the equivalent of the doctrine of intrafamily tort immunity which Oregon has abandoned at least with respect to intentional torts, though attributed here to a supposed legislative policy subordinating legal claims of children against their parents to reliance on "protective social services." I perceive no such prescribed reliance on social services when parents who have deliberately mistreated their children in a manner made criminal by statute have the assets to be responsible for the harm caused thereby. In my view, plaintiffs have alleged at least one triable cause of action arising from an alleged intentional violation of duties recognized in ORS 163.535. Therefore, the demurrers should have been overruled.

LENT, J., joins in this dissent.

Nearing v. Weaver

Supreme Court of Oregon, 1983.

295 Or. 702. 670 P.2d 137.

LINDE, JUSTICE: In 1977 the Legislative Assembly enacted an "Abuse Prevention Act" to strengthen legal protection for persons threatened with assault by a present or former spouse or a cohabitant. 1977 Or.Laws ch. 845. The means chosen for this

purpose included the use of temporary restraining orders, injunctions, and temporary child custody orders, [C], and mandatory provisions for the warrantless arrest upon probable cause of a person believed to have violated such an order. [C] The present case requires us to decide whether officers who knowingly fail to enforce a judicial order under the 1977 act are potentially liable for resulting harm to the psychic and physical health of the intended beneficiaries of the judicial order, over defenses of official discretion and official immunity. We hold that these defenses do not preclude potential liability.

The case is on appeal from the circuit court's summary judgment for defendants, affirmed by the Court of Appeals. The Court of Appeals did not explain the basis for its decision.

The complaint alleged the following facts. Plaintiffs are Henrietta Nearing and her two children, Robert and Jeanette, respectively 4 and 3 years old. Henrietta Nearing was separated from her husband in November 1979. On April 16, 1980, the husband entered plaintiffs' home without permission and struck Henrietta. She reported this to one of the defendant police officers, Martin Weaver, causing her husband to be arrested and charged with assault. The next day the circuit court issued an order restraining the husband from molesting plaintiffs or entering the family home. The order was served on the husband, and a copy of the order and proof of service were delivered to the police department of defendant City of St. Helens.

1300

On May 12 and 13, 1980, the husband again entered plaintiffs' home without permission, first damaging the premises, and thereafter

attempting to remove the children. Henrietta Nearing reported these incidents to defendant Weaver and asked him to arrest her husband because she was frightened of his violent proclivities. The officer confirmed the validity of the restraining order and the damage to plaintiffs' home but declined to arrest the husband on the ground that the officer had not seen the husband on the premises.

On three subsequent occasions in May, 1980, the husband returned to plaintiffs' address, sought entry to the home, and on the last occasion assaulted Henrietta's friend and damaged his van. When Henrietta reported this to defendants Weaver and Sauls on May 27, 1980, Weaver told her that the St. Helen's police would arrest the husband for violating the restraining order "because it was Robert Lee Nearing Sr.'s second offense," but no such action was taken. Two days later, on May 29, Nearing, Henrietta's husband, telephoned her and threatened to kill her friend. On June 1, Nearing intercepted the friend and plaintiffs in front of the home, repeated the threat, and assaulted the friend.

The complaint alleges the defendant officers' knowledge of the relevant facts. It further alleges that as a "proximate result" of their failure and refusal to arrest her husband, Henrietta has suffered "severe emotional distress and physical injuries" further described in the complaint and that the children have suffered "acute emotional distress," have been "upset," have had difficulty sleeping, and have suffered "psychological impairment."

Defendants denied the allegations except for the identity and status of defendants and pleaded affirmative defenses of immunity and

discretion. Plaintiffs moved to strike the affirmative defenses and assigned denial of the motion as error on appeal.

***

The question, therefore, is whether plaintiffs pleaded an infringement by defendants of a legal right arising independently of the ordinary tort elements of a negligence action. It is clear that plaintiff did so.

The complaint alleges facts that, if proved, obliged the St. Helens police officers to respond to plaintiffs' call for protection against the exact kind of harassment by the elder Robert Nearing that is said to have occurred, and it alleges that the officers refused to enforce the restraining order in the manner prescribed by law. The duty defendants are alleged to have neglected therefore is not an ordinary common law duty of due care to avoid predictable harm to another. It is a specific duty imposed by statute for the benefit of individuals previously identified by a judicial order.

***

1301

In this case a duty specifically towards these plaintiffs arises from the statute coupled with the court order. A plaintiff, of course, may plead and argue an action both under a theory of negligence and under another statutory or common law theory if he or she so chooses; actions based on injuries from defective products are a familiar example. When separate legal theories are said to require the same result on the same alleged facts, that contention should be made clear.

In this case, the issue below was the adequacy of defendants' defenses; no objection is raised to plaintiffs complaint. And plaintiffs reference to "negligence" in this case was immaterial to the alleged liability, if "negligence" is used in the sense of "carelessness" or "failure to use due care" rather than merely as a conventional legal totem, because the result would not be different if defendants had acted, or failed to act, willfully or intentionally or with some other state of mind. It must be recalled what role the allegation of "negligence" plays in an ordinary common law case. In general terms that role is to invoke a duty to take reasonable care not to cause a risk of a foreseeable type of harm to a foreseeable class of plaintiffs. Here the risk, the harm, and the potential plaintiff were all foreseen by the lawmaker and, in McEvoy and in this case, by a court. It was not left to the clerk in Brennen, the lawyer in McEvoy, or the officers in this case to foresee a possible risk and to form a "reasonable" opinion as to what "due care" might be required to avoid it. Such ad hoc judgments are exactly what the legislature meant to overcome when it enacted the obligation to enforce judicial orders.

This does not mean that the obligation creates absolute liability for resulting harm. There may be various defenses, for instance that the defendant made a good faith effort to perform, or that he was prevented from doing so by one or another obstacle, either factual or legal. The officer would not be liable, for instance, for failing to make an unconstitutional arrest. Whatever would be a defense under the statute is a defense to civil liability. But such defenses differ from a claim that failing to perform the duty created by the legislature to prevent harm by enforcing court orders is nothing other than a lack

of due care toward the world at large and that liability therefore extends only to physical but not psychic or emotional injuries actually caused by that failure.

[The order] clearly gave rise to a duty of defendants toward the plaintiffs under the 1977 act. [The Act] prescribes that a peace officer "shall arrest and take into custody a person without a warrant" when the officer has probable cause to believe that an order under the statute has been served and filed and that the person has violated the order. Subsection (3) appears after two subsections that state when an officer "may" arrest a person without a warrant, and the contrasting use of "shall" in subsection (3) is no accident. The widespread refusal or failure of police officers to remove persons involved in episodes of domestic violence was presented to the legislature as the main reason for tightening the law so as to require enforcement of restraining orders by

1302

mandatory arrest and custody. Even though the arrested person is entitled to be released pending an eventual adjudication of a criminal charge or contempt, [c], the temporary removal was deemed essential to emphasize the seriousness of the court's order and to permit the victims of violence to escape further immediate danger.

Defendants argue that an officer's determination of probable cause to believe that a violation has occurred is a "discretionary function or duty" immune from liability [c]. This claim is answered by McBride v. Magnuson, 282 Or 433, 578 P2d 1259 (1978). In that case a police officer claimed immunity for her decision to take a child into custody and to make a report of child abuse. This court held that an officer or

employee is not engaged in a "discretionary function or duty" whenever he or she must evaluate and act upon a factual judgment. Discretion, we stated, exists only insofar as an officer has been delegated responsibility for value judgments and policy choices among competing goals and priorities. Patently the purpose of [the section] was to negate any discretion of that kind in enforcing restraining orders issued under the Abuse Prevention Act. This conclusion does not depend on facts in the individual case. The circuit court erred in denying plaintiffs motion to strike this defense.

Defendants also claim immunity by virtue of ORS 133.315, which provides that "[n]o peace officer shall be held criminally or civilly liable for making an arrest pursuant to ORS 133.055(2) or 133.310(3) provided he acts in good faith and without malice." That section provides immunity for making good faith arrests, not for failing to do so, and its obvious purpose is to reinforce the officer's duty to arrest on probable cause. To invert this text so as to grant immunity for failing to make an arrest required by the 1977 act, as defendants propose, would fly in the face of that legislative purpose. This affirmative defense also should have been stricken.

This disposes of the issues actually raised by the parties. [The court added a rebuttal to assertions introduced by the dissent.]

****

The circuit court's letter order and the arguments made to that court show that the court was persuaded as a matter of law that plaintiff could not recover for psychic and emotional injuries, as distinct from physical injuries that might have resulted from the same inaction by defendants. Because here ***there was a specific duty toward these

plaintiffs, that proposition is incorrect. The decision of the Court of Appeals affirming the summary judgment must be reversed and the case remanded to the circuit court for further proceedings.

Reversed and remanded.

***

1303

JUSTICE Linde concurred with the result but disagreed with the analysis quoted above. ***

[T]his court still has the power to create a new type of tort liability "on the basis of its own appraisal of the policy considerations involved." Burnette v. Wahl, [c]. I do not believe that we should do so today--in this case--for these reasons.

***

This court is poorly equipped to make the kind of policy judgments the majority makes. We have no way of knowing how today's decision will affect the ability of municipalities and counties to enforce the law and recruit and hire competent law enforcement officers. We have no way of knowing how much today's decision will exacerbate the fiscal problems of Oregon's cities. Given the prevalence of domestic strife, the effect upon a local government budget could be considerable. Furthermore, we have no way of knowing how today's decision might affect day-to-day law enforcement practices. Although the complaint alleges serious matters for which immediate police action was appropriate, other serious matters of consequence exist. The imposition of personal liability upon officers and upon their employers for failure to arrest

could result in an inefficient use of scarce police resources in a period of social crisis or high crime.

Third, this is a new law. We have no information, one way or the other, whether the creation of a strict liability remedy against public bodies and their peace officers is necessary to vindicate the statutory policy. If peace officers are not doing their duty, I favor giving the legislature a further opportunity to look into whether the creation of such a cause of action is necessary. To this day, the public bodies and their employees have not yet been heard from, either by the legislature or any court.

***

NOTES AND QUESTIONS

1. An Oregon statute provides: "Any person who is intoxicated or under the influence of controlled substances in a public place may be taken or sent home or to a treatment facility by the police. However, if the person is incapacitated, the health of the person appears to be in immediate danger, or the police have reasonable cause to believe the person is dangerous to self or to any other person, the person shall be taken by the police to an appropriate treatment facility. A person shall be deemed incapacitated when in the opinion of the police officer or director of the treatment facility the person is unable to make a rational decision as to acceptance of assistance." The statute said nothing, however, concerning what consequences could flow if the police failed to act.

The following was enacted simultaneously with the above. It provides in part: "No peace officer ***shall be held criminally or civilly liable for

actions pursuant to ORS 426.450 to 426.470 ***provided the actions are in good faith, on probable cause and without malice."

Marilyn Scovill was killed when she walked into a city street and was struck by a car. She was badly intoxicated and a short time before had been in the City of Astoria's police station, on the floor unable to talk coherently. Police had discovered three butcher knives on her person and had assured Marilyn Scovill's friend that she would be taken care of. In Scovill v. City of Astoria, 324 Or. 159, 921 P.2d 1312 (1996), the plaintiff's personal representative brought a claim against the city. Three grounds were alleged: negligence, statutory tort, and negligence per se. The court upheld the claim on the statutory tort ground alone.

The court recognized it must decide when a "tort claim for breach of a statutory duty" may be found. Id. at 1319. Since it is rare to find the civil action explicitly spelled out, the court's task was to determine whether the action could be implied. Central in this inquiry was whether a private right of action reinforced the statute's purpose. The court found that the statute intended to protect intoxicated persons who pose a danger to themselves. The court rejected the negligence per se argument because the statute, while it created and imposed a duty to act, did not create a standard of care. Do you agree with this reasoning?

The reasoning of the Scovill court appears to give no room for a court to fashion a tort--a private right of action--from a statutory provision where it is not impliedly created by the legislature. See § 874A of the Restatement of the Law (Second) of Torts. What factors

should determine whether a court should provide a private tort remedy? The court may assimilate the cause of action to the nearest related tort and modify that tort under its common law authority or may create a new tort action. On factors influencing the determination of whether the court should apply a tort remedy, see Restatement (Second) of Torts § 874A, comment h (1979). And see comment 1c on the scope of the legislative purpose. In Dekard v. Bunch, 358 Ore. 754, 370 P.3d 478, 481 (2016), the Oregon Supreme Court examining dram shop legislation decided that the inquiry about statutory intention to create a right of action either express or implied does not rest on the two identified factors in the latter principal case but on "the familiar holistic framework applicable to all statutory interpretation problems, careful examination of the statutory text, context, and legislative history." Id. at 760, 483.

2. The Restatement (Third) of Torts: Liability for Physical and Emotional Harm (2012) addresses affirmative duty based on statutory provision in § 38. This section addresses a situation where a statute provides an affirmative duty but neither provides nor bars a private right of action. In this situation, "courts may consider the legislative purpose and the values reflected in the statute to decide that the purpose and values justify adopting a duty that the common law had not previously recognized." Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 38, comment c (2012).

3. Most courts have been laconic in supplying reasons for the implication of tort actions from applicable statutes: Creek v. Laski, 248 Mich.

425, 227 N.W. 817 (1929) (criminal statute on malicious destruction of a will, tort action); Laczko v. Jules Meyers, Inc., 276 Cal.App.2d 293, 80 Cal.Rptr. 798 (1969) (criminal statute against altering mileage on car odometer).

4. Few other courts have clearly examined the statutory cause of action. The Supreme Court of New Hampshire in Marquay v. Eno, 139 N.H. 708, 662 A.2d 272 (1995), considered, among other claims, whether plaintiffs who had been sexually molested at high school by teachers had a cause of action under the New Hampshire child abuse reporting statute. The court held that the statute did not support a private right of action for its violation because it could find no "express or implied legislative intent to create such a civil liability." Id. at 715, 278. The court's reasoning is confined to express or implied rights of action, although some of the reasons for refusing to find a cause of action are more pertinent to judicially created rights of action on the statute. The court had conflated the two types of action.

Courts have been far from clear about the nature of these statutory actions and their relationship to negligence per se. In another reporting statute case, Kansas State Bank & Trust Co. v. Specialized Transportation Services, Inc., 249 Kan. 348, 819 P.2d 587 (1991), plaintiff argued that the statutory violation was negligence per se. The court stated that a "violation of a statute alone does not establish negligence per se. The plaintiff must also establish that an individual right of action for injury arising out of the violation was intended by the legislature." Id. at 370. How should negligence per se be distinguished?

5. In Doe v. Brainerd International Raceway, 533 N.W.2d 617 (Minn. 1995), plaintiff, a minor, had become involved in a "wet T-shirt" contest at the defendant's facility. A Minnesota statute prohibited a person from allowing a minor to engage in a sexual performance. The court found that the statute may be relevant in providing a standard of care where a duty of care exists at common law or as creating a civil cause of action. The court found that the latter may arise expressly or impliedly from the construction of the statute. Principles of judicial restraint, the court stated, would preclude the court from creating a new cause of action. In finding no legislative intent to imply a cause of action, the court elicited strong support from the enactment by the legislature four years later of a provision authorizing a civil action based on the use of a minor in sexual performances.

6. Implied rights of action are not divided into accepted categories and thus the application of rules relating to defenses, damages, vicarious liability, and contribution remain problematic.

(B) IMPLIED CONSTITUTIONAL RIGHTS OF ACTION

42 U.S.C. § 1983 creates an express statutory right of action for individuals to sue state and local officials for a depravation of an individual's constitutional rights. The following case implies a functionally equivalent right of action for constitutional violations inflicted by officials of the federal government. In your opinion, does this implied right of action strike the proper balance between the legislature and courts? States and the federal government?

Bivens v. Six Unknown Named Agents of Federal Bureau of Narcotics

Supreme Court of the United States, 1971.

403 U.S. 388, 91 S.Ct. 1999, 29 L.Ed.2d 619.

Mr. JUSTICE Brennan delivered the opinion of the Court. The Fourth Amendment provides that: "The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated. ***"

In Bell v. Hood, 327 U.S. 678 (1946), we reserved the question whether violation of that command by a federal agent acting under color of his authority gives rise to a cause of action for damages consequent upon his unconstitutional conduct. Today we hold that it does. ***

Petitioner's complaint alleged that ***respondents, agents of the Federal Bureau of Narcotics acting under claim of federal authority, entered his apartment and arrested him for alleged narcotics violations. The agents manacled petitioner in front of his wife and children, and threatened to arrest the entire family. They searched the apartment from stem to stern. ***

[H]is complaint [also] asserted that the arrest and search were effected without a warrant, and that unreasonable force was employed in making the arrest, [and, by implication,] that the arrest was made without probable cause. Petitioner claimed to have suffered great humiliation, embarrassment, and mental suffering as a

result of the agents' unlawful conduct, and sought $15,000 damages from each of them. The District Court, on respondents' motion, dismissed the complaint on the ground, inter alia, that it failed to state a cause of action. [2] 276 F.Supp. 12 (E.D.N.Y.1967). The Court of Appeals ***affirmed on that basis. 409 F.2d 718 (C.A.2 1969). We granted certiorari. 399 U.S. 905 (1970). We reverse. ***

* * *

[2] The agents were not named in petitioner's complaint, and the District Court ordered that the complaint be served upon "those federal agents who it is indicated by the records of the United States Attorney participated in the November 25. 1965, arrest of the [petitioner]." ***Five agents were ultimately served.

Respondents do not argue that petitioner should be entirely without remedy for an unconstitutional invasion of his rights by federal agents. In respondents' view, however, the rights that petitioner asserts--primarily rights of privacy--are creations of state and not of federal law. Accordingly, they argue, petitioner may obtain money damages to redress invasion of these rights only by an action in tort, under state law, in the state courts. In this scheme the Fourth Amendment would serve merely to limit the extent to which the agents could defend the state law tort suit by asserting that their actions were a valid exercise of federal power: if the agents were shown to have violated the Fourth Amendment, such a defense would be lost to them and they would stand before the state law merely as private individuals. ***

We think that respondents' thesis rests upon an unduly restrictive view of the Fourth Amendment's protection against unreasonable searches and seizures by federal agents, a view that has consistently been rejected by this Court. Respondents seek to treat the relationship between a citizen and a federal agent unconstitutionally exercising his authority as no different from the relationship between two private citizens. In so doing, they ignore the fact that power, once granted, does not disappear like a magic gift when it is wrongfully used. An agent acting--albeit unconstitutionally--in the name of the United States possesses a far greater capacity for harm than an individual trespasser exercising no authority other than his own. [Cc] Accordingly, as our cases make clear, the Fourth Amendment operates as a limitation upon the exercise of federal power regardless of whether the State in whose jurisdiction that power is exercised would prohibit or penalize the identical act if engaged in by a private citizen. It guarantees to citizens of the United States the absolute right to be free from unreasonable searches and seizures carried out by virtue of federal authority. And "where federally protected rights have been invaded, it has been the rule from the beginning that courts will be alert to adjust their remedies so as to grant the necessary relief." Bell v. Hood, 327 U.S., at 684. ***

Our cases have long since rejected the notion that the Fourth Amendment proscribes only such conduct as would, if engaged in by private persons, be condemned by state law. ***

The interests protected by state laws regulating trespass and the invasion of privacy, and those protected by the Fourth Amendment's guarantee against unreasonable searches and seizures, may be

inconsistent or even hostile. Thus, we may bar the door against an unwelcome private intruder, or call the police if he persists in seeking entrance. The availability of such alternative means for the protection of privacy may lead the State to restrict imposition of liability for any consequent trespass. A private citizen, asserting no authority other than his own, will not normally be liable in trespass if he demands, and is granted, admission to another's house. [Cc] But one who demands admission under a claim of federal authority stands in a far different position. [Cc] The mere invocation of federal power by a federal law enforcement official will normally render futile any attempt to resist an unlawful entry or arrest by resort to the local police; and a claim of authority to enter is likely to unlock the door as well. ***

That damages may be obtained for injuries consequent upon a violation of the Fourth Amendment by federal officials should hardly seem a surprising proposition. Historically, damages have been regarded as the ordinary remedy for an invasion of personal interests in liberty. [Cc] Of course, the Fourth Amendment does not in so many words provide for its enforcement by an award of money damages for the consequences of its violation. But "it is ***well settled that where legal rights have been invaded, and a federal statute provides for a general right to sue for

such invasion, federal courts may use any available remedy to make good the wrong done." Bell v. Hood, 327 U.S., at 684 (footnote omitted). The present case involves no special factors counselling hesitation in the absence of affirmative action by Congress.

***Finally, we cannot accept respondents' formulation of the question as whether the availability of money damages is necessary to enforce the Fourth Amendment. For we have here no explicit congressional declaration that persons injured by a federal officer's violation of the Fourth Amendment may not recover money damages from the agents, but must instead be remitted to another remedy, equally effective in the view of Congress. The question is merely whether petitioner, if he can demonstrate an injury consequent upon the violation by federal agents of his Fourth Amendment rights, is entitled to redress his injury through a particular remedial mechanism normally available in the federal courts. [Cc] "The very essence of civil liberty certainly consists in the right of every individual to claim the protection of the laws, whenever he receives an injury." Marbury v. Madison, 1 Cranch 137, 163 (1803). Having concluded that petitioner's complaint states a cause of action under the Fourth Amendment ***we hold that petitioner is entitled to recover money damages for any injuries he has suffered as a result of the agents' violation of the Amendment. ***

Judgment reversed and case remanded.

Mr. JUSTICE Harlan, concurring in the judgment. ***I am of the opinion that federal courts do have the power to award damages for violation of "constitutionally protected interests" and I agree with the Court that a traditional judicial remedy such as damages is appropriate to the vindication of the personal interests protected by the Fourth Amendment. ***

[T]he interest which Bivens claims--to be free from official conduct in contravention of the Fourth Amendment--is a federally protected

interest. [C] Therefore, the question of judicial power to grant Bivens damages is not a problem of the "source" of the "right"; instead, the question is whether the power to authorize damages as a judicial remedy for the vindication of a federal constitutional right is placed by the Constitution itself exclusively in Congress' hands. ***

[I]n suits for damages based on violations of federal statutes lacking any express authorization of a damage remedy, this Court has authorized such relief where, in its view, damages are necessary to effectuate the congressional policy underpinning the substantive provisions of the statute. J.I. Case Co. v. Borak, 377 U.S. 426 (1964). [Cc] ***

Initially, I note that it would be at least anomalous to conclude that the federal judiciary--while competent to choose among the range of traditional judicial remedies to implement statutory and common-law policies, and even to generate substantive rules governing primary behavior in furtherance of broadly formulated policies articulated by statute or Constitution [cc] is powerless to accord a damages remedy to vindicate social policies which, by virtue of their inclusion in the

1309

Constitution, are aimed predominantly at restraining the Government as an instrument of the popular will. ***

If explicit congressional authorization is an absolute prerequisite to the power of a federal court to accord compensatory relief regardless of the necessity or appropriateness of damages as a remedy simply because of the status of a legal interest as constitutionally protected, then it seems to me that explicit congressional authorization is

similarly prerequisite to the exercise of equitable remedial discretion in favor of constitutionally protected interests. Conversely, if a general grant of jurisdiction to the federal courts by Congress is thought adequate to empower a federal court to grant equitable relief for all areas of subject-matter jurisdiction enumerated therein, see 28 U.S.C.A. § 1331(a), then it seems to me that the same statute is sufficient to empower a federal court to grant a traditional remedy at law. ***

Although conceding that the standard of determining whether a damage remedy should be utilized to effectuate statutory policies is one of "necessity" or "appropriateness," [cc] the Government contends that questions concerning congressional discretion to modify judicial remedies relating to constitutionally protected interests warrant a more stringent constraint on the exercise of judicial power with respect to this class of legally protected interests. [C]

These arguments for a more stringent test to govern the grant of damages in constitutional cases seem to be adequately answered by the point that the judiciary has a particular responsibility to assure the vindication of constitutional interests such as those embraced by the Fourth Amendment. To be sure, "it must be remembered that legislatures are ultimate guardians of the liberties and welfare of the people in quite as great a degree as the courts." [C] But it must also be recognized that the Bill of Rights is particularly intended to vindicate the interests of the individual in the face of the popular will as expressed in legislative majorities ***.

The question then, is, as I see it, whether compensatory relief is "necessary" or "appropriate" to the vindication of the interest asserted. [Cc] In resolving that question, it seems to me that the range of policy considerations we may take into account is at least as broad as the range a legislature would consider with respect to an express statutory authorization of a traditional remedy. In this regard I agree with the Court that the appropriateness of according Bivens compensatory relief does not turn simply on the deterrent effect liability will have on federal official conduct. Damages as a traditional form of compensation for invasion of a legally protected interest may be entirely appropriate even if no substantial deterrent effects on future official lawlessness might be thought to result. Bivens, after all, has invoked judicial processes claiming entitlement to compensation for injuries resulting from allegedly lawless official behavior, if those injuries are properly compensable in money damages. I do not think a court of law--vested

1310

with the power to accord a remedy--should deny him his relief simply because he cannot show that future lawless conduct will thereby be deterred.

And I think it is clear that Bivens advances a claim of the sort that, if proved, would be properly compensable in damages. The personal interests protected by the Fourth Amendment are those we attempt to capture by the notion of "privacy"; while the Court today properly points out that the type of harm which officials can inflict when they invade protected zones of an individual's life are different from the types of harm private citizens inflict on one another, the experience

of judges in dealing with private trespass and false imprisonment claims supports the conclusion that courts of law are capable of making the types of judgment concerning causation and magnitude of injury necessary to accord meaningful compensation for invasion of Fourth Amendment rights. ***

It seems to me entirely proper that these injuries be compensable according to uniform rules of federal law, especially in light of the very large element of federal law which must in any event control the scope of official defenses to liability. [C] Certainly, there is very little to be gained from the standpoint of federalism by preserving different rules of liability for federal officers dependent on the State where the injury occurs. [C]

Putting aside the desirability of leaving the problem of federal official liability to the vagaries of common-law actions, it is apparent that some form of damages is the only possible remedy for someone in Bivens' alleged position. ***

However desirable a direct remedy against the Government might be as a substitute for individual official liability, the sovereign still remains immune to suit. ***

The only substantial policy consideration advanced against recognition of a federal cause of action for violation of Fourth Amendment rights by federal officials is the incremental expenditure of judicial resources that will be necessitated by this class of litigation. There is, however, something ultimately self-defeating about this argument. For if, as the Government contends, damages will rarely be realized by plaintiffs in these cases because of jury hostility, the limited resources of the official concerned, etc., then I

am not ready to assume that there will be a significant increase in the expenditure of judicial resources on these claims. Few responsible lawyers and plaintiffs are likely to choose the course of litigation if the statistical chances of success are truly de minimis. And I simply cannot agree with my Brother Black that the possibility of "frivolous" claims--if defined simply as claims with no legal merit--warrants closing the courthouse doors to people in Bivens' situation. There are other ways, short of that, of coping with frivolous lawsuits.

On the other hand, if--as I believe is the case with respect, at least, to the most flagrant abuses of official power--damages to some degree

1311

will be available when the option of litigation is chosen, then the question appears to be how Fourth Amendment interests rank on a scale of social values compared with, for example, the interests of stockholders defrauded by misleading proxies. See J.I. Case Co. v. Borak, supra. Judicial resources, I am well aware, are increasingly scarce these days. Nonetheless, when we automatically close the courthouse door solely on this basis, we implicitly express a value judgment on the comparative importance of classes of legally protected interests. And current limitations upon the effective functioning of the courts arising from budgetary inadequacies should not be permitted to stand in the way of the recognition of otherwise sound constitutional principles. ***

For these reasons, I concur in the judgment of the Court.

Mr. CHIEF Justice Burger, dissenting. I dissent from today's holding which judicially creates a damage remedy not provided for by the

Constitution and not enacted by Congress. We would more surely preserve the important values of the doctrine of separation of powers--and perhaps get a better result--by recommending a solution to the Congress as the branch of government in which the Constitution has vested the legislative power. Legislation is the business of the Congress, and it has the facilities and competence for that task--as we do not. ***[The opinion suggests that the problem of a substitute for the "exclusionary rule" might be considered with the problem in this case and legislation recommended to Congress.]

Mr. JUSTICE Black, separately dissented.

NOTES AND QUESTIONS

1. In this, the first Supreme Court case implying a cause of action from a constitutional provision, the Court relied considerably on earlier cases involving actions "implied" from federal statutes, particularly J.I. Case Co. v. Borak, 377 U.S. 426 (1964) (Securities Exchange Act). The Court in Alexander v. Sandoval, 532 U.S. 275 (2001), however, rejected the understanding of private causes of action represented by Borak. In Stoneridge Investment Partners v. Scientific-Atlanta, Inc., 552 U.S. 148 (2008), the Supreme Court reaffirmed its rejection of private causes of action as represented by Borak by expressly limiting the implied right of action for securities fraud to only one section of the Securities Exchange Act. Observe that Bivens established essentially the same cause of action against federal officers as that existing against state officers under 42 U.S.C.A. § 1983. See Chapter 19.

2. Since Bivens there have been other Supreme Court cases giving rise to a cause of action deriving from a constitutional provision. See, e.g., Davis v. Passman, 442 U.S. 228 (1979) (5th Amendment--due process and sex discrimination); Carlson v. Green, 446 U.S. 14 (1980) (8th Amendment--cruel and inhuman punishment). Many federal appeals court decisions may be cited. See, e.g., Dunbar Corp. v. Lindsey, 905 F.2d 754 (4th Cir.1990) (5th Amendment); Wilkins v. May, 872 F.2d 190 (7th Cir.1989) (FBI

interrogation, 5th Amendment, dicta regarding 4th and 8th Amendments). But cf. Schweiker v. Chilicky, 487 U.S. 412 (1988) (cautioning that Bivens action is appropriate only where there are (1) no "special factors counselling hesitation in the absence of affirmative action by Congress"; (2) no explicit statutory prohibition against relief; and (3) no exclusive statutory alternative remedy).

3. An implied cause of action may be maintained to violations of a state constitution: Brown v. New York, 89 N.Y.2d 172, 652 N.Y.S.2d 223, 674 N.E.2d 1129 (1996). The cause of action is confined in scope to where no other action state or federal is available.

(C) Implied Rights of Action from Federal Statutes

Alexander v. Sandoval

Supreme Court of the United States, 2001.

532 U.S. 275, 121 S.Ct. 1511, 149 L.Ed.2d 517.

SCALIA, J., delivered the opinion of the Court, in which REHNQUIST, C.J., and O'Connor, Kennedy, and Thomas, JJ., joined. Stevens, J., filed a dissenting opinion, in which SOUTER, GINSBURG, and BREYER, JJ., joined.

This case presents the question whether private individuals may sue to enforce disparate-impact regulations promulgated under Title VI of the Civil Rights Act of 1964.

I

The Alabama Department of Public Safety (Department), of which petitioner James Alexander is the director, accepted grants of financial assistance from the United States Department of Justice (DOJ) and Department of Transportation (DOT) and so subjected itself to the restrictions of Title VI of the Civil Rights Act of 1964, 78 Stat. 252, as amended, 42 U.S.C. § 2000d et seq. Section 601 of that Title provides that no person shall, "on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity" covered by Title VI. 42 U.S.C. § 2000d. Section 602 authorizes federal agencies "to effectuate the provisions of [§ 601]... by issuing rules, regulations, or orders of general applicability," 42 U.S.C. § 2000d-l, and the DOJ in an exercise of this authority promulgated a regulation forbidding funding recipients to "utilize criteria or methods of administration which have the effect of subjecting individuals to discrimination because of their race, color, or national origin...." 28 CFR § 42.104(b)(2) (2000).

The State of Alabama amended its Constitution in 1990 to declare English "the official language of the state of Alabama." Pursuant to

this provision and, petitioners have argued, to advance public safety, the Department decided to administer state driver's license examinations only in English. Respondent Sandoval, as representative of a class, brought suit in the United States District Court for the Middle District

1313

of Alabama to enjoin the English-only policy, arguing that it violated the DOJ regulation because it had the effect of subjecting non-English speakers to discrimination based on their national origin. The District Court agreed. It enjoined the policy and ordered the Department to accommodate non-English speakers. [C] Petitioners appealed to the Court of Appeals for the Eleventh Circuit, which affirmed. [C] Both courts rejected petitioners' argument that Title VI did not provide respondents a cause of action to enforce the regulation. We do not inquire here whether the DOJ regulation was authorized by § 602, or whether the courts below were correct to hold that the English-only policy had the effect of discriminating on the basis of national origin. The petition for writ of certiorari raised, and we agreed to review, only the question posed in the first paragraph of this opinion: whether there is a private cause of action to enforce the regulation. [C]

II

Although Title VI has often come to this Court, it is fair to say (indeed, perhaps an understatement) that our opinions have not eliminated all uncertainty regarding its commands. For purposes of the present case, however, it is clear from our decisions, from Congress's amendments of Title VI, and from the parties'

concessions that three aspects of Title VI must be taken as given. First, private individuals may sue to enforce § 601 of Title VI and obtain both injunctive relief and damages. In Cannon v. University of Chicago, 441 U.S. 677 (1979), the Court held that a private right of action existed to enforce Title IX of the Education Amendments of 1972, 86 Stat. 373, as amended, 20 U.S.C. § 1681 et seq. The reasoning of that decision embraced the existence of a private right to enforce Title VI as well. "Title IX," the Court noted, "was patterned after Title VI of the Civil Rights Act of 1964." [C] And, "[i]n 1972 when Title IX was enacted, the [parallel] language in Title VI had already been construed as creating a private remedy." [C] That meant, the Court reasoned, that Congress had intended Title IX, like Title VI, to provide a private cause of action. [C] Congress has since ratified Cannon's holding. Section 1003 of the Rehabilitation Act Amendments of 1986, 100 Stat. 1845, 42 U.S.C. § 2000d-7, expressly abrogated States' sovereign immunity against suits brought in federal court to enforce Title VI and provided that in a suit against a State "remedies (including remedies both at law and in equity) are available... to the same extent as such remedies are available... in the suit against any public or private entity other than a State," § 2000d-7(a)(2). We recognized in Franklin v. Gwinnett County Public Schools, 503 U.S. 60 (1992), that § 2000d-7 "cannot be read except as a validation of Cannon's holding." [C] It is thus beyond dispute that private individuals may sue to enforce § 601.

Second, it is similarly beyond dispute--and no party disagrees--that §601 prohibits only intentional discrimination. In Regents of Univ, of Cal. v. Bakke, 438 U.S. 265 (1978), the Court reviewed a decision of the

California Supreme Court that had enjoined the University of California Medical School from "according any consideration to race in its admissions process." [C] Essential to the Court's holding reversing that aspect of the California court's decision was the determination that § 601 "proscribe[s] only those racial classifications that would violate the Equal Protection Clause or the Fifth Amendment." [C] In Guardians Assn. v. Civil Serv. Comm'n of New York City, 463 U.S. 582 (1983), the Court made clear that under Bakke only intentional discrimination was forbidden by § 601. What we said in Alexander v. Choate, 469 U.S. 287, 293 (1985), is true today: "Title VI itself directly reach[es] only instances of intentional discrimination." [footnote omitted]

Third, we must assume for purposes of deciding this case that regulations promulgated under § 602 of Title VI may validly proscribe groups, even though such activities are permissible under § 601. Though no opinion of this Court has held that, five Justices in Guardians voiced that view of the law at least as alternative grounds for their decisions.

***

It is clear now that the disparate-impact regulations do not simply apply § 601--since they indeed forbid conduct that § 601 permits--and therefore clear that the private right of action to enforce § 601 does not include a private right to enforce these regulations. See Central Bank of Denver, N.A. v. First Interstate Bank of Denver, N.A., 511 U.S. 164, 173 (1994) (a "private plaintiff may not bring a [suit based on a regulation] against a defendant for acts not prohibited by

the text of [the statute]"). That right must come, if at all, from the independent force of § 602. As stated earlier, we assume for purposes of this decision that § 602 confers the authority to promulgate disparate-impact regulations; the question remains whether it confers a private right of action to enforce them. If not, we must conclude that a failure to comply with regulations promulgated under § 602 that is not also a failure to comply with § 601 is not actionable.

Implicit in our discussion thus far has been a particular understanding of the genesis of private causes of action. Like substantive federal law itself, private rights of action to enforce federal law must be created by Congress. Touche Ross & Co. v. Redington, 442 U.S. 560, 578 (1979) (remedies available are those "that Congress enacted into law"). The judicial task is to interpret the statute Congress has passed to determine whether it displays an intent to create not just a private right but also a private remedy. Transamerica Mortgage Advisors, Inc. v. Lewis, 444 U.S. 11, 15 (1979). Statutory intent on this latter point is determinative. [C] Without it, a cause of action does not exist and courts may not create one, no matter how desirable that might be as a policy matter, or how compatible with the statute. [C] "Raising up causes of action where a statute has not created them may be a proper function for common-law courts, but not for federal tribunals." Lampf, Pleva, Lipkind,

Prupis & Petigrow v. Gilbertson, 501 U.S. 350, 365 (1991) (SCALIA, J., concurring in part and concurring in judgment).

Respondents would have us revert in this case to the understanding of private causes of action that held sway 40 years ago when Title VI was enacted. That understanding is captured by the Court's statement in J.I. Case Co. v. Borak, 377 U.S. 426, 433 (1964), that "it is the duty of the courts to be alert to provide such remedies as are necessary to make effective the congressional purpose" expressed by a statute. We abandoned that understanding in Cort v. Ash, 422 U.S. 66, 78 (1975)--which itself interpreted a statute enacted under the ancien regime--and have not returned to it since. Not even when interpreting the same Securities Exchange Act of 1934 that was at issue in Borak have we applied Borak's method for discerning and defining causes of action. Having sworn off the habit of venturing beyond Congress's intent, we will not accept respondents' invitation to have one last drink.

Nor do we agree with the Government that our cases interpreting statutes enacted prior to Cort v. Ash have given "dispositive weight" to the "expectations" that the enacting Congress had formed "in light of the 'contemporary legal context.'" [C] Only three of our legion implied-right- of-action cases have found this sort of "contemporary legal context" relevant, and two of those involved Congress's enactment (or reenactment) of the verbatim statutory text that courts had previously interpreted to create a private right of action. [C] In the third case, this sort of "contemporary legal context" simply buttressed a conclusion independently supported by the text of the statute. [C] We have never accorded dispositive weight to context shorn of text. In determining whether statutes create private rights of action, as in interpreting statutes generally, see Blatchford v. Native

Village of Noatak, 501 U.S. 775, legal context matters only to the extent it clarifies text.

We therefore begin (and find that we can end) our search for Congress's intent with the text and structure of Title VI. [Footnote omitted] Section 602 authorizes federal agencies "to effectuate the provisions of [§ 601]... by issuing rules, regulations, or orders of general applicability." 42 U.S.C. § 2000d-l. It is immediately clear that the "rights-creating" language so critical to the Court's analysis in Cannon of §601, [C], is completely absent from § 602. Whereas § 601 decrees that "[n]o person... shall... be subjected to discrimination," 42 U.S.C. § 2000d, the text of § 602 provides that "]e]ach Federal department and agency... is authorized and directed to effectuate the provisions of [§ 601]," 42 U.S.C. § 2000d-l. Far from displaying congressional intent to create new rights, § 602 limits agencies to "effectuating]" rights already created by § 601. And the focus of § 602 is twice removed from the individuals who will ultimately benefit from Title VI's protection. Statutes that focus on the person regulated rather than the individuals protected create "no implication of an intent to confer rights on a particular class of persons." California v. Sierra Club, 451 U.S. 287, 294

1316

(198), Section 602 is yet a step further removed: It focuses neither on the individuals protected nor even on the funding recipients being regulated, but on the agencies that will do the regulating. ***

Nor do the methods that § 602 goes on to provide for enforcing its authorized regulations manifest an intent to create a private remedy; if anything, they suggest the opposite. ***

Whatever these elaborate restrictions on agency enforcement may imply for the private enforcement of rights created outside of § 602... they tend to contradict a congressional intent to create privately enforceable rights through § 602 itself. The express provision of one method of enforcing a substantive rule suggests that Congress intended to preclude others. [C] Sometimes the suggestion is so strong that it precludes a finding of congressional intent to create a private right of action, even though other aspects of the statute (such as language making the would-be plaintiff "a member of the class for whose benefit the statute was enacted") suggest the contrary. 42 U.S.C. § 1983, cases show, some remedial schemes foreclose a private cause of action to enforce even those statutes that admittedly create substantive private rights. [C] In the present case, the claim of exclusivity for the express remedial scheme does not even have to overcome such obstacles. The question whether § 602's remedial scheme can overbear other evidence of congressional intent is simply not presented, since we have found no evidence anywhere in the text to suggest that Congress intended to create a private right to enforce regulations promulgated under § 602.

Both the Government and respondents argue that the regulations contain rights-creating language and so must be privately enforceable, but that argument skips an analytical step. Language in a regulation may invoke a private right of action that Congress through statutory text created, but it may not create a right that Congress has not. [c]

The last string to respondents' and the Government's bow is their argument that two amendments to Title VI "ratified" this Court's decisions finding an implied private right of action to enforce the

disparate-impact regulations, [c]***But we recently criticized ***reliance on congressional inaction, saying that "[a]s a general matter... [the] argument[t] deserve[s] little weight in the interpretive process."[c] And when, as here, Congress has not comprehensively revised a statutory scheme but has made only isolated amendments, we have spoken more bluntly: "It is 'impossible to assert with any degree of assurance that congressional failure to act represents' affirmative congressional approval of the Court's statutory interpretation." [c].

The judgment of the Court of Appeals is reversed.

It is so ordered.

1317

NOTES AND QUESTIONS

1. Recall that 42 U.S.C.A. § 1983 provides a cause of action for "the deprivation of any rights, privileges, or immunities secured by the Constitution and laws" of the United States. A § 1983 action is available to a person for both violations of the Constitution and federal statutes. Maine v. Thiboutot, 448 U.S. 1 (1980). However, the statute must create (1) enforceable rights, privileges, or immunities within the meaning of § 1983 and (2) Congress must not have foreclosed such enforcement in the enactment itself. Wright v. City of Roanoke Redevelopment and Housing Authority, 479 U.S. 418 (1987). The first question canvasses a similar inquiry to that engaged by the Supreme Court in the principal case. Did Congress intend to benefit the plaintiff via a private right of action? In Wilder v. Virginia Hospital Association, 496 U.S. 498 (1990), a statutory provision required health care providers to be reimbursed according

to rates that were "reasonable and adequate" to meet the costs of "efficiently and economically operated facilities." The Supreme Court found that this was intended to benefit the plaintiffs via a private right of action, especially since, without a private right, the provision would be unenforceable. Consistent with the principal case's gimlet-eyed view of implied private rights of action, the Court in Gonzaga University v. Doe, 536 U.S. 273 (2002) held that § 1983 does not provide the basis of an action to enforce the Family Educational Rights on Privacy Act. Chief Justice Rehnquist, writing for the Court, concluded: "[I]f Congress wishes to create new rights enforceable under § 1983, it must do so in clear and unambiguous terms--no less and no more than what is required for Congress to create new rights enforceable under an implied private right of action." Id. at 290.

2. The Court has not always adopted such a restrictive view of implied rights of action from federal statutes. Specifically, in Cort v. Ash, (422 U.S. 66 (1975)) the Court applied four factors to determine whether a private remedy should be implied from a statute with no express provision for a private right of action. These were: 1) whether the plaintiff was a member of the class intended to be afforded protection by the statute, 2) whether express intent from Congress was present to negate a private cause of action, 3) whether the creation of a private right of action was compatible with the overall legislative scheme and 4) whether the issue in controversy had been "so traditionally relegated to state law as to make it inappropriate to infer a federal cause of action" Transamerica Mortgage Advisors, Inc. v. Lewis, 444 U.S. 11 (1979) (J. White, dissenting). The Court appears to have been more willing to imply a private right of action from statutes adopted when the

implication of a private right of action was more commonplace. See, e.g. Merrill Lynch, Pierce, Fenner & Smith, Inc. v. Curran, 456 U.S. 353 (1982); Musick, Peeler, & Garrett v. Employers Insurance of Wassau, 508 U.S. 286 (1993). Where such causes of action are implied, for example, 10b--5 actions under federal securities legislation, the courts have drawn on common law fraud actions to supply causation rules. See Dura Pharma., Inc. v. Broudo, 544 U.S. 336 (2005). See note 9 page 1232 supra Ch. 21.

3. In Franklin v. Gwinnett County Public Schools, 503 U.S. 60 (1992), the plaintiff high school student brought an action for damages. She claimed

that, contrary to Title IX of the Education Amendments of 1972, she had been subjected to continued sexual harassment and abuse by a teacher. In Cannon v. University of Chicago, 441 U.S. 677 (1979), cited in the principal case, the Court had held that Title IX was enforceable through a private right of action. The Court then applied the principle that a right is enforceable by the full panoply of judicial remedies. Nothing in Title IX displaced this presumption. Therefore, the plaintiff was entitled to a damages remedy for violation of her private right. Justice Scalia (with whom the Chief Justice and Justice Thomas agreed) concurred but maintained his hostility, criticizing the presumption of expansive remedies. He found a remedy in damages because the legislation in issue was enacted subsequent to Cannon, recognizing a private right of action under Title IX.

4. In Bruckman v. Plaintiffs Legal Comm., 531 U.S. 341 (2001), the Court found that a federal cause of action "fraud on the FDA" was

preempted by FDA regulations on the grounds on impossibility of compliance. This does not mean that a state may not provide for an action based on fraud. The presumption against preemption of state tort law will apply. Desiano v. Warner-Lambert & Co., 467 F.3d 85 (2d Cir. 2006) to protect the state law from preemption.

5. What is the relationship between implied private rights of actions and private rights of action pursuant to § 1983? It is clear that despite the statute upon proper construction providing no implied private right of action, it may support an action under § 1983 by giving rise to an enforceable right by a beneficiary under the statute. Mallett v. Wisconsin Division of Vocational Rehabilitation, 130 F.3d 1245 (7th Cir. 1997) (holding that the Rehabilitation Act of 1973, while providing for no implied right of action, supported a § 1983 action.)

2. Express Rights of Action: Civil RICO

Congress expressly created a private right of action for individuals to collect treble damages for injury sustained to their business or property through activities in violation of Section 1962 of the Racketeer Influence and Corrupt Organizations Act ("RICO"). RICO civil actions have evolved expansively since the introduction of the Act. See Sedima, S.P.R.L. v. Imrex Co., Inc., 473 U.S. 479 (1985) ("We nonetheless recognize that, in its private civil version, RICO is evolving into something quite different from the original conception of its enactors"). As you read, contrast the role of the courts in construing Civil RICO actions with the inquiry to determine whether

there should be an implied right of action. Do you see how the tasks are different?

De Falco v. Bernas

United States Court of Appeals, Second Circuit, 2001.

244 F.3d 286.

[Plaintiffs bought, and proposed to develop, land in the Township of Delaware, Sullivan County, New York. Named defendants were an

1319

assortment of public officials and private individuals who were part of, or influenced, local government of the Township. After plaintiffs purchased the property, defendants engaged in a number of threats and intimidation to force plaintiffs to give over property and employ individuals under threat that development approvals would be withheld. Plaintiffs brought an action under 18 U.S.C. § 1962(c) of the Racketeer Influence and Corrupt Organizations Act ("RICO") claiming that plaintiffs' real estate activities were impeded as a result of defendants' operation of the Town of Delaware, New York, as a RICO enterprise.

Plaintiffs claimed that the action arose out of a conspiracy, plan and scheme among the defendants to use the Town of Delaware as a racketeering enterprise to extort money, real property and personal property through misuse of certain public offices, in violation of section 1962(c).]

Underhill, District Judge. ***To establish a RICO claim, a plaintiff must show: "(1) a violation of the RICO statute, 18 U.S.C. § 1962; (2)

an injury to business or property; and (3) that the injury was caused by the violation of Section 1962." [c] Section 1962(c), the section relevant here, makes it unlawful for any person employed by or associated with any enterprise engaged in, or the activities of which affect, interstate or foreign commerce, to conduct or participate, directly or indirectly, in the conduct of such enterprise's affairs through a pattern of racketeering activity....

To establish a violation of 18 U.S.C. § 1962(c) then, a plaintiff must show "(1) conduct (2) of an enterprise (3) through a pattern (4) of racketeering activity." Sedima, S.P.R.L. v. Imrex Co., 473 U.S. 479, 496, 105 S.Ct. 3275, 87 L.Ed.2d 346 (1985); [Cc] The requirements of section 1962(c) must be established as to each individual defendant. [C]

The terms "enterprise," "racketeering activity," and "pattern of racketeering activity" are defined in 18 U.S.C. § 1961. A RICO enterprise "includes any individual, partnership, corporation, association, or other legal entity, and any union or group of individuals associated in fact although not a legal entity." 18 U.S.C. § 1961(4). "Racketeering activity" is broadly defined to encompass a variety of state and federal offenses including, inter alia, murder, kidnapping, gambling, arson, robbery, bribery and extortion. See 18 U.S.C. § 1961(1). A " 'pattern of racketeering activity' requires at least two acts of racketeering activity, one of which occurred after the effective date of this chapter and the last of which occurred within ten years... after the commission of a prior act of racketeering activity." 18 U.S.C. § 1961(5).

Although at least two predicate acts must be present to constitute a pattern, two acts alone will not always suffice to form a pattern. See Sedima, supra.

In short, to establish a violation of 18 U.S.C. § 1962(c), a plaintiff must establish that a defendant, through the commission of two or more

1320

acts constituting a pattern of racketeering activity, directly or indirectly participated in an enterprise, the activities of which affected interstate or foreign commerce. See, e.g., Sedima, supra.

We take up each of the RICO elements at issue below.

1. The Town of Delaware as a RICO Enterprise

[Defendant] Dirie [supervisor of the Town of Delaware and a local firewood salesman] claims that the plaintiffs failed to establish that the Town of Delaware was a RICO enterprise and that the plaintiffs failed to establish an enterprise separate from the individual defendants. The plaintiffs argue that an enterprise may be organized for a legitimate and lawful purpose and may include such things as a municipality or town or a subdivision thereof.

As noted above, the RICO statute defines an "enterprise" as "includ[ing] any individual, partnership, corporation, association, or other legal entity, and any union or group of individuals associated in fact although not a legal entity." 18 U.S.C. § 1961(4). The enterprise "is an entity,... a group of persons associated together for a common purpose of engaging in a course of conduct", [c] A racketeering enterprise is proven through "evidence of an ongoing organization,

formal or informal, and by evidence that the various associates function as a continuing unit", [c] Thus, evidence of an ongoing organization, the associates of which function as a continuing unit, suffices to prove an enterprise, [c]

Under section 1962(c), a defendant and the enterprise must be distinct. Indeed, "[i]t is well established in this Circuit that, under § 1962(c), the alleged RICO 'person' and RICO 'enterprise' must be distinct." [c]. ***

The requirement of distinctiveness between the defendants and the enterprise, however, was met here. The jury could reasonably have concluded that the RICO persons [the defendants] were a separate and distinct assortment of public officials, private individuals and corporations who used their political power to influence the Town of Delaware's exercise of governmental authority over the plaintiffs' development. From the evidence adduced at trial, there was sufficient evidence from which a reasonable jury could conclude that the named defendants were separate, culpable parties and that the alleged enterprise, the Town of Delaware, was the "passive instrument or victim of [their] racketeering activity." [C]

Moreover, this Court has previously held that a governmental unit can be a RICO enterprise. In [the cited case] the defendants were four of approximately eighty New York City marshals appointed by the Mayor of the City of New York as officers of the City's Civil Court. The marshals were charged with mail fraud in a scheme to auction judgment debtors' property at artificially deflated prices. Prior to an auction, the marshals would meet with certain buyers and determine: (1) a deflated price at

which property would ostensibly be sold and (2) the amount over the agreed sales price that would be paid to the marshals in return ("top money"). The marshals retained the "top money" and subsequently mailed to judgment creditors amounts reflecting the fraudulently deflated prices. The enterprise in whose activities the marshals were alleged to have participated in a pattern of racketeering activity was the New York City Civil Court.

In concluding that the New York City Civil Court was an enterprise within the meaning of RICO, this Court first noted that, under the language of the statute: "the definition of 'enterprise' is quite broad. We see no sign of an intention by Congress to exclude governmental units from its scope." In reviewing the language of RICO, the Court concluded that, "on its face the definition of an enterprise to 'include any... legal entity' is unambiguously broad, and that it does not exclude the Civil Court." [C]

That conclusion was bolstered by certain of RICO's substantive goals, some of which are specifically directed toward governmental entities. [C] Recognizing that "racketeering activity" is defined in section 1961(1) to include bribery and extortion, the Court noted that "bribery is 'a crime which is peculiar to public officials,'" and "[e]xtortion under color of law is a crime which 'can only be committed in the context of governmental activity.'" [C]

By making bribery and extortion RICO offenses, Congress must be said to have understood that these offenses would be committed by governmental officials as a part of their work. Since these offenses can only be committed in the context of the work of a government

agency, Congress must be taken to have intended that a governmental agency could be one of the types of "enterprises," the affairs of which are conducted through a pattern of racketeering offenses. [C]

The interpretation of the language of the statute to extend to activities affecting governmental entities is supported by the purpose and legislative history of the Organized Crime Control Act of 1970 ("the Act"), Pub.L. No. 91-452, 84 Stat. 922, of which RICO is Title IX. [C] Both the purpose and legislative history of the Act reflect "concern about the infiltration of local government units." [c] Accordingly, "the language of section 1961(4), defining enterprise,... unambiguously encompass[es] governmental units, and... the purpose and history of the Act and the substance of RICO's provisions demonstrate a clear congressional intent that RICO be interpreted to apply to activities that corrupt public or governmental entities." [C]

The analysis [c] applies with equal force to this case. Throughout this action, the only enterprise alleged by the plaintiffs was the Town of Delaware, and the jury specifically found that the Town of Delaware was a RICO enterprise. [C] Based upon the evidence admitted at trial, the jury could reasonably have concluded that the Town of Delaware's grant or denial of approval for aspects of the plaintiffs' development was

1322

conditioned upon complying with the demands of Dirie, the Town Supervisor, and others with influence. As with the New York City Civil Court in Angelilli, the jury here could have reasonably found that the

Town of Delaware was a "passive instrument" through which the defendants wielded power for their personal benefit and, accordingly, was a RICO enterprise.

2. Interstate Commerce

[Defendant] Dirie argues that the plaintiffs offered little, if any, proof of a material impact on interstate commerce of either the enterprise or the RICO predicate crimes. We disagree.

The law in this Circuit does not require RICO plaintiffs to show more than a minimal effect on interstate commerce. [C] Here, one of the extortionate demands caused DeFalco to break an $8800 contract with the Walczak Lumber Company, an out-of-state logger located in Clifford, Pennsylvania. There was also testimony by the Clerk of the Town of Delaware that the regular business of the Town affected interstate commerce. Accordingly, Dirie's contention that the plaintiffs failed to establish that the activities of the enterprise affected interstate commerce is without merit.

3. Participation in the Conduct of the Town's Affairs

Section 1962(c) makes it unlawful "for any person employed by or associated with any enterprise... to conduct or participate, directly or indirectly, in the conduct of such enterprise's affairs through a pattern of racketeering activity...." 18 U.S.C. § 1962(c) (emphasis added). The Supreme Court has interpreted the phrase "to participate... in the conduct of [the] enterprise's affairs" to mean participation in the operation or management of the enterprise. See Reves v. Ernst & Young, 507 U.S. 170, 185, 113 S.Ct. 1163, 122 L.Ed.2d 525 (1993). Both Dirie and the Bernas defendants argue that there was insufficient evidence for the jury to find that they conducted the

affairs of the Town and that their conduct met the "operation or management" test. We disagree.

In Reves, when assessing the RICO liability of an outside accounting firm for racketeering activity carried on by its client, the Supreme Court addressed the question "whether one must participate in the operation or management of the enterprise itself to be subject to liability under this provision." [c] The Supreme Court examined Section 1962(c) and adopted an "operation or management" test to determine whether a defendant had sufficient connection to the enterprise to warrant imposing liability, [c] The Court held that, to conduct or participate, directly or indirectly, in the conduct of an enterprise's affairs, "one must have some part in directing those affairs." [c] The Court stated that "the word 'participate' makes clear that RICO liability is not limited to those with primary responsibility, just as the phrase 'directly or indirectly' makes clear that RICO liability is not limited to those with a formal position in the enterprise...." [c]

1323

The jury specifically found that [individual defendants] each "conducted or participated in the conduct of the affairs of the Town of Delaware through a pattern of racketeering activity," and the record here contains ample evidence from which a reasonable jury could have found that Dirie and the Bernas defendants each had some part in directing the Town of Delaware's affairs.

Dirie was the elected Supervisor of the Town of Delaware from January 1986 to December 1991. In this position, Dirie served as a member of the Town Board and as a member of the Town

Legislature. There was evidence at trial that Dirie offered to help guide DeFalco "through the muddy waters" of real estate development in the Town of Delaware, so long as DeFalco followed Dirie's suggestions. There was also evidence that, when DeFalco resisted Dirie's suggestions, Dirie used his authority within the Town of Delaware to affect the plaintiffs' development.

[The Court detailed examples of threats of withholding governmental approvals for failure to enrich defendants.]

***

In short, there was ample evidence from which a reasonable jury could conclude that Dirie participated in the operation or management of the Town of Delaware. Indeed, there was more than enough evidence in the record for a reasonable jury to conclude that Dirie had more than just "some part in directing those affairs." Reves, 507 U.S. at 179, 113 S.Ct. 1163 (emphasis added).

Similarly, a reasonable jury could have found that the Bernas defendants [who were involved in road construction, had extracted gravel from plaintiffs property and demanded a transfer of shares in the business] participated in the operation or management of the Town of Delaware. Although the Bernas, who were involved in road construction, had extracted gravel from the plaintiffs property and demanded a transfer of shares in the business, defendants had no official role in the operation or management of the Town, "RICO liability is not limited to those with primary responsibility for the enterprise's affairs,... [or] limited to those with a formal position in the enterprise...." [c] "An enterprise also might be 'operated' or 'managed' by others 'associated with' the enterprise who exert

control over it as, for example, by bribery." [c] There was ample evidence from which the jury could have concluded that Bernas played some part in directing the affairs of the Town....

After DeFalco signed over the one-third interest in JOBO, however, Bernas wanted rights to the entire gravel pit and the dedication of the Phase I roads was called into question again. Bernas told DeFalco that, if he did not turn the gravel pit over to him, "[t]hey were going to close the development down." When DeFalco resisted giving Bernas the entire gravel pit, Tax Assessors Ferber and Meckle reassessed certain lots from $20,000 to $45,000 a piece, more than doubling plaintiffs' taxes.

1324

When DeFalco asked Dirie how he could get Phase II approved in light of the April 2, 1990 letter from the Town of Delaware Planning Board listing certain uncompleted requirements, Dirie replied, "Give Bernas the gravel pit." ***

In short, there was ample evidence from which a reasonable jury could conclude that Bernas participated in the operation or management of the Town of Delaware, had at least some part in directing the affairs of the Town and, indeed, exerted some control over it. See Reves, 507 U.S. at 179, 184.

4. Predicate Acts

Both Dirie and the Bernas defendants argue that the plaintiffs failed to establish the commission of at least two predicate acts of racketeering by them.

a. William Dirie

Dirie argues that the crimes allegedly constituting racketeering activity by him were all based on extortion. In essence, Dirie argues that extortion requires the wrongful use of force, violence or fear and, in each of these instances, that element is entirely missing. Dirie claims that there was no evidence of a threat from him and that there was no evidence of the requisite fear of adverse consequences with respect to each of the charges of extortion. ***

Under the Hobbs Act, "[t]he term 'extortion' means the obtaining of property from another, with his consent, induced by wrongful use of actual or threatened force, violence, or fear, or under color of official right." 18 U.S.C. § 1951(b)(2). Extortion through threats of economic loss falls within the Hobbs Act's prohibitions, [C].

In this Circuit, "[t]he cases interpreting the Hobbs Act have repeatedly stressed that the element of 'fear' required by the Act can be satisfied by putting the victim in fear of economic loss." [C] The absence or presence of fear of economic loss "must be considered from the perspective of the victim, not the extortionist; the proof need establish that the victim reasonably believed: first, that the defendant had the power to harm the victim, and second, that the defendant would exploit that power to the victim's detriment." [C]

***

The Bernas defendants argue that the plaintiffs failed to establish a pattern of racketeering activity. RICO defines a "pattern of racketeering activity" as requiring "at least two acts of racketeering activity" committed in a 10-year period. [C] To establish a pattern, a plaintiff must also make a showing that the predicate acts of racketeering activity by a defendant are "related, and that they

amount to or pose a threat of continued criminal activity." H.J. Inc. v. Northwestern Bell Tel. Co., 492 U.S. 229, 239 (1989). The continuity necessary to prove a pattern can be either "closed-ended continuity," or "open-ended continuity." [Id.]

1325

The Bernas defendants argue that the plaintiffs have failed to establish the requisite minimum period of closed-ended continuity. Here, the Bernas defendants argue, the extortion took place over a period of only a few months: the one-third stock in JOBO was extorted in December 1989, induced by pressure upon DeFalco between May and December 1989; and the extortion of sand and gravel was also complete by December 1989. Thus, the defendants' extortion scheme lasted at most a few months during the last half of 1989, a duration not sufficient to establish a closed-ended pattern of racketeering by these defendants.

The Bernas defendants argue that the plaintiffs have also failed to establish a pattern of open-ended continuity, because the scheme by the Bernas defendants was by its very nature finite--once achieved the scheme would necessarily come to an end and there was no evidence that the predicate acts by the Bernas defendants were a regular way of conducting defendants' ongoing legitimate business.

Since the Supreme Court decided H.J., Inc., this Court has never held a period of less than two years to constitute a "substantial period of time." [C] Other circuits have required similar periods. [C] Although closed-ended continuity is primarily a temporal concept, other factors such as the number and variety of predicate acts, the number of both participants and victims, and the presence of

separate schemes are also relevant in determining whether closed-ended continuity exists. [C]

***

In this Circuit, the "cases assessing whether a threat of continuity exists have looked first to the nature of the predicate acts alleged or to the nature of the enterprise at whose behest the predicate acts were performed." [c] In assessing whether or not the plaintiff has shown open- ended continuity, the nature of the RICO enterprise and of the predicate acts are relevant, [c] Where an inherently unlawful act is performed at the behest of an enterprise whose business is racketeering activity, there is a threat of continued criminal activity, and thus open-ended continuity. See H.J. Inc., 492 U.S. at 242-43 ("[T]he threat of continuity is sufficiently established where the predicates can be attributed to a defendant operating as part of a long-term association that exists for criminal purposes."); However, "where the enterprise primarily conducts a legitimate business, there must be some evidence from which it may be inferred that the predicate acts were the regular way of operating that business, or that the nature of the predicate acts themselves implies a threat of continued criminal activity." [C]

The Bernas defendants argue that the plaintiffs failed to establish a pattern of open-ended continuity against them, because the alleged scheme by the Bernas defendants to obtain stock and gravel was inherently finite and therefore did not pose a threat of repetition.

***

[T]here was sufficient evidence from which a reasonable jury could conclude that the escalating nature of the Bernas defendants' demands--such as their demanding an increasing interest in the gravel pit--indicated that they had no intention of stopping once they met some immediate goal. Based on this evidence, the jury could reasonably have concluded that the Bernas defendants would have continued extorting the plaintiffs into the future. Accordingly, the scheme was not "inherently terminable" and the jury could reasonably have found that the nature of the Bernas' predicate acts themselves implied a threat of continued criminal activity.

The private right of action provision of RICO provides that: Any person injured in his business or property by reason of a violation of section 1962 of this chapter may sue therefor in any appropriate United States district court and shall recover threefold the damages he sustains and the cost of the suit, including a reasonable attorney's fee.

18 U.S.C. § 1964(c). " 'The phrase "by reason of' requires that there be a causal connection between the prohibited conduct and [the] plaintiffs injury.'" [C] To show that an injury resulted "by reason of' the defendant's action, a plaintiff must show " 'that the defendant's violations were a proximate cause of the plaintiff's injury, i.e., that there was a direct relationship between the plaintiffs injury and the defendant's injurious conduct.'" [c]. This requires a showing "not only that the defendant's alleged RICO violation was the 'but-for' or cause-in- fact of his injury, but also that the violation was the legal or proximate cause." [c] In other words, a plaintiffs injury must be both factually and proximately caused by a defendant's violation of section 1962. [c]

To prove proximate causation, the plaintiffs would have had to offer evidence that they were otherwise entitled to approval of Phase II and that no independent, intervening factors affected their ability to sell the lots. "[T]he less direct an injury is, the more difficult it becomes to ascertain the amount of the plaintiffs damages attributable to the violation, as distinct from other, independent factors." [c]

Thus, even were we to accept the plaintiffs' "enterprise damages" theory, under this Court's RICO precedents, the causal link between the plaintiffs' evidence and the inability to sell the Phase II lots is too weak to satisfy the proximate causation requirement. Thus, the District Court was correct in vacating the $1.6 million award.

CONCLUSION

We have considered the parties' remaining contentions and find them to be without merit. Accordingly, we VACATE the $1,000.00 award against Dirie for the truck wheels and tires extorted for the benefit of Dirie's son, but AFFIRM the judgments of the District Court in all other respects.

1327

NOTES AND QUESTIONS

1. In the principal case, the court finds the defendants were in a relation of control over the township governance. The requisite nexus may be at issue. See University of Maryland at Baltimore v. Peat, Marwick, Main & Co., 996 F.2d 1534 (1993) (finding that the provision of financial services, like auditors and computerization of accounting services relating to purchases and sales, does not form a

sufficient "nexus" between "the person and the conduct of the affairs of an enterprise").

2. A person may be liable for conspiracy to violate RICO. Section 1962(d) makes it illegal "to conspire to violate," among other things, § 1962(c). Recall that subsection (c) makes it unlawful for any person employed by an enterprise engaged in interstate commerce "to conduct or participate, directly or indirectly, in the conduct of such enterprise's affairs through a pattern of racketeering activity." In Salinas v. United States, 522 U.S. 52 (1997), the Court addressed conspiracy liability and held, applying general principles of conspiracy law, that a conspirator must intend to further an endeavor which, if completed, would satisfy all the elements of the criminal offense. It suffices, however, that he adopt the goal of furthering or facilitating the crime. It may appear, then, that under subsection (d) one need not participate personally in the operation or management of the enterprise. Could such an argument avoid the nexus requirement under the principal case? In Beck v. Prupis, 529 U.S. 494 (2000), the Court narrowed the scope of RICO conspiracy liability by requiring that the injury be caused by an act of racketeering or independent wrongfulness. This principle was taken from settled common law at the time of congressional enactment of the statute.

3. The provision of treble damages and attorney's fees under civil RICO provided a stimulus to include RICO counts in actions where traditional claims would lie. Can you suggest actions at common law that may have been available in the principal case?

4. A coalition of anti-abortion groups conspired to shut down abortion clinics. Can pro-choice organizations bring a civil RICO action claiming that the coalition had thus engaged in a pattern of racketeering activity including, as a racketeering predicate act, extortion in violation of the Hobbs Act, 18 U.S.C.A. § 1951? The Supreme Court in National Organization for Women, Inc. v. Scheidler, 510 U.S. 249 (1994) held that the action would lie, finding that the "enterprise" element of the offense did not connote an "economic motive." In a separate opinion Justice Souter, joined by Justice Kennedy, stressed that First Amendment concerns may in the appropriate case delimit the reach of RICO. Ultimately, after remand to the trial court and appeals again to the Court, a judgment for plaintiffs was reversed on the grounds that the elements of the predicate crime of extortion were not met. Scheidler v. National Organization for Women, Inc., 537 U.S. 393 (2003).

3. The Determination of Tort Law

At the end of the last century and in the two decades of this century, both Congress and the states have become active in tort reform. At the

federal level, much activity has been devoted to regulation touching the safety of products. Pharmaceuticals and health care products forming a significant area of tort liability have been closely regulated at the federal level. The debate surrounding health care reform has revivified suggestions that Congress include provisions designed to lessen claim frequency and severity to reduce costs in the provision of medical services. This regulation and reform places at center

stage the preemption of tort law by congressional lawmaking. You visited the complex issues of pre-emption in the context of products liability. (Chapter 15, Section 4(B).)

State tort reform has gathered pace, fueled by concerns about affordability and availability of liability insurance. Accumulating legislation has often been challenged on the basis that it violates state constitutional provisions. The Kentucky Supreme Court in Williams v. Wilson, 972 S.W.2d 260 (1998) adopted the notion of jural rights derived from the common law to limit reform. Other courts have nullified tort law: e.g., Best v. Taylor Machine Works, 179 Ill.2d 367, 689 N.E.2d 1057, 228 Ill.Dec. 636 (1997) (declaring the Civil Justice Reform Amendments of 1995 unconstitutional under the Illinois constitution); State ex rel. Ohio Academy of Trial Lawyers v. Sheward, 86 Ohio St.3d 451, 715 N.E.2d 1062 (1999) (civil justice reform amendments declared unconstitutional under Ohio constitution); Lakin v. Senco Products Inc., 329 Or. 62, 987 P.2d 463 (1999) (cap on noneconomic damages unconstitutional violation of Oregon right to jury trial). But see McDougall v. Schanz, 461 Mich. 15, 597 N.W.2d 148 (1999) (upholding statute setting strict requirements concerning qualifications of experts in medical malpractice cases in face of challenge brought under Michigan constitution).

The following is one court's response to state law reform:

Pulliam v. Coastal Emergency Svcs.

Supreme Court of Virginia, 1999.

257 Va. 1. 509 S.E.2d 307.

CARRICO, Chief Justice. In this appeal, we are called upon to consider again the constitutionality of the medical malpractice cap imposed by Code § 8.01-581.15.* We previously upheld the constitutionality of the cap in Etheridge v. Medical Center Hospitals, 237 Va. 87, 376 S.E.2d 525 (1989). ***Because we conclude that the medical malpractice cap does not violate any constitutional guarantees, we will uphold the cap's constitutionality and reaffirm Etheridge.

* * *

* Code § 8.01-581.15 provides that "in any verdict returned against a health care provider in an action for malpractice[,]... the total amount recoverable for any injury to, or death of, a patient shall not exceed one million dollars."

***

1329

[About 3:55 a.m. on December 15, 1995, Mrs. Pulliam arrived at the emergency room of Southside Regional Hospital complaining of "legs aching." She had been diagnosed with influenza two days earlier in the office of her private physician. At Southside Regional, she was examined by Dr. DiGiovanna, who had been retained by defendant Coastal Emergency Services to staff the hospital's emergency room. About 5:00 a.m., Dr. DiGiovanna discharged Mrs. Pulliam after prescribing a muscle relaxant and giving her printed instructions on influenza and additional instructions concerning bedrest. Shortly after 11:00 a.m. the same day, Mrs. Pulliam returned to the emergency room complaining of general weakness, particularly in her lower extremities. Following a physical

examination by another doctor, Mrs. Pulliam was started on intravenous fluids and subjected to a CT scan and a lumbar puncture. Thereafter, she was transferred to the intensive care unit, where her condition worsened. She was pronounced dead at 9:08 p.m. An autopsy revealed that the cause of death was bacterial pneumonia and bacteremia. She was survived by her husband, who is the executor of her estate, and a son. After a jury trial based on the medical malpractice of Dr. DiGiovanna, for whom Coastal was vicariously liable, the jury returned a verdict of $2,045,000. Pursuant to the applicable Virginia statute, the trial court judge reduced the verdict to $1,000,000 and this appeal followed.]

A. Constitutionality of Medical Malpractice Cap.

The plaintiffs assignment of error on this point states that "as a matter of law, the trial court erred in failing to conclude that the cap on medical malpractice awards is unconstitutional as applied to Coastal and to Dr. DiGiovanna." (Footnote omitted.) In considering this assignment of error, "we adhere to the well-settled principle that all actions of the General Assembly are presumed to be constitutional. This Court, therefore, will resolve any reasonable doubt regarding a statute's constitutionality in favor of its validity. Any judgment as to the wisdom and propriety of a statute is within the legislative prerogative, and this Court will declare the legislative judgment null and void only when the statute is plainly repugnant to some provision of the state or federal constitution." [C]

In Etheridge, we rejected challenges to the constitutionality of the medical malpractice cap based upon contentions that the cap "violates the Virginia Constitution's due process guarantee, jury trial

guarantee, separation of powers doctrine, prohibitions against special legislation, and equal protection guarantee, as well as certain parallel provisions of the Federal Constitution." [C] The plaintiff makes the same challenges here, but amplifies the arguments in several respects. (Footnote omitted.)

It is clear that we cannot grant the plaintiff relief without overruling Etheridge. Immediately, therefore, the doctrine of stare decisis is implicated. ***

The inquiry becomes, therefore, whether flagrant error or mistake exists in the Etheridge decision. The plaintiff contends that such error

1330

does exist and, therefore, that "the doctrine of stare decisis should not deter this Court from reversing Etheridge"

The plaintiff argues that the medical malpractice cap is unconstitutional on each of seven independent grounds. We will consider these grounds seriatim.

1. Right to Trial by Jury.

Article I, § 11 of the Constitution of Virginia provides "that in controversies respecting property, and in suits between man and man, trial by jury is preferable to any other, and ought to be held sacred." In Etheridge, we noted that, at the time the Constitution was adopted, the jury's sole function was to resolve disputed facts, that this continues to be a jury's sole function, (footnote omitted) and that the jury's fact-finding function extends to the assessment of damages. [C] We stated, however, that "once the jury has

ascertained the facts and assessed the damages,... the constitutional mandate is satisfied [and thereafter], it is the duty of the court to apply the law to the facts." [C] The medical malpractice cap, we said, does nothing more than establish the outer limits of a remedy; remedy is a matter of law and not of fact; and a trial court applies the remedy's limitation only after the jury has fulfilled its fact-finding function. Hence, we concluded, the cap does not infringe upon the right to a jury trial. [C]

The plaintiff says, however, that the Court in Etheridge "erred by failing to conclude that the mandate of Article I, § 11 includes the right to receive the amount of damages awarded by a jury after a proper jury trial." In this connection, the plaintiff cites two recent Supreme Court decisions.

***

The plaintiff says that these two decisions support his conclusion that the medical malpractice cap violates his right to a jury trial. We do not agree. In relying on Hetzel [v. Prince William Cty., 523 U.S. 208 (1998)], the plaintiff attempts to equate remittitur with the medical malpractice cap and argues that, since remittitur without the option of a new trial violates the Seventh Amendment right to a jury trial, application of the cap likewise violates Virginia's right to a jury trial. However, the plaintiffs initial premise is faulty because remittitur and the cap are not equivalent and do not come into play under the same circumstances. Remittitur, as well as additur, is utilized only after a court has determined that a party has not received a fair and proper jury trial. [C] The cap, however, is applied only after a plaintiff has had the benefit of a proper jury trial. In the latter situation, there

is no right to a new trial, and the constitutional mandate has been satisfied.

The plaintiffs reliance on Feltner [v. Columbia Pictures Television, Inc., 523 U.S. 340 (1998)] is also misplaced. There, the Court dealt primarily with whether Columbia was entitled to a jury trial even though it elected to seek statutory damages. The Court concluded that Columbia

1331

had the right to a jury trial because the common law afforded copyright owners causes of action for infringement, and these actions were tried before juries. The Court recognized that "the Seventh Amendment... applies not only to common-law causes of action, but also to 'actions brought to enforce statutory rights that are analogous to common-law causes of action ordinarily decided in English law courts in the late 18th century, as opposed to those customarily heard by courts of equity or admiralty.'" [C] The Court did not address the validity of a cap on the recovery of damages.

Furthermore, while it does not appear that the Supreme Court has addressed the issue of the validity of state statutory caps, it has noted the decisions of two circuit courts of appeals on the subject *** [and those opinions] have held that district court application of state statutory caps in diversity cases, post verdict, does not violate the Seventh Amendment.

***

Concerning the right of trial by jury under the Seventh Amendment, the Fourth Circuit followed our reasoning that it is not the role of the

jury but of the legislature to determine the legal consequences of the jury's factual findings. [C] However, the Fourth Circuit assigned this additional reason for upholding the validity of the cap against an assertion that it violated the right of trial by jury: "It is by now axiomatic that the Constitution does not forbid the creation of new rights, or the abolition of old ones recognized by the common law, to attain a permissible legislative object. Indeed, the district court conceded that a legislature's outright abolition of a cause of action would not violate the seventh amendment. If a legislature may completely abolish a cause of action without violating the right of trial by jury, we think it permissibly may limit damages recoverable for a cause of action as well." [Boyd v. Bulala, 877 F.2d 1191 (4th Cir. 1989)] at 1196 (citations and interior quotation marks omitted).

***

Nor can it be disputed that, in addition to abolishing a cause of action, a legislature may extinguish a cause of action by the imposition of a statute of limitations, for example, two years from the date of death in the case of an action for wrongful death. Code § 8.01-244. If it is permissible for a legislature to enact a statute of limitations completely barring recovery in a particular cause of action without impinging upon the right of trial by jury, it should be permissible for the legislature to impose a limitation upon the amount of recovery as well.

The courts of other states have upheld medical malpractice caps against assertions that they violate the right to a jury trial. [Cc]

The plaintiff cites several out-of-state cases declaring medical malpractice caps unconstitutional, but we find them inapposite [due

to

1332

differences between those state's constitutions and Virginia's or unpersuasive]. ***

2. Special Legislation.

Article IV, § 14 of the Constitution of Virginia provides that "the General Assembly shall not enact any local, special, or private law... (18) granting to any private corporation, association, or individual any special or exclusive right, privilege, or immunity." (Footnote omitted.) In Etheridge, we noted that we had previously held that laws may be made to apply to a class only, even though the class may be small, provided the classification is reasonable, not arbitrary, and the law is made to apply to all persons in the class without distinction. [C] We also noted that if the classification bears a reasonable and substantial relation to the object sought to be accomplished, it will survive a special-laws constitutional challenge. Id.

We then pointed out that, in enacting the Medical Malpractice Act, the General Assembly, after a careful and deliberate study, had determined health care providers faced increasing difficulty obtaining affordable malpractice coverage in excess of $750,000, thus reducing the number of such providers available to serve Virginia's citizens. We also pointed out that the General Assembly had determined that this significant problem adversely affected the public health, safety, and welfare and necessitated the imposition of a

limitation upon the liability of health care providers in medical malpractice actions. [C]

We observed that the General Assembly had decided that damage awards in medical malpractice cases should not exceed $750,000 (now $1,000,000), and we stated that the limitation applied to all health care providers and all medical malpractice patients. [C] We found that the classification was not arbitrary, that it bore a reasonable and substantial relation to the object sought to be accomplished, and that it applied to all persons belonging to the class without distinction. Id. Accordingly, we concluded that the legislation did not violate the prohibition against special legislation. Id.

***

[The court then considered plaintiffs argument that the cap was impermissible special legislation.] The remainder of the plaintiffs "as applied" argument is confined to the proposition that the medical malpractice cap concentrates the costs solely upon those whose losses are greatest while identifying "a specific elite class, described as 'health care providers,' to which it accords special privileges and immunities that are given to no other tortfeasors in this Commonwealth." And the plaintiff indicates his agreement with the dissent in Etheridge that the General Assembly acted arbitrarily in restricting the cap so that it did not apply to "all plaintiffs and all defendants regardless of their identities." [C] ***

Here, however, we do not have to assume a set of facts that would sustain the medical malpractice cap. The actual facts were as stated in

Etheridge: "The General Assembly concluded [after careful and deliberate study] that escalating costs of medical malpractice insurance and the availability of such insurance were substantial problems adversely affecting the health, safety, and welfare of Virginia's citizens." [C] Given these facts, we think the cap bears a reasonable and substantial relation to the General Assembly's objective to protect the public's health, safety, and welfare by insuring the availability of health care providers in the Commonwealth. Accordingly, we conclude that the medical malpractice cap does not constitute special legislation.

3. Taking of Property.

Under the Fifth Amendment to the Constitution of the United States, private property shall not be taken for public use without just compensation. Under art. I, § 11 of the Constitution of Virginia, private property shall not be taken or damaged for public uses without just compensation.

Here, the argument is that the effect of the medical malpractice cap is to take the property of the plaintiff and his son in violation of these constitutional provisions. As the statutory beneficiaries of Mrs. Pulliam, the argument goes, the plaintiff and his son "had a property interest in the full measure of the jury's verdict."

We disagree. ***[I]t is only when a right has accrued or a claim has arisen that it is subject to the protection of the due process clause ***"for 'nobody has a vested right in the continuance of the rules of the common law.'"[c]. Continuing, we stated that "the fourteenth

amendment does not forbid a legislature from abolishing old rights recognized by the common law in order to attain a permissible legislative objective." Finally, we said that "if a legislature can abolish a cause of action for a legitimate legislative purpose, it also may prevent a cause of action from arising by enacting a statute of repose for such a purpose."

This rationale applies with equal force here. The plaintiffs cause of action for wrongful death had not accrued at the time the cap was imposed upon recoveries in medical malpractice cases. One cannot obtain a property interest in a cause of action that has not accrued, and there was nothing to prevent the General Assembly from limiting the remedy, so far as unaccrued causes of action are concerned, to attain a permissible legislative objective without running afoul of the "taking" clauses of the Federal and State Constitutions. Accordingly, we find no violation of the "taking" clauses in this case.

4. Due Process.

***

5. Equal Protection.

In oral argument, the plaintiff combined these two subjects and attempted to convince the Court that it should apply an intermediate level of scrutiny, rather than the lower-level rational basis test, in our

due process and equal protection analysis of the medical malpractice cap. (Footnote omitted.) However, we ruled in Etheridge that, in a due process or equal protection analysis, the rational basis

test applies unless a fundamental right or a suspect class is affected. [c] And we noted that those interests that have been recognized as "fundamental" include the right to free speech, the right to vote, the right to interstate travel, the right to fairness in the criminal process, the right to marry, and the right to fairness in procedures concerning governmental deprivation of life, liberty, or property. [C] We noted further that suspect classifications are those based upon race and national origin and that classifications based upon gender, alienage, and illegitimacy are entitled to receive a level of scrutiny between strict scrutiny and the rational basis test. [C] Here, however, no fundamental right or suspect class is affected by application of the medical malpractice cap.

***

[The court found that Etheridge enunciated the correct level of scrutiny and that the rational basis test continues to provide the proper standard for determining whether there has been a denial of due process or equal protection in a case involving the medical malpractice cap, and that the statute satisfied due process.]

6. Separation of Powers.

***

7. Province of the Judiciary.

Because these two subjects are related, we will discuss them together. The plaintiff argues that the medical malpractice cap violates the separation of powers doctrine and also invades the province of the judiciary.

In rejecting a separation of powers challenge in Etheridge, we pointed out that under art. VI, § 1 of the Virginia Constitution, the General Assembly, subject to provisions relating to the power and jurisdiction of this Court, has "the power to determine the original and appellate jurisdiction of the courts of the Commonwealth." [C] We also noted that under art. IV, § 14 of the Constitution, the General Assembly's authority extends "to all subjects of legislation not herein forbidden or restricted," and that the common law is one area in which the General Assembly's authority has not been forbidden or restricted. Id.

Accordingly, we said that the legislature has the power to provide, modify, or repeal a remedy, [c] And we concluded that "whether the remedy prescribed in Code § 8.01-581.15 is viewed as a modification of the common law or as establishing the jurisdiction of the courts in specific cases, clearly it was a proper exercise of legislative power." [c]

***

1335

Thus, we find no merit in the plaintiffs arguments concerning separation of powers and the province of the judiciary. Accordingly, we reject the arguments. ***

[The court then ruled that the statutory cap applied to Coastal and that pre-judgment interest was included in the statutory cap.]

Affirmed.

[The concurring opinion of JUSTICE HASSELL is omitted.]

KINSER, Justice (concurring opinion). I agree with the majority's rationale and decision that the medical malpractice recovery cap contained in Code § 8.01-581.15 does not violate any provision of either the Constitution of the United States or the Constitution of Virginia. (Footnote omitted.) I reach this conclusion without considering the role that stare decisis should play in this case. I write separately for the sole purpose of expressing my belief that the medical malpractice cap creates an unwarranted injustice in certain situations.

The General Assembly has the responsibility to protect the health, welfare, and safety of the citizens of this Commonwealth through appropriate legislation. However, the medical malpractice cap works the greatest hardship on those individuals who are the most severely injured by the negligence of health care providers. Nevertheless, I cannot be influenced by such concerns when deciding the constitutionality of a challenged statute. I can only express my views with the hope that the General Assembly will adopt a more equitable method by which to ensure the availability of health care in this Commonwealth.

NOTES AND QUESTIONS

1. The consideration of a catalogue of constitutional challenges by the court in the principal case is typical of the cases challenging state tort reform. Do you agree with the court's ruling on each of the challenges? There are dozens of decisions at various levels by state courts holding state tort reform unconstitutional under state constitutions and even more decisions upholding such laws. For an elegant discussion of the place of tort law in the constitutional law

setting, see John C. P. Goldberg, The Constitutional Status of Tort Law: Due Process and the Right to a Law for the Redress of Wrongs, 115 Yale L.J. 524 (2005).

2. As you can see from Justice Kinser's concurring opinion in the principal case, he does not agree with the Virginia legislature's judgment on the propriety of a cap in medical malpractice cases, yet he voted to affirm the trial court's ruling. Why? As Justice Resnick noted in State ex rel. Ohio Academy of Trial Lawyers v. Sheward, 86 Ohio St.3d 451, 715 N.E.2d 1062, 1072 (1999), "[a]ll arguments going to the soundness of legislative policy choices, however, are directed to their proper place, which is outside the door to this courthouse. This court has nothing to do with the policy or wisdom of a statute. That is the exclusive concern of the legislative branch of the government. The only judicial inquiry into the constitutionality of a statute

involves the question of legislative power, not legislative wisdom." (Internal quotations and citations omitted.)

3. A theme in the cases in this chapter is the respective and sometimes conflicting roles of the judiciary and the legislature in declaring tort law. Sometimes the discussion is cast in terms of preference (which body is better suited to resolve the issue) and sometimes in terms of power (which body is authorized to make the decision). See Symposium: Judges as Tort Lawmakers, 49 DePaul L.Rev. 275 (1999). The substantive issues being considered--whether medical monitoring is a form of damage, the appropriate threshold for punitive damages, the standard for proving punitive

damages, whether there should be a cap on damages--are very difficult ones, with compelling arguments on both sides. For example, some investigators have linked tort reform damage caps to a reduction in the intensity of patient care. Rovan Avraham & Max Schanzenbach, The Impact of Tort Reform on Intensity of Treatment: Evidence from Patients, 39 J. of Health Econ. 273 (2015). Beyond this, the balance may depend on judicial appreciation that the goals and purposes of tort law are separate and independent of the state's regulatory role. Benjamin Zipurski, The New Private Law: Palsgraf, Punitive Damages, and Preemption, 125 Harv. L. Rev. 1757 (2012). Equally challenging is the discernment of the proper role of the two branches of government. How should they work together to make tort law? How do you see their respective roles? This struggle for power between the legislative and judicial branches of the states promises to be an important one, fervently pursued, often on thin data, during the next decade. What will your role in it be? How would you strike the proper balance? An exacerbating factor is the increasing politicization of the selection of judges reducing faith in the independence of judicial review. See Nash and Shepherd, Filibuster Change and Judicial Appointments, (2020 forthcoming).

4. When considering product liability, we canvassed the interaction of federal regulation and state tort law. See pages 881 to 883. Congressional legislation and federal agency regulatory authority persist, and therefore, the issue of preemption will remain a dominant arena for considering tort law in the age of the administrative state. Case law has burgeoned. Two recent Supreme Court cases, principal cases in Chapter 15, loom large: Riegal v. Medtronic, Inc., 552 U.S. 312 (2008) and Wyeth v. Levine, 555 U.S.

555 (2009). In the more recent case of Wyeth, the Court considered the preemptive effect of agency regulation about warnings given the administration of a prescribed drug, Phenergan. It had been determined at trial that the warning label was inadequate under state tort law. Thus the issue of preemption in FDA regulation again was presented for resolution by the Supreme Court.

In Wyeth, a long anticipated decision, the Supreme Court considered Wyeth's two preemption arguments: first, that Wyeth could not have complied with the state-law duty without violating federal law, and second, that recognition of the state tort action created an unacceptable obstacle to the accomplishment and execution of the full purposes and objectives of Congress, in that it substituted a lay jury's decision about drug labeling for

the expert judgment of the FDA. The Court relied on two basic tenets in finding no preemption. First, the question depends on the "purpose of Congress," and second, that the assumption that the historic police powers of the States, including tort law, are not superseded unless Congress's intent was clear and manifest. On the evidence, the Court found that Wyeth could have complied with both federal and state requirements. It could have strengthened its warning on the label, even though an earlier warning had been FDA-approved. The responsibility lay with Wyeth. On the second argument--that complying with the tort law would detract from the purpose and objectives of federal drug labeling regulations--the Court found no predicate in the evidence relating to Congressional intent or purpose. However, agency regulations may preempt

conflicting state tort law. Two years after Wyeth, the Supreme Court held that state tort law claims against a generic manufacturer in a failure to warn suit were preempted because the FDA regulation prevented the generic drug from having a different warning than the approved pioneer drug. PLIVA v. Mensing, 564 U.S. 604, 131 S. Ct. 2567 (2011).

In Wyeth, the Court took the view that the co-existence of state and federal law was complimentary and long standing. Justice Thomas concurred in the Court's opinions but was concerned that the Court's "purposes and objectives" jurisprudence allowed invalidation of state law on broad notions outside the text of the statute. Justice Alito filed a dissenting opinion joined by Roberts, C. J. and Scalia, J. The dissent viewed the evidence as establishing that the federal regulation and the state tort law could not co-exist.

After Wyeth and PLIVA, much will depend on the thoroughness of agency findings. Has the law achieved any stability after Wyeth? Is there merit in competing legislative and regulatory findings? Federalism, with its overlapping jurisdictions, some have suggested, has distinct advantages: Robert A. Schapiro, Polyphonic Federalism: Toward the Protection of Fundamental Rights (U of Chicago Press, 2009).

[BLANK PAGE]

CHAPTER 24 COMPENSATION SYSTEMS AS SUBSTITUTES FOR TORT LAW

Students come to this chapter with a close appreciation of the rambunctious and ramshackle nature of tort law. Although tort law has moved to cover more widely economic interests, its home is the protection of physical integrity. Tort lawyers are usually pictured as inhabiting courtrooms to argue personal injury claims. We have seen, of course, a much wider embrace of personal physical and emotional interests.

This book's cases and materials show that tort law has been subject to both judicial and legislative changes, but these changes have not altered the basic picture of lawyers in the courtroom. Over a century ago a more radical change occurred--no-fault workers' compensation. About fifty years ago, approaches were suggested and adopted in various states for automobile no-fault compensation systems. These developments are reviewed before turning to other no-fault compensation systems, some targeting particular problems (e.g., vaccine-related injuries) or resulting from catastrophic events (e.g., the 9/11 terrorist attack), others of a broader nature which would replace the entire body of tort liability for personal injury with a governmental no-fault compensation system. As you review these schemes ask about the nature and function of tort liability. What are its purposes and are they adequately reflected in compensation systems? Should those purposes be captured in any tort system or is it appropriate to forfeit some (for example, deterrence) in the

interest of maximizing others (for example, compensation to a wide class of injured persons)? Are there ways of formulating the approaches as to preserve the benefits of tort liability while remedying its ills?

1. Employment Injuries

Negligence was formed in the crucible of the Industrial Revolution. Exponential increase in speed and efficiency of transportation and industrial production resulted in an ever increasing number of personal injuries. Duties of care in negligence were imposed on employers toward their employees. Out of the numerous cases arose an elaborate doctrinal system. Thus, among others, the employer had the general duties of using due care to provide a safe place to work and to supply safe tools and appliances. There were exceptions and counter-exceptions--e.g., the simple-tool doctrine as an exception to the second duty above, and the inexperienced-employee doctrine as an exception to it. See generally J.D. Lee & Barry A. Lindahl, Modern Tort Law: Liability & Litigation S 42:6 (2d ed„ 2014).

1340

But the most significant aspect of the doctrinal development was a group of three defenses--assumption of risk, contributory negligence and the fellow-servant rule. This "unholy trinity," added to the requirement of proving the employer's negligence meant that stumbling blocks were placed on recovery by injured workers of damages. Long, drawn-out litigation placed severe financial burdens upon workers. Even though courts cannot be said to have been uniformly hostile to workers' claims, the realities of wealth and

ineffectual representational institutions for workers dictated relatively few instances of compensation.

With the incidence of industrial accidents came social pressure for a system to compensate the many injured. Sometimes the pressure was accommodated through bargains between employers and employees. More widely, Congress took note of the issue and repealed some of the common law doctrines that had frustrated the goal of more adequate compensation for railroad workers. Federal Employers' Liability Act, 1906. The Act did not survive constitutional challenge. The second attempt saw the Federal Employers' Liability Act of 1908 (45 U.S.C.A. § 51 et seq. (1908)). Congress enacted a law easing tort law burdens for longshoremen and harbor workers in 1927 (33 U.S.C.A. § 901 et seq. (as amended 1972)). These acts restructured the tort system making it easier for workers to recover damages. Much later Congress established a compensation system for coal miners commonly called the Black Lung Program (Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C.A. §§ 801-962). Congress, in 1986, enacted the National Childhood Vaccine Injury Act, which provides compensation to certain injuries related to childhood vaccines. The compensation scheme has been amended under the 21st Century Cures Act 2016 to include not only a pregnant woman, but also a vaccine administered to "each child who was in utero at the time such woman was administered the vaccine" Pub.L. No. 114-255, § 3039, 130 Stat. 1033, 1151 (2016) codified as amended 42 U.S.C.A. § 300aa-11.

By far, the boldest scheme is Workers' Compensation legislation that allows workers injured in the course of employment to recover compensation from the employer without having to prove employer

fault. The employer is able to insure for these losses. Within each state, a large segment of common law liability was abolished, as the legislation was enacted. Compensation is now ubiquitous in the modern Western Industrial state. It was first introduced in Bismarck's Germany in the late 19th Century reflecting the maturity of the industrial revolution, a rise in labor union influence, and the challenge of Marxist ideas. England and other European nations followed the German experiment. New York in 1910 was the first state to adopt Workers' Compensation legislation. Wisconsin's 1911 legislation was the first to withstand constitutional challenge.

The rallying theme for the movement was that the enterprise should bear the loss rather than permit it to lie on the unfortunate employee

who through some "bad luck" had incurred the injury in circumstances where it was non-compensable: "The cost of the product should bear the blood of the workman." The employer was liable to the injured employee regardless of fault, so long as the injury occurred in the course of employment. Early workers' compensation laws only protected employees from work-related injuries, but not occupational diseases. Today these also are included, with some retrenchment in the case of stress-related disease, under the workers' compensation systems. It has been argued that the systems implicitly perform the dual role of tort liability--compensation and optimal deterrence. Deterrence may operate by internalizing the costs of production, thus ensuring an optimal production of goods. The efficacy of internalization depends in part on the sensitivity of the insurance system in discriminating

between safe and unsafe producers, the willingness of the political system to face producers with costs of accidents, and the impact of transaction costs, like litigation costs and uncertainty of benefits. In face of these obstacles the internalization process may be weakened as costs are spread to the public at large. For historical background, see J. Weinstein, The Corporate Ideal in the Liberal State, 1900-1918, ch. 2 (1968).

Workers' compensation has developed into a complex and highly specialized field of law. Litigation is a feature of the system as each year courts hand down many decisions that mainly concern questions about coverage. Typical questions include whether an injury fell within the scope of employment, see, e.g., Nemchick v. Thatcher Glass Mfg. Co., 203 N.J.Super. 137, 495 A.2d 1372 (App.Div. 1985) (employee's injury while driving home from work after completion of an assigned off-premises task occurred in "course of employment"); or whether the injury suffered was caused by conditions of employment. See, e.g., State Accident Ins. Fund v. Noffsinger, 80 Or.App. 640, 723 P.2d 358 (1986) (psychic injury as a result of verbal harassment and horseplay at workplace); Graver Tank & Mfg. Co. v. Industrial Comm'n, 97 Ariz. 256, 399 P.2d 664 (1965) (suicide); Anderson v. Save-A-Lot, 989 S.W.2d 277 (Tenn. 1999) (sexual harassment of employee by supervisor causing injury not in the course of employment). Generally courts consider whether the injury may reasonably be regarded as an incident of employment rather than whether the injury was specifically foreseeable. See, e.g., Burns v. Merritt Eng'g Co., 302 N.Y. 131, 135, 96 N.E.2d 739, 741 (1951).

Advances in medical knowledge have established a causal connection between some diseases and exposure to toxic substances found in the work place. Claims for these diseases have challenged the limits of workers compensation coverage. However, proof of the causal connection is often challenging. Dewees, Duff, & Trebilcock, Exploring the Domain of Accident Law: Taking the Facts Seriously 351-352 (1996).

Perhaps the best summary of how these laws function has been provided by the author of the leading treatise in the field:

1342

"The right to [workers'] compensation benefits depends on one simple test: Was there a work-connected injury? Negligence, and, for the most part, fault, are not in issue and cannot affect the result. Let the employer's conduct be flawless in its perfection, and let the employee's be abysmal in its clumsiness, rashness and ineptitude: if the accident arises out of and in the course of the employment, the employee receives his award. Reverse the positions, with a careless and stupid employer and a wholly innocent employee: the same award issues.

"Thus, the test is not the relation of an individual's personal quality (fault) to an event, but the relationship of an event to an employment. The essence of applying the test is not a matter of assessing blame, but of marking out boundaries. § 1.03 L. Larson, Larson's Workers' Compensation (2013) (Matthew Bender Rev. Ed.) (Copyright Matthew Bender and Company Inc. Reprinted by Permission.)

"The typical workers' compensation act has these features: (a) the basic operating principle is that an employee is automatically entitled

to certain benefits whenever he suffers a 'personal injury by accident arising out of and in the course of employment'; (b) negligence and fault are largely immaterial, both in the sense that the employee's contributory negligence does not lessen his rights and in the sense that the employer's complete freedom from fault does not lessen his liability; (c) coverage is limited to persons having the status of employee, as distinguished from independent contractor; (d) benefits to the employee include cash-wage benefits, usually around one-half to two-thirds of his average weekly wage, and hospital and medical expenses; in death cases benefits for dependents are provided; arbitrary maximum and minimum limits are ordinarily imposed; (e) the employee and his dependents, in exchange for these modest but assured benefits, give up their common-law right to sue the employer for damages for any injury covered by the act; (f) the right to sue third persons whose negligence caused the injury remains, however, with the proceeds usually being applied first to reimbursement of the employer for the compensation outlay, the balance (or most of it) going to the employee; (g) administration is typically in the hands of administrative commissions; and, as far as possible, rules of procedure, evidence, and conflict of laws are relaxed to facilitate the achievement of the beneficent purposes of the legislation; and (h) the employer is required to secure his liability through private insurance, state-fund insurance in some states, or 'self-insurance'; thus the burden of compensation liability does not remain upon the employer but passes to the consumer, since compensation premiums, as part of the cost of production, will

be reflected in the price of the product." 1 L. Larson, Larson's Workers' Compensation Law § 1.01 (2013). (Matthew Bender, Rev. Ed.) (Copyright Matthew Bender and Company, Inc. Reprinted by permission.)

Workers' compensation law has not received the criticism leveled at the common law tort system. Yet burdens of compensation have increased for employers, from $1 billion in 1950 to $2 billion in 1960 to $5 billion in 1970 to $21 billion in 1980, reaching nearly $35 billion in 1986 (reported by the ALI Reporter Study: Enterprise Responsibility for Personal Injury, Vol. 1, p. 106 (1991)). It is estimated that the burden rose to $56 billion in 1990 and to $62 billion in 1992. Schwartz, Waste, Fraud, and Abuse in Workers' Compensation: The Recent California Experience, 52 Md. L. Rev. 983, 984 (1993). The most recent figures from the National Academy of Social Insurance (NASI) show that in 2017 workers compensation costs increased to $97 billion, Elaine Weiss, et. al., National Academy of Social Insurance, Workers' Compensation: Benefits, Costs, and Coverage (2017 data), 42 (2019).

Employers have complained about the burden, especially as coverage has extended from injuries to occupational health. Thus, on July 16, 1993, California enacted legislation providing that no compensation shall be paid "for psychiatric injury if the injury was substantially caused by lawful, nondiscriminatory, good faith personnel action." Employees, in contrast, have complained about inadequacy of coverage limits on claims and eroding benefits as levels of compensation are not adjusted for cost of living increases. Eaton, The Bargain is No Longer Equal: State Legislative Efforts to Reduce Workers' Compensation Costs Have Impermissibly Shifted

the Balance of the Quid Pro Quo in Favor of Employers, 37 Ga. L. Rev. 325 (2002). More recently, some states have proposed laws allowing employers to opt out of state workers' compensation systems while retaining tort immunity, so long as the employer designs an alternative benefit plan. Oklahoma passed such a law, but it was deemed unconstitutional by the Oklahoma Supreme Court. Similar plans have been proposed in Tennessee and South Carolina, but have not been adopted. Similarly, in Florida, recent legislation that reduced the availability of attorney fees in workers' compensation claims was found to be unconstitutional by the Florida Supreme Court. Emily A. Spieler, (Re)assessing the Grand Bargain: Compensation for Work Injuries in the United States, 1900-2017, 69 Rutgers U.L. Rev. 891, 948-53 (2017).

A significant portion of compensation dollars go to pay for hospital and medical expenses. In fact, the health care reforms proposed at the end of 1993 by the Clinton Administration opened the question of whether that component of the workers' compensation system should be shifted to health care plans, leaving the system to deal, in the main, with compensation for lost earnings. Reforms later did not answer the question. With some moves to expand mandatory coverage we may see a

renewed argument to shift medical costs to health insurance. What do you see as the advantages or disadvantages of folding the medical expense component of workers compensation into the health care system?

The benefits provided by the workers' compensation system appear to be conspicuously modest in light of the recent developments of expanded liability for tortious conduct. Recall restriction or abolishment of the defenses of contributory negligence, assumption of the risk and the fellow servant rule. In addition, damages for non-economic loss have increased in kind and magnitude. At the same time, constraints on workers' compensation have directly inhibited extension of benefits. Some courts have responded to the disparity by circumventing the workers' compensation immunity shield.

Blankenship v. Cincinnati Milacron Chemicals, Inc.

Supreme Court of Ohio, 1982.

69 Ohio St.2d 608, 433 N.E.2d 572, cert, denied,

459 U.S. 857, 103 S.Ct. 127, 74 L.Ed.2d 110 (1982).

[Eight current or former employees of Cincinnati Milacron Chemicals, Inc. (Milacron) brought an action against Milacron, alleging that exposure to fumes of certain chemicals within the scope of their employment rendered them sick, poisoned, and permanently disabled. The employees alleged that Milacron knew that such conditions existed, failed to correct the conditions, failed to warn the employees of the damages and conditions that existed, and failed to report the conditions to various state and Federal agencies to which they were required to report by law. The employees further alleged that Milacron failed to warn the employees that certain occupational diseases were being contracted and failed to provide medical examinations as required by law, and that Milacron's omissions were

intentional, malicious, and in willful and wanton disregard of the duty to protect the health of employees.

The trial court dismissed on the ground that the action was barred by relevant sections of the Ohio Constitution and the Ohio Workers' Compensation Act, which afforded an employer and his employees total immunity from civil suit. Employees appealed the trial court's holding and the Court of Appeals affirmed. The cause is now before this court pursuant to the allowance of a motion to certify the record.]

BROWN, J. ***The sole issue raised in this appeal is whether the trial court properly granted appellees' motion to dismiss appellants' complaint on the grounds that an employee is barred by Section 35, Article II of the Ohio Constitution, and R.C. 4123.74 and 4123.741 from prosecuting an action at law for an intentional tort. ***

The primary focus of the dispute between the parties centers upon the question of whether the Workers' Compensation Act [c] is intended to cover an intentional tort committed by employers against their employees.

1345

Section 35, Article II of the Ohio Constitution, serves as a basis for legislative enactments in the area of workers' compensation by providing, in pertinent part:

"For the purpose of providing compensation to workmen and their dependents, for death, injuries or occupational disease, occasioned in the course of such workmen's employment, laws may be passed establishing a state fund to be created by compulsory contribution thereto by employers, and administered by the state, determining the

terms and conditions upon which payment shall be made therefrom. Such compensation shall be in lieu of all other rights to compensation, or damages, for such death, injuries, or occupational disease, and any employer who pays the premium or compensation provided by law, passed in accordance herewith, shall not be liable to respond in damages at common law or by statute for such death, injuries or occupational disease. ***"

The constitutional mandate has been implemented by R.C. 4123.74 which provides: "Employers who comply with section 4123.35 of the Revised Code shall not be liable to respond in damages at common law or by statute for any injury, or occupational disease, or bodily condition, received or contracted by any employee in the course of or arising out of his employment ***whether or not such injury, occupational disease [or] bodily condition ***is compensable under sections 4123.01 to 4123.94, inclusive, of the Revised Code." ***

[W]here an employee asserts in his complaint a claim for damages based on an intentional tort, " ***the substance of the claim is not an injury ***received or contracted by any employee in the course of or arising out of his employment within the meaning of R.C. 4123.74 ***." Id. No reasonable individual would equate intentional and unintentional conduct in terms of the degree of risk which faces an employee nor would such individual contemplate the risk of an intentional tort as a natural risk of employment. Since an employer's intentional conduct does not arise out of employment, R.C. 4123.74 does not bestow upon employers immunity from civil liability for their intentional torts and an employee may resort to a civil suit for damages. [C]

This holding not only comports with constitutional and statutory requirements, but it is also consistent with the legislative goals which underlie the Workers' Compensation Act.

The workers' compensation system is based on the premise that an employer is protected from a suit for negligence in exchange for compliance with the Workers' Compensation Act. The Act operates as a balance of mutual compromise between the interests of the employer and the employee whereby employees relinquish their common law remedy and accept lower benefit levels coupled with the greater assurance of recovery and employers give up their common law defenses and are protected from unlimited liability. But the protection afforded by the Act has always been for negligent acts and not for intentional tortious conduct.

1346

Indeed, workers' compensation acts were designed to improve the plight of the injured worker, and to hold that intentional torts are covered under the Act would be tantamount to encouraging such conduct, and this clearly cannot be reconciled with the motivating spirit and purpose of the Act.

It must also be remembered that the compensation scheme was specifically designed to provide less than full compensation for injured employees. Damages such as pain and suffering and loss of services on the part of a spouse are unavailable remedies to the injured employee. Punitive damages cannot be obtained. Yet, these damages are available to individuals who have been injured by intentional tortious conduct of third parties, and there is no legitimate reason why an employer should be able to escape from such

damages simply because he committed an intentional tort against his employee.

In addition, one of the avowed purposes of the Act is to promote a safe and injury-free work environment. [C] Affording an employer immunity for his intentional behavior certainly would not promote such an environment, for an employer could commit intentional acts with impunity with the knowledge that, at the very most, his workers' compensation premiums may rise slightly. ***[The court holds that the question of whether Milacron's conduct and omissions amounted to an intentional tort should have been determined by the trier of fact, and that the trial court improperly dismissed the action. Judgment of the Court of Appeals is reversed and case remanded for further proceedings], [CELEBREZZE, C.J., and SWEENEY and CLIFFORD F. BROWN, JJ., concur. LOCHER, J., concurs in part and dissents in part. HOLMES and KRUPANSKY, JJ., dissent. The dissenting opinion of Holmes argues that tort actions should be permitted against employers only in cases of actual intent to injure the employees. Krupansky's dissent argues that there should be no judicial creation of an intentional misconduct exception to the employers' tort immunity because there is no express exception in the Ohio Workers' Compensation Act].

NOTES AND QUESTIONS

1. The subsequent evolution of the law in Ohio is tortuous and characterized by legislative initiatives and judicial counterattacks. Immediately after the principal case, the Ohio legislature enacted a statute that attempted to enfold employers' intentional torts within a provision of the Ohio code that precluded common law relief but

gave enhanced compensation benefits. The benefits were to be paid from a fund generated by levies against employers. Subsequently, this statute was declared unconstitutional. Brady v. Safety-Kleen Corp., 61 Ohio St.3d 624, 576 N.E.2d 722 (1991). After more case law development, the Ohio legislature again stepped in to define the intentional tort exception more stringently than the judicial definition. Ohio Rev. Code Ann. § 2745.01. The employee must under this provision prove deliberate and intentional conduct on the employer's part.

1347

In yet a further judicial counter attack, the Ohio Supreme Court has found the intentional conduct provision unconstitutional, Johnson v. BP Chemicals, Inc., 85 Ohio St.3d 298, 707 N.E.2d 1107 (1999). With the battle continuing, in 2010 in Kaminsky v. Metal & Wire Prods. Co., the Supreme Court of Ohio upheld the constitutionality of a revised version of § 2745.01. 125 Ohio St. 3d 250, 927 N.E.2d 1066 (2010). The statute requires the employee to prove the employer acted with the intent to injure another or with the belief that the injury was substantially likely to occur.

2. The Supreme Court of West Virginia created a similar exception for employers' "willful, wanton, or reckless misconduct" in Mandolidis v. Elkins Indus., Inc., 161 W.Va. 695, 246 S.E.2d 907 (1978). Later, the West Virginia legislature modified the Mandolidis rule by narrowing the concept of "willful, wanton, and reckless conduct" in an attempt to create greater certainty. In 2015, the West Virginia legislature narrowed the concept further, explicitly rejecting claims of willful, wanton, or reckless misconduct, and requiring plaintiffs to

prove the employer had actual knowledge of the specific unsafe working condition and the strong probability of serious injury or death it presented. W. Va. Code Ann. § 23-4-2. See also Russell, Finalizing the Grand Compromise in West Virginia Workers' Compensation: Repeal Deliberate Intent, 119 W. Va. L. Rev. 999, 1019 (2017) (arguing that the attempt to narrow the statute will not limit employer liability in the way the legislature intended).

3. Other exceptions are:

A. Successor corporations, Billy v. Consolidated Mach. Tool Corp., 51 N.Y.2d 152, 412 N.E.2d 934, 432 N.Y.S.2d 879 (1980). In Billy, the decedent, an employee of Corporation A, was killed by a piece of equipment manufactured by Corporation B. The estate collected workers' compensation benefits, but subsequently sued Corporation A. Prior to the accident, Corporation A had absorbed Corporation B through a merger. But for the merger, Corporation B would have been subject to traditional tort actions. The court held that Corporation A, otherwise immune from suit under the exclusive remedy doctrine, was the successor to the inchoate tort liabilities of Corporation B. The liability survived the merger, "since the obligation upon which [Corporation A] is being sued arose not out of the employment relation, but rather out of [the] independent business transaction" of the merger itself. Billy, however, represents the minority view. See Braga v. Genlyte Group, Inc., 420 F.3d 35, 44 (1st Cir. 2005) (criticizing Billy, finding that the inchoate tort liability incurred by Corporation B before the merger excluded employees, and that Corporation A should have inherited such immunity).

B. Third party actions for indemnity or contribution against the employer, Lambertson v. Cincinnati Welding Corp., 312 Minn. 114, 257 N.W.2d 679 (1977).

C. Dual capacity of employer, as where a hospital employee is injured in the course of employment, cared for by the employer hospital and the injury is aggravated. Can employee sue at common law for the subsequent injury? Wymer v. JH Properties, Inc., 50 S.W.3d 195 (Ky. 2001) (finding that

tort suit is available); but cf. Suburban Hosp., Inc. v. Kirson, 362 Md. 140, 763 A.2d 185 (2000) (tort suit not available).

D. Actions for damages of a kind not covered by the statute, Foley v. Polaroid Corp., 381 Mass. 545, 413 N.E.2d 711 (1980) (injury to reputation resulting from libel).

E. Some state statutes, reflecting recent criticism of the traditional workers' compensation scheme or its costs, allow unions and employers to provide themselves with alternative dispute resolution in some industries. The statutes are described in Moscowitz & Van Bourg, Carve-Outs and the Privatization of Workers' Compensation in Collective Bargaining Agreements, 46 Syracuse L. Rev. 1 (1995); see also Town of Cumberland v. Cumberland Town Employees Union, 183 A.3d 1114 (R.I. 2018).

4. Is the result in the principal case, and the ensuing legislative reform and judicial reaction, likely to occur so long as no-fault compensation systems are islands within the tort litigation system? Ohio is among states with more limited recovery in worker

compensation. Would the result have been different if worker compensation awards had been more nearly adequate? Or if, as in England, workers' compensation was not an exclusive remedy but in addition to damages at common law?

2. Automobile Accident Injuries

As of 2014, 14 states [as of November 2018, 12 states and Puerto Rico, data reported by The Insurance Information Institute.] had adopted a no-fault scheme. Motor vehicle reparation plans, or no-fault automobile insurance as they are commonly called, are schemes under which a policyholder is compensated by his own insurer regardless of his fault in causing his loss. In contrast to the universality of worker's compensation, they have not found fertile ground. Adoption is sporadic and varied, and they have been unable to obtain the widespread adoption of the worker's compensation statutes. Although Judge Marx in 1925 proposed a no-fault reparation scheme, no legislation was enacted until 1971, except in the province of Saskatchewan, Canada. The immediate impetus for automobile no-fault plans was the 1965 book by Professors Robert E. Keeton and Jeffrey O'Connell, titled Basic Protection for the Accident Victim--A Blueprint for Reforming Automobile Insurance. The plan was accompanied by a model no-fault statute. Bolstered by U.S. Department of Transportation, critical of the tort system and ultimately urging no-fault compensation, 24 states and the District of Columbia passed no-fault statutes of various types. Subsequently, a number of states repealed schemes. In no state does the insured surrender the right to sue in tort for pain and suffering in exchange for coverage of an economic loss. Modified no-fault is coverage in

which benefits are awarded regardless of fault and the right to sue for pain and suffering is permitted only after satisfying a statutory threshold. Some states use a dollar amount; others a verbal threshold (in Florida, for example: "significant and permanent scarring or disfigurement," Fla. Stat. 627.737; in 2020 a repeal statute

was defeated in the Florida senate). These states are Florida, Hawaii, Kansas, Kentucky, Massachusetts, Michigan, Minnesota, New Jersey, New York, North Dakota, Pennsylvania, and Utah. Of the states that are modified no-fault states, three are choice no-fault states. Under this system, a driver may choose to be included in the modified no-fault system or the tort system. States with this form of no-fault coverage are New Jersey, Pennsylvania, and Kentucky. "Add-on" insurance is expanded first-party coverage that has first-party, no-fault benefits for medical expenses and lost wages but does not restrict lawsuits for pain and suffering. The coverage is called "add-on" because it is added on to the existing tort liability system. The ten add-on states are Arkansas, Delaware, Maryland, New Hampshire, Oregon, South Dakota, Texas, Virginia, Washington, and Wisconsin. The District of Columbia also allows for add-on insurance.)

Interest in no-fault schemes has burned slowly. It has been revived episodically with concerns about the cost of compensating victims of auto accidents. At the same time other tort reform initiatives and academic advocacy has further ripened interest in auto no-fault schemes. Some of the advantages of the schemes may be captured

by efficient litigation innovations: Engstrom, Sunlight and Settlement Mills, 86 N.Y.U.L. Rev. 805 (2011) (discussing how lawyers in "settlement mills" have achieved efficiencies through systematic settlement of claims.)

Yet others see little scope for wider adaption of no-fault reforms. See Kenneth S. Abraham, The Liability Century: Insurance and Tort Law from the Progressive Era to 9/11, Harvard Univ Press, 103 (2008) (concluding that auto no-fault "has no prospect of spreading beyond the handful of states where it is now in force"). Read the Rand study described below and ask why, with the identified advantages, the impetus for reform has waned. Engstrom, An Alternative Explanation for No-Fault's "Demise," 61 DePaul L. Rev. 303 (2012).

Against the tide, Michigan in 2019 enacted a new comprehensive no-fault scheme effective June 11, 2019. 100th Leg. Reg. Sess. 2019. Drivers under the scheme have a choice of four Personal Injury Protection levels. Formerly, the state required an unlimited PIP coverage. Now Michigan drivers can select PIPs with various conditions, $50,000, $250,000, $500,000 and unlimited. Drivers can opt for no coverage if otherwise adequately insured. The legislation contains an explicit anti-fraud provision.

In a comprehensive study published by Rand's Institute for Civil Justice entitled, No Fault Approaches to Compensating People Injured in Automobile Accidents, S. J. Carroll et al (R-4019-ICJ) no fault or personal injury protection plans were studied nationally. The authors examined the effects of adopting no fault schemes within the parameters of the following outcomes:

* Total injury coverage costs;

* Transaction costs--lawyer fees and claim processing costs;

* Injured parties' net compensation--after deduction of any lawyer fees;

* How compensation compares with economic loss; and

* Time to payment.

With the goal in mind of providing "policymakers with an empirical framework for thinking about trade-offs implicit in auto insurance compensation schemes," the report conducted on the data and analysis that granting efforts will vary from state to state:

* All no-fault plans reduce transaction costs, regardless of plan provisions. No-fault plans that entirely ban access to the liability system reduce transaction costs by about 80 percent. Those that would allow seriously injured people to pursue liability claims would reduce transaction costs by about 20 to 40 percent; the latter translates into a reduction in total injury coverage costs of approximately 10 percent.

* No-fault plans match compensation more closely with economic loss. No-fault plans do this by increasing the fraction of economic loss that is compensated and by reducing the amount of compensation that exceeds economic loss by reducing payouts for noneconomic loss. Injured people with smaller losses tend to recover amounts approximating their medical costs and lost wages, while those more seriously injured recover a larger share of their losses because they can collect both [personal injury protection plan] PIP and liability compensation.

* No-fault plans eliminate compensation for noneconomic loss, such as pain and suffering, for injured people below the threshold.

* No-fault plans generally speed up compensation. Injured people begin receiving payments on average about two months sooner under no-fault plans than under the traditional system.

The key determinants in design of a scheme are its threshold, its benefits, the offsetting of private insurance, and the deductible.

NOTES AND QUESTIONS

1. Constitutionality of Automobile No-Fault Schemes. The personal injury portion of automobile no-fault laws has survived attacks under the due process and equal protection clauses of the Federal Constitution in all state courts of last resort. See Montgomery v. Daniels, 38 N.Y.2d 41, 378 N.Y.S.2d 1, 340 N.E.2d 444 (1975).

The equal protection arguments against the no-fault thresholds have given the courts more difficulty, but the thresholds have been sustained.

The first major case was Pinnick v. Cleary, 360 Mass. 1, 271 N.E.2d 592 (1971). See also Manzanares v. Bell, 214 Kan. 589, 522 P.2d 1291 (1974) ($500 medical threshold); Lasky v. State Farm Ins. Co., 296 So.2d 9 (Fla. 1974) ($500 medical threshold); Fann v. McGuffey, 534 S.W.2d 770 (Ky.1975) ($500 medical threshold); Singer v. Sheppard, 464 Pa. 387, 346 A.2d 897 (1975) ($750 medical threshold). In Gentile v. Altermatt, 169 Conn. 267, 363 A.2d 1 (1975) ($500 medical threshold), the Supreme Court dismissed the appeal, 423 U.S. 1041 (1976). See also Opinion of the Justices, 113 N.H.

205, 304 A.2d 881 (1973) ($1000 medical threshold); In re Requests of the Governor and Senate, Etc., 389 Mich. 441, 208 N.W.2d 469 (1973) ("serious impairment of bodily function" and "permanent serious disfigurement" thresholds); and see Shavers v. Kelley, 402 Mich. 554, 267 N.W.2d 72 (1978).

The Supreme Court of Florida held a no-fault provision regarding damage to the insured vehicle violative of due process when it simply shifted the cost of that risk from the tortfeasor to the injured party. See Kluger v. White, 281 So.2d 1 (Fla. 1973). Most no-fault plans do not cover property damage.

The Michigan Supreme Court has upheld the state's statute against numerous equal-protection objections. See O'Donnell v. State Farm Mut. Auto. Ins. Co., 404 Mich. 524, 273 N.W.2d 829 (1979) and Stevenson v. Reese, 239 Mich.App. 513, 609 N.W.2d 195 (2000) (upholding constitutionality of Michigan's no fault legislation that denies recovery of non-economic damages to uninsured motorists).

2. Deterrence and Costs. Does the adoption of a no-fault compensation plan for automobile accidents result in increased accident rates? See Landes, Insurance Liability and Accidents: A Theoretical and Empirical Investigation of the Effects of No-Fault Accidents, 25 J.L. & Econ. 49 (1982). Cf. O'Connell & Levmore, A Reply to Landes: A Faulty Study of No-Fault's Effect on Fault? 48 Mo.L.Rev. 649 (1983). The Rand Institute for Civil Justice in 2001 published: The Effect of Non-Fault Automobile Insurance on Driver Behavior and Automobile Accidents in the United States, by David S. Loughran, RAND MR-1384-ICJ, 2001. The study, which analyzed accident trends in the United States between 1967 and 1989, found

no statistically significant relationship between states' adoption of a no-fault system and the fatal accident rate, overall accident rates, and other measures of driver care. The study found that it was surprising given the lack of any link that the deterrence argument has had such salience. Are some no-fault laws "out-of-balance," in that they cause higher insurance premiums because total no-fault benefits exceed the reduction of tort liability payments? Would it be preferable to introduce a pre-or post-accident choice for the injured parties as to whether they wish to proceed under no-fault or under the common-law liability system? See O'Connell & Joost, Giving Motorists a Choice Between Fault and No-Fault Insurance, 72 Va.L.Rev. 61 (1986). For a similar scheme employing extrapolations from the Rand findings, above, see O'Connell, Carroll, Horowitz, and Abrahamse, Consumer Choice in the Auto Insurance Market 52 Mo.L.Rev. 1016 (1993); O'Connell, Carroll, Horowitz, and Abrahamse, The Costs of Consumer Choice for Auto Insurance in States Without No-Fault

Insurance, 54 Md. L. Rev. 281 (1995); and O'Connell, Carroll, Horowitz, and Abrahamse, The Comparative Costs of Allowing Consumer Choice for Auto Insurance in All Fifty States, 55 Md. L. Rev. 160 (1996). The desirability of the elective no-fault scheme promoted by Professor O'Connell and his co-authors turns importantly on the cost to motorists of insurance coverage under the scheme and whether the adoption of the scheme would force an increase in the premiums of those staying with traditional tort coverage. In a study prepared for the Joint Economic Committee of the United States Congress by the Institute for Civil Justice: Rand

(April 1997), the authors Allan Abrahamse and Stephen Carroll found that in most states the costs of compensating accident victims for drivers who select elective no-fault would be 60% less than the current system in each state. That would represent a premium savings of about 30% on average for those willing to waive tort rights. In an earlier, 1995 Rand study by the same authors (The Effects of a Choice Auto Insurance Plan on Insurance Costs, Rand, 1995), it was found that the availability of the no-fault option would have no effect on the compensation costs incurred by insurers on their behalf and hence automobile insurance premiums would be uninfluenced. For other aspects, see Cummins et al., The Incentive Effects of No-Fault Automobile Insurance, 44 J. Law & Econ. 427 (2001); Schwartz, Auto No-Fault and First-Party Insurance: Advantages and Problems, 73 S. Cal. L. Rev. 611 (2000). Some other economists seeking to gauge the behavioral force of no-fault schemes have found that such laws increase traffic fatalities: Cohen and Dehejia, The Effect of Automobile Insurance and Accident Liability Laws on Traffic Fatalities, 47 J.L. & Econ. (2004).

3. Other No-Fault Compensation Systems

1. The tort system compensates personal injuries and other losses by a system of fault assessment and liability insurance. Even in cases involving strict products liability or abnormally dangerous activities, there is a measure of moral, economic, or legal fault: the product is defective or unreasonably dangerous; the activity involves abnormal risks that outweigh its value to the community. See, e.g., Powers, The Persistence of Fault in Products Liability, 61 Tex.L.Rev.

777 (1983); J. O'Connell, Ending Insult to Injury: No-Fault Insurance for Products and Services 57 (1975); Owen, The Fault Pit, 26 Ga.L.Rev. 703 (1992); Schwartz, The Vitality of Negligence and the Ethics of Strict Liability, 15 Ga.L.Rev. 963 (1981). Litigating fault and using the court system to compensate victims involves substantial transaction costs and expenses of administration. Critics charge that, for reasons of both efficiency and fairness, a no-fault compensation system should replace the traditional tort system's method of compensating accident victims. See, e.g., J. O'Connell, Ending Insult to Injury: No-Fault Insurance for Products and Services (1975); Peter Cane & James Goudkamp, Atiyah's Accidents, Compensation and the Law, (8th ed. 2018) 464--466.

1353

2. In 1972 New Zealand adopted the first comprehensive administrative system that replaced tort claims with a new no-fault remedy for virtually all accidental injuries. The plan, administered by the government, is a social insurance system that pays limited benefits to all persons who suffer "personal injury by accident." The plan is financed through car-owner, employer, and general tax levies. See G. Palmer, Compensation for Incapacity: A Study of Law and Social Change in New Zealand and Australia (1979); Willy, The Accident Compensation Act and Recovery for Losses Arising From Personal Injury and Death by Accident, 6 N.Z.U.L.Rev. 250 (1975). The New Zealand plan does not replace the tort system in cases involving property damage, non-workplace disease, economic losses or business torts. See Henderson, The New Zealand Accident Compensation Reform, 48 U.Chi.L.Rev. 781 (1981); Franklin, Personal Injury Accidents in New Zealand and the United States,

Some Striking Similarities, 27 Stan.L.Rev. 653 (1975); Phillips, In Defense of the Tort System, 27 Ariz.L.Rev. 603, 605 (1986). Under a social insurance compensation plan as in effect in New Zealand, is there a trade-off in lowered accident deterrence and diminished incentives for safety? See T. Ison, Accident Compensation 165 (1980); Love, Punishment and Deterrence: A Comparative Study of Tort Liability for Punitive Damages Under No-Fault Compensation Legislation, 16 U.C.Davis L.Rev. 232 (1983); Klar, New Zealand's Accident Compensation Scheme: A Tort Lawyer's Perspective, 33 U. Toronto L.J. 80 (1983); International Workshop: Beyond Compensation: Dealing with Accidents in the 21st Century, 15 U. Haw. L. Rev. 524 (1993). Is such a plan feasible in the United States? How much would it cost? Constitutionally and culturally, is this large scale reform feasible? See Goldberg, The Constitutional Status of Tort Law: Due Process and the Right to a Law for the Redress of Wrongs, 115 Yale L. J. 524 (2005).

3. Since 1992, the government, through a series of measures, has shifted the scheme's social welfare objective to one focusing on risk-related insurance. In 1998, for example, employers and the self-employed were given freedom to shop for accident insurance to restrict compensable events and introduce a measure of deterrence into the system. Miller, The 1992 Changes to New Zealand's Accident Compensation Scheme, 5 Canta.L.Rev. 1 (1992) and Miller, An Analysis or Critique of the 1992 changes to New Zealand's Accident Compensation Scheme, 52 Md.L.Rev. 1070 (1993).

The strict risk-related insurance plans relied heavily on stringent, bright-line cut-off limits that left many injuries under-compensated. In New Zealand, public pressure for greater coverage led the 2005

Labour Party-controlled government to liberalize coverage standards that made the question of fault irrelevant. Bright-lines were still required, but medical treatment claims tripled after the first year of enactment while

1354

coverage denial rates declined by half. For an in-depth discussion, see Schuck, Tort Reform, Kiwi-Style, 27 Yale L. & Pol'y Rev. 1 (2008).

4. The tide of the comprehensive compensation scheme appears to be ebbing even in its New Zealand home. Todd & Black, Accident Compensation and the Barring of Actions for Damages, 1 Tort L.Rev. 197 (1993). But for an argument from one of the original authors of the compensation scheme, insisting on its endurance despite policy challenges, see Palmer, Accident Compensation in New Zealand: Looking Back and Looking Forward, 2008 New Zealand L. Rev. 81.

4. No-Fault Compensation in the United States

In the United States, in addition to workers' compensation and automobile accidents, no-fault approaches to injury compensation have been applied or proposed in a number of contexts, including:

A. September 11 Victim Compensation. Within 10 days of the terrorist attack on September 11, 2001, Congress rushed to action in enacting legislation. The legislation adopted a no-fault compensation scheme for victims suffering personal injuries and the survivors of those who died. (Air Transportation Safety and System Stabilization Act, Pub. L. No. 107-42, 405 (b)(2), 115 Stat. 230, 239-40 (2001)).

The legislation parallels the pattern of other compensation schemes in that it trades off a common law claim for a no-fault benefit. Victims were given a choice. The legislation was both designed to free the airline industry of heavy potential claims and to afford swift and fair compensation to victims through public funds. In contrast to other no-fault schemes, the extent of compensation was liberal, allowing recovery of economic loss, extending beyond medical expenses and preset earnings, to "loss of business or employment opportunities" to the limits of applicable state law. Non-economic losses were allowed in a broad sweep for "losses for physical and emotional pain, suffering, inconvenience, physical impairment, mental anguish, disfigurement, loss of enjoyment of life, loss of society and companionship, loss of consortium (other than domestic service), hedonic damages, injury to reputation, and all other non-pecuniary loss of any kind or nature." § 402(7).

The terms of the legislation strongly reflect the underlying tort system. Collateral benefits were to be offset; these included "all collateral sources, including life insurance, pension funds, death benefit programs, and payments by federal, state, or local governments related to the attacks." As the Special Master admitted, the deductions from awards "proved to be one of the Funds' most contentious issues." Final Report of the Special Master for the September 11th Victim Compensation Fund of 2001, Volume 1, (2005) p. 44.

The Special Master, Kenneth R. Feinberg, reported that the fund distributed over $7,049 billion to survivors of 2,880 persons killed and to

2,680 injured persons. The average award to families was over $2 million. For injured victims, it was about $400,000.

Most eligible claimants participated in the Fund rather than proceed at common law. The report details the method by which claims were made and compensation determined. Significantly, the Special Master addressed matters of wider public policy for the compensation of victims of catastrophes. Part III of the Report makes the following observations:

III. OBSERVATIONS AND LESSONS LEARNED

Did the September 11th Victim Compensation Fund of 2001 constitute sound public policy? This question, repeatedly asked by the public, media representatives, public officials and, especially, the September 11th families themselves, is posed in different ways. Did Congress do the right thing in enacting the Victim Compensation Fund? How does one justify the creation of such a Fund limited to September 11th victims and their families, while ignoring the claims of other victims of terrorist attacks at Oklahoma City, the African Embassy bombings, the USS Cole, and the first World Trade Center attack in 1993? Why should Congress provide very generous compensation to a limited number of individuals while excluding other victims of life's misfortunes?

A second question also arises. Even if the Fund can be justified in benefitting only a very small segment of the population, was it a good idea for the Act to require individualized and different amounts of compensation for each eligible claimant? Would it have been wiser to provide a flat payment--the same amount--to each individual

claimant? What problems arise when the statutory mandate requires a separate tailored calculation for each individual? What are the strengths and weaknesses, the pros and cons, of the flat payment, one-size-fits-all approach to public compensation?

Finally, the most frequently asked question: In the event of another terrorist attack, should Congress establish a similar victim compensation fund? Is the September 11th Victim Compensation Fund a viable precedent for a similar future program, or should it be viewed as sui generis, a unique response to a unique historical event?

These are the questions considered in a preliminary summary review of the issues posed. The words "preliminary" and "summary" must be emphasized. The September 11th terrorist attacks occurred just nine years ago. They constitute a contemporary event that currently drives public policy. We still lack the benefit of historical perspective. Compounding this difficulty is the fact that the Fund itself is only now beginning

to undergo scrutiny by public officials, academics, the September 11th families and the public at large. It will, therefore, be a few years before a comprehensive evaluation of the September 11th Victim Compensation Fund in all of its aspects and complexity can be completed. Nevertheless, it is appropriate and timely to offer the Special Master's personal perspective on these issues as at least a preliminary blueprint to guide policymakers--an initial road map to be modified as we learn more about the impact of this unique Program.

A. The September 11th Victim Compensation Fund of 2001: Sound Public Policy?

***

B. The September 11th Victim Compensation Fund of 2001: Different Amounts or the Same for All?

Questions are also posed as to whether Congress acted wisely in providing a statutory compensation scheme that mandated different amounts of compensation for each eligible claimant. Was this a mistake? Why did Congress take this approach and what alternatives might be preferable?

It is easy to understand why Congress did what it did. Since the Act placed limitations on the potential recovery of families and victims in court, the alternative compensation scheme was designed to track the civil justice system in critical respects. Similarly, the definitions of economic and non-economic loss built into the statutory framework tracked traditional tort concepts. The Fund became a familiar conceptual alternative to the tort system and was designed to attract victims and families who otherwise might file thousands of lawsuits against the airlines and others. Individual, tailored awards were designed, at least in large part, to mirror the civil justice system. (Of course, the notion of collateral offsets, also part of the statutory framework, was decidedly not a familiar tort concept, and proved controversial with September 11th families and their lawyers who argued that the offsets severely undercut the very idea of mirroring the tort system.)

But the very idea of individual awards, tailored to the particular circumstances of each eligible claimant, necessitated a more

complex analytical approach to the administration of the Fund. That these challenges were overcome, that, ultimately, 97% of eligible families who lost a loved one on September 11 voluntarily participated in the Program, and that the objectives of the Act were accomplished in such a relatively brief period of time and in a cost-effective manner, can be traced in large part to the Regulations which addressed and solved the most serious problems created by the enabling statute. These Regulations,

1357

and the day-to-day administration of the Fund, proved to be of critical importance in convincing eligible claimants and the public that this unique Program was a credible and effective alternative to conventional litigation.

***

Nevertheless, despite this efficiency and effectiveness, there are serious problems posed by a statutory approach mandating individualized awards for each eligible claimant. The statutory mandate of tailored awards fueled divisiveness among claimants and undercut the very cohesion and united national response reflected in the Act. The fireman's widow would complain: "Why am I receiving less money than the stockbroker's widow? My husband died a hero. Why are you demeaning the value of his life?" The statutory requirement of collateral offsets added to the controversy: "Let me make sure I understand this. Because my wife and I planned our financial future by buying life insurance, you are deducting these life insurance payments from my award. So I am receiving less than my neighbor who never bought life insurance but spent the money on

vacations and new automobiles." The statutory requirement that each individual claimant's award reflect unique financial and family circumstances inevitably resulted in finger-pointing and a sense among many claimants that the life of their loved one had been demeaned and undervalued relative to others also receiving compensation from the Fund.

A better approach might be to provide the same amount for all eligible claimants. Such an approach would eliminate the problem of discerning fact from speculation in calculating individual awards. It would also be easier and quicker to process claims since eligibility for compensation would be the sole issue for a Special Master. Most importantly, such an approach might reduce divisiveness among eligible claimants since, by statute, one size would fit all.

But such an approach is not without controversy. Hundreds or thousands of individual claimants could argue that their financial wherewithal and "exceptional circumstances" justify greater compensation than the uniform amount established by Congress. The same amount, whatever it might be, would have a much different impact on the family of the stockbroker or banker than the family of the waiter, policeman or member of the military. Thus, the impact of any flat award would depend upon the financial and family circumstances of the surviving claimant. Providing the same amount for all eligible claimants can easily be criticized as providing no more than "rough justice." But, on balance, I believe that this approach has much

to recommend it, especially when one considers the available alternatives.

However, the flat amount approach begs (sic) two critically important questions--what exactly is the appropriate amount for an eligible claimant, and should the award come free of any restrictions on the ability of the claimant to access the civil justice system by commencing a lawsuit? These two questions are interrelated. If Congress mandates a flat amount for all, it will likely be relatively modest, tracking, for example, the $250,000 award currently afforded the families of a fireman or police officer killed in the line of duty. This award is mandated by federal law without any restriction on the right of the eligible family to commence a lawsuit against alleged tortfeasors. If the flat amount approach is to be used in the future as the basis for compensating victims of terrorist attacks, it should not be part and parcel of restrictions imposed on the right to litigate in court. Alternatively, the flat amount mandated by statute might arguably be high enough to constitute fair consideration for limiting access to the courtroom. But what is "fair consideration?" Would Congress establish it in the statute or delegate the responsibility to a Special Master? All of these questions and approaches are important food-for-thought in determining the design and contours of any future terrorist compensation program which provides the same amount for all eligible claimants.

C. The September 11th Victim Compensation Fund of 2001: A Precedent for the Future?

***

Even considering the generous levels of compensation provided for in the 9/11 victim compensation fund, a small number of claimants, comprising about 60 total lawsuits, still chose, despite hurdles in evidence, to litigate their claims. See Chanen and Tebo, Accounting for Lives: The 9/11 Victim Compensation Fund Worked. But What About Next Time?, ABA Journal 58, Sept. 2007; Hellerstein et al., Managerial Judging: The 9/11 Responders' Tort Litigation, 98 Cornell L. Rev. 127 (2012) (describing the tort litigation brought by 9/11 responders tasked with cleaning debris from the site of the attack).

NOTES AND QUESTIONS

1. Do you have an opinion about the strength of the tort claims and the capacity of the courts to handle the litigation? See Effron, Event Jurisdiction and Protective Coordination: Lessons from the September 11th Litigation, 81 S. Cal. L. Rev. 199 (2008). Sebok, What's Law Got To Do With It? Designing Compensation Schemes in the Shadow of the Tort System, 53 DePaul L. Rev. 501 (2003). Kenneth Feinberg was again recruited to administer the Gulf Coast Claims Facility (GCCF) established to compensate

persons damaged by the BP Oil Spill imbroglio. The diversity of claimants and the presence of a vigorous class action, militated against an efficient and fair allocation of compensation under the scheme. See Partlett & Weaver, BP Oil Spill: Compensation, Agency Costs, and Restitution, 68 Wash. & Lee L. Rev. 1341 (2011).

Do you agree with Kenneth Feinberg that the September 11th attack and the resulting Fund's establishment is sut generis? Dauber, The

War of 1812, September 11th, and the Politics of Compensation, 53 DePaul L. Rev. 289 (2003).

Should government sponsor an insurance scheme for victims of terrorism and, by extension, victims of crime? Levmore & Logue, Insuring Against Terrorism--and Crime, 102 Mich. L. Rev. 268 (2003) (arguing that insurance of terrorist caused injuries may stimulate government-sponsored insurance against crime, thus prompting greater governmental precautions against criminally caused injuries). What of compensation for those who suffer from unmitigated climate change? See Molk, The Government's Role in Climate Change Insurance, 43 B.C. Envtl. Aff. L. Rev. 411 (2016) (arguing for government involvement in a national climate change insurance program).

A. Other Federal Compensation Plans. In 1969, Congress passed the Black Lung Act, 30 U.S.C.A. §§ 901 et seq., to compensate coal miners and their dependents for the disabling respiratory disease known as "black lung." Whether viewed as a compensation system to miners, a subsidy to the mining industry, or as a type of welfare benefit, the federal black lung program represents an innovative solution to compensation in a case in which traditional tort and workers' compensation remedies proved inadequate because of the progressive nature of the disease and the effect of statutes of limitations and workers' compensation statutes that, at that time, failed to cover occupational diseases. See Ramsey & Habermann, The Federal Black Lung Program--The View From the Top, 87 W.Va.L.Rev. 575 (1985); Barth, The Tragedy of Black Lung: Federal Compensation for Occupational Disease (1987) For a history of black lung and the belated public health, regulation, and

compensation response, see Derickson, Black Lung: Anatomy of a Public Health Disaster (1998).

Political forces, focused by lawsuits, have prompted Congress to consider schemes consonant with the pattern of the Black Lung legislation. For example, some companies that manufactured products incorporating asbestos have sought legislative compensation schemes disposing with common law litigation, and Vietnam veterans successfully lobbied for wider legislative compensation schemes. Veterans' Dioxin and Radiation Exposure Compensation Standards Act, 38 U.S.C.A. § 354. Congress, however, has been wary of expanding regulatory schemes to provide for private rights of action for personal injuries. See discussion of Superfund legislation noted in Chapter 16. For discussion of these proposals see Gaskins, Environmental Accidents: Personal Injury and Public Responsibility (1989), 253--89.

Chapter 15 noted that liability for the harmful effects of vaccines deterred their beneficial development, production, and use. In order to

alleviate this concern a no-fault compensation program was introduced under the National Childhood Vaccine Injury Act of 1986 (42 U.S.C.A. §§ 300aa-10 to 300aa-33). The fund is financed by an excise tax on each dose of vaccine. The statute covers all actual medical expenses as well as costs of rehabilitation, lost wages, if any, based on average earnings in the non-farm sector, and a capped discretionary award for pain and suffering. A claimant may opt for a common law claim but an attempt was made to make this

option unappealing by the application of common law principles. (E.g., Restatement (Second) of Torts § 402A, comment k.) For a discussion of the shortcomings of the NCVIA and subsequent no-fault vaccine liability schemes, see Apolinsky and Van Detta, Rethinking Liability for Vaccine Injury, 19 Cornell J. L. & Pub. Pol'y 537 (2010).

Who are the winners and losers under these compensation schemes? Could they be the precursors of a general no-fault compensation scheme for all injuries? Harris et al., Compensation and Support for Illness and Injury (1984). Remember that Congress provides a social security "safety net" covering, in varying degrees, unemployment, hospital and medical expenses, disability, retirement and survivor's benefits. Should the tort system be abolished and compensation integrated with a revamped social security system that could deliver benefits more efficiently? Sugarman, Compensation for Accidental Personal Injury: What Nations Might Learn from Each Other, 38 Pepp. L. Rev. 597 (2011); Wagner, Tort, Social Security, and No-Fault Schemes: Lessons from Real-World Experiments, 23 Duke J. Comp. & Int'l L. 1 (2012).

B. Medical Malpractice. Periods of high tort claim frequency and severity have, in certain geographical areas, like Dade County, Florida, sharply raised, insurance premium levels or made insurance difficult to obtain. Chapter 4 noted legislative reforms that have ensued. Often the reforms have capped damages, reduced limitation periods, abolished the collateral benefits rule, required arbitration, regulated contingent fees, and provided for periodic payments. For appraisal see Danzon, Medical Malpractice: Theory, Evidence, and Public Policy (1985). Williams, The Cure for What Ails: A Realistic

Remedy for the Medical Malpractice "Crisis," 23 Stan. L. & Pol'y Rev 477 (2012).

More thoroughgoing systemic reforms have been suggested. Paul Weiler, Medical Malpractice on Trial (1991), urges the adoption of a no-fault scheme. His work derives from a large empirical study on medical malpractice in New York. Harvard Medical Malpractice Study, Patients, Doctors, and Lawyers: Medical Injury, Malpractice Litigation, and Patient Compensation in New York (1990). Institutional coverage may have advantages over traditional liability insurance, since premiums may be aligned more readily with risk and institutions may effectively monitor physician behavior. Sage, Enterprise Liability and the Emerging Managed Health Care System, 60 Law & Contemp. Prob. 159 (1997); Abraham & Weiler, Enterprise Medical Liability and the Evaluation of the American Health Care System, 108 Harv. L. Rev. 381 (1994); MacCourt and Bernstein, Medical Error Reduction and Tort Reform Through Private, Contractually- Based Quality Medicine Societies, 35 Am. J. L. and Med. 505 (2009).

1361

The American Medical Association has suggested an approach to take adjudication from the hands of the courts. Johnson, Phillips, Orentlicher, and Hatlie, A Fault-Based Administrative Alternative for Resolving Medical Malpractice Claims, 42 Vand. L. Rev. 1365 (1989). One study of Florida closed claims demonstrates that claimants sue for a variety of reasons, including vindication or to uncover information. What does this imply about no-fault reform? Sloan, et al., Suing for Medical Malpractice (1993).

In another study, Viscusi and Born examined the property and casualty insurance files of the National Association of Insurance Commissioners for 1984-1991 to assess the effect of medical malpractice reforms pertaining to damage levels and the degree to which damages are insurable. The authors found the limits on non-economic damages had the most impact on insurance market outcomes. They found also that punitive damage reforms have expected impacts. In consequence, insurer profits were enhanced. Viscusi & Born, Damages Caps, Insurability, and the Performance of Medical Malpractice Insurance, 72 J. of Risk & Ins. 23 (2005). But cf., Baker, Medical Malpractice and the Insurance Underwriting Cycle, 54 DePaul L. Rev. 393 (2005) (examining the insurance underwriting cycle and its influence on medical malpractice insurance premiums and patient safety). The interaction of the goals of reform, insurance and health outcomes are the subject of close examination. For a sampling see: Baker & Silver, How Liability Insurers Protect Patients and Improve Safety, 68 DePaul L. Rev. 209 (2019); Silver et al., The Impact of the 2003 Texas Medical Malpractice Damages Cap on Physician Supply and Insurer Payouts: Separating Facts from Rhetoric, 44 The Advoc. (Texas) 25 (2008); Sharkey, Unintended Consequences of Medical Malpractice Damages Caps, 80 NYU L. Rev. 391 (2005) (examining the "crossover effect" of noneconomic damages caps increasing the amount of economic damages awarded); and Daniels and Martin, Damage Caps and Access to Justice: Lessons from Texas, 96 Or. L. Rev. 635 (2018).

The public prominence of medical malpractice reform highlights the journey of tort law from the fustian courtroom and lawyer's office to

the razzmatazz of the political stage. Medical malpractice has been propelled into the political maelstrom of health care reform; reform of medical malpractice is urged as a means of lowering the cost of health care. Unfortunately, rational analysis is often abandoned for the strum und drang of slogans and shoddy analysis. For example, in a government study, evaluation of the costs of medical malpractice system turned on reports of physician attitudes and fears. Confronting the New Health Care Crisis: Improving Health Care Quality and Lowering Costs by Fixing our Medical Malpractice Liability System, U.S. Department of Health and Human Services (2002). For a criticism of the methodologies and conclusions of those advocating draconian reform, see Tom Baker, The Medical Malpractice Myth (U. Chi. Press, 2005).

The critical stimulus to good health outcomes is an appropriate array of incentives, including liability rules. It is not enough to say that the liability is costly; the question is whether the costs are justified in preventing bad outcomes and promoting good outcomes.

1362

The claims made about tort reform and no-fault schemes, and modifications thereto, have been episodically examined. Empirical studies concentrate on cost savings, but these are contested, and their savings may be radically less than claimed. Black et al., The Effects of "Early Offers" in Medical Malpractice Cases: Evidence from Texas, 6 J. Emp. Leg. Stud. 723 (2009). Some reforms also produce untoward results in equalities in classes of persons compensated. Some persons falling outside the parameters of a compensable incident will not be compensated despite their claim to

being similarly situated. Moreover, the issue cannot exclusively turn on cost savings, but must be purposed toward the optimal reduction of medical mishaps.

The Patient Protection and Affordable Care Act, Pub. L. No. 111--148, 124 Stat. 119 (2010) was landmark legislation. The reform, during its long gestation period, was roundly attacked for failing to address medical malpractice issues. However, the legislation addresses the reform issue in a deliberate and constructive fashion. Section 10607 provides grant support for "State Demonstration Programs to Evaluate Alternatives to Current Medical Tort Litigation." For an account of early grant projects, see Hafemeister and Porter, The Health Care Reform Act of 2010 and Medical Malpractice Liability: Worlds in Collision or Ships Passing in the Night?, 64 SMU L. Rev. 735 (2011). For a recent proposal, see Raper, Announcing Remedies for Medical Injury: A Proposal for Medical Liability Reform Based on the Patient Protection and Affordable Care Act, 16 J. Health Care L. & Poly 309 (2013); Popper, The Affordable Care Act is Not Tort Reform, 65 Cath. U. L. Rev. 1 (2015); and Shepherd, Uncovering the Silent Victims of the American Medical Liability System, 67 Vanderbilt L.Rev. 151 (2014).

Do you think that the federal government ought to take a role in reforming medical malpractice law? In pondering the desirability of reforms, bear in mind that the capacity to sue at common law not only is justified by compensation and deterrence, but also in according to claimants a sense of vindication and satisfaction in discovering the circumstances surrounding the medical incident causing the injury.

Perhaps, as in non-medical liability, radical changes from the court-based fault liability may be expected only in pockets where liability problems seem intractable. For example, liability for birth-related neurological injuries attracts legislative attention. The claim for compensation calls for compassion while the concern for heavy and frequent claims attracts concerns about reducing the availability of health care services. In Virginia obstetricians were threatened with denial of coverage for such harms. The Virginia legislature in 1987 passed the Birth-Related Neurological Injury Compensation Act (Injured Infant Act), Va.Code Ann. §§ 38.2-5000 to 5021. The Act covers

injury to the brain or spinal cord of an infant caused by the deprivation of oxygen or mechanical injury occurring in the course of labor, delivery or resuscitation in the immediate post-delivery period in a hospital which renders the infant permanently motorically disabled and (i) developmentally disabled or (ii) for infants sufficiently developed to be cognitively evaluated,

1363

cognitively disabled. In order to constitute a "birth-related neurological injury" within the meaning of [the act], such disability shall cause the infant to be permanently in need of assistance in all activities of daily living.

Compensation is for all medical expenses not covered by other insurance. Lost wages for ages 18 to 65 are paid on a periodical basis at the rate of one-half of Virginia's average weekly earnings (non-farm). Few claims have been made so far and funding has been an issue.

Florida enacted similar legislation in 1988. Fla. Code § 766.301-316. Implementation of the Florida scheme has been problematic. The issue in this scheme, as with others, has been to confine the class of injuries and beneficiaries within the no-fault scheme. The pressure to extend common law liability principles to covered injuries is relentless. Sloan, et al., The Road from Medical Injury to Claims Resolution: How No-Fault and Tort Differ, 60 Law & Contemp. Probs. 35 (1997), report on aspects of the no-fault schemes finding them modestly successful.

For commentary, see Duff, Compensation for Neurologically Impaired Infants: Medical No-Fault in Virginia, 27 Harv. J. Legis. 391 (1990); Bovbjerg & Sloan, No-Fault for Medical Injury: Theory and Evidence, 67 U. Cin. L. Rev. 53 (1998) (attempting to assess the success of the Florida and Virginia schemes and concluding that such limited no-fault schemes do not achieve the goals ascribed to no-fault); Martin, NICA-Florida Birth-Related Neurological Injury Compensation Act: Four Reasons Why This Malpractice Reform Must be Eliminated, 26 Nova L. Rev. 609 (2002) (providing a useful history of the legislation and reasons for its repeal).

C. Products Liability. As noted in Chapter 15, products liability has received close attention from reformers. Some have suggested a broad departure from strict liability as developed by the courts. Viscusi, Toward a Diminished Role for Tort Liability: Social Insurance, Government Regulation, and Contemporary Risks to Health and Safety, 6 Yale J. on Reg. 65 (1989); Ausness, An Insurance-Based Compensation System for Product- Related Injuries, 58 U. Pitt. L. Rev. 669 (1997) (suggesting and defending a scheme by which product sellers would be obliged to reimburse

injured consumers on a no-fault basis for economic losses). Others, however, recommend absolute liability as appropriately fulfilling goals of compensation and deterrence. Hanson & Logue, The First-Party Insurance Externality: An Economic Justification for Enterprise Liability, 76 Cornell L.Rev. 129 (1990); Croley & Hanson, Rescuing the Revolution: The Revived Case for Enterprise Liability, 91 Mich. L. Rev. 683 (1993).

With respect to tobacco-related diseases, Professors Hanson and Logue in The Costs of Cigarettes: The Economic Case for Ex Post Incentive-Based Regulation, 107 Yale L.J. 1163 (1998), note the lack of information available to consumers and in consequence would hold tobacco companies strictly liable in tort for tobacco-related diseases. At the same time, a compensation scheme could be established to process claims under an administrative tribunal. Their proposal is criticized by Professors LeBel and Ausness, Toward Justice in Tobacco Policymaking: A Critique of Hanson and Logue

and an Alternative Approach to the Costs of Cigarettes, 33 Ga. L. Rev. 693 (1999). These professors support a tax levy that would support research, education, and health care relating to tobacco use. An immunity would be provided to the companies. They urge that their recommendations are more faithful to the moral or justice dimensions of the law. For a discussion of the history and future of tobacco litigation, see Anderson and Twerski, Reaching Equilibrium in Tobacco Litigation, 62 S.C. L. Rev. 67 (2010).

Similar to the tobacco experience, actions have been brought against producers and marketers of opioids. In an effort to direct

verdicts obtained to the benefit of victims the litigation attempts to set up dedicated funds, opioid remediation funds. See Terry, The Opioid Litigation Unicorn, 70 S.C. L. Rev. 637, 661--62 (2019) (discussing whether funds gained in litigation will be diverted to opioid relief or general tax funds). Local ordinances have attempted to segregate the funds to the purposes of the litigation and settlements. See, e.g., Cuyahoga County, Ohio, Municipal Code § 725 et seq. Outside litigation, taxing schemes on distributors of opioids have been suggested and initiated. These, as in New York, have been challenged in court. See N.Y. Pub. Health Law § 3323 (McKinney) (2018) (Opioid Stewardship Act); Healthcare Distribution All. v. Zucker, 353 F. Supp. 3d 235 (S.D.N.Y. 2018) (finding the Opioid Stewardship Act unconstitutional as a violation of the dormant commerce clause of the United States Constitution).

Asbestos litigation has bedeviled the American courts. The claims have been high in number and often severe in magnitude, threatening bankruptcy of defendants. Cole, A Calculus Without Consent: Mass Tort Bankruptcies, Future Claimants, and the Problem of Third Party Non-Debtor "Discharge," 84 Iowa L. Rev. 753 (1999). Congress has considered legislation to institute a compensation scheme for asbestos injuries. Asbestos Compensation Act of 2003, 108 H.R. 1586/108 H.R. 1737 and 108 S. 412/1085, 1125. Rabin, Some Thoughts on the Efficacy of a Mass Toxic Torts Administrative Compensation Scheme, 52 Md. L. Rev. 951 (1993). Compensation schemes for product-related injuries are confounded by the same requirement as for other schemes: the compensation must be triggered by a defined or compensable event. How is the requirement to be defined for a scheme covering injuries

caused by products? A person burns her hand on a stove? Drinks too much liquor? Drives a car off a bridge? Recall the California Supreme Court in the Southern California Gas Leaks Case, supra Chapter 8: Pure Economic Loss, identified the limits of tort liability in compensating those suffering loss.

D. Elective No-Fault Insurance Contracts. To cover athletic injuries, particularly those sustained in high school football, many school districts purchase insurance contracts that oblige insurance companies to make prompt offers to pay an injured athlete's medical expenses and other economic losses set forth in the policy. But the world of politics did not treat these approaches favorably, and they were opposed by both consumer and business groups.

If the claimant accepts the payment, a release is obtained and no tort suit may be brought. If the payment is not accepted, the victim may proceed

with a tort suit. See O'Connell, Elective No-Fault Liability by Contract--With or Without An Enabling Statute, 1975 U.III.L.Forum 59--72 (1975). Do you consider that a viable scheme may be implemented in respect of players in the NFL suffering from Chronic Traumatic Encephalopathy (CTE)? For the inherent problems of determining eligibility for compensation and maturation of claims, see Harris, We've Only Just Begun: Determining Who Pays After the Approval of the NFL Concussion Settlement, 83 Def. Couns. J. 156 (2016) (analyzing the approved settlement between the NFL and former players and the NFL's indemnity claims against its insurers).

E. Additional proposals for substituting plans for the tort system have been prepared and forcefully presented. See, for example, Pike, Recovering from Research: A No-Fault Proposal to Compensate Injured Research Participants, 38 Am. J. L. and Med. 7 (2012). For an interesting discussion of contemporary perceptions of no-fault schemes in various contexts, see Sanders et al., Must Torts Be Wrongs? An Empirical Perspective, 49 Wake Forest L. Rev. 1 (2014).

F. Do you agree that Professor John Fleming's 1988 assessment of the American compensation picture continues to be accurate?

The overall accident compensation landscape in America is therefore highly fragmented and lacking any systematic plan. The benefits of tort liability are not husbanded for those who are un- or under-compensated from other sources but are distributed randomly without regard to the needs or deserts of victims. Its grossly inflated transaction costs add to the remarkable inefficiency of the tort system. Only the affluence of American society has deflected serious misgivings about this wasteful arrangement and about the need to develop a more purposeful compensation policy such as that which other countries, with more limited resources, have been driven to pursue.

J.G. Fleming, The American Tort Process (1988), 30-31.

5. The Future

The fifth edition of this casebook was published five decades ago, in 1971. The first automobile no-fault statute had just been passed by the Massachusetts legislature. No cases had been decided on the

statute but the concept was being ardently pushed by its proponents and just as strongly opposed by its detractors. The subject could not then be treated in the traditional casebook fashion, but that edition contained a chapter entitled "Automobile Accidents--Tort Law or Reparation System?" The text described the alleged deficiencies in the existing systems, the steps that had been taken in some states to alleviate them, and the various proposals for extensive reform; and it identified the "policy issues" involved in the decisions to be made. It concluded with a reference to the future and presented this challenge:

"It takes more than a crystal ball to predict what the state of the law will be 20 to 40 years from now. But that is the time

when you will be in your prime as a lawyer. Whatever develops, it will be a legal matter and as an attorney you are likely to be deeply involved in it. Speculate now, with the wisdom and background you presently have, both as to what will be the state of the law 30 years from now and as to what [you think] it should be. Why not do it in writing so as to make your thoughts more lucid and concrete? And then you can check yourself as the years roll by to see both how good a legal prognosticator you are and whether your viewpoints on desirable solutions have changed." Prosser and Wade, Cases and Materials on Torts 650 (5th ed. 1971).

The options are greater now than they were then but the limits of reform are more fully appreciated. The pressure for adoption of a reparation system is not as intense at present, but it is steady, especially with our expanded knowledge of the causes of disease

and environmental hazards. As we finish this edition, we note the COVID-19 pandemic in which we are now mired. What compensation demands will ensue? We would like to repeat this challenge to you now. You will find the experience a stimulating one. What do you predict as the ultimate outcome, and what do you wish that outcome to be?

NOTICE

This accessible media has been made available to people with bona fide disabilities that affect reading. This notice tells you about restrictions on the use of this accessible media, which could be a book, a periodical, or other content.

Copyright Notice

Title: Prosser, Wade And Schwartz's Torts, Cases And Materials

Author: Victor Schwartz, Kathryn Kelly, David Partlett

Copyright 2020 by LEG, Inc. d/b/a West Academic

This notice is not part of the copyrighted work, which begins below after the phrase "Begin Content".

Bookshare distributes this accessible media under restrictions set forth either in copyright law or in an agreement with the copyright owner. If you are not a person with a print disability, or an agency serving people with print disabilities, you should not use this accessible media and should destroy this content. You are not allowed to redistribute content derived from this accessible media to anybody else, with one exception: we allow hardcopy Braille books prepared from Accessible Media to be provided to other blind people.

Access to accessible media through Bookshare is a valuable right and privilege. Protect this access for the print disabled community by complying with these restrictions!

You, your parents, or your school (or agency) signed a Bookshare agreement. For the full text of the current version of the Member Agreements, please visit www.bookshare.org/Agreements. This information in this accessible media file does not in any way change the terms of your Agreement with Bookshare.

Limitation of Liability; Indemnity by User

Most authors and publishers do not have control over the content available through Bookshare. By downloading and using this material, you agree that neither Bookshare nor the authors or original publishers of the materials shall be financially responsible for any loss or damage to you or any third parties caused by the failure or malfunction of the Bookshare Web Site (www.bookshare.org) or because of any inaccuracy or lack of completeness of any content that you download from the Web Site.

BOOKSHARE, AND THE AUTHORS, PUBLISHERS AND COPYRIGHT OWNERS OF THE MATERIALS, SHALL NOT IN ANY CASE BE LIABLE FOR DIRECT, INDIRECT, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES, WHETHER BASED ON CONTRACT, TORT OR ANY OTHER LEGAL THEORY, IN CONNECTION WITH OR ARISING OUT OF THE FURNISHING OF CONTENT, THE FUNCTIONING OF THE WEB SITE, OR ANY OTHER ASPECT OF YOUR USE OF THE WEB SITE AND THE CONTENTS PROVIDED HEREUNDER.

You agree to indemnify and hold Bookshare and Benetech, the Web Site provider, harmless from any liability, loss, cost, damage or expense, including reasonable attorney's fees, that result from any claim made by any author, publisher or copyright owner that you, or any one acquiring copies of copyrighted materials downloaded from the Web Site through you, is not print disabled or otherwise entitled to download and use the digital materials from the Bookshare Web Site. This indemnity includes any claims arising out of any breach of your obligations under your Member Agreement, whether by reason of misuse, negligence or otherwise.

Permitted Use; Limited Waiver of Privacy Principles and Laws

You are permitted under this restricted license to use this digital copy for your own personal use. However, any further reproduction, distribution, or any commercial usage requires the express, prior consent of the copyright holder.

This material contains digital watermarks and fingerprints designed to identify this material as a Bookshare digital material that was specifically downloaded by you. It is generally illegal to delete or modify these watermarks and fingerprints, as well as being in violation of the terms of your Member Agreement. Your Member Agreement expressly authorizes us to include these security devices, solely for this use, as an express exception to current and future privacy laws relating to protection of personal information data. Should any future privacy law or regulation preclude the use of this personal data for purposes of tracking the downloading and use

of these materials and enforcing the limitations of relevant copyright law or the Member Agreement, your right to use these materials will terminate on the effective date of any such law or regulation.

This material was downloaded by Demetrio Gonzales and is digitally fingerprinted in the manner described above.

Book Quality

Bookshare is interested in improving book quality over time, if you can help us by providing any book quality feedback, we'll work hard to make those changes and republish the books.
